Smooth Sailing. The Venezuelan Arbitrators Have

Been Chosen. And the Treaty Signed by Representatives of Britain and the United

States. Washington, D. C., Feb. 3.-The delay in completing the Venezueian treaty was caused by the difficulty in making up the personnel of the arbitral commission, not so much from objections to persons nominated by either sides as from the trouble experienced in arranging the tribunal so as to interfere as little as possible with the important routine work of the Supreme Court of the United States and Great Britain, from which bodies four of the arbitrators are drawn. Notice, however, was received

by cable this morning from London that the Privy Council had finally onfirmed the selections made. The four arbitrators, it is understood, will be Chief Justice Fuller and Justice Brewer, of the United States Supreme Court, and Lord Herschell and Sir Richard Henn Collins, Knight.

Justice of her Majesty's Supreme Court of Judicature. The fifth arbitrator in case of need will be named by King Oscar. By the terms of the treaty the agents of the two Governments, Great Britain and Venezuela, must deliver the complete cases at Paris, where the arbitration tribunal will meet, within eight months of the ratification of the treaty, with three months additional allowed for the submission of the

counter cases, so that the entire arbitration probably will occupy a year London, Feb. 3.—Baron Herschell, who was Lord Chancellor in the Rosebery Cabinet, and Justice Richard Henn Collins, Q.C., of the High Court of Justice, have been selected as the British members of the Venezuelan arbitration commission. Sir Julian Pauncefote, the British ambassador at

Washington, and the Venezuelan plenpotentiary there, are expected to sign the arbitration treaty today.

BRITISH BYE-ELECTION. A Tory Majority Cut Down by 1,703

Votes, London, Feb. 2.—The election held yesterday in the Rolford division of Essex, for a member of Parliament to succeed Mr. Money-Wigram (Con.), who recently resigned his seat, resulted in the return of Mr. Louis Sinclair (Con.), thus retaining for the Govern-ment a seat which had returned a Liberal from 1885 until the general elec-tion of 1895, when Mr. Money-Wigram defeated the Liberal candidate by 1.-828 votes. The polling yesterday was as follows: Mr. Louis Sinclair (Con.) 8.156, and Mr. Raphael (Lib.) 8.031; Consavative majority 18.031; Conservative majority 125. Consequently there has been a falling-off of 1,703 votes for the Conservatives in

Brantford, Feb. 3.-The Premier of Canada and the Premier of Ontario Price, 25 cents at all Drug Stores. addressed one of the greatest and most effective campaign meetings ever held in Brantford last evening. The election of a member for South Brant has been contested with a heat and bitterhess that will not soon be forgotten, but the visit of Mr. Laurier and his 216 Dundas St., London, Ont. statesmanlike speech gave a decidedly higher battle-ground. Petty issues are forgotten, and it is upon the broad questions of policy that divide the Liberal party from the Conservative that the electors of South Brant will vote tomorrow if they heed the appeal of the Premier, and that the appeal will be effective when the electors are alone with the ballot was evident from the close attention with which the arguments of the Premier were followed by the thousands of citizens who crowded last night's meeting. Mr. Hardy also was in splendid campaigning form, and made an extremely effective speech. Mr. Paterson, also, made a telling oration, and the declarations made by all the speakers that Canadian industry has nothing to fear from the Liberal Government were received with the utmost satisfaction. The appearance of Mr. Marcil, one of the best orators of Quebec, was made the occasion for a splendid display of the spirit of unity that has drawn very closely the bonds of brotherhood between the Liberals of

French and Lnglish-speaking Canada.

The audience in the drill hall numbered at least 7,000 persons. INCIDENTS OF TRAVEL. Mr. Laurier had spent a long and was taken. wearisome day in the journey from Penetanguishene on the shores of the Georgian Bay, to Brantford. The slowgoing local on which he made the first stage as far as Barrie left Penetanguishene before 7 o'clock. The Premier climbed aboard unattended, and in a few minutes was chatting away in French to a fellow-passenger who had addressed himself to a ladycompanion in the tongue of Quebec. At the next station an eminent divine of the Presbyterian Church came aboard and paid his respects to the Premier. On his arrival at Brantford Mr. Laurier was driven to the residence of Hon. wm. Paterson, where he rested for a couple of hours. Meanwhile the preparations for the demonstration Probable Murder in a Commercial Colwere completed, the streets began to fill up with citizens and visitors, and the headquarters of the Reformers became crowded to overflowing. Long before 7 o'clock the drill shed, in which the meetings was to be held, began to fill up. A special train came in from Paris, loaded with cheering Liberals. The central portion of the huge building was occupied by ladies within a few minutes after the doors were opened. The hall was gaily decorated with palms, evergreens and bunting. Behind the platform were portraits of the Liberal leaders. Every

point of vantage in the huge building was occupied by mottoes. By half-past 7 the crowds had become so dense that it was almost impossible to force a way into the hall, and it was very evident that few of those who had remained outside to of the body was roasted. join in the procession could get places in the drill shed. The procession had been formed at the Kerby House, and for blocks around the streets were lit up by the torches of the enthusiastic Young Liberals. The procession was headed by the bugle band of the Dufferin Riffes. Then came the torch-bearers and the C. O. F. Band. The central point of interest was the carriage in which sat the two Premiers independent of interest was the carriage in which sat the two Premiers indence. and Messrs. Paterson and Heyd. As and Messrs. Paterson and Heyd. As the procession moved by George and Dalhousie streets to the drill shed a magnificent display of fireworks and crackers were lit and rockets discharged. The rear of the procession was formed of citizens in sleighs, and the Paris contingent, headed by the Paris Band. Before the vanguard of the procession reached the hall hundreds of people had been turned away. Amid a scene of the wildest enthusi-asm the Premier entered, and was greeted with three mighty cheers and the waving of handkerchiefs by the ladies. With difficulty he was hoisted to the platform from amidst the cheering throngs. Then Mr. Hardy, Mr. Paterson and Mr. Heyd were also

elevated. The platform was crowded with many of the most prominent Cheers for the Queen and the Liberal leaders closed the meeting.

Mr. Henry held a very well-attended meeting in the opera house, at which he himself was the principal speaker.

Great Railroading Through Kick ing Horse Pass.

Interesting Interview With the Oldest Engineer on the Division.

Mr. James Ormister in the City - The Great Divide-Grand Scenery.

Twenty-five years ago an English traveler journeyed from the land of his birth to the wilds of British Columbia, making the voyage by way of India, Australia, and San Francisco. In the Canadian territory he traveled as far east as the Rocky Mountains, enduring great hardship, but exhilarated by the grandest scenery to be

found in the world. He reached a spot, since famous as the Park of Canada. Standing on the summit of the Kicking Horse Pass, 5,300 feet above the level of the sea the lonely adventurer was surrounded by the lofty snow-capped mountains another, were plainly visible. His eye wandered down the Bow River · Valley to the southeast, and 48 miles distant the foot hills could be seen. Looking up at Mount Stephen . the traveler could see a little stream hur-Mr. Robert Fitzsimmons, one of the rying down the winding course to the summit of the pass, where it divided, deciding which direction they should take. The traveler, as he stood contemplating that little mountain stream, noting its source in a glacier close by, little thought what food there was for reflection connected with it. That is the great water shed of the continent. The portion of the stream that rushes down to the west be-comes augmented and forms the Kicking Horse River, which joins the Columbia River, and in this way reaches the Pacific Ocean. The other half of the little stream becomes the Bow River, empties into the Saskatchewan, and finally crosses the continent to the east, and after an infinitely longer journey reaches its eternity, the sea. The traveler endured the hardships of pioneer life a few years,

and recently visited his old home; but how different was his return trip to his first journey to Kicking Horse Pass! The Canadian Pacific Railway Three special engines are used at Kicking Horse Pass to assist through trains up and down the heavy grades on either side, and the engineers are men of extraordinary nerve. Then followed a volley of questions from various trustees about whether McDonald kept the fires going all night, or burnt out the lining of two of the furnaces, or used more coal,

Mr. Merchant said he believed the fires were kept up all night. The linings of two of the furnaces had been fixed since McDonald came, but he claimed they were warped when he came. Mr. Merchant did not know.

He did not weigh out the coal. The Chairman-It is not a matter of coal, but of heating the school. Messrs. McDonald and Jury were each given a hearing. "The Collegiate Institute, which has been growing in popularity and excel-lence during the last few years, has during the past twelve months made Inspector Seath shows the highest rank in every department. The increased number of pupils, after the midsummer holidays, necessitated the procural of the services of an additional teacher, and according to Inspector Seath's report the staff is not yet large enough for the number of pupils. To secure the best results two additional teachers, as well as more accommodation, is required. Tomorrow's Bye-Elections

Tomorrow three bye-elections for the Dominion take place in Ontario. In each constituency the member un-Conservative, so that if any of the seats are won it will be a clear gain to Premier Laurier. Each seat won will represent a change of two on a

In South Brant, Hon. Wm. Paterson was defeated by a majority of 91 at the general election. Mr. Henry, the successful candidate then, is again the Conservative nominee. He is making a desperate battle to retain hold of the constituency, and is pleading that the Government is strong enough to let him keep the seat to which it has been proved he was not fairly elected. It remains to be seen how far the sympathy dodge will work.

In North Ontario, Mr. Duncan Graham, a Liberal-Patron farmer, was elected in June by a small mafority, but the ballot-stuffer got in his work, and secured a temporary Conservative triumph. The candidate then successful now stands aside in favor of Mr. Angus McLeod, a lumberman. Our belief is that Mr. Graham's majority this time will be large, and no ballot-stuffer will be permitted to menace it.

The most interesting, because the stiffest, fight is in East Simcoe, the large region lying between Lake Simcoe and Georgian Bay, side by side with North Ontario. In this constitu- tive majority was 1,827. The political ency, the veteran Liberal, H. H. Cook, tide has turned in Britain. who has fought eleven contests in the district and won seven of them, opposes Mr. Bennett, the member unseated because of corrupt practices. Both men are experienced campaigners, and the fight will be to the finish, but most people believe that the Government candidate will triumph.

The Pennsylvania capitol, burned down yesterday, was one of the old- lion output of British Columbia and est State buildings in the Republic, the States and Territories west of the The loss of the structure would have Missouri River, is of much interest been borne with equanimity, but there at the present moment: is much regret that many valuable historic records, which cannot be replaced, have been destroyed.

The Hamilton Spectator prints a re port to the effect that Mr. John Came ron, of The Advertiser, is about to become postmaster of London. Ther is absolutely no truth in the state

Bribery.

The Toronto Telegram points out that "counsel for the respondent in the London election trial have insisted that witnesses for the petitioner must be men of exemplary life and truthful character," and it points out that "this principle could be applied in such a way as to destroy the usefulness of election trials." Here is our contemporary's contentions:

"Since bribery is only influential among the depraved and worthless, it rules. follows that the depraved and worthless must supply evidence of bribery. There is an element of hardship in the operation of a law which would deprive a member of his seat because to the venality of a "pagan" Indian. certain worthless individuals swear Isn't the "Christian" white man who that they were bribed by his legal did the bribing more to be censured agents. There is also an element of injustice in the operation of a law which would keep an illegally elected member in his seat because certain agents swear that they did not bribe certain men who swear that they were bribed

These comments do not refer to the London election trial, save in so far as the circumstances of that trial illustrate a public principle. The question abounds in diuculties. To say that men who take money for the votes which they afterwards swear in are unworthy of belief is to encourage bribery. All that candidates who wish to bribe up constituencies need do is to employ agents who will not only bribe, but afterwards swear that they did not bribe, and if the men who were influenced by the money are not to be believed under any circum-stances, the law relating to election trials might as well be wiped off the

statute book." The argument can scarcely be successfully combatted. Our contemporary might, however, have extended its characterization of the class of men susceptible. It has generally been held by the public that, though contrary to law, there was nothing very venal in an outside voter accepting a railway ticket and a day's pay as a condition of his coming to vote. There Is much evidence in support of the view that this was done in the case now pending. But surely the men who have insisted on keeping the crimebreeding Dominion Franchise Act on the statute book should not object to its being put in force against them as opportunity offers. The class of men who have given evidence that they aided in breaking the law in this regard were not worthless. They were just as reputable as the men who gave evidence to the effect that these work- There is nothing ambiguous about

The Toronto Mail and Empire asserts that the friends of the Government at Ottawa have entered into a conspiracy to carry the three byeelections tomorrow. This is shocking. Never before, it is no doubt contended by our contemporary, has an Ottawa Administration desired to have supporters elected in the bye-elections. Is it not a most dastardly thing for the Liberals of Canada to seek, in the bye-elections, to carry seats stolen from them by corrupt means at the general election?

A Word With Mr. Foster.

Speaking at Midland, on Monday, Premier Laurier made a passing reference to Hon. Geo. Foster's criticism of the settlement of the Manitoba school policy. Mr. Laurier pointed out that Mr. Foster in Ontario washed his hands of the school question, and now had no longer use for it, while Mr. Bergeron, ex-deputy speaker, another member of the Conservative Opposition, insisted at Montreal that so-called remedial legislation must remain a portion of the Conservative programme. Thus, said Mr. Laurier, the opponents of the Government have one policy for Ontario and another for Quebec. Continuing, the Premier impressively said: "I thank God that whatever the race or the creed of the members of the Liberal party, whether they are French or English, Catholic or Prostestant, they are all one, united on the declaration that the school question has been settled by conciliation and that it never could have been settled in any other way." (Loud cheers.) There was the method of conciliation, the Liberal party had adopted it. There was the method of conciliation, and Mr. Foster dare not adopt it. (Prolonged cheers.) Not-withstanding Mr. Foster's bragging, he will be forced ultimately to follow the Liberals in their policy of conciliation. (Loud cheers.) The Bleus of Quebec are fighting the settlement there, but the struggle for civil liberty will be successful again, as it was in June last." (Cheers.)

that statement; it is on exactly the same lines as Mr. Laurier lays down for the guidance of his supporters not only in Quebec and Ontario, but in every part of the Dominion.

First Meeting of the New Board in the Secretary's Office.

Dairymen Fail to Heed the Warning Given Them-Bad-Flavored Cheese the Result-Important Announcements.

The board of directors of the new Butter and Cheese Association of Western Ontario met on Feb. 1 in the secretary's office, London, There were present President A. F. MacLaren, M.P., Stratford; J. S. Pearce, London; Harold Eagle, Attercliffe Station; J. N. Paget, Camboro; John Prain, Harriston; R. M. Ballantyne, Stratford; John Connolly, Porter Hill; James Carmichael, Arva; and J. A. James,

The president, in his opening address, spoke of the good work done by the association last year, and regretted very much that it was not appreciated as it should be by the dairymen. At the annual conventions and local meetings held under the auspices of the association, and by means of the literature sent out, dairymen had been cautioned against the feeding of turnips and such foods to cows supplying milk to the factories, and had been urged to take the best care of the milk; yet he was sorry to state cheese found in the factories last year than for several years back. He hoped, however, that there would be an improvement the coming season, and expressed the wish, which was concurred in by the other members of the board. that the work to be carried on by the new organization this year would be more effective than ever in improving the quality of the putter and cheese made in Western Ontario. A local convention will be held at

Milverton early in March, and other places distrous of one should send in their applications to the secretary a Where such conventions are held, the association pays for the speakers, and the local dairymen or town is expected to supply the hall free and advertise the meeting. The association will co-operate with the Provincial Dairy School in holding a maker's meeting at Guelph early in

The secretary will make inquiries of the syndicate factories as to whether they are desirous of continuing that line of instruction another year. All parties interested, and those in other sections desirous of having syndicates formed should communicate with the secretary at once.

The president, Messrs. John Pearce, A. Wenger, and R. M. Ballantyne will represent the association on the central advisory board, and the same gentlemen, with the addition of Second Vice-President Eagle, will comprise the executive committee. The matter of the eastern and western astor to visit the creameries of the Province, was left to the representatives of the central board to act as they see fit in conjunction with the representatives from the eastern associa-

CHICAGO.

Chicago, Ill., Feb. 2.—After some hesitation after the morning hours of today's session of the wheat market prices for that grain gradually developed strength and at the close were about the final figures of Saturday, thus having recovered all of yesterday's decline. The market at Inverpool displayed indifference to the over-weakness of yesterday, and advanced id to ld per cental. This was the main argument of the bulls today. Other information tending to produce strength was a reported increase in the French crop of from 10 to 15 per cent, a decrease in the world's visible supply as reported by Bradstreet's of 2,151,000 bu, and finally a sale of 2,900,000 bu for export to go to the seaboard by rail. Closing continental cables were lower. May wheat

Export cattle—There were not many offered, and not many were wanted today, as the steamer from St. John does not sail till the end of next week. It is expected there will be a better demand for cattle then. Prices were nominal, at 34c to 4c per lb. Butchers' cattle—Trade was poor and quite a few cattle were left mostly at the clear. Discouraging reports the residue the clear the clear than control of the normal functions I grew more cheef rupoid at the clear. Trade was poor and quite a few cattle were left unsold at the close. Discouraging reports from Buffalo were the cause, as the market there was a little overstocked and the cattle sold there did not bring as high prices as expected. Prices today ruled for good to choice at 21c to 32c per 1b; medium at 22c to 22c, and common at 2c. Stockers and feeders.—There was a fair demand today for medium good stockers to go to Buffalo, but the demand was not so brisk as it was expected to be. Prices rule from 23c for light stockers to 2c for good feeders, and 32c for choice. Bulls—A few were taken for export at 3c to 32c per 1b. Some stock bulls sold for Buffalo at 23c to 3 per 1b.

That the cure was of no ephemeral nature is evidenced by the fact that now after a year has passed since then, and I have taken but two boxes of pills since that time, I weigh 110 pounds, and can attend to my necessary household duties. I can say nothing less than that I believe Dr. Williams' Pink Pills saved my life, and I recommend them to everyone suffering from similar complaints to mine as the best medicine I know, and after the host of nostrums I tried during a period of sight.

From fifteen years of age I suffered from anaemia with all the attending evils, the family physician and two other doctors consulted in turn failing to afford me any relief. At the age of twenty-two I came from England to Oregon, and acting under the advice of friends, consulted a specialist of high repute in Portland in that State, high repute in Portland in that State, after having tried two other practitioners in Eastern Oregon, without any beneficial results. I followed the treatment of the Portland physician for some months with no change in my condition being noticeable, except that I was rapidly losing flesh and sinking day by day into a state of lassitude. I was reduced to eighty-nine pounds in weight, and was assured that unless some change for the better were obtained I could not live six months. At this crisis, when life had become a burden to me and I had hardly strength enough to move around, a friend told me of the benefit she had derived from TORONTO.

Child Desertion.

Annie Richardson Pleads Guilty to the Charge,

Sentence Suspended in Her Case - A London West Trio Honorably Discharged.

Annie Richards, of Stratford, an unmarried woman, 30 years of age, wept bitterly this morning at the police court when the magistrate announced her name, charged by Ellen Parkinson with a crime that is becoming altogether too common, and which the city and county authorities will endeavor rigorously to suppress, dealing in a very severe manner with the next case of the kind that comes un-

der their observation. The woman was well dressed, and well able to earn a livelihood. The magistrate, in addressing her, said: "Being the mother of a child under the age of 2 years, whose name is unknown, you did unlawfully abandon such child, whereby its life was endangered or its health likely to be permanently injured. You are charged with child desertion. Are you guilty?" The woman assented by a nod of the head, while weeping bitterly, and the keen sense of her position excited at once the sympathy of the court. The magistrate learned that the voman had entered the Salvation Army Refuge Home, where the child was born about three weeks ago. When she entered the institution her agreement was that she should remain a year with the child, which she failed to do, deserting it on Monday

afternoon. She was arrested last The magistrate's sympathy was aroused by the woman's tears, and the crown prosecutor, Mr. Magee, felt equally sorry. The magistrate, in disposing of the case, said: "The county attorney has consented that sentence should be suspended, and perhaps I am justified in acceding to his request. I am told the child was left in the Salvation Army Home, and that you did nothing whereby the child's life was endangered. If you had left the child on the doorstep I could not have allowed you to go. The law upon this is very severe, because, should the child die, it is only one degree below murder. It is, however, an offense for which you might be committed for two years in the penitentiary. The ladies of the Salvation Army will take the child and provide for it, and as you are able to work, you will be required to render them all the assistance in your power towards maintaining it."

The woman was then bound over in \$200 to appear when called upon. HONORABLY DISCHARGED.

Albert Fredenburg, Charles Evans and Louis Hooper, the three young men who were charged by John Tay-lor, stepfather of Maud Sizeland, who died at the City Hospital on Saturday, with criminally assaulting the girl, were placed in the dock. Crown Attorney Magee said that owing to the death of the girl, who was the chief witness for the crown, it had been decided to take no action

against the young men.
Mr. Edmund Meredith and Mr. John M. McEvoy, who appeared for Evans and Hooper, in addressing the magis-trate, said that in answer to the crown attorney and this charge, they would say that the boys were entirely innocent, and had a complete answer to the charge. The boys were then hon-orably discharged. John McLeod, a tramp, swidently

wrong in the head, was given two months for vagrancy. McLeod said he was 37 years old, unmarried, and had no friends nor habitation. He complained of being pursued by a gang of "hard-geers," who followed him about and prevented him from getting work. He comes from Kippen, but for the last sixteen years has worked in and around California.

Rossland and Slocan

Mr. Edward Cronyn's Views - Six Months Devoted to Personal Investigation To Investors.

Having just concluded six months' personal investigation of mines and mining in the great gold and silver camps of Rossland and the Slocan, I submit as follows: My investigation was made from the standpoint of an investor, also from that of one who might be asked, or feel disposed, to advise the investment of money by others who have not the opportunity to personally visit the mines. In addition to actual examination of the mines, I have gone very carefully into the different methods of company organization, plans of operation and the character of individuals forming boards of management of companies prominently before the publie with their shares. But a very

ver mines are not only destined to enrich Canada, but to create many individual fortunes. My especial purpose, therefore, soon became the determination as to what kind of organization, operation and men "at the helm" were best calculated to assure profitable results to investors, assuming that a good mining property had first been secured.

I submit briefly the conclusions at which I have arrived: A. Given a first-class property, the company mining or operating it must be properly organized under some incorporation law sufficiently well established by the highest judicial decisions, to enable the shareholders and officers to know precisely what their powers, privileges and responsibilities are. B. Given a first-class organization, sound management is absolutely necessary. By "sound," I mean honest and

dishonest managers can readily divert the profits entirely away from the shareholders. C. In any event, ample working capital is esential to safe, profitable mine operation. This is especially true if the property be, as is usually the case, undeveloped, for time and money are

may be absorbed by excessive salaries or wasted by reckless, extravagant expenditures; or, if sufficient provision is not made in the beginning for procuring ample working capital as required, the company may have to sus-pend operations before the property come productive, until the share holders can be assessed voluntarily or otherwise, to procure more funds. Becoming fully satisfied that the shares of companies coming up to re quirements A, B, C and D, operating either in the Rossland or Slocan districts would, at a reasonable price per share, afford a sound and remunerative investment, I was very much pleased to have placed at my disposal at first price, a considerable number of shares of the treasury stock of a company developing first-class properties in both of the districts named. Having thoroughly investigated the property, organization and management of this company, I am prepare to youch for it in every particular. Persons contemplating an investment in mining shares are therefore invited to call upon or address me at the office of Cronyn & Betts, barristers, Huron and Erie building, Richmone street. London, where I may be found from Feb. 4 until my return to Rossland. EDWARD CRONYN.

An Ottawa correspondent telegraphs that important changes in connection with the postoffice department are contemplated. It is understood that the Postmaster-General has offered the position of Deputy Postmaster-General to Chief Inspector Mr. Sweetnam. This gentleman so far has declined, but it is believed that he will eventually accept. Other changes hinted at are that the Barrie division hit with the large audience that witand the Stratford division in the Province of Ontario will be closed and Mr. Daniel Spry, inspector in the London division, will be made chief inspector in the place of Mr. Sweetnam. The management of the railway clerks is to be put in a separate department, with Mr. Armstrong, late of the Toronto postoffice, at its head.

At Rossland, B. C., business is brisk. One hundred and eighteen lots were sold on Tuesday, for \$40,000, and 100 buildings are being put up. At Trail, a refining plant has been added to the smelter. The Taylor Boy claim has been sold to Toronto men for \$3,000.

the picking. The detective himself, for such he was, called himself a commercial traveler, and professed, during the nights he spent under the roof of the Blue Lion, to do a round of business calls in the neighboring towns, returning to the inn towards evening, now from one direction, now from another, in a perfectly unostentatious and business-like manner. On the second day he announced that he should have money to receive on the fourth, and he made this announcement in the presence of as many people as he could. To the Public:

For the purpose of putting in an electrical plant to generate power sufficient to operate a twenty-stamp mill, hoists, electrical drills, and light the mines, THE COLORADO GOLD MINING & DEVELOPMENT COMPANY offer 100,000 shares of treasury stock at \$1.00 per share, on which a dividend at the rate of 1 per cent. a month is guaranteed for five years.

In the Keyes, Keyes Extension and Three Chimneys the Company has three splendid properties from which it is now taking pay ore, and negotiations have just been concluded for the fourth, which gives it four great properties in the Keyesville District, Kern County, California, a county which has produced gold

to the value of more than a hundred millions of dollars since its

This group of mines presents a combination of seven full mining claims, making an aggregate extent of two miles with a full width throughout of 600 feet. The body of ore is enormous in quantity and of high grade. It is free milling, and more than ninety per cent. can be saved.

The Kern River, the second largest river in the State, is about one mile from the mines, and it is the intention of the Company to introduce a system of undershot wheels in the river, thereby generating sufficient power to operate the dynamos for the electrical plant as above outlined.

When the proposed improvements are completed, the cost of mining and milling will not exceed \$2.50 per ton; and as the average value of the ore is \$40 per ton, it is believed our net earnings will average One Thousand Dollars a day, which will insure dividends of at least 3 per cent. a month on the par value of the shares.

So well satisfied is the Managing Director with the feasibility of the proposed plan of operation and of the increased earnings that would accrue from the material reduction in the cost of mining and milling, that I have personally guaranteed dividends at the rate of 12 per cent. per annum until February 15th, 1902, on such an amount of stock as it may be necessary for the Company to sell in order to provide for the machinery necessary to enhance its earning power to what is believed will prove 36 per cent. per annum. I am moved to do this, being confident that the Company's earnings will protect me against personal loss, and enable it to realize a fair amount for its treasury stock, so that it need not dissipate its assets by selling at an unnecessarily low figure in order to provide for the improvements already men-

At the price the shares are now offered, with the present rate of dividend, we are justified in saying they are by far the best investment offered in the Dominion to-day, combining as they do perfect safety with a high rate of interest.

After the sale of this 100,000 shares no more stock will be offered, and there will remain in the treasury 1,300,000 shares of stock, 1,000,000 of which will be retained in the treasury for future use. The remaining 300,000 shares of stock will be allotted among the shareholders of record, to be disposed of as they see fit.

In order to insure investors of the absolute stability of the investment offered, Messrs. Lownsbrough & Co., Bankers, together with the Managing Director, J. Grant Lyman, personally and jointly guarantee dividends at the rate of one per cent. a month on the par value of the shares for five

The same shares offered by the Company carrying the same dividend, but not guaranteed by Messrs. Lownsbrough & Co. or J. Grant Lyman, we are offering for

It goes without saying that the Company, in order to pay dividends on part of its stock, must pay dividends on all, as there is no such thing as "preferred stock"; but in personally and jointly guaranteeing these dividends we make assurance a positive fact, and, of course, such stock is worth more money.

Intending purchasers of mining shares will please note the following features of this enterprise:

FIRST-The company is not in the experimental stage, but an established enterprise with an assured earning capacity, extending its operations.

SECOND-Our proposition is purely a business one, as we buy only such properties as show a profit over our investment and do not buy "prospects."

THIRD-Every shareholder stands on the same basis, no shares being given away or set aside for an officer or director, except as they are paid for the same as by other shareholders.

FOURTH-The payment of the dividends is assured beyond all question.

Subscription books are now open at the office of LOWNSBROUGH & CO., Bankers and Brokers, 22 King Street East, Toronto, Ont., where J. Grant Lyman, Managing Director, will be pleased to receive your subscription for such number of shares of the above Company as will be agreeable to you. Price \$1.00 per share, par value \$1.00, full paid and non-assessable, being subject to no further call. Correspondence invited.

Sixteenth Anniversary of the Society Celebrated.

Christian Endeavorers of the city celebrated the sixteenth anniversary of the society by a rally at St. Andrew's Church last night. The president of the local Christian Endeavor Union, Mr. H. J. Brown, was in charge, and among the speakers announced were Rev. John Young, of Hamilton, and Rev. Thomas Wilson, pastor of the Street Presbyterian Church, The latter, however, was un-

would be as it were a one-ness be-tween them. It was something that touched the human soul and permeated the whole character. "This unity is not found among young Christians to-day," said Mr. Young; "hence the in-fluence of the church is checked and the glory of God lessened, and wrong influences go out; and instead of being a help to some at times, we are stumbling blocks." This, the speaker said, was because the spirit of the devil was working about the Christians, and if they were going to get rid of it, they must cultivate unity. If the true spirit was ruling in all Endeavorers, there could not help but be the spirit of unity and of co-operation. There was more of that spirit today than there ever was in the Christian church, but the workers were not where they should be.

city. The latter, however, was unable to attend.

Revs. J. W Pedley and G. B. Sage conducted the opening exercises, and the chairman introduced Rev. Mr. Young, who gave a most earnest address. He urged that there be a closer co-operation among the young people. He didn't mean uniformity or unanimity alone. People might be of one mind concerning any matter, and yet unity was a harmonious co-operation—not co-operation in regard to one or two matters, but a something that would bring two or more individuals so in fouch with one another that there The most pronounced symptoms of
