60 persons were injured, two of them probably fatally, and several seriously, last night at 10:40 o'clock, when a Pennsylvania freight train crashed into the Dixie Flyer, a fast Indianapolis, Colum-bus and Southern Traction car carrying a trailer, at a track intersection

Many women and children were those hurt. Most of the men among those hurt. Most of the men ment of the head car. The fiver was on route from Indianapolis to Louisville, and was carrying many persons who had been at Indianapolis attending the automobile races. The front car turned over and the riotorman's vestibule was torn off and thrown against the side of a building several feet away. The colli-sion snapped the coupling between the head car and the trailer, resulting in the trailer failing to turn over. Both cars were loaded to capacity.

The traction line is on the main street nere, and the accident occurred almost in the heart of the city. A physician's office near the place where the accident occurred was converted into an emerency hospital, where the injured were aken for medical attention. All avail-ble physicians were rushed to the place.

### N. Y. PHILHARMONIC ORCHESTRA GIVES A **BRILLIANT PROGRAM**

London Music Lovers Throng To Hear Perfect Ensemble of Instruments.

It requires a powerful instrument like the New York Philharmonic Orchestra, heard here last night in the "Winter Gardens," to give a proper idea of the majesty and immortality of the great souls who speak to the world through music. No composition in the whole realm of music leaves an impression of loftier grandeur or can claim closer kinship with the divine music of the ship with the divine industry spheres than a great symphony, when it is created anew by a mighty it is created anew by a mighty orchestra and is flung forth into space to become a part of the everlasting train of music which perpetually circles

### LOYALTY SHOULD BE WATCHWORD. SAYS PRESIDENT

Stand Firmly by British Institutions Urges I. O. D. E. Head.

TORONTO, May 36.—Opening with a procession of children carrying the colors of the Imperial Order of the Daughters of the Empire to the plat-form in Convocation Hall this afternoon, the 21st annual gathering of the national chapter of the I. O. D. E. was launched under auspices exceedingly favorable, with a large attendance of delegates representing every province in the Do-minton of Canada. Back of a dis-tinguished group of people on the platform were flags and floral decorations, and throughout the assembly was an air of patriotism which was reflected speeches.

Miss Joan Arnoldi of this city, national president, was in the chair. Others on the platform included. Mrs. Lionel H. Clarke, wife of the lieutenant-governor of Ontario; Mrs. Cooke-Adams, Chicago, president of the Daughters of the British Empire of the United States; Mrs. W. E. Sanford, Hamilton, president of the National Council of Women; Mrs. E. G. Marks, New York, Daughters of the British Empire of the United States, and the following provincial vice-presidents Mrs. Colin Campbell, Manitoba; Mrs Wooley Dodd, Alberta; Mrs. David Balour, Saskatchewan, and Mrs. Harry Burkholder, Ontario.

Welcomed by Mayor. A number of men were honored by seats on the platform, among them being Mayor T. L. Church, Toronto: George Parkin, Provost Macklem Trinity University, Archdeacon H. lody, and Col. George T. Denison

Mayor Church formally welcomed the ladies to Toronto, ad paid a high tribute to the work of the I. O. D. E. The mayor's welcome was supplemented by Mrs. W. R. Jackson, regent of the Municipal Chapter, I. O. D. E., Toronto, who said the order was build-ing up the national life of Canada.

The I. O. D. E., Mrs. Jackson said, was one of the greatest forces of organized women.

Mrs. D. M. Balfour, vice-president of the Provincial Chapter of Saskatchewan, responded on behalf of the delegates. She emphasized the necessity for closer co-operation among all the provinces, strengthening the bonds of yalty to the mother land.

Urges Loyalty.

"May loyalty to our king, our country and our order be our watchword," she said. Miss Arnoldi, in her presidential address, dealt with the needs of Can-ada today and the part the I. O. D. E. should play in Canadianization, in child welfare work, in favoring British films and British publications, and in assisting the readjustment necessitated by the war. ### THE VERDICT OF YAMASKA.

Mr. Meighen's ramshackle ministry may hold gether a little while longer by the simple process of evading the verdict of a general election, but the day when it must inevitably be consigned to the lumber room of discredited cabinets cannot much longer be delayed. Although the Government candidate in York-Sunbury has managed to elbow his way to Ottawa, the result shows that more than 1,500 Conservatives must have changed their viewpoint since the election in 1917. As matters stand, the almost unbroken series of disasters which have overtaken the Meighenites all over the country cause them to hail as a victory anything which postpones for a little longer their Waterloo.

The result in Yamaska demonstrates that their tactics in this direction are meeting with unqualified defeat. Not even the prospect of one of those portfolios, which the Government appears to be ready to hand out to all and sundry, has had the desired effect, and they have had the mortification of discovering that "Yamaska is not for sale." The Liberal candidate's defeat of the Tory nominee by a majority of 1,608 is a verdict so decisive that no Government can afford to ignore it, no matter how anxious they may be to drink the last

The keenness of the electors in casting their ballots is another indication of the intensity of feeling pervading the country at the present time against a govern ment which went into power under false pretences, and clings to that power by similar means. Owing to the taking of the census being a preliminary to the redistribution bill, which the Government is pledged to bring in before the next general election, it is not expected that the people will be afforded an opportunity of expressing their opinion before the beginning of next year. In the meantime, the Government will, no doubt, be supplied with continued proof that the people are impatient for the arrival of the time when they will be able to sweep them from their usurped position just as conclusively as their nominee has been swept aside in Yamaska.

Our contentions on the matter of the provincial and federal departments of agriculture devoting more attention to the marketing of the produce of the country finds a sympathetic echo in the position of affairs in the United States, as disclosed in an interview, which the Dearborn Independent has had with Secretary Henry this particular time in the United States prices of practically all farm products are not only far below the actual cost of production, but are relatively much less than the prices of other basic commodities. Prices of many of the larger farm crops are well below the prewar normal, while almost none of them are above it.

"It is a terrible indictment of our modern civiliza tion." says Mr. Wallace. "when this great country is in the period of what almost might be called economic chaos, because of our great surplus food supply, while across the seas, in both directions, almost half the world is suffering for want of food.

"Now, as to the present situation, surely the duty more efficient marketing methods."

A square deal for the farmer, and also for those who handle or use the things which he sells, depends upon finding a new way for distributing the goods, so that they will reach the consumer in the shortest possible time, and at prices which will be equitable to all

Mr. Wallace expresses the opinion that if the farmer were to practice a sound system of business economy, charging a fair interest on the capital invested, both in his farm and his farm equipment, a fair wage for the actual labor expended on the farm, against his receipts for the marketing of his crops, it would be found that he had not received for them enough to cover his acal costs. Therefore, the placing of the great agricultural industry upon a more sound economical basis is problem which cannot much longer be delayed, if the

The different driveways in the country surrounding ondon have each distinctive charms that leaves pictures in the memory. One of the most beautiful and varied is' the one that winds its way to Springbank along the north side of the Thames.

On a particular spring evening, the sun, like an immense ruby, dropped lingeringly behind the green tones of a spring wood of delicate lacework of twigs and new leaves. Very softly the sky caught and kept the tender trail of salmon-pink that the crimson sun left behind as a memory. Over meadow green of field grasses, and dust-powdered slopes of the roadway, pale wraiths of ing, and becoming more liberal. The demand is filigree, and the gold of amber light through young trees held the land in a spell.

What a feeling of "the magic road to anywhere" attends the following of a river's trail! Just at the Wonderland curve, the current is very quiet, and the well-balanced mind. It points the way perfect reflections of tree-depths lie in pure lights and soft shadows undisturbed. Orchards sweep down in lovely lazy slopes to the water's edge, and through one of these frolicked a tiny black calf, a strange little dark blot in the glowing picture of varying greens. In a quiet gulley, a little creek made a tender bit of water-song as it crept softly through thick cresses. Above the small slope a low wood of hawthorns stood serene and silent in the sacred privilege of making a date plainly shows. And why, the critic bird sanctuary, and for a little time hid the deep brown might ask, use "give, bequeath and devise," when any one of the three words of the flowing river. Over a great oak woods a flight of blackbirds hovered in indecision, and finally rested like gloomy cloud over the coral of new-leaved tree-tops.

Everywhere on the opposite side of the river, the out rolling lines of hills swept up in mysterious half-lights and deep shadows in the coming twilight, and every picture the roadway afforded was perfect but for one is something the layman would not have man-imposed blight.

### THE COST OF A NAVY.

The House of Commons, and, incidentally, the country, had opportunity at the end of the week to learn Men are as fond of pockets as women what it costs to go into the business of having a navy. The war-time navy of this country has just gone to the hip and one small watch; four and scrap heap—Rainbow, Niobe, and two submarines—and after the accounts are settled it will be a question if the does a man do with fifteen pockets? In country doesn't actually pay to get rid of them. The his coat he carries his pocketbook, let-Rainbow has already gone to a Seattle firm for bout handkerchief, toothpicks; in his waistthe price of a Dundas street store, though it cost about coat there are pencils, fountain pen million and a half. The Niobe, costing about the same, has so far realized almost nothing, because the company which bought it for scrap has evidently been penknife, keys, extra handkerchiefs and trying to get out of its bargain. The two subs, which and its four pockets he is much put to Sir Richard McBride bought at the opening of the war without warrant from anyone, and which he managed carries a larger variety of all sorts of to saddle on this country for a million and a half, have things. been sold for \$6,000 each.

Some of the members of the House appeared to be critical of the amounts received for these ships. They need expect nothing more, judging by Great Britain's hunting weepon. A good home-made polish for brass and copper is as follows: Take two, and copper is as follows: Take two ounces, or a quarter of a cupful of dilute oxalic acid, a box of electrosilicon, half a cupful of wood alcohol, and a pint of kerosene oil. Put the silicon into a bottle, add alcohol, acid and oil. Remember that this is poison. Shake well before using. Badly tarnished brass and copper should first be washed in solution of washing soda to remove the grease, then polished with this recipe, wiped dry and polished with a clean soft cloth or chamois.

He had nice looking cross-fire and a sharp-breaking curve, but little items like these didn't bother the local paid assassins. What did bother them though was turning these hits into runs, they were stopped in this department until the sixth, when they added runs, and made the score add correctly to four, sufficient, as it happened to give them the game.

AMHERSTBURG, May 30.—
Local baseball fans are having a
good laugh over a new one pulled
by Manager John R. Hamilton of
the Amherstburg team on Silcker
Park, professional pitcher and
Michigan U. student, at the
Victoria Day game here between
Woodslee and Amherstburg. The
day was going against his team,
and Manager Hamilton was doing
his best to turn the tide of battle.
Up to the fourth the best the
home boys could do was to get
Rubber Hamilton on second.
Then Manager Hamilton, who
was coaching on third base,
flashed his brother a signal to
watch for something to drop,
turning he sharply called toPitcher Park, who was striking
out men with the regularity of
work, "What have you got on
that ball?" "Nothing," snapped
back Park. "Let me see it." said
Hamilton, and disregarding all
the rules of baseball Slicker,
either through surprise, mesmerism or sheer forgetfulness,
threw the ball to the opposing
manager, who stepped aside and
let it roll far back afield, and
Rubber came home. There was a
small riot of excitement, but the
umpire ruled that the run
counted.

Straight hitting in the first achieved the Brants their three runs. It looked for a minute as if Carmen was in danger of being both hit struck and sun struck on one afternoon. strum started the proceedings, when he knocked a sliver down to first base. Carmen caught out the next small pop himself, but Polly Werre snatched a single to centre, and then Stupp followed with a sacrificial fly to the same spot, scoring the first. Orme slivered one down to third, stole second, and then Babe Dye went down the side, took the pass from Carmen, and shot for a two-bagger to centre, scoring both Orme and Werre. Two men were gone and Tartline made the third.

Ninth Frills Here. The Tribe came to bat and started to show the visitors if they were ask-ing for ninth-inning frills in the first frame on a hot afternoon, they (to wit, the Tribe) would accommodate them. Stutz singled to centre, Shay flew out, Vandyke singled to right and Bill Kuhn shot one down to third that brought in Stutz. Malmquest singled then to right and scored Vandyke. Hitting Crichlow was the last bit of work, Manager Orme would allow Mister Ket chum to do that afternoon, so Wanner was introduced. With three men or and Calbert up things didn't look any Wanner, whether he realized that fact or not. Calbert, ever, put any traces of worry off Wanner's brow, when he slammed one down to Beecher, who tossed to Stupp to start a double play, which was ended up at first with Cal, as the second vic-

It was fast work.

The next four innings the Tribesmen were hanging around with small packages of trouble ready at hand, but it was like a quiet Sunday in Cork, they never got a chance to throw a thing until the sixth. Don Jose Brigera started the Brant trouble department looking for tools in this period by smashing a really hard one down at eecher, which the latter, in a fumble admitted was too hard. George Carmer singled sharply to left. Stutz enabled the Brants to relieve the strain on the sacks, when he hit a choice, and the choice fell on Briger's head at third. Shay bounced one down to the mound and got away with it, and then Van-dyke undertook a sacrifice towards first which was eminently successful, bringdown to Beecher, and the latter mentarily hesitated, which gave Kuhn time to step it out to first, and allowed home. Malmquest was the third out.

Mrs. Yull, wife of T. H. Yull, president of the club, is the most ardent lady lacrosse fan in London. As evidence of this she is knitting a miniature sweater in crimson and white with the initial "L" on the front to match the sweaters of the team. This is for the club's mascot, the four-year-old son of "Whitey" Whitby, captain of the team. The little fellow will then have the complete outfit—cap, sweater, shoes and stick, and the London public may expect to see him at all games in the fu-

Children Cry for Fletcher's

# ASTORA

Fletcher's Castoria is strictly a remedy for Infants and Children Foods are specially prepared for babies. A baby's medicine is even more essential for Baby. Remedies primarily prepared for grown-ups are not interchangeable. It was the need of a remedy for the common ailments of Infants and Children that brought Castoria before the public after years of research, and no claim has been made for it that its use for over 30 years has not proven.

### What is CASTORIA?

Castoria is a harmless substitute for Castor Oil, Paregoric, Drops and Soothing Syrups. It is pleasant. It contains neither Opium, Morphine nor other narcotic substance. Its age is its guarantee. For more than thirty years it has been in constant use for the relief of Constipation, Flatulency, Wind Colic and Diarrhoea; allaying Feverishness arising therefrom, and by regulating the Stomach and Bowels, aids the assimilation of Food; giving healthy and natural sleep. ### LOOK FOR THE ABOVE SIGN ON THE WINDOW OF THE BRUNSWICK DEALER NEAREST YOU

AS SHOWN BY THE LIST BELOW

Over 100 Brunswick dealers, all over Ontario, are co-operating this week to carry the message of Brunswick superiority and success to YOU. They invite you to investigate this remarkble phonograph: Just call at the Brunswick dealer nearest you.

### HE WILL Tell You Facts

You Shou'd Know That the Brunswick firm is the largest company in the world making phonographs.

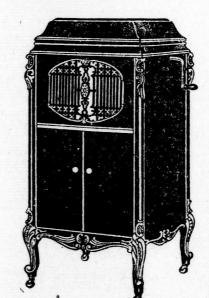

That the Brunswick is the ONLY phonograph in existence that makes EVERY PART of EVERY Phonograph in its own factories, instead of buying parts and ASSEMBLING the phono-

That the Brunswick Company owns its own timber lands, steamers, six factories and over twenty branches (including four in Canada).

That the BRUNSWICK PHONO-GRAPH IS THE ONLY Phonograph in the world that is BUILT to play ALL makes of records, exactly as they were intended to be played. (The importance of this cannot be overestimated.)

That the Brunswick Phonograph is the ONLY phonograph made that has an ALL-WOOD oval horn—the last word in phonograph science

That the Brunswick Phonograph, after only four years, is now handled by more of the largest and finest music stores in Canada than any other make.

cording to some reports, the Chicagoans have negotiated to buy the house outright if no other way can be found to save it.

Opposed to this is the statement of Mrs. Oscar Hammerstein, widow of the impresario and builder of the opera house, that she had sold the property to a clothing firm for a factory site, that the leases of the Chicago Grand Opera Company and others all were subject to cancellation, and that "the Chicago Grand Opera Company hasn't a chance ever to get back into the Man-

Rosenblatt & Blexner is given in some circles as the name of the firm that is to take over the opera house site. Geo. Blumenthal, attorney for Mrs. Ham-merstein, said he thought that was the name of the concern, but would not disany details until certain arrangements had been made. Papers have been drawn up for the deal, he declared. been drawn up for the deal, he declared, but Mrs. Hammerstein said she had not signed them yet. The price of \$960,000 has been men-

tioned as the figure to be paid by the clothing firm, at private sale. Under a supreme court order, the opera house sold at auction to satisfy a judgment of \$143,324 in favor of Mrs. Stella Hammerstein Keating and Mrs. Rose Hammerstein Tostevin, daughters of Oscar Hammerstein. Lawrence Berenson is receiver for Mrs. Hammerstein.
October 1 is the date upon which the razing of the opera house is to be com-menced, according to Mr. Blumenthal. He declared that Mrs. Hammerstein, laving failed in efforts to get assistance in keeping the Manhattan for opera, now is determined that opera shall not

be presented there in future. "I don't know just where the matter stands," Mr. McCormick said. "We hope to save the Manhattan for our opera. Our attorneys have the matter in hand, and until they reach a final

Winnipeg, May 31.—May wheat opened higher to unchanged at \$1 93@1 92½;

July ½c to 1½c higher at \$1 87%@1 69;

October ¼c higher at \$1 32.

July flax unchanged at \$1 76¼.

Chicago, May 31.—Opening: Wheat—May, \$1 76½;

July, \$1 29¾.

Corn—July, 65½c; Sept., 66½c.

Oats—July, 40%c; Sept., 42½c.

Chicago, May 31.—Anxious shorts in the wheat pit, confronted with scarcity of offerings and yet facing the last of the month settlement of contracts, ran up the price of May delivery 12c today. Difficulty in obtaining wheat for settlement purposes was a surprise in view of the fact that 450 carloads had been received here since Saturday. Aside from the flurry on the part of shorts in May, the market kept within ordinary channels, with bulls having the advantage from a continuance of crop damage news, despite recent rains. Opening quotations, which ranged from 1½c to 12½c higher, were followed by some further advance for July and a reaction to \$1 75 for May.

Notwithstanding the immense receipts of corn, 1,750 cars, the market for that cereal was firm in sympathy with wheat. After opening unchanged to ½c higher, the market showed material gains all around.

Oats paralleled the action of corn, starting a shade off, and then going upgrade.

## Banking Service for All

AS the majority of the first directorate of the Bank of Montreal, formed in 1817, were Scotchmen or bore Scotch names it was but natural that they should seek in Canada "to extend and to perpetuate for the farmer and the merchant the benefits and stimulus of a system the worth of which Scotland's prosperity could abundantly prove." One of the outstanding features of the system was the maintenance of numerous branches by banks of large capital.

The Bank of Montreal, in adopting this feature from the outset, laid the foundations of a service by which branches have been established throughout the entire Dominion.

At each of these branches the full service of the complete organization is available.

Through this service the Bank of Montreal offers to all classes of the community, from the smallest savings depositor to the largest commercial organization, good and adequate banking facilities. Each customer whether his account be large or small is welcome as a client of the institution.

### GRAMME OF RADIUM HAS GREAT POWER

Off the Ground.

EXPERTS IN MONTREAL

Dr. C. Everett Field Explained Wonders of Precious Substance As Aid in Cancer Cure.

Montreal, May 29.—The Radium Intitute of New York was represented a Montreal recently by Dr. C. Everett Field and Col. R. P. Wadhams, who have been identified with experimental research in radium therapy in the lab-oratory of this institution since its organization in 1914, about ten thousand cancer cases having been treated since that time. About one-half of this work was done on a philanthropic basis, and Dr. Field, who is an enthusiastic spokesman for the wonderful properties of radium, suggested at the Windsor Hotel yesterday that there was good medical philosophy in making it in this way accessible to the

material. One gramme of it, Dr. Field said—about a third of a thirm bleful-generates within itself sufficient force to life the great C. P. R. building off the ground. Human life would soon be destroyed if brought into direct contact with a gramme of unprotected radium. A atomic body of radium is cap-of generating rays that will able make their beam visible through twelve inches of battleship steel. It takes 28 grammes of radium to make an ounce, but an ounce of this wonder substance today quickly three million dollars, and the labora-tories of the world are unable to meet the demand, the whole world's

Radium is an expensive but poten

supply at present being only six ounces Some insight into the scarcity and expense of this strange substance was found in the doctor's conversa-tion. It takes 300 tons of the carnotite ore treated with 500 tons of chemical solution for two months to produce a gramme of radium worth \$120,000. But the properties of the substance are such that when once produced they are susceptible to con-servation, and this one gramme— according to the doctor's computation—is sufficient to treat cancer patients for 1,690 years, even if used for 24 hours a day, and then its energy would be only half-spent. "I have estimated," said he, "that we can give aid to at least 4,000 patients. allowing three separate treatments to each, with a gramme of radium.'

Mysterious Rays.
In a darkened apartment in his room at the hotel Dr. Field gave a demonstration of the mysterious rays which tiny parcels of radium will send forth untrammeled by the tube of glass set within two other tubes of alloyed metal and gold encasing them. Using a small oval stone of "Willemite" (although he explained a diamond or a piece of tingite would have answered) as a sort of bullseye to absorb the rays, he placed this on top of three pairs of hands laid together. Then, placing his own hand, with the tiny receptacle inclosed in it, at the bottom, there was produced a glow of light, passing through the hands and focussed by the stone, re-sembling the dull glow of a bullseye lantern. The newspaperman doubled his fist around one of these mysterious vials, and a like result was produced, as also a most uncomfortable, eerie feeling. "It won't hurt you," assured the doctor; "you might perhaps safely

hold it for an hour."

A like illumination mas caused in a mold of willemite, about the size of an ordinary bowl, the stone being placed in a wooden box, and the radium tube held beneath it. In fact, the doctor said that the beams from one of these tiny vessels would penetrate at least twesty inches of tissue.

Measure of Treatment.

Dr. Field and Dr. Wadhams were cussing radium before the Medico-Chirurgical Society last evening. Speaking of radium from the med-ical point of view, he said: "We must ical point of view, he said: "We must not look upon radium as a cancer cure. It is simply one of the most important measures of treatment. Surgery and radium will certainly FURNISHED BEDROOM AND KIT-CHENETTE, suitable for married couple or two girls. Phone 6141J.

and hemorrhage even in the hopeless cases. Therefore we class it as the most wonderful therapeutic agent of modern times. There are many dangers in its use to the operator, but none to the patient. Three of the staff of the London Radium Institute have sacrificed their lives for the cause. The treatment is also successfully given, he said, in advanced stages of rheumatism, heart

### **HUN CHILDREN** THROW FLOWERS AT BLACK WATCH

Strange Scenes in Silesia Mark Arrival of British Troops.

OPPELN, Silesia, May 30 .- The first battalion of the Black Watch arrived here today and was met by hundreds of children, who threw flowers at the British soldiers They broke into marching squads, trying to hold the soldiers' hands and shouted gleefully as the bagpipes screeched the music of the march.

The residents of the place lined the sidewalks smilingly, and the men doffed their hats as the kilted troops passed. The Scotsmen were pleased at the reception and patted the children's heads and exchanged greetings with the crowd.

The German green police stood rigid salute until the whole column was by, then went laughing about their duties. The first train due to arrive in the morning reached here about 3 streets were virtually deserted, but the noment it was known that the British had arrived, men, women and children began running from every direction toward the station, where the battalion formed for the march to the barracks.
As the column wheeled into the narrow, winding main street, two horsemen cleared the way and kept careful eye on a number of civilians with rifles on their backs, but there was apparent friendliness on every hand and anxiety vanished. From every window handkerchiefs were waved and women threw flowers on the heads of the troops. Some of them wept. The expression was repeatedly heard

from the crowds: "The Pols now have something to reckon with." The Italians appear eager to co-operate with the British in driving out the insurgents; they have heard that this was the plan. An Italian officer remarked: "It is high time they let remarked:

LONDON, May 29. Recent excava-

tions in the neighborhood of Abraham's birthplace by Dr. Hall of the British Museum Egyptian department, resulted in many interesting and valuable discoveries. Dr. Hall's researches led to the conclusion that the Babylonian city of Ur. from which the Patriarch Abraham set forth on his wanderings to the Promised Land, existed long before King Urenger repaired it 2,500 B.
