It's queer how people will sit up and take notice when one man begins to shine another.

Unless a girl has unlimited faith in her complexion she will not tolerate a kiss on the cheek.

Some people try to hide their ignorance by saying that they are enjoying a thing.

Figures never lie, but it sometimes takes an expert to give the truth of this.

It takes a rich man to draw a cheque, a pretty girl to draw attention, a horse to draw a cart, a type to draw a cork, a free lunch to draw a crowd, and a well-played dramatic to draw a crowd.

A nutmeg may be great, but sooner or later it will meet a grater.

Before being taught how to shoot it might be well for the young idea to learn to know when it is loaded.

It sometimes happens that a domestic explosion is the result of a lot of theories getting into a man's mind.

Farmers and City People.

Montreal Herald: How many people in our great cities realize that all food, clothing, shelter and wealth of every sort comes from the earth, writes a country correspondent. "How many realize that they are wholly dependent upon the farmers of this land for all they have or may even hope to possess?"

Exactly! And how many people on the farms realize that all the tools they use, the stoves that keep them warm, the pipes that bring water to their homes, the windmills and engines and machinery that operate them, the wire for their fences, the saws and shigs that carry their produce, the clothes they wear, the pipes they smoke, the telephone that makes life more social, the books, magazines and papers they read, the harrows and needles that the women use alike with the automobile that nearly all enjoy—how many people on the farms realize that for all these things they are dependent on the people of the cities to say nothing of the fact that the people of the cities provide the farmers' market? It may be that city people do not appreciate the importance of the farmers as the providers of a portion of the raw material for human activity, but then it may be that the farmers do not sufficiently appreciate the importance of the city people. A little mutual admiration would not be amiss.

A nutmeg may be great, but sooner or later it will meet a grater.

Before being taught how to shoot it might be well for the young idea to learn to know when it is loaded.

It sometimes happens that a domestic explosion is the result of a lot of theories getting into a man's mind.

Wasting and Using.

Little Denmark sets an example in many things which we would do well to follow. What is done there, in a small way, is perfectly practicable in many of our communities on a larger scale. The recent very large potato crop in Denmark has caused the erection of a number of drying plants and similar factories for the drying of potatoes.

Many parts of Canada, much of the "farmers' hands" besides it, are too used to ship it to market—even though prices in distant cities be high. A small plant in such a community for manufacturing flour would require little capital and could easily be made profitable. It would pay the farmers to form a co-operative concern, similar to the wheat mills of the northwest. It is wiser to use than to waste, but we are very slow in learning the lesson.—R.

Nerves Are Exhausted.

When you have frequent headaches, find you are easily irritated and annoyed, feel discouraged and downhearted, cannot rest and sleep well, and your appetite fails and digestion is poor, you may know that your nerves are in bad condition. Don't wait for these symptoms to become chronic, but start in early with the use of Dr. Chase's Nerve Food and head of disorder.

Don't consider a task impossible because you are unable to perform it. Don't break your word—unless you can do it where a hyphen will fit nicely.

Farmers For Square Deal.

Grain Growers' Guide: The farmers are not demanding that the manufacturers or anybody else be taxed for the benefit of the farmer. But they are equally determined that they will no longer pay toll to the manufacturer. It will now be a fight to the finish. The manufacturers have been in the saddle for nearly 40 years. They have owned both Grit and Tory governments by their donations to campaign funds. As a result they have made the laws to suit themselves. But the farmer has turned. The day of the farmer is coming. The farmer has learned to organize. Now he is determined to elect to parliament men who will vote and work for a square deal all round. There are 43 seats in parliament for Manitoba, Saskatchewan and Alberta. At least 36 of them are controlled by the rural vote. Now it must be made certain that 36 men will be nominated and elected who will not be bought when they get to Ottawa. The political pot is beginning to boil. We must keep it boiling until we get justice.

Tap Your Sugar Maples.

Only about 50 per cent of the trees in the average sugar bush are tapped. The ideal sugar bush should have about 200 trees per acre produced. There were only about 65,000 producers of maple sugar and syrup in 1917. Though last year the number increased somewhat, in the decade of 1881 to 1901 an average production of 22,500,000 pounds was reached. At present prices, this crop would be worth about \$50,000,000. "Better Canada has an immense natural resource which is never being tapped. How many trees are you going to tap this year?"

Soothes — Heals — Stops Suffering

The Province Sees Advantages of a Modern, First-Class Hotel in Halifax.

The project of the "Million Dollar Hotel for Halifax" has been taken up in the press of the province authoritatively, and the necessity of such a hotel at the principal terminal of Nova Scotia is editorially "boosted". Such outside papers as The Windsor Tribune and the Amherst Daily News have come out strongly in favor of the idea or project and have sounded a clarion call to the people and to the business men of the larger towns to make the project a part of their business interests.

Every town in the province, says the Windsor Tribune, is vitally interested in this undertaking, for upon its success depends the future of N. S. tourist traffic. One big modern hotel is a necessity to revive this wealthy tourist traffic, which means thousands of dollars to every town, especially between Yarmouth and Halifax. For a big hotel at the principal terminal point is a factor in determining a man to select a country for his vacation. With hotel accommodations in Halifax, these

are the Windsor-shere should approximate \$50,000 to \$100,000 per season. So it behooves us all to put together.

The Amherst conscience is just as awake as that of Windsor to the absolute necessity of a Million Dollar Hotel for Halifax as the only means by which tourist traffic will be attracted to the province, and which will mean a big business for the province as a whole. In fact, a Million Dollar Hotel in the capital would be a big paying investment for the whole province. Says the Amherst Daily News:

The New Scotland (which will be opened shortly) with its hundred sleeping rooms, may assist somewhat, but it is a fact that even "nerves" to go to the capital city unless compelled to go by business.

The new Million Dollar Hotel would go a long way towards making Halifax a most attractive place for visitors, and it will come at a time when more tourist traffic is that direction, by reason of the federal government's good road program, will make its accommodation needed. It is a big project, but it is no more big than what some capable company should be able to make it a success.

Pushers are usually in the thick of the business fight, producing.

Pessimists grow on the outskirts, waiting to seize the spoils of the winners.

Pushers bring bright, cheerful, joyous and brave. Pessimists are gloomy, doubtful, grouchy and weak.

Pushers boast each other and so, boost each other and so boost all. Pessimists knock each other, and thus they fall.

Pushers bring prosperity. Pessimists throw light on all prosperity. We're going to be a pusher.

When you are going to be a pusher, it takes about forty years for seedling spruce trees to attain a diameter of one inch, 100 years to make a 6-inch tree, and 150 years to reach the maximum diameter limit of 12 inches established by the cutting regulations for pulpwood in Quebec for white pine.

Teaching Thrift at Home.

In the teaching of thrift it is impossible to overestimate the importance of the home. In it producing permanent results along this line the home can do more than any other agency. This is because the wife and mother not only regulate the expenditure of the household, but further because through example and precept she does much to shape the minds of the children on this subject.

It has been said that the hand that rocks the cradle rules the world, and there is a great deal of truth in the statement. It is equally true that the rising generation will be industrious and thrifty in proportion as the children are taught at home the necessity and value of these qualities.

Much may be done through advice, but possibly the best way to train the Canadian child in thrift is through the introduction of the War Savings Plan into the home. Four dollars buys a War Savings Stamp and 25 cents buys a Thrift Stamp. Sixteen of the latter are exchanged for a War Savings Stamp, on which the government pays 4 1/2 per cent compounded half-yearly. W. S. S. should find a place in every home.

Operation for Appendicitis.

Mrs. J. A. Billantyne, Sturgeon Falls, Ont., writes:—My husband was treated for appendicitis and the doctor ordered an operation. But he would not consent to an operation and began the use of Dr. Chase's Kidney & Liver Pills. Since doing so he has had no need of an operation or even of a doctor, as the trouble was completely cured. I cannot find words to speak over my thanks to his cure.

One of the hardest things to find is a friend who isn't hard up at the same time you are.

People would meet with fewer disappointments if they didn't expect more than the desperate.

Eczema Cured Five Years Ago

A Treatment Which Has Proven a Wonderful Healer of the Skin—Certified Evidence of Lasting Cure.

The old notion that eczema is a disease of the blood is refuted time and time again by the cures that are daily being effected by Dr. Chase's Ointment. It matters not what the cause may have been, if you apply Dr. Chase's Ointment regularly you will obtain relief and cure of eczema. Here is the proof:

Mr. Stephen G. Thwaites, Box 145, Jordan's, Ont., writes: "My brother had a bad case of eczema on his legs. He was troubled nearly all one fall and winter with it, and could not work for days at a time. He tried different salves and ointments, but none cured him. One day he tried Dr. Chase's Ointment, and it gave almost instant relief. He continued its use, but had not quite finished the second box when he was cured. It is now about five years since then, and it has never returned. We certainly can recommend Dr. Chase's Ointment, and are very grateful for my brother's cure."

Rev. B. P. Coffman, Vineland, Ont., states: "This is to certify that I know the eczema and the cure by Dr. Chase's Ointment, and her statements are correct."

Mr. J. B. Jones, 228 University Avenue, Kingston, Ont., writes: "I had eczema in my hand for about five years. I tried a great many remedies, but found that while some of them checked it, none cured it permanently. Finally I tried Dr. Chase's Ointment, and in six weeks my hand was completely better. I would not do without a box of Dr. Chase's Ointment in the house if it cost 12 a box. I am giving my name to the firm so that it will get to those who suffer as I did."

Dr. Chase's Ointment, 25 cents a box, at all druggists or Edmondson, Baker & Co., Limited, Toronto. Substitutes will only disappoint you. Be sure of getting what you ask for.

A Spring Message To The Canadian Public

THE Signing of the Armistice relieved some of the most pressing demands for shoes. But it did not, and it could not, increase the supply of leather. It released thousands of men from military duty, but only gradually will they find their way back into their old occupations. So, until an actual shortage of leather is turned into a surplus and the supply of labor becomes somewhere near normal, we cannot expect any marked change in conditions, and the price level must continue high.

Leather is not a product of manufacture, but of natural growth. It takes time to produce a skin, and no process of "speeding up" will hasten it. The demands of the war, and the destruction of war, so depleted the world's stock of leather that, as we told you last fall, it was a big problem to produce enough good quality shoes to go around. Now we must simply wait for a new supply of leather to grow.

Labor is another problem which will take time to solve. Many men, fresh from life spent largely out-of-doors, will not go back to factory work again. Many others bear honorable wounds which unfit them for it. Here again, we expect no immediate return to normal conditions. So in this, our Spring message to the Canadian public, we say:

"Prudence in buying is still necessary. You can help to bring about more normal conditions if you will continue to exercise it. Buy for service and see that you get real value for your money.

"And now especially you should see that the manufacturer's trade-mark is stamped upon the shoes you buy. Unbranded shoes may be reduced in quality to make the price seem low—with the end of the war as a plausible excuse. But no manufacturer will jeopardize his reputation by stamping his trade-mark upon a product which he is ashamed to acknowledge. Remember this and look for the trade-mark. It is the best assurance you can have of real value."

THE ACADIAN.

WOLFVILLE, N. S., MAR. 7, 1919.

Editorial Brevities.

On Tuesday evening, March 4th, some of the citizens interested in the several problems of town improvement met and discussed ways and means to accomplish this end.

It was decided to organize a Community or Citizens' League and a committee was appointed to nominate committees to look into town improvement problems.

This committee is to report at a meeting of the citizens called for Tuesday, March 11th.

At the opening of the Legislature last week Premier Murray in his brief initial speech congratulated the leader of the Opposition on that gentleman's remarks concerning the desirability of 'pulling together' in the work of public legislation for the province, and reiterated the retrials of Nova Scotia first. Both these gentlemen are right. It Premier Murray and Mr. Hall are really to work together with a common object it will be a most excellent thing.

Timely.

The following resolution passed at the meeting of the Council on Wednesday evening in a most timely expression, and should evoke the sentiments of citizens generally towards civic conditions along this line:

Whereas it is highly important that the town should be kept as neat and attractive as possible;

And whereas public spirit and interest in this direction is much more effective than legislation;

Therefore resolved that the present council urge upon all residents the desirability of a continuation of effort toward this end. Also that all unsightly advertisements, posters and notices should be discontinued except as tending to cheapen the appearance of the town.

And further resolved that any organization having for its aim the objects aforementioned will receive our hearty co-operation.

30 Years Ago.

The following extracts are taken from the files of "THE ACADIAN" of 30 years ago:

This year March certainly came in like a lamb, and baseball and bicycling were in order the first day. The season is certainly a remarkable one.

This, the first week in March, has been remarkably spring-like. The frost seems nearly out of the ground and the roads are in a very bad state. The season seems as far advanced as it usually is the first of April.

Wild geese are reported to have arrived in numbers. This is unusually early.

Rev. Isaiah Wallace occupied the pulpit of the Baptist church on Sunday morning.

On Monday last week at Black River, Gasperau, while chopping in the woods, Mr. Henry Ratuse slipped off the ice, falling upon his axe, the blade of which entered his hip, inflicting a shocking wound. On Wednesday Mr. Albert Schofield, of the same place, cut his foot nearly in two by an accidental stroke of his axe on the instep.

The Salvation Army has launched a movement to raise \$150,000 for a Maternity Hospital in Halifax. A site opposite the Medical College has been promised by Dalhousie University. The movement is endorsed by the medical profession and prominent citizens in Halifax.

There are a number of new plays in THE ACADIAN this week that are well worth a careful reading. Read every one carefully and get your money's worth when you buy.

Give Them the Opportunity to Take the Best.

There is a saying abroad regarding the returned man that needs to be readjusted and turned about, says K. Stafford, an ex-soldier interviewed connected with the Department of Soldier's Civil Re-establishment.

"Many have the idea that those who return after a certain period in the army have lost their initiative and will need a great deal of pushing and encouraging to enable them to face up to their responsibilities and to make a man-size job again."

Now in the majority of cases such an impression is entirely misleading. "I feel safe in saying that a large percentage of the men who return will have rather gained an initiative. They are coming back with a higher vision of life. Their close contact with fellows of every shade and opinion has broken down all the petty ideas of pre-war days and they will no longer be satisfied with anything but the best."

"Give them the opportunity to take the best and to make the best of themselves and they will grasp it."

"Those who have lost initiative will be comparatively few."

Some are different on account of disability and weakness left through illness, but outside of such a very few cases of real lack of grip may be traced back to the fact that the man was never very keen or bright before going overseas. The men who were worth while before the war have only gained through their discipline and contact with others. They have been up against the biggest things in life.

Never fear, they will want to climb and gain the highest. Let us see that everyone gets the opportunity."

Evidently Appreciated.

The ex-soldier patients at the Kentville Sanatorium got a pleasant surprise on Friday, St. Valentine's Day, when a party of 'Give Service Girls' from Wolfville motored to Kentville to bestow a nice valentine parcel on each patient.

We feel deeply indebted to them for their thoughtfulness. The fact that they went to a great deal of trouble and sacrificed considerable time in order to prepare a surprise for us makes us appreciate their kindness all the more.

It makes us feel that although our duty is performed there is someone who thinks of our past services. In this respect Wolfville is always in the foreground.

'Give Service Girls' we thank you. PATIENTS, K. Sanatorium. To the Wolfville 'Give Service Girls':

The way was long, but the day was warm, when slowly motoring along, Came people to do us no harm. They came up to the "San," To surprise the patients there, When busy with parcels they ran, The Kentville people looked on, With dumb and mute surprise, To see the "Give Service Girls" had won.

When they come to fraternize, The boys who tried to do their bit, Appreciate such kindly deeds, The "Give Service Girls" sure made a hit, In trying to cater to their needs.

The boys appreciate your act, Accept good wishes from all ranks, That we're delighted in a fact, "Give Service Girls" accept our thanks.

PATIENTS, Kentville Sanatorium. Minstrel Show.

The Minstrel Show given in the Opera House last Friday evening, under the direction of Mrs. Cass Pierce Richmond, was a decided success. The songs were all well rendered and the jokes on local personages were heartily enjoyed by the audience. Special mention should be made of Mr. J. C. Mitchell who, as Bambo, proved to be a just-class comedian. A feature of the program was a solo on the "Bones" and a dance by Mr. George Henley.

The second part of the program, given by the Ladies Glee Club, was also much enjoyed. The choruses were all expertly rendered and show up the splendid training of Mrs. Richmond. The individual numbers were all well received by the audience. The song "Lullaby" from Vitans, by Mrs. Embree and Miss Wilson, was especially pleasing.

Saved Baby's Life.

Mrs. Alfred Tranchemontague, St. Michael's de Saluta, Que., writes: "Baby's Own Tablets are an excellent medicine. They saved my baby's life and I can highly recommend them to all mothers. Mrs. Tranchemontague's experience is that of thousands of other mothers who have tested the worth of Baby's Own Tablets. The Tablets are a sure and safe medicine for little ones and never fail to regulate the bowels and stomach thus relieving all the minor ills from which children suffer. They are sold by mail at 25 cents a box from The Dr. Williams' Medicine Co., Brockville, Ont."

An Early Spring

It promised by all the weather signs. This, up to the present time has been the most open winter we have experienced for many years and is in direct contrast to the winter of a year ago. At that time the woods were full of ice and snow which made a very late and a very short spring.

An early spring means a better opportunity for the farmer to work his land, prepare the ground for extra large crops and a long planting season. Every farmer should be in a position to take advantage of the promised weather conditions and a long spring season.

It is not desirable to get in the crops too early as often late spring rains and a late frost will undo all the work which the early spring allows, but the farmer should have his land ready, his seeds ready and his fertilizer ready which will give him an opportunity to get a large average.

Whatever the conditions are from year to year the man who has the largest crop to sell at the selling season is the man who is the best off. This, and is true whether the prices are high or low.

Fertilizer is necessary and if you have not arranged for your fertilizer already, it is time to do it now, as the time when you will need it is almost here.

Flour Substitutes at Feed Prices

Here is the story in a few words. Carrying out the regulations of the Canada Food Board we put in a pretty large stock of the flour substitutes recommended by them. Shortly after the fighting ceased the flour was lifted to a very large extent and we had a considerable stock of the substitutes on hand. Now we want to close this stock out as quickly as possible—hence your chance to get the lines mentioned below at low prices given:

- Corn Flour, per 98 pound bag \$4.50
 - Barley Flour, per 98 pound bag 4.50
 - Rye Flour, per 98 pound bag 6.35
 - Barley Flour, in 14 pound bags, 14 bags to the bbl., per bbl. \$10.50
 - Oat flour, in 14 pound bags, 14 bags to the barrel, per bbl. 10.50
- Why use cornmeal and other feeds when you can buy the much more nutritious cereal flours which we are offering at such low prices.

At an early hour yesterday morning, when Dr. Elliott was returning from a professional call, he noticed fire in the house on Highland avenue occupied by Mrs. Canning, an aged woman living alone. An alarm was at once given and Mrs. Canning was removed to a place of safety, while the flames extinguished the fire, which was caused by bedding placed too near the stove.

The recital by the pupils of the Acadia Seminary on Monday evening, March 3rd, was enjoyed by all present. The main body of the choir was organized and the whole program well received. The work of the violin and piano departments was especially good. The audience was delighted with a violin solo by Miss Luby, and piano solo by Miss Pollard and Miss Parry.

Major Eben Hutton gave a very interesting reading.
