The House then went into Committee of Supply, taking into consideration and analary to Collingwood Scherbier, Chief Engineer of Government Railways, for special services, Sir John Macdonald can be obtained and to the kind that to this knowledge Mr. Schreiber had been decided to with much greater empluments for 1839-90. Objection being taken to an item of \$2000 additional salary to Collingwood Scherbier, Chief Engineer of Government Railways, for special services, Sir John Macdonald very highly enlogized that officer and stated that to his knowledge Mr. Schreiber had been decided to with much greater empluments than he now received. He admitted that the practice of the adding to the stipulated salaries of Government and he now received. He admitted that the practice of the adding to the stipulated salaries of Government and he now received. ter recess, the House being still in Connittee of Supply, a discussion arose on the Sunday traffic on the Welland Canal. Messrs. Sunday traffic on the Welland Canal. Messra. Sumerville, Rykert, Bain of Wentworth, Boyle and a thers spoke against it continuance.

Sir John Macdonald said against the protests of the Subbatarians the Government had to put the strong representations of the commercial interests in the form of petitions from Boards of Trade and others against any interruption in the traffic. The canal was closed on the Sabbath day from 8 a.m. to 9 p.m., vessels only being locked through in the early morning or late at muta there being no bas to attendance at church services. It must be remembered that we had to meet the competition of the Eric Canal, where Sunday traffic was allowed. In order that the House might fully understand the position of the question between the provided and the result of the question.

The committee made good progress with the supplementary estimates and at 2 o'clock the House adjourned.

His Worship Police Magistrate Saunders coincided with him and said that this remanding was illegal and made the law a farce.

Mr. K. McLean, who appeared for Harvey, had the report of Messrs, Lye, Cross and Mitchell, the accountants, ready to give in evidence in the case, but as the prisoner Harvey was not present it was not allowed to be read. A copy was got by the reporters of the city dailies for publication, but before it could be published Mr. Guthrie for the prosecution forbid it, giving as his reasons that it was a contempt of court and that it also would prejudice the case.

In the meantime the Crown Attorney will correspond with the Attorney-General as to the bringing of Harvey unto the court and, when the trial comes up next Wednesday the accountant's report will be given in full.

Chairman Shaw's Deputation to the States Reports.

There were present at yesterday's Fire and Gas Committee meeting Ald. Shaw (chairman), Bell, Moses, Gowanlock, Maughan, Peter Macdonald, Ritchie, Macdougall and Hewitt. The report of the sub-committee advising that Mr. Cameron be not granted permission to erect a mill in hippincott-street was confirmed. Chairman Shaw then presented the report of the deputation which visited the States in the matter of underground wires. The concluding paragraph was as follows:

Judging from what we saw of the working of underground wires in the different cities we visited, and from the information we received from competent independent sources, your deputation has no hesitation in recommending that steps be taken to compel all companies operating electrical conductors to place their wires underground. We are satisfied that an underground system can be worked as successfully as an overhead one. A reasonable time to make the change must be allowed to the company. The streets in the central part of the city should be cleared of poles and wires as soon as possible, as it is on these crowded thoroughteres that the nuisance of poles and wires is felt to be the greatest. It is there also that the greatest danger in case of fire exists. The buildings are high and cannot be reached by the ladders of the firemen until after the network of wires in front of them is first out through. This means loss of time and consequently loss of property and possibly loss of life.

The report was adopted.

Hopkins of Church and Carlton-streets, Whe Promptly Jumps on Them—The Proceedings Yesterday.

The Board of License Commissioners are having a heavy time of it this week receiving deputations with arguments for and against the granting of licenses to certain people. The first that entered the board room yesterday afternoon consisted of Messrs. Wm. Taylor, 198 Lippincott-street; Sidney Smith, 230 Lippincott-street; Sidney Smith, 230 Lippincott-street; Sidney Smith, 230 Lippincott-street, and Henry Hood, 32 Ulster-street. These gentlemen appeared on behalf of Mrs. Munns, the giving of a license to whom was opposed the previous day by Mrs. Vasey, Mrs. Harper and Mrs. Lacy, who gave Mrs. Munns' shop a general bad anne. Mr. Hood said that fully 15 per cent. of the people is the sub-division want Mrs. Munns license continued. He characterized as a lie the statements of the ladies the day before, but on being reproved by the chairman,took back the harsh expression.

Mr. Taylor in speaking said: "There's one of them women that won't stick to anything she says," whereupon Chairman Ryan asked. "Excuse me, Mr. Taylor, but haven't you been deinking to-day?" To which Mr. Taylor replied, "Evouse me, Mr. Taylor, but haven't you been deinking to-day?" To which Mr. Taylor replied, "Ye only had a cigar and some giager wine." "With a bead on it," added Peter the Great. Referring to the statement that women carried liquor from Mrs. Munns' store, Mr. Taylor reminded the Board that such a thing was quite common in the Old Country. "But we don't want the people to get down that low here," said Commissioner Proctor

Lawyer We, Murdooth then appeared and informed the Board that he had been instructed by Mrs. Munns to take legal action against Mrs. Vaney, Mrs. Parker and Mrs. Lacy, because of their statements before the Board on Tuesday, as reported in The World and Empire. The chairman said there was no a sed of this kind of terrorizing and said he was sure the ladies had spoken not out of any vindictive feeling towards Mrs. Munns, but

Accident on the C.P.R .- Cars Wree As the moraing passenger train on the Canadian Pacific Railway which left Union Station at 8.45 yesterday for Montreal was going up the grade about two miles east of Green River six or eight cars of a freight train ahead broke loose and came thundering down the grade. The engineer of the passenger train promptly rowered his engine, and his presence of mind averted what would otherwise have been a most serious mishap. As it was the passenger engine was hadly raked and one of the ffeight cars completely wrecked, while the others work more or less damaged. No one was injured.

At Rest at Last.

The many friends of City Treasurer Coady will regret to learn of the death on Tuesday last of his mother. The deceased lady was 73 years of age and with her husband settled in Toronto in 1834, the date of incorporation. She retained her faculties to the last and her memory was a living record of the history of the city from the earliest days. The funeral takes place at 10.30 this morning from the residence of her son-in-law, 548 Spadina-avenue, to St. James' Cemetery, Rev. A. J. Broughall off St. Stoplion's officiating. Mr. Coady feels his loss keenly and has the sympathy of the citizens in his affliction.

Yesterday afternoon a layear-old boy was found unconscious in a lot on Strachan-avenue; suffering from a bad contusion at the base of the brain. He was taken to the General Hospital and remained in a comatose condition until a late hour when he recovered sufficiently to give his name as Robert Habbitt, 46; Bathurst-street. It is believed that he was seized with a fit, and in falling received the wound on the head.

A Set-Back for Prohibition.

It is certain that the cause of restriction and high license is gaining over the border; while it seems equally sure that prohibition is going backward. On Monday the State of Massachusetts voted against a proposed amendment to the constitution, making prohibition compulsory all over the state. The majority against prohibition was over 40,000, which is not considered so very large; still, hardly anybody expected it to be more than half as much. The truth appears to be that the occasion developed an antagonism to prohardly anybody expected it to be more than half as much. The Inland Freights Charge-In 1879 the Canadian Government in

augurated the levying of duty on inland freight charges on articles imported into Canada—countries in North America and Great Britain alone being exempted from the operation of the act. For instance, an article is manufactured in an interior German town. It is understood that complaints were made by Germany against Great Britain's immunity from this law, and it was proposed as a way of settlement to place Great Britain under its operation This proposal created great excitement among ers of British goods. They would be called on to pay duty on land carriage in England, and as many of the exporting cities in England are inland-Manchester, Birmingham. Leeds. Sheffield, etc.—the tax would be

The matter was brought before the atten tion of the Government by representatives of the Montreal and Toronto Boards of Trade and the whole matter was thoroughly discussed. Betting on the Big Handicaps.

Still three weeks before the Brooklyn Jockey
Club Handicap is decided, and yet five horses
have been backed out of the Baltimore book. At this time last year Hanover was the only candidate with "full" written opposite his name, while 25 to 1 about The Bard went begcandidate with "full" written opposite his name, while 25 to 1 about The Bard went begging. And yet The Bard won, though his starting price was 4 to 1, while Hanover went to the post an 8 to 5 favorite. Now the book is closed on both horses, and Exile, who ran in the memorable struggle at Gravesend, has also been backed to a standstill. Here and Juggler are the others against whose chances Mesers Emery and Jone-retuse to lay any more money, but certainly their last year's performances do not justify a reasonable hope of their even running isto a place. But the Baltimore pencillers are making a round book, and as both Eleve and Juggler were backed at the long price of 100 to 1 if did not require much money to close the book on them. Many changes have recently been made in the volunteer Handicap. This rich stake will be run at the June meeting of the Concy Island Jockey Club and the starters will probably include some of the best three-year-olds in training. The distance is one mile and a quarter, possibly a little longer than some trainers care to send a promising colt so early in the season, but the field is sure to be large, and a good race will be the result. When books were first opened on this event 40 to 1 was offered against Carroll and 50 to 1 each against Reply and Tenny. To-day all these have "full" opposite their names in the Baltimore book. Fresno is practically first in Avorite at 15 to 1, Diablo, Eric, Radiant, Lannes, Magnetic, Major albomo and Tom Boy are 20 to 1 chances, while the 30 to 1 division includes Blue Rock, Crackeman, Fides, Long Island, Orator, Ransom, Senorita, Saracen, Sunshine and The Don. After a preliminary warming up Knott was cantered around to the half mile pole and was then given his head. It was noticed by the critical eyes turned upon him that he did not run as easy as he has been in the habit of doing. The mile was made in 1.46 and the mile and a half in 2.47. The last quarter was run very slow and the great 3-year-old looked very tired. He had not been pulled an inch of the road but was ridden out. The trial was a great disappointment to both Bryant and Scoggan, as they had expected him to run about six seconds better. It must also be remembered that Knott's shoes have been removed and racing plates put on his feet. If he is expected to win the Two Thousand Stake at Nashville, the Kentucky Derby or any other important race, he must be got in much better fix than he is in at present.

WILKESBARRE, April 24.—Although the weather was not favorable to-day there was a reasonably good attendance at the first game with Toronte. The Canadians won by a lucky bunching of hits in the third innings and by fine toam play. The only weak feature of the visitors play was McGuire's throwing to second base, and the home team stole that base pretty nearly as they chose. This and erratic pitching were the bad spots. Grim in centre field distinguished himself by a very brilliant catch, but by long odds the prettiest catch ever seen on the grounds was one by McMillan in left after a hard run. The catch saved a home run or at least a three bagger, and although it told badly against Wilkesbarre was loudly applauded. Houver did the best batting for the Torontos. He got his eye on the ball for a deuble and single and both hits were yeary fortunate for his team. Vickery was wild throughout, sending seven men to first on called balls, hit two batsmen and advanced base runners by yow wild pitches. McGuire proved a tolerably effective backstop but the pitcher was too wild to give him much of a show. The Torontos batted Wheeler hard, but rather unluckly at a times, sending many flies to the outfield which were taken good care of by Wilkosbarre. Bescher's batting for the home team made him a popular figure with the crowd. The teams play again to-morrow. The score:

Berchard, public school teacher, Norland, writes: "During the fall of 1881 I was much troubled with Biliousness and Dyspensia, and part of the time was unable to attend to the duties of my profession. Northrop & Lyman's Vegetable Discovery and Dyspeptic Cure was recommended to me, and I have much pleasure in stating that I was entirely cured by using one bottle. I have not had an attack of my old complaint since, and have gained fifteen pounds in weight."

Whose is the Buty? Editor Wo rid: Whose duty is it to remove from the Bay the numerous snags with which it is infested? In the vicinity of Hanlan's there are at least half a dozen of a most dangerous character to row and small sail boats. Several character to row and small sail boats. boats ran on them last year and had holes knocked in their sides and bottoms. The writer knows of one such case where the most strenuous exertious were almost ineffectual in keeping the boat from sinking, and it had at least six persons aboard, some of them ladies. A terrible catastrophe was barely averted. It is more by good luck than anything else that no drownings have so far resulted from these dangerous and easily removed obstructions, and should one occur a verdict of manslaughter would be found against the person of persons clearly responsible for their non-removal.

The Fires in High Park. Editor World: The inspection of High Park the other day by the aldermanic committee was neither thorough nor effective. Virtually it amounted to this: Superintendent Chambers amounted to this: Superintendent Chambers told the aldermen that his course was all right and they placidly assented. Yet the fact remains that Mr. Chambers has burnt and destroyed myrinds of the earliest wild flowers and injured many young trees by his precess of improvement. The evidence is there still. There was no need of performing any little experiment to test the power of fire on tender vegetation. The Superintendent's great experiment was more than enough if he had only taken the aldermen to look at it. But they had a pleasant ride and:a gool drink of milk from the park cows, and so the inspection was not altogether a failure.

"First Aid to the Injured" was the subject of G. T. R. Surgeon Riordan's lecture to that com pany's employes in the Round-house readingroom last night. The lecturer handled his subject with great clearness. Instruction was given
as to the best means of stopping bleeding from
clean cut wounds, from lacerated and from
punctured wounds by simple means.
Also the best manner to treat such
wounds if other remedies are at
hand. In cases wherean artery is cut a good
deal depends on the rapidity with which the
blood is lost; if rapidly the result will be
serious, if not the person will probably survive.
A piece of lint or cotton seaked in water and
applied to the wound may prove sufficient to
arrest the flow of blood; if not a ligature
above the elbow or knee, as the case may be,
will prevent the flow. In an interesting manner the Doctor treated of the several classes of
wounds and shocay resulting therefrom, the
method to be followed in fractures, simple and
compound, and dislocations. Scalds, bures
and sprains also came in for concise treatment.

Naturally she will set questions that bear specially on the lectures she has given, and what is the result? At the last examination in one class, out of 74 students who presented themselves only 24 passed, and of those 24 about half were students directly under Miss Harto's tuition and who, of course, attend her lectures; in fact, not one of her students failed.

Now, I have not the hear of Miss Harto's acquaintance, who, I daderstand, is a highly gifted and most estimable lady, nor would I for a moment reflect upon her in any way; but, as I said before, she will naturally set the examination questions in the same line of thought as her lectures are given, to the manifest advantage of the rown students and the sequalty manifest advantage.

A Painful Sight. Few people fully realize the sorrow an suffering which is daily endured among the sick of this city. Some are stricken down with acute disease, while others are just able to keep around under great difficulties, and still another class, the most to be pitied, fare those who though afflicted with painful disease, are compelled to keep to their daily duties. No better example of this last class of sick people could be mentioned than Mary of sick people could be mentioned than Mary Phillips, who, when asked about her trou

Phillips, who, when asked about her trouble, said: "My disease had so reduced my strength that I could hardly stand, and I felt tired, languid and worn out. I could scarcely eat anything, and what I did force down lay very heavy on my stomach, which was always bloated and full of gas. I had severe headaches, and my heart throbbed so I almost thought I had heart disease. My mouth was bitter, and my tongue always coated, especially in the morning. I felt myself getting gradually worse, my liver and kidneys were also in a diseased condition, which troubled me very much. I had severe pains through my chest and back; in fact I seemed sick all over, and don't suppose I ever would have got well except I knew personally of others who had been cured of diseases like my own by the doctors of the Medical Institute at 170 King-street West. As their counsel is free I called upon them and applied for treatment. After a careful examination they prescribed for me a medicine which I began taking, and it benefitted me so rapidly that in less than two months I was entirely cured, and am pleased to tell in public print what they have done for me.

FIREPROOF BUILDING MATERIAL TORONTO PLATE GLASS IM- Doings on Good Friday. Dr. Stephen Smith, an eminent physician of New York, Vice-President of the National Board of Health, and tare State Commissioner in Lunacy, after a critical examination of Terra Cotta Porous Ware, strongly recommenda its use in hospitals, asylume and similar institutions, as "it makes a floor and wait that noise can scarcely ponerate, and capable of taking a finish which will be permeable to sir, and may be washed and districted."

A recent test at the St. Lawrence Foundry, Toronto, shows that our sinch flat arch blocks, in a span of four feet, sustained, without any indication of weakness, 4546 lbs. of metal on one square foot of safface.

STRICTLY FIRST-CLASS.

Our Large Pedal Organs and Chapel Styles Are better for medium and small-sized churches than Pipe Organs or Vocalions and at half the cost. They contain Scribner's Qualifying Tubes, of which patent we have been the sole owners for 15 years past, and the patent having lapsed has now become public property. All intending purchasers should see our in-

struments and get prices. Catalog free.
