## Technical and Bibliographic Notes / Notes techniques et bibliographiques

The Institute has attempted to obtain the best original copy available for scanning. Features of this copy which may be bibliographically unique, which may alter any of the images in the reproduction, or which may significantly change the usual method of scanning are checked below.

## Coloured covers /

Couverture de couleur
Covers damaged/
Couverture endommagée
Covers restored and/or laminated /
Couverture restauree et/ou pelliculee
Cover title missing /
Le titre de couverture manque
Coloured maps /
Cartes géographiques en couleur
Coloured ink (i.e. other than blue or black)/
Encre de couleur (i.e. autre que bleue ou noire)
Coloured plates and/or illustrations /
Planches et/ou illustrations en couleur
Bound with other material /
Relié avec d'autres documents
Only edition available /
Seule édition disponible
Tight binding may cause shadows or distortion along interior margin / La reliure serree peut causer de l'ombre ou de la distorsion le long de la marge intérieure.

L'Institut a numérisé le meilleur exemplaire qu'il lui a été possible de se procurer. Les détails de cet exemplaire qui sont peut-être uniques du point de vue bibliographique, qui peuvent modifier une image reproduite, ou qui peuvent exiger une modification dans la méthode normale de numérisation sont indiqués ci-dessous.

Coloured pages / Pages de couleur

Pages damaged / Pages endommagées
Pages restored and/or laminated /
Pages restaurées et/ou pelliculées
Pages discoloured, stained or foxed/
Pages décolorees, tachetées ou piquees
Pages detached / Pages détachées
Showthrough / Transparence
Quality of print varies /
Qualité inégale de l'impression

Includes supplementary materials / Comprend du matériel supplémentaire

Blank leaves added during restorations may appear within the text. Whenever possible, these have been omitted from scanning / Il se peut que certaines pages blanches ajoutees lors d'une restauration apparaissent dans le texte, mais, lorsque cela était possible, ces pages n'ont pas eté numérisées.

TIME on Address Label should be brought down to some future date.

K要 Merchants, Manufacturers and other business men should bear in mind that the "Journal of Commerce" will not accept ad. vertisements through any agents not specially in its employ. Its circulation-extending to all parts of the Dominion--renders it the best adverteseng medium in. Canada-equal to all others combined, while its rates do not include henny commisszons.
-For the quarter onding September Vancouver, B.C., exported to the United States $\$ 700,000$.
-Neardy 40 per cent of the total value of the export of British papor each year represents the trade witn Australia,
-Tre C.P.R. steamer Manitoba re. cently carried 1,282 tons of steel rails and merchandise, the largest cargo ever taken out of Owen Sound in a single bottorn.
-A. J. H. Eckimardt, casket manufac. turer, Toronto, has purchased the old Jacquès \& Hay factory on Esplanade street; and will make extensive alterations in the premises.
-Tue sprinkling of sandy railroad beds with crude petroleum for the purpose of laying the dust, a practice in force on some systems in the United States, apparently brings nearer the perfecting of amall but important details in railroading.
-Tue fiscal position of the Bank of England is rather peculiar; a year ago it had a gold reserve of $\$ 220,000,000$. at present it is down to $\$ 150,000,000$; Its reserve is 43 per cent, or within 8 per cent of what is ordinarily thought to be essential to bafety,

## AGENCIES WANTED.

Gentloman in Charlottetown, P. E. Island, desires agencies :Commercial, Press, Scientific, or other. Businoss man, Uaiversity education, best social and moral standing and references. Aduress, with full particulars,
P. O. Drawer 676, Charlottetown, P. E. Island.
-A New industry is in contemplation by New Zealand dairy farmers. The markel is too far away to compete on fair terms with their butter, and it is now proposed to sond to London the cream in a frozen state, to be churned into fresh butter on its arrival.
-'Tue boot and shoe stock of Quigley \&•Co., Guelph and Berlin, has been sold. The Guelph stock, valued at $\$ 10,800$, was purchased by D. K. Lowan of Guelph, at 70 cents on the dollar. The Berlin stock, valued at $\$ 5,000$, was sold to M. B. Gould of Port Hope, at $541 / 2$ cents on the dollar.
-Jaianise merchants wish all samples of textiles to be sent in bundies says the British Consul at Yokohama; they refuse to examine samples when glued upou sheots of cardboard. Low-priced goods alone have any interest for Japanese buyers; hence it is'to their cheapness that Gorman goods owe their success.
-Fon the twelve months ending Septomber 30 the imports of butter into the United Klagdom from the Colonies totalied 380, 817 cwt. made up as follows:-From Canada 110,985 cwt.; Australla, 198,606 cwt.; New Zealand, 71,786 cwt. From the United States $188,431 \mathrm{cwt}$, and from other countries 200,601, The imports from the contineut, ombracing Denmark, France, Germany, Kolland and Swedou, totalled 2,388,744 ewt.
-Tim Ottawa Board of Trade proposes to memcriallzs the Oatario Legislature asking that the amondment passed last session compeling all companies having a limited capital to write. the word "limited" in full after the name of the firm be killed. Tho councll is of the opinion that there are many more limited companies than there are unlimited companies, and for that reasou it would bo more advisable to have the unlimited companies write the word " unlimited" after the firm name.
-A. writer in the New York Commercial Adnertiser is authority for the statoment that the amount of cotton destroyed an: nually in the United States by fire, improper baling, and careless handing amounts in value to about $\$ 25,000,000$. In support of this alarming statement the writer goes on to show that when the various accidents of the year are summed up, and upon the basis of last years cotton crop which aggregated $7,000,00.1$ bales, this constitutes a tax of $\$ 3.50$ on each bale.
-Tres imports of choese into the United Kiugdom for the yoar onding September 30, totalled $1,520,830 \mathrm{cwt}$. of 112 lbs ., Canada supplying $1,400,802$ owt, and Australia $68,044 \mathrm{cwt}$. From the United States, Great Britain received 617,830 cwt. and from france, Holland and other countries 370,680 cwt, making a grand total of $2,527,232$ cwt. or $288,051,184$ pounds, npproximately $5,000,000$ boxes.

## JOHN FORMAN,

644 Craig Street, - . . . . MONTREAL.

The "EDISWAN" Lamp will save you money.
-Mu. Thomas Paton, formenly General Manager of the Bank of British North America, died on the 10th of August last at Waikato, New Zealand, at the age of 91 . Mr. Paton was among the first officers of the bank sent out from England to this conntry, and aiter having been successively manager of the Quebec and Montreal branches, was appointed inspector about 1849. The iuspector was at that time the head official of the bank on this side, and this position Mr. Paton held until his retirement in December, 1809, his title having been changed to general manager some twelve or thirteen years before.
-New South Wales is just making a new doparture in con. nection with the supply of oranges for English consumers. Some parcels of this fruit have previously beon sent from the colony, but the oranges have been conveyed in refrigerating apparatus. The ship "Lusitania" is now bringing to England from New South Wales a large quantity of oranges packed in ordinary orange boxes, and convoyed for the first time as ordinary cargo. The New South Wales Governmeut hope that this will give them considerable advantage in the home market, and will mean a supply of Australian fruit at seasons when oranges are not obtainable from the old orange-producing countries.
-Last year Dr. MacPhail, professor of pathology in Bishop's College, Montreal, was commissioned by the minister of marine and fisheries to investigate the causes of discoloration of canned lobsters. The importance of the lobster cauning industry (the export in 1806 amounting to two and a half million dollars) warranteil such an investigation. Dr. MrePhail found the discoloration to be due to a bacteria, which could only be destroyed by the application of heat to the flled can, the use of germicidal fluids being out of the question. The process when adopted will save hundreds of thousands of dollars yearly to Canadian canners.
-As explaining the inability of Inglish shippers latterly to pay holders prices for butter, it is stated that the British market is overdone. During the five weeks ending October 2nd, says a report from the other side, the imports of butter have been 2,686 tons in excess of the corresponding weeks in 1896. This excess has come from four principal sourcen, viz,:-Denmark, which shews an increase of 882 tons; Canada, 864 tons; the United States, 634 tons ; und Russia, 207 tous; making a total of 2,677 tons. It is this great influx of butter, combined with a large make of home production, that has brought about a state of almost perfect stagnation. For seven weoks there has been a gradual decline in prices instead of the usual increase at this time of the year. Stocks have been accumulating for some weeks owing to the supplies far exceeding the consumption, and, until these are considerably reduced, there can be no rise in values.

-Herm is an indication of the times, which is indispatable in Its way. Some of the Clanadian banks doing business In the West have all their bills issued up to the limit, and the general increase in business necessitates the paying out of the bills of other banks. Such a condition has not existed for many years.
-The French Societe Technique du Gas Paris, France, offers the following prizes: $£ 100$ for a new gas incandescent lamp, to be sent in before 1st February, 1898 ; $£ 80$ for improvements in making or in using gas. The prizes are open to the world, papers to be written in French.
-Ir is now stated as a fact that the Amcrican Window Glass Company will soon begin to do business as the representative of nearly all the window glass manufacturers in the United States, an organization has been effected, and application has been made for a charter for the new company. The capital stock is placed at $\$ 1,200,000$. Pittsburg will be the central from which the product of the window glase factories will be distributed. It is stated that this bids fair to be the most offective organiza. tion ever gotten up in the glass manufacturing trade.
-Trie town of Windsor, N.S., now in ashes, was one of the oldest towns in Nova Scotia. It was one of the principal posts during the French regime and prior to 1704 was known as Pisi-
quid. The British retained it as a military post, and its location soon made it a trading centre for the middle part of the province. The population of Windsor by the census of 1831 was 2,459. In 1881 it was 2,888. The assessed valuation of real estate in 1808 was $\$ 788,000$, an increase of $\$ 200,000$ in the previous ten years. The assessed value of personal property was in $1803 \$ 469,000$. The latest official valuation was $\$ 1,017,750$.
-A patent has been applied for an incombustible lampwick, says a foreign exchange. This is made of glass, and it is trapersed by fue channels. The lamp is lit automatically, the oif being drawn up the channels by atmosphorio pressure. It is urged as one of the main advantages of the invention, besidge the incombustibility of the burner, that the supply is uniform, so that a flickering flame and the result of such, the cracking of chimneys, are avoided. It seems, however, that on tho one hand the making of snoh wicks offers difficulties, and on the cther even refined kerosene oil leaves solid residues whiok would in time stop up the pores, and danger of explosion would arise.

- A syndicate has been formed in Toronto to hold a Pare Food Exposition next month. The manufacturers are said to be all favorable to exhibit.

## THE HARBOUR PLANS.

It seems now, since the general conference of the different interests connected with the harbour and the Minister of Public Works, that the opinion prevails generally that the plan submitted by the engineer of the Department of Pablic Works and approved by the Minister is, after all that has been said against it, the best and most practical of any yet proposed by any official authority, and will interfere less with the trade in the harbour during construction, and will also cost less than any of the other plans.
The sooner the question is definitely settled the better and the Minister will doubtless give effect to the viows he has already expressed in favour of his engineers' plan. There seems to be no other course open for bim. Considerable attention has been given to this matter by western uewspapers.
It is there conceded that if Montreal is to be a national port of the Dominion, and Dominion money is to be used for the construction of the necessary works required in ọrder to provide facilities for cheapeni-

ing transportation, then the Minister of Public Works is justified in the position he takes that from a constitutional standpoint he is bound to take a broad view and naturally be guided largely by the advice of the Government engiveers, and he then becomes responsible to Parliamert and the country for the manner in which the public money is expended.
There is no means of getting away from that sound position. It is satisfactory to know that in the west it is generally admitted that improved facilities for handling the traffic of the country at Montreal, is of paramount interest to the Dominion. The Minister being thus strengthened in his position, and the last fad No. 19 having been discussed and found wanting and now with no defenders, the sooner he issues notice that will put an end to any further opposition the better. Until that is done volunteer plans will contiaue to be sent in to disturb' the public mind and cause irritation. Some of these volunteer plans are not without merit in some particular way. One of the last has been taken up and recommended in a sort of way by the disappointed advocates of unfortunate No. 19, apparently simply because it is different from that of the Government.

The method of utilising the guard pier and connecting it with the Windmill Point wharf, is certainly a good one when the shoals are dredged away, aud the time comes for using it, but leaving that out the proposition is utterly out of the question. Any one looking at the plau, as published in some of the daily papers, will see that it provides with its five short piers for only eleven berths for ships of the first class; whilst it completely destroys the berths for seyen or eight that

now exist, and also all the berths now used by the Richelieu Co. for their Quebec and market boats and other river craft. If the whole work was entirely new it might be different; but as matters are, the accommodation proposed to be given would not justify the large cost that would be involved in this destruction of what now is, and the inconvenience to present interests, and and the upsetting of the present trade in the harbour.

Whatever plan is adopted there will be more or'less incouveniencee and disturbance, but that should be reduced to the minimum, and have the maximum of compensating advantages for the future.
It seems unfortunate that there should be a necessity for dredging away so large a part of the old historic Island wharf, that has hitherto been the centre of so much business. If that could have been made the base of the uppermost pier, it would be easy to extend it to the required length, and it would leave all the breast wharves as they now are, up to the Lachine Canal, unisturbed for busmess.

The low level feature of the Government plan has so much to recommend it, simply as a harbour work that it now is, so far as we can learn, generally approved. Every day the side ports of the large ships are used for taking in cargo direct to their lower decks, which could not be done from high level wharves. Moreover the business is not altogether done in any harbour by large vessels. Vessels of the class of the "Campana" for instance, could not possibly afford to lond or unload cargo on wharves made to the level of Commissioners street. Even at the present level it was a necessity two years ago to cuat slips in the wharves, to enable the "Campana" to discharge and take on cargo when the water was low. Then again cargo is landed from ships to be transferred to inland vessels; that can now readily be done, but with the high level it would be a costly operation as anyone cau readily understand. All these different interests have to be considered in every harbour.
The onl ${ }_{7}$ reason that can be advanced in favour of the high level is that it will save the city the expense of building a new revetmeut wall and the ramp roads, that would be required if Commissioners is to be widened outwards and the present level of the wharves maintained, That is Ciyic selfishness pure and simple
-as we have pointed out on previous occasions when dealing with this question-there is no reason why the harbour should be put to the very great extra cost of these high level wharves in order to get an important. city improvement at its expense. . This will apply whether the Harbour Commissioners or the Government provide the money. Besides the extra cost, it will require a year extra time for each pier, to dredge the material and fill in the extra height for the high level, even with all the dredges and other plant that cau be crowded into the harbour, if there is to be any shipping business done in it at all during the time of construction.

As we have before mentioned it is unfortunate that the harbour enlargement should have become entangled with the flood protection and Commissioners street widening questions. Had that street been widened inwards it and the flood protection might easily have been completed long ago, and that abomination called the temporary dyke have become a thing of the past. In that case the present valuable shore wharves would remain undisturbed and the piers could be made without serious interference with existing arrangements until the additional accommodation is provided.
It may be that some of those who have had a share in all the talk have not fully realized all that it means -to extend the wharves outwards some sixty feet, or whatever it may be, with the new cribwork-for even the low level of about forty feet high and all the space between the old and new line to be filled to the same height and depth. It is the time that will be required to dredge and put it in place more than the cost that makes the question of the filling so important; every practical man will admit that. The trade will have reason to be glad should the Minister finally decide, as he doubtless will, to be guided in this respect by the advice of his eugineer, given in the report which was sent down with his own letter on the 18th August last.

Although nothing has seriously suffered for want of berths for the shipping so far, there is undoubtedly an urgent necessity for more in the immediate future and at least one of the new piers should be proceeded with at ouce.

The Hon. Minister has frequentiy declared himself in favour of improved facilities for handling freight in the harbour. In this he is in accord with the general sentiment, and some improvement in that respect will doubtless follow soon, not only for freight, but also in the means: of reaching our long stretch of wharves for people having business at the different points. In so tar as they are now, the wharves in the harbour of Montreal are as convenient and easy of access for vessels as could be desired, and in these respects have advantages over any other seaport; but the provision for handling the business on them is, to say the least, not up to date: : This should, and donbtless will, receive the attention it deserves and all the different trade interests benefitted thereby.

## FIRE INSURANCE METHODS.

People are nore influenced by proverbs than they are ready to admit. That one so often quoted about there being nothing new under the sun, must often occar to the representative insurance man who is called upon at annual conventions and other gatherings of the profession to make a speech which is fit not only to hear but to be read in print. That proverb is answerable for much waut of confidence and consequent failure on these occasions. There is yet a great deal to be learnt in the profession; the experience of every field-man differs in some particulars from every other -more so than do the various properties, buildings, \&c., which they underwrite.
Our attention has been directed to this subject again this week by the report of the Colorado State Underwriters who held their annual pow-wow in Pueblo on the 13 th. The address of the occasion was delivered by E. H. Day of the "Grievance Committee" who began by saying he was a novice,-but that the man who does the best he calu and fails in thus trying to do his duty, cannot be treated as a deserter, hiding in the rear. In thinking over the subjects from which to choose for his address, he recalled the words of an agent, an underwriter of fifteen or twenty years' experience, said when he first took his place in the ranks of the insurance brigade: "Some day, underwriting will be a profession."-Is underwriting a profession? According to the Century dictionary, it is only an occupation. It can be a profession, only when 'those who practice it pass an examination and receive a diploma.

In some states blacksmiths are professional men; insurance men are not. The blacksmith, who by careless work, or lack of knowledge, may injure a horse worth a hundred dollars or so, must be professional. The in. surance agent, who by careless underwriting or ignorance of his business may cause loss to a company or a patron of $\$ 5,000$ or $\$ 10,000$ is not a professionad man. It seems strange that an occupation that requires so much business ability, so much sterling integrity, so much good judgment and common sense, should be relegated to the hauds of anyone whose only qualifications may be a desire to embark in a calling which will prove remunerative and not laborous, and an ability to furnish a small boud. Let anyone visit the office of a lawyer. He has his books of reference, his reports and digests. The physician has his assistants, silent; but ever bringing to him the latest advice, the experience of his brother physician and counsel of the most skilful and successful men of his profession. Is it so in the office of the underwriter, except perhaps the head-office in the large city? What evidence is there that he is in tonch with his business? If he has a small book of forms and a rate book, his library is complete. Is this as it should lje? The agent who desires to be a professional man, and every agent with such an aspiration, should be posted on what is transpiring in the insurance world. He must get insurance literature, he wust watcli the papers, read the decisions in insurance cases, and must apply them to cases in which he is interested. He should have a good work on insurance law, so that when an insurer asks for infor:mation, le sấexplain the point in question and trave some authority for his explauation.

Were, as if to prove the proverb's truth, the griev ance man cast his vision back in to the region of ancient history. Insurance as it is practiced to-day is comparatively a new line. Although Claudius was credited with being the first contriver of the insur:ance of ships, about A.D. 43, there was not much done in the business until about 1194, at which tine it was general in Italy. The first record we have of policies being in use is in Florence, Italy, in 1523. The first law relating to insurance was enacted in England in 1601. The insurance of houses and goods against fire was not common in that country until after the great fire of London, 1666. The year following an office was opened by a Dr. Barton, one of the largest and most influential builders of that city. Thirty years afterward a company was formed, under the name of the Hand-in-Hand with an office in the Royal Exchange building. This was in 1696. There were eight more companies formed in the next hundred years. The first company in Germany was organized in 1750. America followed in 17052. France did not fall in line until 1816 and Russia not until 1827. The first year the total insurance, marine and fire, in America reached the sum of $\$ 108,380$. He wondered what the commission was! From this small beginning, two hundred years ago, we have reached the yast sum and business of to-day.

Who has gathered in this vast aggregate? The local agent. Who is the local agent? In too many cases he is someone who writes insurance as an adjunct to some other business; it is with him a secondary consideration, a line that will help him until he can get something better. A man in such a position will never make a good agent; he will never give the business the study that its details demand. To him the commission is the object ; if he overinsure a building and there is a loss, the blame falls on the company for not paying the total value of the policy; he has got his commission, but there is another voice clamoring for laws to bind the insurance companies. How many have written and signed policies covering their own property? Is such a policy binding on a company? Only morally, not legally.
"Who among you," said Mr. Day, "can give me the exact definition of a building, according to insurance law? I have asked a number of agents, both special and local, and I find a divergency of opinion. I will state a case. I have written a policy on a row of eight store rooms, one-story high, brick diyiding wall ; one metal roof covers the whole row; no fire wall except at the ends; separate amount on each room ; one room is vacant. Is a vacancy permit necessary? Is that building vacant, or only one room in a building? It is all under one roof; I claim it is therefore one building and a vacancy permit is notnecassary. For the sake of being on the safe side, I have put one on. But at the end of six months, what am I to do? If it is still vacant, shall I cancel that portion of the polisy that covers on that one room? I have searched for au athority on this point, but so : far, have found none."
He knew a main who went into the insurance busiuess. One of the customers of the agency, wrote him, saying "'I hear that you have purchased the B, C.
agency lelarlibe out of town form monthor:two; please puta vacancy notice on my house H He went down and puta 'Lo-let' sign on the house; hadeneyer: lieard of a vacancy permit. He hada partial loss dur-s ing: the first month, and sent : the following motice to: the company : 'There was a fire at Mr. Jones' honses; he put in a claim for $\$ 10$ damages: E , paid him: $\$ 8$, please: remit.' There were two policies on the house . concurrent. . When the company asked him why he did not divide the loss between the two companies, he said the loss was such a little one, he supposed it did. not make much differeuce, the other company could. pay the next loss. I am glad to say for the sake of the insurance business that some one came along and bought him out, before he had much chance to do serious harm."
The system that will allow such a man to assume these duties and responsibilities, and has no safeguards about it, is wrong. The companies that issue commissions to any one who may apply, without a full investigation, are to blame. Could such a man be classed as a professional man? He was afraid not; nor the calling be professional as long as it is possible for a man to enter its ranks without any preparation. If every man, before assuming the duties of an under: writer, had to spend some time in studying the bisiness, as the lawyer or physician does it would be beneficial to the companies and the insurisg public: The companies should have an insurance board; to examine the applicants for agencies; and give commissions to: those only who could pass an examination on the law and principles so vital to their own interests. Wheir: each agent shall have a certificate from the state en:: titling him to practice as an underwriter he will; indeed, be a professional man. The question that will: arise is, where is he to learn the rudiments; or prepare: himself as the doctor and lawyer are prepared? There is no chair of insurance in our colleges or tiniversities. The only means of learning, the profession openi "to: young men is behind the counter of an insurauce office;beginning as a mere office-boy and ending, after long years, if he have sufficient influence, as manager ; that is if he can find a company whose board looks for a man of experience, ability and honesty rather than one whose chief recommendation is for ornamental selfassertion.

TRIAL BY DEI'ECTIVES.
The criminal law of Canada provides for the trial of: any accused person, after certain preliminaries, by a Police Magistrate, or a Judge and jury in a higher. Court. Before a person can be subjected to the humi:liation and disgrace of standing in the prisoners' box there are certain formalities to be observed which are intended to protect persons from such injury being intflicted upon them from improper motives. There has, however, sprung up in recent years a system of trial by: detective officers; which is not only unrecognised by: law, but is a violation of the elementary principles. of justice and of judicial procedure. The efforts of detectives to trace a-crime :to its perpetrators are laudable. As criminals are becoming more and more astute by edication it has become necesary to have a special police force composed of educated men, gifted
with qualities necessary for discovering clues and following them up. This is tedious work, to save which a short cut has been devised. When the detectives suspect a person they put him under a cross-examination in order to elicit admissions and statements to justify their suspicions, and to warrant their placing the suspected person under arrest, according to their julgment as to the bearing of such admissions and statements. Having so cross-examined a person, they decide, in some cases, to pmish him by irretrievably injuring his charactor for life by placing the person so examined under arrest and charging him with a crime. In the case of an ordinary "tough" this is no great hardship, but there are persons upon whom such a course intlicts a very serious penalty.
The late Judge. Mellor told a High Coustable who Lad so questioned in prisoner prior to his arrest, that "he had thereby exercised a greater power than even the Lord Chief Justice himself was invested with." He declared the examination of a suspected person by even a High Constable to be grossly illegal, and the Judge said; "An officer capable of being guilty of such a practice is unfit for public service as a Constable." In this case the prisoner had been proven guilty by his answers to the oflicer's questions, but Justice Mellor discharged him with these words; "Prisoner, you are discharged, although you are sworn to have admitted your guilt to the High Constable, as I will not toler ate the admission of evidence secured by so unfair, and so illegal a practice as examining a man by a peace officer who has no authority to ask such questions as were put to you." Since that rebuke was administered the law has been changed so as to allow prisoners on trial to give evidence on their own behalf, if they wish. Words so uttered to detectives are not taken down as uttered, they camot be verified, they are apt to be misreported, or misinterpreted by the circumstances which led to their utterance being unknown, and detectives are apt to strain words to secure a conviction. At the recent trial of a bank teller at Napanee a detective swore that the bank manager and another official had told him untruths, and, it was suggested by Counsel that one bit of supposed incriminatory evidence had been man ufactured by the detective, yet upon conversations so unreliable, and facts so unverifiable a young bank cleck had been put on trial for burglary. The history of the Napanee case is exceedingly regrettable whether the accused was imnocent or guilty. If innocent, the accused has been grievously wrong. ed by being put on trial on such flimsy evidence as his private trial by detectives afforded. If he was guilty then the course of justice has been obstructed by the hasty action of the detectives who, by trying to do their legitimate work by illegitimate means, have only created a scandal to justice. When the Magistrate dismissed the case against Mr. Ponton, a public demonstration was made at Napanee of sympathy with him aud indignation against the detectives. We trust the mystery of this bank robbery will soon be cleared up, as until it is, a most painful condition will exist for the innocent persons whom it has placed under suspicion.

Bankers would do well to make their branch ollices less easily accessible after bank hours. After being
once closed for the night they should be so secure as to forbid entrance to all but one officer without such violence being used as would attract attention. It is not enough to make the vault safe from intrusion, the office itself ought to be secure. Fad this precaution been taken the Napanee bank-safe would not have been surreptitiously opened. The Dominion which has, throughout its career, been one of the most prosperous of our Cauadian banks as well as one of the best managed, is naturally most anxions to discover and punish the wroug-doer in this bold robbery, not so much for the sake of the amount taken, bat for reasons akin to those which have on several occasions led other institutions to follow up and punisi an employe found guilty of misdemeanor; and it scarcely calls for remark here that the rattitude of the Dominion Bank in the present most regrettable case has been characterized by commendable moderation.

## THE PRESS AND ADVERTISING FAKES.

We have heard much recently of the Liberty of the Press, and of the danger of its curtailment or restraint. In these days there is no more danger of the just freedom of the Press being infringed upon, than there is of the just liberty of the individual citizen being curtailed. There seems, however, some confusion in the minds of certain persons, amongst them being the conductors of a section of the Press, between such liberty as is essential to the public welfare, and the abuse of liberty which is detrimental to public interests, and injurious also to the best interests of the Press by lowering its prestige and moral influence. The "conductors of a certain section of the Press" to whom we refer as mistaking license for freedom, are those who prostitute their columns, both editorial and advertising, by accepting advertisements of fraudulent schemes, or schemes which fringe the borders of fraud, and allowing puffing paragraphs of such enterprises to appear in their editorial columus.

A recent trial took place at Guildhall, London, of a printer charged with fraud in connection with a swind. ling enterprise to which his paper had given publicity and quasi endorsement by favourable notices in the editorial column. The evidence showed that pufts of the swindle had been sent to provincial papers for insertion as items of news, but which were paid for at the rate of one shilling a line. The public properly discriminates between what is palpably an advertisement, and remarks thereon made in columns which they believe to be devoted to the expression of the editor's opinions, or his knowledge of facts. Our eminent English contemporary, The Economist, remarks on this:
"If credulous readers are to have statements put down their throats which are paid for by those who may be interested in their deception, nerely because the newspapers rely on the bona fildes of their agents, who are also the agents, in some cases, of swindiers, while the agents leave the onus of responsibility to the newspapers, it is obvious that between these two stools the unfortunate public is bound to fall. Controllers of papers are pald by the public to be informed, and not to be misled, espectally in matters aflecting its pocket."
The system of inserting editorial paragraphs calling attention to investments, which may be honest or dishonest, but of the merits of which the conductor of a
newspaper knows nothing, except that he has been paid for their insertion, is a system which reoders such conductor liable to be particeps eriminis in a swindle; he may have received money for assisting some person or persons to obtain money by false pretences.
The public assumes that all editorial comments, as well as all statements which appear in editorial columns, are made on the responsibility of the editor or conductor of a newspaper, who, in such comments, is believed to be expressing his own convictions, and, in such statements is publishing facts within his knowledge. If such comments and such statements are not his own, but are those of some advertiser who has compiled them and paid for their insertion, then, certainly, such matter is issued under false pretences. The Journal of Commerce has frequently been offered large sums for the privilege of using its editorial columns for puffing enterprises and schemes, of which the promoters desired to secure the apparent endorsation of this journal. Our invariable response has been that our editorial columns were not for sale at any price, nor our advertising columns for sale to assist any enterprise of the bona fides of which we were in doubt, or the soundness of which we had reason to distrust. "Shilling a line eulogies" are never found in our columns, nor advertisements which lave any appearance of being a "fake," or delusion, or fraud. We should be glad were all our contemporaries able to make this declaration. But, some of them regard "the liberty of the Press," to include a license to mislead the public by inserting paid puffs in their editorial columns. 'lhis form of deception might very well be made an indistable offence, as it is now an offence against the honour of the Press, and a danger to investors and to purcbasers, who trust such dishonourable journals. We have no hesitation in declaring that were "fake" advertisements, and "fake" editorial puffs suppressed, and-we might add, "fake" newspapers-there would be a decrease in the number of so-called trade papers which could not pay expenses out of the legitimate business they would be able to secure: To hide false pretences would seem to be the chief ability with which they are endowed.

## QUESTIONABLE METHODS.

There will always be people in the world who in a business way endeavor to take a short cut towards acquiring wealth or, as it is called, "a royal road to riches." The evolution which for some years past has been going on in all legitimate lines of business has resulted in a condition of things that, to say the least of it, would be surprising to men of a former generation. The keenness of competition engendered by the desire to engage in business-similar to that which exists in the learned professions-is answerable to a large extent for the irregular methods so characteristic of the age. Schemes of all sorts are being launched, with or without capital, and eyery means devised to induce investors to risk their inheritance or their savings in something that promises them anything over the low rate of interest being paid by institutions and enterprises in which safety is thoroughly assured. Our
kin beyond the sea are often forced to the belief that they can claim a monopoly of schemes for getting rich by some short and easy method, but it will be generally admitted by those who know both sides that we, and especially our neighbors on this side of the ocean, can hold our own with them iu this respect.

Notwithstanding the great number of vicissitudes occurring throughout the country, as reported semiannually in our columns, the examples would seem to have little influence in deterring others from entering upon the same course. The result is that there are more persons engaged in business in every town and village throughout Canada than is warranted by the population, to say uothing of "departmental shopping. by mail " or of cheap trips to the large cities,-or across the border, or to Europe. 'This every country merchant knows, and it results, as already stated, in a degree of rivalry that frequently leads to questionable wethods-or to compromises, private settlements and other means by which the merchant is enabled to maintain the characterless competition which has been dealing out so much mischief to his neighbors, and with but little advantage to himself.

The large cities are the favorite hunting grounds of men who seen short cuts towards wealth,-from the patents for utilising the various elements for motor purposes, (some of these are worthy enough) or the joint stock company that promises to make a fortune for cach of the contributors out of a business which heretofore has not been sufficient to support one or two among them, down to the man who advertises imitation diamonds and excites that vanity which led to the ruin of Goethe's heroine in his immortal drama. It is among those who can least afford to spare the money, those whose savings from their wages are needed for the support of poor families, that these bogus goods are most in demand. A great majority of the employees in the office and departments of a daily newspaper in the city were led to forward their little mite to an advertiser of imitation diamonds a few months ago, a man whose record, had diligent inquiry been made, would have been sufficient to deter auy honest person from having dealings of any kind with him. In reply to the many dollars sent by these credulous ones, the advertiser requested them-" as the stone was a very excellent gem"-to forward "another dollar to pay for the setting," as they had special facilities for doing so. In many cases the dollar for "setting" was also sent, but it resulted, as soon as the advertiser had raked in some $\$ 15,000$ from his dupes, in his selling out the business to another and decamping with his illgotten gains. In a few instances the imitation article is forwarded, but it is invariably of the character of the jewels that make such a flare on the bosoms of actresses in vaudeville and other performauces on the mimic stage.
This is but one instance of the many schemes that are being continually floated in our cities, chiefly by persons from across the border who, relying on the principle that actuates most of our people of believing every man to be honest until he is found out to be a rogue, Iook upon Canada as a fair field for their labours. The so-called diaunond-merchant referred to above had an unsaroury reputation in Philadelphia, Cleveland and
othercities in the United States, and it was not unlikely that Chicago should also furnish him with congenial headquarters.: We have but briefly touched upoir this subject here, leaving for later issues the history of some of these schemes for getting rich regardless of kiowledge, integrity and perseverance.

Robert Browning las well expressed in one of his productions the motives that animate men great and smalland the corresponding results, which are, however, not always proportionate :-

> "Shat low man seeks a little thing to doSees it and does it;
> This high man, with a great thing to purge, Dies ere he knows it.
> That low man goes on adding one to ono, His hundreds soon hit;
> Whis high man, aiming ata milion, Misses a unit."

The brilliant successes in life occasionally noted in the press, and so much more exaggerated in men's mouths, -often the resiult of bold daring-of almost reckless ventures,-have their reverse sides in the cases of the men who in such transactions generally lose what others gain.

## 'LHE NEW DOMINLON LOAN.

The new loan floated by the Dominion Government has been secured on more favourable terms than any preceling one. 'The lowest before this was in 1894, which realized 3.16 per cent. The amonat to be borrowed is $£ 2,000,000$ to run for fifly years, bearing interest at $2 \frac{1}{3}$ per cent payable half yearly from 1 st inst. The average price of the tenders was E01. 10. 5 , which is $91 \frac{1}{2}$ and an inappreciable fraction. The proceeds of the loau, being under par by about $8 \frac{1}{s}$ per cent, will caluse the interestion the actual sum realized to be close upon $2: 3$ per cent, which brings the rate of interest below the net rate paid for the whole Debt, which is 2.80 per cent when allowance has been made for the interest received from investments. The tenders amounted to E4,205,900, which was more than double the sum called for, the highest tender being $92 \frac{1}{3}$. This is the first instance of any colonial loan being floated bearing 21 interest, though an Indian loan payable in 1026 is at What rate, and quoted at from 95 to 90 . Our own $3 \frac{1}{2}$ inscribed stock is selling at prices which realize about the same rate as the new loan. will bring to buyers, at from $91 \frac{1}{3}$ to 91 .

When tenders were called, a variety of conditions existed which favoured its flotation at a low rate. The london money market for a length of time has been gorged with funds seeking investment. . The bank rate was then 21 per cent,--since raised to 3 -and market rates for 60 -day drafts ranged 17 to 2 , and for 3 months 2 per cent: Banks were giving 1 per cent for deposits at call, and $1 \frac{1}{4}$ for those subject to notice. The plethora of money is shown by no less than $\&[13,090,000$ having been subscribed for new loans and new companies between Jst January this year and the lst October, which is $: 12,000,000$ in excess of the total subserip tions in 1895 , and $£ 21,000,000$ more than in 1894 . This abundance of moncy was suppleuented by the enhanced credit of Camada, caused by the . Jubilee demonstrations, and doubtless other favorable conditious:

Financiers would not have offered to lend Canada $\$ 20,-$ 000,000 at $2 \frac{1}{2}$ per ceint merely from sentiment excited at the Jubilee. But that event demonstrated that the political status of Canaida was fixed on a permanent basis as part of the Empire. All fear of its absorption by the United States was removed by the display of Canadian loyalty voiced so eloquently, and with such decision, by Sir Wilfrid laurier. The preceding uncertainty had had a certain effecton the money market, which, being removed, raised the credit of Canada to its natural level in busiuess considerations. Doubtless this, and the plethora of money, were the main causes of the recent loan's being so successful in London.

A highly interesting feature it the transaction was the large amount-bid for by Canadian banks and private financiers, whose aggregate bids amounted to $£ 800$,000. A Montreal Syndicate which offered for $£ 250,000$, comprised the Merchants Bank of Canada, $£ 100,000$, the Molsons Bank, £00,000, the Jacques Cartier Bank, and Bank of Hochelaga each $£ 20,000$, and Mr. R. Wilson Smith (Mayor) £50,000. The Bank of Commerce is reported as bidding for $£ 500,000$, partly for customers, while the Imperial tendered for $£ 250,000$, the Bank of: 'Toronto, for $£ 250,000$, and other banks and brokers for considerable amonts. The event is a most significant proof of the growing capacity of Canada to provide for its own financial needs. The more this increases the readier will loans be made outside. The probability is that the new bonds will gradually drift to Englavd as their value enhances.

## THE BU'TTER-PROBLAM SOLVED:

Canada has some buttermen who, after long practical study of the reciuirements of the English market, as ex. plained frequently in these columns, are now producing an article which competes on favorable torms with that made by the best Danish and Normandy makers. These two countries have, during the last few years, succeeded in driving out the Irish article, especially that known as Cork butter which had beld possession of the English market so long. The English palate, as already explained, differs very much from that of consumers on this side of the Atlantic, chiefly in requiring an article with less salt, firmness and color. One of our leading shippers-we were about to say the principal shipper in Montreal-has been able to secure considerable supplies of the new-make Canadian butter, put up in neat Australian boxes to promote its ready sale on the other side, where the tub is not so attractive. Thus is solved the problem which for so many years has been a pazale to Canadian butter-makers and dairymen. We have been able to more than hold our own in cheese, the Canadian article boing in the highest request in the Einglish market, but our butter shipments had been gradually dwindling away until it was feared our export trade of that article was completaly destroyed. Indeed we may say, and it is known to one who has eaten of butter in all the principal countries of Europe -including France, Donmark, England, Treland-which we have chiefly to regard on the butter question-that the new Canadian article is far in advance of the Danish product in all that is called for by the nicest palato in the mother country, and we have little doubt that those who handle the article will find for it a ready sale. We have to congratulate the country at large in having solved this problem, and it is to be hopad others will follow the example, and that our shipments of butter will "so increase during the neist
few years as to overtake those in our other great farm product, Canadian cheese. The butter © receipts in Great Britain from all countries, to 30th September this year, as compared with the corresponding months of the year preceding, show an increase of nearly 200,000 cwits. Lat us study how to secure and hold this great market. It is no disparagement to our fine Canadian creamery and dairy butter that it is not preferred in other countries to the article to which their palates are educated and accustomed to so long.

## CONOERNING LUMBER.

The Northuestern Lumberman of Chicago reports a generally brisk trade in lumber in the west and southwest, with dullness in New England and New York but more accentuated in Maine. In Boston receipts of spruce from the Maritime provinces depress prices. Carolina kiln-dried native stuff finds a ready markot. Chicazo dealers are well supplied with piece stuff, held at $\$ 2$ higher, with assorted stuff at $\$ 1.50$ advance. Duluth, Minneapolis and Saginaw stocks are fairly sold out, with much aetivity in mills and shipping at the last named place. Mississippi and Arkansa mills are also busy, and common yellow pine stuff has experienced an advance of $\$ 2$ to $\$ 4$. The yellow fever has retarded business in Texas. Furniture stuff is in greater demand in the centres of that manufacture. Shingles are likely to be scarce, especially cedar. Manufactured stuff for building purposes is rather inactive. Should the anticipated boom appear, our people need not fear the increased U.S. tariff on lumber; for it is an axiom in economics that, while the duty in dull periods is paid by the producer, when businoss is brisk-under an active demand-it is borne by the foreign purchaser or consumer.

## BIUYOLE CASUALTTES.

Records of accidents from bicycle riding are as little likely to deter those inclined to that pleasureable recreation from indulging therein, as do the casualties by railway-train or by sea travellers for business or pleasure. An Indianapolis paper mentions a wager made by an opponent of the bicycle that the wheel causes more casualties in one week than football does the entire season. The stake-holder obtained the following surprising figures from indisputable authorities. 'Chroughout the United States during the past month 818 accidents to wheelmen were reported, 33 resulting fatally at the time and twenty-six finally causing death. Collisions with other riders caused 227 accidents, five fatalities and three probably so. Other statistics show : Collisions with vehicles, 159; with street cars, 38 ; dogs, 9 ; hogs, 1 ; chickens, 1 ; cows, 2 ; thrown from wheels, 223 ; fell over embankments, 8 ; breakage of machine, 35. Over-exertion injured four and killed four: Three were disabled by holes in the ground, and five were hurt by slipping of wheel. Miscellaneous causes injured fourteen, while ten were burt by unknown agoncies.

## THE WINDSOR (N.S) FIRE.

The conflagration which destroyed the town of Windsor, N. S. (population about 4,000 ), on Sunday last, is the most serious casualty of the kind in the Maritime Provinces since the great fire in St. John (N.B.) in 1877. Its origin is attributed to a couple of drunken men, one of whom threw a careloss matech into some inflammable rabish in a colored restaurant in the early morning. The wind blew a gale, and the fire apparatus was totally inadequate. Where the destruction was so completa it would ayail nothing to montion.
the uames of the businoss and other promises destroyed. The is: loss falls heavily blso on the insurance companies which are: severally interested to the extent of 8675,825 , divided as $\% \mathrm{~s}$ follow - $\mathbb{E}$ tna, $\$ 16,000$; Alliayce, $\$ 2,250$; Acadis, $\$ 51,000$;Atlas, $\$ 20,000 ;$ Brituish America, $\$ 25,000$; Caledonian, $\$ 7,000$; Comnercial Union, $\$ 45,000$; Conneeticut, $\$ 6,000$; Guardian, $\$ 21,000$; Hartford, $\$ 6,000$; Halifax̀, $\$ 40,000$; Linperial, $\$ 89,000$; Lancashire, $\$ 12,000$; Liverpool \& London \& Globe, 83,575 ; North British, $\$ 60,000$; Northern, $\$ 16,000$; Norwicli Union, $\$ 20,000$; Noith America, $\$ 6,000$; National of Ireland, $\$ 20,000$; Phenix of Brooklyn $\$ 6,000$; Phenix of Hartford, $\$ 25,000$; Phenix of London, $\$ 45,000$; Quebec, $\$ 24,000$; Queen, $\$ 27,000$; Royal, $\$ 24,000$, Suñ; $\$ 26,000$; Union, $\$ 8,000$; Western, $\$ 75,000$.
The cotton mills, being outside the burnt district, escaped injury. The lesson to the townspeople is one which, though late, they should take to heart; and there are other woodbuilt towns to which it also applies and whose inhabitants should not be found so ill-prepared to prevent or contend with a like catastrophe.

## HINTS FOR ADJUSTERS.

At the recent annual meeting of the Fire Underwriters' Association of the Northwest, held in Chicago during the closing days of last month and reforred to elsewhere, a very practical address' was made by Mr. W. H. Cobban of Minnea polis, agent: in Minnesota for the Manchester Fire. The subject was the hostility of the public towaids fire insurance companies.' In the section relating to adjusters Mr. Cobban said: Thiere càn be no doubt that fire insurance companies incur the disilike'and distrust of many by the custom of sending a large number of adjusters to settle small losses. The practice implies a alack of confidence in each other; it causes a fear to arise in the mind of the claimant of being overmatched by force of numbers; it frequently delays what ought to bè a prompt settlement ; it is a needless and indefensible expense and ought to be discouraged, if for no othor reason thàn that it leads the public to believe that a business must be ramaikably profitable that can afford so many men to do solitite work. One, or at the most two, adjusters to each clainhint ought to be enough to protect the interests of the companies.- Quicker and more satisfactory results would be obtained, and a better feeling left in the minds of claimant ani publite. But we have suffered much in the estimation of the people by sometimes, fortunately not often, employing adjuisters who seem to think of nothing but salvage; who treat claimants as though they are enemies of society and appear to believe that every one sustaining a loss by fire should be deemed guilty of incendiarism until proven innocent.

## adulteration of flour.

The New York Journal of Commerce gives warning against a proposed adulteration of flour with corn starch. It says that. the secretary of a glucose trust has issued a circular propoging to furaish corn starch in great quantlies, with the assurance that it can be mixed with flour up to ten per cent. Tho Modom Niller of St. Louls says on this subject:-We are forced to the declaration that the crisis in the American flour trade draws dangerously near. We do not anticipate any trouble with our foreign trade, as the mixer has not the nerve to send his products on a long voyage, but in the domestic trade; and especially in Southern markets, the time has about come when the millers of pure wheat flour must either defeat the mixing fraud or surrender to it . The suggestion is made that the U. S. Congrose authorize the Department of Agriculture to afford protection by requining a distinct brand in cases where flour is mixed with"

## BUSINESS VICISSI'IUDES.

The estate of Stanley \& Co., St. Catharines, Ont., is to be wound up. The statement showed total assets of $\$ 11,056.81$, made up of stock, $\$ 10,798.00$, cash $\$ 56.50$ and book debts and liabilities of $\$ 9,582.00$, showing a surplus of $51,474,72$. 'Coronto creditors:-Wyld, Grasett \& Jatling, $\$ 908.10$; D. McCall \& Co. $\$ 514.70$; A. Bradhaiv \& Son, $\$ 480.12$; Flett, Lowndes \& Co., *884.88; J. D. Ivey \& Co., \$200.05; Caldecott, Burton \& Spence, $\$ 265.98$; Standard Bank, $\$ 243.00$; S. F. McKinnond \& Co., $\$ 115.88$; Alexauder \& Anderson, $\$ 102.70$; Crompton Corset Co., $\$ 100.09$; Menzio, Turner \& Co., 966.71 ; Meintanan \& Co., \$54.78; Suckling \& Co, $\$ 446.44$; Kerr Spoul Co., $\$ 40.23$; Brock \& Co., $\$ 84.91 ;$ N. Ruoney, $\$ 37.00$; Gale Manufacturing Co., $\$ 20.01$; F.
 Cutton Batting C'o., \$23.00; Cockburn \& Drake, \$17.88; Croft, phillips \& Winch, \$12. 17, aud Clinter Crome Co., \$13.20. The preferred clatms are rent, $\$ 362.52$; taxes, $\$ 140.20$; wator rates, $\$ 12.00$; wages, $\$ 35.02$; tutal preferred claims, $\$$ 粘 69.24 .
A. Th. Lhan © Co., retail dry goods, Chatham, Ont., held a meetIng of their creditors on the $20 t h$ inst., when liabilities were shown to be $\$ 20,000$, inchiding a stock worth $\$ 15,000$.
W. A. Bemott of Spenceville, trader, has assigned to I' K. Allan, solicitor, Kemptille, and meeting of creditors will be held to-day, Friday. Liabilities, 64,000 ; assets, $\$ 1,500$.
A. 1. Rondot, dry goods, etc., Amherstburg, Ont., has assigned in trust to J. G. Hay, owing, it is said, some $\$ 20,000$. Rondot has carried on business at Amherstburg for a number of years, but got into dilliculties in Aug. 1895, when he offected a settioment at 50 cents on the dollar, cash, and resumed business.
A flual dividend of $431-6$ conts on the dollar has been declared by the assigneo, Mr. E. J. Henderson, on the estate of James Lookhart, Son \& Co., woollen manufacturers' agents, Toronto, who assigned about a year ago. The total liabilities of Lockhart, Sou \& Co. were $\$ 80,261.71$.
At a meeting of the creditors, of Mowat \& Co., dry goods, Napance, held in 'loronto this week, an offer of 35 c on the dollar was accopted. The liabilities anount to $\$ 30,000$. The principal creditors ire Stewart \& Maedonald of Glasgow, whose claim is $\$ 20,000$.
W. H. Thompson, general merchant, Schreiber, has assigned to J. M. Anstin, Chaplean. A meoting of creditors was held yestorday.-Jas. Vigies, tinsmith, Stevensville, has assigued to John Hanson. A meeting of creditors will be held on Saturday -J. A. Simpson, cigar jobber, Guolph, is offering to compromise with his crediturs-J. Luce, Hlllsdale, is olforing to compromise at 20 cents on the dollar.
Michaol liayes, general store, Bryson, Quo, has mado an athandonment to the court owing about $\$ 4,000$, or which $\$ 1,470$ is privileged. 'The unsecured chams are numorous and for small amonnts, eleven creditors figuriag for sums between $\$ 120$, and $\$ 300$, and an equal number from $\$ 8$ up to $\$ 88$, the former amount represonting an unpaid newspaper bill. A meeting of creditors is callen for the 27 th inst. It is to be hoped the unsecured creditors will bosatistiod, although it is to be inferred that there is not the most, promising prospect of this being the case, in view of the intimation that a merchant who allows his newspaper subseription to lapse duriug four yoars time, is hardly likely to have made any hetter provision to meet general creditors whon he is pushed to the wall.

Tlie lirst and hat dividend of 30 c in the dollar in the matter of tho late Bernard 'laylor, grocer, Point St. Charles, has been declared. The privileged claims for reat and wages amount to $\$ 00.42$ and the ordiatry claims on which the composition will be paid to $\$ 1,683,77$, made up in a number of liabilities ranging from $\$ 2$ to $\$ 440$. The winding up of the estate netted $\$ 092.71$, which less priviloged claims and dishursoments, leaves $\$ 190.18$ for the ordinary creditors.
Mr. Georgo Levesquo has filed a demand of assigament against tho iltm of Archambault \& Rivet, Montreal. Mr. Regls Rivet consented to assign but Mr. Cazeneuvo Archambantt is contestiug thodemand. 'The principal creditors are A. A. Allan, 'Toronto, $\$ 700$; Waldron, Deouin \& Co., Montroal, $\$ 670$; Maclean, Bros. \& Cu., \$250; A. Vogel \& Cu., \$275; Geo. Levesque, $\$ 231$.

Gaspard Bernier, general store, Beauport, Que., has assigned -C. Furtier, boor botuler, Megantic, Que., has compromised W. Aubort DeGuspo, drygoods, Montreal, has assigued-M

Hayes, wood, Steenboro, Que., has assigned-II. Garon, general store, Causapeal, is offering b0c in the dollar secured-Ernest Cloutier, general store, Notre Dame Du Lac, has made voluntary assigomeat-LL. Laphate \& Fils, mfrs. slippers, Quebec, have assigned-Ismel Masse, general store, Sandy Bay, Que., has assigned-C. Gagoon, grocer, Thurso, is offering 600 in the dollar, cash -Drouin \& Trudel, general store, Abenakis, have assigned-G. W. MoKenzio, general store, New Richmond, Que., is reported in innancial difficultios.

Weir \& Co., men's furnishings, Winnipeg, sre reported in financial trouble-White Eouse Trading Co., Rossland, B.C., is asking extension of time-Wm. Wilson \& Co., drygoods, Victoria, B.C., mortgacees in possession-R. C. Peart \& Co., toys, ete., Halifax, N.S., are offering to compromise at 35 per cent secured-Hugh McDonald, general store, Mabon, N.S., has assigned.

Margaret Jane Wait, carrying on business in London, Ont., under style of P. J. Watt \& Co,, liquors-shop Ifeense-has assigned to Alfred Robinson for benefit of creditors. Liabilities about $\$ 1,500$; assets nominally $\$ 2,500$, chiefly shelf goods. Creditors chiefly local,
T. J. Monaghan, grocer, Arnprior, is offering 20 cents in the dohlar-John B. Williams, drugs, Guelph, has assigned to John Smith-W. A. Benoett, implements, Spencerville, Ont., has as-signed-A. Eichborn, wholesale cigars, Toronto, is preparing a statement of affairs-John Leece, grocer, Hillsdale, is offering to compromise at 20 cents on the dollar-Abbott Bros. \& Co., grocers, Toronto, held meeting of ereditors 10th inst-Pierre Dorais, general store, Casselman is offering to compromiseJohn E. Black, general store, Springfield, has assigned-Wintermute \& Co., general store, Cayuga, have assigned-W. H. McCutcheon, grocer, London, has compromised at 5 f c on the dollar Baker \& Dobson, jewellers, Southampton have assigned.

## CONTRACTS, TO LET.

Tenders for the different departments in the construction of the Montreal Transportation Co.'s elevator at Klagston will immediately be asked for. Mr. Jamieson who will superintend the building has arrived on the spot, and is actively proceeding with preliminaries.
Consequent upon the Government forbidding the dumping of sawdust into the Ottawa river, and the compulsion of lumbermen to getrid of this refuse in some other way, it is likely the building of inclinerators will become general before long.
A. H. Calhoun, Wolfville, N.S., has made arrangements to erect a cornmeal mill. The work of construction will be commenced immediately.
Over $\$ 2,000$ has been subscribed towards erecting the proposed skating rink in Preston, Ont., a charter has been applied for, and tenders for the erection of a building are asked for.
The design for the new station which the Grand Irunk will bulld at Guelph has been submitted for approval. The structure is to cost between $\$ 18,000$ and $\$ 20,000$.
-St. John, N.B. will llkely get about erecting a modern abbatoir in the near future. A Boston capitalist is interested.

Bentley \& Co. will shortly get up a portable sawmill in the vicinity of Vaughans Crēek; St. Martins, N:B.
There is evidently an intention on the part of the C.P.R. to boom McAdam. A street ls being lald out and ten new dwelle ing houses of good quallty have been contracted for. "Arranges ments are being made to supply the station building and Junc: tion house with hot water, and an electric plant is being constructed in the machine shop. When completed, the yard; station buildings and hotel will be lighted by incandescent lamps. -Woodatock, N.B:, Sentinel.

Mr. Joseph Senecal has been awarded the contract for the erection or the tanning factory of the Moseley Shoe Leather Co. at st. Henri, Que., which municipality recently granted a bonus of $\$ 20,000$. The building is to be two-storey pressed brick $170 \times 40$ feet with two wings $25 \times 40$ feet.

## Sinancial.

## Thursday E'vg, Oct. 21st, 1807.

gince last writing, the chief item on the "bull" side of the market has been the strength developed in Richelieu \& Ontario, which from the lowest point a week ago, has been manipulated to show a gain of almost five points, the stock now being listed at $1091 / 4$. Whilst this increase is held by some, as only a legitimate position, in view of the amalgamation under one management of several companies having a through system from Niagara to the sea, it is admitted that as rapid a decline may be in store for the security, when the speculating element cease engineering the stock. Canadian Pacific is elightly firmer on the week, but reacted fractionally at the close to-day on news of a break in London. Montreal Street has been active and trm, with exdividend shares selling freely. Royal Electric, Dominion Cotton and Dominion Coal furnish little variety from a week ago. Colored Cotton Bonds have sold to $\$ 20,400$ at $9 \overline{0}$. Cable is unchanged with scarce offerings. In Banke, small distributive sales have transpired, Ontario coming in for most attention with 46 sold at 100 ; Ville Marie sold on-this mornings Board at $8 \mathbf{0}$. The money market is steady, call loans nominally fat 4 per cent, mercantile discounts $01 / 2$ to 7 per cent.

Brazilian Exchange for the week ending October 20th, is as follows :-

Below is the usual comparatide recorde of sales for the week supplied by Mesers, Chas. Meredith \& Co.

## MONTREAL WHOLESALE MARKETS.

## Thurgday Ev'g., Oct. 21st, 1897.

To the unusual open weather most people are indebted physically, but these balmy days. have upfortunately been in strumental in ohecking bualness in seasonable lines, and the distribution of fall merchandise would undoubtedly be more extensive otherwise. This more particulatly refers to the retail trade, which at the moment is stocked up and walting for de. mand to set in. The wholesale trade realizing that abnormal climatic conditions affect them injuriously in the long run, are disposed to adjust themselves accordingly, and as a result there is more appearance of trade resting, upon its oars than usually happens so late in the season. There is something more cheerful nevertheless to say as regards collections; these are good, and the fact goes far to remedy the circumstances aforesaid. In grocerias, sugarsevince no disposition to fluctuate up. or down, refiners, jobbers and importers of forelgn granulated apparenty working at closest margits, and with thle provision to cater to the consumptive demand on these lines for months to come. Teas from Arat
hands are slow of sale. Coffees quiet. Dried fruits steady and in better riequest fr Thanksgiving trade. The produce market for both butter: and cheese :continues to note fractional declines. In the hardware trade a good demand exlsta for winter sporting goods and galvanized iron, An advance is ulso noted in bar and band Iron. Leather and hides are unchanged, Druge are in seasonable request, and higher for opium, quinine, glycerine; std: Butter and Cifeese-Buyers and sellers are stlll apart in views as to export pricep, for butter, representing from $1 / 4$ to 3/2 per lb., difference and hence the move. unent seawards is next to nothing at aill. On home account grocers are paying $181 / 2$ to 18\% 4 c. for finest creamery. In New York jobbers, for extra crommery, are paying 230 very willingly, and anythlog good enough for best trade is commanding that prlce. Since our last, cheese has declined fractionally, but buyers continue to hold off. Liverpool cable continues unchanged at 45 s . At the country boards this week no business worth mentioning passed. Napanee boarded 325 white, and 175 colored, with $81 / 4$ bld, and no sales ; Woodstock boarded 5947 boxes ( 19 factories) and sold 350 ., white at 834 c . Pleton hoarded 500 coloured. No sales. Stirling, offers of $81 / 2 \mathrm{c}$. were refused. Tweed hoarded 2400 boxes August, September and October, but without success; bids of 8 c ., 8 Ja c and 9 c . respectively, being refused. New York advices represent the mark et wearing a quiet appearance, with large colored full croam held steady at 9 c .
Cement-The arrivals this week were: 14,190 bris. Belgian, 000 English, and 76,000 fire bricks. These heavy reccipts of Belgian, which came in one shipload, arrived opportunely torelieve the market-supplies having dwindled down to exceptionally small compass,-and this week in cement circles has been taken up in filling orders booked ahead. Values are firm at the higher range establlshed ten days ago.
Druge-The quinine and clachonidia advances have been accepted by the trade as inevitable, in view of the fact that cinohona barks have doubled in price since the beginning of the year. Bark is not now sold by actual weight, but by the assayed percentage of alkaloids it containg, at so much per unit. Opium is steadily rising in New York, and is also dearer in primary marketa; no change on the spot as . yet. Golden seal root is extremely scarce, and has more than doubled in price. Senega and serpentaria are also dearer. N-prweging cod liver oll is dolng batters and is expected to be higher. Cream of tartar is steady, with variations as to percentage. Irish moss higher; the gather-

#### Abstract

ing was small, Buchu is tirm, and 'linnerilly sonna is in short supply. Morphias and morcurials are unchanged. Castor ril lirm, and in small supply. Cardemoms malntain the adrance. - Borax and boracie acid remain remarkably low. Glycorine steady; demand increasing Carbolic acid easier for forward dellvery. Plenacetin makers are about tired of selling under cost, and highor prices aro expected. Sulphonal is the subject of keen competition

between rival makers, who wish to demonstrate without regard to proflt that theirs is the best artiolo; dotibtless both will succeed if they keep it up. Latest cables are :--London-Norway oil rather better: lyecac firm. Bark shle 20 per cent adrance Quinine lod Chinchondia, 8d. Kole, Japan, menthol, $98 d$.
Drix Goods-In dress goods for fall, fancy fabrics are in particular favor. Serges in mayy and black and velour cashmeres are also growing in popularity, fols lowing the style at present prevailing in England. Velveteens are more fashionablo than even last [all, and are called for in a variety of prices, in black and colors Nayy, myrtle, browns, cardinals, olive green, etc., sell well. In black dress goods mohair hirures on wool goods are the most worn in the higher priced goods. Crepons are staple, and are still finshouable. Some beautiful effects are shown in silk and wool mixtures, armures, matelasse, satin-faced soleils, etc. Muscovite cashmeres are a growing feature in black and colours. In black silks the principal makes in demand this season are surahs, peau do soic, gros grain, and morves, silk blouses are more fashionabie than hitherto, and fancy patterns and colourings, as well as striped silks, are greaty used in their manufneture. Pongees and china silks are shown in a great varioty of colours, and sell freely in blacks, navy, sky, buttes, and all the art shades. Ribbous are selliug freely this season in faille, double-faced satin, and moire antiqne. The principal shades called for are moss qreen, myrtle, .browns, nays, cardinals, and black-widths, 16 and 22 for colon's: and black, from 16 to 40.

Tlour And Mrala - There is a fairly activo local demand for Spring Wheat, at steady prices. Foreign buying of Manitobit rimdes is also of an improved character. with sales reported on London account, aggregating 1,500 sneks. Winter wheat flour is somewhat unsettled. Samples of now crop in some cases bearing evidence of sprouting. The demand for rolled oats is better, stocks aro light and values firmly lield at $\$ 3.40$ to $\$ 3.50$ per barrel, and $\$ 1.65$ to $\$ 1.75$ per bag.

Frum-Manitoba benn is scarce, some dealers boing completely sold up. Folders of Ontario bran aro asking \$1125. Baled hay, under moderate ofierings, is well maintained in quotations at $\$ 11.00$ to $\$ 11.50$ for No. 1 , and $\$ 9.00$ to $\$ 10.00$ per ton in car lots on track.

Grochines-The position of the sugar market is unchanged on spot. TRefiners quote small lots granulated at 476 c , and $1-16 \mathrm{c}$ less for 250 brls . and above. Yellows are quoted at $35 \cdot 16$ to 33 fc as to grade, at tho lactory. Cable advices from London report a dull market for raws and a decline of 1 id in beet at $8 s$ Gd October shipment. Licht's estimate of the yield of the present beet crop of Europe is slightly suballer than gonerally expected, being $4,925,000$ tons, aftinst his estimato of $4,960,0(10$ tons last year and an actual crop of $4,915,759$ tons Austrian retined is quoted by cable at 11 s 9d, and German at 1 is $0 / 2 \mathrm{~d}$. The consump. tion of foreign gramulated is on the in-
crease and supplies in many cases have been contracted for to arrive during the winter, at a price laid down in Montreal showing favorable comparison with c. i. f. quotation to diy. The tea market is in a peculiar state at the moment. Jobbers continue' to report a fairly active demand through travellers ; legitimate brokers however, state that their end of the business approaches demoralization, arising from the large accumulation of teas sent here from Loudon on consignment, and alterwards alaughtered when the necessity to make a sale of some sort is cabled from the London owners. In one instance a single consignee has received these Nomad parcels until the argregate now reaches 400 chests of Assam, and whilst this state of things lastr, the tea market for desirgble kinds unust be more or leas affected. Recent cables from Colombo report the market strong at the recont advance. Buyers and sellers of Japan gradesure still apart, but the latter are, nevertheless, sanguine and firm in their viows. In dried fruits, cables from Greece quote $10 s 0 \mathrm{~d}$ for ordinary provincials, which is an advance of $4 s$, and if the crop accounts are correct, the statistical position is much stronger than in 1885-6, when brls, provincial sold at 24s. Molases firm at 26c for Barbadoes and Porto Rico. The crop movement of Brazil coffee continues large. Cables from Santos state that owing to a libor strike shipments inside of 30 days cannot be guaranteed, Referring to sardines, these are more firmly held, and in the fact that American ardines have an .upward tendency, packers having withdrawn offerings owing to being almost bare of stocks, thero is probability that this will soon be reflected in onhanced quotations on French and Portuguese.

Hides and Talion --The Lide market is unchanged and receipts are below requirements. Tanners are paying oc for No. 1 green hides. The quotation be tween dealers still stands at Be. Tallow is selliug in small quantities ox store at 4 c for barrel tallow, and $41 / \mathrm{s}$ for cake. In car lots ex store these prices would be shaded toe. The stocks on hand are much reduced owing to large shipments West this year, which hitherto was considered as improbable as taking "coals to Newcastle."

Thearmer-Both black and sole leather is held very fimmy, such stock as is going into consumption showing no depreciation in value over contracts made lately. Boot and shoe mannfacturers are busy stock. taking, and meantime are practically out of the market. From Boston it is learned there is no great rush among boot and shoe jobbres to place orders either for now or spring. The market. at the Hub is steadily growing firmer and jobbers readily pay 5 fenta adrance on staples, and in the case of grain shoes, something mor?. On s.tin, kangaroo, etc., the adyance asked and obtained is 50 to $7 / 2 \mathrm{c}$, with 10 c per. haps not exceptional.

Metars and Mamdwarb-Hoavy sales aro reported of galvanized iron and zinc. There las been another advance in bar iron at $\$ 1.45$ to $\$ 1.00$. Band iron is also higher at $\$ 1.70$ to $\$ 1.75$. The advance in sisal already reported is well imaintained. In hardware lines an active demand is
 purity, flavor and efficaciousness in cases of irritated throats, etc.

passing for skates and other winter sundries. The British metal market is reported as follows :-Tin plate; prices are still rather weak. Ordinary 14x20 Bessemer cokes quoted $9 \mathrm{~s} 41 / 2 \mathrm{~d}$ to 9 s 0 d at Swansea. Pig tin; prices are firmer at £62 15s for prompt delivery, and £63 os for 3 month's futures. Copper; prices are barely steady. Merchant bars sold at $£ 48$ 10s for spot delivery, and $£ 48$ 17e.6d for three months' futures. Best solected, 551 15s. Pig lead; prices have weakened to £13 15s for soft Spanish. Spelter: declined to $£ 1715 \mathrm{~s}$ for good merchant brands:
Paints and Oris - There is no change to note in white leads, which still remain as before, viz $!\$ 5.371 / 2$, and the feeling in the trade is, that notwithstanding the firm markets abroad, there is not likely to be another advance for some little time. Turpontine is quotably unaltered, viz:50c. At Savannah the market is however dull and a trifle weaker on current call. Liverpool quotes 248. 6d. There has been a reaction in the recent seed advance, but this has not tended so far to affect local ideas which are firm at 40c for boiled. Liverpool quotes Linseed oll 15s. 6 d . Arrivals of glass are froe this week, and holders whilst asking no more than formerly, express tbemselves that glass may go up 10c. a box any day now. An advance of 50 has been made by U.S. window glass manufacturers owing to an extensive pooling of interests lately consummated, and notice given that on Nov. Ist next, this will be followed by others. The fall demand for liquid paints is very aatisfactory, the higher price of raw materials not having touched the price list ovidently being an inducement to buy largely. Putty has declined 10c, at $\$ 1.50$ in bulk, under severe competition. Steau refined seal oil in a jobbing wav is selling easier at $424 / 2 \mathrm{c}$., and straw seal at 30 c . Guspe Cod oill-28o to 29 c ; Newfoundland 33 c to 85 c .

Ponifliy and Game.-Receipts of the former are only small, but enough to meet wants, which seemingly are postponed this year on account of the open season. Cold weather will materially alter this. and meantime we quote turkeys 9c; chickens 6c ; ducks 9 c , and geese 5c per lb. partridges are coming to hand more freoly and are selling at 55 to 00 c .
Prondel-New laid eggsin single cases are selling at 16c per dozen On export account pickled stock has sold freely during the week at $131 / 2 \mathrm{c}$. Business in beans is of a jobbing character, at 9 joto 11.00 for cholce hand picked. There is no change in the honey market, sales are fow and values steady at 10 c to 11 c for clover comb, and $71 / 2$ c to $81 / 2$ c bright extrarted. Maple sugar is in better demand, at fi0c to 65ac. in ting, and $51 / \mathrm{c}$ to $51 / 2 \mathrm{c}$ in wood Potatoes are quiet at 45 c to 50 c per bag, in car lots.

Provisions-The home demand for Pork and smoked meats is fairly good. and prices are steady. Canadian pork is selling at $\$ 10.00$ to $\$ 16.00$. The Chicago market for pork is firm and improved he. on Wednesday, closing at $\$ 7.75$ October. Lard easier and declined $21 / 2$ c. closing at $\$ 480$ October. The Liverpool market is reported strong, and advanced 6d. to 1s., bonelese long-cut bacon (heavy) 33s. 6d.; long cut light, 83s., short cut, light, 30s. 6d.

## AN EXPLODED THEORY AND. A PERPLEXING PREJUDICE.

## A. imint to bueiness men

When any firm has attained a high meas. ure of success by the adoption of pro gressive methods and a thoroughly up-todate system of doing business, and has outstripped the majority of its laggard competitors in the race for pre-eminence, it frequently becomes the butt of unfair
criticism from its disappointed and belated rivals. For example, it has been charged against some successful houses that, because they spend large sums an nually in advertising their wares, the con sumer pays the intrinsic value of the ar ticle, plus a large allowance for advertising.

With a view to ascertain just how much truth there might be in such an assertion, our representative interviewed, among others, Mr. Charles Slater, of George T Slater \& Sons, shoe manufacturers-a firm that has largely increased its business within the last three years by the adoption of ap-to-date advertising methods.
"No !" said Mr. Slater, "there is not a scintilla of truth in the assertion. Few businesses, and certainly no manuiacturing business, could afford to have their advertising expenses amount to an unreasouable proportion of the selling price. The Dear Public cannot be fooled in any such manner now-d-days. They are looking for actual value all the time; they are pretty good judges of values, too, and if they cannot get it from one, they will from another. But speaking of our own busi ness, the cost of selling our goods nowadvertising included-is considerably less than it was three years ago, in proportion to the volume of business done. It's all owing to the system then adopted. You are thoroughly conversant with our sys tem, and know that it relieves us from the necessity of carrying a large stock of goods-averaging about $\$ 100,000$. It enables us to cover the whole Dominion with two travellers, whereas formerly we had as many as eight, which means a saving of 75 per cent on that account alone, and we now do business for cash at 30 daye, and only the best dealers handle our goods. From these and concurrent sources the amount saved in interest, insurance, depreciation of stock, reduction of bad debts and lessening of expenses, pays all our advertising account and leaves a considerable margin. There's the whole thing in a nut-shell, and there is no magic In it after all. But it explodes a theory."
"What's that? American shoes! Well you've just come' from Now York, so must excuse you. The American, or more properly speaking, the United States manufacturer; is an adept at making a good looking shoe at a low price, but they make no better shoes in quality, style, fit and finish than we do. The Canadian manu facturers have been making good shoes for yeare, and the United States manufacturers have been reaping an advantage from that fact. Just read this paragraph from the European correspondent of $\cdot$ a Boston shoe-trade paper : "-
"It was on my return from a walk in this direction that I happened to stop in what is known here (Paris) as the 'American Shoe Store;' located at 14 Avenue de l'Opera. I found the proprietor was an Englishman, and catered pore especially to American and English trado, but strange to say the only American shoes he had were those of Curtis \& Wheeler. Rochester, N. Y., for ladies' wear only. The 'American'shoes for men's wear were displayed in the window with the stars and stripes proudly fastened on them, but they were only American so far as Canada is a part of America, for they were the product of George T. Slater \& Co of Montreal; ' Do you call these American shoes?' I askod.'Certainly,' was his reply. 'Didn't they come from America.'--W hat more could $I^{\prime}$ say to this!"
"All the shoes shipped from this side are known in Europe as "American" shoes, and we have the mortification of strengthoning the market for our rivals' geods. For this reason also the Canadian consumer acquires a perplexing prejudice against his native manufactures, because he forms his opinion of the value of an imported shoe from the reputation which it gets abroad; and we have been unwittingly instrumental in making that reputation."

Guarantee and Accident Com'y, Limied of London. England.

[^0]:    CaLGARY $\qquad$ .Lougheed \& McCartei CALGARY. ......... McCarthy \& Bangs CALGARY. .....................James Mair

[^1]:    -T'ine "Colonfal Dairy Produce Roport" London, referring to Canadian butter says: Tuo quality of Canadian, while shewing an advance over last season, is still far from perfect, and must shew further improvement before it can be placed on a par with "Choicest" Australian and New Zealand. The make, colour and \&exture of Ganadian butter are romarkably good. It is in flavour where the main deficiency exist,. There is a considerable quantity possessing a slight fishy taste, and a good deal that is off fla your. In some cases there is a taint-due probably to over ripe cream or to the horbage. The packing is excellent, especially ol these croamerios under Government control. The dovetalling of some of the boxes is insufficiently strong to keep them firm, and ir this point were overcome the package would be perfect. Prices for Choicest Canadian at the beginning of September were as high as 108s, but these have gradually declined to 96s to 08 s. The quantity arriving during September was 43,146 cwt . or ouly $1,850 \mathrm{cwt}$. less than the highest monthly report from Australia last season.
    -Theferbing to the £50,000 which tho Hon. Jos. Chamberlain lost by his recont sisal growing vonture in the Bahamas, the I'extile Mercury says. "It would appear that Mr. Chamberlain's knowledge is not alsolute in every sphere of industry. Ability. to make money out of ateel scrows does not necessarily imply that the man can successfully grow corn or even sisal hemp. We should say that he has also been quite as far from sound views In his social legislation for instance in his Workmen's Compensation Act-as in his sisal growing. Unfortunately, however, our leading industries have to benr the bruat of his mistakes in this fleld. And they will cost far more than 850,000 . We ofler him. our sympathies in his misadventure, and the least he can properly do in return is to retrace lis step in legislative matters, and undo as far as he possibly can his blunders in this field." This is as much as saying that the Colonial Secretary, besides his mladyenture in sisal, has had rope enough otherwise

    - Parssure upon our columns this week obliges us to omit gome advertisiug.
