To Sue For Restitution Of Campaign Fund Gifts

Application for Action is Made to State Authorities—Hyde's Counsel Declares Committee Has No Legal Powers to Compel Testimony, but He Will Appear Voluntarily.

New York, Oct. 3.—Permission to begin suit against John A. McCall, president, and George W. Perkins, vice-president, of the New York Life Insurance Company, for the restitution of \$150,000 contributed to Republican campaign funds, was asked of Attorney General Clegg today by Wm. Stebbins Hyde, acting as attorney for the state.

Mr. Hyde voluntarily appeared at the hearing before the joint committee appointed by the defunct legislature of 1902 to investigate the affairs of the insurance companies. He has advised Mr. Hyde that your committee is without power or jurisdiction to make the investigation in which you are engaged.

Can't Deal in Futures. My opinion is based on the proposition that the assembly at least has no power to direct an investigation; (1) to be held after its adjournment, and (2) to be held before the assembly meets.

Will Testify Voluntarily. The bulk of the subject matter of the inquiry, so far as concerns the Equitable Society, relates to practices and conditions that antedate by many years his connection with the society, which he has no knowledge, and which seem to have been continued in violation of the laws of the state.

HYDE FILES HIS DEMURRER HOLDS NO CAUSE FOR ACTION Albany, N.Y., Oct. 3.—Attorney-General Mayer today received a copy of a demurrer filed by James Stebbins Hyde, vice-president of the Equitable Life Assurance Society, to the blanket suit brought by the state against the directors of the company to compel restitution of money alleged to have been wrongfully converted by the board.

Will He Disclose His Brief? Professor Mavor fills the office of political science in Toronto University.

At whose behest does Prof. Mavor disparage the glorious possibilities of our great west and as whose client does he endeavor to prejudice Canada against the principle of municipal ownership?

Such conduct on the part of the judiciary or any member of it cannot fail to weaken that public confidence and respect which in the final analysis are the real safeguards of law and order in the country.

Public opinion is already pretty well crystallized as to the nature of the changes desirable in the way of university reorganization.

Some criticism regarding the personnel of the commission has been indulged in, but some of the appointments are unquestionably good and none of them suggest a serious error of judgment.

It is to be hoped that the time chosen by Gaylor and Greene for leaving Canada is not intended as a reflection on our glorious autumn.

The haughty Bonallies seem to aim at making things so hot for Lord Minto that he won't feel like getting his picture taken in furs.

Montreal and Bramford are back on the main line of the Grand Trunk, but the latter has several other claims to distinction.

We are always sure of a lively time on this continent. President Castro, of Venezuela can make trouble as fast as President Roosevelt can make peace.

Col. Pellatt complains that newspaper figure \$30-cent basis. They have to when they endeavor to take the measure of some of the most blatant of Toronto's Napoleons of finance.

John D. Rockefeller has just succeeded in giving \$10,000,000 to educational institutions. That's the peculiar thing about tainted money. It never excites suspicion when it travels in bunches.

Can Your Family Take This Risk? Some one must carry the risk on your life. You may die at any moment.

Why not take a policy in the Manufacturers' Life, one of the strongest life insurance companies in Canada?

Montreal, Oct. 3.—Gaylor and Greene are to leave preparing to leave on the journey to Savannah, Georgia, to-morrow night.

PERSONNEL OF COMMISSION PREMIER EXPLAINS CHOICE

Regrets That Question of Religion Has Been Raised—J. W. Flaville is Chairman.

The new university commission was formally appointed yesterday afternoon by order of the cabinet.

The personnel of the commission was explained by J. W. Flaville, secretary, Sir Wilfrid Laurier, Rev. Canon Coady, Rev. D. B. MacDonald, Dyrn E. Walker.

Mr. Whitney said: "I wish to emphasize the fact that the commission is not expected, and has no power, to deal with the past or in other words, investigate the university."

"The days go on and it becomes more and more clear that the choice of the individuals to serve on the commission was an admirable one."

"No reason need be given for the choice of Mr. Goldwin Smith as chairman."

"It was thought well to have one representative, namely, the chancellor, to represent the university."

"It was also thought proper that the younger graduates of the university should be represented."

"The cost of transportation and interest in university matters and have given more or less time to the consideration of them."

"The commission is to let the past severely alone, and having regard to the methods of management in force in other similar institutions, as well as the conditions surrounding our own university, to formulate a new system of management and government for it."

"I regret exceedingly to have seen suggested that a certain church should have more than one representative on the commission."

"I regret more than I can express that a question like this should be brought up in a way calculated to seriously damage the usefulness of such a body."

"A green water snake 14 inches long came out of a hydrant to-day, which was being tested."

AUSTRALIA WANTS OPEN PORTS

WANTS FOR CANADA'S TRADE

J. S. Larke Tells Toronto Business Men How to Go About the Cultivation of a Virgin Field.

A Canada-Australia line from Canada to Sydney, Australia, as a solution of the transportation problem, a preferential tariff between the two colonies; an export warehouse to carry surplus stocks of Canadian manufactures in Australia; a sympathetic arrangement with the railways for mutual benefit of the roads and the manufacturer; and a combination of brains and money to bring about these things.

Mr. Larke handled his subject in detail. Canada's export trade was becoming broader in variety, and more extensive than the people of Canada seemed to think.

Mr. Larke said that since Mr. Larke had been in Australia, the volume of the western portion of Canada only did one-tenth of the business with Australia.

TRENTON HAS HER INNINGS

SHOWS EMMERSON CANAL

Minister Was Received With Great

Jubilation and Impressed With

Good Points of Route.

Trenton, Oct. 3.—During the past week

Hon. H. R. Emmerson, minister of rail-

ways and canals, has been on a tour

of inspection of the Trent Canal system

and on his return trip from the west

this morning visited Trenton, the east-

ern outlet of the system.

The minister arrived on the govern-

ment steamer Alert, and was accom-

panied by M. J. Butler, deputy minister

of railways and canals, and by Col-

ling-Wheeler, consulting engineer for

the Canadian transcontinental railway

construction commission. He was met

at the wharf by Mayor Jacques and the

members of the corporation, the board

of directors and hundreds of citizens.

The party then drove up the Trent

river towards Frankford, a consider-

able distance, accompanied by Mayor

Jacques, R. Weddell, J. H. Campbell, J.

H. Dickey, S. J. Young, T. Bigelow, A.

Stewart and others.

The minister seemed much impressed

and put many questions to the gentle-

man accompanying him regarding the

immense power possibilities of the

river, and he seemed desirous of

knowing all about the project as well

as information about the industries all

along the route to Rice Lake.

Mr. Emmerson was obliged to decline

an invitation to remain, on account of

his anxiety to reach Ottawa as soon as

possible.

EXPLODES UNDER THEORY

WRIGHT SLIPPED TO DEATH

Inspector Murray's Inquiry Into In-

gersoll Affair Clears Away

the Mystery.

Ingersoll, Oct. 3.—(Special.)—Inspec-

tor Murray of the criminal investiga-

tion department after investigating

the death of Isaiah Wright, whose

body was found in the river, is sat-

isfied that death was purely accident-

al.

After interviewing the six men ar-

rested and other parties, he learns

that on the night of Sept. 22 the five

men who are charged with murder

were congregated at the bridge which

crosses the Thames. They had all been

drinking and were joined by the

Wright, who was also intoxicated.

Wright, however, was a harmless man,

inclined to jolly rather than to bring

conduct, and there is no motive for

anyone wishing to do him harm.

Campbell, the young Scotchman,

held as a vagrant (also he has em-

ployment), tells a straight story of his

connection with the affair. He took

a friend home from the bridge, put

him to bed and then returned with a

flute, and the crowd had a good time

just when Wright disappeared. He

does not know, but Inspector Murray

found several places around the bridge

where it would be quite easy to slip

into the water.

Dr. McKay's post-mortem does not

show any signs of violence, and when

the men are brought before the mag-

istrate on Friday the charges will prob-

ably be withdrawn.

There is some talk among the friends

of the prisoners of taking action for

false arrest.

THE ADVANCE OF CANADIAN LANDS

Canadians Are Rapidly Possessing the Land.

As an illustration, the sales to the sons of Canada for **ONE MONTH** amounted to **\$36,900.00**. This is not the largest month's sales, but is taken as a fair average of the sales of these Rich Fruit Bearing Lands which are destined to make many Canadians independent in a few years.

An orange plantation is sure to produce a permanent income for the land-holder of Canada-Cuba Lands, all of which lie in a rich fertile belt, and are so situated that they possess the best shipping facilities and a ready market for all the products in Havana and New York.

The lands have only been on the market for a few months, and upwards of **20,000 ACRES** already have been sold.

The Company is composed of well-known business men of Canada, which is a guarantee that every representation will be found to be correct.

Our best references are those who have visited our vast Cuban Estates and have returned and now are among the largest purchasers.

Those desiring to better their position in life, or anticipating a change in occupation, or looking for an investment which is sure to treble in a short period, will do well to call and get full information regarding this profitable proposition.

We will be pleased to give the names and addresses of hundreds of the best citizens of the Dominion who have purchased and are locating upon these lands, intending to cultivate the same, and make happy homes for themselves on these fertile lands.

Supreme Court Hands Down Judgment in Six Election Court Appeals.

Ottawa, Oct. 3.—The supreme court rendered judgment to-day in six election cases that had been heard before it last term and in the appeal arising out of the collision in the St. Lawrence River at Sorel last season between the Richelieu & Ontario Navigation Co.'s liner Canada and the S.S. Cape Breton.

In the Wentworth federal election case, where the seat was claimed by both candidates, Smith and Sealey, the supreme court dismissed Mr. Sealey's appeal with costs, and directed that the order declaring the election void was to stand, Seligewick and Idington dissenting.

In the King case, which involved the validity of Sir Frederick Borden's election, the petition against Sir Frederick is dismissed, which confirms him in his seat.

In the Queen's-Shelburne case, the preliminary objections raised on behalf of Hon. W. S. Fielding, the sitting member, were dismissed, and the supreme court sent the case back to the lower court for the trial of the petition against the finance minister.

In the Cumberland, North Cape Breton and Pictou election cases the appeal is allowed with costs as to the tenth preliminary objection and the cases remitted to the lower courts to have evidence taken under this objection.

Judgment in the Cape Breton-Canada case goes against the Richelieu & Ontario Co., the court holding that the collision was caused by the negligence of the latter. The case is remitted to the exchequer court, Quebec admiralty district, for the assessment of the damages to be paid by the Richelieu & Ontario Navigation Co. to the owners of the Cape Breton.

DROWNED IN MANITOUL RAPIDS.

Emo, Oct. 3.—Percy McGauley, brother of Capt. Dan McGauley, was drowned in the Manitou Rapids, slipping from a rock while dipping a ball of water. Tho an excellent swimmer, he was swept into the eddy. His brother, Hubert, was restrained from jumping into the rapids after him.

BANK DEAL OFF.

St. John, N.B., Oct. 3.—After the meeting of the directors of the Bank of New Brunswick this morning one of the directors stated, with reference to the rumored purchase of the bank by the Bank of Montreal, that there was no proposition before them to sell or to improve. Let him have some stock "as good as anybody." When the annual fair comes, he should bring to 5 some of his best birds for exhibition. If they are truly good there will be plenty to realize it, and for such as he wishes to part with he will find a ready sale. If he wants to increase his flock and extend his market, let him advertise in some good poultry journal. If he manages rightly, the revenue from his fowls will soon rival that from any other department of the farm.

Customs Increase.

Ottawa, Oct. 3.—The customs revenue for the three months ending Sept. 29 amounted to \$11,329,670, an increase of \$202,000 as compared with the same period of 1904. For the month of September only the revenue was \$2,316,018, a gain of \$13,569 over the same four weeks of last year.

Tariff Commission.

Ottawa, Oct. 3.—The tariff commission will return to Ottawa about Oct. 15. They will remain here about a week, and then probably go on to Halifax and from there to St. John's, where they will reach the upper provinces.

Yellow Fever Subside.

New Orleans, Oct. 3.—The yellow fever situation improves daily, both as to the city and country. Only one death occurred in the whole state yesterday, outside of New Orleans, and there is a shrinkage in the number of cases everywhere, with perhaps the exception of Patterson.

WOULD ABOLISH ENTRANCE.

Inspector Hughes Speaks in Favor of the Change.

"The entrance examination is an unmitigated evil," said Inspector James L. Hughes to The World yesterday. The subject is before a special committee of the board of education for a report. It is likely that this examination, which has been a horror to Inspector Hughes ever since the high and public school boards were united, will be abolished. He thinks that it is not a fair test of the knowledge of any pupil.

"I would rather leave the promotions from the public to the high schools in the hands of the teachers," said the inspector. "Of course, some of them would necessarily have a lower standard than others, but that would be found out and corrected before a year was out. It is not a fair test for a pupil to estimate his standing on an examination at the end of the year. I would reply a great deal more on the judgment of the teachers."

IT IS DENIED.

North American Life Issues Statement as to Rumors.

The following self-explanatory statement was issued yesterday:

"The recent statement in some of the morning and evening papers that a change is contemplated in the presidency of the North American Life Assurance Company, is entirely without foundation. John L. Blakie is at present occupying that position, to which he was elected upon the death of the late Hon. Alexander Mackenzie, its first president, and nothing has been further from the thought of everyone connected with the company than his retirement. The rumor respecting the retirement of Mr. William Meredith, one of the chief justices of the high court of justice of Ontario, to take the position of president of that company, is therefore entirely inaccurate."

INLAND REVENUE RECEIPTS.

Inland revenue receipts for September were: Spirits \$20,748.22, malt \$17,507.94, tobacco \$14,458.82, acetate acid \$124.80, raw wool \$309.90, cigars \$11,421.12, bonded factories \$2454.10, other receipts \$19,274.19, methylated spirits \$127.17, cesses \$50, bottling labels \$700, fines and seizures \$50, other receipts \$19,274.19, total \$43,322.22. For September, 1904, the total was \$46,461.84, which makes a decrease of \$3,139.62.

WELSH COAL FOR CANADA.

(Canadian Associated Press Cable.) London, Oct. 3.—The Canadian Associated Press understands that the Canadian government is making an effort to secure further co-operation between Canadian exporters of pitwood and importers of Welsh coal. There is every prospect of arrangements being completed for the despatch of anthracite to Quebec. The extension of this trade will be help to secure low freights for pitwood from Canada.

STOCK TRANSFER TAX WILL BE ENLARGED.

Montreal, Oct. 3.—An important change in the stock transfer tax has been decided on by the provincial government, which will make the tax applicable not only to all transactions on the local stock exchange, but to all transfers made in New York houses with branches here, and in the so-called backshops.

GOV PEAS IN THE ORCHARD.

Necessary Constituents Added to the Soil by Their Culture.

Dr. J. C. Whitten of the Missouri College of Agriculture says:

Where fruit trees are making poor wood and leaf growth, due to poor soil, it is usually safe to assume that nitrogen is one of the plant food elements that are lacking. This may be secured by growing cow peas in the orchard. The roots of this plant also take in many of the other essential plant foods, in the two other essential plant foods, in the soil. The more porous and spongy the soil, the more phosphorus and potash, so that the nitrogen supplied by the cow peas will be sufficient to bring the orchard up to good, thrifty condition.

Aside from enriching the soil in nitrogen, the cow peas improve its general physical condition, rendering it more porous. A hard, lumpy, crusty orchard soil does not respond well to cultivation; it is difficult to get the land in good shape. A single crop of cow peas will mellow it to a great extent. The more porous and spongy the soil, the better it will withstand drought.

The cow peas add humus to the soil, which absorbs and holds the water-holding capacity. The fact that the soil becomes more porous also makes it possible to check evaporation of the soil by the winter and early spring months, while they sink into a mellow soil, and are stored in the soil, for the dry months of summer. During the dry summer of 1901 the soil in two orchards was so dry that the soil remained fairly moist under the cultivated surface where cow peas had been grown the previous year, but much drier where no cow peas had been grown.

When cow peas are grown on steep land, which has a tendency to wash, the soil will not wash so much as if plowed until spring, when the soil will be washed to a considerable extent, but to the extent that some other crop is sown, the soil will not wash so much as if the cow peas were not there.

The fact that the soil is mellow and spongy allows the water to soak in instead of washing off, thus holding the soil in place.

If the cow peas are to be pastured to hogs (a profitable disposition to make of them in the orchards that are of bearing age), the hogs will not injure the trees, in varieties that produce many seeds are desirable. It is well to sow cow peas in the orchard, and to plow the soil and select these if they are to be used as feed.

WHY IS TO BLAME?

Editor World: I see that Johnston, the man from Croydon, England, who put the clock in the city hall tower, has been receiving congratulations on the way the little timekeeper is working. Yesterday morning I had occasion to make the 7:45 train east and left my home in good time, passing Queen-street, on Yonge, the hands of the city hall clock pointed to 7:45, my train time, so I was minded to return home, but kept on the car, and when I got down to the station I had 7 minutes to spare, in which to buy my ticket and catch my train. Several times I have been inconvenienced by the erratic city hall clock. Whoever is to blame for this condition of affairs is not entitled to congratulations, but to a vote of censure.

FORGET ASKED TO RESIGN.

Millionaire Member for Charlevoix Fails to Make Good.

Montreal, Oct. 3.—Rodolphe Forget, the millionaire M.P. for Charlevoix, has been asked by a large number of his constituents to resign in one of the most extraordinary letters in the history of politics.

Mr. Forget's constituents reminded him that last October he secured election by boasting of his immense wealth which he was anxious to spend for the benefit of Charlevoix. They remind him that he promised to build quays, railways, and all sorts of public works, to start things before July he did not resign.

Not only did Mr. Forget not keep these promises, but he only attended parliament 10 days during the six months' session recently ended. His constituents tell him that his boasts of carrying business into politics merely meant that he put his own affairs first and those of Charlevoix far in the rear. The letter concludes "we use our own incontestable right in demanding that you keep your word and repair in some measure the injustice you have done us by resigning your seat."

TOO PROUD TO BEER?

The cast includes Miss Nellie Fittmore, the Irish comedienne, Miss Mary Servoss, Stella Boylan, the famous and clever girl, and others whose reputation as fun-makers is wide and well-known. Then there is Amie Travis, one of the cleverest of comedienne, and a well-trained chorus of thirty.

Strength--Free to Men

How to Regain It Without Cost Unt. Cured.

Strength of body--strength of mind! Who would not possess it if they could? It is nature's greatest gift--our most valuable possession. Without this strength life is a failure, with it everything is possible. Almost every man was made strong, but few have been taught how to preserve a strength. Many, through ignorance, have wasted it recklessly or used it up excessively, leaving the body exhausted, the nerves shaky, the eyes dull and the mind slow to act. There are thousands of these weak, puny, broken-down men dragging on from day to day who might be as strong and vigorous as ever were they if they would only turn to the right source. Electricity cures these weaknesses. It gives you back the very element you have lost. It puts new life into the veins and renews the vigor of youth. For 40 years I have been curing men, and so certain am I now of what my method will do that I will give to any man who needs it my world-famed DR. SANDE'S ELECTRIC BELT AND SUSPENSORY FREE UNTIL CURED. You pay nothing down, you deposit nothing, you risk nothing; but upon request I will furnish you with the Belt to use, and if it cures you pay me my price--in many cases not over \$5.00. If you are not cured or satisfied, return the Belt to me and that ends it.

I am the originator of this method of treatment and have made it a great success, there are many imitations of my Belt; but my great knowledge, based on 40 years' experience, is mine alone. My advice is given free with the Belt.

This offer is made especially to men who lack strength and vitality, who have drains, losses, impotency, varicocele, etc. and give my Belt on the same terms to sufferers from Rheumatism, Lame Back, Sciatica, Kidney, Liver and Stomach Troubles.

Call or write for a Belt to-day; or, if you want to look into the matter further, I have two of the best books ever written on Electricity and its medical uses, which I send free, sealed, by mail.

BANDITS HOLD UP TRAIN RIFLE SAFE, GET LITTLE

Two Boys Take Advantage of Timidity of Passengers to Attempt Robbery.

Seattle, Wash., Oct. 3.—The Great Northern overland train which left Seattle at 8.30 o'clock last night was held up and a baggage and express car dynamited, about five miles from Ballard. Three men are known to have done the work, also two boys who took advantage of the situation and when the train was halted went thru the passenger coaches holding up the passengers. The boys were captured. The robbers secured the contents of the safe in the express car and departed in an easterly direction. The train was derailed, and as the engineer slowed up two men wearing rain coats and slouch hats, climbed over the tender and presented revolvers at the engineer's head.

The robbers then left the locomotive, taking the engineer and fireman with them, and went to the baggage car, calling upon the messenger to open the door. The messenger refused and a heavy coat of dynamite was placed against the door and exploded. The car was wrecked. The safe was quickly dynamited, after which the rest of the train was allowed to proceed. The two boys who were captured claimed they had no connection with the other robbers, and that the idea of holding up the passengers only occurred to them after the explosion. Conductor Grant's report of the hold-up shows that at least seven men were engaged in the robbery. Once inside the car the robbers began dynamiting the first explosion being a stick of sticks, the second of 12 and the third of 18. While the robbers were engaged on the safe, the two boys who had been riding on the blind baggage, slipped off and went thru the train, attempting to hold-up the passengers. They had no guns, but took advantage of the timidity of the passengers while the shooting was going on outside. No one was injured seriously, although a continual fire of revolvers was kept up. There was very little money taken, being all small remittances and amounting to less than \$1000. A reward of \$5000 was offered to-day by the Great Northern Express Company for the capture and identification of the robbers.

United Kingdom—The weather is favorable. France—Paris progress is being made with wheat. The good quality of wheat is confined to the center and west, and in the north; however, the quality is very good. The percentage of milling wheat is given at 94 per cent, against 72 per cent, last year. There is a large potato crop, but the quality is variable. It is stated that there will continue to be larger purchases of wheat and coarse grains. Hungary—Good progress is being made with planting. Russia—Arrivals at ports are being generally maintained. Italy—The crop this year is estimated at 3,000,000 bushels, against 3,000,000 bushels last year. The corn yield is estimated at 1,000,000 bushels, against 1,000,000 bushels last year. Spain—The crop is now considered decidedly smaller than last year. The stocks of foreign grain have been carried over.

Chicago Gossip. Marshall, Spader & Co. wired J. G. Beary, King Edward Hotel, at the close of the market. Wheat—Cables showed no little response in our advance of yesterday, but there was some disposition to sell at the opening, and a slight dip was the result, which was opposed by good buying. The world's visible showing the moderate increase for the week of 3,000,000 bushels, and cables from Antwerp and Hamburg both expressing the belief that Russia would have but a small export surplus this year, were well helped, and raised the market fairly well above such interior offerings appeared as to cause a sharp setback to the price of wheat. The market was created on the recent dip has been greatly reduced, and the tone at the close is bullish. The market is now in a state of comparative quiet, and the price of wheat is steady. The weather and crop bulletin was extremely favorable, and the market is in a state of comparative quiet, and the price of wheat is steady.

DR. LEWIS GETS HIS WAY

FISH WILL BE PROTECTED

Nothing But Two Inspectors to Fill One Vacancy Would Satisfy, and They Are Appointed.

"Only forty dollars a year for the protection of all the fisheries in Dufferin County," remarked Dr. Fred W. Lewis, M.L.A., for that constituency, when he was at the building yesterday making a strenuous endeavor to have two fisheries inspectors instead of one appointed for the county.

At the public works department he refused to name a successor, but he was explained to him that \$40 was the amount of the appropriation, and that the department could do nothing more.

Since the death of Andrew Hughson a year ago the office has been held open, and many deprecations have been made in the various preserves in the county. The late Mr. Hughson was in Melancthon Township broke all the windows in the club house, and wrecked the place generally, after which they took out the boats and netted most of the fine speckled beauties the preserve had been noted for.

S. Bell, one of the stockholders, was with the doctor, and supported the application for two fisheries inspectors. Similar deprecations were being made all over the county, and Detective Greer was called in on a case. The doctor persisted in his refusal to name a successor unless two were appointed. He took the matter to the board of the appropriation, and with the result that the doctor got his way and two men were appointed.

The doctor is now in the hospital for the eastern and T. Small of Grand Valley for the western portions of the county.

RAMSEY'S FIGHT WITH GOULD.

Issues Statement Outlining Contentious Personal and Financial.

New York, Oct. 3.—Joseph Ramsey, Jr., president of the Washburn Railway, has sent to the road's debenture and stockholders his long-expected letter outlining his contentions, both personal and financial, with George J. Gould. Emphatic denial is made by Mr. Ramsey that he is the provisor of the Goulds, which he says is only a modest one. He asserts, on the contrary, that with regard to railway syndicate affairs, he lost money in the syndicate managed by Mr. Gould while the latter made large profits from those managed by Ramsey.

In explaining his resignation from the Washburn Railway, Mr. Ramsey blames Mr. Gould for letting contracts without competition, and for publicly denouncing the president of the road. As to his protests against extravagance and delays, he says he would have asserted that he wanted to spend his money and manage his property as he pleased, citing the example of H. H. Harriman.

RAMSEY ENTERS SUIT.

St. Louis, Oct. 3.—Suits for injunction were filed to-day in the St. Louis circuit court by Joseph Ramsey, Jr., to prevent the proposed annual meeting of the Washburn Railway, which is to be held at St. Louis, Mo., on Oct. 10. The suit is to prevent the election of a board of directors and a president to control the Washburn Railway for the next year. Defendants were ordered to show cause why Friday why the injunction should not issue.

NEW FREIGHTER ARRIVES.

Str. Glenallan, One of the Largest on the Lakes, in Port. One of the largest grain carriers that will this year be reached Toronto yesterday, on her way from Dundee, Scotland, where she was built, to Port Arthur. She is the Glenallan, built for the line Steamship Co. for trade on the upper lakes. She is 225 feet in length, which is as long as the locks will admit. She is quite wide, but of extremely good lines for a freighter. Some idea of the speed at which she travels will be gained from the fact that she made the trip from the old country in 14 days. This is an exceptionally fast voyage for a freighter with a load. She had a large consignment of bathwick for Toronto and Hamilton.

IRISH GUARDS IN THE WEST.

The Band Meets with an Ovation Everywhere. There will be 3000 seats at the armories at 25 cents when the Irish Guards Band give their farewell concert on Tuesday evening next. Only 500 seats have been reserved at 75c and 1000 at 50c. The city bands will take part in this concert, which is directly under the auspices of the Royal Grenadier Guards. In the afternoon the band will give a concert at which school children will be charged 10c and adults 25c. A. D. Lynd, who has been playing at the Dominion Exhibition, says the success was wonderful, all parts of the grounds and buildings being virtually deserted during the concert.

MAN WHO STOLE SECURITIES IS SCAPED GOAT FOR OTHERS.

New York, Oct. 3.—Miss Katherine Leonard, sister of Henry A. Leonard, the young man who confessed to the theft of more than \$250,000 worth of securities from the National City Bank, declares today that the young man was the victim of another man, and that he was trying to protect the man and a woman.

THE SIMPSON COMPANY, LIMITED

H. H. FUDBER, President. J. WOOD, Manager. STORE CLOSSES AT 5.30 P.M. DAILY. Wednesday, Oct. 4

Odd Coats for Men--Fall and Winter Weight--\$2.49

You will naturally ask "What is the matter with them?" and we will honestly answer "NOTHING." Sometimes a manufacturer makes a mistake in the shade of his cloth and turns out a number of perfectly good coats that don't quite match the rest of the suit. Of course he pays dearly for the mistake—consequently you will pay very little for them, Thursday, \$2.49.

85 Men's Odd Coats, fall and winter weights, made from English and domestic tweeds; the shades are principally dark browns, greys and olives, in checks and overplaid patterns, made up in the correct style and double-breasted sack style, substantially lined and trimmed and splendid fitting, sizes 35-44, sold from \$6.50, \$7.50, \$8.00, \$10.00 and \$12.50 suits, on sale Thursday..... 2.49

Men's Raincoats, of fine imported English covert cloth, a close smooth finished material, in dark Oxford grey and a rich dark olive shade; these coats are made by our own tailors and are correct in every particular—style, workmanship and fit. They have all the new touches that give character and style to them; close-fitting collars with generous lapels and broad shoulders and chest, every garment a model, sizes 35 to 48, Thursday..... 10.50

Men's New Fall and Winter Overcoats, made from a rich soft finished imported tweed, in a medium and dark grey Scotch effect, full box back, single-breasted, Chesterfield style, with broad capacious shoulders and close-fitting collar, fine lining and trimmings to match, sizes 35-44, Thursday..... 11.50

The College Man's Boot.

\$3.50. In the Victor series are several styles that a college man might wear, but there is one last par excellence, a college man's boot. It is just a little "dressier" than the average man's footwear, just a little more advanced and pronounced in style, a bit smarter. It is not a compromise. It is distinctive. You've seen shoes like it, notably the finer, higher-priced American shoes. This is a Canadian made shoe, however, and compares well with any ever imported. It is known in the store and catalogued as
