LONDON, Sept. 21.—The Morning Post's correspondent writes about the taking of Courcelette by the Canadians in an unexpected attack against the

enemy. The Canadians were told to take the sugar refinery and the German third line trenches, and then sit down at the edge of the village. This was

done so speedily that the Bavarians were driven into Courcelette and had no time to reorganize. The Canadians, confident in their superiority, advanced

and captured the village with little trouble. The Canadians stalked the Bavarians silently and with cold ferocity. There is little doubt that the Germans dislike the Canadian type of foe and acutely dislike being stalked by Indiana

LONDON, Sept. 21.—Mackensen made a new effort today to break thru the allied line in the Dobrudja, but he could not succeed. The Roumanians, reinforced by strong Russian detachments that have come down from the north, hurled back repeated attacks, and then opened a counter-offensive.

On the other Balkan front the tide is running in favor of the allies. In southwestern Transylvania the Austrian counter-drive has been checked and the resumption of Roumanian thrusts in the north can be expected. In Macedonia the allied advance configures to make slow progress.

Before Morestir the form the fine checking of Mackensen's offensive is considered of paramount importance. For one thing, there is the moral effect that comes with the checking of the field marshal who led the drive thru Serbia, and for a second, the Roumanian-Russian success prepares the way for the drive into Bulgaria from the north. That thrust depends on the strength of the Russian forces and the numbers Mackensen can gather to withstand it.

But the Nestor of Canadian journalism, Sir Mackenzie Bowell, has evidently heard nothing about the new arrange. ment, for his paper of Wednesday speaks as follows:

Belleville Intelligencer, Sept. 20: In a front-page editorial, W. F. Maclean, M.P., editor of The Toronto World, reads himself out of the Conservative party. Mr. Maclean says that the election result in British Columbia and other recent political events indicate the need of a new party to meet the demands of a new day. He attacks both Liberals and Conservatives as lacking in leadership and genlus, and says that The World will support the new departure of the Party of the New Day.

But the most interesting contribution of yesterday was a leader in ready arrived now, the Conservative The Toronto Mail & Empire, recognized party, as now constituted at Ottawe, has as one of the principal mouthpieces of the Conservative party: whether the Conservative party: whether the is the United Canadian party. And again article comes under the term inspired or is the United Canadian party. And again not we cannot say. But to our great surto the make-up of the new restorative.

> And what have the Conservative newspupers elsewhere in the country to say to this confession of The Mail? What for instance, has The Kingston Standard to say which has nothing but cheap fibes to throw at those who first mentioned a new party in this country? And speaking of The Standard we recall that it was one of the papers that had a great deal to say about The World's crusade against Canada's unpatriotic nickel policy. And also some of the other newspapers that had the same kind of attack on the idea of a new party, were also associate in the defence or existing nickel conditions. And one may therefore almost imagine that the nickel crowd were afraid of the new party or of disturbing the control of our nickel by a foreign corporation, And speaking of nickel and the united party, will The Mail kindly tell us what part Hon. Frank Cochrane will play in its organization and policy? Where does the United Canadian party stand on nickel?

dissatisfaction thruout the country we do not need to go to The Mail for that infull of it and letters received in this office yesterday say there is a wide discontent in all portions of Canada. Here is a paragraph from a paper published within sixty miles of Toronto which is calling loudly for a new party and it speaks from within the Conservative ranks.

IS PARTYISM GOING?

(Orangeville Sun, Sept. 21.) ent events in Canada seem to cate that hidebound partyism is doomed in this country. Nearly all the old thick-and-thin partisans have been gathered to their fathers, and few, if any, recruits are coming forward to take their places. This, indeed, is a healthy sign, and means much to the nation. The sconer people refuse to be tied to mere party names, instead of progressive politices and principles, the better if, will be for the country. During the past two years a feeling of unrest is noticeable among the people. Both Grits and Tories are demanding something that their party leaders fail to give. In other words, the great bulk of the people are clamoring for legislation that will benefit themselves, instead of the big interests and grafting war contractors. A new party and new men are wanted. A new era will dawn for Canada and the world after the war, and we must prepare for it.

It is more information from The Mail is to this new party that has already appeared and is now on the boards. Who are the leading men in it and what are some of the new pianks which the new party must have besides the rather bad plank of doing our best in these times of war? Who is the leader of the party, and if the new party is to take over public affeirs what men are to accept office in the cabinet at Ottawa? Who is to hand out the portfolios? Who is to take the responsible leadership? How are the present men in office to be got out unless there is a change in premierable in the present men in office to be got out unless there is a change in premierable in the same of objectionable ministers. NO NOON DELIVERY ON SATURDAYS

THAT Professor Parson's lectures on jurniture and decorations are not only instructive but charming. anyone who heard him on his previous visit to Toronto two years ago will agree. His talks on color simplify in magic manner the problems of harmony and contrast, and his interesting, sketchy discourses on period and characteristic jurniture are of very real value in the practical matter of turnishing a house.

Beginning on Monday, Sept. 25th, these lectures will be held twice daily, at 10 a.m. and 2.30 p.m., in an improvised auditorium on the Fourth Floor.

Tickets may be had to-day and Saturday morning from the ticket bureau on the Fourth Floor, centre.

Paris and New York Gowns For Afternoon Wearing

And of Course Satin is the Fabric of Which Most of Them Are Composed—Satin Rendered Still More Fashionable With Touches of Heavy Silk or Soutache Braid Embroidery or Banding of Skunk or Moleskin or Other Fur

FOR THE TEA-PARTY, LUNCHEON, or wedding which is bound to break into the social quietude of the coming season, and for any little special occasion in your own house, these are gowns of the ideal type. Some are French, others are American, some eminently simple, others more elaborate. All conspire to the long, slender line of the new silhouette. If you want an interesting, distinctive afternoon frock of the soft, feminine sort, the collection affords you a splendid choice. Just to describe a few of them:

An artistic model in smoke gray satin is simple and straight of line, its ornamentation consisting of a band of moleskin on the collar, two little stole ends of French blue ribbon, and a bow-knot embroidered on the skirt in heavy smoke gray silk.

In dull black satin charmeuse is a gown of the same simplicity of line, the skunk edging on the collar of the little flat bodice and the big square pockets of the skirt supplying a smart note of decoration. The lining of the collar with old gold relieves any suspicion of dullness. This is \$40.00. Charming indeed is a model in olive green crepe meteor, the bodice embroidered in olive green soutache and a thread of silver. Price, \$60.00.

From Docuillet comes a gown of the more formal kind, showing everdress of black embroidered net over flesh pink satin, the fashionably flat bodice decked with band of old blue, the round neck outlined with skunk. Price, \$100.00.

Georgette crepe in case au lait tint is the filmy fabric employed for a picturesque model which shows a pointed tunic of deep sapphire blue crepe. This is \$100.00.

Fox Scarfs Will Be In Great Demand For The Races

And Here They Are, White, Taupe or Red in Straight and Shaped Stole Effects With Various Versions of the New Round Muff to Match Them COMFORTABLE AS WELL AS CHIC is the popular fox scarf these days when the Autumn air is none too balmy. The Race Meet to-morrow will emphasize its vogue, and so universally useful is such a neckpiece that wise indeed is she who possesses herself of the same, ere prices soar higher than they are at present.

Taupe fox, white fox, cross fox, red fox—all are warmly approved of Dame Fashion and won-derfully smartly cut and moderately priced are these particular scarfs featured just now in the Fur Department. All are of carefully selected pelts of excellent quality. For instance:

In taupe fox of beautiful softness and sheen—straight, animal-length stoles in various widths at \$37.50, \$47.50, and \$55.00, all extra-good values. Round muffs to match are \$50.00, and larger fancier styles lined with taupe crepe de Chine, and ornamented with heads and tails, \$57.50.

In white fox—straight animal-length scarf, \$37.50; and shaped scarf, \$70.00. A round muff ornamented head and tail is \$62.50.

In red fox—animal-length scarf, \$29.50. Muffs in round and pillow styles, \$29.50. In cross fox showing beautiful glints of yellow in the characteristic gray and black coloring -set of straight scarf and round muff with tails, \$195.00.

Ermine, too, is Fashionable

And very charmingly it lends itself to the quaint little tippets, pelerines, and round ball muffs of latest vogue. As for prices: A small cross-over cravat is \$18.50, a larger tie, \$25.00, a collarette with high collar, \$55.00,

and a caperine edged with ermine tails, \$95.00. A round ermine muff is \$42.50, one in melon shape with cuff effect at either end, \$45.00, and a fancy ball design ornamented with many heads and tails, \$52.50. -Third Floor, Yonge and Albert.

Chic and Individuality Mark Every One of These Misses' Gowns

And of Course They Are Slender and Straight in Outline and Fashioned With That Smart Simplicity Demanded by Their Youthful Wearers to be, Satin Being the Favorite Material of Which They Are Composed and Embroidery the Frequent Ornamenation

CAREFULLY SELECTED. MODEL BY MODEL, from dressmakers known from one end of American fashiondom to the other for their success in the designing of misses' apparel, these gowns will be heartily appreciated by her of slight, youthful figure in quest of an afternoon frock. Every one of them is distinctive in style, and charming in fabric and color. Thus:

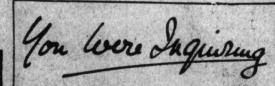

A fascinating gown in parma violet satin shows bodice and upper portion of skirt of Georgette crepe in the same rich purple tone, the deep square collar and vestee being of flesh pink crepe. Price, \$65.00.

Artistic as a gown well can be is a model in charmeuse in soft cafe au lait tint, the bodice flat, the lines of the skirt long and slim, a simple collar of white satin and a coppery Oriental buckle on the girdle serving effectively by way of ornament. Price, \$50.00.

In black charmeuse is an interesting dress with collar of white satin on the plain blousebodice, and gold thread embroidery on the pockets on the skirt. Price, \$50.00.

AT. EATON COLIMITED

L. M. — Nowadays girls of twenty are considered eligible for the handsomest furs in the style category. As far as usage goes your daughter might indulge in any of the season's petries—taupe for, white for, cross for see prices in another column) in moleskin or Hudson seal (dyed muskrat). However, if your wish is for something more distinctly juvenile, there are scarfs and muffs in fitch from \$10.00 to \$95.00 the set, in opossum from \$20.00 to \$40.00, and in wolf from \$30.00 to \$50.00. The straight animal-length stole is the most popular neckpiece, and the chief favorite among the new muffs is the plain ball shape, both of which are featured in these furs mentioned.

Did you know you omitted to add your address? The samples of serge are waiting to be mailed to you.

"Hayseed."—Certainly, in so far as the bushy white beard and traditional red velvet knickers are concerned the resemblance is not very marked. In what respect do you detect a similarity between the fabulous old chap and a sedate fashion scribe? Possibly in the perplexing letters we both receive. However, without begging the question any further, let us pass on to the more interesting matter of your plush coat. A fashionable model in full flaring style, with ragian sleeves, wide convertible collar and a belt across the front, is \$25.00. Likewise in black slik plush, with blended sable forming the collar and bordering the edge of the wide rippling skirt is another modish coat lined throughout with blue, mauve or green satin, and priced at \$29.50. The same model with sateen lining and no fur around the skirt is \$27.50, or with collar of coon, \$22.50. coon, \$22.50.

The strict simplicity you crave in a black crepe de Chine blouse will be found in various models at \$3.95 and \$5.00.

In the long-haired furs such as fox and wolf, the straight scarf, about a yard long and ten or twelve inches wide, is the smartest neckpiece. In the short-haired moleskin, ermine and Hudson seal (seal rat) the collarette, caperine and the long, straight shawl stole are

It is \$2.50. The white jean middy can be had just as you want it, a well-made, good-fitting Paul Jones model with navy blue flannel collar and leng sleeves at \$1.95. As for the sweater, the one I think you would like best is in brushed wool, in green or Copenhagen blue, with belt, collar and cuffs in white. The price of it is \$5.00. Other styles in red or navy blue wool in plain pebble stitch are featured at \$2.95 and \$3.95.

Valuable Address Delivered by President of Ad Clubs of World.

Toronto should spend \$60,000 a year for three years at least thru an in-dependent business organization with an executive directing head, in adan executive directing head, in advertising to attract American capital according to the advice given by Herbert S. Houston, president of the Advertising Clubs of the World, to 165 members of the Toronto Ad Club at the Carls-Rite Hotel last night.

Why, how and what should Toronto advertise? These were the three questions to which Mr. Houston addressed himself.

The first of these he answered by saying that a city, an individual or a firm could not help advertising, i.e., spreading information. about itself. This advertising might be controlled or uncontrolled; but advertise it must. It might advertise itself as a sleep or as awake. It was as imperative that a city should advertise itself as it was for a manufacturing concern. Confor a manufacturing concern. Controlled advertising was the spreading of information which the city or information which is a city or in dividual desired to disseminate. It was this controlled advertising that counted, that gave expression to pur-

For the last fifty years Toronto had been advertising its stability, solidarity and character. This was a splendid foundation on which to build with to appeal for American capital. For what should Toronto advertise?
The answer lay in the answer to the further question, What does Toronto want? It wants capital to develop its industries, its resources.
To Invest Capital.

To Invest Capital.

How was Toronto to get this capital? By answering the question. What does capital want? It wants safety and income. The safety was conceded, established without advertising. As for income, that was affected by opportunity. It was Toronto's business to advertise its opportunities so as to interest capital.

To do that intelligently Toronto should first make a survey of what it did want. The city should make a manufacturing analysis as a merchant would take stock. Then it should undertake to sell to capital the opportunities so discovered, but first, Toronto must envisilage its opportunities, its facilities for manufacturing, its cost of materials, its trans-

Remarkable Results.

Des Moines, Iowa, was Mr. Houston's shining example of the effect of advertising a city. He described the methods and the truly remarkable results attained there by the expenditure of \$20,009 a year for three years. On the experience of that city he based his answers to a number of questions that followed his address. Relatively, Toronto should spend \$100,000 a year, but the war had made a difference. He would suggest that Toronto should spend \$60,000. It would be useless to go into the advertising business for anything less than three years. Des Moines had gone on for five years. Toronto would probably. He would advise that the advertising of country arrived with two others on Dutch territory, whence they were shipped to England after being fed by some of the people in Holland. KITCHENER, Ont., Sept. 21.—
The friends of the 118th Battakion in North Waterloo are hopeful that the situation which has arisen in Camp Borden by the resignation of twelvo officers will adjust itself harmoniously and that it will not be necessary for headquarters to amalgamate the 118th Battalien with other battalions to prepare them for overseas.

The outcome of the visit of Gen. O. Watkins, chief of the general staff, and Mr. McCurdy, M.H., acting mincher of sallitia, to 'Camp 'Lorden tomorrow to confer with Gen. Logie as to which battalions will be sent overseas this fall is awaited with keen interest. Those who have spent much time and money in receiving the battalion state that it would be a black eye for the city and riding should the battalion lose its identity before reaching England.

Lieuts. Detweller and Stirling, two of the officers who resigned, arrived home to might on leave of absence until O. 1, and while they are hopeful of the outcome, military etiquet prevented them from giving out a statement to the press.

In a brief address Rev. Schutt said that the granting of the holiday to the firemen would involve the appointment of 42 additional men and an expense of \$3500 to the city. He said that the 360 firemen are on duty 24 hours six days of each week, with only every fifth Sunday off duty; that they were under a constant strain, and the only time devoted to their families was an hour and a quarter for meals each day Jail for Profiteers.

Questions argued at some length by the council were involved in motions to have the city regulate the sale of second-hand goods to prevent the spread of disease and to have the government either regulate the sale of commodities or increase the allow-ances of soldiers' wives or dependents and widows and orphans.

The first motion was referred to the municipal committee for investigation and report, and the second will be submitted in an official letter to the National Trades and Labor Congress, which meets in convention here next veek. "As I said on Aug. 27, if the king will not hear the voice of the people, we must ourselves devise what it is best to do. I do not know what that will be, but a long continuation of the present situation would be intolerable. Already we have suffered all the agonies of a disastrous war, while remaining neutral.

"We have had ten months of mobilization with all the consequent paraships to the families of the men concorned, while both Balkan wars only included thirteen months with greater funds available for the relief of the families of the soldiers. We have had all the financial burdens of war and the cost of maintaining a useless. ally to the laboring man confront the allied countries in the aftermath of the conflict. A new basis of existence he said would follow the war, and the position of the working class would be strengthened and bettered if organized labor insisted upon its rights. He suggested that a committee be appointed in Canada, as has been done in England to investigate the probable conditions which would exist at the close of the struggle.

Mr. Williams argued in support of pensions, declaring that the laboring men, so many of whom are in active service, will not be contented with anything less than a suitable return for the sacrifices they have made. He said that real reform would result if the best representative of organized labor were in the lead of the movement looking to the betterment of that class.

"If the Germano-Bulgars are successful," replied M. Venizelos, "certainly all of Macedonia is lost to us. You have seen what the Germano-Bulgar guarantees are worth in their written pledge that they would not occupy Kavala, Drama or Seres.

"If the entente allies are victorious, as I profoundly believe they will be, we risk, first, a separate peace between the allies and the Bulgars, whereby the latter may be permitted to retain the Greek territory they have occupied with the consent of Greece.

"Or, in the event of a complete allied conquest of Bulgaria, why should the Serbs, for example, return to us, who have not kept our treaty alliance who have not kept our treaty alliance with them, those parts of Greek Macedonia they and their allies have not taken from us, who gave them up unresisting, but which would then have been reconquered at the point of the bayonet from the Bulgars, to whom we had surrendered them?"

ST. MARK'S CHURCH ADDITION DEDICATED

Yesterday being St. Matthews Day, it marked the dedication of the new addition of St. Mark's Church, Ford and Connolly streets, which was performed before a large congregation last evening by Lord Bishop Sweeny of Toronto, assisted by Bishop Reeve.

It is of interest that St. Mark's, once the parish church of the old Village of Cariton, is in reality one of the very oldest places of worship either in the City of Toronto or the Township of York, for it dates back as far as 1864, when Rev. A. Johnston, father of Dr. A. J. Johnston, chief coroner, was the rector.

The westward addition forms the nave, including a basement for the choir, and is in keeping with the Gothic style of the old portion. This now increases the seating capacity to fully 400 in the body of the church and a rostrum capacity of 50. The old edifice has been entirely renovated, giving the interior an almost new appearance. The cost of the whole work was over \$5000.

The Rev. Canon Plumptre, rector of St. James Cathedral, preached a special sermen. Rev. A. J. Reld, who has been rector for the last five years also participated in the ceremony.

* WAR SUMMARY *

THE DAY'S EVENTS REVIEWED

It fell to the Roumanians to falsify the claims of the kaiser to a decisive victory in the Dobrudja by checking a second attempt of Von Mackenzen to break thru their defensive lines and forcing that general and his army of Germans, Turks and Bulgarians to refire. This polyglot force of enemies is burning the villages abandoned in the retreat. This Roumanian success will have a profound moral effect for the reason that Mackenzen commanded the armies that oversely serbic and German agents greatly inflated his prestige. that overran Serbia and German agents greatly inflated his prestige by their boasting. That prestige now shows signs of tottering. The arrival of fresh advanced guards of Russians no doubt greatly assisted the Roumanians in making their stand. It is now believed that Russia is nearly ready for the opening of her Balkan campaign.

Straight across Bulgaria from the Dobrudja the allies have put the Teutons in another predicament by the Serbian seizure of the Kaimakcalan summit and the enlargement of their gains in this mountainous district by the capture of another spur. Before Monastir both sides are lining up for battle. At Florina the situation is also propitious for the allies. On the British section of the front, artillery actions prevail. A sort of lull in the general operations may imply that the allies are delaying their principal exertions until the Russians come up in full strength in the Dobrudja.

In Transylvania the Roumanian advance has been halted, probably because troops have been withdrawn to cope with the situation in the Dobrudja. The Austrians seized the peaks dominating the antrance to the Vulcan Pass, but the Roumanians hold a present the property of the pr

the enemy will make a further advance thru this mountain gate.

The French official communication of last night gives important particulars of the troops engaged in the great German counter-attack yesterday on the northern bank of the Somme River. The Germans used the 18th corps, which was withdrawn from the Aisne front, and the 214th division. Some mistake may have been made about the numbering of this last unit, for French official communications issued in the spring said that the total German establishment was 172 divisions. If there is a 214th German division it is probably because the Germans are reorganizing their army in weaker divisions and thereby increasing the number tho not the total men in their military establishment. Additional evidence tending to point to this change in the organization comes in the report published in a French paper on the German losses. This report says, respecting a certain company, that it went into action 210 strong. But thruout the course of the war, until this spring, the enemy maintained his companies up to their full strength of 250 men. Thus, this company when thrown into action, was forty under the strength of a company a year ago. This would imply the weakening of the various German battalions and regiments in order to secure the men for new formations.

A significant fact recorded about this 214th division by the French official communication is that this unit had been entrained and ordered to the Russian front. When it was half way to its new destination it was recalled and reached the Somme front on Sept. 14. It was put in the line five days later and on the sixth day it was engaged in the Bouchavesnes district, where it suffered enormous losses. The date of the return of this division coincides with the holding of the Teutonic council of war on the eastern front, and the sending of it back, besides indicating that the Germans are in sore straits for men, may indicate they have decided against an eastern offensive in the near other divisions floating backwards on the rising tide of the Somme battles.

Brevity is the feature of the British official communication of last night, for it merely records that the general situation is unchanged, taht German attacks failed in the neighborhood of Flers, that one German kite balloon was brought down in flames and that one British aeroplane is missing.

Coroner Winnett referred to the case of a woman, arrested for drunkenness, and of Bright's disease on police

On the Russian front there is fighting in Galicia, with the Slavs making onsets; fighting in Volhynia, with the Germans the aggressors, and fighting siles are severe, it is probable that the entry of Roumania into the war has tended as hofding operations for the Teutons, to prevent them from trans-1500 miles. Great Russo-Serbian Exploit

ATHENS, Sept. 20, via London, Sept. 21.—The Greek military officials regard the capture of the Kaimakcalan plateau by the Russo-Serbian troops at the most important military event in the Balkan campaign up to the present. The height, which is 7800 feet above sea level, lies in Serbian territory and constitutes the western door post to Serbian Macadonia. The local Serbs are jubliant over the capture, which they consider rivals the mountain feats of the Italians.

Whether a medical man is any more

And in spite of Coroner Winnett's repeated suggestion that there should be some medical men on hand at police stations to diagnose drunks the jury did not add any rider carrying out the idea.

Te. Francis Russell of the American Legion, 212th Battalion, according to the evidence, struck a man on Front street on the night of the 14th, the prices of foodstuffs in Toronto. He believed evidence on oath should be turned and ran across and up Yoritstreet when Constable Johnston was leaning diazedly against a brick wall and had a slight abrasion over in the right eye. He was taken to the police station, and believed to be in ext day, inspector Sawdon ordered him to the hospital, where he died of a fracture of the skull.

Coroner Winnett asked several constables in turn how they decided when ther an unconsclous man was drunk or ill. Most of them declared that the color of the breath was good evidence. Outside of that, they admitted them. Inspector Sawdon, tho, declared he could tell a drunk as well as any doctor.

"Why," he said, "I had a man unconsclous in the cells for two hours and then sent him to a hospital. He died in the cells of a fracture diskull."

Coroner Winnett reprimanded me for not sending him soomer when his life could have been saved. I got another two evenings later and sent him to the hospital immediately, They sent him back because there was nothing the matter with him, and he died in the cells of a fractured skull."

Proportional Representation

We are glad to see that The Toronto Star has something to say in favor of proportional representation. It is indeed scarcely necessary to do more plan. The Star suggests that if in then the fair representation would be rests on authority. 60 Liberals and 40 Conservatives in the elected chamber, but the result RUSSIANS CAPTURE under the present system is generally about 88 Liberals and 12 Conserva tives. If the political complexion of the voters was changed so that 60,000 Conservatives and 40.000 Liberals were voting the result would be eimilar, and 12 Liberals would be overwhelmed by 88 Conservatives. Such a system is faireto neither party, and parties with less strength usually get no representation whatever. The labor men would have a better showing under proportional represenelected would be greatly improved, because the foundation principle of proportional representation is that it gives the voter a chance to express his preference for the individual candidate, and not merely for the caucus choice of the party. The system of voting enables the voter to say who he likes, second-best as well as first-best, and even third and fourth best if necessary.

The reform is coming in Britain and is widely in favor elsewhere. Canada is somewhat slow in such improvements, but the change is in-

Military Hositals Commission Fit Men for Civil Service.

A number of our returned soldiers, in the Calvary Convalescent Hospital of the military hospital commission, are working hard as their injuries will permit, for a civil service entrance examination.

Examinations are dreadful things, to most of us, even when we are in perfect health. But the easiest part of them, to us, is the mere process of writing. To these men, on the other hand, the act of writing is a serious difficulty.

Showing Progress.

"The men are working hard," their teacher writes, "and are making consistent progress, but the subject which gives me most concern is writing. Still Another Ries. During the last few weeks the small loaf has risen in price from 6 to 8 cents, to which a rumor is added that a nation-wide league of bakers are seeking to advance the figure to 9 cents in all the principal cities including Toronto, Winnipeg, Montreal, Hamilton and London. If this is Hamilton and London. If this is carried out it might perhaps prove the "last straw," which would drive the bakers out of business to a great extent, and bring housekeepers back to the sane and wholesome method of using home-made bread. That this would appreciably reduce the cost of living may be seen at a glance from the sane and London. If this is tacked around Bouchavesnes and Bois L'Abbe and at Combles, about the Friez farm two Prussian battalions were nearly destroyed, adds the correspondent, and a similar fate was suffered at Rancourt by living may be seen at a glance from would appreciably reduce the cost of living may be seen at a glance from the following figures. The schedule was prepared by a business man in Toronto, who grew indignant at what he terms the "crime" of present high prices, and had a test compiled from the despectation of the despectat bread made on his own premises while a check was kept on the expense of the production, in the matters of material consumed, time spent in operation heat, etc.

LONDON, Sept. 21.—The Canadian minister of militia has received a letter from Sir Douglas Haig, of which the following is an extract: 'I desire to express my sincere appreciation of the generous terms in which you refer to the achievements of the army in France. It must be a source of pride and gratification to you to know that the gallant officers and men who come from Canada to fight for King and the common cause of our Empire invariably do their duty in a way that reflects the greatest possible credit upon themselves and their dominion."

The fine weather Toronto is now enjoying will doubtless bring out a great many people to the Woodbine on Saturday for the autumn races of the Ontario Jockey Club, a convenient meeting place for friends who have been widely separated during the months of summer, and who are planning an even more strenuous campaign of work for the good of others than was carried on last season. Now that all the usual galeties are banned, society has few gathering places left, and a day cut in the open heartens people up for a season of indoor toil. The hotels will be well filled by Sat. many well-known people from out of town being expected.

"IT PAYS TO ADVERTISE." It is generally conceded that Rci Cooper Megrue and Walter Hackett's farce "It Pays to Advertise," which comes to the Grand Opera House next week, is one of the best comedies seen in many seasons. "It Pays to Advertise" presents the very essence of American spirit, American humor and American character. If you saw the piece translated into French, German or any other language, there would be no mistaking its original, and certainly no more side-splitting farce has been concocted here. As a matter of fact, "It Pays to Advertise" is one of those plays that provoke real breath-bereaving mirth, the sort that makes you throw your head back until it rests on your chair and laugh to your heart's

"ALONG CAME RUTH" AT THE ALEXANDRA. Monday evening at the Alexandra Theatre will inaugurate a week of fun and laughter when the delightful comedy success, "Along Came Ruth," will receive its initial local presentation. "Along Came Ruth" is described as being as wholesome as your grand-mother's gingerbread, and its witty lines, brilliant dialog and amusing situations kept the theatregoers of New York in good humor for nearly six months. The story of what Ruth did to little Oldport, Maine, is described in a delightful comedy of atmosphere and action. "Along Came Ruth" is an adaptation of a French comedy, La Demoiselle de Magasin, by Fonson and Wicheler, which ran for

Federal Legislation to Curb Racetrack Activity Expected

OTTAWA, Sept. 21.—It is understood that the government is being strongly urged to introduce legislation to do away with the multiplicity of race tracks in Canada, with their attendant betting conditions. Under the law a charter can be obtained by act of parliament only, but the promoters found a way to get around this by reviving old charters that had not been in operation for years. It is probable that the legislation will be aimed at this practice,

ROGERS QUESTIONS STATUS OF PROBER

Justice Galt Not Legally Entitled to Receive Fees, He Declares,

TERMED "PURE GRAFT"

Rogers Repeats Denial of Ul terior Motive in Raising Tender.

WINNIPEG, Sept 21.—Hon. Rober Rogers, who completed his evidence before the agricultural college commis sion this afternoon, attacked the right

sion this afternoon, attacked the right of judges to accept fees for presiding over such enquiries. He called the attention of Justice Galt, the commissioner, to the judges' act and said:

"While the report is current on the street that those engaged in these commissions have been paid large sums of money, I cannot believe that such is the case. I would be very sorry to believe that such was the case, because under that law should any money be received by any judge it would undoubtedly represent nothing but pure and simple graft."

"If you go on with talk of that sort I shall stop you," interrupted the commissioner.

"Under the law this is so clear an distinct that it requires no comment," continued Mr. Rogers.

distinct that it requires no comment."

Judge's Counter-Thrust.

"How about the recent commissioner at Ottawa?" asked the commissioner.

"I am glad you called my attention to that. The cases are not all parallel. The government would not appoint the commission until it went to parliament for full sanction," was the reply.

Mr. Rogers said that he mentioned this matter in the most kindly spirit.

The Commissioner: I appreciate that, but it seems to me a little late for any minister of the crown to come up here and instruct judges in their duty, when commissions have been going on for years with, it must be admitted, considerable necessity and very great good. Don't you think that any instructions should come from the minister of justice and not from you?

Mr. Rogers: I am not giving instructions. I am merely pointing out the law.

The commissioner: I think you are exceeding your functions.

Mr. Rogers as a citizen. I am more pointing out this matter as a citizen. I am merely pointing out this matter as a citizen. I am merely pointing out this matter as a citizen. I am merely pointing out what I thought you would be glad to hear.

Rogers Fread Claim.

Counsel for government, Mr. Phillips, conclude his examination of the minister of public works, and Mr. Rogers asked to make a statement.

Mr. Roger that during my 12 years as minister of public works in this province, I am sure no nan, no contractor, can truthfully say, that I ever suggested any impryer act in connection with any work."

Mr. Roger then drew the attention of Commissioner Gilt to the judges sother than their judicial duties,

"If want very suggested any impryer act in connection with any work."

Mr. Roger sudded section 33 of the data of the same time that the processory of the contractors on the job. This tender was for \$71,350. Mr. Rogers and thoper house for leave the province of a matter of routine business.

Perhaps you have followed precedent, and to that extent have been his conversation with Hooper occurred after Aug. 16, 1911.

At the opening of the afternoon session Mr. Phillips resumed his efforts to fix the date when Provincial Architect Hooper recommended to Mr. Rog-

"Taken to bed, sick," and on Sept. 3,
"out of bed and sitting up."

From penciled crosses for the intervening days, the witness inferred that he had "dittoed" the entry of Aug. 12. Mr. Hooper died in England,

Oct. 19, the same year. Mr. Rogers was then recalled. Mr. Phillips told him that Mr. Carter had been convinced from the documents that it was after Aug. 16 when Mr. Rogers telephoned him about increasing the powerhouse contract. Mr. Phillips suggested to Mr. Rogers that appeared from information they had as to his (Mr. Rogers) movements at that time, that it must have been after Aug. 12 when he had the con-

versation with the provincial architect in reference to the contract.

"I am not prepared to say so," replied Mr. Rogers. "I only know that the conversation took place."

"I was losing money on the administration building contract. "You always," he said, "have to be guided by the officers of the department. I always found Mr. Hooper's judgment very solved."

"I will have to ask his lordship to find that this conversation took place subsequent to Aug. 12. I cannot do anything else," said Mr. Phillips.

Mr. Rogers left the stand just before the stand fust the st 4 o'clock and the balance of the ses- istration building to Carter at too low

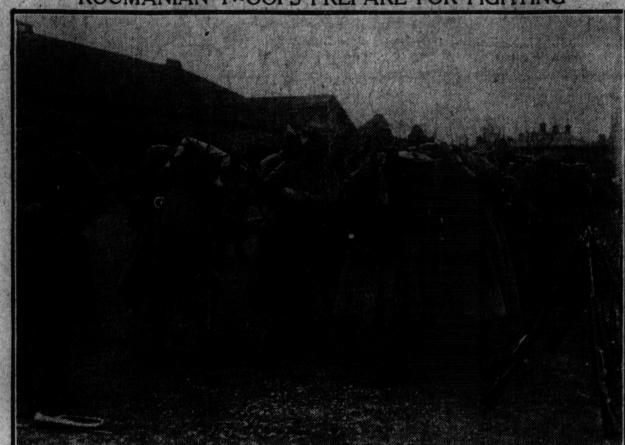

sion was occupied with minor matters.

Approved Architect's Opinion.

Mr. Rogers. in opening, said he was minister of public works for Manitoba in 1911 until Oct. 9. He identified Commissioner Galt's recent message to him regarding the evidence given by W. H. Carter, contractor, and his by W. H. Carter, contractor, and his change in this contract was made for

honestly that I never suggested or imhonestly that I never suggested or implied in any way the exacting of anything from any contractor for carrying on work. Whatever were the circumstances in this case my motives were nothing but the carrying on the work in the public interest."

"My difficulty is in reconciling the facts," said Mr. Phillips.

Mr. Rogers said Carter hadn't complained his tender was too low. Mr. Phillips, counsel for the government, told Mr. Rogers that Carter made a profit of \$21,140 on the power house.

profit of \$21,140 on the power house, including \$40,000 extras on the contracts. The minister didn't think he told Carter when he telephoned the amount the contract was to be increased. He told Carter to see the architect

No Deduction Made.

Phillips proceeded to question the minister on the administration building contract. He told Mr. Rogers no deduction had been made in favor of the province for \$6000 saved to the contractor in steel construction.

"That," said Mr. Rogers, "is justification of my statement that 'tis a mistake to have a tender too low, because there is a tendency to try to belon the province of the province for the province for \$6000 saved to the contractor in steel construction.

"My memory is clear and distinct that Hooper made the recommendation," was the reply. "Hooper some-times when sick in bed used to come to the office for a short time." Mr. Rogers repeated that he would not

"The Calgary Albertan" in no friendly spirit discusses the return of R. B. Bennett, M.P., to the provincial field. The Albertan believes that Mr. Bennett is disgusted with Dominion poltics and feels that he has been over ooked while men of less commanding ability were promoted to or retained in the cabinet. His retirement from Dominion politics will, in The Albertan's opinion, mean a collapse of the Dominio Conservative party in Alberta. Mr. Ben nett is now the only Conservative M.P. from that province, and he carried Calgary largely upon his own personal popularity. There is undoubtedly considerable dissatisfaction among the Conservatives with the government at Fredericton, and it looked for a time as tho no one who accepted a portfolio could be returned to the legislature. As soon, however, as gossip spread that the break in Liverpool quotations was artificial, and nainly for effect on this side of the Atlantic, the market here began to harden. Sudden drying-up of wheat offerings resulted, and estimates were current that fully 70 per cent. of Europeai purchases in the last few days had been of wheat grown in the United States. Announcements were made just before the close that versel charters for Europe during the day had reached an aggregate of \$800,000 bushels.

Corn swayed with wheat, especially in the last part of the session. Oats sagged in consequence of a lessening of export sales. Weakness, tho, was checked in a measure by spreaders, who were purchasing cats, and at the same time seiling corn.

Lower quotations on hegs carried down provisions. After a moderate setback, however, good buying developed, and brought about a reaction, particularly in lard.

Will Explain Advantages. In connection with the fair a booth has been set aside for the use of the association officials, who will take advantage of the opportunity to speak to the parents during their visit at the association building of the need of obtaining membership for their sons. Books and literature on the training and educating of boys will be

distributed for perusal.

Each evening there will be a directors' luncheon. Harry Ryrie will speak before the meeting of the directors tonight, and H. C. Hocken will speak at the Saturday night luncheon. Capt. J. W. Beaton, who sent a cablegram from overseas service wishing the success of this year's fair, is honorary president, J. B. Brodie is past president, J. M. Booth is president, dent and J. Expectation of Heavy Exports Creates Renewal of Strength.

CHICAGO, Sept. 21.—Wheat prices rallied today, largely on account of European buying, which developed after a decline to more or less lower quotations at Liverpool. The close was firm, at \$1.50% for December and \$1.53%, with the market as a whole %c to %c up, as compared with yesterday's finish. Corn closed %c down to %c up; oats at a loss of %c to %e, and provisions ranging from 12%c decline to a rise of 10c.

Depression ruled in the wheat pit until suspicion was aroused that Liverpool quotations had been lowered to facilitate European buying in the United States. European advices gave a different reason, namely, that increased shipments were expected from Australia and Argentina. There were reports also of rains in Argentina, where of late a serious drought has prevailed. As soon, however, as gossip, spread that the break in Liverpool quotations was artificial, and mainly for effect on this side of the Atlantic, the market here began to harden. Sudden drying-up of wheat offerings resulted, and estimates were current that fully 70 per cent. of Europea purchases in the last few days had been of wheat grown in the United States. Announcements were made just before the close that vessel charters for Europe during the day had reached an aggregate of \$800.600 bushels.

NEW YORK, Sept. 21.—The striking feature of today's session, in which sales ran well over 1,000,000 shares for the thirteenth consecutive full day, was the fullie effort of an aggressive speculative faction to depress prices. Initial quotations were mainly ligher, some substantially so, but a series of bear attacks affaced this advantage before the end of the first hour, leaving the list rather unstituded. The consequence of another and more general advance of another and more general advance in coppers, those issues responding to announcement that producers and series, had advanced the price of the metal for a November delivery to 28½c. New maximums were made by leading metals. Anacondar rising to 8½s, Utah to 80%, and Inspiration of 44%. AT THE

MPROVED UNDERTONE

Cement, Smelters and Maple Leaf Were Higher-Steels and LA ROSE DIVIDEND DECLARED. Others Dull.

The Toronto stock market had a slightly improved undertone yesterday, but the volume of business was light, and any strength was left to a few issues. Maple Leaf, Smelters and Cement had some resiliency, each advancing about a point. Maple Leaf was bought because of the action of the Ogilvie directors declaring a bonus, the assumption being that the success of one milling company was an indication that others were doing equulty well. Smelters and Cement were bought from Montreal, where speculation is more keen than t is here. There was considerable business in Spanish River at 12, but the buying was purely speculative. Steel ness in Spanish River at 12, but the buying was purely speculative. Steel shares were dull, but activity and rising prices in these are being daily watched for. Newray, Lorrain and West Dome were the issues in demand in the unlisted section. The general impression last night was that the whole market would shortly improve and develop a general speculation with rising prices.

LONDON STOCK MARKET.

LONDON, Sept. 21.—The settlement of the railway dispute created a good impression on the stock exchange today. Home rails made the best showing, with advances from a half to a point, and consols hardened, but little increase in business was noticeable. Copper shares improved on good American advices, and colonial bonds and rubbers and shipping stocks were active. The other sections, including the American, were quietly steady. Money and discount rates were un hanged. British and French treasur, ills were in good demand.

MINING BOOM IMPENDING

Close students of the Toronto mining market are predicting a boom of no mean dimensions in the Canadian silver and mining shares. Their isions are based i.rst on the movements that have occurred and are still occurring in United States metal shares, and second on the ground that advances in the baser metals are necessarily followed by price increases in the more precious metals. The Toronto mining market has been held in check by the beliday season, but this has passed and prices are now being adjusted by a certain amount of what is termed backing and thing. Another sensational jump in silver is expected. The price has now recovered to 63%c an ounce, but the producing Cobalt mines are not selling their product and the demand is insistent. Negotiations have been entered into with the Cobalt companies for large amounts of silver, but the bids are not yet satisfactory, in addition to the higher value for silver many important recent finds have been made in represent growing. Timiskaming, Mckinley, Peterson Lake and Kerr Lake, and there are those who believe that Cobalt has taken on a new lease of life. Most of the silver-producing companies are in a stronger financial position than at any time in their history, and bonuses in adultion to present dividends must be distributed to shareholders. New York has entered the mining market as a buyer of Canadian mining stocks and has already forced advances of some moment in Nipissing, Kerr Lake and Big Dome. Enquiries from Wall street yesterday portended a movement in Timiskaming. If the usual course is followed the public will not buy stocks until the market develops considerable activity, when the scramble for shares starts and the chance for substantial profits has been lost. still occurring in United States metal shares, and second on the ground

PROSPECTING SURFACE OF DAVIDSON PROPERTY

Indications Very Promising—Main Vein on Surface Assayed High.

The Davidson has put a gang of men prospecting on the surface at the southern end of the properties, where there is a favorable outcropping, and where the management anticipate that values will be found. The main veir on the surface assayed \$15 per ton over a width of 12 feet, while the main shear zone had a total width of 90 feet. Other promising indications were noted, but it was decided to concentrate all efforts for the time being on the main vein. Now that the shaft has reached the 300-foot level, and lateral development has been started there, it has been determined to thoroly explore other sections of to thoroly explore other sections of the holding where the surface features point to the existence of gold-bearing veins.

The company is rapidly coming to the front, and the surface prospecting promises to be followed with a good deal of interest as the location of other ore bodies would probably lead to a considerable movement in the market for the shares.

FLEMING & MARVIN The Possibilities of Mining

Timiskaming shipped one car of ore which is reported to net the company \$126,000, or at the present market price of the stock a dividend of 7½ per share—

Timiskaming only a few months ago was not considered a very sood property as far as reports from different sources go. Now—not as an assertion, simply as a comparison and maybe a remote possibility if Caiumet & Montana Cons. should strike a body of sliver ore as Timiskaming did, what would it mean in dollars and cents for a purchaser of these shares? Simply this: Divide 250,000 shares by \$126,000—and it is close to 50 cents per share. This is the chance you are taking in every mining venture.

CALUMET & MONTANA CONS. **Violent Advance Predicted**

At current prices in this metal the earnings of the Cobalt producers are very large, and any further advance will make these enormous. Present earnings justify a substantial advance in the Cobalt issues, but, in case of a violent advance in bar sliver, there is no telling how high these stocks will go. My advice is:

BUY THE COBALTS AND DO SO AT ONCE! you are taking it over.

CALUMET & MONTANA CONS.

Engineers believe we are going to develop a good mine—with consistent development time alone will prove that—we simply say we know the company has an ample treasury to thoroughly prove up the ground, and if they win every stockholder will be well repaid for the chance they took—Every investment was a speculation that made good—

The purchase of Calumet & Montana Cons. may prove an excellent investment later on.
