DISTRICT AND GENERAL

The cost of feeding prisoners in London jail is now 16.9 cents per day each.

Blenheim council has refused to grant a second pool room license in that town.

The membership of the Coyne's Corners Farmers' Club is 180, the largest of any club in Elgin county.

It cost Strathroy \$27 to have the town treasurer's books audited by the Provincial Auditors' Department.

Wabash farmers have opened their potato pits and find them in good condition and are selling them at \$4 per bag.

Alleging a sting from a bee caused his son to lose the sight of one eye, a Michigan farmer is suing a neighbor beekeeper for \$10,000.

During the tornado a barn in Wilmette, Ill., was lifted from the air and blown away, leaving a horse standing quietly where his stall had been.

Joseph McTaggart, a live stock man from Alvinston, has purchased from A. Glover the residence on the corner of Queen and Front avenues, Petrolia, formerly occupied by Dr. Smith.

The provincial roadways will be built 66 feet wide and where they pass through towns or incorporated villages the municipalities will have to look after the surface of the streets outside this 66 feet.

Sam Carson has leased for F. J. Carman over two thousand acres of land north of West Lorne for oil purposes. Two drilling rigs will start work in the near future and the field will be thoroughly tested for oil and gas.

Nothing has yet been learned as to who was the thief or thieves who operated in the cloakroom at the veterans' ball in Leamington. In addition to other furs of minor value a \$400 fur coat belonging to Miss Marie Presser was taken.

Last at \$24 a thousand as against \$8 six months ago is a sample of the outrageous jump in building material that has taken place recently. Where is it going to end? Not so many years ago lath could be bought for \$1.50 a thousand.

American buyers continue shipping large quantities of potatoes out of western Ontario, and dealers say the prices of tubers are bound to be affected as a result. Some days as high as twenty-five cars are shipped across the border at Windsor.

The next assessment for the province of Ontario will probably show that the rural population will be less than 900,000, while the urban population will be at least 1,575,000. In 1886 the population of rural Ontario was 1,148,000 but it has been decreasing steadily ever since.

The agricultural committee in the Ontario Legislature has approved the bill introduced by J. G. Lethbridge, West Middlesex, which requires registration of all veterinary surgeons under a board appointed by the Minister of Agriculture. The object of the bill is to protect the veterinary profession against quacks.

For the first time probably within living memory, it is announced that the peach crop of the Niagara district has suffered no harm from the winter frosts. Too bad this should happen just now, when sugar is so dear that most people will not be able to make much use of peaches, or of any other fruit.

The work of equipping Strathroy's new canning factory for the coming season's pack goes merrily on. Workmen are busy all over the big pile of buildings, installing the machinery, all of which is brand new and of the very latest design, and getting the plant ready for operation. The buildings are practically completed.

The Speira farm, which was purchased by D. G. McPherson and J. A. McLean at a cost of \$7,000, has been disposed of, Taylor & Galbraith purchasing the west portion and Dromgole & Skinner the east portion. About eight acres of the farm, which is situated at New Glasgow, has been reserved for a picnic ground.

MELBOURNE

Mr. and Mrs. Robinson and family are holidaying with Mr. and Mrs. Watson of Mt. Carmel.

Miss Anna Bell Parr spent a few days in Toronto this week.

Mrs. John McEachern of Campbellton called on friends here recently.

Miss Bertha Hardy of Ekfrid spent the Easter vacation with her cousin, Miss May Hardy of this village.

Charles Long and Ernest Hardy have been busy sawing logs near Ekfrid for a few weeks.

The friends and neighbors of Mr. and Mrs. Andrew Small of Caradoc met at their home a few evenings ago and presented them with two chairs and a table. A short program of music and speeches was given and Mr. and Mrs. Small were very much pleased.

Mrs. Stephens and daughter Jean of London spent a few days in town. Mrs. Gilbert McLean spent a few days in town last week.

A little ad. will sell it. Three hundred Belgian farm workers are to be brought to Ontario to work in the sugar beet district of south-western Ontario.

GLENCOE BOARD OF TRADE

At the adjourned annual meeting of the Glencoe Industrial Association, held at the town hall on Wednesday evening of last week, notice of motion was given to change the name of the association to that of Board of Trade, and at a subsequent meeting on Monday evening of this week the motion was carried into effect.

At the Wednesday evening meeting the following were elected an executive committee for the ensuing year: J. N. Currie, Dr. Mumford, Gordon Dickson, A. E. Sutherland, R. A. Ed- die, Dr. McLachlan, J. W. Smith, J. A. Jones, B. F. Clarke, A. B. McDonald, L. Suttner and Don H. Love.

At a meeting of the executive, held immediately after, J. N. Currie was re-elected president, and Dr. Mumford was elected vice-president, Gordon Dickson secretary-treasurer and B. F. Clarke corresponding secretary.

On Monday evening the first regular monthly meeting of the board was held, with a good attendance and everybody enthusiastic.

The following committees were appointed:—Publicity—Messrs. Clarke, Sutherland and R. M. McPherson; Local Improvement—L. Suttner, W. A. Currie, Jr., J. W. Smith, Ben Towers and Dr. McLachlan; Information—the president and the chairman of each committee.

Reeve McPherson addressed the meeting on the proposed drainage of the board, to be held on Monday evening, May 10th, will be open to the public and an outside speaker will be secured for the occasion.

DEATH OF W. S. ROGERS

After a short illness there entered into rest at his recent home in London, on Wednesday, April 7, W. S. Rogers, formerly a resident of Glencoe.

Born in Surrey, England, in 1828, Mr. Rogers came to Canada when a young man, settling in Delaware, later coming to Glencoe and making his home here until about two years ago. The blessing of a vigorous constitution enabled Mr. Rogers to enjoy life to an unusual age, and the past winter was spent in comparative health, the last illness being an attack of bronchitis, from which he lived just ten days.

Mr. Rogers was a life-long member of the Church of England and from his early manhood one of the Brotherhood of the Masonic Order. Mrs. Rogers predeceased her husband just eight years.

A large family survives Mr. Rogers, of whom the only son, W. G. Rogers, manager of the Erie Iron Works, lives in St. Thomas.

The funeral was held at his son's residence on Saturday at 1:30 p. m., thence to the old St. Thomas churchyard for burial. The church service was read by Rev. H. Ashby of St. Matthew's, London, and Rev. C. H. P. Owen, rector of St. Thomas, after which Mr. Owen gave a very feeling address, touching upon choosing the better part in clinging to the old doctrine, not being led away by every new phase of thought, and in all proving the value of the simple faith in Christ. The Masonic service was conducted by Rev. W. Andrew of St. Thomas.

HIGHWAY ROUTE CHANGED

According to a statement published on Monday, that portion of the Roosevelt Memorial highway from London west to the United States border will go by way of Chatham and Windsor and not via Sarnia as originally decided.

METCALFE COUNCIL

Metcalfe council met on April 5th. Members all present. Minutes read, approved and signed.

Moved by Hawken and Denning that Mrs. Herd be paid \$15, plank, Quick bridge, div. 1; J. Hodgins, \$8, taking tablet to Napier; F. R. Hamby, \$275, tablet for hall; W. Smith, \$150, S. No. 2; Joe Moore, \$13.20, 36 hours shovelling snow, and \$4.20, work s. r. 20, div. 5; S. Carroll, \$6.50, shovelling snow, rep. culvert and cutting weeds, 9 sideroad, div. 3; J. Sutherland, \$3, shovelling snow, div. 3; N. Munroe, \$45, S. No. 17; T. Brady, \$10, s. l. 1919; F. Merrick, \$17.50, filling holes, townline, half to Ekfrid, div. 4; W. Annett, \$7, filling washout con. 13 and 14; \$9, filling washout townline, half to Caradoc; \$15.00, shovelling snow, div. 4; C. Henry, \$2.40, 9 1/2 hours shovelling snow, div. 4; J. Dewar, \$1.80, 7 hours shovelling snow, div. 5; E. Moore, \$90, S. No. 14; A. D. Campbell, \$2.75, 11 hours shovelling snow, div. 3, half to Brooke; W. Walker, \$5.25, 21 hours shovelling snow, con. 12 and 13, div. 5; D. Galbraith, \$75, S. No. 4.

Moved by Hawken and Blain that the collector's pay be accepted, and the collector be paid \$77.08, salary and postage.

Moved by Blain and Denning that the township order one Road Boss grader.

Moved by Blain and Denning that C. Henry act as commissioner on Clarke drain.

Council adjourned to Monday, May 3rd, at 1 p. m.

Harry Thompson, Clerk.

GLENCOE COUNCIL

Pursuant to adjournment the Glencoe council met in the council chamber on Monday, April 12, 1920, with all the members present. The minutes of the last meeting were read and adopted.

On motion of Messrs. Lumley and McCracken the following accounts were ordered paid:—J. G. Lethbridge, auditing accounts, \$20; J. Y. McLachlan, auditing, \$20; preparing abstract of electric light, \$10; Hydro-Electric Power Commission, supplies as per statement rendered, \$132.

On motion of Messrs. Parrott and Davidson the clerk was instructed to issue an order for \$400 in favor of the public school for part of money due them.

By-law No. 265 was passed authorizing the reeve and treasurer to borrow the sum of \$7,000 from the Merchants Bank for current expenses.

On motion of Messrs. Lumley and Davidson the date for considering the engineer's report on the tiling of Main street was set for 8 o'clock p. m. on Friday, the 23rd day of April, at Loe town hall.

On motion of Messrs. Davidson and Lumley the residents of Currie street were granted the privilege of constructing a cement curb for a boulevard in front of their lots on condition that the same does not extend out over the tile drain on the street.

CHAS. GEORGE, Clerk.

BOWLERS GETTING BUSY

At a well-attended meeting held in the office of Mr. Moss on Friday evening the Glencoe Bowling Club was re-organized for the coming season, with the following officers: Honorary president, J. G. Lethbridge, M. P. P.; president, G. W. Snelgrove; vice-president, Will Currie; secretary-treasurer, Gordon Dickson. Committees were also appointed. Those present as well as many who were unable to attend owing to prior engagements were enthusiastic about the prospects for the coming season and special efforts will be made to increase the membership and widen the interest in the game. Important additions and improvements to the grounds are contemplated. The membership fee is \$5 and may be handed in at the Royal Bank.

DEATH OF MRS. DAN McDOUGALD

Melbourne, April 10.—While Mr. and Mrs. Dan McDougald of Ekfrid were driving to the village yesterday afternoon, Mr. McDougald made a remark to his wife. As she did not answer, he looked up at her and noticed that she was not well, her eyes being closed, and she could not speak. He drove into Mr. Davis' home, about three-quarters of a mile from the village, and Mrs. McDougald was carried into the house. The doctor and her friends were called, but she passed away in a very short time. Her husband and brothers have the sympathy of their many friends in their sad bereavement. Mrs. McDougald was Miss Margaret Stevenson, daughter of the late Allen Stevenson, who resided on the Longwoods Road for many years.

FARMING 15,000 ACRES

Three hundred returned soldiers who have responded to the call to get back to the land are now farming 15,000 acres in the London district, according to a report prepared by officers of the branch of the Dominion Soldier Settlement Board. The majority of the veteran agriculturists are following general farming, few having embarked upon any specializing ventures. Plans are being laid for placing a very large number of Britishers who are expected to come to Western Ontario as the result of the encouragement of such immigration.

HOXIE-JEFFERY

The marriage of Miss Ella Mae, eldest daughter of Mr. and Mrs. B. F. Jeffery, Commercial House, Newbury, and Edwin Hoxie of Detroit was quietly solemnized at the rectory, Wardsville, on Wednesday, April 7, at 4 p. m., by Rev. Mr. Murphy, rector of the Anglican church.

The bride looked charming in a navy chamoise silk suit with sand georgette blouse embroidered in blue and a sand and blue hat, and carried a bouquet of creamy roses and fern. She also wore a handsome locket and chain, an heirloom of her mother's. The groom's gift to the bride was a substantial cheque.

They will visit Toronto, Belmont and Melbourne on their honeymoon. On their return they will reside on Littlebridge avenue, Detroit.

THE SCHOOL FARE MOVEMENT

During the year 1919 the Ontario Department of Agriculture, through its agricultural representatives, distributed seeds and eggs to 78,946 pupils in 3,278 rural schools of the province. R. C. Duncan, B. S. A., writing in the Agricultural Gazette, says that the following quantities were distributed:—1,890 bushels of potatoes, 432 bushels of grain, 12,575 packages of root seeds, 30,700 packages of vegetable seeds, 21,900 packages of flower seeds, and 11,045 dozens of eggs of a breed-to-lay strain of Barred Plymouth Rocks. These figures give some idea of the magnitude of the school fare movement in Ontario.

When Dreams Came True

By BLANCHE GERTRUDE ROBBINS

CHAPTER II.
Captain David was still sitting beside the fire and he stirred it into life as Jean entered the sitting room.

"Have you ever thought how the neighborhood would get along without you if you went away?" he asked gravely.

Jean laughed and threw off her ulster. There were stray locks of black hair blown girlishly about her face and the light of excitement dancing in her eyes. One forgot her thirty odd years.

"I like to help," she answered simply.

Captain David stood suddenly straight and tense against the wall, his keen blue eyes looking down into her face.

"Miss Jean, you are so ready with your help to other folks, I wonder if I could ask help?"

"Surely! I am glad to help you," she responded eagerly.

"You told me your dreams to-night and they aroused in me—old dreams," Captain David explained. "I gave up the sea and came here for ship-building and a home. Like you, I want to live where I can see and hear and feel the sea. I can plan out the building of a schooner but I fail when I try to plan a house. You are a master-builder and I need your help. In your dream house you worked in the honey, sunshiny atmosphere of a housewife, and I am going to build somewhere along the cliff. Will you help me plan and build?"

Startled, Jean McAllister faced her head. Help to build her dream house for another? Yet, she could not refuse this man, who seemed to understand her with such rare sympathy.

"I—I shall be glad to help you," she answered unhesitatingly, then questioned, "When will it be completed? Will you live there alone?"

The man looked thoughtfully into the fire before he answered. The shadow half hid his face.

"I should like the house finished by the last of March. I hope my girl—the dearest girl in all the world—will come to me then. I want the house ready for her in every detail. By myself I should make clumsy work of home building, but if you will help—"

"When do we begin?" questioned Jean breathlessly, her pulses quickening. The house of her dreams to be worked out in reality!

"Perhaps I can prevail upon Uphan, the contractor, to come down early next week and draw our plans. You realize this will encroach upon your precious time."

"It will be a relaxation," Jean responded briefly.

Autumn and winter passed all too quickly for Jean McAllister, the patient pressure of household duties dominating her day, but the evenings were filled with the house-building on the cliff. Captain David was no longer a boarder at the MacAllister home. He and his staff of ship carpenters had provided themselves a sort of barracks in the ship yard. But even after evening he called at the dreary old house of Jean and together they walked down the crowded main thoroughfare of the little town to the beach and out over the cliffs.

Long hours had been spent over the first drawings, Jean suggesting an added window, the widening of a fireplace, or the building in of another cupboard.

Then the stone foundation rose from the ground and the framework spread out ramblingly over the rocks, the friendly face of the house looking out into the Bay.

Early in March the house showed signs of completion. The question of furnishings was confronting Captain David with all seriousness. He stood one evening in the centre of the long living room with its tan walls and mahogany woodwork, looking into the depths of the huge fireplace. Jean, standing in the great sweeping window, which she had flung open, drank in feverishly the salt air, blown across the cliffs with the inrolling tide.

"I have an idea that my girl would like only old, rich furnishings—something romantic. But I do not know where to find them," remarked Captain David, wrinkling his broad forehead.

Why had he never told her this girl's name? Jean wondered. She closed the window abruptly and turned back into the room, her eyes alight with eagerness.

"Oh, I know what she will want—wonderful, old things such as Captain MacKenzie brought home from England sixty years ago," she explained. "He fell in love and captured a girl who was a sort of a Princess, people said, and when he brought her home to Tere Point, down the Bay, he

brought beautiful mahogany furniture to fit up a wonderful home for her. He built an ugly sort of mansion but he often left it for the sea he loved so well. Then there came a day when his ship was never heard of again and the poor little Princess—lady died heartbroken. Captain MacKenzie's heirs had no use for the big, ugly house and no one wanted to buy it or its wonderful furnishings. Perhaps she—your girl—would love the old mahogany things."

Captain David moved impulsively toward the window, looking out across the Bay toward Tere Point.

"Shall we drive over there to-morrow evening and see the furniture? I believe you are a wizard—you always know what I need."

Captain David had never spoken the girl's name, but once Jean overheard Joe twit him, asking when he looked for his "Theodocia." And Captain David, his eyes wonderfully luminous, had answered, "Not before the first of April."

Theodocia! A sweet, old-fashioned name. Jean wondered if she would after all fit into the ecstasy of the house built on the cliff.

She had considered her service to Captain David as a relaxation. Wonderfully the family had aided her, giving her freedom on many evenings. She came often to sit with the children. Even Joe and Haddon spent more evenings at home. She glanced into the full-length mirror that swung with the door of the Dutch-blue bedroom and started. What wonderful things the building of the house had done for her! She had not looked so young for years.

(To be concluded.)

Eyelids of Birds.

The Literary Digest tells us that human beings and most animals have only two eyelids, but that birds and some reptiles have three—two that move up and down, as do our own, and a third that moves like a curtain from the inner corner over the eyeball. In our eye sockets there are two sets of muscles—those that move the ball, six in number, and those that lift and lower the lids. The third eyelid seen in birds has its own set of muscles.

In an interesting address on this third eyelid delivered by Sir John Hutton at the Middlesex Hospital, London, he said, as quoted in the World Magazine:

"The muscular mechanism of the third eyelid, or nictitating membrane, of birds, is easily studied in a turkey, owl, eagle or ostrich. The membrane is neatly folded in the nasal side of the orbit and lies between the eye and the lid. It sweeps across the cornea at right angles to the eyelids. A special gland supplies fluid to facilitate its movement. It is amusing to watch the movements of this membrane, especially in big birds. In the owl it is pearly white. The movement across the eyeball is very deliberate and gives the birds a weird appearance."

When the nictitating membrane glides across the eye like a movable shade on a lamp, or more slowly, producing crescent shapes resembling the phases of the moon, the varying shapes are singularly attractive and unforgettable.

SHE WEARS NOTHING FADED AND SHABBY

But "Diamond Dyes" Her Old Apparel Fresh and New.

Don't worry about perfect results. Use "Diamond Dyes," guaranteed to give a new, rich, fadeless color to any fabric, whether it be wool, silk, linen, cotton or mixed goods.—dresses, blouses, stockings, skirts, children's coats, feathers, draperies, coverings—everything!

The Direction Book with each package tells how to diamond dye over any color.

To match any material, have dealer show you "Diamond Dye" Color Card.

World's Pagan Population.

There are nearly double as many non-Christians as Christians. Here are the approximate figures: Christians, 564,510,000; non-Christians, 1,081,981,000. Total population, 1,646,491,000. It is rather curious to reflect that most of the participants in the great war were Christians.

Keep Minard's Ediment in the house.

Woman's Interests

Planning Simple Menus.
There are three basic principles to follow in menu planning.

1. The foods offered should contribute to body comfort and satisfaction for several hours.
2. There must be some food incapable of complete digestion in every meal. The residue furnishes the "roughage" which prevents constipation and thus contributes to health.
3. The foods should be so balanced that the quality of the body fluid remains normal. That is, that acids formed from the foods are neutralized. Every meal should contain a protein for body building, a starch, sugar or fat for energy and a protective.

One of our most experienced dietitians has said that the standard breakfast menu is:

Cereal, milk, toast, fruit, a beverage.

All cereals and bread are acid-formers. When they are made of grain products from which all of the outer husk has been taken, they are completely digested or nearly so. Consequently the cereal and the toast do not fulfill the second and third rule.

However, we take breakfast foods with milk. This milk is rich in lime and other minerals which neutralize the acids formed by the cereal. But milk is completely digested, again breaking rule two. However, the fruit neutralizes acids and furnishes an indigestible fibre which makes it a balancing food. It is well not to stint on fruit. It is the health promoter. Fresh fruit is rich in protective substances termed vitamins and should be used in abundance.

Farm homes usually add to the above breakfast either bacon or eggs and potatoes. The digestion of bacon and eggs is relatively complete but the potatoes furnish bulk and neutralize the acids.

The use of butter with bread and the fat of bacon prevents too rapid digestion and thus contributes to the comfort and satisfaction of the meal.

Why is a dinner usually planned this way?

A clear soup—meat—vegetables, either alone or in salad—a starchy vegetable as potatoes—a dessert.

What are the unknown rules of health we have been following?

A clear soup is an appetizer and possesses the power of stimulating the appetite without satisfying it in the least; consequently it is an excellent beginning for dinner.

Meat furnishes the protein—muscle building—but because of its acid-forming propensity and too, I believe, because of its intense flavor, we neutralize it with a bland vegetable and for this, nothing excels the potato. Sometimes rice or macaroni are used in place of potatoes, and it should always be remembered that they are cereals necessitating the doubling of the vegetables.

Dessert may be fruit or custards or puddings made of such starchy cereals as rice or tapioca. Fruit needs no accompaniment, but custards and cereal puddings should be served as they usually are, with milk or with a sweet fruit.

Keep in mind the health-promoting, neutralizing vegetables and fruits. Let them appear often and in abundance at each meal. The health of the family will be improved, doctor and medicine bills eliminated, and the work attendant upon correcting ills due to bad food habits so reduced that life will be more full of joy.

A tabulation of foodstuffs is helpful in our study of menus, but there remains the fact, which cannot be overlooked, if our planning is to be successful, that the action of foods is interdependent. Without vegetables and the minerals they contain, meat, milk or eggs cannot build muscle indefinitely. Without the vitamins of vegetables and fruits the growth-stimulant of butter is not so effective. A diet of highly concentrated foods or of highly manufactured foods will not promote health because elimination is not fostered by concentrated foods.

Some of each of the following classes of foods should appear in every menu. Check up the week's plans and see where you stand.

Muscle Builders—Foods rich in protein: Milk, eggs, meat, fish, poultry, cheese.

Work Enablers—Foods rich in starch: Bread, rice, cornmeal, barley, wheat products of all kinds, tapioca, cornstarch, potatoes, bananas.

Foods rich in sugar: Sugar, honey, molasses, corn syrup, maple syrup, jams, jellies.

Foods rich in fats: Butter, bacon, lard, beef suet, vegetable oils.

Comfort and Health Promoters—Foods rich in minerals: Milk, vegetables of all kinds, fruits of all kinds. Protective foods: Vegetables, fruits, all natural foods.

The Home Makers.
"Alexandra! Please tell me what on earth you are doing."

Alex pushed a troublesome lock out of her eyes and sat back on her heels. "Is it really so bad as that? I know I wasn't doing it very well, but at least I thought my occupation was unmistakable. I am upholstering a chair."

"But what for?" Tess demanded. Alex looked at her thoughtfully.

"I suspect my purpose was two-fold. I wanted to show one of my club girls how she could make a pretty room at little expense, and I couldn't show her unless I knew how to do it myself. And incidentally I wanted to see if I could really do anything practical and useful. I think maybe—I got a bit disgusted with myself because I belong to such an incapable generation."

"Why, Alexandra! That's the very wildest of all the wild things I ever heard you say! Haven't we just proved that women could do all sorts of things that they've never done before?"

"What, for instance?"

"Why, Red Cross and first aid and knitting and nursing and driving automobiles and farming and selling Victory Loans."

"All right. Maybe the loans are new, although I have a suspicion that our grandmothers knew how to raise money as well as we do. But in knitting and farming and nursing, how many of us can compare with our grandmothers? Or in sewing and cooking? As for driving cars, they drove horses—that's the chief difference, and it requires quite as much brains to manage a horse as to manage an automobile. Of course we know more about office work; but of home making and neighboring—I wonder!"

"But, Alex, think of their education and ours! Think of their little silly music and their painted shovels and rolling-pins in their guest rooms for ornaments!"

"And we have painted coat hangers, and get our music out of a box. How many girls do you know who can sit down and play accompaniments for anybody to sing? I know just two!"

"What in the world are you trying to prove?" asked Tess a little impatiently.

"Maybe," Alex returned thoughtfully, "I'm not quite sure myself. Our grandmothers at least had guest rooms—they didn't have four room apartments. After all, home making is the greatest profession women ever can have—home making and the things that go to make a home beautiful and friendly and happy. Therefore we can't afford to drop out of our lives anything that will help toward that end. Hence the upholstery lesson to help Cassie make her little home. Do you get me, my dear?"

"No," Tess returned helplessly. "I don't!"

Alex smiled. "If only Cassie will!" she said.

The Meek.

The nations rage, the rulers fight; And all proclaim that might is right; Intrigues are used by small and great And hearts are full of bitter hate; But God goes round the world to seek The meek.

Sharp sounds are heard on every side, Our homes are oft invaded by pride; We try to save our life and name; We will insist upon our fame; But while with bitterness we speak—God seeks the meek.

God loves to dwell in simple hearts, To meek ones He his grace imparts; Commit into His hands thy ways, Trust in His goodness all thy days, Then rest in peace, though poor and weak—God loves the meek.

Odd Birds' Eggs.

Woodpeckers' eggs are of the purest white and so highly polished as to resemble finest porcelain.

The egg of the California partridge is covered with a delicate pinkish bloom which the slightest moisture will destroy. The mere touch of a finger will mar it.

Eggs of certain synchters have their surface marked with fine lines running lengthwise from end to end and looking exactly as if made with pen and ink.

A South American cuckoo lays an egg that has a chalky coat spread over it in such wise as to form a uniform network, the blue color of the shell showing in the spaces between the lines. Thus it looks as if covered with a fine white net.

Hens often lay malformed eggs, some of which are shaped like crooked necks, while others resemble jugs with handles. Now and then an egg of farmyard origin contains a smaller egg, the latter complete, shell and all.

Accurate.

A newspaper editor had a notice stuck up above his desk on which was printed: "Accuracy! Accuracy! Accuracy!" and this notice he always pointed out to new reporters.

One day the youngest member of the staff came in with his report of a public meeting. The editor read it through and came to the sentence: "3,599 eyes were fixed upon the speaker."

"What do you mean by making a silly blunder like that?" he demanded, wrathfully.

"But it is not a blunder," protested the youngster. "There was a c-eyed man in the audience!"

Minard's Ediment used by Physicians.

Sacred Bees.

In Lithuania, when a bee stings a man he turns the other cheek.

And almost literally at that, because it is a sin to kill a bee, and no one ever commits that sin intentionally. As a result of their natural fondness for bees, Lithuanians, with the growth of their economic system, have developed bee raising from a general social custom to an important industry. Thousands of barrels of honey are exported from Lithuania annually.

Almost every one in Lithuania has at least one beehive. Sometimes they have thousands of swarms. But it is common even in the cities to have a man serve you midus that is made from the honey gathered in his garden hive. Midus, the national drink of Lithuania, is made from fermented honey.

Beehives in Lithuania are not the comfortable round loglike huts that are commonly used in Canada. They are built very much like the Lithuanian home, with slanting gable and quaint doorway.

The cottages which they build are considerably larger than the round Canadian hives. Double walls are built so that a protective warmth may be kept in the hives and prevent the bees from freezing during the extreme cold of the long winters. Pine wood is always used because it is supposed to be a greater protection against cold and because it is the most common tree in the forest lands of the country.

It is in the coloring of the hives that the Lithuanian asserts his individuality. The life of the Lithuanian has been starved of liberty and self-expression during centuries. He has been oppressed by Russians—not only his art and his literature but even his language has been suppressed. Now Lithuania has broken free and is asking the world to confirm its emancipation.

During the years of oppression one of the chief amusements and art mediums was the painting of hives. The highest degree of artistic beauty has often resulted. Color combinations of originality and richness were striven for. And it is notable that a bee farmer tried as many different schemes as possible so as to differentiate the hives from one another.

Not a Patent Food

"Give me a dozen bananas for children," said the red-faced man to the fruiterer's assistant.

The young man put them in a parcel.

"And give me some of the other stuff as well—the grocer says he doesn't keep it in stock."

"The other stuff?" said the assistant, with a puzzled look.

"Yes. I ain't good at pronouncing big words, an' I suppose I must have made a mistake with it, for the grocer laughed at me. But it's that there stuff as you say can be given to the kiddies with bananas."

"I'm afraid I don't understand," said the mystified assistant.

"Well, you are a nice man, you are, to be a fruiterer. 'Ere, come outside. An' I'll show you the placard in your window."

So he hauled the young man outside and pointed to the bill, which proclaimed that:—

"Bananas may be given to children with impunity."

It took the assistant a quarter of an hour to convince the red-faced man that "impunity" isn't a new kind of patent food.

Not Quite Indispensable.

"I hear that Herbert Fickett has thrown up his job with the Boynton Company," said Isaac Mason.

"I suppose the business will go on same as usual," Hiram Stubbs returned dryly.

"Well, if it does, I guess it will be kind of a surprise to Herbert," said Isaac. "As I figure it out, he got \$1 into his head that they couldn't get along without him. He'll learn in time that he isn't quite indispensable."

"For that matter, who is?" put in Jacob Marrow. "I calculate there is nobody on a job that somebody else couldn't do as well, or better."

Hiram Stubbs laughed. "Makes me think of Sam Green over at Berry's Falls," he said. "Sam wasn't what you'd call an all-round capable sort of a man, but there was one thing that he thought he could do better than anybody else, and that was to beat the bass drum. He was a big fellow and looked well in uniform; and when there was a procession and Sam would come strutting along, pounding on that drum, the rest of the band didn't seem to be of much consequence."

"Well, one day Sam got mad at something, and he told the leader that he would have to find someone else to play the drum. From remarks that he made outside, it appeared that he thought the band would be broken up. But it wasn't. There was a young chap named Perkins, not overbright, who had been in the habit of following the band and watching Sam play. For all he was only a half-wit, he had an ear for music, or at any rate for time, and the leader let him try his hand at the drum."

"Well, the first time the band appeared on the street after that, there was Perkins swaggering along and making that old drum tell better than Sam ever had. Sam was on the sidewalk watching, and they said he turned all kind of yellow when he saw who was taking his place."

"I guess Sam isn't the only one who has had a jolt to his pride under similar circumstances," said Isaac. "Speaking of Herbert, if I had been going to give him advice when he started in with the Boynton Company, I should have said: 'Now, Herbert, don't you go to putting too high a valuation on yourself. You'll be only one little cog in the wheel. The Boynton Company were on the spot before you joined them, and probably will be there after you've gone. Above all, if you ever do get to the point where you imagine that they need you more than you need them, don't let them know that you think so; if you do, they may try to find out just how well they can get along without you.'"

"Well, I dunno," said old Mr. Potte. "Generally speaking, I believe I should put it a little different to a young fellow just starting out."

"Try to make yourself indispensable," I should say. 'Of course you won't completely succeed—nobody can. But if you aim at that, you are more likely to make yourself at least valuable.'"

"And try to cultivate plenty of self-esteem," I should tell him. "You don't need to show it off before folks; but think highly of your capacity and character, and then see that you come up to your own estimate."

"Well, there," said Horace Marks, who had been a silent but interested listener. "I shouldn't wonder if that was about the line Herbert has been carrying out. I met the treasurer of the Boynton Company yesterday—he's a cousin of mine—and he told me they thought a lot of Herbert. To be sure, they did let him go. But it was only because they wouldn't stand in the way of his interests. Herbert is leaving to take a position with a larger concern. It was largely on their recommendation that he got the place."

"So that was the way of it," said Isaac Mason.

Ancient Welch Town to be Auctioned.

A large portion of the town of Merthyr Tydfil is to be sold, says a London despatch. The sale, which includes the ground rents and reversionary interests in the old Court estate, will include the major portion of the main thoroughfare, the High street, the Market house and the old Court House.

The old Court House has been used for some years as a Rowton lodge house, but it is believed to have been built more than 800 years ago by the famous Welsh chieftain, Ior Bach.

Seventy years ago, whilst the Court House was being repaired, an old room was discovered in the massive walls, and some pieces of oak furniture of Tudor character were found among the lumber with which the room was filled. They were in a fair state of preservation.

Ypres Cloth Hall to be a Monument.

A large party of skilled workmen will soon be sent here by the Belgian Government to make permanent the ruins of the ancient Cloth Hall and the famous church of St. Martin and a lasting monument to the martyrdom of the town of Ypres, says a despatch from Ypres.

The ruins will be left essentially as they are to-day, but will be skillfully reinforced by artisans so as to preserve their present appearance.

King George of Great Britain has decided to come personally to Ypres to present to the heroic town the British Military Medal.

Your Miracle Gland.

Owing to the announcement of recent discoveries in connection with that apparently miracle-working gland of the human body, called the thyroid, people have been making anxious inquiries respecting the exact whereabouts of this rather elusive organ. Unfortunately, the normal thyroid gland is difficult to feel, as it lies on either side of the most prominent part of the windpipe below the Adam's apple. On the other hand, when diseased, as in the case of a sufferer from goitre, this gland is very much in evidence.

It is, therefore, never safe to conclude, as a result of a physical examination of the neck, that the functions of the gland are not being properly performed. These functions, when efficiently performed, are the cause of a large variety of unpleasant symptoms; and when they cease altogether produce in the young arrest of mental and bodily development, and in grown-ups the malady called myxedema—a condition well described as a "caricature of obesity," the tissues becoming infiltrated, not with fat, but with a colloidal or gum-like deposit.

Many years ago it had become obvious to observers that the thyroid gland was so important to the economy of the body that any diminution in its secretion would be reflected in a great many directions. Indeed, one foreign writer contended that if the activities of the thyroid gland could be maintained unimpaired, the condition of old age could never arise.

Today's discoveries in the Oxford laboratories would seem to lend support to this contention. In December last Mr. Julian Huxley discovered that, by giving a preparation of the thyroid gland of any animal to tadpoles, those would change into frogs in three weeks instead of taking three months.

But he has gone one better than that. To the Mexican tadpole-like creature with a name almost as peculiar as itself (axolotl) he has given thyroid, as a result of which this creature, which has only two or three times in its known history developed into a sort of frog or salamander, has been persuaded to make the complete transformation, and even to develop certain joint peculiarities never previously observed.

Mr. Kendall, an American chemist, using iodine as a basis (because it has long been known that iodine is a constituent part of thyroid secretion), has made in his laboratory a chemical essence, which can produce much the same changes as does the real gland itself.

But it is the extract of the real gland itself that is "the thing." It is the nearest approach to the elixir of life that science has discovered. The administration of this extract is a much more practicable and pleasant mode of conserving or restoring the freshness and vigor of comparative youth than that of grafting the glands of goats or monkeys.

One of the most important functions of the thyroid gland is the raising of the time scale in the process of bone-building in the infant. When the secretion of this gland is deficient, the bones of the young child fail to develop the necessary solidity and strength, with the result that the disease known as rickets is induced.

Thyroid inefficiency is a cause of adenoids, of enlarged lymphatic glands in the necks of weakly children, and of diminished powers of resistance to infective diseases, such as mumps, measles, German measles, and scarlet fever.

Many cases of rheumatoid arthritis and St. Vitus' dance, of subnormal temperature, of premature greyness of the hair and baldness, of porriasis and eczema, and of undue sensitiveness to cold have been for long known to be due to deficiency of thyroid secretion.

The Footpath to Peace.

To be glad of life, because it gives you the chance to love and to work and to play and to look up at the stars; to be satisfied with your possession, but not contented with yourself; until you have made the most of them; to despise nothing in the world except falsehood and meanness; and to fear nothing except cowardice; to be governed by your admirations rather than by your disgusts; to covet nothing that is your neighbor's except his kindness of heart and gentleness of manners; to think seldom of your enemies, often of your friends, and every day of Christ; and to spend as much time as you can with body and with spirit in God's out-of-doors—these are little guide posts on the footpath of peace.—Henry Van Dyke.

He Was Handicapped.

A small boy and girl were each striving to outdo the other in an argument, and, in spite of her endeavors, he was winning. The inspiration came.

"Well, anyway, my father's taller'n yours," she asserted, triumphantly.

He dug his toes in the sand. Undoubtedly his father was a very small man. Suddenly he straightened. A look of triumph flashed from his eyes.

"Humph! My father 'ud be twice as tall as yours, but his s'penders holds him down."

Do not throw hard, dry lemons away, but put them in a vessel and cover them with boiling water, place a cover over the pan and let them stand for two hours, and they will be almost as good as new.

Enterprise is a sprout that is grained by experience.

A GOOD MEDICINE FOR SPRING USE

Harsh Purgatives Should be Avoided—A Tonic Will Restore Your Energy.

Not exactly sick but not feeling quite well. That is the way thousands of people feel in the spring. It is a sign that the trying indoor life of winter has left its mark upon you. Easily tired, appetite flicks, sometimes headaches and a feeling of depression. Pimples or eruptions may appear on the skin, or there may be twinges of rheumatism or neuralgia. Any of these indicate that the blood is out of order, and these symptoms may easily develop into more serious trouble.

Do not dose yourself with purgatives so many people do, in the hope that you can put your blood right. Purgatives gallop through the system and weaken instead of giving strength. Any doctor will tell you that this is true. What you need in the spring is a tonic that will build up the blood and nerve. Dr. Williams' Pink Pills can do this speedily and surely. This medicine enriches the blood, clears the skin, improves the appetite and makes tired, depressed men, women and children bright, active and strong. As an example of the value of these pills we give the statement of Mrs. S. S. McBurnie, Tatamagouche, N.S., who says:—"I have good reason to speak in the highest terms of Dr. Williams' Pink Pills. I was badly run down, falling in weight, and suffering from dizzy spells and weakness. In fact my condition was such that I was hardly able to do my housework. A friend advised me to try Dr. Williams' Pink Pills, and after using several boxes there was a noticeable improvement. I continued using the pills for some time longer and found that I had fully regained my old time health and strength and was able to do my housework without feeling weak and worn out as I did before I began using the pills."

Dr. Williams' Pink Pills can be obtained from any dealer in medicine or by mail at 50 cents a box or six boxes for \$2.50 from The Dr. Williams' Medicine Co., Brockville, Ont.

Slash-Burning is Good Business.

All forestry authorities agree that our great problem in Canada, in the conservation of timber resources, is the forest fire. It is almost as generally admitted that slash, left in the woods after logging operations, has been the contributing cause of most of our serious fires. The slash very often causes a comparatively harmless ground fire to develop into a crown fire which destroys miles of green timber.

Forestry practice in Europe has for many years included the disposal of slash in all logging operations, but operators in Canada, until recently, were loath to adopt such measures. It is, therefore, gratifying to find some companies now voluntarily carrying on slash-burning purely as an insurance against fire.

The Schroeder Mills and Timber Co., with headquarters in Milwaukee, and operations in Florida, Michigan and Ontario, has evidently decided that slash-burning is good business. This company, in its operations south of the French river in Parry Sound District, Ont., last spring, burned the slash in especially vulnerable places, such as around camps, along "candle" roads, and belts along their remaining green timber. The walking boss of the company, in conversation with an officer of the Commission of Conservation, said that, after spending a considerable sum of money on this work, he thought the company might object to the expense involved, but he was informed by them that they considered it the best form of fire insurance. The men on the ground now agree with the boss and officer in this policy, and the work is to be carried on in the future, probably more extensively.

The experience of this company should assist in securing co-operation from operators, if slash-burning is, at any time in the future, made compulsory. If, eventually, lumbermen realize that slash-burning is not as coercive, but as protection to themselves, while a benefit to the country at large, forest administration and forest utilization will find much in harmony. Such harmony is absolutely necessary if conservation of our timber resources is to be made practical.

Farming, Labor and Capital are like the three legs of a stool. If one of the three breaks the stool topples over.

Lightning Dangers of Spring-time.

Though electric storms reach their highest frequency during the heat of summer, they often occur in the spring, and fire losses caused by lightning are by no means unknown in April and May.

Lightning rods have proved an almost absolute protection. Only in very rare instances have they been known to fail, and, even in these cases, the failure was probably due to defect in installation or to deterioration.

Examine your lightning rod installations for broken insulators, but bends in the cable which allow contact with the framework, or for corrosion where it enters the earth. The latter is an important point. The electricity is carried into the ground by means of fine rods, but, if it corrodes, and the ground connection is thereby broken, a fire is very liable to result. See to it that the cable is sound and is deep enough in the ground to always be in damp earth.

When building wire fences it is advisable to use ground wires about every five rods. Lightning is attracted by wire fencing and, as during a storm, animals will congregate near fences, many of them are killed by contact with the wire. These ground wires may be of about No. 9 gauge wire, given one turn around each strand of the fence, and carried into the earth beside the fencepost.

THANKFUL MOTHERS

Once a mother has used Baby's Own Tablets for her little ones she would use nothing else. The Tablets give such results that the mother has nothing but words of praise and thankfulness for them. Among the thousands of mothers throughout Canada who praise the Tablets is Mrs. David A. Anderson, New Glasgow, N.S., who writes:—"I have used Baby's Own Tablets for my children and from my experience I would not be without them. I would urge every other mother to keep a box of the Tablets in the house. The Tablets are a mild but thorough laxative which regulate the bowels and sweeten the stomach; drive out constipation and indigestion; break up colds and simple fevers; and make teething easy. They are sold by medicine dealers or by mail at 25 cents a box from The Dr. Williams' Medicine Co., Brockville, Ont.

Exhaustion of Southern Pine.

According to a bulletin just issued by the Spruce Production Corporation of the United States War Department, only four mills out of 2,043 southern pine mills have timber supplies (southern pine) which will last more than twenty years. More than 1,600 mills will have exhausted their supplies in five years or less, and more than 1,900 mills in ten years or less. Attention is drawn to the fact that this rapidly approaching depletion, coupled with an expanding world market for timber, is bound to result in heavier demands upon the great timber areas of the Pacific coast and Canada. The present generation of timbermen in Canada will probably benefit as a result. This benefit may be extended to posterity if the short-sighted policy of the southern lumbermen is avoided.

Carelessness in Handling Matches.

Matches are the immediate cause of many of our latest fire losses, and probably the majority of smaller fires could be traced to this same source.

More than one factory in Canada has gone down to ruins; many employees have been thrown out of employment, and their families have suffered want; many employees have seen the result of their carelessness crumble—all the result of carelessness with matches. The number of fires in business places shortly after closing time is remarkable. Investigation has shown that these are nearly always due to employees dropping unextinguished matches after lighting pipes or cigarettes. Especially is this the case during the cold weather, when employees, regardless of "no smoking" rules, will "light up" before buttoning up their overcoats.

Many cases may be cited of fires caused by matches. For instance, the coat and vest of an employee were hanging in a draught, and the swaying of the clothes against the wall lighted the matches in the vest pocket. During the war, an inspector, inadvertently, carried a match into an explosives plant, but, knowing the danger, he chewed the match up and swallowed it.

If but a fraction of this recognition of the danger of matches could be impressed upon workers, much of our fire waste would be avoided, and the work necessary to replace this loss could be devoted to more productive efforts.

Oh, Sugar!

Mrs. Neward—"What kind of sugar is this?"

Grocer—"Best beet, lady, very refined."

Mrs. Neward—"But haven't you the proper kind to use on sliced tomatoes?"

Jewish women in Palestine have been granted the vote and are eligible for election in the constitutional Assembly.

Eating Money.

A Swiss hotelkeeper has papered his salon with banknotes. The cost has proved very little above the normal price demanded for first-class wall-paper. Doubtless the inflated hotel receipts for permission to view the novelty will more than cover this small deficit.

This abnormal state of affairs is due, of course, to the collapse in the exchange, rendering paper marks and crowns of small material worth.

Banknotes of smaller value still furnished a century ago, although no one ever thought to use them for house-decorating purposes. In England, the twopenny banknote was at one time obtainable, while the 2½d. banknote held its own in Austria for a considerable period. Real, genuine five-pounders were, however, used by a multi-millionaire, who accepted a challenge to utilize several of these crisp squares for pipe-lights.

A French gourmet found an equally novel way of wasting money. He substituted a dish of banknotes for hors d'oeuvre, and ate the lot. Now, we are content to see such official scraps of paper represented in the form of beef and mutton, and possess no cravings after the real thing, however edible it may prove.

Spanish Flu

Claims Many Victims in Canada and should be guarded against.

Minard's Liniment

Is a Great Preventative, being one of the oldest remedies used. Minard's Liniment has cured thousands of cases of Grippe, Bronchitis, Sore Throat, Asthma and similar diseases. It is an Eminent Remedy for all ailments of the throat, chest and lungs. Thousands of bottles being used every day, for sale by all druggists and general dealers.

MINARD'S LINIMENT CO., LIMITED, Yarmouth, N.S.

Origin of Fountain Lion.

The water in a great many public fountains, whether for man or beast, comes out of a lion's mouth. This is said to be the reason: Among the ancient Egyptians the rising of the waters of the River Nile was the most important event of the year, since it meant life and property to the whole nation. The rising always took place when the sun was in the constellation of Leo, or the lion; so the Egyptians adopted the shape of a lion as the symbol for the life-giving waters of the Nile.

MONEY ORDERS.

Send a Dominion Express Money Order. They are payable everywhere.

To prevent raisins, currants, or citron from sinking to the bottom of a cake, wash them well in the oven before adding them to the batter.

GRUMPY?

If Constipated, Bilious or Headachy, take "Cascarets"

Brain foggy? Blue devils got you? Don't stay sick, bilious, headachy, constipated. Remove the liver and bowel poison which is keeping your head dizzy, your tongue coated, your breath bad and stomach sour. Why not spend a few cents for a box of Cascarets and enjoy the nicest, gentlest laxative-cathartic you ever experienced? Cascarets never gripe, sicken or inconvenience one like Salts, Oil, Calomel or harsh Pills. They work while you sleep.

America's Pioneer Dog Remedies Book on DOG DISEASES and How to Feed and Train Your Dog. Made Free to any Address by the Author. M. Clay Glover Co., Inc., 115 West 21st Street, New York, U.S.A.

BITS OF HUMOR

FROM HERE & THERE

Thrift.

Mrs. Thrifty—"Remember that there must be no extravagance while I am away."

Servant—"Yes, ma'am."

"And be sure to take off Master Bobby's glasses when he's not looking at anything."

Adam's Good Luck.

Little Charles had just been chastised by his father for some misdeed.

"Mother," he asked, after his walls had dried down, "was Adam the first man?"

"Yes, dear."

"Didn't he have any father?"

"Of course not," said Charles' mother, wondering what was coming next.

"Well," said the little fellow, "he was lucky!"

Ask for Minard's and take no other.

Given Away?

"What's the time?" asked a man who rushed into a clothing store.

"Twenty minutes after five," said the brisk salesman. "What can I do for you?"

"I want those trousers," said the caller, leading the way to the window and pointing to a ticket marked, "Given away at 5.20!"

Make the hens work for what they get. Unless they have to scratch for their feed they become lazy parasites, just like folks.

SATISFYING RELIEF FROM LUMBAGO

Sloan's Liniment has the punch that relieves rheumatic twinges

WOOD ASKED.

IF YOU HAVE A CAR FOR SALE write me. Geo. Stevens, 364 Mark Street, Peterboro.

SCRAP IRON.

IF YOU HAVE A FIRE AND HAVE a car or more of scrap iron I will come and quote you where it lays. Geo. Stevens, 364 Mark Street, Peterboro.

MISCELLANEOUS

CANCER, TUMORS, LUMPS, ETC., internal and external, cured without pain by our home treatment. Write us before too late. Dr. Bellman Medical Co., Limited, Collingwood, Ont.

Lampblack is a poor conductor of heat. It should therefore be removed from kettles and saucepans.

LET "DANDERINE" BEAUTIFY HAIR

Girls! Have a mass of long, thick, gleamy hair

Let "Danderine" save your hair and double its beauty. You can have lots of long, thick, strong, lustrous hair. Don't let it stay lifeless, thin, scraggly or falling. Bring back its color, vigor and vitality.

Get a 35-cent bottle of delightful "Danderine" at any drug or toilet counter to freshen your scalp; check dandruff and falling hair. Your hair needs this stimulating tonic, then its life, color, brightness and abundance will return—Hurry!

Cuticura Hair Is Usually Thick and Healthy

Start him right if you wish him to have thick, healthy hair through life. Regular shampooing with Cuticura Soap will keep his scalp clean and healthy. Before shampooing touch spots of dandruff and itching, if any, with Cuticura Ointment. A clean, healthy scalp means good hair.

Soap 25c, Ointment 25c and 50c. Sold throughout Dominion. Canadian Depot: Larnach, Limited, St. Paul St., Montreal.

25c Cuticura Soap shows without soap.

ONLY TABLETS MARKED "BAYER" ARE ASPIRIN

Not Aspirin at All without the "Bayer Cross"

For Colds, Pain, Headache, Neuralgia, Toothache, Earache, and for Rheumatism, Lumbago, Sciatica, Neuritis, take Aspirin marked with the name "Bayer" or you are not taking Aspirin at all.

Accept only "Bayer Tablets of Aspirin" as an unbroken "Bayer" also sell larger "Bayer" packages.

There is only one Aspirin—"Bayer"—You must say "Bayer!"

Aspirin is the true mark registered in Canada by Bayer Manufacturers of Monacalacetate of Salicylic Acid. While it is well known that Aspirin means Bayer manufacture, to prevent the public against imitations, the Tablets of Bayer Company will be stamped with their general trade mark, the "Bayer Cross."

Good Style

Our values are exceptional. Our styles are
correct. Serviceable Working Men's Shoes.
Serviceable School Shoes. Smart Fitting.
Shapely Dress Shoes.

J. N. CURRIE & CO.

"That's the Bike I Want, Dad"

"It's one like Bob Harding's."
"He isn't a bit stronger than I am, Dad.
But he can always trim me, no matter how
hard I strain. My cheap old bike doesn't run
as easy as his C.C.M."
"This is the third season for his C.C.M., too,
and it runs just like new."
"Is that so, Jimmy?"
"Yes, there's good stuff in the C.C.M., Dad."
"It's a beauty to look at, Jimmy."
"Sure. And the swell nickelling and bright
enamelling won't wear off."
"When Bob's C.C.M. gets dusty he wipes her
off and she looks just like new."
"Oh, well, Jimmy, I see your heart's set on a
C.C.M. If you'll promise to study hard and pass
into the next room, I'll give you a C.C.M. Bicycle."
C.C.M. Bicycles are the pride of the boys. They
have earned their good reputation by standing up
under the extra strain and wear that sturdy, active
lads are bound to give a bicycle.
The C.C.M. has the new Hercules Positive Drive
Brake—the Coaster Brake without a side arm.
Ask the C.C.M. dealer to show you the 18-inch
curved bar model—the bicycle the boy won't
outgrow.

The Transcript

Published every Thursday morning
from The Transcript Building, Main
Street, Glencoe, Ontario. Subscrip-
tion—in Canada, \$1.50 per year; in
the United States, \$2.00 per year—
payable in advance.

Advertising.—The Transcript has a
large and constantly growing cir-
culation. A limited amount of adver-
tising will be accepted, at moderate
rates. Prices on application.

Job Printing.—The Jobbing Depart-
ment has superior equipment for
turning out promptly books, pam-
phlets, circulars, posters, blank
forms, programs, cards, envelopes,
office and wedding stationery, etc.

A. E. Sutherland, Publisher.

THURSDAY, APRIL 15, 1920

A New Yorker visiting this country
warns Canadians not to pay too much
attention to what they hear from the
United States until after next Novem-
ber, when the Presidential election
will be over. Evidently the British
lion is to undergo an especially severe
session of tail-twisting. He can stand it.

Notwithstanding the argument of
The Globe, the Provincial Government
will do well to inquire most carefully
into the prospects of hydro-radials be-
fore assuming any responsibility for
them. It is all right to be "progressive,"
but the province has other things
to do than to provide money for elec-
tric railways for the Toronto district.
The electors of Ontario look to the
Drury Government to protect the in-
terests of the whole province.

The Detroit Free Press reminded its
readers the other day that it was just
twenty-two years ago that the first
automobile was sold commercially in
the United States, but neither the
buyer nor the seller imagined for a
moment that the transaction was the
beginning of a business that would
employ billions of capital and many
hundreds of thousands of men before
a quarter of a century had passed.
They would probably have laughed
had they been told that in twenty
years the manufacture of what they
then called "horseless wagons" would
be the third most important industry,
that the motor car would revolution-
ize transportation to a great extent,
drive horses from the cities, and to a
very great extent from armies, yet it
has done all this and more.

Two important announcements by
the government featured what was
otherwise a dull day in the house of
commons. The first of these was the
statement by Acting Premier Sir Geo.
Foster, shortly after the opening, at
three o'clock, that the government had
not changed its mind in regard to the
granting of a cash bonus to returned
soldiers, and that it did not consider
it a wise measure of re-establishment
to place a lump sum of money in the
hands of each returned man. The
second announcement, also from the
acting premier, in answer to a ques-
tion by J. E. Armstrong (Lambton),
was to the effect that the government
had no daylight saving bill under con-
templation at the present time. Day-
light saving, Sir George said, was en-
tirely a matter for the towns and vil-
lages which wished to adopt it.

SCHOOL REPORTS

S. S. No. 8, Ekfrid
The following is the report for S.
S. No. 8, Ekfrid, for March, the names
being in order of merit. Those marked
with an asterisk were absent for
one or more examinations:

IV.—Stanley Hyndman, John Allan,
*William Trestrain, *Flora McRae,
Gladys McEachren, *Jessie Allan,
*Philip McRae.

III.—James Coad, *Mac McRae,
*James Brown.

II.—Phemie McEachren, Ross Allan,
*Norman Reath, *Marion Dobie,
*Mandie Allan, *Dan Brown, *George
Berdan.

I.—*Frank Brown, Isabel McAlpine,

ards 71, Dora Alexander 70, Jean Mc-
Roberts 66.6, Anna McGugan 66.3, Ev-
elyn Cawthorpe 65.6, Kenneth McLean
65.3, Gordon Richards 60.8, Edward
Bateman 57.3, *Sarah Switzer 52.4,
Irene Seburn 52.2, *Ina Campbell 52,
Annie Johnson 51.8, Sadie Johnson
49.7, Murray Laing 48.9, *Lena Mc-
Lean 40.6, *Rena McCracken 40.6,
*Martha Hiscox 40.6.

Form I.—Hettie Cawthorpe 69, Avis
McRoberts 66, Agnes Alexander 65,
Mary Edwards 59, Louise Warren 55,
Charles Kapayo 53.8, Stella Long 53,
*Arthur Elder 52.

Roads Seem Pressed Flat By Wonderful New Triplex Springs

THE wonderful Triplex
Springs of Overland 4 ef-
fect such a change in riding
comfort that bad roads now
seem to ride like good roads.

Overland 4 has the steadiness
of larger cars of long wheel-
base, with the light weight,

ease of control and low fuel
and tire expense of 100-inch
wheelbase.

Equipment, including Elec-
tric starting and lighting, is
high class, in keeping with the
general character of the car.

Do not forget
to file your

Income Tax Return

on or before the 30th of April, 1920.

Dominion of Canada

Department of Finance

ALL persons residing in Canada, em-
ployed in Canada, or carrying on
business in Canada, are liable to a tax
on income, as follows:—

1. Every unmarried person, or widow, or
widower, without dependants as defined by the
Act, who during the calendar year 1919 received or
earned \$1,000 or more.
2. All other individuals who during the
calendar year 1919 received or earned \$2,000 or
more.
3. Every corporation and joint stock company
whose profits exceeded \$2,000 during the fiscal
year ended in 1919.

Forms to be used in filing
returns on or before
the 30th of April, 1920.

ALL INDIVIDUALS other than
farmers and ranchers must use
Form T. 1.

FARMERS AND RANCHERS
must use Form T. 1A.

CORPORATIONS and joint
stock companies must use Form
T. 2.

Penalty

Every person required to make a return, who
fails to do so within the time limit, shall be
subject to a penalty of Twenty-five per centum
of the amount of the tax payable.

Any person, whether taxable, or otherwise,
who fails to make a return or provide infor-
mation duly required according to the provision
of the Act, shall be liable on summary conviction
to a penalty of \$100 for each day during
which the default continues. Also any person
making a false statement in any return or in
any information required by the Minister, shall
be liable, on summary conviction, to a penalty
not exceeding \$10,000, or to six months' imprison-
ment or to both fine and imprisonment.

General Instructions.

Obtain Forms from the Inspectors or
Assistant Inspectors of Taxation or from
Postmasters.

Read carefully all instructions on
Form before filling it in.

Prepay postage on letters and docu-
ments forwarded by mail to Inspectors of
Taxation.

Make your returns promptly and avoid
penalties.

Born

PALMER.—At Glencoe on Monday, April 12, 1920, to Mr. and Mrs. George Palmer (nee Sarah Munroe) of 192 Elm street, St. Thomas, a daughter.

Died

ROGERS.—Entered into rest at his home, 1016 1/2 Dundas street, London, Ont., on April 8, 1920, William Samuel Rogers (late of this village), his 92nd year. Buried in the old St. Thomas churchyard, St. Thomas, on Saturday, April 10.

In Memoriam

In loving memory of May Stuart Waterworth, beloved wife of Roy Waterworth, who died one year ago, April 9, 1919.

We little thought her death so near. And only those who love can tell The pain of not saying a last farewell. When at times they see us smile. But they little know the sorrow That those smiles hide all the while. —Sadly missed by the family.

TOWN AND VICINITY

March is surely paying big interest for the days borrowed from April. Godfrey McMurchy is doing well after an operation for appendicitis at London.

Joseph Grant has received news of the death of his mother in Buckle, Scotland.

So far, snow has fallen every day since the first of April, says the St. Thomas Times-Journal.

Donald Gillies, one of the oldest residents of Moss township, is reported to be in very poor health.

The young ladies of Appin are holding an assembly in the town hall there on Wednesday evening, April 21st.

D. G. McEachren has bought the north fifty acres of the Toon farm from F. G. Humphries. Price \$3,500.

The Glencoe dealers are out of both coal and wood. Worse than that, many of the consumers are out of fuel also.

Reeve Allan McPherson was in Toronto last week attending the annual meeting of the Retail Coal Dealers' Association.

George Hurley was operated on for appendicitis at St. Joseph's Hospital, London, on Tuesday, and is reported to be doing well.

That which people sow they shall also reap does not always apply to the pictures on the seed packages displayed in the store windows.

Coal prices, we are now told, are likely to drop in a short time, and we are advised not to get into a panic over next winter's supply.

The death occurred quite suddenly at her home at Outlook, Sask., last Thursday of Mrs. Fred Reid, formerly Miss Emma Hull of Glencoe.

Tell us, ye winged wintry winds, Is winter never going to end?

That's what we want to know.

Hugh B. McNeil of Detroit has sold his 50-acre pasture farm in Moss, being part of the north half of lot 3 in the fifth concession, to Robert W. McKellar.

Mr. and Mrs. Tom Tait have moved to London for a short time until they get a house in St. Thomas where Mr. Tait is taking up Government electric battery service work.

G. W. Thompson, accountant in the branch of the Merchants Bank at St. Thomas and formerly of Glencoe, has been promoted to the management of the branch at West Lorne.

The Fletcher Manufacturing Company, through their managers, Fred and Alfred Aldred, paid out \$24,000 in wages to employees at the Glencoe branch of their works last year.

The Transcript is still receiving donations to the Armenian Relief Fund and will be making a remittance next week. If you have not yet given a donation let us have it within the next few days.

The Jordans, musical entertainers, were greeted with a good house on Friday night. The concert was a most enjoyable one, the performers keeping the audience pleasantly entertained from start to finish. This completes the Chautauqua series.

The twenty-seventh anniversary of the building of St. John's Anglican church was celebrated on Tuesday evening by a "birthday party" held in the Sunday school room. The affair was largely attended and realized upwards of a hundred dollars. An informal program of musical numbers was given and lunch was served. Solos by Miss Ruth Owen of Tyrone, Mrs. McEachie, H. K. Charlton and Stanley Humphries were greatly appreciated.

Capt. Archibald McLachlan, who for more than forty years had been associated with the Detroit and Cleveland Navigation Co. and for more than a quarter of a century master of the company's steamer City of Cleveland between Detroit and Cleveland; died at his home in Detroit last week. Capt. McLachlan came to Canada from North Knapdale, Argyshire, Scotland, when 18 years old and spent a short time on his father's farm near Glencoe before making his home in Detroit. He leaves a widow, Mrs. Flora McLachlan.

AUCTION SALES

Clearing auction sale of farm stock and implements at John B. McNeil's, lot 29, con. 6, township of Brooke, on Thursday, April 15th.—Dan McIntyre, auctioneer.

On north half of north half of lot 13, second range north of L. W. R., 2 miles east of Newbury, on Saturday, April 17, at 1 o'clock—1 year horse, 11 years old; 1 bay mare, 7 years old; 5 heifers, 2 years old; 2 steers, 2 years old; 1 mow, 1 year; 1 hay rake, 1 year; 1 set of disc; 1 plow, No. 2 Cockshutt; 1 set iron harrows; 1 corn scuffer; 1 heavy wagon; 1 Gladstone buggy; 1 open buggy; 1 cutter; 1 Chas. mill and bagger; good as new; 1 set of sleighs; 1 set of single harness; 1 set of heavy harness, good; 2 corn planters; 1 stack of timothy hay; 2 tons of hay in barn; 125 bus. of 1918 oats; 40 bus. of 1919 oats; neckyokes, whiffletrees, spades, shovels, hoes and a number of other useful articles.—George Everett, proprietor; Hugh D. McNaughton, auctioneer.

Having opened up business in the shop lately vacated by Mr. Morley, I am now prepared to do jobbing and horseshoeing. A share of your patronage solicited.—Peter McCracken.

I have one good-as-new 8-16 oil burner International tractor just used two years, for less than half price—just \$500.—Wm. McCallum.

Having taken over the agency for the Great-West Life Assurance Co., recently held by C. B. McLean, I will be glad to furnish full information to anyone interested.—Mac. M. McAlpine.

What about some insurance this spring? We carry every line. Have a talk with one of our salesmen about a twenty-year policy, or see H. J. Jamieson, District Manager; office, Main street.

The Epworth League will give a social evening in the Methodist church on Monday, April 19. The fee will be one cent for each inch of your waist measure. Everybody invited. Good time assured.

Don't forget the social evening to be held under the auspices of the Ross Mission Band in the lecture room of the Presbyterian church on Tuesday evening, April 20, at 8 o'clock. Splendid games and a musical program. Lunch will be served. Admission, 15 cents.

Big ten-day sale of overalls and shirts. Overalls at \$2, \$2.25, \$2.50, and the best made at \$2.95. These prices are less than the manufacturers' prices. It will pay you to buy at this sale as prices will have to go higher after the ten days are up.—D. Lamont.

Special services will be held in Appin Presbyterian church beginning Sunday morning, April 18, and continuing until May 24. Sunday services at 11 a.m. and 7.30 p.m. Week nights, except Saturday, at 8 o'clock. Rev. D. J. Craig of Toronto will be the speaker, assisted by T. H. Nichol of London, soloist and director of song.

PERSONAL AND SOCIAL

—Mrs. McBain of Winnipeg is visiting her daughter, Mrs. J. Grant.

—Mrs. George McCallum was on a visit to relatives in Toronto for a few days.

—Mrs. F. Waterworth and daughter Madeline spent the holiday with Mr. and Mrs. A. B. Sinclair.

—Miss Mary Hodge of Windsor spent the Easter holidays with her aunt, Mrs. Thomas Stinson, Moss.

—Mrs. (Rev.) G. I. Kerr of Gorrie has returned home after spending a couple of weeks here with her mother, Mrs. Wm. Weekes.

—Miss Annie Aldred returned yesterday to St. Margaret's College, Toronto, after spending the Easter holidays at her home here.

—Master Jack McCallum has returned home after spending a week with his friend, Billie Bethune, of 413 Queen's avenue, London.

—D. W. J. Weekes of London has returned from Bermuda and visited his mother, Mrs. Wm. Weekes, and other relatives here on Wednesday.

—Warren McAlpine left on Tuesday for the West where he will be in charge of a mission station in the colony of Kindersley for the summer months.

TENDERS FOR COAL

SEALED TENDERS addressed to the undersigned and endorsed "Tender for Coal for the Dominion Buildings, Ontario and Quebec," will be received at this office until 12 o'clock noon, Thursday, April 29, 1920, for the supply of coal for the Dominion Buildings throughout the provinces of Ontario and Quebec.

Combined specification and form of tender can be obtained from the Purchasing Agent, Department of Public Works, Ottawa, and from the Caretakers of the different Dominion Buildings.

Tenders will not be considered unless made on the forms supplied by the Department and in accordance with the conditions set forth therein.

Each tender must be accompanied by an accepted cheque on a chartered bank payable to the order of the Minister of Public Works, equal to 10 p. c. of the amount of the tender. War Loan Bonds of the Dominion will also be accepted as security, or war bonds and cheques if required to make up an odd amount.

By order, R. C. DESROCHERS, Secretary, Department of Public Works, Ottawa, April 3, 1920.

ADMINISTRATORS' SALE OF REAL AND PERSONAL PROPERTY

The undersigned administrators of the estate of Daniel D. McLean, late of the township of Ekfrid in the county of Middlesex, farmer, deceased, will offer for sale by public auction on the undermentioned premises on Tuesday, April 27, 1920, at 2 o'clock p. m., the following real and personal property, namely:

Real Estate
 The north half of lot number five in the fourth range south of the Longwoods road in the township of Ekfrid, except that part thereof owned by the Grand Trunk Railway, and all that part of the south half of said lot number five lying north of the Grand Trunk Railway, containing one hundred and twelve acres, more or less. This is an improved farm, with first-class dwelling house, barns and other outbuildings. The soil is of good quality and is all under grass.

Terms of sale of real estate.—One-tenth of the purchase money to be paid at the time of sale and the balance within one month thereafter.

There will also be offered for sale at the same time and place the following personal property, namely:

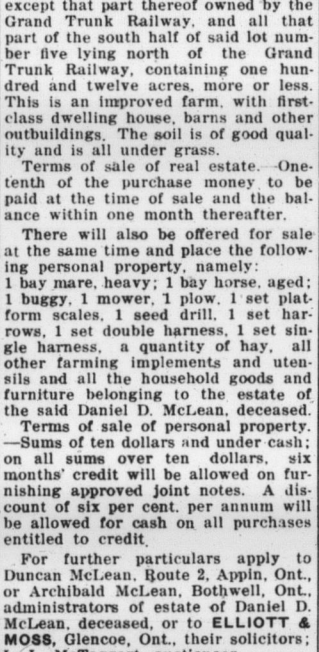

1 bay mare, heavy; 1 bay horse, aged; 1 buggy, 1 mow, 1 plow, 1 set platform scales, 1 seed drill, 1 set harrows, 1 set double harness, 1 set single harness, a quantity of hay, all other farming implements and utensils and all the household goods and furniture belonging to the estate of the said Daniel D. McLean, deceased.

Terms of sale of personal property.—Sums of ten dollars and under cash; on all sums over ten dollars, six months' credit will be allowed on furnishing approved joint notes. A discount of six per cent. per annum will be allowed for cash on all purchases entitled to credit.

For further particulars apply to Duncan McLean, Route 2, Appin, Ont., or Archibald McLean, Bothwell, Ont., administrators of estate of Daniel D. McLean, deceased, or to ELLIOTT & MOSS, Glencoe, Ont., their solicitors; L. L. McTaggart, auctioneer.

BUSINESS FOR SALE

Old established butcher business in Glencoe for sale. Reason for selling: going farming. Apply to F. G. Humphries.

Highest cash prices paid for Skunk, Raccoon and Mink. Enquiries promptly answered.

ALLIES OPPOSE FRENCH OCCUPATION OF CITIES IN RUHR DISTRICT

France Invaded Neutral Zone After Decisive Warnings That Allies Would Not Support Her Action — Delicate Situation Created—Allies Will Try to Induce France to Withdraw.

A despatch from London says:—Relations between France and the other Allies are so strained that the British Government views the situation with apprehension.

I am authoritatively informed that France invaded the Ruhr Valley after deliberately disregarding the Allied Government's repeated, urgent and decisive warnings, and that neither England, Italy nor the United States would support France morally, diplomatically or militarily, but will, on the other hand, use every force except a military one for the present to compel France to withdraw her forces from the German neutral zone.

For two weeks the telegraph wires between Paris, London, Rome, Brussels and Washington have been kept hot by communications between the heads of the respective Governments. Long before Marshal Foch moved a single French soldier the French Government was told that the Allies would not support her, and was warned of the grave consequences of French action.

France, however, disagreed with her allies and acted upon her own initiative and judgment.

I am now informed that not only

did the allies oppose the French attitude, but that they differed from France on the question of the alleged violation of the Peace Treaty.

An exact statement of facts from the allies reads:

"The allied Governments considered the condition of the Ruhr Valley as a social disorder, with which the German Government alone should deal and be held responsible. In the opinion of the allies, as expressed to France, Ruhr conditions were not matters with which the allied Governments should have anything to do."

A despatch from Paris says:—The British Government has notified the French Government that if it persists in acting alone in the measures to enforce the treaty Britain will withdraw her representatives from the Committee of Ambassadors, which is the official body with the enforcement of the Versailles Treaty.

This warning came at the end of a note from the British Cabinet handed Premier Millerand by Lord Derby, British Ambassador. This note stated that while the good faith of France was not doubted, she had acted hurriedly in taking a measure which should have been used only as a last resort.

MEMORIAL PLAQUE FOR NEXT OF KIN

Gift of His Majesty to Relatives of Fallen Heroes.

Ottawa, April 12.—The next of kin of every Canadian soldier killed in the war, or who may die within the next six years from causes attributable to his service during the war, including the home establishment, is to receive a handsome memorial plaque and scroll, accompanied by a message from His Majesty the King.

The plaque is an artistic bronze, plaque of emblematic design, measures 4 3/4 inches in diameter and 1-5/8 of an inch thick, and will bear the deceased's Christian name and surname, and regiment.

The only classes of women for which they will be issued will be those who have served under direct contract with the War Office in either the Q.A.I.M.S. and Q.M.A.A.C. The next of kin in all cases must be blood next of kin.

The letter from His Majesty, mentioning the regulations governing the award, is a note, signed by the King and bearing the crest of Buckingham Palace. It reads: "I join with my grateful people in sending you this memorial of a brave life given for others in the Great War."

The date of the end of the war for the purpose of the issue of this award is the 10th of January, 1920.

CANADA GETS SHARE OF GERMAN DYES

£240 Pounds Allocated Under Reparation Clause of Treaty.

London, April 12.—A total of £240 pounds of German dyestuffs, Canada's share under the reparation clauses in the peace treaty, have been allocated by the British Board of Trade for distribution among Canadian firms. Possible British sources of supply have also been indicated from which further Canadian requirements, it is hoped, may be satisfied. The following firms have been allocated dyestuffs: Colours Dyeing Company, Mercury Mills; Toronto Carpet Manufacturing Company, Belding Paul Corticelli Company, Montreal; Dominion Textile Company, Montreal; Knitting Company, Pennington; Regent Knitting Mills; Budge Carbon Paper Manufacturing Company, Montreal.

King George to Visit The Spanish Monarch

A despatch from Madrid says:—A report from Santander says that the King and Queen of England are about to visit Spain. Magdalena Palace, it is said, is being prepared for their reception.

150 BRITISH WOMEN ON WAY TO CANADA

London, April 11.—The first group of 150 British women, which sailed Friday for Canada, carried 150 of the British women's army corps, and many prospective wives of Canadian soldiers. While the women are finding homes and husbands they will be found profitable employment by arrangement between the Canadian Government and the Overseas Settlement Department.

Canadian Chosen For Important Post

Sir Hamar Greenwood, the new Chief Secretary for Ireland, was born at Whitby, Ontario, in 1870 and received his education in this country. He served in the war from 1914 to

SIR HAMAR GREENWOOD

1916, in the latter year becoming attached to the staff of Lord Derby, at that time the War Minister. Sir Hamar has represented the Sunderland constituency in the House of Commons since 1910. In January, 1919, he was appointed Under-Secretary for Home Affairs in Premier Lloyd George's Cabinet. He was created a baronet in 1915.

PEDIGREE PONIES FOR PRINCE'S RANCH

H. R. H. Will Also Have Thoroughbred Racers, Cattle and Sheep.

Montreal, April 11.—W. J. Carlyle, who has been buying stock for the Prince of Wales' ranch in Alberta, spent a day in Montreal and sailed today for England by the Empress of France. Mr. Carlyle's special mission is to bring back some of the Prince's thoroughbred racing horses, which will at once be put in training at Calgary. It is probable that he will return with them between May 20 and June 1. He must return without the thoroughbred cattle and sheep, which were purchased last November, as the outbreak of foot and mouth disease early in the winter, is entirely under quarantine, as far as the exportation of live stock to Canada is concerned.

Mr. Carlyle will bring back with him some of the Prince's prize English ponies from Dartmoor. These animals stand from twelve to thirteen hands high and have a remarkable pedigree, going back to the horses of old Spain.

Britain Concludes Agreement With Soviet

Copenhagen, April 11.—It is officially announced that the British delegation has concluded its negotiations with the Russian Soviet representatives respecting trading relations between Great Britain and Russia. There is good prospect, it is added, of an agreement being reached for the early establishment of trade with Russia.

Belgian Troops Leave for Germany

Arlon, Belgium Luxembourg, April 11.—A battalion of Belgian troops, 500 strong, with bands playing and flags flying, left here today by way of Coblenz for Mayence. The troops will arrive at their destination Monday evening and be officially received by the French army, and then will proceed to the occupied cities.

Weekly Market Report

Breadstuffs.
Toronto, April 13.—Man. wheat—No. 1 Northern, \$2.80; No. 2 Northern, \$2.77; No. 3 Northern, \$2.73, in store Port William.

Montreal, April 13.—Butcher heifers, med., \$9 to \$10.50; com., \$7 to \$9; butcher cows, med., \$6.50 to \$9; canners, \$5 to \$5.25; cutters, \$6 to \$6.50; butcher bulls, com., \$7.50 to \$9. Good veals, \$15.50 to \$16.50; med., \$10 to \$12. Hogs—Off car weights, select, \$19.75 to \$20; lights, \$18.75 to \$20; sows, \$15.75 to \$16.
Montreal Markets.
Montreal, April 13.—Oats, Can. Western, No. 2, \$1.17½; No. 3, \$1.13. Flour—New standard grade, \$13.35 to \$13.55. Rolled oats—Barns 90 lbs., \$5.50 to \$5.60. Bran, \$4.25; Shorts, \$3.25; Hay—No. 2, per ton, car lots, \$20 to \$21; Choice, finest eastern, 28 to 26½. Butter, choicest creamery, 58c. Potatoes, per bag, car lots, \$4.75 to \$5.00.

"The whole question of war and peace comes to a head here, where all the powers are struggling to get through this narrow passage to the East. It seems impossible, therefore, to urge strongly enough the necessity for America's entering Turkey in some authoritative capacity. No other solution can bring more temporary peace."—Constantinople cable despatch.

CASH BONUS REFUSED TO VETERANS

Not the Best Way to Help Soldiers, Says Government.

A despatch from Ottawa says:—The Dominion Government on Friday announced an affirmation of its decision of a year ago not to pay a cash bonus to war veterans. Sir George Foster, Acting Prime Minister, made a statement on the Government's policy in the Commons, declaring that the Government was not of opinion that the best way to re-establish the returned soldiers was by placing in their hands sums of money over which the Administration should have no supervision. The Acting Premier drew attention to the fact that a Pensions Committee had been appointed again this session, but he said it was impossible to dispose of such an important question of re-establishing returned men at one or two sessions of Parliament.

As the statement was made by Sir George Foster before the orders of the day were called, there was no opportunity for it to be debated, but the Acting Premier promised that the matter could be discussed later. He told an inquirer that the Pensions Committee, as now constituted, had never had the question of cash bonus or gratuity directly referred to it.

200 CASUALTIES IN JERUSALEM

Ten Civilians Killed in Clash Between Jews, Moslems and Arabs.

A despatch from London says:—It is reported that ten civilians were killed and one hundred and eighty wounded, and that three British officers were wounded, in the disturbances in Jerusalem on April 4 between the Jews, Moslems and Arabs. The despatch says the exact cause of the trouble has not yet been ascertained. Other disturbances occurred April 6, when the town was packed with British troops. Early in the morning of April 6, Arabs tried to enter the Damascus gate, but were fired on. During further disturbances some houses were burned. The despatch adds that from the latest information, although there was considerable effervescence in the Jerusalem district, the situation was well in hand.

Between December 24th, 1914, and June 17th, 1918, there were 51 airship raids and 57 aeroplane raids over Great Britain.

TWO IRISH POLICE-MEN KILLED

More Outrages in Various Parts of Distressed Isle.

A despatch from Dublin says:—While three police constables were cycling in the neighborhood of Newport, county Tipperary, Friday morning, they were ambushed by a number of men who opened fire at close range, killing two of them and seriously wounding the third. The constables had to pass through a bleak mountainous district on their way to local sessions, where they were concerned in a case. The surviving constable, after the attack, saw about twenty men running away.

A vacated police barracks at Blackroy, outside of Limerick boundary, was burned down. Four men arrested under the Defense of the Realm Act, were taken to Cork.

A mail van from Cavan to Arva was held up near Crossdoney, and more than £100 sterling, representing old age pension money, stolen.

The Protestant cathedral at Ross Carbery, county Cork, was entered Wednesday night and the statue of the late Lord Carbery, valued at \$1,000, was damaged beyond repair.

BRITONS TAXED FOR WAGE INCREASE

\$450,000,000 Per Annum Added to United Kingdom's Bill.

London, April 11.—Ninety million pounds per annum will be added to the United Kingdom's wage bill. The Evening Standard calculates, if all the demands now made are conceded and all the offers of employers accepted. The estimate is made up thus: The miners will get \$35,000,000 if they take a ten-shilling raise, but they may strike for three per cent. more; the railwaymen, \$7,000,000, as the result of the new pound-per-week demand; the dockers, \$10,000,000, the mean between the employers' and workers' estimates; the postal workers, \$2,500,000; the street carmen, \$2,000,000, if their demands are granted.

In addition to this the farm laborers, bus men, journeymen tailors and engineers are figuring on the amounts for which they will put in claims. Santa Barbara, Cal.—A horse entered in an exposition here arrived by airplane from Los Angeles. The trip was delayed a day until officers of the Humane Society had been convinced that no cruelty was involved in the trip, which was made in an especially equipped airplane.

NEW CAPITAL FOR OTTOMAN EMPIRE

IF TURKS ARE SHUT OUT OF CONSTANTINOPLE

Choice of New Centre of Sultanate Lies Between Broussa and Konia.

The question whether Constantinople is to remain the seat of the Turkish Sultanate has been the source of a ceaseless polemic in the columns of the European press for several long months. It is a question of tremendous import, involving widespread national, religious and trade interests, and some would have it, the whole future attitude of Islam toward the western European powers. If, however, it is finally decided that the Turk, having obtained possession of the city of the Golden Horn in victory, must now lose it in defeat, it is generally conceded that the selection of the new Ottoman capital will lie between Broussa and Konia. The former is the more logical choice, owing to its close proximity to the more civilized world; but Konia may be chosen as a place of retreat and security, buried away in the Turkish homeland, and well removed from extraneous intrigues and influences.

Broussa, like most of the cities of any size in Asia Minor, has a history. It is said to have been founded on the suggestion of Hannibal, and, under the name of Prusa, or Prussa, it was the capital of Bithynia, whose inhabitants, for their part, were emigrants from Thracia. Bithynia survived for several centuries, until Nicomachus III bequeathed it to the Romans in 74 B. C. The Turkish connections with the city dates from 1329, when it was captured by Orkhan, the chief of the Ottomans. They, of course, lost it to the Mongols in 1302, but subsequently regained it. It has more or less remained in their possession until the present day, and has served them for many years as their capital.

Surrounded by Olive Groves. The city is pleasantly situated, in the midst of a vast expanse of vineyards and olive groves which spread their verdure over hills and dales for miles around, at the base of the Anatolian Olympus. The classic mountain, Olympus, is, of course, in Macedonia, within a few miles of Salonica. The traveler from Constantinople takes an antiquated packet boat from the Galata Quay, and, steaming past the island in the sea of Marmora, is deposited at the little seaport of Moudania. There is considerable movement at Moudania, for there the black olive-stone, the grain produced on the hinterland are packed in primitive fashion for export.

The journey may be resumed either by train or carriage. The routes are rickety, and the animals are apt to giggle for horseflesh, but they nevertheless cover the twenty-six miles as quickly as the train, so it is preferable to take the very excellent highway and view the glorious panorama rather than suffer the discomfort of the trip by railroad.

Approach to Broussa itself can be readily detected, for the city gives off in exaggerated degree that pungent effluvia which is characteristic of all Turkish towns. Nevertheless, one soon becomes accustomed to this peculiar atmosphere, for there is much of interest to occupy one's attention. Few traces of Bithynian or Roman civilization remain, but the Turk is here in all his glory, and there is one hotel at which one can live in comparative comfort. The native silk industry well repays investigation, some of the best Turkish examples being produced here, and the neighborhood abounds with mineral springs.

Yet Broussa has immense possibilities. It is a typical Turkish city, the site of some striking examples of Islamic architecture and the home of sacred relics which endear it to a Moslem world. It will be in keeping with historical evolution if it again becomes the capital of the Turkish state.

1089 Outrages in Ireland in Year

A despatch from London says:—One thousand and eighty-nine outrages were committed in Ireland between January, 1919, and March 29, 1920, according to an official White paper, which attributes them to the Sinn Féin movement. Thirty-one police, military and officials and five civilians were killed, 81 were fired upon, 32 were assaulted.

This total does not include the police barracks, to the number of more than 200, destroyed during Easter Week.

Death Lurks in Soil of Former Battle Fields

Cambrail, France.—Two explosions, in which 12 persons were killed and two injured, have occurred in the district of Villers-Bretonneux. The explosions were caused by agricultural tractors coming into contact with unexploded shells in fields which were being ploughed.

Paderewski Will Return to Duties in Polish Diet

Geneva, April 11.—Ignace Jan Paderewski, former Premier of Poland, announced today that he will resume his duties as a member of the Polish Diet at the special request of the Poles.

M. Paderewski intended to retire from public life and devote himself exclusively to music, but changed his mind recently.

Soils and Crops

Address communications to Agronomist, 73 Adelaide St. West, Toronto

Money in Geese.
There is good money in geese for a lot of farmers that are now overlooking this opportunity. This is especially true on farms where pasture is abundant. Geese are great foragers and eat more grass, weeds and pasture than any other kind of fowl. This makes them especially attractive in these days of high-priced grain feeds.

It is most important that geese have a good grass range available during the summer, while a pool of water for bathing and recreational purposes is also a desirable feature.

The market for geese is not so general as for chickens. This point should be considered in undertaking the raising of geese, as most of the sales in cities are made around the holidays, although a few will sell the whole year round.

One of the best things about geese is their extreme hardiness. Geese are rugged birds and need shelter only in winter or stormy weather. An open shed or an old barn usually is satisfactory for this purpose. From four to twenty-five geese may be kept on an acre of land, although under most conditions ten is a fair average.

Geese are fed a ration to produce eggs during the latter part of the winter so that the goslings will be hatched by the time there is good grass pasture. The eggs may be hatched by either chickens, geese or incubator. Some breeders prefer to raise the goslings under hens, as geese sometimes become difficult to manage when allowed to hatch and rear their young. The period of incubation varies from twenty-eight to thirty days.

Goslings do not need feed until they are twenty-four or thirty-six hours old, when they can be started on one of the brands of chick feed, along with one feed a day of a mash or dough composed of equal parts of shorts (middlings) and corn meal, with five per cent. of beef scrap added after the goslings are six weeks old. Bread and milk are a good occasional feed for young goslings. Fine grit or sharp sand should also be available. If the goslings are to be fattened the ration should be gradually changed to one-third shorts and two-thirds corn meal by weight, with five per cent. of beef scrap added, while a feed of corn should be given at night as soon as the birds are large enough to handle the whole grain.

Adult geese may be fed for egg production in early spring on a mash of one pound of corn meal, one pound of bran, one pound of middlings or low-grade flour, and eighteen per cent. of beef scrap, which is fed in the morning; equal parts of corn and wheat, or corn alone, is fed at night. Grit and oyster shell should be kept before the geese, especially when they are laying. A constant supply of drinking water should always be available under protection in bad weather, so that the geese can get their feet into the water. Cut clover hay, alfalfa, silage, cabbages, mangel-wurzel beets, or any waste vegetables may be fed during the winter months.

Many breeders pluck the feathers from their live geese at some time prior to molting. Some pick every six weeks during the summer and early fall, while others pick only once or twice a year. Feathers are ripe for picking when the quills appear dry and do not contain blood. About one pound of feathers can be picked from each goose per year. The demand for goose feathers and the practice of plucking geese appear to be decreasing, attention being concentrated on a production of young geese for market. Lots of market poultrymen make a specialty of fattening

and selling the young geese when they are fully feathered.

How I Pick Cows That Win.
Smith, a neighbor up the road, happened to drop in one morning when I was testing milk. He was much interested in the process, and wanted to know all about it.

"That is a Babcock tester. I'm testing milk this morning," I told him. "You see," I explained, "by using this I can find out if my cows are paying for themselves."

"By means of this pipette I measure out a certain amount of each cow's milk. Then I put it into this milk-test bottle and put in with it a definite quantity of commercial sulphuric acid. This acid burns up everything except the fat, and then I whirl them for a few minutes. As the bottles are whirled they straighten out, and the butterfat, being lighter, goes up into the neck of the bottle."

"But how can you tell," he asked, "how much fat there is?"

"You see on each bottle," I showed him one, "there are lines graduated or measured off, so that these lines measure the fat in the bottle."

"But after you find how much fat a cow gives, how do you know if she is paying for herself?"

"If the bottle shows that there is a certain per cent. of fat in her milk, it will also show you just how much butter she makes for you in a year. The way to do is to weigh her milk for a certain period of time, and multiply that by the per cent. of butterfat the Babcock test shows, and add one-sixth for the overrun in making the butter."

"Could you tell for a week or a day?"

"Yes, indeed. Suppose a cow gave 30 pounds of milk a day, or 210 pounds each week. Four per cent. of that would be 8.4 pounds, and one-sixth of that added to it is 9.8 pounds, which means that a cow testing four per cent. would give butterfat to make 9.8 pounds of butter each week."

"How much ought a cow to give in a year to be profitable?" he inquired.

"It is estimated by the best authorities that a cow should give at least 250 pounds of butterfat each year, and 6,000 pounds of milk."

"Then by weighing the milk every milking one can tell at the end of the year what a cow does," he remarked.

"But one cannot test every day."

"No, that is not necessary, though of course it would be better. If the milk is saved out for testing morning and night for one day, then tested once a month, and the average taken for the milking period of the cow; that ought to give a fairly accurate estimate."

"Did you ever find that any of your cows were better or worse than you supposed?" he wanted to know.

"Do you remember that cow that I bought of Williams? She was supposed to be a pure-blood, and could have been registered. I expected great results from her in the butter-making line, as she came from a butter-making breed. After keeping her for a year and testing her milk each month and weighing it each day, I figured all she gave me was 4,000 pounds of milk and 195 pounds of butterfat."

"Then there is old Brindle, a grade cow. I had an idea she wasn't good. But I thought I'd try her for a year and see. I was surprised. She produced over 6,500 pounds of milk and 350 pounds of butterfat. That was nothing wonderful, but it shows that one cannot guess. Every dairyman that has used a Babcock tester can tell you of similar surprises."

Sheep Notes

While our experience has proved that there is no more profitable class of live stock, yet many flocks of sheep are kept without proper returns. This is because of lack of up-to-date methods in breeding and care. It is wrong to think that as the main purpose of sheep on agricultural lands is that of scavenger it is therefore useless to invest in well-bred animals, as any common sheep will eat weeds and other waste.

Sheep will consume and turn into gold the weeds, sprouts, and other such things on the farm that are worse than useless and which other animals would refuse to eat, but they will pay still better if fed good rations. Furthermore, as a factor in maintaining and restoring soil fertility the sheep stands in a class by itself. This is better recognized in European countries, particularly in England, where on certain high-priced lands the landlord often stipulates that a certain number of sheep shall be kept by his tenants in order to maintain the fertility of the soil.

Of course the breeding of the flock is a big factor in success or failure. It is important to select types of sheep best adapted to profit. If you start with grades, only use purebred sires of a particular breed. Do not select a ram from one breed one year and expect improvement to follow, for it will not. However, the standard of

a flock can be raised very rapidly by using good sires each year and culling out the inferior ewe lambs.

For best results, lambs should be taught to eat grain as early as possible. Corn and oil cake in "pea" form make a very good ration. The lambs should be fed grain in a "creep," that is, an enclosure into which the lambs may pass, but whose entrances are not large enough to admit the ewe. The first six months of the lamb's life are the most important, and even though they may have access to abundant pasture, whatever one may give them in the way of grain feed will be well repaid by increased thrift and growth.

To Treat Oats for Smut.
There are three steps in treating oats for smut: 1. Mix one pint of formaldehyde in ten gallons of water. 2. Sprinkle the ten gallons of liquid over forty bushels of oats, shoveling the oats so that the solution is evenly distributed. 3. Sack the oats when they are thoroughly mixed and sow the next morning.

Two men in three hours can treat and sack enough oats for forty acres. Formaldehyde can be secured at any drug store. The total cost for an acre is not more than five or six cents.

For Moths—A few drops of your favorite perfume dropped on small pieces of pumice stone and laid among clothes will drive moths away and give a delicate odor to your garments.

Are You Giving All Your Profits To Your Help?

In the past many farmers have been less well-off than their hired help. Such a condition is unbearable and can only be overcome by modern methods—reduction of labor and increased production. The dairy end of your farm can be made to pay much bigger profits if you install

The Macartney Machine Milker

THE COWS ADOPTED CHILD

It milks thoroughly and naturally and is far more pleasing to the cow than the old hand method. Moreover by the Macartney method a man can milk from 20 to 24 cows in an hour. Think of the saving in labor. Still further—the Macartney increases the flow of milk and prolongs the lactation period.

Get Particulars Now
Don't buy a milker until you have seen the Macartney—the simplest and most modern of all—and even if you are not ready to buy, get particulars now and learn what other farmers say about the Macartney. Fill in the coupon and mail it to-day.

SOW SIMMERS SEEDS

Successful Since 1856
It is easy to make claims for seeds—it is another thing to be able to substantiate them. We are emphatically able to make our claims good because our record for "seeds that grow" has gone unbroken for 64 years. For seeds, bulbs, plants of all kinds, trust Simmers' goods.

THEY GROW!
Write for our handsome new 1920 Catalogue today.
J. A. Simmers Limited, Toronto

Inoculate Your Seed for Better Crops

Inoculation consists in applying to the seed pure cultures of the nitrogen-fixing bacteria. Special cultures are required for each kind of seed, and are put up for Alfalfa, Red Clover, Sweet Clover, Peas, Alsike Clover, and all other legumes.

SEED INOCULATION IS ENDORSED BY THE PROVINCIAL DEPARTMENT OF AGRICULTURE
Splendid success has been obtained by government tests, and a recent circular issued states: "For the small amount involved in time and money it would seem advisable to inoculate all legumes."

PRICE, FIVE CENTS EACH CULTURE.
Cultures are sent by mail with complete directions for their use. They are good for 8 months after they are made. Alfalfa and Clover from inoculated seed do not winter-kill readily. Write for Circular.

"MONEY BACK IF YOU FAIL TO GET A GOOD CATCH."

MURDOCH LEGUME LABORATORY
"ALDIE" GUELPH, ONT.

Spohn's Distemper Compound

is the one indispensable remedy for contagious and infectious diseases among horses and mules. Its success as a preventive and cure for DISTEMPER, FEVER, SNEEZE, and all other diseases of the respiratory tract is the highest tribute to its merit as a medicine. It is endorsed by the best horsemen and live stock men in America. Buy it of your druggist.

SPHON MEDICAL COMPANY, Goshen, Ind., U.S.A.

Horse Sense

Many horses suffer from indigestion, colic or other stomach ailments in springtime, just when we cannot afford to lay them up, but it is largely our own fault. If a person used to sitting at a desk is given a job pitching hay without any preparation, what will be the result? It is exactly the same with our horses.

A gradual change of feed must be made along with some light work, which tends to strengthen their muscles, also their digestive tract. We have never had any trouble with our horses in the spring, and I would like to tell how we manage our horses to get what we consider good results.

We keep our horses in about the same feed the year around, not over-ly fat, nor poor. When they are kept this way the collars always fit, and if your collars are good ones and fit good you need not worry about sore shoulders in the spring. We never use sweat-pads on our regular team, they are a nuisance and a damage to the horse's neck, no matter how well you may fit them on your team. They absorb the sweat, gather the shedding hair and form it into lumps which are continually causing sores. After a hard day's work they are soaked with moisture which never dries all the time they are used.

How many have worn rubbers that hold the moisture from one day to the other, and always keep your feet cold and damp? Well, it's the same with sweat pads. If you haven't the best of harnesses give them a good collar and bridle to wear at least. These are the two things that either give them comfort or pain.

Next, look to their feet. See that they are in good condition. If your team cannot go without shoes, watch that they are not left on too long, thus causing the foot to grow crooked and probably break the hoof. We do not shoe our horses at all unless there is a real reason for it. All we do is to trim their feet occasionally to keep them from becoming ragged. Personally, I do not like shod horses for plowing or other work on a soft field; many times in turning around at the ends or getting into a soft spot the horses step on each other, sometimes cutting their legs or feet quite severely.

The first few days of plowing should not be rushed. Let them take it easy. Give them their "wind" often. Plowing is hard work and it takes a few days for the team to get the "hang" of it.

To Make Cut Glass Sparkle.
To keep my cut glass in sparkling condition I wash it in warm—never hot—soapsuds. I use a brush to wash the glass with, then rinse it in bluing water of the same temperature, and polish. The bluing water seems to keep the cut glass like diamonds.

The Welfare of the Home

A Little Lecture About Fresh Air and Rest.

By Ida M. Alexander, M.D.

All women who work in the house need to get the fresh air habit. If you have not time to go out in the fresh air, open window and door and let the fresh air in to you. What if it is winter and twenty below, we need the fresh air. The fresh-air kitchen is a fine cure for headaches, or better still, a preventive of headaches. If you have ever suffered from a headache, begin the fresh-air kitchen as a preventive. It is absolutely certain to get results where there is no organic trouble. What is a fresh-air kitchen? What but a kitchen where fresh air keeps blowing through.

The men and women who are getting ten thousand a year plus are those who can plan things out, and then make the plans so very clear to the others that they can carry them out. More than that, they can really enjoy carrying out the big plan because it is presented to them in such an inspiring way. There are not enough men and women earning these large salaries just because there are not enough people with this power known as executive ability.

Some women have it, and I never knew a farm woman with executive ability to be overworked, for she planned out all the household jobs so that everyone from the eight-year-old to Mr. Farmer himself had a share and each one did it as his share of the fun. Nobody was overworked, and they all had a good time pulling together. When the children went to school and took their lunches with them, each child put up his own, but the mother knew that each was getting enough of the right kind of food. She knew also that the bedrooms were tidy and the beds made when they left for school. If a soldier can take care of his own bed, when he is Canada's boy, why can't he do the same for himself while he is mother's boy?

I want you, dear readers, to keep your health, and just as if I had been talking with each of you personally, I can hear one after the other say: "The advice is all right IF we could only follow it." But this is the one thing that I insist upon: you can follow it. The busiest of farm women have come to me and when I planned the day so that there should be time for rest, time for meals, time for fresh air and sunshine, they were able to do it. They got their health back without actually having to get sick—and the husband and the children were much happier because mother was not so cross as she had been.

People can always do what they will do. Now won't you sit down in your most comfortable rocking chair and think through yesterday. When you have done this, tell me truly: did you do your work only or did you dip in and do some of your husband's work and some of the children's work and some of the unnecessary work? Did you do anything that you could have left undone and yet not hurt your health nor that of any member of the family?

The mother's love is such that she enjoys "doing everything she can" for her children. She loves to do it, but she lets her mother-love make her the children's slave rather than their companion. I know by personal experience how the grown-up remembers the times when mother was not too tired to play. It is not the thousands of hours that she spent in cooking meals that we remember, but the afternoon when she gave a "tea-party" to the little girls that were quilting a doll's quilt, and sat down to play with them just like another child.

And don't think, Little Mother, that I never remember the father and his duty. One of the saddest things connected with my stay overseas was the stories the boys used to tell me about their home folks. No, the stories were not sad. The lad was only showing me the pictures of mother, father, sisters and brothers. The sad part of it was that though they could always tell me about Mother, they were too often strangely silent about Father.

If I were to judge the fathers by the things that our boys did not say, I should say that nine fathers out of every ten were failures. After the boys were able to take care of themselves, their fathers did not mean anything to them. * * * nothing that they could put into words.

On the other hand one father told me, "every Saturday afternoon belongs to my boy no matter how much work I have to do." I never happened to meet that man's son, but I know that he could talk to me for hours about his "dad" if he had a chance. But this was an exception, judging by what the boys in khaki told me.

Let us look over our work carefully and let "dad" do his share, and Mother do only her share. Then Mother will have time to keep well, and being well, will be happy, and being happy, will make everybody about her happy, too.

How to Get the Most Out of Your Perennial Garden

Many people have the erroneous idea that when hardy perennials are once established they require no further attention, but I have found that, although they are easy to grow, in order to give the greatest satisfaction, each variety must be treated in the way best suited to develop its flowers and growth. I have found that some plants, such as dicentra, lilies, peonies, yuccas, and so on, require several years to get established and come into their full beauty. Usually, the longer these plants are left undisturbed the better results will be obtained. I have discovered that most of the late summer and autumn blooming varieties should be divided and reset each spring. Among these are asters, boltonias, golden glow, lychins, pinks, sweetwills, and so forth. The crown from which the original plant grew dies down, and many new plants grow up from it, which will give better results if divided and reset.

I find that tulips and hyacinths do much better if dug up and reset every three or four years, but the other fall-planted bulbs will give just as good results if not reset until they become crowded. It is, however, a mistake to think that large clumps will give more satisfaction than a small thrifty clump.

In my years of experience in growing flowers I have found no class more attractive than hardy perennials, and none adapted better to all conditions. A good garden soil, well enriched with fertilizer, is the greatest requisite. The plants are best transplanted in early spring, just as they are beginning to send out shoots after their rest; but I have had excellent success with many in setting them over in the autumn. Irises, lilies, and other early-spring flowering bulbs are best set out in the fall. Never move plants when the ground is wet and soggy, or the weather unfavorable. I find that if each plant is given plenty of room to develop it will do much better, as most perennials grow and spread rapidly. Take care not to put too many flowers which bloom at the same time in the same place; try also to blend the colors so they will harmonize. A careful study of the varieties to be planted will usually result in a satisfactory arrangement.

During the summer I keep the soil stirred constantly around the plants, so as to let the air have free circulation. I give them a mulch of light material, which is of great benefit, and helps to retain the moisture during the hot, dry days, and also helps to keep down the weeds. I always

stake and tie all the taller-growing species securely, and if the supports are given when the plants are still small they will look more natural and give better results. By removing old flower stems, faded flowers, and seed pods, many varieties such as aquilegias, gypsophilas, hollyhocks, larkspurs, sweet rocket, and others, will bloom almost throughout the season. The removal of these will also improve the appearance of the border, and will keep the garden looking neat and tidy at all times.

When frost has killed all the soft growth I always cover my border with leaves or other litter. Do not cover too soon; for a little frost is beneficial to the plants. The protection should not be too heavy, or it will smother the plants, or induce them to come into premature growth in the spring. On the approach of warm weather I remove the covering gradually in order to harden the growth which the plants have made. Two or three days is usually sufficient for this.

Every year I grow more fond of hardy flowers. They get to be like old friends, coming back season after season to greet me, and surprise me, too; for, like people, you forget sometimes how fine they really are, and that makes the pleasure of meeting them again all the greater. Perennials require such little care that I often wonder why more people do not raise them. I believe they would cultivate them more if they knew them, and if they would only try them out and see how much fun there is in having them.

There is such a wide range of color and form, and a succession can be easily arranged that will give you blooms from early spring until frosts chill all plant life. They are prolific too. By that I mean they divide and multiply, especially irises and peonies, so that you can keep enlarging your collection with no additional expense once you get started and have lots to give to friends besides.

Do not be impatient with them. Remember that it takes several years for them to get established and to do their best. Care taken in cultivation, fertilization, and winter protection will get plants that will repay you with abundant bloom.—L. C. A.

Don't stop to argue the right of way with a skunk.

Every day lost on strike decreases the supply of the necessities of life. Can't we find a method of settling industrial disputes?

COURTESY AND CONSIDERATION

"The greater man, the greater courtesy."

In every home opportunities should be taken for the little children to practice consideration and care for something weaker than themselves. The cherishing instinct, both in the individual and the family, needs cultivation and direction. It is manifested in the love of little girls for their dolls and in the devotion of boys to their pets. If this quality of nurture is not exercised or properly directed, it withers; for affections must be exercised if they are to develop. We often see spoiled children in Canadian families, where all their desires are gratified without an effort on their own part and they are given no opportunity to serve. Many a mother virtually makes a slave of herself for her children, humoring every whim, and relieving them of all care, trouble and responsibility, only to find when they are grown that they are utterly selfish and inconsiderate.

Unfortunately, too, is the only child or the youngest member of the family, who is overindulged, with no more dependent member of the household to call forth his tender feelings. Herein lies one great value of the kindergarten, where children are given opportunities to help those younger than themselves.

For the child without companions in the home, the parents should provide occasions that require service or sacrifice for others. Arrange to have his friends come frequently to play with your little one, and share his joys, suggesting that the little guests must have the best.

Adaptability is gained through companionship with one's equals. From association with boys, little girls learn something of fair play, and become acquainted with the sturdier virtues; while, from girls, the boys learn to have a chivalrous attitude toward womanhood.

The instinct of nurture is developed through the care of a garden or pets, for a child must exercise thought and put it into practice, in order to obtain results. Then, too, generosity and respect are stimulated by sharing the fruits of his care. A little bouquet for mother, a head of lettuce for a neighbor, an extra kitten for a playmate.

If pets have young, the child's mother should call attention to the care of the mother for her little ones, and her courage and self-sacrifice whenever the young are endangered. A child should be taught to take entire charge of his pets, to weed and care for his garden, if he is to receive the full benefit in character-development and achieve the self-respect which comes from responsibilities accepted.

Then, too, good manners which spring from consideration are as essential to the happiness of the world as are good morals, and good manners should be examples of both to their children. How often virtuous people make us unhappy by their lack of tact! Courtesy and graciousness smooth out the rough places of life. A tiny boy of 3 can raise his hat and one of 5 can rise at table and push mother's chair into place. When older people enter a room, children should rise; in fact, they should be taught to practice all the little daily civilities. But courteous manners are taught slowly, "for precept must be upon precept, precept upon precept; line upon line, line upon line; here a little and there a little." Many a man of good character has greatly limited his usefulness by his lack of "polish," because his mother, either from stupidity or overindulgence, neglected his social training!

At this momentous time, it is especially important that all means possible be employed to foster the instinct of caring for the weak and dependent.

It would be well if more children were made to feel responsible for some child of less favored circumstances. It is astonishing how boys and girls will rise to the occasion when responsibility is placed upon them. In 1913 my 11-year-old niece, who lived in London, had a "good-child" in another city, to whom she wrote a monthly letter, and sent little gifts at Christmas-time and other holidays.

At the present time the millions of little Allied orphans should make a strong appeal to the childhood of Canada. Correspondence between them would not only teach our children consideration for others and develop their familiarity with a foreign language, but it would also help cement the friendship of Canada with her Allies and greatly promote the cause of Internationalism.

Recipes for Making Soap.

Cold process: One can of lye dissolved in two quarts of water. Add then to five pounds of grease, being careful that the grease has not been overheated. Stir thoroughly and slowly until soap is produced.

Hard soap: One can of lye in four quarts of water. Add this solution to six pounds of grease or tallow. Boil slowly and stir up until soap is produced.

Soft soap: One can of lye in three gallons of water. Add this to five pounds of grease or tallow. Boil, stirring slowly, until soap is produced.

Some of the kettles of Greenleaf are half a mile in thickness.

The Transcript.

THURSDAY, APRIL 15, 1920

WARDSVILLE

Wardsville, April 13.—Mrs. (Rev.) Murphy is on the sick-list. John Heath is spending a few days at his home here. Miss Belle McVicar has returned from Toronto. Mrs. Sinclair is in St. Thomas attending the funeral of her mother. Rev. Mr. Stalker preached in the Presbyterian church Sunday morning. The entertainment held by the church last week was a great success. There was a large attendance and a good program. The W. M. S. of the Methodist church held their annual business meeting last Thursday at the parsonage. The following officers were elected:—President, Mrs. Douglas; vice-president, Mrs. Brinson; corresponding secretary, Mrs. V. Pauls; recording secretary, Mrs. J. Mulligan; treasurer, Mrs. Love; superintendent of Christian stewardship, Mrs. (Rev.) Huser; strangers' secretary, Mrs. J. Wilson; superintendent mission band, Miss Gardiner. Dan Reed and family are spending a few days at J. Wilson's. We are sorry to note that Mrs. Ellwood, who had a stroke last Friday morning, is no better. St. James' Anglican Church The annual Easter restry meeting was held on Wednesday evening at 8 p. m. in the basement of the church, with a very good attendance, including the ladies. The meeting was opened with prayer by the chairman, Rev. R. J. Murphy. The minutes of the last regular and adjourned meetings were read and confirmed. The following officers and committees were unanimously appointed:—Rector's warden, Charles Minna; people's warden, J. F. Henderson; sidesmen—Peter O'Malley, Lawrence Harvey, J. F. Henderson, Howard Willis, James O'Hara, Gerald Randles, Ford Murphy; choir leader, Mrs. (Rev.) R. J. Murphy; organist, Mrs. J. F. Henderson; Chas. Minna, with his violin, ex officio. Votes of thanks were passed to the rector, wardens, choir, etc., the ladies being specially mentioned for their faithful co-operation in bringing the church year to a very satisfactory conclusion in her finances. The meeting was resolved into a congregational, when Charles Minna was appointed Synod delegate and Wesley Willis as substitute. Peter O'Malley and Lawrence Harvey were appointed auditors. A very pleasing and profitable evening was closed with the blessing. Chas. Minna, Sec.-Treas.

Internally and Externally it is Good.—The crowning property of Dr. Thomas' Eclectic Oil is that it can be used internally for many complaints as well as externally. For sore throat, croup, whooping cough, pain in the chest, colic and many hundred ailments it has curative qualities that are unsurpassed. A bottle of it costs little and there is no loss in always having it at hand. Blank oil leases for sale at The Transcript office.

NEWBURY

Mrs. Jack Cousins of Windsor is visiting her parents, Mr. and Mrs. R. J. Haggit. Mr. and Mrs. Edwin Hoxie (nee Ella M. Jeffery) left on Monday for their home, 1008 Lillibridge avenue, Detroit. Mrs. Upton of Stratford is assisting in nursing her sister, Mrs. Ed. Goaden, who has been ill for several weeks. Jim Brennan's friends will be pleased to hear of his getting another promotion in the Merchants Bank, he having recently been transferred from Stratford to Mitchell. He will have for his manager E. R. Lewthwaite, who was here at one time. Nurse Sutherland, who was taken seriously ill with flu at Bruce Fletcher's some time ago, was sufficiently recovered to go to her home on Saturday. Mrs. Bennett of Cowal is visiting her sisters, Mrs. Stalker and Mrs. C. Teller. School reopened on Monday. The teachers, Miss Chasely and Miss Fenell, with the scholars entered into work with a will after the long holiday. Misses Jean and Lydia Fennell entertained a few young friends in honor of their nieces, Misses W. and F. Archer, to a masquerade on Wednesday evening last. All report a splendid time. Fred Connelly left last week for Toronto where he intends taking a position. Dan—April 10th, to Mr. and Mrs. Daniel Livingston, Mosa, a son. The death of Doris Elizabeth, infant daughter of Mr. and Mrs. Wm. Wood, came suddenly Sunday night. Deceased was one month and three days old. The funeral took place on Tuesday afternoon. Sympathy is extended to the bereaved parents. Miss Pearl Robinson was home from London for the week-end. Mrs. Yates received the sad news on Sunday of the death of her niece, Mrs. Alex. Galloway of Cleveland. Mr. and Mrs. Purcell of Wardsville attended the funeral, Mrs. Purcell being a cousin of the deceased. W. H. Parnall was at Fairview, near Embro, Tuesday of last week attending the funeral of his brother-in-law, Archie Mause. During the past five years the Presbyterian congregations of Newbury and Wardsville have raised their payment to minister's stipend from \$875 to \$1,400, and hope next year to pay the minimum salary of \$1,500.

CASHMERE

Mrs. Gordon Smith of Walkerville is visiting her parents, Mr. and Mrs. Angus Taylor. Miss Hazel Bobler of Toronto is spending a few days with her parents here. Miss Rule and Mrs. Shank of Stratford have returned home after spending Easter week with their sister, Mrs. Ross Willick. Mr. and Mrs. Calvin Sittler attended the Hoxie-Jeffery nuptials on Wednesday, April 7th. League will be held as usual on Wednesday at 8 p. m. Wood-cutting is the order of the day in this vicinity. We are glad to hear that Mrs. Alex. McIntyre, who has been seriously ill, is steadily improving. A little ad. will sell it.

NEWBURY CASH STORE

Corn Flakes still 2 packages for 25c.

Raisins 25c per box.

Headquarters for Oranges Lemons and Bananas.

Lettuce for the week-end.

W. H. PARNALL NEWBURY

MIDDLEMISS

Allan Wrightman has quit work on the M. C. R. and is taking up farming. Mr. Williams of Sarnia is in the vicinity last week looking up land to grow flax this season. George Lucas and son F. W. have gone to Windsor to work. We are pleased to see Mrs. J. Hare back in the village again. Wood-sawing bees are the order. Some fast work is being done by some of the saws. Only a few have started seeding yet around here. The "hop" at Cowal on Friday evening was a very good success. A piano recently purchased fills a long-felt want in the Cowal hall. Mrs. Sam Gratton is sick with a severe cold on the lungs. Mr. Lucas, who recently moved here from St. Thomas, intends giving his house a general overhauling. Fred Annett is again on the railway section here. Lucas Bros. have sold their live racoons to E. C. Lucas for a good figure. Allan Wrightman has purchased a new wagon.

CAIRO

Mrs. W. S. Fraser has returned to her home in Walkerville after a brief visit at her former home here. Mr. and Mrs. Stuart Smith and daughter Muriel spent the week-end with their parents here. Mrs. Ila Hayward, after spending the past six weeks at the home of her brother, Gordon L. Smith, Windsor, returned home on Thursday. Melvin Sullivan, after visiting friends in Toronto and Walkerton during the past week, returned on Saturday. Jacob Burd has an attack of quinsy but is improving. John A. Wehmann had another attack of appendicitis. A. D. Perry is suffering from an attack of flu. Try a little advertising!

NORTH EKFRID

The Girls' Swastika Mission Band met at the home of Miss Pearl Pettit on Wednesday afternoon, March 31st. There were eight members and three visitors present. The afternoon was spent in cutting garments for the missions. Tea was served at five o'clock. Mrs. Will Teskey and daughter, Miss Maud, of Blenheim spent the week-end and Easter Sunday with Mrs. Foster. A special meeting of the Girls' Swastika Band was held April 7th at the home of Miss Lila Klemm. The afternoon was spent in quilting. A pie social was held in the Presbyterian church on Friday evening, April 9, under the auspices of the Swastika Band. The program was all by home talent and was much appreciated. The chair was filled by Rev. H. D. McCulloch. The Mission Band presented Miss Lila Klemm with a silver sugar shell and a butter knife and a nicely-worded address prior to her departure for London. Miss Lila will be missed in this community, as she was organist of the church. Her many friends and neighbors all heartily join in wishing her success and prosperity in her new home. George Pettit was the guest of his parents Sunday. Sunday's storminess depleted the church attendance on April 4th to a considerable extent. Gordon Mills was recently married to a young lady of London and they have gone to Vancouver on their wedding tour. Harry, Hardy is beautifying his house with a new verandah. Miss Mada Pettit had a quilting bee Thursday, when she was celebrating her birthday. A few friends were present and were treated to a fowl supper. Services were conducted in the Presbyterian church Sunday evening and were much appreciated. The text was from Revelations, chapter 22, 17th verse. Mrs. John A. Reath was a visitor at the home of Mrs. Garfield Watson on Monday. Mr. and Mrs. Arthur McArthur and family have moved to Windsor where Arthur has secured a good position. H. G. Underhill of Lawrence Station visited his sister, Mrs. G. Watson, on Sunday. Mr. and Mrs. Ahy Louch spent the Easter holidays with their parents at Corinth. Warden Lucas is spending a few days in Toronto. Mr. and Mrs. Lucas of St. Thomas have moved into the house recently bought from Mrs. R. Spence of Wardsville. Miss Hazel McCracken of Glencoe spent a few days with Misses Annie and Mary McArthur. The young people of Middlemiss held a social dance in the hall on Monday evening. Jack Graham and Harry Lucas have returned to Windsor after spending the Easter holidays with their parents here. Miss Gladys Congdon of Appin has returned home after spending a week with her cousin, Mrs. Garfield Watson. Dr. George and Harold Lucas of Kitchener spent Easter with their parents here. Miss Mary Wilmer and Miss Della Lucas of Kitchener have returned after spending the week-end with the latter's parents. Jack Battin and Bernice Graham of Chatham are spending a few days at their homes here. Miss Lila Battin and Miss Florence Carruth of London spent the week-end with Miss Lena Carruth. Miss Alice Underhill of Appin has returned to her home after spending a month with her sister, Mrs. G. Watson. Len. Clarke is under the doctor's care.

WARDSVILLE

Wardsville, April 8.—Mrs. (Dr.) Huser of this place conducted W. M. S. anniversary services at Sheldahl on Sunday morning and at Casselman on Sunday afternoon. Miss Lillian Sheppard of Windsor is home for Easter. Miss Martindale has gone home for Easter. Miss Farrington has gone to Aylmer to spend the holiday. Miss Clara Miller of Rodney spent the week-end with her parents here. Miss Helen Garrett and Helen Atchison are spending a few days in London with their brother. Miss Greta Heath has gone to the West where she has secured a school. Miss Annie Watterworth of London is spending the holidays at her home here. Mrs. C. B. Sheppard and Will have returned home after spending the winter in Detroit. The U. P. O. of the vicinity held a banquet for Mr. Petch and family, who have gone to Newbury to live. They presented Mr. and Mrs. Petch with chairs and Esther with a locket and chain. Mrs. Randles and Gerald returned home from California last week. They enjoyed their trip very much. The Misses Smith have rented their farm to Charles Blain of Newbury. Misses Ila and Waitie Quigley are home for the holidays. Mrs. Jackson and Nellie have gone to St. Thomas for Easter. Leonard, Ethridge and Desie Purdy spent a few days here last week. Miss Minnie and Florence and Will Randles are home for the holidays. George and Albert Constant of Windsor are here for the holidays. Ross Archer of Detroit spent a few days at his home here. Burglars ransacked the clothing store of Newton & Freese, Stratford, Sunday night, taking with them an assortment of clothing, approximating in value to \$500. The cash register, containing \$11 in cash, was not molested.

KILMARTIN

Misses Mary and Edna Leitch and brother Clarence of Glencoe spent the week-end at Neil Munroe's. Mrs. D. D. Campbell and daughters Marion and Lillian spent the Easter holidays in Warwick. Joseph Moore is visiting in Walkerville this week. Miss Eleanor McIntyre of Glencoe spent the week-end here. Rev. Mr. Robertson has purchased a car. The death occurred at Rainy River last week of Dr. Dugald McBean, formerly of the township of Yarmouth. He had a number of relatives in this vicinity. At the auction sale at Mrs. Nancy Ferguson's last week prices were good for all farm stock and implements. The fifty-acre farm was purchased by Archy McLachlan for \$3,600. Duncan C. McTavish has purchased part of the Colin Munroe property.

EKFRID STATION

Miss Margaret McAlpine of Hamilton and Misses Ethel and Donna McAlpine of Glencoe were recent visitors in this neighborhood. Services will be held in S. S. No. 4 on Sunday evening, April 18. The hour for Sunday school has been changed from 2 o'clock in the afternoon to 10:30 in the forenoon. Mrs. Wm. Switzer is under the nurse's care but we are glad to hear she is improving. Miss Lettie Cornell is in Victoria Hospital suffering from an ulcer on her eye. Mrs. Wm. Congdon visited with friends in Thamesville a few days last week.

SHIELDS SIDING

The Ferguson Crossing Needle Club will meet at the home of Mrs. Neil D. McVicar on Wednesday, April 21st. Everybody come, as we want a full attendance.

APPIN

The annual meeting of Appin Cemetery Co. will be held in the Orange Hall, Appin, on Friday evening, April 16, at 8 p. m. All interested please attend. L. McKinnon of the Longwoods road has gone to Kingston to assist his son putting machinery in a mine.
