# COAL MINERS DECIDE TO OBEY COURT ORDER, STRIKE CALLED OFF AFTER 17 HOURS' ARGUMENT

Acting President Lewis, in Making Announcement of Men's Decision, Declares Miners Cannot Fight Their Own Government-Action Means That President Wilson's Offer for a Peaceful Settlement Will Likely Be Considered Now.

GOVERNMENT TO ARRANGE MEETING. Indianapolis, Ind., Nov. 11.—Dan W. Simms, special U. S. district attorney, representing the Government in the injunction proceedings against the miners, stated that the next step of the Government probably would look to procuring a joint meeting of operators and miners at which negotiations for-a wage agreement would be reopened.

WILSON TO SUGGEST CONFERENCE. Washington, Nov. 11.-President Wilson probably will telegraph both the coal operators and officials of the United Mine Workers of Am asking them to get together and settle their differences, it was said today at the White House. At the same time, the president probably will renew his offer of he services of the Government toward mediation.

Indianapolis, Ind., Nov. II.—The United Mine Workers of America, through its general committee, decided early today to obey the mandate of U. B. District Judge A. B. Anderson, which teans the recall of the order for a rike of 425,000 bituminous coal miners of the manual coal miners of the decision was reached. rike of 425,000 bituminous coal miners in the nation. Some of the other members of the general committee, composed of international officers, district presidents and members of the executive board and scale committee, would not comment on the action, and Mr. Lewis, who appeared tired and worn by the long discussion, declined to add anything to his statement. The members of the committee, practically all of whom remained until the final adjournment, also seemed tired out and soon dispersed.

No draft of the order, rescinding the strike, which, under Judge Anderson's order must be submitted to the court at 16 o'clock this morning for his approval and be on its way to all local sub-district and district organizations by 6 p.m., had been made when the conference ad-

# TRY MAGNESIA FOR STOMACH TROUBLE

It Neutralizes Stomach Acidity, Prevents Food Fermentation, Sour, Gassy Stomach and Acid Indigestion.

Doubtless if you are a sufferer from indigestion, you have already tried pep-sin, bismuth, soda, charcoal, drugs and various digestive aids and you know these things will not cure your trouble—in some cases do not even give relief.

But before giving up hope and decidq you are a chronic dyspeptic just try
the effect of a little bisurated magnesia

You will find that provided you take a little bisurated magnesia immediately after a meal, you can eat almost anything and enjoy it without any danger of pain or discomfort to follow, and, moreover, the continued use of the bisurated magnesia cannot injure the stomach in any way so long as there are any symptoms of acid indigestion.

May Lose Ticket.

Mr. Drury, at the outset of his address, confessed diffidence at appearing at the meeting as "an attraction." He said: "I consented to come, though I am rather busy these days, and I am afraid I may lose my ticket in the cabinet makers' union, because I am working overtime. As I am not yet sworn in I should be retiring, in fact. I am retiring—as some of the reporters I am retiring—as some of the reporters are wondering where I am keeping my-

The premier-designate then thanked the audience for its kind greeting. He took it, he said, as an evidence that the people believed the new party would make honest efforts to advance would make honest efforts to advance the best interests of the people of the province as a whole. He assured the audience that there would be no class legislation from the U. F. O.-Labor Government, as it was not in any sense a class government. "We are not out to get things for the farmers which they should not have," he declared. "We will administer the affairs of the province for every citizen in it."

The duty devolving upon the people to buy as many Victory bonds as possible was emphasized by Mr. Drury who said the country had to deal justly and generously with the returned soldiers, so far as the country's finances would The kidneys, liver and bowels must be aroused to action by such treatment as Dr. Chase's Kidney-Liver Pills.

The kidneys, liver and bowels generously with the returned soldiers, so far as the country's finances would permit. In speaking of the people's responsibility for the re-establishment of the soldiers, he said: "I'm not much of a hand to shout patriotism," and he explained that he regarded the patriotic sentiment as somewhat similar to the sentiment of affection—not to be loudly talked about. "I am not going to shout patriotism," he said, "but I hope to show in my life that I live for the benefit of the community."

Reverting to his reference in his address at Barrie a week ago to the depression that he believed was coming. Mr. Drury declared that he was not a pessimist, but the facts should be faced, and the period of inflation due to the war was bound to come to an end. He said he thought it had already reached its peak.

Your present methods of brushing do not end film, and that is the teeth's great enemy. Now we ask you to try a new method—try it at our cost—and compare results.

### Film Can Be Ended Now

Most tooth troubles are due to that film. It is film that discolors - not the teeth. It is the basis of tartar. It holds food substance which ferments and forms acid. It holds the acid in contact with the teeth to cause decay.

Millions of germs breed in it. They, with tartar, are the chief cause of pyorrhea. The film clings to the teeth, enters crevices and stays.

Brushing does not end it. No ordinary tooth paste can dissolve it. Night and day it may do a ceaseless damage. And millions find, as a result, that ordinary brushing

Now dental science, after many years, has found a film combatant. The facts have been proved by convincing clinical and laboratory tests. The method is today approved by leading dentists everywhere.

For home use this method is embodied in a dentifrice called Pepsodent. And we are mailing 10-Day Tubes to all who ask, to let everyone see its effects.

### The Pepsin Method

Pepsodent is based on pepsin, the digestant of albumin. The film is albuminous matter. The object of Pepsodent is to dissolve it, then to day by day combat it. Science has found a harmless method of activating pep-sin. The usual method is an acid harmful to the teeth. So pepsin long seemed barred.

Now pepsin can be constantly applied-can be left to linger between the teeth. Now you can every day combat this film in a simple, dainty way.

Millions of teeth are being cleaned in this new way. You can see them everywhere - white, glistening teeth. Send this coupon for a 10-Day Tube. Note how clean the teeth feel after using. Mark the absence of the slimy film. See how the teeth whiten as the fixed film disappears. Learn what clean teeth mean—see how they look. Then decide for yourself between the old methods and the new. Explains How Nuxated Iron - Master Strength-Builder of the Blood-Helps Give Renewed Vim and Energy to Men and Puts Roses Into the Cheeks of Women.

If you tire easily, if you look pale, haggard and worn, if you feel generally weak, nervous and run-down, it would probably astonish you to look at a drop of your own blood under a pow erful microscope and compare it with a drop of pure, healthy blood—rich in iron. Actual blood tests show that a tremendously large number of people who are weak and ill lack iron in their blood, and that they are ill for no other reason than lack of iron. Iron deficiency paralyzes iron. Iron deficiency paralyzes healthy, energetic action, pulls down the whole organism, and weakens the entire system.

The story is filmed in a most interesting way as a story of by-gone days within a story of modern times. Which acts as a prologue and epilogue. A love quarrel in the modern story is averted when the lovers hear the sad tale of Evangeline. Nothing more idyllic could have been arranged than the Fox film interpretation of the courtship of Evangeline, the daughter of the wealthy Acadian farmer, and Gabriel, the som of the blacksmith. ### CLEMENCEAU SAID IT.

Premier Clemenceau of France, addressing a vast gathering at Strasbourg, declared that the solution of industrial unrest was work. Produce, says the "Tiger," and industrial and social ills will quickly be eradicated. The whole trouble with the world today, the reason for the non-production that has brought on perilous times, is that mankind in the mass imagined that as a result of the great convulsion there would at once be an improvement in the conditions of life that would provide the maximum of happiness with the minimum of effort. Men have failed to recognize that labor is one of the immutable laws of life. Without work, plenty of work, and hard work, little that is worth while can be secured and retained. The war has upset ages-old despotism and autocracy, but it hasn' magically brought about an era of ease for mankind, as millions seem to have expected. A very short spell of idleness such as the world is experiencing today will bring industrial and social ruin to mankind, but a general recognition that work is vital to progress, presperity, health and happiness, that labor is an unchangeable law, will bring the necessities, comforts and even luxuries of life once more within everybody's reach, and this will produce the contentment and stabilization so badly needed the world over

### THE FARMERS AND THE "FRILLS."

An unimportant question, perhaps, but one that will force itself on the attention of the new farmers' Government from the opening day of the session of the new Legislature will be the retention or disappearance of the residue of medieval ceremony that still attaches itself to so democratic a body as the Ontario Legislature. Of late years there had been some tendency to add to the "frills and feathers," and Toronto has sensical procedure that attached to its government. We hardly think the new Legislature will be found very much interested in having its session opened by a lieutenant-governor in kneeattended by a guard of honor. In fact, they may be found decidedly hostile to a continuation of this and other ceremonies that may have been in place in days when Tudors or Stuarts reigned in England, but that have no meaning for a Canadian province.

Ottawa has always appealed to some people in the capital city. It has never really succeeded, and even less success has attended the efforts at Toronto to ape Ottawa. There has always the extravagant cost of Government House and sensible lines of thought. its maintenance, and the new Government is hardly likely to be very sympathetic to this costly variety of provincial court.

### WORK FOR THE CHURCHES.

best in the past, and is still doing heroic work for better things, but today it is buttressed by many secular agencies of brotherhood.

Perhaps the church might widen and strengthen its work if it would supplement the traditional lines of effort by more modern and semi-secular activities. Into any such activities the church knows how to infuse its own particular spirit; it can assimilate them to the more traditional character of its work Already the churches have interested themselves in a practical way, in various social and economic causes Why should not the churches take up studies of modern thought also, modern political, social, philosophical and psychological incory? Freak denominations or societies are "beating them, to it." to use the expressive slang phrase. Modern ideas sadly twisted, orientalized, sensualized, or variously perverted, are spread among the curious or the eager to learn by eccentric agencies. Is it not the church's business to provide the people with safe and sane popularizations and criticisms of modern thought on political and social subjects, especially as all political and social thought has its religious implications? Mere denunciation of modernism in toto, or of science and its positions, will not satisfy intelligent people any longer. The day for that is past. Science justifies itself to reason by its achievements, its inventions, its promotion of human welfare; it is not mere theorizing, like the "science" and philosophy of long ago, but by its fruits ve know it

The churches might conceivably work with the universities in an effort to direct the philosophic, ethical and political studies of the people Many who have felt a want of attrac tion in the church's time-honored program would be drawn by its competent handling of the more richly complex systems of modern thought Could not the churches, in co-operation with colleges and schools, institute evening, Sunday and Saturday afternoon classes in ethics. economics, sociology and politics, inspiring the whole study with the reverent and idealistic spirit of religion? Such books as Bakunin's "God and the State," "The Political Theology" of Mazzini and the "International," William James' "The Will to Believe." "The Varieties of Religious Experience," Josiah Royce's "The Philosophy of Loyalty," P. E. More's "Aristocracy and Justice." Bertrand Russell's "Pathways to Freedom." D. H. VICTORY BONDS BY INSTALLMENTS. There is no sufficient reason why every Canadian man and woman should not be the proud possessor of a Victory Bond. If you are in regular employment and earning good money you can easily subscribe on the installment plan for a \$50 or \$100 Victory Bond.

All you have to do is to put every dollar you can gather together into Victory Bonds, and then go to any bank and buy on the installment plan all the Victory Bonds you can pay for during the next ten months. The banks will help you, and will store your Victory Bonds for you for a year without charge.

Employers with the assistance of the banks are also in a position to give favorable facilities for workers paying off their subscriptions for Victory Bonds in weekly or monthly install.

The banks have agreed also to grant reasonable credits to subscribers to the loan at the rate of 51/2 per cent per annum on loans to be repaid within one year. It will thus be seen that Canada's banks are doing all they possibly can to help you, whether you are a bank depositor or not, to make money on terms with.

# The Advertiser's Puzzle Contest

The correct solution of the first puzzle is 1,275.

As the number of contestants who submitted this solution exceeds the number of prizes, all those who submitted any other solution are eliminated from further participation in the contest.

Only one solution of the second puzzle may be submitted. It cannot be changed after it has been sent in.

No money has to be paid with the solution of the second puzzle. However, any contestant who did not pay up to the limit with his solution of the first puzzle, may remit with his solution of the second sufficient to make up the difference, and he will receive full credit, the same as if he had remitted the maximum amount in the first place. This is simply a privilege which The Advertiser extends to those who might like to take advantage of it; there is nothing obligatory about it. No names for subscribers under the new subscription feature of the prize awards may be sent in with solutions of the second

This puzzle will be given two insertions in The Advertiser, and two extra charts will be sent to all those who submitted the correct solution of the first puzzle. Anyone who submitted 1,275 as his solution of the first puzzle is entitled to these charts.

Solutions of this puzzle must be either brought in or mailed not later than 10 o'clock Friday evening, November 14, 1919. However, those residing where they do not receive the paper until several hours or a day later than city subscribers will have this time extended to correspond with the longer time it takes them to receive the paper. Solutions mailed so as to bear a postmark showing they were mailed within the time limit will be accepted the same as if they had been left in person.

In the event of ties on this puzzle, unless those tied prefer to divide the prizes, those tied will be required to solve the same puzzle again with the conditions changed, as will be announced later.

# THE PROBLEM

Draw a continuous chain of circles across the face of the chart to the extreme right hand column of figures, then back again to the extreme left hand

Begin at any number or figure in the extreme left hand column that you wish. Starting in this column you may go either up or down, or to the right, until you reach the extreme right hand column. Then you are to turn and go back, going up or down, or to the left. This is shown in the little illustrative chart below.

The problem consists of encircling the figures, the sum total of which will be the highest. Each section of the chain must consist of either three, four or five circles before it follows another By section is meant three, four or five circles in a straight line. In determining the number of circles in each section, count the last circle in any one section as also the first in the next section. For instance, in the small chart below, the fifth circle in the first section is also the first circle in the second

section, and so on.

run directly adjacent to those you drew the first figures to extend between any two sections of the chain. To illustrate this, you will notice that there is a row of figures between the third and fifth sections of the chain in the small chart. It is not permissible for the corners to touch obliquely. This rule is made to avoid any confusion that may arise in verifying the charts if two sections ran immedi-

ately alongside of each other. The prizes will be awarded to those whose sum totals of the figures in the circles are the greatest. By sum total is meant the figures added together.

When you have completed your solution, fill out the blank and send it attached to your chart to the Contest Manager. Cut the chart and blank out neatly around the margin, and do not send the rest

Any error in stating the total you obtain will invalidate your chart.

THIS ILLUSTRATIVE CHART AND EXPLANATION.

The above chart is snown to give contestants a better idea how to proceed. Starting in the upper lefthand corner, the first section contains five circles; the second, 4; the third, 3; the fourth, 3; the fifth, 4; and so on. In starting the chain, as well as in finishing, five circles appear in the extreme left-hand column. If for any reason a contestant prefers to start right out to the right, instead of going up or down, or wishes to end his chain without having more than one circle in the extreme left-hand corner, he may do so. Or he may have either three or four circles, either at the start or finish. At the turning point in the extreme right-hand corner he may have either three, four or five circles. In figuring up your solution, do not pay any attention to the figures outside of the circles; merely add together those you have drawn circles around. In drawing your circles across the big chart be careful not to efface them.

giving evidence on the charges before the board he declared his intention of getting even with Herscovitch for his alleged assault. Those who knew Burkart paid no attention, because they knew he would forget about revenge once his injuries healed up, but the board or governors took his threat seriously, hence his suspesion. The Herscovitch charge was dismissed. Burkart said Herscovitch hit him, and Herscovitch denied the charge point blank, while Umpire Billy Mallett of Hamilton said that Burkart had told him that he did not know how he got hurt. Wilde stated that he weighed about 109 pounds, and would enter the ring between three and five pounds lighter during his American bouts. He is five feet two inches tall, and carries most of his weight above the waist. He has been aptly termed a pocket edition of Bob Fitzsimmons.

His first bout in this country will be a ten-round no-decision contest probably at Milwaukee, Thanksgiving Day, or the following week. Two other similar bouts are also tentatively planned for points near St. Paul, and on the Pacific coast during the Christmas holidays. Wilde is under contractor return to this city the first week in January to start training for his championship bout, and will probably select quarters in New Jersey at a point near a golf course, where he can play the game, which forms part of his regular training routine. # FREIGHT CAR FACTS FOR WINTER MONTHS VITAL TO SHIPPERS

Canada Railway Board Makes Statement as to Conditions.

The Canadian railway board has is-

Three tons have fallen from the average load of the Canadian freight car. Instead of carrying 27.4 tons, as in 1918, the average car is now carrying only 24.4 tons. This does not mean a decrease in the total volume of freight moving, but an increase in the number of cars required to handle a given tonnage; an increase in the amount of tareweight (weight of cars less freight) to be handled in each train; an increase in the number of engines required, the crews on duty, the coal consumption and the trackroom occupied. The reserve margin of cars and engines is thus diminished and an unfavorable situation created alike for the railways and the shippers. To the latter, it may there-fore be of interest to consider the following review of the transportation situation and the prospect for the approaching winter.

Peace and Transportation.

Peace and Transportation.
The cessation of hostilities in Europe with its profound effect upon industry on the North American continent, as elsewhere, has had corresponding influence upon the traffic movements and railway problems. The task of moving munitions of war eastward was quickly replaced by the task of moving returning soldiers westward. Following a luli in all domestic freight movement. new in all domestic freight movement, new currents of traffic set in tending to approximate, in some degree, the old movements prior to the war. On the whole, however, up to the first of July last, the transportation situation became easy. Cars were plentiful. The necessity for loading them to full capacity became less apparent and, in spite of warnings from this board, the average load dwindled seriously, as noted at the beginning of this article.

Conditions now, however, are not so satisfactory. In March and April, the usual movement of box cars to the wheat-growing areas commenced in both the United States and Canada.

Hampered By Strike.
In the United States, where strikes
In car repair department were adding to the natural disadvantages of the "car pooling" arrangement, and where cars are, on the average, older than in Can-ada, the superior condition of Canadian ada, the superior condition of Canadian box cars for carrying grain, led many of these cars into the American West, where the wheat movement begins in July, two months before the Canadian movement is under way. The balance of cars owing by the United States to Canada was thus increased materially, so that today there are approximately 43,000 Canadian box cars in the United States as against 19,000 American box cars in Canada; a net balance of 24,000 cars due Canada and unlikely for some time to be available to this country. This figure, is should be observed, is equal to over 16 per cent of the total Canadian box car supply.

The Loss Checked.

The Loss Checked.
While this loss of cars to the United States has been checked and will uitimately be rectified by the return of the Canadian cars, serious additions to the volume of traffic to be handled by the Canadian roads are imminent, The shipment of coal from the Western Cons ment of coal from the Western Canailian mines since the beginning of the uel year, on April 1 is, to date, only one-third of the amount forwarded in the same period last year. Movement that American ports will be closed this winter to Canadian exports. Sixty per cent of Canada's export grain usual-by passes out by American ports. This will remain to be handled across Canla to Montreal, St. John and Halifax dred and fifty per cent to the volume of export grain now taken care of through the ports of the Dominion, and adding much more than 150 per cent in terms

of car-mileage.

The seven thousand new freight cars The seven thousand new freight cars built since last year are not one-third of the number now detained in the United States. The additional requirements for coal carrying and for the wheat trade—if the proposed American action is taken—will be extremely serious. At this time of year too, comes a heavy movement of perishable farm produce, moving before the cold weather will necessitate using special cars. Yet will necessitate using special cars. Yet, in the face of these factors—the average load per car in Canada has fallen three

Shippers, Attention!

The very serious attention of all Canadian shippers is called to this fact. It means that where eight cars were formerly required, nine are now necessary! Where 160 tons of tare-weight were thrown upon an engine for every 216 net tons of freight, there are now 180 tons! Labor scarcity, once the excuse for the light loading, is no longer a fact. It is important in the interests of the country, that the heavier loading practices be restored. Railway efficiency is part of your factory, mine, mill or warehouse efficiency!

How To Heip.

The shipper can protect himself by:
1. Loading cars to the full visible or carrying capacity.
2. Prompt loading and release of the carrier.
3. Ordering cars only when catally Shippers, Attention!

3. Ordering cars only when actually needed.
4. Reducing the diversion and reconsignment of cars to a minimum.

### WORK HAS COMMENCED ON OXFORD-COBALT MINES

COBALT, Nov. 10.—Work has been started on the Oxford-Cobalt claims which are situated in East Coleman in the vicinity of the Beaver and Temiskaming mines. The plans are to get the property in shape to start active mining and development work in the spring.

spring.
Work has been started laying the power line to the property and the erec-tion of a hoist-house and clearing of the surface will be gone ahead with

the surface will be gone ahead with simultaneously.

The Oxford-Cobalt claims were staked a number of years ago by Professor Russell of Woodstock College, and are about the last remaining claims in this wealthy silver area to be mined. Its position is promising, being almost directly opposite the excellent Kerr Lake Mine, with the Temiskaming and Beaver to the east of it.

The company claims that running through the entire length of its property is the most clearly defined fold and fauit plane in Southeast Coleman. This fault plane has been traced from Kerr Lake across the diabase sill and runs the length of the Oxford-Cobalt property towards New Lake. Prof. Russell said that the outlook for his property is very similar to that of the Beaver, where three excellent rich veins have recently been found.

Only the assessment work necessary to secure the patents have been attempted, yet this work has disclosed a strong vein system on the surface. One of these veins is heavy with Cobalt ore, while native silver was discovered in another as a result of a shot placed in it.

# "Lest We Forget"

Whoever you may be, go into your room to-day and sit quietly for a few minutes. Canada asks you for these minutes in Meditation upon Her Immortals.

Their spirit, the spirit of devotion to duty, of love of Canada and of home that illuminated their lives and made glorious their death, still lives. May it live in you and in me. May we be so inspired that from now onward, constrained by the love of Canada, we may ever advance her interests, ever work for a greater and more glorious Canada.

To-day is a day of memory, of thanksgiving, and to-day Canada has indeed the right to require from you a thanks offering. But no such demand is made. Canada simply asks you to the fullest extent of your capacity to advance her trade, production, and prosperity, and by so doing help yourself, protect your family, increase your income and all without risk.

Friend of Gen. Booth.

Commissioner Richards is one of the big men of the Salvation Army, being connected with it during its early struggles in old London and the various cities of England. He was closely connected with the late Gen. Booth in his work, his son being the private secretary of the general during the last seven years of the great organizer's life.

After leaving England, Commissioner Richards visited and worked for the army in practically every country in the world, including the South Sea Islands, and so was well able to give a vivid account of the work and a general sketch of the history of the Salvation Army in a highly humorous and instructive address.

He said that although he had been agnostic to the extreme in his younger days, he was converted on the third night after attending his first meeting of the Salvation Army. He was selected by Gen. Booth to go out and conduct meetings soon after, though he had very little experience. However, it was a way with the general to throw men After leaving England, Commissioner

After carrying on work here among the natives, the army was requested by the Dutch authorities to take over the instruction of the colony of lepers on the island, who up to this time had been given no consideration. The army was able to better the condition of these unfortunates. Many of the victims were converted. From this island the operations spread to other islands of the Positic Converted.

# BOTH PROHIBITION BILLS ARE PASSED BY SENATE

Government Measures Get By After a Hard Fight-Minor Amendment Is Made to Doh erty Act to Permit Sale of Liquor for Sacramental or Medical Purposes.

OTTAWA, Nov. 10.-The Govern-, this amendment was as follows: ment's two prohibition bills were successful in running the gauntlet of the Upper House of Parliament before the Prorogation of Parliament today.

The bill to amend the Canada temperance act by making provision for provincial plebiscites on the petition of the legislature to decide on the matter of the importation of liquor came in for the most criticism. An amendment moved by Senator Ross of Middelton, N. S., to defer consideration of Parliament was negatived on a vote of 18 to 12, and the second reading declared carried on the same division. The vote was as follows:

Yeas—Senators Ross, Milne, McDonnell, White (Montreal), Bostock, Powers, McSweeney, McHugh, Cloran and Desaulniers.

Nays—Lougheed, Foster, Turriff, Sharpe, Blaine, Tanner, Girroir, Webster, White (Pembroke), Proudfoot, Thompson, Yeo, Watson, King, Beith.

Both divisions were along non-party lines.

Senator Power said the amount of sixty millions provided for in the supply bill for soldlers—forty million for re-establishment and twenty mind on the supply bill for soldlers—forty million for re-establishment and the Govermment had decide not to give them any more cash.

mental purposes.

The Supply Bill. When the Senate reassembled after the noon recess, Sir James Lougheed introduced the supply bill amounting to \$62,000,000. Senator Bostock criticized the bill as being a large one in view of the fact that it was a special session of the

House.

Senator Turriff characterized the vote of \$20,000,000 for soldiers' land settlement as foolish expenditure. He advised the Government to go slow along these lines. He commended the vote of \$40,000,000 for soldiers' civil re-establishment, strongly opposing a cash gratuity to the men. He argued that the men had been more than fairly treated and was glad that the Government had decided not to give them any more cash.

Senator Power said the amount of sixty millions provided for in the sun-

perial army.

The bill was given third reading.

LOW EXCHANGE RATES.

New York, Nov. 11—New low records on British, French and Italian exchange were made today in the local market. A pound sterling brought only \$4 12 for demand bills, and an American dollar brought 9.37 franc checks and 12.32 Italian lire. Heavy offerings of com-mercial bills on foreign houses, which met with little response from buyers, caused the dealing. caused the decline caused the decline.

The previous low record in sterling exchange was made August 20, when a pound sterling brought \$4 12½. The rate in normal times was \$4 87. Franc checks at 9.37 were 17 centimes below the previous low price, while lire at 12.32 were 52 centimes off yesterday's low price, the previous low record. The normal rate on both francs and lires was approximately 5.18½ per \$1.

Children Cry for Fletcher's

Fletcher's Castoria is strictly a remedy for Infants and Children. Foods are specially prepared for babies. A baby's medicine is even more essential for Baby. Remedies primarily prepared for grown-ups are not interchangeable. It was the need of a remedy for the common ailments of Infants and Children that brought Castoria before the public after years of research, and no claim has been made for it that its use for over 30 years has not proven.

What is CASTORIA?

Castoria is a harmless substitute for Castor Oil, Paregoric, Drops and Soothing Syrups. It is pleasant. It contains neither Opium, Morphine nor other narcotic substance. Its age is its guarantee. For more than thirty years it has been in constant use for the relief of Constipation, Flatulency, Wind Colic and Diarrhoea; allaying Feverishness arising therefrom, and by regulating the Stomach and Bowels, aids the assimilation of Food; giving healthy and natural sleep.

CHINESE NATIONALISTS HAVE FORMED LEAGUE Rooms Opened on Clarence Street

Charlie Cheu is the president of the Chinese Nationalists' League formed in this city and opened on Saturday. The office of the league is located on Clarence street in the rooms formerly occupied by the H. D. S. Association.

Almost every large city in the Dominion has a league of this sort. It is organized for the advancement of the Chinese in this city of whom there are no small number, and to aid those Chinese who might be in distress at any time or to assist in placing Chinese who come to the city from outside places.

Although today is national fish day, the day adopted by the Government to popularize the consumption of fish, no notification has been given to the city fish market and no extra supply of fish has been received for the occasion.

Only four hundred pounds of fish were received on Saturday instead of the usual six to nine hundred. Yesterday not a fish graced the city stall in the market house. For today the personnel of the market was absolutely ignorant Saturday.

CITY FISH MARKET HAS NO NOTIFICATION OF DAY AND NO FISH TO SELL

they were prepared for the day, and claim that they are able to fill the demand day to day.
