The copy filmed here has been reproduced thanks to the generosity of:

Metropolitan Toronto Reference Library
Baldwin Room

The images appearing here are the best quality possible considering the condition and legibility of the original copy and in keeping with the filming contract specifications.

Original copies in printed paper covers are filmed beginning with the front cover and ending on the last page with a printed or illustrated impression, or the back cover when appropriate. All other original copies are filmed beginning on the first page with a printed or illustrated impression, and ending on the last page with a printed or illustrated impression.

The last recorded frame on each microfiche shall contain the symbol $\rightarrow$ (meaning "CONTINUED"), or the symbol ∇ (meaning "END"), whichever applies.

Maps, plates, charts, etc., may be filmed at different reduction ratios. Those too large to be entirely included in one exposure are filmed beginning in the upper left hand corner, left to right and top to bottom, as many frames as required. The following diagrams illustrate the method:

L'exemplaire filmé fut reproduit grâce à la générosité de:

Metropolitan Toronto Reference Library
Baldwin Room

Les images suivantes ont été reproduites avec le plus grand soin, compte tenu de la condition et de la netteté de l'exemplaire filmé, et en conformité avec les conditions du contrat de filmage.

Les exemplaires originaux dont la couverture en papier est imprimée sont filmés en commençant par le premier plat et en terminant soit par la dernière page qui comporte une empreinte d'impression ou d'illustration, soit par le second plat, selon le cas. Tous les autres exemplaires originaux sont filmés en commençant par la première page qui comporte une empreinte d'impression ou d'illustration et en terminant par la dernière page qui comporte une telle empreinte.

Un des symboles suivants apparaîtra sur la dernière image de chaque microfiche, selon le cas: le symbole $\rightarrow$ signifie "A SUIVRE", le symbole ∇ signifie "FIN".

Les cartes, planches, tableaux, etc., peuvent être filmés à des taux de réduction différents. Lorsque le document est trop grand pour être reproduit en un seul cliché, il est filmé à partir de l'angle supérieur gauche, de gauche à droite, et de haut en bas, en prenant le nombre d'images nécessaire. Les diagrammes suivants illustrent la méthode.

MACLEAN & Co. in issuing this Catalogue respectfully ask attention to the following points:

I The absence of any book from the Catalogue must not be taken as proof that it is not in stock, as additions are constantly being made. They will procure a supply of any work immediately there is a demand for it.

II. Any book not in stock they will use every effort to obtain—if American, within a week; and if English, in about five or six weeks.

III. The prices affixed will, they believe, be found as low, and in many cases much lower than those hitherto charged. Occasionally, new editions are issued at lower rates; in such case they will immediately reduce their price. If at any time the price charged is above that marked in the Catalogue, it will arise from the Book supplied being a new edition, which at times are issued improved and enlarged, at a slightly advanced rate.

ASTRONOMICAL APPARATUS.

The following apparatus are of Canadian manufacture, that portion of the work which comes within our department having been executed by ourselves. We can confidently say that these apparatus are equal to any imported, and at much lower prices:—

The **TELLURIAN** is designed to illustrate the various phenomena resulting from the relations of the Sun, Moon and Earth to each other; the succession of day and night, the change of the seasons, the change of the Sun's declination, the different lengths of day and night, the changes of the moon, the harvest moon, the precession of the equinoxes, the differences of a solar and sidereal year, &c. The Moon revolves around the Earth, and both together around the Sun, while Sun, Earth and Moon revolve around a common centre of gravity. Price, \$6.00.

The **PLANETARIUM OR ORRERY**, represents the proportional size and relative position of the Planets composing the Solar System, except the asteroids, and shows their annual revolutions. A correct idea of the Solar System is seldom received, except by such aid. With it we see the Planets and their Moons circling round their common centre, each in its separate orbit, and occupying its own place in the Ecliptic—and system is devolved from the seeming chaos of the stars. Price, \$10.
