Reuben Sparks

Prominent Citizen Who Died at His Home Last Saturday

On Saturday, January 7th Waterdown lost one of its oldest and very highly respected citizens in the person of Mr. Reuben Sparks, whose death occurred at his home here after a brief illness. Mr. Sparks had been seriously ill several weeks ago, but rallied and was able to be around again.

The late Mr. Sparks was born in Devonshire, England, Oct. 8th, 1834 and came to Canada when a youth. He was engaged in farming for over half a century, after which he retired and came to Waterdown where he has been active in all things beneficial to the village, and has made a host of friends here.

Mr. Sparks was a Township councillor and also assessor for a number of years, and for the past 20 years has been one of the village auditors. He was actively engaged in the insurance business up until the time of his death.

Mr. Sparks was married in 1859 to Miss Sarah Jane Mills, of Glandford, who with seven children survive to mourn his loss. Horace of Hamilton, Charles of Buffalo, Alfred of San Francisco and Edward at home. Mrs. Thos. Mills, Carlisle, Mrs. Nelson Morden and Mrs. (Dr.) R. J. Vance, Waterdown.

The funeral took place on Tuesday from his late residence, Mill street, to the Waterdown cemetery, and was attended by a large number of friends. The pallbearers were three sons, Horace, Charles and Edward, and three sons-in-law, Thos. Mills, Nelson Morden and Dr. R. J. Vance.

Millgrove

The Millgrove church will be reopened on Sunday, Jan. 22nd.

Miss Arlene Pepper spent Sunday last with Miss Nora Rayner.

Mr. and Mrs. Henry Reid and Mr. Denholm spent Sunday in Hamilton.

Our young people are enjoying themselves on the ice these evenings with bon-fires.

There will be a social evening in connection with the League next Monday evening.

NOTICE

In conformity with the Statutes the Cemetery Board meeting will be held in the Bellhouse on Monday evening, Jan. 16, 1922 at 8 o'clock. W. A. Ryckman, Sec. Treas.

The Election

Once again the village elections have come and gone and another council with three new faces was sworn in last Monday. Reeve Smith was re-elected for a third term as was also Councillor F. W. Crooker. The three new members being S. Frank Speck, Geo. E. Nicholson and G. H. Greene. May their labors be easy and their friends many. Following is the result of the poll.

FOR REEVE

R. Smith	147
Geo. Dougherty	77
D. S. Atkins	14
FOR COUNCILLORS	
S. Frank Speck	143
F. W. Crooker	129
G. H. Greene	117
Geo. E. Nicholson	107
W. A. Ryckman	92
Wm. Edge	78
A. Dale	55
A. J. Lovejoy	49

To the Ratepayers of Waterdown

We the undersigned do make this declaration knowing it to be true, that Richard Smith, Reeve of Waterdown did on the evening of December 26th at a nomination meeting, and also during his house to house canvas through the village, make a false statement which was of a misleading nature to the public, namely: That part of the then existing Council wanted to put through a motion whereby the village would have had to pay between \$1300 and \$1400 for certain work to be done on the Provincial Highway between Main and Mill streets on Dundas street. Mr. Smith claims the credit of saving the village this amount, which is absolutely false. We think the people would prefer facts rather than such campaign literature which has no foundation. It is absolutely false for Mr. Smith to make such a statement, as there never was a motion of such a nature thought of by any one of the three retiring Councillors, and we also challenge Mr. Smith or any ratepayer of the municipality to say that we at any time tried to saddle any debt on the village in any shape or form, and we also invite the closest scrutiny of all our work in the council during the past year.

We hereby challenge Mr. Smith to come across and prove his statements within two weeks from date, and also his motive to put us in a wrong attitude before the ratepayers.

We accept the verdict of the electors in good grace and thank our friends for their generous support.

David S. Atkins
Alfred Dale
Geo. Dougherty

Bible Class Meets

The Ladies' Adult Bible class of the Methodist church held their annual meeting and election of officers at the home of Mrs. A. E. Alton on Tuesday evening of this week. The following officers were elected. Mr. Broadbent, Teacher; Mrs. J. Daley, President; Mrs. E. T. Sawell, Vice-President; Miss Nellie Smith, Sec'y. Mrs. A. Newell, Treasurer; Mrs. J. Tuck, Convenor of Devotional Committee; Mrs. G. H. Greene, Convenor of Membership Committee; Mrs. H. Featherston, Convenor of Social Committee.

Locals

Mrs. Geo. Nicholson and Mrs. G. H. Greene spent a few days last week with friends in St. Catharines.

Mrs. W. A. Parker of Caledonia spent the week end at the home of Mrs. S. Frank Smith, "Hawk's View Place."

The Senior and Junior baseball players are requested to turn in their suits and all equipment belonging to the W. A. A. A. Kindly leave same at Gordon's.

The Mission Circle will meet Sunday afternoon at 2.30 at the home of Mrs. John Prudham. A good program is being provided and a full attendance is expected.

All returned soldiers of this vicinity are requested to meet at the Bell house on Friday evening, Jan. 20th, for the purpose of organizing a local branch of the G. A. U. V.

Mrs. A. L. Featherston had the misfortune to fall on the sidewalk at Reid's corner last Friday evening receiving injuries which confined her to her home for several days.

Mr. Philip Binkley, a former resident of this village, died at his home near Greensville last Monday in his 62nd year. The funeral will take place today (Thursday) to Glen wood cemetery.

Miss Florence Smith, who has been visiting relatives in Chicago the past two months, has left for Saskatoon, Sask. to spend the remainder of the winter with her brothers, E. Evans and S. Frank Smith.

Mr. John Harvey suffered serious injuries to his head at the Burrow, Stewart & Milne Foundry when he was jammed between the doors of an elevator. He was removed to the General Hospital where his condition is reported critical.

BORN—At Galt Hospital, on Friday, Jan. 6th, 1922, to Mr. and Mrs. J. H. Prudham (nee Grace McQueen) 39 Lansdowne Road north, Galt, a daughter.

Fellow Ratepayers:

I wish to thank the people of Waterdown for the generous support given me at the Polls when I was re-elected to the council for 1922, and I wish you all a happy and prosperous year.

F. W. Crooker.

To the Electors:

I wish to thank you for the generous support given me at the last election, and hope the coming year will be one of prosperity to all.

Richard Smith.

To the Electors of Waterdown:

I sincerely appreciate the honor and unsolicited large vote given me at the election on January 2nd, and trust I will not be disappointing in your confidence.

G. H. Greene.

To the Electors:

I desire to thank my many friends for their support on Election Day, and wish all a most prosperous year.

Geo. Dougherty.

The Sawell Greenhouses

To the Farmer:

The purchase of a Piano or Victrola is only purchased invariably once in a lifetime. Therefore it behoves the purchaser to get the best and make sure you have the best.

I have had 25 years experience in tuning and repairing musical instruments, therefore feel quite confident I can choose the best instruments on the market.

I shall be pleased to place any instrument in your home beside any other in fair competition and let you yourself be the judge, without you feeling under any obligations absolutely. I can also save the purchaser quite a few dollars on account of my expenses being so low. I will always give you my best personal service and devote the whole of my time to supplying the country people. A postcard or telephone call will oblige.

Yours truly,

F. WATERS

SELLING FARM PRODUCE

Standardization Is Necessary for the Best Results.

Graded Fruits or Vegetables Attract While Mixed Grades Repel—The Satisfied Consumer Will Come Again—Quality Pays.

(Contributed by Ontario Department of Agriculture, Toronto.)

Will the consumer pay for quality? Yes, and liberally if he understands what standardization means. Criticism is frequently directed at the farmer producer for the lack of attention given to grading and packing of the product of his farm. Fruits in different stages of ripeness, different sizes, shapes and colors are frequently seen in the same package. Chickens of various breeds, sizes, types and degree of plumpness are jumbled together in the same crate and form a marked contrast when placed beside a crate containing birds of the same sex, size, plumpness and color. To the well ordered mind uniformity always appeals, while mixtures and jumbles repel as so much junk. If a child goes into a candy store it will soon learn that mixtures are sold at a lower figure than standard confections. And so it goes through life — a mental attitude is developed by the great majority of consumers to regard those products that are not standardized as being less attractive and having a lower value. The percentage of particular consumers has increased much faster than the percentage of agricultural producers who standardize their products. In the old days the wormy apple, the misshapen potato and the old hen may not have lost their attractiveness, but times have changed, more people have more money to spend on foods than ever before. With the increase of the family income or wealth during the past twenty years the attitude of the younger generation towards the foods that they eat has changed very considerably. If we refer to the good old days when oatmeal was the standard breakfast food and citrus fruits were only seen at Christmas time, we will realize what present day attitude toward quality in food-stuffs means when compared with the past. With this advance in tastes for foods which may be largely flavor and of little value when considered from the standpoint of nourishment, the demands for foods that appeal to the eye and to the sense of taste have increased very greatly during the past five years.

People Will Pay for Quality. Standardization of food products will put the rosy cheeked, clean, uniform, sound apples in one basket and it will put the wormy, scabby, misshapen product in another. People are willing to pay for quality providing they have a guarantee that they will be handed a quality product in exchange for their money. How many householders have had the all too frequent experience of putting one-third of their purchase in the garbage can? Inferior materials should be directed into channels

where they would be used to the best advantage instead of being a millstone or dead weight in occupying space, increasing carrying costs in transportation and reducing the attractiveness of the superior portion of the commodity. In seasons of food shortage mixed and lower grades of food products will usually sell and show a margin of profit, but when food products are abundant the more attractive grades sell most readily and create a want for more high-class produce, which demand frequently must be filled from the lower grade. This substitution of a low grade for a high or standard product kills the incentive to buy. Stung once, the particular purchaser consumer will hesitate to buy. They look, but do not buy.

Grading Best for Perishable Foods. The amount of perishable food in the fruit, vegetable and poultry product classes that is now consumed, while very large, is not as great as it would be under standardization. Experiences with mixed grades, poor quality and poor packing leave an impression on the mind of the average purchaser that will take some time to erase. When the perishable food product of Ontario is standardized and marketed in a way that will command the confidence of the consuming public an increased demand is bound to follow.

The Satisfied Consumer Is an Asset. If all the food produce offered for sale could be standardized and marketed in such a way as to develop the market for future crops much benefit would result. Satisfied consumers of this year's product will look to the same source again next year. Consumers know or should know what they want, and if given a standardized packet of food product in exchange for their money will, if suited, go on patronizing standard products. Salesmanship has been too frequently used to sell a consumer something that he did not want, material sold with the one idea of getting rid of it and no thought of the future. If the farm end of the food products industry is to develop to the fullest it merits, all produce grown for sale will have to be marketed through co-operative marketing organizations. Standard, honestly prepared, packed and delivered produce is the only course to pursue in developing a worthwhile market for farm produce in our Canadian cities or abroad. Any food producing community that is without a co-operative marketing organization should consider the establishment of such. These districts that have such should consider expansion by amalgamating with similar organizations. Standardized products, common honesty, any industry will make for success in producing and disposing of farm products.—L. Stevenson, Secretary, Department of Agriculture, Toronto.

Every farmer should keep some sort of account system of his business. It should show the profit and loss of all of his operations. Sometimes we can not prevent outbreaks of live stock disease on our farms, but we can and should always use every preventive measure and see that proper precautions are taken when the disease first makes its appearance.

Mineral Elements Become Exhausted. Frequently one of the mineral elements—lime, potash or phosphorus—is exhausted by cropping or leaching. Nitrogen exhaustion is a very common condition noticeable in lands that have been cultivated for more than twenty-five years. After all, the soil is only a storehouse for those elements required in the life processes of the food plants that the farmer grows. In that storehouse various forms of life are at work converting the unusable to a usable or food condition for the plant. If we crop for years and exhaust the nitrogen or the potash or the phosphorus to a point where any of such could not be supplied in quantity sufficient to meet the full demands of the growing plant then we have a condition of plant mal-nutrition or starvation.

The Reason. Hoggins was travelling at a fair rate of speed, but there would never have been a disaster had not some fools watered the road. The natural thing happened. As he turned a corner the car turned turtle. Fortunately, Hoggins landed in a wet but soft ditch. A few minutes later, when he had scrambled out, and was mournfully regarding the machine, a friend came along. "Hallo, Hoggins!" exclaimed the fool. "What's the matter? Has your car turned turtle?"

Oh, no! Oh, n-n-n-not!" answered Hoggins sarcastically. "These children here wanted to see how the machinery worked, so I had the car turned upside-down just to please them!"

EFFECTS OF CROPPING

Sure to Exhaust the Best Soil in Time.

Plant Food Must Be Supplied—Mother Earth Has Her Limits—Seven Rules for Poultry Raisers—Breaking Up Broody Hens.

(Contributed by Ontario Department of Agriculture, Toronto.)

Lands that have been farmed for half a century usually show a decrease in crop production. A few farms that have been well managed in the various sections of Ontario are still very productive. Some have been so depleted of the plant food materials that were accumulated during the period of forest development as to be unprofitable under tillage today. Previous to clearing and cropping the process was accumulating fertility. Since cropping has been practiced the process has been reversed and supplanted by one of expenditure. Under a farming practice that exhausts the humus and returns no vegetable matter the soil hardens quickly, dries out and becomes non-productive, simply because there is neither food nor soil life to release such to growing plants.

Mineral Elements Become Exhausted.

Frequently one of the mineral elements—lime, potash or phosphorus—is exhausted by cropping or leaching. Nitrogen exhaustion is a very common condition noticeable in lands that have been cultivated for more than twenty-five years. After all, the soil is only a storehouse for those elements required in the life processes of the food plants that the farmer grows. In that storehouse various forms of life are at work converting the unusable to a usable or food condition for the plant. If we crop for years and exhaust the nitrogen or the potash or the phosphorus to a point where any of such could not be supplied in quantity sufficient to meet the full demands of the growing plant then we have a condition of plant mal-nutrition or starvation.

The Reason.

Hoggins was travelling at a fair rate of speed, but there would never have been a disaster had not some fools watered the road.

The natural thing happened. As he turned a corner the car turned turtle. Fortunately, Hoggins landed in a wet but soft ditch.

A few minutes later, when he had scrambled out, and was mournfully regarding the machine, a friend came along.

"Hallo, Hoggins!" exclaimed the fool. "What's the matter? Has your car turned turtle?"

Oh, no! Oh, n-n-n-not!" answered Hoggins sarcastically. "These children here wanted to see how the machinery worked, so I had the car turned upside-down just to please them!"

Seven Rules for Poultry Raisers.

Here are seven safe rules for getting the most money from the summer flock:

1. Produce infertile eggs by removing the roosters from the flock in the summer time.
2. Provide clean nests and keep eggs clean.
3. Do not wash eggs.
4. Gather eggs twice daily during the summer to prevent them from being heated by the hen.
5. Keep them in a cool, dry place, away from the flies.
6. Market them at least twice each week.
7. Insist that they be bought on a quality graded basis.

Breaking Up Broody Hens.

Neglect in breaking up broody hens means a serious reduction in the number of eggs produced by Indiana farm flocks.

Confinement of broody hens in a slat bottom coop has proved satisfactory. This coop should be covered on top with slat or wire sides and may be placed outside, preferably under a tree to insure shade. A slat bottom coop prevents fowls from becoming comfortable and these soon lose their broody traits.

Common practice is to place hens in the coop for three days, releasing them in the evening. If they return to the nest they are returned to "jail" for three more days. This usually breaks up the most stubborn sitters.

Removing the broody hens from the nest the first evening she sits is a very important factor in breaking up broodiness. If hens are allowed to be undisturbed a few days it requires more time to break up broodiness and this results in a longer period of non-production.

Nasturtiums do not require rich soil, in fact, if put on rich soil they will produce more vine than flowers.

The reproduction of fruit and vegetables at home relieves transportation difficulties and solves the marketing problem.

Extra good growth of musk melons may be had by putting a bushel or so of well rotted manure in the bottom of each hill. Plenty of water during warm dry weather also helps.

Aunt Ada's Axioms: Someone has said that a farm is a business with a home attached; but the best farms are homes with a business attached.

Elm, maple, or even nut trees and fruit trees are good to plant along highways. The objection to fruit and nut trees is that they may be broken down by over-zealous collectors of fruit. This is not apt to happen if they are common on the highway.
