Brockville — Ontario

Local Items

The Thanksgiving Day rate on the Grand Trunk Railway will be in effect from the 17th to 22nd inst.

Mr P. C. Connon of the Ontario Agricultural College has joined the staff of the Athens branch of the O. D. A.

Under a By-Law just passed the speed of motor cars in Brockville is limited to 10 miles; speed for other vehicles, 8 miles.

Isn't the local option campaign in Brockville a pretty quiet kind of a fight? The police may be excused for not knowing that the scrap is in progress.

The Women's Missionary Society of the Brockville district will hold its annual convention in the Methodist church at Spencerville on Friday, Oct. 10th. Miss Ella McLean who has been a missionary in Alberta and Mrs E. F. Carson of China will be present and deliver addresses.

Owing to unusual and unexpected expenditures, the village Athens council has had to materially increase the tax rate this year, which will be 24 mills on the dollar. This will be for only one year, and there is no reason in sight why next year's rate should be over 20 mills.

Mr and Mrs Fred Kerr of Greenbush, returned from their wedding tour, September 23 and on Thursday evening a large number of friends assembled at the home of Mr and Mrs Fred Olds and tendered them a kitchen shower. A most enjoyable evening was spent in playing games and social intercourse.

On Brockville market last Saturday Eggs ruled at 30c, although 32c was asked for some lots; butter sold from 28c to 32c, with 34c asked in some quarters; chickens, \$1 to \$1.25 per pair; potatoes, 60c to 70c per bushel; apples, 60c per basket; tomatoes, \$1 per bushel; celery, 5c per bunch, or 40c per dozen bunches wholesale.

At a meeting of the Public Library Board and a committee of ladies representing the Women's Institute, on Friday evening last, it was decided that the Institute undertake the work of opening the library for public use. During the winter months the Institute will meet in the council chamber, which they intend to fit up especially for the purpose.

Mr R. L. Ramsay, who has spent the past summer assisting in the local branch of the Department of Agriculture, leaves this week for Guelph to re-enter college for his final year. Mr Ramsay's ability and uniform courtesy have gained for him many friends in the united counties who regret his departure and will welcome his return at any time.

British Whig: The Stratford Herald suggests that the education department "might introduce the moving picture into the public schools." It "might" do any fool thing, and keep up the reputation it has established during the last couple of years. Geography by lantern views has been tried, in American schools, but not geography by movies. It remains for Dr Pyne to immortalize himself in the picture show business.

On Friday evening last about twenty friends of Mr and Mrs A. R. Brown gave them a pleasant surprise at their new home on Elgin street by invading the premises and spending three or four hours very pleasantly with them. During the evening refreshments were served and with music, song and story the time passed swiftly, and it was near midnight when "Auld Lang Syne" was sung and good-byes said.

The recent action of the Supreme Court of the I. O. F. in placing under a heavy disability all members who joined the order prior to 1899 has created great dissatisfaction among the members of the order affected. Last week Mr G. E. Minns of Brockville, representing the Supreme Court, visited Athens and endeavored to enlist the sympathies of the affected members in the movement towards "actuarial solvency" and would be pleased to address a meeting of Forrester's whenever a date can be arranged.

The Kind You Have Always Bought
Bears the Signature of Dr. J. C. Williams

VILLAGE COUNCIL

The regular meeting of the village council was held on Thursday evening last. All members present. Minutes of last regular and special meetings read and approved.

Moved by E. Taylor, seconded by W. H. Jacob, that the following accounts be paid: W. G. Parish, lumber, \$84.87; A. M. Eaton, work on debentures, \$2.00; D. M. Perry, work with horse, \$3.75; Wm. Hillis, carting, \$7.50; Scale Inspector, \$2.45.—Carried.

On motion, council adjourned until Tuesday evening, Oct. 7th.

Council met and adjourned until October 14.

G. F. Donnelley, Clerk

A RECTOR HONORED

At St. James rectory, Maitland on Saturday evening, Sept. 27, a presentation took place. Charles Stone and Herbert Dawson acted as a deputation on behalf of St. James parish church, Maitland; Christ's Church, Lord's Mills, and St. George's of South Augusta, and presented the rector, the Rev. S. B. G. Wright, M. A., with a purse of money.

After a few well chosen words by Mr Stone, Warden of St. George's, in which he spoke of the love and esteem in which all throughout the parish held their rector, Herbert Dawson made the presentation. Mr Dawson spoke in the highest terms of the rector and of the great progress which the parish was making and he said this gift was a small token of the deep appreciation of the whole parish.

Mr Wright was deeply moved by the kind words of the deputation and the kind thoughtfulness of his parishioners. In thanking them for this expression of their good will Mr Wright said his work in the parish of Augusta had always been a great source of pleasure as everyone had been so kind and considerate. If the work of the church in the parish was making good progress it was because the people were so faithful.

The New Tariff

Following are features of the new American schedule of duties of special interest to the people of this section:—

Cattle	Free
Sheep	Free
Swine	Free
Bacon	Free
Beef (fresh)	Free
Canned Meat	Free
Hams	Free
Lard	Free
Mutton	Free
Pork	Free
Poultry	Live 1c pound
	Dead 2c pound

Fatal Auto Mishap

The Grand Island (Nebraska) Daily Independent of Sept. 27 contains particulars of an accident that resulted in fatal injuries to Thomas O'Gorman, corner of Hall County.

He was motoring with two companions when in making a railway crossing the car swerved from the roadbed and striking the rails all excepting the driver were thrown out.

Mr O'Gorman married a daughter of William Stevens (niece of Messrs S. J. and T. G. Stevens of Athens) and came here with his bride about twelve years ago.

THE BUTTER MARKET

The Sun has previously pointed out that it would be well not to place too much confidence in the American butter market at the present time. Holdings of butter in the principal markets of the United States at the end of September were the largest in years. This was due largely to the adoption of dairy farming by large numbers of farmers throughout Wisconsin and other States. It is true that since that time there has been a big decrease in the make, due to dry pastures and that holdings have been somewhat reduced, but on the other hand we have Siberia and New Zealand awaiting the opening of the American market also.

Large amounts of butter are being held in Montreal by speculators awaiting shipment to New York and other American markets, and it is just possible, instead of our level of prices going up to theirs, that theirs will drop down to ours.

A peculiar though not new feature of the butter market is that the retail price in Athens is higher than in Toronto or Hamilton.

WE ANNOUNCE THE ARRIVAL OF A LARGE AND DISTINCTIVE VARIETY OF

PRETTY FALL WAISTS

The new fall models in Silk Shadow Lace, Wool Delaines, &c., are here, and never before have we shown such a large variety of pretty styles, included in the range are several new features such as the new Butterfly Collar, the new Grecian Collar with the high back, the extended shoulder effect, the new drop shoulder, &c.

WE INVITE YOUR INSPECTION

The New Fall Underskirts in the narrow models. We are showing a pretty Silkenette Skirt in the much wanted shades of green and cerise, all sizes, special \$1.50

Also a Pretty Silk Underskirt in all shades and shot effects, also black, regular \$3.90, special \$2.90

SUNDAY SCHOOL LESSON

Lesson II.—October 12, 1913. Jealousy and Envy Punished.—Num. 12: 1-16.

Commentary.—I. The envy of Miriam and Aaron (vs. 1-8). 1. Miriam—Moses' sister. From the incident of Moses' rescue from the river we know that she was several years older than he. She was evidently the leader in the opposition to Moses here mentioned, inasmuch as her name is given first, and she alone was punished, spoke against Moses. The essence of what she said is given in the next verse, because of the Ethiopian woman.—The Revised Version has "Cushite" for "Ethiopian." Cush is the Hebrew equivalent of Ethiopia, but it is believed that there was a place by that name in Arabia. Miriam and Aaron probably referred to Zipporah, whom they spoke of as a Cushite woman. Some think Zipporah was dead and Moses had recently taken a wife from among the Midianites, or Cushites. The fact of his having married an Ethiopian woman was simply a pretext for the complaint of Miriam and Aaron; the real ground was their envy and jealousy. 2. Spoken only by Moses—Miriam and Aaron readily acknowledged that Moses was endowed as a prophet. Their complaint was that they were not recognized as being on an equality with him. Their jealousy blinded their eyes to the fitness of things. Aaron's weakness in the matter of the golden calf proved his unworthiness to be a prophet, and the very conduct of Miriam and Aaron on this occasion proclaimed their unfitness to occupy the coveted position. The Lord heard the complaint of Miriam and Aaron, and the Lord would cause his servant. He knows all the assaults that are made upon his children, and he gives grace to endure.

3. Moses was very meek—That so high a tribute as this verse contains should occur in the book written by Moses himself, has given rise to much discussion. Many have supposed that Moses' humility would not have allowed him to speak thus lightly of himself. We note a few of the views held regarding this passage. 1. Dr. Clarke supposed the word translated "meek" means in this place "afflicted," and expresses the thought that Moses was greatly burdened as a leader by the murmuring and opposition of his people. 2. It is held that under the circumstances Moses was justified in declaring his own superior meekness, in order that the charge of Miriam and Aaron might be shown to be baseless. 3. The word "meek" as used here has in it the idea of personal piety toward God, and not distinctively the thought of meekness under trial toward men. 4. A reasonable conclusion is that the words included in this verse were written by a later scribe, as Ezra, and inserted at this point, to show the weakness of the charge against Moses. 4. Come out of the camp. Under the tabernacle. The Lord himself was not a place of assembly distinctively, but a place where the people could go to inquire of Jehovah regarding any matter. 5. The Lord came down.—We naturally think of God as being far above us, and this expression accommodates the act to our ideas. Pillar of the cloud. The pillar that rested upon the tabernacle. The Lord was in their journeys. 6. Hear now my words.—Addressed to Miriam and Aaron. Vision.—The common mode of revelation was to make the message known by means of a vision or dream given to the prophet. 7. Moses is not so.—Moses was more than an ordinary prophet, and God's communication of his will was different from that by visions and dreams. Faithful Trustworthy. Mine house.—The family of Israel. 8. Mouth to mouth. As we say, "face to face." Apparently Openly. The form of Jehovah (R. V.)—Jehovah manifested himself in such a form that Moses knew it was he. We were not afraid. This is the climax of their condemnation. They should have understood that Moses was divinely called and prepared to stand between God and the people.

11. Miriam punished (vs. 9-15). 9. The anger of the Lord Jehovah was greatly displeased. He departed. The Lord withdrew all manifestation of his presence when the cloud departed from the tabernacle. When, 10. Miriam was leprous (R. V.)—Leprosy ordinarily develops slowly, but in this case it came suddenly, showing clearly that it was a punishment inflicted by the Lord. 11. Beseech thee—Aaron realized the need of immediate help. Although he was a priest, he appealed to Moses to intercede for him, because he himself was involved in the sin. In this plea he really pays a tribute to Moses' integrity and piety. Wherein we have sinned—Aaron makes a frank confession of his sin, and prepares the way for receiving pardon. 12. As one dead.—The leper was separated from other persons, cut off from the privileges of society and public religious observances, dwelling without a camp. His flesh is half consumed. The leper is likened to a child born dead. 13. Moses cries unto the Lord. He was ready to intercede in behalf of Miriam, who had led in open opposition to himself. He cherished no resentment toward her and Aaron. Heed her now. The need was urgent, and Moses' prayer was earnest. His faith grasped an immediate answer. "Weak faith drops the new," grasps no definite time, and looks only for a gradual cure" of the leprosy of sin. The inference is plain that she was healed at once. 14. Spit in her face. An act denoting the utmost contempt; a most insulting act. The one spit upon among the Jews was made ceremonially unclean, and must remain away from the people seven days. Let her be shut out. Miriam had received a most expressive token of God's displeasure, therefore she must remain from his presence and from his people for seven days. 15. The people journeyed north. The punishment of Miriam, the result of her sin and that of Aaron, held back the hosts of Israel seven days from continuing their journey toward Canaan. This indicates in some degree how God looks upon sin. 16. Israel's journey renewed (v. 16). 16. Removed from Hazeroth. This was one of the stations at which Israel tarried several days on the journey from Sinai. It is a plain northeast of Sinai,

surrounded by tall sandstone cliffs. Wilderness of Paran—This wilderness lay to the north of the Sinai Peninsula. Its eastern border would be roughly a line drawn from the Dead Sea to the Gulf of Akaba. It lay between Midian and Egypt, and was Ishmael's dwelling-place.—Cam. Bib.

Questions.—Who were Miriam and Aaron? Why did they speak against Moses? What grounds had they for thinking they were the equals of Moses? What character is ascribed to Moses? How did their complaint affect the Lord? What did the Lord say to them? How did God talk with Moses? What punishment was sent upon Miriam? What appeal did Aaron make? For what did Moses pray? Why was Miriam excluded from the camp?

PRACTICAL SOCIETY.

Topic.—Sedition in Israel. I. Instigated against Moses. II. Quelled in defence of Moses.

The authors of the edition were two leading personages in the congregation of Israel, belonging to Moses' own family. Miriam and Aaron utterly disregarded the ties of nature, quite in contrast to Miriam's childhood devotion to her brother, especially as she was the leader in the coveted position. It was a sad manifestation of pride that over-whelmed her natural affection, that made her forget the obligations of her honorable office, to make pretense of being badly treated. It was an unworthy thing for a sister to undermine the power of one on whom God had laid great care and responsibility. Because the Lord had spoken through Miriam was sufficient reason why she should have been especially careful of what she said, yet she stooped from her high rank to indulge in evil-speaking, because of a personal grudge. Pride and envy had entered her heart so that all consequences of her sin were unheeded. Miriam and Aaron gave way to their petty jealousy under cover of conscience. They justified their act toward Moses by dwelling upon their own spiritual authority, forgetting that to envy those who receive the gifts of God is to rebel against him and provoke his displeasure. The Lord set singular honor upon Moses, denoted by the title "My servant Moses." There is a secret poison, a hidden plague in Miriam's ambition.

II. Quelled in defence of Moses. The direct interference of the Lord himself was necessary for the protection of his servant. He spoke suddenly to the three persons concerned, summoning them to appear at the tabernacle. He then called the two offenders by their names, leaving Moses to see and hear how the Lord vindicated him. He bade how the Lord vindicated him, as he had heard theirs. It was an occasion for the humbling of the proud and the exalting of the meek. It was a time of humiliation when Miriam and Aaron found that Jehovah had taken up the cause of their despised brother and had highly esteemed him, whom they had lightly esteemed to scorn. To bring allowed themselves to scorn. To bring out all the significance of the occasion it was needful to make special mention of the meekness of Moses. Though Moses was meek, he was not a pliable man. His meekness was consistent with power and authority. He went right on in the way of God's appointments. His meekness was accompanied with courage and persistence and a never-failing sense of right. He was a noble example of extraordinary strength of character, because his meekness was rooted in the will of God. Meekness had stored up that strength in his soul which proved available in the emergency of life. It was the result of many other graces. Besides vindicating Moses, and rebuking his detractors, the Lord put a mark of his displeasure upon Miriam. The punishment was as humiliating as it was public. Miriam was punished in the presence of the person she had injured, and by the great God against whose authority she had rebelled. She was excluded from the camp publicly, and greatly humbled by being cleansed in answer to prayer. The severity of her punishment reveals the divine abhorrence of sin. As Miriam's pride had been terrible in its manifestation, so her punishment was most grievous. Miriam, prophetess, as she was, and sister to Israel's lawgiver, had to pass through the ordinary ceremony for the cleansing of lepers. Her sin, though forgiven, was not to be lightly forgotten by herself or the people. Aaron's appeal implied his faith in the magnanimity and piety of Moses. From that sharp and trying scene Moses emerged with his character shining more luminously than ever. He joined with Aaron in interceding for their afflicted sister. His prayer was explicit, earnest, generous and well timed. The answer was most gracious and speedy. Miriam's sin checked the progress of the whole host of Israel for seven days, for the Lord did not give the signal for Israel's departure until Miriam was restored.

T. R. A.

THE POULTRY WORLD

MOULTING SEASON HARD ON LAYERS.

With the arrival of "dog days" comes the most critical time in the life of hens, the time of the annual moult. The shedding of old feathers and the growing of the new plumage comes just at the time when the vitality of the hen is at its lowest ebb. The moult laying season, together with the hot weather, has pretty well drained her strength and brought her to a state where she needs special care if she is to get into the winter season in full vigor and ready to do her share in replenishing the egg basket. In a normal moult about four months is required for a complete change of plumage; the first feathers beginning to fall about July 1. During the forepart of the moult egg production is not materially decreased. But as the process advances and the drain on her system incident to the growth of new plumage increases egg production gradually drops off until September 1 it has practically ceased.

MISS SACKVILLE-WEST WEDS.

London, Oct. 6.—The marriage took place of the Hon. Victoria Mary Sackville-West, daughter of Lord and Lady Sackville, and Harold Stanley Nicholson, son of Sir Arthur Nicholson, Under Secretary of State for Foreign Affairs. The ceremony was performed in the private chapel at Knole Park, the "Sackville residence." The Bishop of Rochester officiated.

The affair was a great society function, which most of the prominent people in London attended. A brilliant reception was subsequently held in the great hall of the Knole mansion.

While uns treatment will cause the hens to moult quickly, careful experimental evidence has not shown it to be entirely successful, and the matter is later egg production. This is probably due to the general shock to the system caused by the starving process followed by unusual feeding.

It is the general opinion that it is the best to let nature take her own course, while, inasmuch as possible, it is especially important that moulting hens be kept free from vermin. Hens are more susceptible to disease during their moult than at any other time, and it is for this reason that special precautions in matters of cleanliness and sanitation should be taken.

ONLY GOOD STOCK PAYS.

September and October are with the average poultrymen the beginning of the poultry year. It is then that account of stock is taken and books opened for the new poultry year. The old breeders have been disposed of, and the new stock is being put into the pens. It is now that the breeder begins to think of the future breeding pen for later of the few desirable breeding birds will be on the market. The up-to-date breeder getting rid of them before late fall sets in to make room for the new stock developing. Cockerels and pullets, of course, will be on the market during the fall and early winter, as in almost every case the leading breeders have March, April, May and June eggs, or they supply their own wants and those of prospective buyers, and hence the beginner can always find ready for him breeding cockerels and pullets at all ages during the winter. Not so with the older birds. They should be purchased now, and the sooner the better. These old birds are now in full moult, beginning to put the new feathers, and will be in fine condition by the time the hatching season is on.

Taking all things in consideration from a breeding standpoint, better results will be obtained from tested hens than from a younger stock. It is true that not a few good eggs will be obtained from hens at all ages, especially in the early winter, for they have not fully, as a rule, recovered from the moult. But the eggs laid will come at a time when one wishes to incubate them, and the chicks hatched from them will be strong and healthy. A vigorous strain and has been handled properly. These breeding hens, if from the Simon-pure utility breeder, are known performers, and their offspring will also be good producers. If from the fancier a fine show strain has been developed, and the chicks hatched from eggs of these will produce shape and feather that will win in the showroom, and in many cases from the leading breeders of the country the two have been combined, good utility qualities with shape and good plumage.

So the beginner in purchasing his many choices from which to select his future stock, and it is just here that the breeder should be on his toes, and here where the greatest good can be done, where the whole poultry press of the country will come down flat-footed and show them that the cheap stock cannot be of lasting benefit to them. The whole country in poultry-buying is looking too much to the price of the bird, and not to the quality. Every case they are getting just what they paid for, value received, but not what they need, or perhaps want. In only exceptional cases can tested hens be sold for less than \$3 up, or cock birds for less than \$5 up. Any good pullet (not scrubs that are so often sold) at all sizes and ages, will bring from \$2 up, and cockerels \$5 up. These are the lowest prices that the good breeders will sell birds of merit at, and the beginner will in a few years see for himself that to make a living those prices must prevail.

No breeder who traps nests and has selected the pullets from the first year's laying that have made records from 160 to 200 eggs in one year will sell them for less than \$3 up, and the better the plumage and shape tacked on the fowls with those records the more they are worth. It is the same with males.

NOTES.

Let the growing chickens out into the open field or on the stubble, where they may, at this season, be used to greatest advantage. The moult should be normal in growth and shape at three months of age. If, at this age, and are underweight, or are not coming in, they are likely to become first-class birds, and it is generally advisable to make table fowls of these.

Few hens lay continuously during the moult season. At the latter stages of moult the birds are not laying, and the new ones are making rapid growth, most hens cease laying for a time. It is advisable, however, to feed well during this time and keep the hens healthy, so that their non-productive periods are as short as possible. The ducklings rightly handled grow very rapidly. It is estimated that a Pekin duckling weighs two ounces when hatched, about a pound at four weeks of age, four to four and one-half pounds at from six to eight weeks of age, and from five and one-half to six pounds at ten weeks of age, when it is profitable to market them. These gains are only made when the birds are well fed and cared for.

A flock of this year's chickens, composed of birds of all sizes and ages, cannot be expected to do as well as if the birds are kept graded according to age and sex. Good birds may result from undersized chicks, if these little fellows are not completely starved, leaving them dead, or from a flock of larger and more precocious birds. When large numbers of chickens are raised, it is well to get the lot according to the size of the birds, which gives the smaller birds an equal chance with the older ones.—Farmers' Advocate.

FARM NEWS AND VIEWS.

Prevent pigweed from going to seed and avoid sowing the seed in grain and grass seeds. Frequent and thorough cultivation of the seed bed before sowing the seed will check growth in grain fields. Good plowing, through cultivation, with some hand-hoeing and pulling, will eradicate the weed from cultivated crops. It does not give serious trouble in fields where crops are grown in or a good rotation. It is most troublesome in gardens, but shallow cultivation and hoeing or pulling by hand will eradicate it.

Apples that are matured and well-colored are found to scald in storage much less readily than immature fruit. In this connection many growers overlook the fact that apples grow wonderfully in the last ten days before full maturity, adding bushels every day that they so hang—much more that banding the

FARM GARDEN

WHY FALL PLOWING PAYS.

Considerable is gained by plowing the ground in the fall, especially soil intended for corn the following season. Should the plot be a sod, which is most excellent for corn, late fall plowing turns up the roots, around which quite an army of cut worms have put up in winter quarters, and the cold, freezing weather of winter has a chance to destroy them, saving the future corn crop from much of their ravages.

When the soil is plowed late in the fall the piece must be gone over with an ordinary cultivator or with a sulky cultivator in the spring, to fine up the soil and make it in good order to receive the corn.

In what might be termed adhesive, clayey soil, even in fallow ground, fall plowing, followed by another plowing in the coming spring, is of great benefit in reducing the texture of the ground, and in making it more readily worked, as well as making it more suitable for a vigorous plant growth. There may be some cases where it will not do—and experience has taught the fact that it is unnecessary to plow, sandy soil. But for heavier soils late fall plowing is labor well spent.

While fall plowing is advisable for farm crops, it should generally be discouraged in orchards. The land in orchards should usually be left compact in the fall and covered with some close herbage.

Late cultivation may be injurious by inducing a late growth. At all events, it can be of small utility when the trees begin to mature and rain becomes frequent. This season of respite gives the grower an opportunity of raising a green manure and of adding fertility to the land at trifling expense and with no harm to his trees.

Only cultivated crops should be allowed in orchards early in the season. Grain and hay should never be grown in them. Nursery stock should not be grown in orchards.

The fall of the year is the best time to plow stiff clay soil. It can be plowed wetter at that time without injury to it than in the spring of the year, and the action of the frost on it during the winter will render it more easily pulverized in the spring.

Among the advantages to be gained by fall plowing may be mentioned that on clay grounds the action of the frost during the winter on the upturned soil kills the worms, grubs, etc., and also pulverizes the ground more effectually than it could be in the short length of time it is exposed in the spring; the crops can be gotten in in better season, and this is frequently of greater moment with spring crops, and the farmers' teams are usually in better working order than in the spring. Consequently the work is done when the horses are best able to perform it.

Formerly summer fallowing was credited with being the sole means of cleaning foul, heavy soils, but under such circumstances as farming is carried on at present, when the provision of winter keep for dairy stock and other animals is so important, and so costly, and so overwhelmingly important, side of all kinds, foul or clean, as the case may be, are sown to swedes or mangels as soon as possible. Corn which is sown down with clover and grass seeds comes after the roots, and there is little opportunity for effecting a thorough cleaning of the land during the whole course of a four years' rotation until the wheat stubbles come around again.

Our English cousins are strong in the advocacy of fall plowing. They claim that couch, docks and thistles are all easily disposed of in due season, and, in addition to these plant pests, many soil enemies of plant life will be destroyed in like manner. The latter usually infest the ground in large numbers after harvest time, but when the ground is opened up and aerated at this season they are thrown on to the surface of the soil, and there form a juicy morsel for many hungry birds, slugs, wireworms, earthworms, and many other insect pests are gotten rid of in this way, whereas if these attentions are neglected they reappear comfortably in the ground in a dormant state throughout the winter, and may wreak an enormous amount of mischief in the following season.

In addition to these insect pests there is the spawm of many fungoid diseases which attack wheat and other crops. This lies hidden below the surface of the soil, and, unless the resting places of these disease germs are broken up with a light skinning in early autumn, and the air and rain so admitted as to purify and cleanse the soil, there will in all probability be a serious outbreak of disease in the following season's crop. If the spawm is present to any considerable extent.

The resting spores of wheat "rust," for example, must be prevented from attacking early-sown autumn wheat, for which it has so great a liking, by allowing the air and rain to penetrate among the soil particles. Even the most tenacious clayey soils, if not too dry, will tolerate easily in the autumn and so admit of a riding-up being performed before there is any danger of the ground becoming too sodden by winter rains; and, moreover, the skimmings and weathered surface soil, the most useful medium for the growth of the succeeding crop, for the bottom layer is rarely ever disturbed by a second plowing in the following spring.

There is no doubt that the expected lower price of beets because of increasing free sugar is to be taken advantage of by trying to induce sugar beet growers in the United States, and especially in the west, to move into the irrigated district in Western Canada.

Every inducement that can be made in the price of land developed wholesale and at a lower money interest, cost of labor and material, and also every amelioration that can be supplied to foster the beet sugar industry will be provided. Only one-twentieth of the payment for land is required down, and the Canadian Pacific will lend sufficient money for the equipment and staking of the farm. Twenty years are allowed to complete the payments.

small loss that may occur from dropping.

While there will be nothing amiss in including a limited number of new varieties of trees when planning for setting out a new orchard, the main part of it should be composed of the old, tried-and-true sorts. Let "the other fellow" do the experimenting with new-fangled specimens.

The trees themselves are the only real index to the amount of fertilizer to be applied. Enough nitrogen should be used to produce a good vigorous foliage and growth and sufficient of the other ingredients should be added to develop a good crop. The amount must, therefore, vary with the age of the trees. When trees are first planted, many orchardists apply a small quantity of fertilizer around each tree. Professor Sears recommends a formula consisting of one ounce nitrate of soda, three-eighths pound high-grade sulphate of potash and five-eighths pound basic slag or acid phosphate, per tree, for each year.

For bearing orchards, Professor Sears advises 500 pounds of basic slag, or acid phosphate, and 300 pounds of high-grade sulphate of potash per acre. J. H. Hale uses for bearing orchards 1,000 pounds of bone and 400 pounds of muriate of potash. Professor Voorhes would use for a bearing orchard 1,200 pounds of the basic slag fertilizer already recommended, and Dr. L. L. Van Slyke, Geneva Experiment Station, recommends the following formula: Cottonseed meal, 100 pounds; raw ground bone, 100 pounds; acid phosphate, 10 1/2 pounds; muriate of potash, 100 pounds.

Oats grow best on soils with good water-holding capacity, as they require a great deal of moisture. When grown for grain, phosphorus is usually the most important fertilizing element which can be added. Very rich soils, especially if deficient in phosphorus, cause rank growth, with lodging as a result. When grown for hay or forage, nitrogenous fertilizers may be used. Oats do best on a rather loose, well-prepared seed bed. The common method of sowing broadcast on cornstalk land, without preparation and covering it with the disk harrow is careless and uncertain. A thorough preparation of the seed is quite as essential as with other crops.

Apples should not be picked too early. They should be allowed to hang on the trees until they have attained nearly the full normal color for the variety, and until they can be picked without pulling out stems or breaking off fruit spurs. Good, full color adds one-half to the market value of an apple. This is not a matter of looks, either, for the consumer has learned that the matured apple has a greater amount of sugar, consequently better flavor, than a green one.

One cause of spavin, ringbone and other bone troubles in horses is the lack of proper nourishment. An unbalanced ration, containing a large amount of corn and deficient in ash makes a porous bone with a rather spongy texture. Fed a proper ration, the same animal would develop a much stronger bone with a firm, solid texture. The bone diseases are usually simply an effort of nature to add extra growth to reinforce a bone that is not strong enough for its load. A great many of these troubles would be avoided if all horses, particularly when they are growing, were supplied an abundance of such feed as oats, with some of the legume hays roughage.

EXODUS TO CANADA

Arkansas Valley Beet Colony Will Remove. Alberta Will Get Some Desirable Settlers.

Denver, Colo., Oct. 6.—A new development in relation to the Colorado beet sugar industry and impending free sugar came to the front to-day. A colony of beet sugar growers in the Arkansas Valley have completed plans to move to Canada in the irrigated district in Alberta. They will form the nucleus of what is to be developed into a large colony for the upbuilding of the beet sugar industry of Alberta.

As favorable conditions as could be arranged were provided in order to induce the Colorado Beet Sugar Growers to make the change. The Canadian Pacific Railway, which organized the movement through its agency in Denver, provided a special car, special railroad rates and special sleeping car rate for the 25 Arkansas Valley farmers who made the trip.

Ready-made farms in the three million-acre irrigation belt east of Calgary had been prepared in advance for them. These farms, in accordance with the development system pursued by the Canadian Pacific, were supplied with newly-erected houses, barns, fences, and with wells dug, all ready to move into. Thirty-six farms were bought by the Colorado Beet Sugar Growers, some of those along representing others who did not go.

Sugar beets have been tried out in the Alberta irrigated district, so that the industry is through the experimental stage there and ready for a strong advance. There is a sugar beet foundry at Lethbridge, 150 miles from the district. In order to encourage the industry the railroad will give a low freight rate on sugar beets.

There is no doubt that the expected lower price of beets because of increasing free sugar is to be taken advantage of by trying to induce sugar beet growers in the United States, and especially in the west, to move into the irrigated district in Western Canada. Every inducement that can be made in the price of land developed wholesale and at a lower money interest, cost of labor and material, and also every amelioration that can be supplied to foster the beet sugar industry will be provided. Only one-twentieth of the payment for land is required down, and the Canadian Pacific will lend sufficient money for the equipment and staking of the farm. Twenty years are allowed to complete the payments.

MARKET REPORTS

TORONTO MARKETS

FARMERS' MARKET. Dressed hogs, heavy, 12.25 12.50. Do, light, 13.00 13.50. Butter, dairy, lb., 0.30 0.32. Eggs, new-laid, doz., 0.33 0.35. Chickens, lb., 0.18 0.20. Fowl, lb., 0.14 0.15. Ducks, lb., 0.16 0.18. Turkeys, lb., 0.18 0.20. Apples, bbl., 2.50 3.00. Potatoes, bbl., 0.80 0.90. Beef, forequarters, cwt., 11.50 13.00. Do, hindquarters, cwt., 11.50 13.00. Do, choice sides, cwt., 10.00 11.00. Do, medium, cwt., 8.50 9.50. Do, common, cwt., 6.50 8.00. Mutton, light, cwt., 9.00 11.00. Veal, common, cwt., 9.00 10.00. Do, prime, cwt., 11.00 13.00. Lamb, cwt., 12.50 13.00.

SUGAR MARKET.

Toronto sugar prices followed the drop in New York, and have declined 10c per cwt. Sugars are quoted in Toronto, in bags, per cwt., as follows: Extra granulated, St. Lawrence, \$4.50. Do, do, Acadia, 4.50. Do, do, Redpath, 4.50. Beaver granulated, 4.35. No. 1 yellow, 4.10. In barrels, 5c per cwt. more; car lots, 5c less.

LIVE STOCK.

Export cattle, choice, 6.00 to 7.00. Do do medium, 5.00 to 6.50. Do do bulls, 5.00 to 6.00. Butcher cattle, choice, 6.15 to 6.50. Do do medium, 5.35 to 5.75. Do do common, 4.90 to 5.25. Butcher cows, choice, 5.25 to 5.50. Do do medium, 4.80 to 5.00. Do do common, 4.50 to 4.75. Do do bulls, 4.90 to 5.40. Feeding steers, 5.50 to 5.90. Stockers, choice, 4.50 to 4.75. Do do light, 3.25 to 4.15. Milkers, choice, each, 50.00 to 70.00. Springers, each, 55.00 to 75.00. Sheep, ewes, 3.25 to 4.25. Bucks and culled, 2.50 to 3.00. Lambs, feet and wethers, 6.25 to 6.50. Hogs, f. o. b., 8.75. Calves, 4.75 to 5.25.

VARICOSE VEINS CURED

NO NAMES USED WITHOUT WRITTEN CONSENT.

Confined to His Home for Weeks.

"Heavy work, severe straining and evil habits in youth brought on Varicose Veins. When I worked hard the aching would become severe and I was advised to have an operation—but I dreaded it. I tried several specialists, but soon found out all they wanted was my money. I commenced to look upon all doctors as liars better than rogues. One day my boss asked me why I was off work so much and I told him my condition. He advised me to consult Dr. Kennedy & Kennedy, as he had taken treatment from them himself and knew they were square and skilled. I wrote them and got the New Method Treatment. My progress was somewhat slow and during treatment for three months longer and was rewarded with a complete cure. I could only earn \$12 a week in a machine shop before treatment, now I am earning \$31 and never lose a day. I wish all sufferers knew of your valuable treatment."

HENRY C. LOCUST.

HAS YOUR BLOOD BEEN DISEASED?

BLOOD POISONS are the most prevalent and most serious diseases. They sap the very life blood of the victim and unless entirely eradicated from the system will cause serious complications. Beware of Mercury. It may suppress the symptoms—our NEW METHOD cures all blood diseases.

YOUNG OR MIDDLE AGED MEN—Imprudent acts or later excesses have broken down your system. You feel the symptoms stealing over you. Mentally, physically and vitally you are not the man you used to be or should be. Will you heed the danger signals?

READER Are you a victim? Have you lost hope? Are you intending to marry? Has your blood been diseased? Have you any weakness? Our New Method Treatment will cure you. What it has done for others it will do for you. Consultation Free. No matter who has treated you, write for an honest opinion Free of Charge. Books Free—"Boys'hood, Manhood, Fatherhood." (Illustrated on Diseases of Men.)

NO NAMES USED WITHOUT WRITTEN CONSENT. PRIVATE. No names on boxes or envelopes. Everything Confidential. Question List and Cost of Treatment FREE FOR HOME TREATMENT.

A 'CROSS COUNTER TALK

Customer: "What constitutes good paint?"

Dealer: "Good paint depends on the materials used, the processes of manufacture, and the skill of the paint maker—no more, no less."

"Sherwin-Williams Paint, Prepared, is good paint—the best paint, in fact, that can be made. No care or detail is lacking in its manufacture. The materials employed are of the highest quality and are properly put together by experienced paint makers. The linseed oil—the vital part of paint—used in S.W.P. is made especially by The S.W. Co. in their own mills. The pigments are selected with greatest care and scrupulously tested. The tinting colors are products of the Company's own dry color works. And the mills used for grinding and mixing are designed and made in the machine shops of the Company. They embody the most advanced ideas in paint making. With such high quality materials, such care and attention, S.W.P. must be and is good paint all the way through."

W. T. ROGERS, Athens

DEATH OF N. K. BENEDICT

On Sunday morning last, Nathaniel K. Benedict, a highly esteemed citizen of Athens, departed this life, aged nearly 85 years. He had been ill for over a year, though at times able to walk up town and visit his farm in Plum Hollow.

He was born in Plum Hollow and followed the occupation of farmer, but several years ago retired from the farm and became a resident of Athens. He was twice married, his first wife dying some 32 years ago. There were two daughters by this union, Mrs. S. Holmes of Elmda, and Mrs. W. Gifford of Plum Hollow, both having passed away some years ago. His second wife was Melissa Blagher, of Athens, who survives, also a niece, Mrs. A. Kilborn, of Plum Hollow, whom they adopted when an infant on the death of her mother, Mrs. Wm Robinson. Four grandchildren also survive, S. S. Holmes, of Toronto; M. Holmes, of Frankville; P. Gifford, of Elgin; and Mrs. C. Wilsee, of Havelock, and a brother who is in his 92nd year, Isaac Benedict, of Franklin, Neb. Mr. Benedict was of a quiet disposition, upright and honest in all his dealings, a man whose word was as good as his bond. In religion he was a Baptist, being a deacon of the church for many years, and in politics a Liberal. An ardent temperance advocate his support could always be counted upon in any movement for the prohibition of the liquor traffic.

The funeral took place at 1 p. m. on Monday from his late residence to the Methodist church. Service was conducted by the pastor now in charge of the Baptist church, Rev. Mr. Row, of Cobden, and interment was at Plum Hollow. The widow and sorrowing friends have the sympathy of all in their great sorrow and loss.

CHARLESTON

Mrs. T. McConnell, Lyndhurst, was a recent visitor at the home of her mother, Mrs. M. M. M. M.

Miss Julia Hudson, Morrisburg, is visiting her sister, Miss Fanny Hudson.

A party from Prescott motored here on Saturday.

Miss Katie E. Bass, a graduate of the Toronto Free Hospital, was last week a visitor at the home of her cousin, Mrs. Chas. Slack.

Mrs. Hanson has returned home after spending the summer at the lake.

Mr. and Mrs. A. N. Sherman are busy moving from Athens to their new home here, and Cedar Park is already putting on an attractive appearance.

The Misses Webster and McMillan left their cottage on Saturday.

LOCAL CHEESE MARKET

At Brockville on Thursday last cheese ruled at 13c, though two lots of white brought 13 1-16c. An address was delivered by Chief Dairy Instructor, G. G. Publow, and the Recorder quotes him as follows:—

He referred to the complaint made at the board meeting last Thursday that a number of the cheese from this section, when examined in Montreal, were found to be weak in body and more or less open in texture. Mr. Publow said the remedy for this defect was to make the curds firmer in the whey and stir them out drier at the time of dipping before allowing the curd to mature. The curd also should be well shrunk after milling before applying the salt. More salt per thousand of milk should be used as there is a greater yield of cheese from the milk than earlier in the season. Some makers seem to lose sight of this fact. In addition the tall cheese should be made to show good keeping qualities and this fact should receive special attention. He also urged that makers keep their shelves as clean as possible. For the benefit of the Brockville section cheese in England, Mr. Publow strongly advised that the goods be held at least eight or ten days.

THE CASE OF JOHN JONES

Some of our exchanges are discussing the case of a man named John Jones who had the ambition to own a home of his own. Being without means, he waited his chance and secured a broken-down place badly in need of repair. The cellar was full of stagnant water, weeds grew all about, the porches were falling down from decay, the walks were in ruins, the building badly needed paint. The place was an eyesore; it was worse than that, it was a menace to the neighborhood. Jones, however, wanted a home: He saw the possibilities of the place, so he bought it and, being handy with tools, he worked away night and morning, after office hours, putting it into shape. He repaired the house, inside and out, painted it, sodded the weed-grown lawn, laid a new walk up to the door, and put in drainage. He worked early and late and made the place a credit to the town. And then the assessor came along and doubled the taxes. Why was he fined by the town for what he had done? The place with its water filled cellar, its weed-grown lawn, had been a menace. Jones by the labor of his hands made it a nice place, a credit to the town. What had the town done to entitle it to more taxes from that property? Nothing whatever. Jones had done it all. Instead of being fined Jones deserved a bonus from the municipality. He had done the neighborhood and the whole town a good turn.

Next door was a vacant lot, covered with weeds. Jones, by improving his place, made this adjoining lot more valuable, but the town did not increase the taxes on it because it was an idle lot, doing nothing—and towns, as you can see, love idle lots. How upside down and wrongside out the whole assessment system is in Ontario! We fine those who improve their properties, and exempt those who let theirs lie idle. The man who lets his premises fall into decay gets his taxes reduced; the man who trims his place up pays his own tax and is called on to pay what the other man doesn't.

DAIRYING IN CANADA

Conditions affecting the marketing end of the industry in Canada have undergone rapid changes during recent years. In the past it has been the custom to estimate the growth of the industry on the export trade. This however has become an entirely unreliable guide because Canada no longer has butter to spare but on the other hand finds it necessary to import from other countries. Cheese exports too have greatly decreased. These facts were brought to the attention of the Select Standing Committee on Agriculture and Colonization during the past session of Parliament by Mr. J. A. Ruddick, Dairy and Cold Storage Commissioner who showed very clearly that the industry is not losing ground but is making steady progress. It was brought out that the Canadian people are consuming relatively more milk and milk products than heretofore and that an increasing quantity of milk is being manufactured into condensed milk, casein and other products.

During the course of Mr. Ruddick's evidence he gave out a great deal of interesting information concerning the tendency of the industry. This has now been printed in a pamphlet of fourteen pages for free distribution to all who apply to the Publications Branch of the Department of Agriculture at Ottawa.

Cold in the West

Winnipeg, Oct. 6.—The first snow of the season is falling to-day in parts of Manitoba and Saskatchewan, with temperature around freezing point. Alberta reports none and Winnipeg and vicinity have escaped. According to usual time-table this cold dip should reach here by Friday next.

Positions

No X-Ray Skirts

The mayor of Portland, Ore., has ordered the arrest of every woman wearing an "X-ray" dress on the streets. The mayor said the order must go into effect immediately.

The action of the mayor followed his observations during a trip in the downtown district.

The question whether a gown is really an "X-ray" or otherwise objectionable is to be left to the judgment of the policeman who views it.

Chief Clark was told that it made no difference who the woman was who wore an objectionable gown. She must be taken into custody.

Start at once and secure exclusive territory. We supply handsome free outfit and pay highest commissions.

Write for full particulars.

STONE and WELLINGTON

Toronto, Ontario

SUCCESSFUL SCHOOL FAIR

The first Rural School Fair held in this District took place at Plum Hollow on Tuesday and was a pronounced success.

Pupils of Hard Island, Sheldon's, Plum Hollow, Lilyville, Davtown and Soperton schools competed and they filled the big tent with a very large and choice exhibit.

The exhibits included Horses, Poultry, Grains, Potatoes, Fruit, Cooking, Needlework, Collection of Weed Seeds and Insects and the showing in all classes was exceedingly creditable.

While the judging was in progress a programme of sports was run off and thoroughly enjoyed by all.

Many came in the forenoon and enjoyed a basket picnic in the grove.

The future of the school fair is assured and it is probable that other schools in that district will enter for next year. The number that may enter will probably be limited to about ten, and where required other districts will be organized.

A handsome silver shield in maple leaf design will be awarded to the winning school and when won three years in succession it becomes the property of the school.

It is estimated that the attendance of children and their friends numbered over 500.

The local representative of the Department of Agriculture, Mr W. H. Smith, has given his personal attention to the organization for this fair and the results of his labors must be highly gratifying to him.

A JEWISH PROTEST

The Ottawa Journal well says that the protest of the Jewish Times of Montreal against the caricatures of the Jewish character so often seen on the stage should be received with general sympathy. The Jewish people suffer a peculiar and unnecessary humiliation very often before the public gaze.

The record of the Jews in Canada is such as to entitle them to respect. In every city of the country, Jewish citizens are responsible for a large portion of the local business enterprises. No race is less a burden upon the community in the matter of charity. No race is more energetic, intelligent, law-abiding and temperate than the Jews. They never strive to evade the obligations of citizenship. On a par with this is the stage caricature of an Irishman as a man with a monkey face and green whiskers.

30 DAYS' CAMPAIGN

The Family Herald and Weekly Star, of Montreal, are making an urgent appeal to their present subscribers to send in renewal subscriptions during October and relieve the enormous rush at the close of the year. It is a reasonable request from a newspaper in such great demand, and subscribers have nothing to lose by complying. The Family Herald and Weekly Star is looking for a bigger season than ever before. It is indeed a big dollar's worth.

Eastern Ontario Electric Power

Active steps are being taken by the Hydro-electric Power Commission to complete the power for Eastern Ontario. Plans have been deposited with the Department of Public Works for approval of an arrangement of towers and cables across the St. Lawrence River at Morrisburg. The Commission have secured an option of 15,000 horsepower from the New York & Ontario Power Company at Waddington, N. Y., and as soon as the plant is ready a portion of this power will be imported in Canada.

We do not expect any delay in having the plans approved," said Hon. Adam Beck this week, "and once that is done the work will be pushed to completion. There is a small plant now operating at Waddington which will be able to supply us with a little power in the meantime, but the heavy exportation will not commence until the new plant is completed. Our line is completed from Morrisburg to Prescott, and we expect the other line to Winchester, Chesterville and Russell to be finished shortly."

The Bar-room is Doomed

(Toronto Globe)
Were the liberals of Ontario ready to haul down their flag because of anything that happened in the bye-elections, they would prove themselves not champions of a cause but short-sighted seekers for office. The real campaign is yet to come. The cost has been counted. Liberalism will not fail. The bar-room is doomed. The choice for it will be clear and definite in the next Ontario Election.

Penitentiary Inquiry

H. A. Stewart, K. C., of Brockville, has been appointed as counsel for the Dominion Government in the matter of the penitentiary inquiry before the recently appointed commission. One of the chief duties of the commission will be to thoroughly investigate the conduct of the Kings' Penitentiary in regard to which there has been much criticism.

PUZZLING ECHOES.

The Riddle of the Gardens of Aux Rochers in France.

MYSTICAL TRICKS OF SOUND.

A Spot Where an Almost Inaudible Whisper Becomes Curiously Transformed Into Thousands of Hissing Responses—Other Famous Echoes.

Some echoes in their mystic character would seem to approach the domain of psychic phenomena, which are eliciting so much and such puzzled attention. One of these ghostly tricks of sound is to be found in the gardens of Aux Rochers in France, which was once the residence of Mme. de Sevigne. The chateau is situated near the old town of Vitre. A broad gravel walk on a dead level conducts through the gardens to the house. In the center of this, on a particular spot, the listener is placed at the distance of ten or twelve yards from another person, who addresses him in a low and almost inaudible whisper, when immediately, as from tens of thousands of invisible tongues, starting from the earth beneath, or as if every pebble was gifted with powers of speech, the words are repeated with a slight hissing sound, not unlike the whirling of small shot through the air. On removing from this spot, however trifling the distance, the intensity of the repetition is sensibly diminished and within a few feet ceases to be heard. Under the impression that the ground beneath was hollow the soil was recently dug up to a considerable depth, but without discovering any clue to the mystery.

Although the weird echoes of statuary hall in the capitol at Washington have been somewhat subdued since the structural modifications of the roof, they still haunt the chamber which was once the house of representatives. The capitol guides used to take great pride in the mysterious echoes of statuary hall, and they deplore their partial elimination. It will be recalled by many that there is a flagstone in the floor of the hall marked by a small black hole about as large as an umbrella end, on which, if a person stood and uttered a word, he heard a repetition of his voice proceeding apparently from the basement of the building just below him. An appreciable interval elapsed between the utterance of the sound and its echo, a circumstance that rendered the effect almost uncanny. To laugh was to prove a mocking rejoinder, and many persons, say the guides, were persuaded that a trick was being played on them. The same effect was noticeable on that part of the floor adjacent to the flagstone mentioned, but the farther away from the echo until, at a certain distance, it was not perceptible at all.

Some of the most curious and beautiful echoes in the world are to be heard in the Luray caverns, which are only a few hours' journey from Washington. Numerous of the huge stalagmites here, when only gently struck, give forth tones that in some instances resemble the chiming of great, sweet toned bells or a long melodic note like that of a church organ. A famous violinist is said, when visiting Washington, to have journeyed to Luray in order to test the effect of the playing of his instrument amid the singular acoustic surroundings. The tones of the violin are described as having been wonderfully enhanced both in sweetness and in volume.

Among the wonderful rock formations of the far west, notably in the Grand Canyon of the Colorado, are said to lurk many marvelous echoes. The same is true of the great Niagara gorge, and, though few are aware of the fact, it is said that any one journeying to the falls and taking in the gorge—a superb piece of natural scenery in itself—will be well rewarded by stopping at Inspiration Point, walking forward to the edge of the cliff and here waiting until the first train, on nearing the level crossing, blows its whistle. The sound is caught up by multitudinous echoes until one would fancy that it was resounding through the universe.

One of the most famous echoes is to be heard in Woodstock park, Oxfordshire, England, which is said to repeat seventeen syllables by day and twenty by night. Although this statement is to be found in various standard textbooks and treatises on the subject, it has lately been contradicted by an investigator, who remarks, however, that the diminution of this classic echo is probably due to the removal of various buildings in its neighborhood.

A most striking interior echo is a feature of the Mormon tabernacle in Salt Lake City. When this hall is empty and quiet the ring of a pin falling on the floor can be heard from all points, and even the faint, rasping sound produced by rubbing the hands together is perfectly audible from one end of the building to the other.

In the cathedral of Girgenti, in Sicily, the slightest whisper is borne with perfect distinctness from the region of the great door to a location in the upper part of the church about 250 feet distant. Although acoustics would seem to account satisfactorily for many echoes, there yet remains much that is mysterious and baffling concerning them.—F. V. Collins in Chicago Record-Herald.

As you can see, the merry heart lives longer than the sad.—Florida Times-Union.

WHETHER for a silo, a milk-house, or a million bushel grain elevator, concrete is the most economical building material in use today.

Concrete never requires repairs, and the saving in repair-expense alone makes the greater economy of using concrete more apparent every day. The cost of other building materials is constantly increasing. The cost of concrete is being reduced.

Canada Cement

which Canadian farmers use, with their own sand, stone and gravel to make concrete, is the only ingredient you have to buy.

We have, by reason of our large output and scientific methods, been able to bring the price of "Canada" Cement so low that it is within the reach of everyone.

An increase in demand results in a greater economy of production, and when conditions have warranted it, we have, from time to time, shared this saving with the consumer by reducing the price of Canada Cement. This demand will continue to increase—as fast as farmers learn of concrete's superiority over other materials.

When you buy cement, see that you get "Canada" Cement; by so doing you will assure the complete success of all your concrete work. Send a post card for our book "What the Farmer Can do With Concrete." It is free.

There is a Canada Cement dealer in your neighborhood.

Canada Cement Company Limited

Montreal

TIPPING AN ARTIST.

He Got His Fee, Too, Before He Gave Up the Information Wanted.

Winslow Homer was a great painter who had the unusual good fortune to have his merit appreciated early in life. But no one ever presumed less on a wide reputation. Affection was a weakness from which his sense of humor saved him.

In his biography by Mr. W. H. Downes is printed the story of a New York gentleman of wealth and artistic tastes who made the journey to Scarborough, Me., where Homer had his studio, to make the artist's acquaintance.

On his arrival he found the studio door locked. The owner was nowhere to be seen. He wandered about the cliffs for awhile until he met a man in a rough old suit of clothes, rubber boots and a battered hat, who carried a fishpole. He accosted the fisherman thus:

"Say, my man, if you can tell me where I can find Winslow Homer I have a quarter for you."

"Where's your quarter?" said the fisherman.

He handed it over and was astounded to hear the quizzical Yankee fisherman say, "I am Winslow Homer."

The sequel of this unusual introduction was that Homer took his new acquaintance back to the studio, entertained him and before he left sold him a picture.

LIGHTING WITH GAS.

And the Young Scotsman Who Wore a Wooden Hat.

One morning a good many years ago a young Scotsman was shown into the office of a great engineer at Birmingham. The young man was wearing a hat of extraordinary shape, and in his nervousness at meeting the man of fame he let the hat slip. It fell with a hollow thud upon the floor. The engineer looked with astonishment at the thing. The owner picked it up and apologized for the noise it had caused. It was of wood, he explained. He had made it himself, turning it with his father's lathe.

The engineer thought that there must be something in a man who could think out and make such a thing as this. He forthwith engaged him, kept an eye upon him and gave him work of responsibility. The engineer was Boulton; the new man, William Murdoch.

The man with the wooden hat justified the judgment of the man who employed him. After awhile he was sent away to Cornwall, and when he returned it was to light up his master's premises with gas. The mind which first practically applied the coal gas to the purpose of lighting lived inside that wooden hat.—St. James' Gazette.

Leigh Hunt.

This famous Englishman has two distinct claims to fame. Not only was he a brilliant poet, essayist and critic, but much that we know of Keats, Shelley, Lamb, Byron, Moore, Coleridge, Dickens and Carlyle has been derived from the knowledge of these celebrities which Hunt gave to the world. Possessing a happy spirit and genuine scholarship, Leigh Hunt's writings sparkle with wit and cleverness, while his translations are among the choicest of their kind. His penitentiary difficulties undoubtedly prevented Hunt giving us his best at times, but after he was granted a pension amounting in all to £320 per annum the improved comfort and augmented leisure enabled him to make his mark on English literature with essays of remarkable power.—Pearson's Weekly.

Cause and Cure of Headache

The cause of headache as you know, is the stoppage of the circulation resulting in pressure on the delicate nerves of the head. In time nature will start the blood going again, but meanwhile we suffer and are unfit for duty.

Assisted by two ZUTOO Tablets, which by the way are as harmless as the soda they contain, nature will remove the pressure and stop the headache in twenty minutes. Why continue to suffer? Why be unfit?

It is really remarkable how many people now use ZUTOO to cure their headaches. Do you? If not, why not?

SUFFERED

With Biliousness and Sick Headache

Calgary, Alberta, July 8, 1911
I was a great sufferer for a long time with Biliousness, Sick Headache and Liver trouble. Nothing seemed to do me any good. I had almost given up in despair when I decided to try

FIG PILLS

After taking about half a box the headaches stopped and my appetite improved. I have just finished the fifth box and feel as well as ever. I can heartily recommend Fig Pills for stomach and liver troubles.

MRS MARY ELLSON

Sold at all dealers in 25 and 50 cent boxes or mailed by The Fig Pill Co. St. Thomas, Ont.

MAXWELL'S HIGH SPEED CHAMPION is the Washer for a Woman. In the first place, Maxwell's "Champion" is the only washer that can be worked with a crank handle at the side as well as with the top lever.

DARNING STOCKINGS. Six Hints as to the Way to Do It Effectively.

Half the trouble of darning stockings may be avoided if care be taken before hand on the following points: 1. See that the lining of the shoes is kept intact.

Sick Headaches are not caused by anything wrong in the head, but by constipation, biliousness and indigestion.

Dr. Morse's Indian Root Pills are the season when coughs and colds are prevalent any method of preventing them and checking the first symptoms without drugs may be of inestimable value, says a physician.

Ty Cobb's Fortunes. The various Leagues of Life are well stocked with 250 hitters and a far scattering of those who hit 300.

Manard's Liniment Relieves Neuralgia. It is unappreciated to me that even in the most considerate families men talk and children of ten years attend to the sacrifices and hard work that go into the preparation of Sunday's big dinner.

THE WEARING SUNDAY DINNER. It is unappreciated to me that even in the most considerate families men talk and children of ten years attend to the sacrifices and hard work that go into the preparation of Sunday's big dinner.

DODD'S KIDNEY PILLS. CURES ALL KIDNEY DISEASES. RHEUMATISM, BRIGHT'S DISEASE, GRAVEL, DIABETES, BACKACHE.

Like the Old Tunes Best. Somehow people don't take kindly to new tunes. The back seater who can get considerable gusto and volume worked up for "Swear My God to Thee" may hum an occasional verse of something new.

The Housekeeper. When the grate is cleaned and polished, rub all over with a piece of old velvet. Old velvet is also very useful as a final polishing cloth for waxed wood and floor cloths.

MOTHER AND BABY. Every mother is anxious for the welfare of her little ones—above all she wants them to have good health.

Every mother is anxious for the welfare of her little ones—above all she wants them to have good health. Thousands of mothers have learned the secret of keeping the little ones healthy—they have learned that by keeping Baby's Own Tablets in the house and giving an occasional dose to the little ones that they will escape constipation, vomiting, colic, colds, worms, etc.

ALMOST LYNCHED. It happened to a local druggist that sold cheap acid corn salve instead of the reliable Putnam's Corn Extract.

EXPLODING FLOWERS. Peculiar Specimens in Botanical Gardens at Algiers.

Flowers that explode were observed recently in the botanical garden at Algiers. Of course there are many kinds of flowers that "explode" in order to scatter their seeds, but these are silent explosions, are brought about regularly every seeding time by nature, and are not freaks.

30 ORGANS CHEAP. We have some fifty first-class organs on hand, at prices from \$12.50 to \$35.

ONE CRIME—THREE SENTENCES. A Judge at London sentenced a youth of 20 years to ten years in the penitentiary and twenty lashes for an offense against a little girl.

MINARD'S LINIMENT FOR SALE EVERYWHERE. RECKLESS FINANCIERING. Philadelphia is not the only municipality that indulges in reckless financing.

SOCIAL REFORMS AND PEACE. Every social reformer is an advocate of international peace, whether he knows it or not.

A SENSIBLE MERCHANT. Bear Island, Aug. 26, 1903. Minard's Liniment Co., Limited.

Dear Sirs,—Your traveller is here today and we are getting a large quantity of your MINARD'S LINIMENT. We find it the best Liniment on the market, making no exception. We have been in the business thirteen years and have handled all kinds, but have dropped them all but yours; that sells itself; the others have to be pushed to get rid of.

ROCK PAINTINGS IN TUNIS. Rock paintings of an interesting kind in the south region of Tunis are described by M. Henri Roux and published in the Revue Tunisienne.

One of these was noticed on a rock wall in the Djebel Eljij, which probably represents a combat of men in conventional drawing and animals which it is difficult to identify. The age of this painting raises quite a controversy among scientists, and some think that it is contemporary with the Barberian civilization, that is, intermediate between the stone age and the age of metals.

FITS CURED. Send for Free Book giving full particulars of TRENCH'S REMEDY, the world famous cure for Epilepsy and Fits.

STRANGE AUSTRALIAN FISH. A new species of fish having the appearance of an electrically lighted firefly has been secured by the Australian light at the great depth of 350 fathoms.

VACCINATION. Philadelphia Record. Two vaccinated children have died, and the anti-vaccinationists will be aroused to renewed attacks upon a preventive measure which has reduced the most frightful scourge of humanity to so rare an occurrence that physicians often fail to recognize it when they encounter it.

SOCIAL REFORMS AND PEACE. Every social reformer is an advocate of international peace, whether he knows it or not.

DISCIPLES' AIM IS FOR UNITY

Restoration Among All Christians Great Goal.

MISSION REPORTS

Show Friction With Other Bodies' Workers.

Toronto despatch—The restoration of Christian unity—the task which the Disciples have set before themselves as that of supreme importance—was the subject which occupied the convention of the Churches of Christ at the evening meeting in Massey Hall yesterday, and the importance of the occasion was evidenced by the great audience present, an audience that completely filled the ground floor and balcony of the hall and even overflowed into the upper balcony.

While the day had been set apart for the deliberations of the Foreign Missionary Society, the great interest which the subject of unity has for all the delegates determined the executive to devote Thursday evening to the council on Christian union, and a report of the secretary showing the work which has been done during the past year was presented and was followed by greetings from representatives of Presbyterians, Baptists, Congregationalists and Methodists, whose messages were received with intense enthusiasm by the convention.

The report of the secretary, Frederick W. Burnham, called attention to the purpose of the organization, which is to cooperate with other bodies for the calling of a world conference on Christian union, and to confer with other commissions whenever possible to bring about this desired result.

The great meeting at New York on May 8 last, at which there were present representatives from some twenty commissions of religious bodies, for the consideration of the next step towards calling the proposed "World Conference on Faith and Order," was referred to as the most significant and important meeting at which the Disciples' representatives were present. The report reviewed the proceedings of the meeting and recalled that the true ideal of the world conference is to consider not only the points of difference but the approximation of beliefs of the various bodies, and that it is recognized organic union is the ideal all Christians should have.

Since the body has for its fundamental task reunion, the report declared that all union proposals must be welcomed and indeed any which even look towards that end.

In conclusion, the report pointed a warning against meditating strife or a possible division of the body at such a crucial time.

MANY GREETINGS RECEIVED. Bringing greetings from the General Assembly of the Presbyterian Church of the United States, Rev. Geo. B. Stuart, D. D., of the Auburn Theological Seminary, New York, spoke of the magnitude of the task the Disciples have set themselves.

Declaring that the things that unite are more important than the things that divide, and calling attention to the value of even talking about union, the speaker referred to the recent utterances of Cardinal Gibbons, which he considered valuable merely because he has talked of union and in this way stretched out a hand ever so little, which in time may help to bridge the gulf.

Rev. R. M. West, D. D., of Rochester, appeared on behalf of the Baptist body, referring to the separation which had taken place between the Disciples and the Baptists that now, after a long interval, shows signs of reunion again.

Greetings from the Congregationalists were given by Rev. E. S. Fitch, D.D., of Buffalo, who was followed by Rev. Chas. L. Mead, D.D., of New York City, appearing on behalf of the Methodist Episcopalians, who pointed to the significant fact that no religious body has met within the past year that has not discussed the subject of unity.

NO DIVISION WILL OCCUR.

A slight fear some of the delegates felt that a division in their ranks might grow over the question of a delegate convention was set at rest yesterday when a meeting called by those who had voiced their objections to the delegate principle at the previous day's meeting, ended with the realization that there could be no good purpose accomplished in taking any extreme measures to bring the question to a direct issue. It has been merely a question of individual choice whether certain of those favoring any connection with the general convention. They will be able, however, to continue to work with the various missionary and other societies of the disciples body.

The morning and afternoon sessions yesterday were devoted to the reports of the Foreign Christian Missionary Society, and addresses from a number of important speakers were heard.

WHERE HARMONY DOES NOT PREVAIL.

Some of the reports presented gave an inside picture of conditions in the missionary field that are not generally communicated upon in the ordinary missionary reports. This was particularly the case with a report dealing with the mission in the Philippines, where the missionary, Dr. C. L. Fickett at Laonog declares, "The Methodist Episcopal people have entered the field and comity with them seems impossible. They seem provoked that they did not succeed in keeping all immersionists off the island and seem determined to give us no consideration."

Denominational jealousy was also declared to cause friction in Cuba, in Matanzas Province, where great bitterness has been engendered by the various Protestant bodies. Trouble in South America at Buenos Ayres with the Adventists was also referred to.

It was suggested by W. J. Lahmon,

who presented the reports, that the fault might lie with the method in which the disciples' missionaries are presenting their doctrine, and he thought it would be well if they were careful to teach in such a way as to give the minimum of offence to others.

The work in the Belgian Congo, where the disciples have a mission, was the subject of a report in which the tremendous strategic importance of the field where the battle between the "Cross and Crescent for the conquest of the world" is likely to occur was pointed out.

A feature of both meetings was the introduction of missionaries and other visitors from a distance to the assembly, one of whom was Mrs. Barelay, a missionary from Judea, who is the daughter of Alexander Campbell, another, Mr. Frank Coop, of Southport, England, referred to the fear expressed of eclecticism growing out of a delegate convention, and pointed out that the English Disciples have had this method for thirty years without the "eclectical bogey" materializing.

A meeting at 8 o'clock in the morning, held by the Women's Board, dealt with the subject of work among the young people, and the plan was explained of "junior congregations," which for some time have been successfully worked in Kansas, where the children hold their own meetings, with their own officers, and where the proceedings include a sermonette, Bible study and missionary instruction.

NEW JAP NOTE

Washington Has Done Nothing About It Yet

And Doubts Authenticity of Its Presentation.

Washington, Oct. 10.—Developments in Washington to-day indicated that the Japanese desire that subjects of the Tokio Government be given the same rights of land ownership in the United States as enjoyed by other aliens already has been clearly presented to Secretary Bryan by Ambassador Chinda.

It was also learned that thus far the United States has not given Japan any satisfaction upon this phase of the controversy between the two Governments. More clearly than ever before it was indicated that there has been absolutely no progress made toward settling the Japanese question arising out of the California Land Act.

The Administration was to-day without any advice that a new note is coming from Tokio, and it was said in the highest official quarters that presumably the despatches from Tokio referred to occurrences in the interchange of views between the two Governments of some time ago. At the Japanese Embassy it was admitted that the proposal of a new treaty, which would give to Japanese subjects specifically the right to own land in the United States had been discussed with Secretary of State Bryan.

The discussion of the matter emanating from Tokio at this time attributed to the political pressure on the Japanese Government by the Opposition party. It is believed that every indication of a strong policy in dealing with the United States is being given for purposes of home consumption, and that the Japanese Government thus hopes to allay the hostility to its course which has been frequently expressed by Japan.

Nothing is being done at the State Department so far as can be discovered here toward formulating a reply to the Japanese note of several weeks ago. The Administration clinging to its policy of going as slowly as possible in the controversy in the hope that as time passes feeling in Japan will moderate and an adjustment thus made more simple.

FOR FREE BOILERS

Interprovincial Conference for Inspecting Reciprocity.

Toronto despatch—With a view to holding an interprovincial conference to bring about reciprocity in boiler inspection, communications, it is understood, are now being exchanged between the Public Works Departments of Ontario, British Columbia, Saskatchewan and Alberta. It is expected that the conference will produce satisfactory results and that inside of six months boilers manufactured in Ontario will have an entry into most of the other provinces without having to submit to inspection again or undergo a pressure penalty.

Reciprocity in boiler inspection will prove a valuable privilege to Ontario manufacturers, and to that end the Ontario Government, in approving some months ago of the new system of boiler inspection for the Province adopted a clause extending unrestricted entry of boilers from any province that offered a like privilege to Ontario. It was felt that if Ontario showed the way the other Provinces would fall in line and the Government's judgment has been borne out.

At the present time boiler inspection standards in British Columbia, Alberta and Saskatchewan are almost identical with those of Ontario, and there is no obstacle in the way of reciprocity.

YUKON MINE ROBBED.

Dawson, Y.T., Oct. 10.—Two masked and armed men forced employees of the Yukon Gold Company into submission on Lovet Hill, three miles from here, and robbed the company's sluice boxes of concentrated gravel valued at \$20,000. The men overcame the robbers were bound and gagged and thrown into a ditch. The company had planned to make the season's clean-up this week.

NEW M'MANIGAL HAS CONFESSED

New York Dynamiter Says Many Blow-ups Are His.

UNION SECRETARY

Of Structural Ironworkers Arrested as a Result.

New York, Oct. 10.—George E. Davis, an ironworker, was taken to Indianapolis to-night after he had confessed that for four years he had been dynamiting non-union built bridges, according to directions furnished him by the executive committee of the International Bridge and Structural Iron Workers' Association.

In his confession he laid bare the methods and purposes of a war against non-union builders similar to that which was carried on in the west by James B. and John J. McNamara and Otis McManigal. He proclaimed himself the McManigal of the dynamiting campaign in the east, and declared that Frank C. Webb, a member of the executive board of the union, who was convicted last February in Indianapolis, is the man who directed his movements just as the McNamara brothers directed those of McManigal.

Davis gave detailed accounts of the blowing up of eleven bridges, and told of plans to do other jobs of the kind that for one reason or another failed to materialize. He traced his own movements from one section of the country to another, described his meetings with the big men of the union, and how every step he took was carefully detailed into a general scheme outlined in the central offices of the association in Indianapolis.

All the explosions that Davis says he caused were touched on and testified to at the dynamiters' trial in Indianapolis, but the fact that Davis caused them remained unrevealed until he himself told of it to-day.

Davis' confession resulted to-day in the arrest in Indianapolis of Harry Jones, secretary-treasurer of the Ironworkers' Union. His confession supplements the evidence presented at the Indianapolis trial, and makes fresh charges against some of the men there convicted and now in prison. Some of his revelations concern President Ryan, who is now out on bail pending appeal from a prison sentence of seven years.

Davis says that he was the man chosen to kill Walter Drew, attorney for the National Erectors' Association, in December, 1911, after Drew was charged with kidnaping John J. McNamara. It was suggested also that he tried to "get" William J. Burns, the detective employed by Drew and his associates to unearth the dynamite conspiracy. The price on Drew's head at that time, Davis said, was \$5,000.

THAW'S PROTEST

Against Deportation to be Ignored by U. S.

Washington, Oct. 10.—The protest of Harry K. Thaw, which was sent to the State Department by Senator Oliver, of Pennsylvania, was taken under consideration by former Judge Folke, of Missouri, who is now solicitor of the department. Mr. Folke is having an examination made of the treaty which Thaw claims was violated in his deportation by Canadian officials, and it is expected that a decision will be rendered to-morrow morning.

The Thaw appeal probably will not be referred to the British Embassy, it was indicated at the State Department to-day. The general opinion is that the department will not take the action desired by Thaw, who asks that the British Government be requested to explain the fact that Thaw is no longer in Canada as regarded as having an important bearing on the case.

It was pointed out to-day that the deportation of Thaw was practically on the invitation of the United States Government, which is now asked to complain to the British Government for the action of the Canadian officials. The requests of the then rival Governors of New York, Sulzer and Glynn, for the detention of Thaw was transmitted to the British Government by the State Department. The department contented itself with merely calling the attention of the British Embassy to the action in New York.

SWEDEN'S KING

Taken Suddenly Ill While on Journey.

Stockholm, Oct. 10.—King Gustave of Sweden was seized by illness to-day while journeying from Skaberjoe Castle, at Scania, to Aarhus, in response to an invitation from Count Frijsborg to join him in a hunting expedition. The King was compelled to return to Skaberjoe Castle.

He will be removed from there to Stockholm when he is well enough to stand the journey. The royal physician, who was summoned from this city, and who went to Skaberjoe Castle, said to-night that the King's condition was slightly improved, but that it was still serious. It is rumored here that the King is suffering from cancer.

RURAL POVERTY

British Farm Laborers Are in Pressing Need.

London, Oct. 10.—A summary of the first part of the land enquiry report, on which will be based the next step of the Government's programme of social legislation, has been made public and shows the pressing need of relief for rural laborers.

The report, which is made under the direction of David Lloyd-George, Chancellor of the Exchequer, states that the wages now paid do not allow the level of physical efficiency to be maintained.

The question, it is urged, is the more pressing because since 1900 prices have risen disproportionately to wages. Objection is shown to an increasing degree by laborers to the wages being partly paid in kind. The laborer of holidays nearly as much as the loss of wages. The loss of wages through wet weather is a strong subject of complaint.

A surprising feature of the report is the absence of any reference to the much-discussed minimum wage of \$5 a week.

FOR ROAD UNITY

Uniform Laws for Canada and the States

Proposed at Detroit Conference by Canadian.

Detroit despatch—Canada will be represented with the United States in an endeavor to obtain uniform laws pertaining to road building, if the proposition meets the approval of Premier Borden, according to an announcement made at the American Road Congress here to-day by A. W. Campbell, Deputy Minister of Railways and Canals for the Canadian Government. Mr. Campbell said he would use his influence in urging the Premier to consent to the appointment of a committee to confer with the committee representing the American Highway Association and the American Bar Association to evolve a plan for uniform road laws.

"I realize that in Canada, as well as throughout the United States, we have forty varieties of road laws for every province," said Mr. Campbell. "This tends to retard road work, and I heartily endorse any plan that would bring about practically the same laws for both the United States and Canada, relative to good roads."

The good roads delegates to-day listened to papers read by John N. Carlisle, chairman of the New York Commission on Highways; J. M. Lowe, of Missouri, president of the National Old Trail Association, and N. P. Hull, of Michigan, a prominent member of the National Grange.

Logan Waller Page, of Washington, was re-elected president, and J. E. Pennypacker, of Washington, was again chosen as secretary. Other officers elected were: Field Secretary, Charles P. Light, Wheeling, W. Va.; treasurer, Lee McClung, Washington; vice-president, W. W. Finley, president of the Southern Railroad; Directors, Alfred Noble, A. R. Fletcher, J. W. Jones and Charles W. Baker, all of New York; James S. Harlan, of the Interstate Commerce Commission; R. D. Chappin, Detroit; L. E. Johnson, president of the Norfolk & Western Railroad, and Thos. G. Norris, Arizona.

It was generally conceded to-night that the 1914 good roads congress would be held at Atlanta, Ga. The Canadian delegation, headed by A. W. Campbell, Deputy Minister of Railways and Canals, of Canada, will endeavor to secure the 1915 meeting for either Toronto or Ottawa.

MEXICAN BATTLE

General Engagement is on at Santa Rosalie.

El Paso, Tex., Oct. 10.—Santa Rosalie is the scene of a general engagement between rebel and Federal forces, which is expected to be the decisive engagement of the revolution in Chihuahua, if not in the north.

Assuming the aggressive, General Francisco Castro, commander of the military zone of Chihuahua, advanced with 4,000 men against the rebel-infested town Wednesday afternoon and engaged an equal number of rebel forces under Francisco Villa and his leaders in the revolution of the north.

The decisive battle started a day-break this morning after a prelude Wednesday afternoon, which resulted in the Federalists being driven out of Ojo Caliente, a suburb of Santa Rosalie, and a portion of the Federal fighting column being driven back to the main lines, which have been stretched like a crescent on three sides of the little watering place.

Villa has assembled all of the available revolutionary force in Chihuahua, and the fight is expected to decide the question of supremacy in that state. Supporting General Castro, the bulldog of the north, is Marcelo Caraveo, Antonio Rojas, and Manuel Orpinet, all regular brigado commanders. General Mancillo, Col. Lande, with 2,000 cavalry, are also under Castro's command.

10 YEARS FOR KILLING HUSBAND

Saskatoon, Oct. 10.—Mrs. Dora White convicted last Saturday of manslaughter for killing her husband, George White, of Govan, on June 2, was sentenced this afternoon to ten years' confinement at Prince Albert penitentiary. John Goldspinks, convicted this afternoon of being an accessory after the fact, received a five years' sentence.

NEWS OF THE DAY IN BRIEF

Dates Are Set for Three By-elections.

35-KNOT CRUISER

Conference of Premiers Has Been Postponed.

Rev. C. E. Manning criticised the site chosen for the Book Room in Toronto. James Little, of Guelph, a veteran miller, died in his eighty-fifth year.

A true bill was found against Leaman and Crawford in the Toronto forged ticket case.

Dorrieres, the leading duellist of France, fought and lost his 113th duel at Toulon.

A fourth wife is found to have been married by George Smith, charged at St. Thomas with bigamy.

Mrs. J. McKinney, a widow, of Corinth, the oldest resident of that vicinity, died to-day aged 94 years.

The death occurred on Wednesday of James Little, one of the best known and most highly respected citizens of Guelph.

It is reported officially that the new battle cruiser Queen Mary, in her recent full power trial made a record speed of 35.7 knots.

Mrs. Sarah Mundy, aged fifty-five, fell downstairs early in the morning at her home in Windsor, breaking her neck and dying instantly.

South Bruce by-election has been fixed for Oct. 30, nominations on Oct. 23. Chateaugay election is on Oct. 11 and East Middlesex Oct. 21.

Mr. and Mrs. George Chatterton, of Brighton Township, near Cobourg, celebrated the sixty-second anniversary of their marriage on Monday.

J. J. Forster has been appointed to the new position created at Vancouver by the C. P. R., that of general agent for trans-Atlantic and trans-Pacific steamships.

For attempting to murder his wife, Frank Binetti was, at Toronto, sentenced by Chief Justice R. M. Meredith to spend five years in the Kingston Penitentiary.

Andrew Phillips was nominated by the Huntingdon County Liberal Association to contest the vacancy in the Quebec Legislature caused by the death of W. H. Walker.

Sir James Whitney, Prime Minister of Ontario, and Sir Lomer Gouin, Prime Minister of Quebec, who recently called the Interprovincial conference for the 20th of October, have agreed to postpone the conference until the 27th of October.

ANGLICAN LAYMEN

Dissatisfied With Mission Offering—Contrasts Made.

Hamilton Man Speaks for Ontario Delegates.

Toronto despatch—Objection was made yesterday at the Anglican Laymen's Conference in St. James' Parish Hall, by Rev. Sydney Gould, Secretary of M. S.C.C., to the introduction of contrasts of the missionary offerings of the various bodies into a discussion of missionary principles.

At the conference of the day before figures had been used to denote Anglican offerings when compared with those of other bodies which had not been supplied from Anglican sources. The administrative system employed by themselves was quite different from those employed by other bodies. Each diocese was a unit, and it was almost impossible to obtain accurate information for the whole of Canada. There should have been included in the figures, the amounts raised for the various funds of the churches, the salaries of officials and bishops, for they really acted the same as home mission superintendents in other churches. Deplorable, too, was the introduction of the question of church unity in a missionary conference. Co-operation with other bodies in the proposed county conference campaign of the Laymen's Missionary Movement he supported, and urged also assist.

GOOD WORK ACCOMPLISHED.

Ontario was represented by about 50 delegates. Mr. Alfred Powers, of Hamilton, and Rev. E. A. McIntyre, of St. Aidan's, Toronto, showed, by example, the successful work done in their spheres by virtue of co-operation between the societies. Rev. F. Wilkinson, of St. Peter's, Toronto, said they gave \$3,300 to missions and \$1,200 of this supported their own missionary in the Yukon district.

Mr. S. C. Wood, of Toronto, acted as chairman of the conference, and the proceedings closed with prayer.

JAP DEMANDS ON CHINA.

Pekin, Oct. 10.—The Japanese Legation denied that Japan is making fresh demands on China, and pointed out that China has satisfactorily complied with the original requirements with the exception of the punishment of the officers commanding the offending troops and the execution of the soldiers who killed the Japanese at Nanking. Japan, it is added, recognizes that it will take time to make a proper investigation by the Chinese Government, and anticipates no evaluation on these points.

THE POOR CHINEE

Greedy Sydney, N. S. W. Mongolian Got Left.

Sydney, N. S. W., Oct. 10.—Much amusement was caused at Masterton the other day at the way in which a Chinese named Ah Fong overreached himself in his greed.

Ah Fong was watching the removal from a lorry of a consignment of miscellaneous articles destined for Hobbs' auction rooms, when, pointing to a wooden case which was being carried inside, he inquired in an excited tone, "How much?"

"I sell him to-morrow," replied the auctioneer.

"No time to-morrow," answered Ah Fong. "Me buy now," and eventually he secured the case for \$80.

In half an hour the Celestial returned. For a time he was unable to speak for agitation.

The outcome was ludicrous. It appears that the case bore an inscription in Chinese, stating that it contained a false bottom, concealing \$500 worth of opium.

When Ah Fong opened the case he found another label at the bottom which read, "Better luck next time."

CURES BY RADIUM

Distinguished Surgeon on Its Use for Cancer.

Emanations Have Same Properties as the Mineral.

London, Oct. 10.—In recording the important results of the year's experiences of the British Radium Institute, Sir Frederick Treves, the famous surgeon, in an address to-day, announced the discovery that radium emanations have, anyway, temporarily the same properties as true radium. He said: "We have proved that for curative purposes the emanation within 24 to 48 hours of being collected is as good as radium itself."

It had been further discovered, said Sir Frederick, that water charged with radium emanations became 5,000 times as strong as the strongest known natural water. Radio-active water has natural curative effects, especially in cases of rheumatic gout and similar affections of the joints. Patients who were treated at the institute had to drink half a pint of this water daily for six days a week over a period of six weeks. Forty per cent of these patients had shown marked benefit, and some instances two courses had apparently cured them.

Sir Frederick said that the Radium Institute was distributing the emanations to physicians whose patients were unable to attend the institute, and was sending sealed tubes daily to all parts of the country. One gram of the institute's total of four grams of radium had been set apart for producing daily emanations equivalent to 150 milligrammes of pure radium.

The records in regard to treatment of cancer supplemented in an interesting manner the achievements at Middlesex Hospital by the same method, which was described in the cables a short time ago.

Sir Frederick was careful to disclaim that there had been any cures, although he said many patients had returned to their homes with their afflictions seemingly healed and had resumed their work. "We call them apparent cures," he said, "because there is no guarantee that the trouble will not recur. The aspect, however, is emphatically more reassuring than it was last year."

Some remarkable cases were described and illustrated by photographs.

HINDU CHRISTIANS

Thousands of the Lower Classes are Turning.

Calcutta, Oct. 10.—There is some anxiety here over the effect of a remarkable movement towards Christianity among the lower caste natives which has been developing for some time. These natives are now abandoning their caste ceremonies and Hindu methods of worship.

"The Indian Witness," the newspaper organ of the Methodists; Episcopalians, claims that 150,000 natives have been baptized in certain specified districts, and predicts that the conversions will soon number 2,000,000. While the figures cannot be verified, there is no doubt that there is a great Christian wave, and trouble is feared from the resentment of the natives who have not been converted. It is said that persecution of the converts has already begun. Many of them have been beaten and their property destroyed.

Some independent critics say the missionaries are baptizing without enough instruction.

AUSTRIA'S MONSTER NAVAL GUNS

Vienna, Oct. 10.—Austria's newest Dreadnoughts are to be fitted with guns of extraordinary weight and capacity. Each ship will carry one of these monster cannon in five double turrets planned to enable the whole force to fire simultaneous broadsides. The guns will have a length exceeding 51 feet and a weight of 70 tons.

Their probable range is being kept a secret. With their heavy armor-plated decks and special cannon for shooting at aeroplanes and airships, the projected Dreadnoughts will be armed against the new terror from the air. Their total displacement is estimated at 25,000 tons.

To make indestructible lampwicks steep common wicks in a concentrated aqueous solution of tungstate of soda, and then dry thoroughly in the oven.

A hearing of the action of Athens High School Trustee Board against Rear Yonge and Escott Council took place at Osgoode Hall, Toronto, on Friday last, before Middleton, J. Judgement reserved.

In Brockville police court James Halliday and James Mitchell were fined \$1 and \$4 costs for cutting down a "bee-tree" on the property of Wm. Gamble, Crosby, and for using grossly insulting language the former was fined \$1 and \$3.33 costs.

Special services are being held in the Methodist church every evening this week, excepting Saturday night, conducted by the Rev. G. J. Kunz. The song service is led by the full choir of the church.

The dry summer, early frosts, and the fact that squirrels have been saving up their winter's supply of nuts earlier than usual, are given as signs by weather prophets of a long and severe winter.

The Tudhope Anderson Co., employing 25 men, is preparing to move its stove plant from Smiths Falls to Orillia. A couple of years ago this company took over the Perrin Plow and Stove Company and has been operating the stove plant until a place could be made for it at Orillia.

Many friends in Athens and vicinity of Mr J. R. Tye of Winnipeg had the pleasure of meeting and greeting him last week. It is nine years since Mr Tye left Athens to take up residence in the capital city of the Golden West and he finds many changes in his old home.

Large shipments of cattle are being made from this district, some for the West and some for the American market. This will probably boost the price of beefsteak next winter. The reduction of the American duty on poultry will probably have the effect of bringing the Northern New York buyers to our poultry fairs, so that better prices than usual may be expected by our poultry raisers.

The Weekly Sun advocates reciprocity in wheat and potatoes, between Canada and United States. There are times when it would be very advantageous to secure a free exchange of these things, and farmer and workman should combine to demand it. They can get anything they want—if they are united.

The Christmas turkey will be dear this year, and wholesalers hesitate to suggest what the probable price may be. Throughout the turkey districts there is a great scarcity of birds owing to the cold, wet spring. In one instance a farmer set seventy-two eggs, and his flock of turkey chicks numbered five for the season. This condition is found to prevail generally so far as turkeys are concerned. There are more ducks, geese and chickens than for some years past.—Exchange.

Mr Geo. Pattimore has returned from a visit to his former home in England.

Irroquois tax rate for the current year has been fixed at 29.76 mills, the same as last year.

Mrs C. C. Slack is this week attending the provincial convention of the W. C. T. U. at Stratford.

The close season for salmon and white-fish began on Oct. 5th and will continue until Nov. 5th.

LOST—On Main street, Tuesday, a gold bar pin. Finder leave same with L. G. Earl and receive suitable reward.

Miss Hazel Wasburn has recovered from her recent operation for appendicitis and is again in charge of the Sopoton School.

Good progress is being made in filling B.W. & N.W. trestle. Two trains are in operation handling about 30 carsloads per day.

The boys are gathering a rich harvest of butternuts and hickory nuts this fall but beechnuts are very scarce and the few that are found are not well filled.

An afternoon party held by Mrs H. E. Cornell on Friday last in honor of her guest, Mrs (Dr.) Cornell of Brockville, was attended by a large number of ladies and was greatly enjoyed.

A cadet corps in connection with the A. H. S. is being formed under the direction of Captain the Rev W. G. Swayne and Sergeant Major Redmond.

Miss Alice Hollingsworth, trained nurse, of Syracuse, N. Y., is home for a few weeks holidaying at the home of her parents, Mr and Mrs Nicholas Hollingsworth, Sheldon's Corners.

Mrs L. Glenn Earl (formerly Miss Ella Barry), will receive for the first time since her marriage at her home on Main street, Athens, on Tuesday, Oct. 14, from three to six p. m.

At the sessions of the Teachers' Institute in Brockville on Thursday and Friday next Mr S. A. Hisman will preside. The subject of "Nature Study" will be presented by Mr Smythe, principal of the Athens public school.

Notice—Will the party who got a nickle tea kettle from the repair shop of Earl Construction Co. in mistake, kindly return it and receive their own, which is still at the tinslop—W. F. Earl.

A hearing of the action of Athens High School Trustee Board against Rear Yonge and Escott Council took place at Osgoode Hall, Toronto, on Friday last, before Middleton, J. Judgement reserved.

In Brockville police court James Halliday and James Mitchell were fined \$1 and \$4 costs for cutting down a "bee-tree" on the property of Wm. Gamble, Crosby, and for using grossly insulting language the former was fined \$1 and \$3.33 costs.

Special services are being held in the Methodist church every evening this week, excepting Saturday night, conducted by the Rev. G. J. Kunz. The song service is led by the full choir of the church.

ATHENS - ONTARIO

Domestic Model B

Easy to Operate

To the Ladies of Athens and vicinity:

I have taken the exclusive sales agency for the

Domestic Vacuum Cleaner

acknowledged in the United States as well as Canada to be the superior of all vacuum cleaners.

The Domestic has ball-bearings throughout and runs so easy that a child can operate it.

It has three powerful bellows with more suction power than any other hand-cleaner made.

Its many points of superiority can best be appreciated when seen, and you are invited to inspect it at our store, or, if interested, we will demonstrate in your home.

The Domestic is operated like the ordinary carpet sweeper and is made in three sizes. It can be supplied with brush attachment for taking up hairs, threads, lint and heavy surface dirt; also with a hose and nozzle attachment for cleaning upholstered furniture, mattresses, draperies, etc.

No home should be without a Domestic Vacuum Cleaner.
