## POETRY.

### A PRAYER FOR THE MILLION.

God of the mountains, God of the storm,  
God of the flowers, God of the worm !  
Hear us and bless us,  
Forgive us, redress us !  
Breathe on our spirits, Thy love and Thy healing.  
Teach us content with Thy fatherly dealing—  
To love one another, brother my brother,  
And make us all friends of his brotherhood,  
Free from the shades of ancient Tradition,  
Free from the errors of man for his neighbour;  
Help us each one to fulfil his true mission,  
And show us 'tis manly, thy Godlike to Labour !

God of the darkness, God of the sun,  
God of the beautiful, God of each one !  
Clothe us and feed us,  
Hallow us and lead us !  
Show us that Avarice holds us in thrall—  
That the land is all Thine and Thou givest to all.  
Scatter our blindness,  
Help us to do right, all the day and the night—  
To love mercy and kindness;  
Aid us to correct mistakes of the past;  
Show us our future, to cheer us and arm us;  
And, God of the grave ! that the grave cannot harm us.

J. R. ORTON.

## Miscellaneous.

### FATE OF A DRUNKARD.

BY DICKENS.

receded before his eyes, whilst the water thundered in his ears, and stunned him with its furious roar.

A week afterwards the body was washed ashore some miles down the river, a swollen and disfigured mass. Unrecognized and unnoticed, it lay buried away in the grave; there it has since remained.

### FATE OF A ROBBER AND HIS WIFE.

We translate the following from a late French paper: An individual passing through the wood in the department of Langres, at the commencement of the evening, was stopped by a man with a pistol in his hand, who demanded his purse or his life; the traveler gave him twice francs, assuring that he had no more in his possession. The robber took the money, and the stranger fled from him, well satisfied with escaping on such good terms. He soon arrived at a farm, where he sought shelter. The host welcomed him, and offered him hospitality, and claimed the hospitality of the innkeeper, where, after telling the unfortunate adventure, and impudently adding that he had succeeded in concealing a large sum of money from the rapacity of the robber. The mistress of the house, who was then alone, offered him an asylum, and told him he should sleep in the hayloft: this offer was accepted with gratitude, the traveler preferred to lodge hardly than to run any more risk by going farther. He had scarcely entered the hayloft, when the stranger pretended to have fallen off, and told him that he had been sleeping on the floor. The woman immediately knew that the person she had sheltered was the individual he had robbed, and she disclosed to him what had passed. The man, however, insisted on staying, and precipitated him into the upper apartment, where the woman was to stand prepared with a hatchet ready to despatch him. Fortunately for the stranger, he overheard every word of this conversation and kept himself on his guard for the moment the

The bills as for the Maine Law already presented to the Legislature of N.B. are signed by 27,000 persons, of whom 17,000 are legal voters. Strong hopes are entertained, that the desired law will be passed by the present Legislature.

"Sally, you seem to be ignorant in geography. I will try you in grammar. Take this sentence, marriage is a civil contract." "Friend warning." "A marriage is a union because it is a contract. And though Wickham, who's a knave, and says many things by any other name, calls it a compact, yet he means a compact, and therefore a union, & says that the rule established by the Bank of Avon has one exception. For marriage certainly is of very great importance, and her [sic] is an and therefore a name, ergo, there is a marriage in a name." "Good! Well, what is the name of marriage?" "Don't know." "Decline it, and see." "D'you feel at liberty to decline?" "I have after having made Bill that promises I have. I'd rather not."

#### SEARCH FOR SIR JOHN FRANKL.

On Monday evening a very numerously attended meeting of the Geographical Society was held in the theatre of the Royal Institution, London, Sir Roderick J. Murchison in the chair, when Capt. Inglesfield, R. N., read a paper upon his recent voyage to the Arctic regions in search of Sir John Franklin. It was the first time that the English government, 100 tons, and 60 horse power, had originally been fitted out by Lord Franklin, assisted to some extent by the members and friends of this society; and her ladyship's orders did not bring able to be carried into effect, she had offered the ship to the Admiralty, as an addition to the expedition which was being fitted out by the Government for the exploration of the Northern Seas. This proposal was declined, and her ladyship then offered to give the vessel to any competent person who would convey to Sir Edward Belcher an ample supply of provisions and stores which had been placed in her. Capt. Inglesfield accepted the offer, undertaking the further equipment of the vessel, the wages of the crew, and other charges, for which he was to be compensated on his return to England by the sale of the ship.

Capt. Inglesfield having briefly narrated these interesting facts, said that he sailed from the port of Liverpool on the 6th of July last, and from Peterhead on the 10th of the same month. He had first proposed to go to the Arctic, suggested by Mr. Paterson, but by the advice of his friends he had relinquished the idea, and turned his attention to the Northern Sounds, at the head of Baffin's Bay, hitherto unexplored, and, indeed, only named as at a distance of 70 or 80 miles. Failing in his attempt to reach Smith's or Jones's Sounds, he proposed visiting Beechey Island, the depot of Sir Edward Belcher's squadron, and making off with his surplus stores in compliance with Lady Franklin's original intention; and failing that again, to make the much-desired search for the crew of the long-bone ship along the western coast of Baffin's Bay and Labrador. Leaving Upernivik on the 16th of August, where he obtained his first sledges, should he need those for his contemplated voyage forward with all speed in the direction of Green Bay, taking observations whenever practicable. In sailing and steaming through those archipelagoes of islands, the dimensions of icebergs of vast dimensions were encountered, which were over and soon splitting with the roar of a thousand canons, and sending from their resounding bases a swell that was sometimes perceptible at an incredible distance. At the entrance of Melville Island a great quantity of drifting seaweed was seen. Passing the Crimson Cliffs, alluded to by Sir John Ross, there were counted from the crow's-neck 180 icebergs, many of them of gigantic proportions. He then proceeded to Cape Athabasca, and on the 23rd he paid a visit to Ominecuk, the spot named by Adam Beck as that on which Capt. Franklin and his crew had been murdered; and on which he said their bones would be found buried in a cairn. He (Capt. I.) accordingly landed, and closely examined the place, but no trace of any European bones could be found, but a piece of iron, a piece of whalebone, a piece of iron hoop, and a sail on which the Queen's arms had been impressed; and these articles had no doubt been left by her Majesty's ship North Star, which had wintered near to this spot. He (the gallant captain) found an ugly cairn upwards of six feet high, and covered with very heavy stones. His desire to view the contents was much whetted by the fact that on removing the upper stones a quantity of bones were found. The cairn was soon levelled to the base, and the earth dug out to a foot depth through the frozen soil, but great was the satisfaction at finding, upon the authority of their naturalists, that the bones were those of the whale, the walrus, and of different species; and that there was nothing like them in the land. He consequently satisfied himself that there was no truth whatever in the stories of that remarkable Adam Beck, and that no such fate had indeed befallen their missing countrymen.

(Continued.)—On the shores of Whales Sound he found a number of men who, on seeing the crew indulged in immoderate laughter, and expressed the strongest astonishment at their clothing. They had evidently never seen Europeans before, but they soon became friendly, and many of the small articles that lay on the table were purchased of them, the most singular of these was perhaps a vessel called a pot stone, which they used to melt their blubber. These vessels were hollowed out of solid stones by means of a harder kind of stone, and the formation of one was a work requiring immense skill and labour. Notwithstanding that he (the gallant officer) left England three months later than the expedition of last year, he had succeeded in raising considerably higher latitudes than had been attained by Ross and Parry in the voyage of 1818, and he had explored and laid down 600 miles of new coast line, determining also that the entrance into Whales Sound was a great strait passing in the Arctic basin, and then, apparently defining Greenland as an island. At the entrance of this strait he had discovered a cluster of islands, which he had rapidly surveyed, and laid down upon his chart. To the strait he had given the name of Murchison's Strait.—(cheers)—and the principal island had called Northumberland Island. Leaving this sound, as it had hitherto been termed, he sailed Northward, in the direction of Smith Sound, and there found a great extent of sea stretching far before him. On the 1st Aug. at 2 p. m., he attained the lat. of 78 deg. 25 min. (nearly 120 miles farther south than any former voyage). He saw that in a gale, the entrance into the sound was 25 or 30 miles across, only partially encumbered with ice, and which, upon the eastern shore, seemed perfectly impassable. He had thus entered the great Polar Basin, and he believed that he would have pushed through in the direction of Baffin's Strait had not a gale arisen which fairly blew him out of it, and defied his utmost efforts; for the small high-pressure engine with which the sloop was fitted, was only equal to pushing the vessel in calm or light winds. After some hours of great exertion, he was providentially released from the ice which had surrounded him, and then, closely examining the western shore, he entered Jones Sound on the 30th Aug. Here he penetrated to longitude 84, and found at this point that the ice had suddenly turned away to the north-west, while the eastern shore remained where it was at the eye could readily see, so no land could be distinguished at the bottom of the sound, or could any trace of the missing expedition be discovered. On the 1st Sept. he sailed from Jones Sound with the intention of communicating with the squadron of Sir Edward Belcher. He reached Beechey Island on the 7th of Sept., and after depositing his letter bags and receiving others in return for England, entered the same day with a view to commence a more detailed examination of the western shores of Baffin's Bay than former navigators had been able to bestow on that coast. Again he was successful in finding any traces of the missing expedition on these shores, which he explored as far south as the River Clyde, where the ice fixed to the land, and stretched nearly across Baffin's Bay, and carried him over to the eastern shore in the neighborhood of Disko Island, where he encountered a number of gulls, the most violent he ever witnessed, and which, rendered the exploring which he intended, a most difficult task. After several fruitless efforts to penetrate the western shore, he turned his attention to the north-east, and the polar basin, and was successful in finding any traces of the missing expedition on these shores, which he explored as far south as the River Clyde, where the ice fixed to the land, and stretched nearly across Baffin's Bay, and carried him over to the eastern shore in the neighborhood of Disko Island, where he encountered a number of gulls, the most violent he ever witnessed, and which, rendered the exploring which he intended, a most difficult task.

The Remarks on Climate are peculiarly worth reading by the Prince Edward Island farmer. The great complaint that he is for ever making is the extreme length of the winters. Professor Johnston has however shown, that the difference between the Western part of the State of New York and the Province of New Brunswick does not consist of more than 10 or 15 working days and those almost altogether in the fall. "The farmers in these countries, New York and Canada, appear to have as much reason to complain of short springs, as we have."

"1. There may be a deficiency of time for farm-work. Professor Johnston on enquiring into this subject in relation to New Brunswick, found that the average time of latest ploughing is the 17th November, and the average time of earliest sowing, the 21st April. He infers from this, that the average duration of summer, is six months and twenty-two days. He takes three months and 17 days as the average time required for the growth of spring grain, and calculates, that the time for spring and autumn work, before sowing and after reaping, is three months and three days. These numbers are equally applicable to Nova Scotia, taking the average between the earliest districts in the western counties and the latest parts of the east hills. On comparing these dates with those for western New York, Professor Johnston finds, '1st, that the winter in western New York, is 22 days shorter than that in New Brunswick; 2d, that this shortness consists in the addition of 21 days to the open weather of fall, and one day to the open weather of spring.' To counterbalance this advantage, he finds that the New York farmer has a somewhat larger number of rainy days, which reduce his extra time in fall to between 10 and 15 days. These facts would induce us to conclude, that the advantage in regard to open weather in New York and Upper Canada as compared with Nova Scotia, does not exceed 20 working days in the year, and this almost altogether in the fall. p. 90." (To be continued.)

CHARLOTTETOWN, Dec. 27, 1852.  
J. D. HASZARD, Esq.,  
Sir;  
Will you permit me, through the medium of your journal, to draw your attention to the fact that the species of *Melasma*—viz., the Clio Boarca and the Sigillata, two of that class upon which the whale principally feeds—were found by the surgeon of his expedition, Dr. Sutherland, to be more numerous and larger in Whales Sound than in any other locality he had visited, and that the sea birds Molys (Frigate) and Lays (Linn. Tropic) were abundant. Capt. Inglesfield stated that, upon one occasion, he sailed through a number of birds, and that, as far as the eye could reach, the surface of the water was covered with them. Moreover, and that they appeared to be completely gorged, as to be apparently unwilling to move as usual, a repetition of the sport.

At the conclusion of the address, Sir John Ross said, "We thought that the executive exertions of Capt. Inglesfield have completely established that Franklin never went up Wale's or Jones's Sounds, or any other passage at the head of Baffin's Bay. It remained therefore, only to look to the Wellington Channel."

#### AN INHABITANT.

"It is the office of the Magistrate, and Special Constables to suppress such disorderly conduct; and it is the office of the Executive, to see that the magistrates and special constables do their duty. But who is to compel the Executive to do its duty?"—*Ed. II. GAZ.*

## HASZARD'S GAZETTE.

TUESDAY, DECEMBER 28, 1852.

THE MAIRS ONWARD which left here on Thursday last, have not been able to cross the Strait, from the unfavorable state of the weather. The River opposite Charlottetown remains closed, but the ice is unsafe to travel on, even for foot passengers.

ELMIRA TELEGRAPH.—The wires are now brought into the town, and the line completed, but owing to some unfortunate circumstance, no messages have yet been received from Cape Traverse.

"Hoist my Razors for CHRISTMAS TIME."—A sheet of verses under the above title has been put into our hands.

The following extract will enable our readers to judge of its merits. Of the dinner that came off in the House of Assembly Chamber last summer, the poet thus speaks:

"The Dinner o'er, the crumbs were cleared,

When toasts and sentiments were heard:

"The Queen!" of course—name so endear'd

To all the nation—

Some speaker spoke, and long was cheer'd,

With approbation.

"After the Queen, 'Here's Captain Sleigh,

Our honor'd guest, from far away;

With right good will we hail this day

His bright appearing.

Long, long amongst us may he stay!

(Tremendous cheering.)

Second Concert for the Season!

BY THE SONS OF TEMPERANCE BRASS BAND.

Under the Patronage of His Excellency the Lieut.-Governor.

THE Sons of Temperance BRASS BAND will give their second CONCERT on FRIDAY EVENING January 7, 1853, in the TEMPERANCE HALL, under the Patronage of His Excellency, Sir ALEXANDER and Lady BANNERMAN, when a variety of new and popular Music will be performed, under the direction of Mr. R. FOSTER.

The performance to commence at 8 o'clock, p. m.

Tickets may be had at the stores of H. Stampfer, Esq., Messrs. G. T. Hazzard, G. W. Morrison, and J. J. Pippy.

Charlottetown, Dec. 20, 1852.

Temperature Tea Party.

THE friends of Temperance and the Public generally, are respectfully informed, that there will be a TEA PARTY in the Temperance Hall, on THURSDAY, the 30th instant. The object of this Tea is to defray the expenses incurred for the Tuition of the Band belonging to the Order of the Sons of Temperance.

The Tables are to be furnished gratuitously through the kindness of a number of ladies.

Tickets 1s. 6d. each may be had at the stores of H. Stampfer, Esq., Messrs. G. T. Hazzard, J. J. Pippy, J. W. Morrison, and of the Secretary.

Tables open Table at 5 o'clock, p. m.

The Band will be in attendance, when the lovers of Music may expect a rich treat.

G. R. BEER, Sec'y.

December 14, 1852.

N. B.—An early application for Tickets is requested, as a limited number only will be issued.

SINGING.

SINGING.

THE Subscriber respectfully intimates to the Public, his intention of opening Classes for instruction in the Principles of Music.

Terms—Seven Shillings and Six-pence for Twenty-four Lessons, length of Lesson, 1½ hours each. Classes to meet twice a week, one at 5 o'clock, the other at 8. p. m. Admission by ticket only. No Visitors allowed. The Classes will commence on MONDAY the 3d January, 1853, at the Old Court House, should a sufficient number of Pupils offer.

Music Books for Sale.

JOHN ROSS, Teacher of Music.

December 26, 1852.

Books—Bought, Sold, or Exchanged!

THE Subscriber respectfully intimated to the reading

Public of E. F. Ladd, that he has reduced next to that

of two thousand vol. in price, his collection of old and second-hand BOOKS, in various languages.

As, during the last few years, he

has disposed of nearly 10,000 Volumes, he trusts, from the increased

intelligence of the times, and the further facility of having his books

in Charlottetown, to be the means of more largely diffusing a mass of interesting and useful knowledge.

He also wishes to say, that he continues the business of CABINET-MAKING and CHAIR MAKING.—Upwards of 3000 feet of Mahogany VENEER, for Sale.
