To Trustees, Directors of Turnpikes, on
others, interested in the construction of
Bridges.

WITTY'S NEW PATENT BRIDGE.

Mr. Wittry offers to the public his New Pa-
tent Bridge. Its superiority over others may
justly entitle it to a national consideration.—
For crossing deep rivers, rapids or falls, it is
unequaled; since it can be placed across any of
them, without Piers, and at a much less ex-
pense, than on any other system at present
used. It extends from bank to bank in a right
line, and cannot be affected in the least by freshets
or ice, for change of temperature. At the same
time, there is a durability and safety which can-
not be warranted by any other bridge now in
use.

Several of them have been erected in the
State of Missouri, one of which upwards of
100 feet in length, and others are in progress.

Advantages Offered.

1. Mr. Wittry offers to build Bridges over
the most difficult Falls or Rapids, deep Rivers
or Ravines.

2. His Bridges cannot be swept away by
floods or large masses of ice.

3. They are more safe, and possess a much
greater durability than those in present use.

NOVA-SCOTIA.
SHORTLY will be published for Schools and private instruction, a comprehensive Geographical and Historical of Nova Scotia, written in plain and easy language, with biographical and explanatory notes, and illustrated by A New Map of Nova Scotia and the adjacent Provinces.
Upwards of two years since, the benefits of a work like that proposed above, were publicly suggested by its author. Though approved of generally and forcibly reiterated by a talented gentleman of the Mechanics Institute, the suggestion was not followed up by a practical effort, and as the want which was then felt is daily becoming more urgent, the subscriber has been induced to prepare a small work which he trusts will supply the deficiency.
The object kept in view has been to afford assistance to those who are engaged in the honorable task of instructing the rising generation, in their efforts to acquire a branch of knowledge with which all should be intimately acquainted—to present to the youth of Nova Scotia a succinct, yet complete and consecutive outline of the History of the Country, with a clear view of its principal Geographical features.
The subjects will be arranged in short chapters, upon the universally approved plan of Pinnoch's Catechism—with this peculiar deviation—that although the questions come in their proper places, the answers will be independent of them, and being printed in type one size larger than the questions, may be read successfully without interruption.
The book will contain 72 or more closely printed pages, and will be sold at the lowest possible price—not higher than 1s 6d. A liberal deduction will be made to Bookellers, Schoolmasters, and others taking several copies, who will oblige by forwarding their opinion of the number they may require, in order that the demand may be nearly ascertained.
