Technical and Bibliographic Notes / Notes techniques et bibliographiques

The Institute has attempted to obtain the best original copy available for filming. Features of this copy which may be bibliographically unique, which may alter any of the images in the reproduction, or which may significantly change the usual method of filming, are checked below.

- ☐ Coloured covers/
Couverture de couleur
- ☒ Covers damaged/
Couverture endommagée
- ☐ Covers restored and/or laminated/
Couverture restaurée et/ou pelliculée
- ☐ Cover title missing/
Le titre de couverture manque
- ☐ Coloured maps/
Cartes géographiques en couleur
- ☐ Coloured ink (i.e. other than blue or black)/
Encre de couleur (i.e. autre que bleue ou noire)
- ☐ Coloured plates and/or illustrations/
Planches et/ou illustrations en couleur
- ☐ Bound with other material/
Relié avec d'autres documents
- ☐ Tight binding may cause shadows or distortion
along interior margin/
La reliure serrée peut causer de l'ombre ou de la
distorsion le long de la marge intérieure
- ☐ Blank leaves added during restoration may appear
within the text. Whenever possible, these have
been omitted from filming/
Il se peut que certaines pages blanches ajoutées
lors d'une restauration apparaissent dans le texte,
mais, lorsque cela était possible, ces pages n'ont
pas été filmées.

L'institut a microfilmé le meilleur exemplaire qu'il lui a été possible de se procurer. Les détails de cet exemplaire qui sont peut-être uniques du point de vue bibliographique, qui peuvent modifier une image reproduite, ou qui peuvent exiger une modification dans la méthode normale de filmage sont indiqués ci-dessous.

The copy filmed here has been reproduced thanks to the generosity of:

Archives of Ontario
Toronto

The images appearing here are the best quality possible considering the condition and legibility of the original copy and in keeping with the filming contract specifications.

Original copies in printed paper covers are filmed beginning with the front cover and ending on the last page with a printed or illustrated impression, or the back cover when appropriate. All other original copies are filmed beginning on the first page with a printed or illustrated impression, and ending on the last page with a printed or illustrated impression.

The last recorded frame on each microfiche shall contain the symbol $\rightarrow$ (meaning "CONTINUED"), or the symbol ∇ (meaning "END"), whichever applies.

Maps, plates, charts, etc., may be filmed at different reduction ratios. Those too large to be entirely included in one exposure are filmed beginning in the upper left hand corner, left to right and top to bottom, as many frames as required. The following diagrams illustrate the method:

L'exemplaire filmé fut reproduit grâce à la générosité de:

Archives of Ontario
Toronto

Les images suivantes ont été reproduites avec le plus grand soin, compte tenu de la condition et de la netteté de l'exemplaire filmé, et en conformité avec les conditions du contrat de filmage.

Les exemplaires originaux dont la couverture en papier est imprimée sont filmés en commençant par le premier plat et en terminant soit par la dernière page qui comporte une empreinte d'impression ou d'illustration, soit par le second plat, selon le cas. Tous les autres exemplaires originaux sont filmés en commençant par la première page qui comporte une empreinte d'impression ou d'illustration et en terminant par la dernière page qui comporte une telle empreinte.

Un des symboles suivants apparaîtra sur la dernière image de chaque microfiche, selon le cas: le symbole $\rightarrow$ signifie "A SUIVRE", le symbole ∇ signifie "FIN".

Les cartes, planches, tableaux, etc., peuvent être filmés à des taux de réduction différents. Lorsque le document est trop grand pour être reproduit en un seul cliché, il est filmé à partir de l'angle supérieur gauche, de gauche à droite, et de haut en bas, en prenant le nombre d'images nécessaire. Les diagrammes suivants illustrent la méthode.

HEALTH, PROSPERITY, AND GOOD OLD AGE

DR. J. W. KERROTT'S MEDICINES, &c. &c.

We are not going to impose upon you along justice, neither have we any apology to offer for
 thus presenting you this little work. We are not going to dip our pen in the sphene and launch
 poetry at you; but we wish to come before you with honest Nature's own language, and unfold to
 you the truth as it is in medicine, the death stripped of all its mystic coverings and professional
 fallacies. You have all your peculiar opinions with regard to medicine and the man who presents
 them. You have your favorite doctor, whom you select from among others as being the most
 efficient; the selected one is chosen by your neighbor, who thinks your doctor an ignoramus, and
 observes, "Then the whole human family are divided in opinion not only as to the physicians
 of this intellectual, but have their differences in the choice of the various medical practices. Some
 of you believe in the old spine practice, handed down to you from generation to generation, the
 old-fashioned bleeding, cupping, &c. Others have traditions of old material, such as Huxham's pills,
 which is equivalent to giving the patient a severe letting alone. A third takes the "Water-Cure
 Journal," and expatiates all other sort of treatment, while a fourth stands with Galien in one hand
 and hot-drops in the other, and avows allegiance to Theriacalism as the only one in the cure
 of disease." And still we are using all this old stuff, till we are weary of it, and
 then we live in the midst of discrepancy and jargon, and despite the skill of these various
 votaries of medicine do not live out half our days. From time immemorial medicine has been a
 chaotic speculation and imposture. We are informed that Asclepius was the god of medicine,
 his children and disciples at Hamaeum were called, we have no authentic account, as his life is
 involved in fable; but a temple dedicated to a temple was erected in dedication of his power, called
 the Asclepiad, Asclepiad, to which the sick were resorted to get cured of the various maladies with
 which they were afflicted; the women resorted to being bled, again, again, again, or other parts.
 Much would have surprised to have guessed the symptoms of the disease, and what quantity
 of Hypocrite, as called 400 years B.C. and who is called the father of medicine collected all the
 traditions around at the temple and published different modes for the pathology and cure of
 disease, transmitted them to his disciples as much respect by our political physicians. Galien
 translated the Greek original the principles of Hypocrite, and held thousands of the people in
 the temple in B.C. 100. In the fourth century, the temple was destroyed, and the Asclepiad and
 his disciples which were deposited there, the original works of Galien and Hypocrite were
 scattered among the pagans, giving rise to two parties the one for Galien, the other for Hypocrite.

At this time Reason awakened the minds of the people to a sense of reasoning for themselves. The reformation of Luther broke in upon them, the old theories of medicine fell to the ground, out of the ashes of which arose others, to fall in like manner. At one time a certain article of medicine is held up as a perfect panacea, a specific in the cure of certain diseases. In course of events it is found to have no virtues at all, is torn from the Pharmacopoeia, and cast to the dogs.

In judging, therefore, of the past, have we not sufficient testimony to warrant us in the conjecture that the present system of practice is equally as fool, compared with the age, as it was in the days of Hippocrates. If we have no proof positive we have proof presumptive, that such may be the case—the fact that great men, scientific men, and men of unimpeachable character give it their sanction, is no proof of its infallibility. Error is not confined to foolish folk any more, but the wise are as prone to learn, and would rather hug old theories all their lives than search for anything new. At one time we see a little boy walking the streets of Philadelphia with a loaf of bread under his arm, at another we see him drawing the lightning from the heavens and identifying it with common electricity. A celebrated French chemist remained in his sanctum sanctorum for two years trying to discover what he intended to call a general solvent, or a something which would dissolve everything with which it came in contact, when all his labors and magazine anticipations were at once suspended, by a country beer walking into his laboratory and asking him what he intended to keep it in if his search proved successful.

Should we admit the truth of the science of medicine on account of its antiquity and the number of learned men engaged in it, how are we to reconcile the following quotations, which we copy from the author's own pen. The celebrated Dr. Good says: "The science of medicine is a barren, barren, barren; and the effects of our medicines upon the human system are in the highest degree uncertain; except indeed that they have already destroyed more lives than war, pestilence, and famine combined." Again, then to Dr. John Forbes, editor of the "British and Foreign Medical Review," physician to Agincourt, Dr. Ross says: "That in a large proportion of the cases treated by physicians, the disease is cured by nature and not by them—that in a large, but not a small proportion, the disease is cured by nature in spite of them; in other words, their interference operating instead of assisting nature; that in a considerable portion of cases it would be better for the patient if active medicine, especially drugs, were abandoned." Dr. Abercrombie writes: "We might, as well declare the whole truth to wit, that our whole pretended science is but a system of guessing the art of curing, more favored patients. We know neither the cause nor the course of disease, nor the action of remedies. Our practice resembles the conduct of a blind man armed with a club and stumbling in the dark, if we hit the disease we kill it, if we hit the patient we kill him." Doehere, after a long life of experience, comes to the following conclusion in his old age:—"I have examined the subject thoroughly, and think the best plan is to keep the head cold, the feet warm, and repeat all physical means." What opinion must we form of a profession when the very bases and assumptions of which it rests are thus in its own hands? Still these same men are quoted in all the standard medical works, and are held up by all of our American friends, and looked upon as authorities in medical science.

Reader, you are perhaps an invalid: you are troubled with a constant pain in the head, back, side, or back been ailing for years with a something which causes you this little of sadness and pain. You consult your pet physician, who gravely informs you that your liver is diseased, and gives you a prescription for not having called in his assistance at an earlier period, but gives you some assurance that his medicine will effect a cure, and you of the many patients taken out of the same disease whom he has cured, to pursue his course, to keep his name, to keep his name, and his name, and his name. You follow his direction, and for a short time you are better, but you are not cured. One time runs on and you are still an invalid. You have consulted your physician, and still in a way that you are not cured, with various the disease, and you are still an invalid. You have consulted your physician, and still in a way that you are not cured, with various the disease, and you are still an invalid.

the cause of disease.—For forty years there, he procures your disease dyspepsia; a fourth calls to narrow debility. All administer salines; all profess thoroughly to understand your case; all pocket you with a bill, and are very careful to collect their pay, but have not a sign nor a tear for your condition, leaving you motionless, dumb, constipated and numb, and while this grave is opening to receive your tortured soul, we ask: is it strange that we should doubt the skill of the practitioner?

Since the days of Adam the human family have been more or less afflicted with disease, and equally as anticipated is the adoption of certain remedies, for the same experience has taught the only method which has handed down to us any items of value, and by it alone can we establish ourselves as a nation of healthy men. In giving you our opinion as to the most rational mode of treating disease, we would first call your attention to what we consider the four great causes of all human troubles: 1st. Intemperance in eating and drinking. 2d. Changes of temperature in the climate, producing colds and their consequences. 3d. Impurity of the atmosphere. 4th. Congenital disease, or those diseases which are handed down from parents to children.

Intemperate habits.—The stomach is the great depot of nutriment—it therefore calls for nutritious food. Give it anything else and you inflict upon it a certain amount of injury. It may be injured also by giving it too much to do. The stomach requires rest as well as the worried hunter after a hard day's toil, and he who is in the habit of eating too large a quantity, or too frequently, or indulging in unwholesome food, stimulating drinks, &c., will be disappointed if he expects to enjoy good health. On the contrary he predisposes himself to dyspepsia, general debility and a multitude of other diseases which follow in the wake of such intemperance, the first great cause of which consists in having diminished the power of the digestive organs, manifested by a passive state of the bowels, derangement of the liver, loss of appetite, and consequent emaciation. The patient laboring under such affections complains of pain in the side, pain between the shoulders, headache and giddiness, flashes of heat to the face, hands and feet, disagreeable taste in the mouth, especially in the morning, nervousness through the day, sometimes nervousness, producing intense palpitation of heart, sometimes sleep, in short, rendering his life a burden to himself and his friends. Now we propose that the root cause of all these difficulties can be removed by the great efforts of the stomach and liver, (and we defy the whole medical faculty to produce any rational objection,) what course of treatment does reason at once suggest? The little A. B. C. method would reply, restore the strength of the stomach by the administration of a tonic and stimulate the liver to aid in the digestion of the food, obtain from the existing causes and you conquer all its present and future diseases. You may take salines, blisters and physics all your days, and pay your doctor's fees hundreds, but all to no purpose; the pale monster Death will gnaw at your flesh, and the grave opens to receive you.

A safe and simple remedy is all that is necessary to effect a cure, and our honest convictions are in favor of **Dr. Kewitt's Vegetable Tonic Mixture and Mephitic Pills**. We have seen enough to convince us that we cannot speak too highly in their praise or recommend them too strongly to the public. Do they speak for themselves; their extensive demand for the last two years is without a parallel in the history of this or any other medicine.

This Vegetable Tonic is a mild and powerful tonic, communicating vigor to the stomach and stimulating the whole literary system to a healthy and vigorous action; it is unparalleled in the cure of dyspepsia, indigestion, bilious diseases, and general debility.

It is a most powerful tonic, particularly in chronic affections of the liver, and where the constitution has been injured by the use of mercury—given in connection with the Mephitic Pills, my cure is in the end—It is unparalleled in the cure of all diseases above mentioned.

Observe that the most interesting testimony in favor of Dr. Kewitt's pills, from persons of high standing and respectability in the neighborhood of London and elsewhere, who have been the

use of these Pills and Bitters, been restored to health, after being brought almost to the border of the grave from the effects of these diseases. Price.—3s. 6d. 0/6 per bottle.

Prepared, Wholesale and Retail, at the *Eclectic Medical Dispensary*, Dundas St., London, O. W.

Dose: Half a tablespoonful morning, noon, and night, before meals.

Westminster, January 1st, 1853.

Dr. J. W. Knappert:—Dear Sir,—Having learned that you have complied with the solicitations of your friends and are now preparing your invaluable Pills and Bitters, that the public at large may participate in the benefits to be derived from their use, I beg leave most cordially to bear testimony as to their powerful and salutary effects in removing disease, and restoring the system to health. I have for the last three years labored under the most intense suffering from disease of the Liver, Dyspepsia, and General Derangement of the Nervous System; from the recommendation of others I was induced to try your Pills and Bitters; in a very short time they wrought an efficient cure. I therefore cheerfully recommend them to all those who are suffering from the above complaints.

GEORGE BARNARD.

London, 12th Sept. 1850.

To Dr. J. W. Knappert:—Dear Sir,—I consider it a duty I owe to you and the public to give my testimony in favor of your Mandrake Pills and Vegetable Tonic Mixture, in the cure of disease. Two of my family were laboring under severe inflammation of the Liver, with loss of appetite, Constipation and General Debility—and from the use of your invaluable Pills and Bitters they were in a very short time restored to perfect health. I have known similar good results from their use in other very alarming cases, and cheerfully recommend them to the public.

NATHAN JACOB, J. P.

Westminster, 14th February, 1853.

To THE PUBLIC:—I take great pleasure in bearing testimony as to the powerful effects and great good resulting from the use of Dr. Knappert's Vegetable Tonic Mixture, in the cure of my wife who has been induced to the border of the grave from Dyspepsia; she has taken only two bottles, and the result has been wonderful; she is restored to perfect health and vigorous body and mind.

SAMUEL LEWIS.

(To the Editor of the Western Planet.)

DEAR SIR:—Allow me, through the columns of your paper, to express my heartfelt gratitude to Dr. J. W. Knappert, of London, O. W., who, by the use of his Tonic Mixture and Mandrake Pills, has effected a cure of disease of the Liver of your reading. For the two and a half years previous to the month of June last, I had suffered much, and had become so far reduced by complete prostration of the nervous system as to be unable to leave my room without assistance; during which time I had employed the assistance of all the most eminent of the Medical Profession in this section of the country, and all to no purpose.

About the first of June last, I commenced the use of the medicines above named, continuing their use for three months, when, from being unable to turn myself in bed without assistance, I am now (thank Heaven and the instrument) entirely cured!

I cannot too strongly recommend the above medicines to persons suffering under like afflictions. Respectfully, to serve the cause of humanity, &c.

JOSEPH WOOD.

Harpend, O. W.

The above are only a few of the many acknowledgments in recommendation of this valuable Bitters. In accordance with our division of the general species of disease, we shall briefly notice, namely, that which we have called change of temperature, producing what is termed common colds, out of which arise the various types of inflammation, impairing the constitution and rendering it susceptible to disease in a multitude of forms. A few words with regard to the physiology of a cold, and we at once anticipate the treatment indicated. The effect produced by a cold is first upon the surface of the body, is that in close the pores of the skin, in accordance with the general law of nature, that heat expands substances and cold contracts them. The pores of the skin being closed, perspiration is checked, and likewise other excretions which in nature are thrown off through the medium of the pores of the skin; and thus the system is in a state of fever. The circulation, therefore, carries it to the lungs, and hence coughing and sneezing of itself, it being nothing more than an effort of nature to expel this impure matter from the system.

Allow it to remain and it communicates disease to the lungs, hence the origin of inflammation, consumption, &c. The disease is not the lungs in themselves, it is the virus which enters them, and which may remain or later terminate in death. A strong experiment or cough medicine is all that is indicated, if taken in time. Our country has for years suffered with consumption, but since the introduction of *Dr. Kermott's Vegetable Pulmonary Balsam*, they are on the decline, and we are sanguine in the anticipation that it will ere long rid us of these Yankee humbugs and be the means of prolonging the extent of our purse and likewise our lives.

DR. J. W. KERMOTT'S VEGETABLE PULMONARY BALSAM.

A SAFE AND EFFECTUAL CURE FOR

Coughs, Colds, Hoarseness, Bronchitis, Asthma, Incipient Consumption, &c., &c.

This Medicine operates by producing a free and copious expectoration, and by imparting vigor to the weakest vessels, changing them from a diseased to a healthy action. Hundreds of cases might be referred of persons who have been despatched to this grave by their medical attendants, and by the use of this valuable remedy are now in the enjoyment of perfect health.

Dose.—One teaspoonful from three to six times per day, or oftener if the cough is severe.

Price.—75 cents per bottle. Prepared, Wholesale and Retail, at the *Eclectic Medical Dispensary* Dundas St., London, G. W.

WOLKINW TO TOASTIZE CROUCH OF ST. MARK'S

Dr. J. W. Kermott :—Dear Sir,—Being informed that you are preparing your *Vegetable Pulmonary Balsam*, in order that the public at large may appreciate its virtues, I cheerfully submit to you the following statements of facts,—use them as you think proper. In the autumn of 1855, my eldest son was attacked with pain in the chest, shortness of breath, accompanied with a very severe cough. We used every means within our power, employed the most skillful physicians, and, after their vain attempts, had recourse to some of the most popular nostrums for the cure of consumption, but all to no purpose, he gradually grew worse. In 1856, he became so feeble and emaciated, so as to be obliged to leave his bed; his face and legs became swollen, purplish, profusely at night, expectorated dark, foetid sputum, had chills and fever alternately, in short all who knew or saw him pronounced him to be the last stages of consumption, and a victim for the grave. At his own request we sent for you, but without the slightest hope of reviving any benefit; still, as you assured him with a hope, he commenced using your Balsam, and after taking some half dozen bottles began slowly to recover, till in three months' time he was restored to perfect health. One year has elapsed since the cure was effected, and he is still hale and sound.

Ever grateful, I am, Dear Sir, yours respectfully, **JAMES DASHWOOD**

The following certificate, from one who was given over to die of Consumption, and so refused that he was unable to leave his bed, is only one of hundreds that can be furnished from well known parties.

This may certify that I have for the last two years been afflicted with disease of the lungs, severe Cough, spitting of pus, and sometimes blood. I tried many different medicines, but all to no effect, till some nine months since I was recommended to try *Dr. Kermott's Vegetable Pulmonary Balsam*, and I can truly say the change it has wrought in my system has been wonderful. I am now strong, able to labour in the full of the year, and great credit is due to the winter of 1856, which I have passed in health. I cannot too strongly recommend the above medicine to persons afflicted with Consumption.

London, 1st April, 1857.

London, 1st Sept. 1856.

tion: I tried the different Symples and Portents in vain; the treatment of Physicians only seemed to aggravate the disease. I was recommended to try Dr. Kermott's Vegetable Pulmonary Balsam, and think Providence has cured me; my cough is gone, my health is fully restored, and I am now strongly recommended the Pulmonary Balsam to persons labouring under like affections. *London, Glasgow, Canada.*
Prove its virtue by a fair trial.

We next call your particular attention to diseases brought on by impurities of the atmosphere. Death suspended in air—how silent yet how deadly his aim. Above us and around us float them and groans. Whether in the form of Plague, Putrid Fever, or Cholera, how innocently do we inhale their poisonous vapour and in that hamlet, town, and city where to-day joyously reign health and happiness, to-morrow we may behold them struggling in the arms of death. That a great number of the most formidable diseases take their origin from impurities floating in the air, is a fact well established as to need no proof, but whether we shall ever be able to forestall these maladies is something we are unable to determine; they have thus far triumphed over medicine and put to defiance the physician's skill.

Time and space will not permit us even to enumerate the different diseases brought on by the above cause, but we shall select the two most common among us, viz: Intermittents, more commonly known as Fever and Ague, Chill Fever, &c. and derangement of the bowels, such as Diarrhoea, Dysentery, &c. Bid us of these two forms of putrescence, and we are a happy people compared with our present situation. The justly celebrated Extract of Willow and Extract of Blackberry have thus far proved themselves antidotes, and we have no hesitation in saying they will ere long supplant all other articles of the kind.

DR. KERMOTT'S COMPOUND EXTRACT OF WILLOW,

A SAFE AND EFFECTUAL CURE FOR Ague, Chill Fever, and all Bilious Diseases.

This Remedy is without a parallel, and for the last twelve months has been extensively used by all classes of Physicians, who acknowledge it to be superior, because safer and more effectual, than Quinine or any remedy except. We have their opinion in favor of supplanting the use of Quinine as soon as it becomes generally known. It is purely vegetable—taken from the system of the Willow. A trial of one bottle will convince the purchaser of its intrinsic virtue in the cure of the above diseases.

Directions.—For Ague and Chill Fever, one tablespoonful three or four times per day, in the absence of fever. Dose for children accordingly.

In Bilious diseases, one teaspoonful three times per day, before meals, in connection with Dr. K's Mucilage Pills, any two or three times.

Price.—One Dollar per bottle. Prepared, Wholesale and Retail, at the *London Medical Dispensary*, Dundas St., London, O. W.

This is to certify that I have sold two dozen bottles of Dr. Kermott's Vegetable Ague Remedy to as many men, working in my colliery on the Great Western Railroad. Every bottle proved successful in curing the patient, and the men were invariably restored to health, and able to go to work immediately after taking the medicine. There has been no return of the Ague in any one of the men having disposed since I sold the last bottle. I cheerfully recommend it to the public, and in my opinion unequalled.

Dr. K. is daily receiving orders from merchants and others for a large supply of the Willow. During the last season not less than 5,000 bottles have been sold, west of the river of Mississippi. And equally as popular in

DR. KERMOTT'S COMPOUND EXTRACT OF BLACKBERRY, **Diarrhoea, Dysentery, Cholera, Cholera Morbus, and all Diseases** **of the Stomach and Bowels.**

Dr. K. has subjected this remedy to the test of some of the most scientific medical men both in Canada and the United States, who all with one voice acknowledge it to be superior to any other medicinal agent, in the cure of the above diseases. It is purely vegetable, acts promptly, and gives a healthy tone throughout the whole Alimentary Canal. It has proved several in thousands of cases; and in the town of London and vicinity, during the summer of 1854, this remedial agent was administered to more than 500 patients; in the worst stages of summer complaints, all of which were effectually cured. Suffice it to say that, in five years' extensive practice, we have yet to learn of a single case of failure.

Dosage.—Dose for an adult, one tablespoonful every two hours; and for children in proportion to their age.

Price.—2s. 6d. per bottle.

This is a sovereign remedy and might well be styled the *Asclepius* of the bowels. We consider it one of the greatest discoveries of the age; is perfectly safe and effectual in any instance; the children, even in the most delicate infant; does not check the action of the bowels, thereby producing constipation, but holds in restraint by an analgesic, gently stimulating them to a healthy action, with the most happy effects in all diseases of the bowels. It is purely vegetable, taken from the wild Blackberry, with which every scholastic has formed an acquaintance. We have not words to express its equivalent in value; every family should be provided with it. By all means give it a trial.

We now come to our last division of the general cause, viz: those who are handed down from parent to child. It is lamentable, but nevertheless true, that we but in many instances the sufferings of our parents, live as they lived, die as they died, without ever having been the victims of a healthy constitution. Better had we never existed than to have been born at the expense of some violation of the laws of nature. It is a question whether we shall or shall not, even with strict adherence to the laws of health, ever eradicate these diseases from among us. All that we can do by way of medicinal agents, is to obviate and purify the blood. At the head of medicines calculated to produce this effect, stands Sarsaparilla. The most celebrated physicians acknowledge it superior to any other known alternative. You will find a great deal of trash under the name of Sarsaparilla; We have been credibly informed that in one of the largest establishments in the United States, as soon as the article became popular, the Sarsaparilla was omitted. We know of but one preparation which we are positive contains Sarsaparilla, in addition to which you have the combined influence of Stillings, an invaluable article for restoring the constitution.

BEET, 100, 101, 102, 103, 104, 105, 106, 107, 108, 109, 110, 111, 112, 113, 114, 115, 116, 117, 118, 119, 120, 121, 122, 123, 124, 125, 126, 127, 128, 129, 130, 131, 132, 133, 134, 135, 136, 137, 138, 139, 140, 141, 142, 143, 144, 145, 146, 147, 148, 149, 150, 151, 152, 153, 154, 155, 156, 157, 158, 159, 160, 161, 162, 163, 164, 165, 166, 167, 168, 169, 170, 171, 172, 173, 174, 175, 176, 177, 178, 179, 180, 181, 182, 183, 184, 185, 186, 187, 188, 189, 190, 191, 192, 193, 194, 195, 196, 197, 198, 199, 200, 201, 202, 203, 204, 205, 206, 207, 208, 209, 210, 211, 212, 213, 214, 215, 216, 217, 218, 219, 220, 221, 222, 223, 224, 225, 226, 227, 228, 229, 230, 231, 232, 233, 234, 235, 236, 237, 238, 239, 240, 241, 242, 243, 244, 245, 246, 247, 248, 249, 250, 251, 252, 253, 254, 255, 256, 257, 258, 259, 260, 261, 262, 263, 264, 265, 266, 267, 268, 269, 270, 271, 272, 273, 274, 275, 276, 277, 278, 279, 280, 281, 282, 283, 284, 285, 286, 287, 288, 289, 290, 291, 292, 293, 294, 295, 296, 297, 298, 299, 300, 301, 302, 303, 304, 305, 306, 307, 308, 309, 310, 311, 312, 313, 314, 315, 316, 317, 318, 319, 320, 321, 322, 323, 324, 325, 326, 327, 328, 329, 330, 331, 332, 333, 334, 335, 336, 337, 338, 339, 340, 341, 342, 343, 344, 345, 346, 347, 348, 349, 350, 351, 352, 353, 354, 355, 356, 357, 358, 359, 360, 361, 362, 363, 364, 365, 366, 367, 368, 369, 370, 371, 372, 373, 374, 375, 376, 377, 378, 379, 380, 381, 382, 383, 384, 385, 386, 387, 388, 389, 390, 391, 392, 393, 394, 395, 396, 397, 398, 399, 400, 401, 402, 403, 404, 405, 406, 407, 408, 409, 410, 411, 412, 413, 414, 415, 416, 417, 418, 419, 420, 421, 422, 423, 424, 425, 426, 427, 428, 429, 430, 431, 432, 433, 434, 435, 436, 437, 438, 439, 440, 441, 442, 443, 444, 445, 446, 447, 448, 449, 450, 451, 452, 453, 454, 455, 456, 457, 458, 459, 460, 461, 462, 463, 464, 465, 466, 467, 468, 469, 470, 471, 472, 473, 474, 475, 476, 477, 478, 479, 480, 481, 482, 483, 484, 485, 486, 487, 488, 489, 490, 491, 492, 493, 494, 495, 496, 497, 498, 499, 500, 501, 502, 503, 504, 505, 506, 507, 508, 509, 510, 511, 512, 513, 514, 515, 516, 517, 518, 519, 520, 521, 522, 523, 524, 525, 526, 527, 528, 529, 530, 531, 532, 533, 534, 535, 536, 537, 538, 539, 540, 541, 542, 543, 544, 545, 546, 547, 548, 549, 550, 551, 552, 553, 554, 555, 556, 557, 558, 559, 560, 561, 562, 563, 564, 565, 566, 567, 568, 569, 570, 571, 572, 573, 574, 575, 576, 577, 578, 579, 580, 581, 582, 583, 584, 585, 586, 587, 588, 589, 590, 591, 592, 593, 594, 595, 596, 597, 598, 599, 600, 601, 602, 603, 604, 605, 606, 607, 608, 609, 610, 611, 612, 613, 614, 615, 616, 617, 618, 619, 620, 621, 622, 623, 624, 625, 626, 627, 628, 629, 630, 631, 632, 633, 634, 635, 636, 637, 638, 639, 640, 641, 642, 643, 644, 645, 646, 647, 648, 649, 650, 651, 652, 653, 654, 655, 656, 657, 658, 659, 660, 661, 662, 663, 664, 665, 666, 667, 668, 669, 670, 671, 672, 673, 674, 675, 676, 677, 678, 679, 680, 681, 682, 683, 684, 685, 686, 687, 688, 689, 690, 691, 692, 693, 694, 695, 696, 697, 698, 699, 700, 701, 702, 703, 704, 705, 706, 707, 708, 709, 710, 711, 712, 713, 714, 715, 716, 717, 718, 719, 720, 721, 722, 723, 724, 725, 726, 727, 728, 729, 730, 731, 732, 733, 734, 735, 736, 737, 738, 739, 740, 741, 742, 743, 744, 745, 746, 747, 748, 749, 750, 751, 752, 753, 754, 755, 756, 757, 758, 759, 760, 761, 762, 763, 764, 765, 766, 767, 768, 769, 770, 771, 772, 773, 774, 775, 776, 777, 778, 779, 780, 781, 782, 783, 784, 785, 786, 787, 788, 789, 790, 791, 792, 793, 794, 795, 796, 797, 798, 799, 800, 801, 802, 803, 804, 805, 806, 807, 808, 809, 810, 811, 812, 813, 814, 815, 816, 817, 818, 819, 820, 821, 822, 823, 824, 825, 826, 827, 828, 829, 830, 831, 832, 833, 834, 835, 836, 837, 838, 839, 840, 841, 842, 843, 844, 845, 846, 847, 848, 849, 850, 851, 852, 853, 854, 855, 856, 857, 858, 859, 860, 861, 862, 863, 864, 865, 866, 867, 868, 869, 870, 871, 872, 873, 874, 875, 876, 877, 878, 879, 880, 881, 882, 883, 884, 885, 886, 887, 888, 889, 890, 891, 892, 893, 894, 895, 896, 897, 898, 899, 900, 901, 902, 903, 904, 905, 906, 907, 908, 909, 910, 911, 912, 913, 914, 915, 916, 917, 918, 919, 920, 921, 922, 923, 924, 925, 926, 927, 928, 929, 930, 931, 932, 933, 934, 935, 936, 937, 938, 939, 940, 941, 942, 943, 944, 945, 946, 947, 948, 949, 950, 951, 952, 953, 954, 955, 956, 957, 958, 959, 960, 961, 962, 963, 964, 965, 966, 967, 968, 969, 970, 971, 972, 973, 974, 975, 976, 977, 978, 979, 980, 981, 982, 983, 984, 985, 986, 987, 988, 989, 990, 991, 992, 993, 994, 995, 996, 997, 998, 999, 1000.

DR. J. W. KERMOTT'S **FLUID EXTRACT OF SARSAPARILLA AND STILLINGIA.**

Syphilitic, Scrofulous, and other Diseases.

And every variety of Painless Disease, bleeding at the Lungs, and every other disease not cured by the use of Mercury and other poisonous Drugs.

Guaranteed superior to any other preparation of Sarsaparilla ever yet invented.

Prepared, Wholesale and Retail, at the *Edinburgh Medical Dispensary*, Dundas St., London, G. W.

Price.—One Dollar per bottle.

London, 12th March, 1853.

Dr. KERRISTON:—Dear Sir, I take great pleasure in recommending your valuable extract of Scamperilla and Sillaria. I have used it myself for a Scrothitic affection, and have found it superior to any other alternative yet known. I have known it used in very many cases, and can confidently recommend it as the best preparation of Scamperilla I have yet known.

London, 21st March, 1853.

To the Aethiopian.—This may certify that I have for the last three years been afflicted with a Scrothitic disease, weakness of the lungs, spitting blood, &c. I was reduced to a mere skeleton. I had used the most of the popular medicines in vain—I consulted with some score of most Physicians, and tried their remedies to no purpose; when I was recommended to try Dr. Kerriston's Extract of Scamperilla and Sillaria. I took seven bottles, and for the last four months I have enjoyed perfect health. I cheerfully recommend the above medicines as powerful to do good.

Green Vm.

We now leave you to try them and judge for yourselves. We should be sorry to come before you in the shape of humbug. We are honest in the belief that they are the medicines to restore your health, and save you many a tear and groan, as well as many a mispent shilling to fee your doctor. Many will be ready with open mouths to lavish upon them the terms quackery and humbug, but we leave you to determine which is the quack, he who restores you to health by simple remedies, or the college bred tyro who wastes your life away by rule, but under the immediate protection of the House of Law. To him all is quackery except that which emanates from college doctors where he hastily smokes his pipe, leans back upon his chair, and spends a few years in pursuit of the hint supplied by which he shall be able to gull an unsophisticated populace. We are too apt to misplace our confidence in those colleagues simply because we have been informed that they have seen the elephant, and like the disciples of Pythagoras, think it must be true because—he said, &c. If we would more frequently scrape their feet, we would find a less amount of wisdom than what we had anticipated, and then would we be led to chime in with the poet Burns when he says, "I agree to quarrel with the quack, but I will not quarrel with the quack's quack."

What's on the burning of your school?

Your Latin verses for the school and school?

It is about the school's motto, you know.

What serves your grammar?

You'd better take up Greek and the like.

On the burning of the school.

London, C. W., Nov. 22, 1854.

Dr. J. W. KERRISTON:—Dear Sir,—Permit me to express my heartfelt gratitude to you for the marvellous cure performed on me. I know of no way by which I can sufficiently recompense you for having taken me from the margin of the grave and restored me to perfect health, contrary to my own expectations, those of my friends, and to every appearance contrary to the very laws of nature. I was first taken with common cold, which terminated into what my physicians called Chronic Bronchitis. Very soon they informed me that it had degenerated into the worst kind of Consumption, and left me without a hope of recovery. I expectorated corruption, had a constant pain in my chest, perspired profusely at night,—in short, became so reduced as to be unable to rise from the bed for the period of three months. It was not until we had given up all hopes of recovery that we were persuaded to apply to you, and even then many of my friends were opposed to my taking medicine, but they were overruled by the best of friends, and I commenced, however, taking your Pains Expeller, in connection with your Tonic Bitters and Pills, and after having taken half a dozen bottles of each, I am thankful that I am able to stand to you and the world, that I was reduced to a mere skeleton.

These are facts—appropriate them as you think fit. I would merely suggest that you lay them before the public, that they may know the opportunity of doing likewise.

I am, dear Sir, most respectfully yours,

J. W. KERRISTON.

DR. CHANTLER'S FLUID WIG.

For Baldness, Dandruff, and all Affections of the Scalp.

Its efficacy in promoting the speedy growth of the hair is unparalleled, so that persons who have been bald for years can bear testimony.

One application is generally sufficient to remove Dandruff. A trial of one bottle will convince the purchaser of its intrinsic worth in rendering the hair soft, and imparting to it a rich and beautiful gloss.

Directions.—In case of baldness, apply with brisk friction two or three times per day; to hasten its growth, apply it to the roots of the hair; for dandruff, wash first with Castile soap.

Price.—37½ cents per bottle. Prepared, Wholesale and Retail, at London, O. W.

If force should fail or cease,
Have you ever your locks of hair;
Or if old time has stolen its prey,
And your hair grows scarce and dry;
This grand Imperial Liquid Cream
Will restore them soon again;
Who thus wishes to retain his hair,
Should use this most important hair.

Every toilet table should be provided with a bottle of Dr. Chantler's Fluid Wig. We believe it the only genuine article of the kind in use. For the last three months the sale has been such that we have been unable to supply the demand. The hue and cry is

WIG! WIG! WIG! WIG! WIG! WIG! WIG! WIG! WIG! WIG!

We cannot omit the following, which we copy from French:

We don't like to see ladies put grease on their hair,
And thereby their curls till the curls is flat and;
Then is bald lamentation scarce it is flat;
Or say that we have better actually of hair;
A woman's hair is composed of curls and waves;
We're down on the curls of hair and waves;
And should we attempt to straighten the hair,
Finally we'd tell you—put Wig on your hair!

USEFUL RECIPES.

To Destroy Fleas.

Take one pint of milk and a quart of a pound of raw sugar, and two ounces of ground pepper, simmer them together eight or ten minutes, and place it about in shallow dishes. The flies about it greedily, and in a few moments are suffocated. By this method kitchen, &c., may be kept clear of flies all summer, without the danger attending poisons.

To Make Cakes.

Two pounds double refined sugar, and a pound of fine starch, and a pound of white powder, five eggs, one spoon rose-water, the juice of one lemon. Make the sugar fine and sift it through a hair sieve, rub the starch fine, sift, and the gum arabic also; beat or stir all well together. Take the whites of the eggs, whisk them well, put one spoonful of rose-water, one spoon of the juice of lemon, beat well together, and beat the mixture till you see it, then beat it until the cake is baked; lay it on with a knife, and the cake is done. If it is done not having sufficiently from the bottom of the cake, it will be done.

DR. CHANNING WILSON

It may not be generally known, particularly in the country, that blue vitriol, when mixed with lime, forms a beautiful as well as exceedingly cheap, coloring matter for walls. Take good lime and slake it as usual, one and a half pounds of blue vitriol, dissolve the crystals with boiling water; when dissolved, mix it with the water in the lime and mix the paint as usual. The color should be prepared in a glue-pot, to prevent its being burned or scorched. When well mixed, the first coat must be put on horizontally, or from side to side, and the second coat, vertically, or up and down. The wall will be of a bright blue color, resembling the blue bottles sometimes seen in apothecary shops. By following these directions, women can put on the coloring as smoothly, generally, as men can.

Poison for Bugs

Derivative sulphate and of ammoniac, each half an ounce; whiskey, one pint.

Vincent

Vinegar may be made from cider much quicker and better by diluting it one-fourth with soft water, and exposing a large surface to the air, by filling the cask about two-thirds full and exposing it to a temperature of about 77 degrees.

It may be made much quicker and cheaper by the following : — Molasses and whiskey, each one gallon ; water, thirty gallons ; cider, five gallons ; brewer's yeast, one-half gallon : expose as above.

To Clarify Cider

Mix together one quart each of lime and clean dry ashes, and two quarts of new milk. Pour these into a hogshead of cider just from the press. In ten hours it will be fit to rack.

Indelible Ink (with the Freedmen)

The Ink.—Dissolve one drachm pure nitrate of mercury (solution) of gum arabic, and one grain of lampblack. *The Preparation.*—Put into a separate bottle one ounce of a solution of gum arabic and five grains of soda.

To Dye a Madder Red

For each pound of cloth, mix half a pound of madder in a brass kettle over night, with sufficient warm water to cover the cloth you intend to dye. Next morning put it in two ounces of madder compound for every pound of madder. Wet your cloth and wring it out in clean water, then put it into the dye. Place the kettle over the fire and bring it slowly to a scalding heat, which will take about half an hour; keep it at this heat half an hour, if a light red is wanted, and longer if a dark one, the color depending on the time it remains in the dye. When you have obtained the color, take the cloth immediately to cold water, and wash it in the ordinary way. Always mind your

To Dye a Permanent Blue.

Soil the cloth in a brass bottle for an hour, in a solution containing five parts of alum and three of tartar for every thirty-two parts of cloth. It is then to be thrown into warm water, previously mixed with a greater or less proportion of Oxalic acid, according to the shade the cloth is intended to assume. In this water to pour the hotted oil it has acquired the desired color.

Acanth. Murena.—Tinctura Ferri Sesquichloridi, 1 drachm; apply to the warts with a camel's hair pencil, after having well guarded the surrounding parts with court plaster.

Don't Be Outcast in the North.

Take the scrapings of Diamond rock, a few Gamble berries, a little Salomon, a little Sage and some Gold Thread. Put with these a little alum, some vinegar and honey, simmer this on hot ashes with a little water. Wet the mouth often. It seldom fails of a cure.

To Make Various Kinds of Fruit Pies
