## THE NEWS IN BRIEF

### WHAT HAPPENED DURING THE WEEK IN TERSE FORM

All the News Condensed in as Few Lines as Possible for Reporter Readers

Rain has fallen in West India in time to save the crops.

The touring British journalists have arrived at Winnipeg.

A branch of Molson's bank was opened in Iroquois last week.

Delphis Martin was arrested at Montreal for counterfeiting.

Montreal longshoremen have formed a union, with 3,500 members.

United States capitalists will build a \$500,000 hotel in Winnipeg.

Mr. J. D. King, the well-known shoe manufacturer of Toronto, is dead.

The Ottawa Gas Company has raised the price of gas to \$1.10 per thousand feet.

The steamer Manchester Importer is ashore at White Island, in the St. Lawrence.

Mr. Richard Morton of Omemece was thrown out of his buggy and had his back broken.

Hon. Joseph Royal, a former Lieutenant Governor of the Territories, died at Montreal.

Alex. T. McLean was killed while working on a telephone wire at Fort Rouge, Man.

Contracts have been let for a \$20,000 addition to St. Joseph's hospital, London, Ont.

Colonel Arthur Lynch, M. P., awaiting trial for high treason, is breaking down in prison.

A fuel famine is expected to close the Pittsburg, Pa., mills, and rob 50,000 men of work.

Russia is making a big effort to secure more of the poultry and egg trade with Great Britain.

Kingston Orangemen are preparing for a demonstration there next July to number 5,000 members.

Mrs. John Cameron and Mrs. Edward McDonald were drowned at Spanish Mills, Nipissing.

The White Star steamer Cedric, 21,000 tons, the largest steamer afloat, was launched at Belfast.

The Daily Telegraph says that Baron de Staal, Russian Ambassador to Great Britain is about to retire.

It is reported that a United States syndicate is negotiating for the purchase of Lancashire colliers.

Hon. J. Israel Tarte has accepted an invitation to deliver a political speech in Bonnaville on August 27.

King Edward has devoted the gift of \$80,000 received from the Maharajah of Gwalior to the hospital fund.

Mr. D. M. Davidson's bakery at Port Arthur and several adjoining buildings were destroyed by fire.

The British Columbia Fruit Growers' Association is sending five tons of fruit to the Winnipeg horticultural show.

The Dominion exported \$13,789,113 worth of live stock last year, the bulk of which went to the British market.

A general meeting of the Liberal-Conservative association for Ontario will be held in Toronto about Sept. 9 or 10.

The General Conference of the Methodist church for all of Canada and Newfoundland will meet in Winnipeg, Man., Sept. 4.

Nothing is known in official circles at Ottawa respecting any proposition to get 80,000 Pennsylvania miners in the Northwest.

The tenders for army supplies in South Africa must be in by Oct. 1, and the time is too short to allow Canadian firms to make bids.

A cross-petition was served in the LELIX elections upon Mr. M. M. S. Madole, the defeated Reform candidate, seeking to disqualify him.

Annie Cooper, of Collingwood, has issued a writ against David Ady, plasterer, of the same place, for \$1,000 damages for breach of promise.

A severe storm swept over Ontario. At Florence Mr. Matthew Graham was killed by lightning, and his horses ran into the barn with a burning load of oats, which caused the destruction of the building. Hail did a lot of damage to crops in several sections, and many barns were set on fire by lightning.

Oecil Hart, clerk in the Bank of Hamilton at Indian Head, N. W., was fatally shot by a companion while duck-hunting.

Madame Grenier, wife of Mr. Arthur Grenier, architect, of New York, died at Montreal from an overdose of morphine.

A harvester excursionist named Martin, from Wroxeter, fell off a train near Schreiber. He is in a critical condition at Port Arthur Hospital.

Finley McDonald and Charles McNulty, two boys of Thornburn, N. S., were killed by an explosion in a powder magazine in the Acadia coal mine. A companion of the boys set off a toy cannon in the magazine.

The Brockville Business College, one of the most thorough and reliable institutions of its kind, commences the fall term on Sept. 2nd under most favorable circumstances. The course of instruction has been brought up to date and the teaching staff increased. Mr. Gay having associated with him specialists in their respective departments. No better instruction can be obtained anywhere and the cost is much less than in any other reliable school. There is always a demand for B.B.C. graduates especially in the city of New York. The present management is determined to make the Brockville Business College the leading school of Eastern Ontario. Anyone who desires a thorough business education should write Mr. Gay for the handsome circular of this worthy institution. It will pay in the end to be identified with a school that has a reputation.

## RAIN BROKE UP SOCIAL

### LARGE NUMBER DISAPPOINTED LAST NIGHT

### Many Interesting Incidents - It Was Very Dark - Travelling Rather Dangerous

The annual harvest social at Mr. E. Duffield's lawn, Maple Grove, under the auspices of the Church of England, Addison, was held last night. During the early part of the evening it gave promise of being a great success, but later rain marred the whole affair, resulting in several hundred being sent home badly disappointed.

Much time and pains had been taken by the committee of management to make the event a success. The large attractive lawns were nicely illuminated with numerous Chinese lanterns and huge torches. Many tables, neatly arranged, were well laden with good things for the guests. Cakes, sandwiches, pies, etc., such as only the Addison ladies can make, were there in abundance. Shortly after 7 o'clock the people began to arrive, and by 8.30 about five hundred were on the grounds. Everything was lovely for a while. The waiters were kept busy at the different tables, happy groups were enjoying a social chat, the everpopular promenades had begun, and everybody all smiles, when the scene suddenly changed. It began to rain. So gently did the drops fall at first that few thought it necessary to seek shelter, thinking that it would not amount to much. It was not long, however, until it began to rain good and hard. Then there was a scramble. Parties sought shelter wherever it could be found. Spreading branches of large trees furnished protection for a few minutes, but soon the trees began to leak. Then there was a general rush for the house, drying shed, top buggies near by, while many had to content themselves huddled together four or five under an umbrella, or any old thing which would protect them from the rain. The tables were left to their fate in the hurried flight. Distressing scenes were witnessed. Young people who had driven many miles and were longing for a good supper, sighed pitifully while witnessing the destruction of artistically iced cakes and other nice things. The sponge cakes alone seemed to stand the test. Many handsome ladies' beautifully costumed were unprepared for rain. Escorts protected them as well as they could, but sad countenances told their own story of a pretty dress probably ruined and nice patent leathers drenched. Apparently the only happy party in the crowd was a quartette out of sight seated on a pile of wood in a dark corner of the wood, who sang "Wait till the clouds roll by," "We won't go home till morning," and other appropriate songs. The program prepared was not rendered. As the Chinese lanterns went out one by one, making the scene more and more dreary, and it became evident that was all up with the social hurried preparations were made for the journey home. The leave taking was certainly very unceremonious, and in the rush to get the vehicles from the various dark corners there was not a little confusion, owing to the prevailing lantern famine. The people were constantly running into each other, nervous young men from town had difficulty in finding their vehicles, umbrella wrecks were numerous, a few excited gents occasionally saw stars by running against the trees, but the saddest incident of all, so it is whispered, in the rush a country dudo

## TRIP TO THE OUTLET.

### Athens' Leading Business Men Enjoy an Outing on Charleston Lake.

A number of the leading business men in Athens accepted the invitation of Mr. W. G. Parish and enjoyed a trip to the Outlet on his yacht on Monday afternoon. The weather was simply perfect for an outing of this kind, and the party report a very enjoyable time. About 3 o'clock in the afternoon they left the Charleston wharf, taking a circuitous route in order that the beauty of the many picturesque islands might be seen to advantage. Arriving at the Outlet some time was spent examining the locks and looking at the interesting curios at that point. They returned by another route, passing scenes which won the admiration of all. Upon their return to Mr. Parish's pretty cottage a bountiful spread, kindly prepared by Mrs. Parish, awaited them. This part of the program was much enjoyed. After the wants of the inner man had been nicely satisfied the fine cigars presented were very acceptable. Boarding the yacht again in the evening the party visited the Saunders, Hanson and Judson islands before returning to Charleston. All expressed themselves as being delighted with the outing, and hoped it was the forerunner of others. They appreciated the kindness of Mr. and Mrs. Parish.

## KINDNESS APPRECIATED.

### Editor Athens Reporter:

DEAR SIR,—Permit me, through the columns of your esteemed paper, to thank the people of Athens who, by their kindness and thoughtfulness did much to relieve my suffering resulting from the severe accident of Aug. 2nd. Though a comparative stranger to most of them their unfeeling kindness will always live as a bright spot in my memory.

Hoping to regain my strength sufficiently to resume my work on the church before its completion, I am,  
Yours very truly,  
S. R. TABER, JR.

## VARICOCELE & STRICTURE

No other disease is so prevalent among men as Varicocele. As it interferes with the nutrition of the sexual organs it produces emasculation, loss of semen through the urine, decay of the organs, pains in the loins, aching in the back, nervousness, despondency, lassitude, palpitation of the heart, constipation, and a combination of these results in complete Loss of Manhood. Thousands of young and middle-aged men are troubled with this disease. If you have reason to believe you are afflicted with it, don't neglect it. It will ruin you. Don't let doctors exploit you by cutting, stretching or tearing it. Our New Method Treatment dissolves the stricture tissue hence it disappears and can never return. We cure Varicocele and Stricture without operation or loss of time. The treatment may be taken at home privately. Send for our Free Illustrated Book on Varicocele, Stricture and Gleet. We guarantee to cure or No Pay.

## Kidneys & Bladder

All sexual complaints affect these organs, hence the kidneys are a great source of disease. Have you aching or weakness over the small of the back, tendency to urinate frequently, deposit in urine, coldness of hands or feet, a drowsy feeling in the morning. Don't neglect your kidneys. Our New Method Treatment is guaranteed to cure any disease of these organs or no pay.

No Names Used Without Written Consent.

O. W. Rowe, of Jackson, Mich., says:—I had varicocele in the secondary stage and two strictures of 8 years standing. I was operated on twice, undergoing great suffering, but only got temporary relief. I was finally advised to try the New Method Treatment of Drs. K. & K. The enlarged veins disappeared in six weeks, the stricture tissue was removed in eight weeks and my sexual energy and vitality returned to me as a man in every respect. I recommend you doctors with my whole heart.

CURES GUARANTEED. NO CURE NO PAY.

Before Treatment. After Treatment.

We treat and cure Nervous Debility, Lost Manhood, Varicocele, Stricture, Syphilis, Gleet, Weak Parts, Gonorrhoea and Unnatural Discharges. Consultation Free. Books Free. Write for Question List for Home Treatment.

# The Kingdom of the Fair Sex

(By Augusta Prescott.)

Skirts are to be a great deal longer than ever and you must not cut off an inch. Instead of cutting off you must add and you can begin by putting a flounce on your longest skirt to make it long enough.

Skirts will be so long that it will be difficult to walk in them and they will require practice preliminary to a promenade.

Dinner and evening gowns are particularly to be mentioned in this regard, for they actually train in front, while in the back they approach a yard in length. The court train is not "in," but there is a close approach to it in the gowns that are making their appearance.

For the house those trains can be managed, for it is possible with high heels and practice to get around in them. But for the street they are attended with a great deal of difficulty, and the woman who walks will have a season of worn-out bling and backache ahead of her.

If the skirt is held up properly it will not be so very hard on the woman who wears it, for the fashionable lift is very high and the skirt can be raised eight to ten inches and held in both hands. This lift requires practice also, but once learned it is very pretty. The drop skirt, which is prettily trimmed, falls below it and looks like a dress skirt.

Miss Patti, whose recent gowns have been admired in Paris, and London, wears a dinner dress with deep flounces on the bottom and with each flounce bordered with thick double ruchings of mousseline. A similar ruche is at the head of the rounce and is put on in curves.

**Pretty Street Gown.**  
For the street madame has a gown in blue, which is a dark color, something like ultramarine. It is lined with coral red taffeta and the feet is flounced with sea blue, piped with coral red. Madame's boa repeats these colors, blue and coral, in the shape of pretty little ruffles set in the middle of box pleatings of white mousseline.

Her hat is a wide autumn hat in white, with a crown of taffeta and trimmed with autumn flowers and blue, with a dash of smuch.

It is said that the fashionable world abroad was compelled to abandon its season of "ly," and both sides of the water were affected by the event. Black and dark grey are the colors of the late summer, and black lace has taken a great impetus from popular taste.

In their general outlines gowns remain the same, but trimmings are undergoing changes and even the skirts are affected by them, though skirts are usually not to change.

The straight back effect is one for which all are striving, and to obtain it trimmings are worn upon the front, not upon the back.

The severe unbroken line, coming from the belt right out to the end of the train, is called the season's line of beauty, and you must seek it, or you would have your new gown a destined success.

**Princess Skirt Not Becoming.**  
The princess skirt is much worn, but is unfortunately not becoming to all. This skirt, as you know, is the one that, instead of being in the orthodox place, has no belt at all, but is continued upward and downward and is topped abruptly just about at the bust line, perhaps a little below.

It is all very well to look at a slender woman in a princess, but it is the juggler's art to make a fat woman, absolutely destroying her every line of grace.

**Is It Brown or Green?**  
Is brown to be the color of fall or will it be green? Just as you have settled upon one or the other you see some a hurried before you and a new gown made of sumac colored material over a deep red foundation is shown you.

Of course as a fall gown one might say a great deal for the new material is very brilliant and almost satiny in lustre, but novelties are promised in this line.

The autumn hat will have a made tendency. It will be constructed of cloth or silk or will have its crown at least covered with a dress material. The straw hat has partially disappeared under its weight of flowers and lace, and under its covering of silk and feathers, and the felt hat has fair to follow suit. In the autumn you will hardly see a hat of felt, for the prevailing style will be a "made" hat, covered with velvet and having the brim in some manner covered with dress goods.

The exception to this will be the white felt hat, which will be made up in the sailor styles, square-crowned and worn with aproning sides.

The fancy for making hats, like gowns, so that they can be worn every month in the year is one that is borrowed from England, but once having tried it, you will become an Angloman to this extent at least. Your hats will be good every month in the year. The advantage of this fashion can be seen without discussion, for to have a dozen hats that can be put on winter or summer gives one a wide range of choice.

The white felt hat, trimmed with feathers or with ribbon or with a Roman scarf, is one of these. The little felted toque is another; the wide hat of velvet and ostrich plumes is a third, and the hat that is made of alternate layers of straw and chiffon—a fold of each—is another of these all-the-year-round hats.

**1840 Styles.**  
In the street the picture gowns run more toward the 1840 styles, which are rather long and very much trimmed. There is no change of a return to the hoop, but the skirts are certainly very profusely decorated, and one thinks of the bouffant styles, for they are full, and the trimming shows a tendency to rise upward towards the waist line. It is not altogether confined to the flounce, as it once was.

## The Latest in Fashion News—Beauty and How to Attain and Retain It—Kitchen Philosophy—Gossip and Humor

The long coat with sweeping tails, the wide lace collar, and outstanding revers, the flaring deep cuffs, with the puffed sleeves below them, and these things look like the pictures in the picture book, yet they are made conventional by the application of modern dressmaking methods to them.

**Silks and laces.**  
Silks and laces travel together by a natural affinity; one shows off the other. If you want to bring out your lace to advantage, put silk back of it, and if you want to display your best piece of silk lay a little lace over it. It is paradoxically true that one is seen better through the other, and as they partly conceal each other they at the same time show off the good points to the greatest advantage.

The laces that will be worn this fall are Bruges, flat and Irish lace. The most crocheted lace which is used for whole waists and for transparent yokes. It is heavy and very durable. Imitation point d'Alençon and Flemish lace will be worn a great deal, and Valenciennes will ever be in vogue, although Val has gone out a little. As an edging, though, it is second to nothing, and the little Valenciennes lace ruffles occupy a place in dress which no other lace has ever been able to usurp.

**Buttoning in the Back.**  
Popularity is an excellent thing to cultivate in these days of waists that button down the back, for a woman who does not keep her maid must depend upon her friends, but there is the consoling thought that there are always kind-hearted people in the world, and no woman need go out with her back unbuttoned, though many do.

A fashion that grows is the one that calls for a touch of gold, in jewelry or in tinsel.

It is coming to a pass when we must have a little gold on everything. If you cannot get it in any other way you must take a little gold thread and make French knots here and there. If you will take the time you can get very good gold results by chasing a thread of gold all over your gown so as to make a very intricate scroll.

If you do this you can work ahead with apparent disregard of a pattern, but there must be method in your madness or the scroll will look too irregular.

A modiste who makes a specialty of scrolling cloth gowns with gold and who employs a number of apprentices on the work says that her only rule is that the threads shall be an equal distance apart. If this rule is observed the scroll will look regular and you will meander thither and yon, without fear of spoiling your thread and your gown.

**The Right Kind of Wife.**  
Wanted—A wife who can handle a broom.

To brush down the cobwebs and sweep up the room;  
To make decent bread that a fellow can eat—  
Not the horrible compound you find in the market;  
Who knows how to broil, to fry and to roast—  
Make a good cup of tea and a platter of toast;  
And make her own garments—an item which is

So horridly expensive, as everyone knows;  
A common-sense creature, and still with a mind  
To teach and to guide—exalted, refined;  
A sort of an angel and household combined.—Chicago News.

**PRESERVE WEDDING GOWN.**  
Most Women Desire Some Memento of the Event.

A woman's wedding gown is seldom worn, except on anniversary occasions after the day upon which the nuptials are celebrated. Most women regard this garment as especially sacred and take extraordinary means to preserve it in all its pristine purity. The wedding gown box is a recent fashion for the well-to-do bride to adopt, and it bids fair to have quite a vogue. That every bride possessed of any sentiment wishes to keep her wedding gown in a state of preservation is a foregone conclusion, and this elegant receptacle is admirably suited to the purpose for which it was designed.

It is made of light wood, enameled white and having the bride's initials in silver letters on the outside. A lining of tufted white satin is revealed on opening the box, and locks of silver and white leather straps fasten it. A photograph of the wedding gown is often taken by the modiste before sending it home and making a collection of the photographs of wedding gowns or any other distinctive costumes is one of the present fads, the idea being to preserve the pictures as mementoes for future generations and also, as illustrations of present day fashions.

**PROPER CARE OF THE HAIR.**  
The coolest summer shampoo is made with water that has stood overnight, and is just the temperature of the room.

This is also an excellent method of taking a tepid body bath. Draw the water the night before, and in the morning it will be just right for the body. Dip out a gallon and set it aside for the shampoo.

Take this water, and into it drop three drops of ammonia. Three drops to a gallon of water will not be noticed, yet it will act upon the hair to the extent of cutting the

grease and will make it easy to wash.

Now take a bran bag that holds a tablespoon of bran and throw it into the water. Churn it until it is a milky-looking mass. Set this aside, for it is the shampoo water.

Take of pure, clear soap about a quart of a cake shaved fine. Make a lather of it, and into this lather throw a little powdered orris root. This is the washing mixture.

Do not rub the cake of soap upon the hair, for it will be impossible to remove the soap from the separate strands. Once rubbed on, and the result will be a sticky head of hair for weeks.

When the head has been soaped until it is white with lather and rubbed well, use the bran water for rinsing. Rinse again and again, using a little spermaceti with rubber pipe which can be attached to the faucet. In the absence of this a small watering pot will do.

You will need someone to help you for the rinsing. Water should be heated and poured upon the head, first hot and then cold, and the assistant should not stop until she has used up her gallon of water and more.

The little gas stoves and appliances for putting upon the gas are very useful in a case like this, for they heat the water and keep it at the right temperature, and in shampooing the hair a great deal depends upon this.

Finally in the ideal shampoo the hair should be rinsed with rain water. If you cannot get this take water out of the hot water faucet, add a little and soften it with a teaspoonful of borax to a quart of water.

Use this with the spray and get the hair as clean as possible until it feels light and soft and ready for the next step. The tendency to fly can be checked by rubbing on the hairbrush a little glycerine, cut with rose water, and brushing the hair quickly with it. Do not molest the brush, but pour a little of the mixture in the palm of the hand, and run the brush over your palm. Just touch the hair lightly with this.

## FROM BOUDOIR TO BOULEVARD.

**The Art of Robing and Disrobing.**  
When you see a radiantly lovely woman, beautifully gowned and with every hair and line of her frock carefully and artistically arranged, did it ever occur to you to wonder how long it required to frame the charming picture? Your guess would be far above the actual length of time, and you would wish you if you should compare the number of minutes now consumed in the average gowning process with the hours at one time considered necessary to secure the same results. And yet these hours are now being brought about such an immense saving of their own time, as well as that of others, are not receiving all the credit and praise due them for this admirable improvement.

As a matter of fact, the different stages of robing have been so well arranged and timed, so dovetailed as it were, that in a surprisingly few minutes the fetching negligé may be shed and elaborate street raiment assumed.

Duo in part to the limited time allowed the woman of fashion for keeping her many social engagements, but, has become necessary for her to manage the artistic touches to her plumage in a few minutes as possible.

Where a few years ago it was quite the ordinary thing to spend two hours or more in dressing, one hour, or even less, is now considered a vast amount in which to accomplish the same results.

No woman is to be censured for worthy efforts devoted to personal beautifying—but at the same time it's rather foolish and, worse than that, unnecessarily prolong the operation.

Do you ever consider how quickly some of the women of the stage remove the badge of their profession and emerge from their tiny hinged-up dressing-rooms as spick and span, well groomed and lovely to look upon, as though they had scarcely given hours to the arrangement of hair and frock?

After all, dressing is an art, and they seem to have learned it along with their early lessons in making up.

**Rapid Robing and Disrobing.**  
Many actresses are social favorites, and their rapid methods of robing and disrobing, having been carried beyond the stage door, have set an excellent example to those inclined to dawdle.

The consequence is women have found it absolutely necessary to spend such a lot of time in their dressing rooms, and the minutes, most hours, one might say, may be put to much better advantage.

Take a French woman, for example. She dresses herself as completely and deftly as any one, though she, too, may have a maid the method of procedure is exactly the same.

As for the undergarments, few women wear theirs in the same fashion. A stout person will endeavor to get as much under her stays as possible, and in the end be rather uncomfortable in body on account of rigidity and wrinkles, though her mind is happy in the knowledge that

she has made her hips at least two inches smaller by this device.

Of course, the silken singlet is drawn on first, or where this is dispensed with a sheer chemise may be assumed.

**Smoothly Around the Waist.**  
Then the pretty little drawers are brought up smoothly around the waist and tied so that there are no knots to press against the flesh.

Short petticoats have lost their charm for the feminine heart since dainty little ruffled chemises have become fashionable, so she does not need to bother herself with them.

To put on her stockings and shoes requires only a few minutes, and she is ready for the stays. These, of course, are let out as far as possible, for no woman thinks of putting them on without adjusting them each time.

After a twinkling the ribbon hose supporters are slipped into place, a long, loose negligé is donned, and then mildly is ready for the artistic touches that make or mar her appearance.

This is where time is needed and is spent with satisfactory results, but by no means should the oilfire proclaim the minutes taken in the accomplishment. Carelessness and an unstudied effort to get ready as quickly as possible, while frowns are to be abhorred.

Never less than ten minutes should be devoted to the hair, for it is woman's greatest charm, and with each curl and wave arranged, the next consideration is the face. A well-groomed woman no more thinks of neglecting to brush her eyebrows than she would of forgetting to care for her teeth.

After these features are attended to a systematic woman is ready to do the hair, and if another does not attempt the waist until after her hat is properly adjusted, and upon this latter adjust she takes more time than it is generally supposed to require.

The effect must be carefully studied from all points and not until each long pin is thrust in securely and comfortably can the robing process continue.

The waist follows, and a great deal of attention is given to the details of collar and belt.

It is curious, but a fact; nevertheless, that no woman before leaving her pretty reflection in the long mirror neglects that little parting dab at her neck with her powder puff.

It's as much a part of the ritual as anything else, but the ruling passion is strong in the death of youth which the dowager enjoys.

The fact was strongly shown by Du Barry, who insisted upon applying her powder puff with her and dabbing her nose as she made her sad journey to the guillotine.

**Sunday School.**  
INTERNATIONAL LESSON NO. VII  
AUGUST 24, 1902.

Report of the Spies.—Num 13: 1-3; and 18: 25 to 31.

Commentary.—Explanatory. "Everything was now ready for taking possession of Canaan, provided the people had the necessary faith and courage. Accordingly, Moses commanded them in the name of Jehovah (Deut. 1: 20, 21) to go up and take possession of the land. They only needed to trust in God and go forward, and in less than two years from leaving Egypt the land would have been theirs. The God who had delivered them with a mighty hand, who had made a path through the sea, who had raised them from heathen and brought them from a rock, and who had spoken from Sinai and entered into covenant with them, and was leading them with His visible presence—this God they were to take possession of the land of promise. They should have trusted and obeyed."

2. Send thou men.—The people were afraid to go up and search out the land. Deut. 1: 22. Although it would have been better for them to have had faith in God and to have at once entered upon their promised possessions, yet in order to satisfy the people the Lord ordered Moses to send the spies.

4-24.—In verses 4-15 we have the names of the spies. In verses 17-20 Moses gives them special directions. 25. Returned.—after forty days—Forty days were sufficient for a journey of 250 miles and the return. The spies returned six Sabbath days, a travel 500 miles, going at the rate of less than fifteen miles a day. It is not probable that they went in a body, but singly or by twos.—Steele.

26. Floweth with milk and honey.—This is a poetical description of a country rich in pasturage and produce. Thus far the parts of the spies agree. They all commend the richness and fruitfulness of the soil.

28. Nevertheless.—The report was given publicly and it was arraigned and arranged to begin with commendations, in order that their subsequent slander might receive credit.—J. F. & B.

This word introduces the godless majority report; there is in it no reference to Jehovah. It is an infidel document.—Steele. Strong—Large and fortified. The Israelites had no means of warfare by which they could be taken. Children of Anak—Loug-necked, famous giants, descendants from Arba, founder of the city of Hebron. The spies were terrified at sight of them.

29. The Amal'kites, etc.—These people had already attacked the Israelites once. Ex. xvii. 8-16. The Hittites were a strong, warlike people. The Jebusites held the region about Jerusalem. The Amorites were mountaineers.

30. Caleb.—The spy from the tribe of Judah. He began the minority report with an unwavering trust in God. Joshua also joined with him. xiv. 6, 30. Stilled the people.—A bitter word of despair was going up from the vast throng of people. Let us give up at once—Genuine faith grasps a present God and an instantaneous

salvation. There is no better cure for fear than action.

31. We be not able.—This had not been asserted before. The ten spies are increasing in their opposition.

32. Evil report.—enteth up—How unbelief grows. At first it was only a suggestion (v. 23, 25), then it became an assertion (v. 31), then it assumed the form of an "evil report."

33. Sons of Anak—Anak literally signified long necked. The sons of Anak were race of giants in strength. It seems to be a fact that in primitive times there were men of great stature. As grasshoppers, etc.—"The fears of the unbelieving spies magnified their foes."

1. All the congregation.—There were a few noble exceptions, however. Wept that night—These loud wailings, resounding by night from tent to tent and from tribe to tribe, spread a contagious despondency through the whole camp.

2. Better.—to return.—They murmured against Moses and Aaron and wished to return to their former life of servitude. "In their dread of the evil before them they overlooked the greater evil behind them."

4. Make a captain.—They repudiated Moses and Aaron and Jehovah according to Numbers 17 they actually appointed a captain to send them back to the tadmasters' lash in Egypt.

TEACHINGS.—We should be very careful about following the advice of those who do not have faith in God. It is possible for God's people to enter the Canaan of perfect soul rest at once.

PRACTICAL SURVEY.  
The incident of sending out the spies to view the promised land, although the disastrous outcome was known to God, is only another striking illustration of the kindly dealings of our merciful heavenly Father with his wayward and ungrateful children.

Explicit instructions were given the spies as to the facts they were to learn, namely, "See the land, what it is, and the people that dwelleth therein, whether they be strong or weak, few or many; and what the land is that they land in, whether it be good or bad."

The report was not unanimous in all particulars. There were, in fact, two reports: a majority report and a minority report.

The majority report, as might naturally be expected, was accepted by the people. With their eyes closed to all that God had done for them in the recent past and with their hearts full of unbelief, no wonder "the people wept that night." The more they considered the matter the worse did their condition appear.

God's fearful punishment upon them, although He declared "All the earth shall be filled with the glory of the Lord," gives us an idea of how hateful to Him is the sin of unbelief. "All from twenty years old and upward," except Caleb and Joshua, perished in the wilderness.

Three practical lessons God helps those who help themselves. He brought his people out of Egypt with a strong hand, yet everything depended on the acquiescing in the divine leading. They were ordered to "go forward" before the way was open through the Red Sea. The priests' feet were wet in Jehovah's waters rolled back, but they must "possess it." God fought their battles, but they must set the battle in array. The Christian who expects a divine gift without effort will always be disappointed.

## KITCHEN PHILOSOPHY

If uncooked mutton fat is soaked in cold water twenty-four hours, then cooked in water, putting a scant quarter teaspoonful soda to a quart of water, it loses its strong taste and can be used for pastry. Do the same with mutton drippings. All bacon and ham fat should be clarified and kept to fry eggs in.

It is claimed that lavender and alcohol in a proportion of 10 cents' worth of oil of lavender to 15 cents' worth of alcohol, will drive away flies. One or more sponges should be wet with the mixture and placed in the room, and a refreshing odor will run in long after the liquid has evaporated.

The following polish improves leather chairs wonderfully: Boil half a pint of linseed oil, let stand till nearly cold and then stir in half a pint of vinegar. Stir till thoroughly mixed and bottle for use. When needed shake the bottle well, pour a very little on a soft brush, rub thoroughly into the leather, turning the brush as it gets dirty, and rub with soft dusters till the polish of the leather is restored.

Panade, or "poor man's dish," is a French device for using stale rolls to advantage. Cut three or four hard rolls into small pieces, put them into a kettle, pour over them a quart of boiling water, and season with pepper, salt, butter and a little garlic. When the rolls are thoroughly softened the panade is ready to serve.

"Since we have adopted the case-rolle," comments a housekeeper, "stews previously endured but always detected by the family have disappeared from the table. Even Irish stew becomes liquefied if cooked in this covered earthen dish. All flavors are held and absorbed by the meat and vegetables, so that a most savory whole is the result. The second day's serving of a roast of lamb, the meat sliced and cooked in the case-rolle with rice or macaroni is preferred to the first cooking by every member of the family.—Brooklyn Eagle.

"Am I the only girl you ever loved?" she asked, doubtfully.

"Am I the only man you ever encouraged?" he inquired.

They looked long and soulfully into each other's eyes, and out of this gaze there seemed to come a tacit understanding that it would be just as well to drop the subject.—Chicago Post.

## THE MARKETS

**Toronto Farmers' Market.**  
Aug. 25.—There were only 300 bushels of grain received on the street market this morning. Prices were steady for wheat and firmer for oats.

Wheat—Was steady, one load of new goose selling at 65 to 68 1-2c per bushel.

Oats—Were firmer, one load of new selling for 54c per bushel.

Hay—Was steady, one load of old selling at \$18, and ten loads of new at \$10 to \$13 per ton.

Straw—Was steady, two loads of silage at \$11 per ton.

Beef—Was steady, hindquarters selling at 7 to 8c per lb.

Wheat, white, new, 70 to 75c; red, 72 1-2 to 73c; goose, 71 1-2c; good, new, 65 to 68 1-2c; oats, old, 46 to 46 1-2c; oats, new, 54c; rye, 43c; rye, timothy, old, \$17 to \$18; new, \$10 to \$13; straw, \$11; butter pound rolls, 16 to 18c; crocks, 14 to 16c; eggs, new laid, 14 to 16c.

**Toronto Fruit Markets.**  
Receipts on the local market today were large and prices were fairly well maintained. Apples, 15 to 20c basket. Bananas, per bunch, \$1.50 to \$2. Lemons, \$2.25 to \$3.50 per box. Oranges, \$4 to \$4.50 per box. California peaches, \$1 to \$1.50 per basket. 20 to 30c. Pears, per basket, 20 to 25c. Beans, per basket, 10c. Thimbleberries, 7 to 8c per box. Canadian peaches, 20 to 30c per basket. Buckleberries, per basket, \$1 to \$1.10. Muskmelons, 10 to 50c per basket. Pears, 30 to 50c per basket. Potatoes, new, Canadian, 40c per bushel. Green corn, 9 to 10c per dozen. Buckleberries, per case, \$1.70 to \$1.90.

**Leading Wheat Markets.**  
Following are the closing quotations at important wheat centres to-day:

New York	Cash	Dec.
Chicago	.....	74 5-8
Chicago	.....	72 3-4
Toledo	.....	72 3-4 73
Duluth, No. 1 Nor.	.....	72 1-2

**Toronto Live Stock Market.**  
Export cattle, per cwt. \$5 30 to \$6 10  
do medium..... 5 50 to 6 00  
do cows..... 5 50 to 6 00  
Butcher cattle, per head..... 5 00 to 6 00  
Butcher cattle, fair..... 3 75 to 4 50  
do medium..... 3 50 to 4 25  
do bulls..... 3 50 to 4 25  
Feeders, short-keep..... 4 75 to 5 25  
do medium..... 4 50 to 5 00  
Stockers, 40 to 80 lbs..... 3 00 to 3 50  
Hogs, per cwt..... 7 25 to 8 00  
Milk cows..... 4 00 to 5 00  
Sheep, ewe, per cwt..... 3 50 to 4 00  
do butch..... 3 50 to 4 00  
Sheep, butcher, each..... 3 00 to 3 50  
Lamb, each..... 3 75 to 4 50

Hog, light, per cwt..... 7 12 to 8 00  
Hog, 40 lb per cwt..... 7 12 to 8 00

**British Live Stock Markets.**  
London, Aug. 23.—Cattle are quoted to-day at from 12 to 13c per lb, dressed weight; refrigerator beef is 11 to 12c per lb.

**Cheese Markets.**  
Covansville, Que., Aug. 23.—At the weekly meeting of the Eastern Townships Dairyman's Exchange here today 33 factories offered 1,403 boxes cheese; 17 creameries offered 1,900 boxes butter. Cheese, 9 1-4 to 9 1-2c; butter, 15 3-4 to 16c.

Bellefleur, Aug. 23.—At the meeting of the Cheese Board held here today there were offered 2,375 white and 330 colored. Following were the sales: Magrath 930, Hodgson 535, Watkin 585, Alexander 475; all sold at 9 1-2c.

Watertown, N. Y., Aug. 23.—On the cheese board today 7,000 boxes of cheese sold at 9 1-2c for large and 9 5-8 to 9 7-8c for small.

Corwall, Aug. 23.—At the Cornwall cheese board today 1,908 cheese were boarded, 1,143 white, 808 colored and 47 United States. All sold but 123 boxes. The bulk of the colored brought 9 1-2c; the balance sold at 9 7-8c; about half of the white sold for 9 3-4c and the rest for 9 7-8c; United States at 9 1-4c.

**Bradstreet's on Trade.**  
Wholesale trade at Montreal has been very fair this week for the August holiday season. Values of staple goods are firm. In Toronto this week wholesale business has been fair for the season, but the general markets have been quiet, and they always are in August. At Quebec rates are much about the same as the preceding week. In the country inquiries for reasonable goods have been better. Trade at Hamilton has been moderately good for this season. The tone of the trade here, as reported to Bradstreet's, is buoyant, and a good fall business in most departments is looked for. Payments are firm. In London this week there has been the usual midsummer dullness experienced in some departments of trade. There has been some improvement in trade conditions at Winnipeg, as a result of the better weather. There is some improvement in trade at Vancouver, Victoria and other Pacific Coast points. Payments are improving. Mining on the coast is reviving. Ontario wholesale trade circles, as reported to Bradstreet's, are fairly active.

**August Failures.**  
R. G. Dun & Co. report liabilities of commercial failures thus far reported for August \$4,584,059, against \$6,050,473 a year ago. Failures this week in the United States are 207 against 196 last week, 196 the preceding week last year, and in Canada 30 against 21 last week, 14 the preceding week and 35 last year. Of failures this week in the United States 77 were in the east, 65 south, 46 west and 19 in the Pacific States. A 55 report liabilities of \$5,000 or more.

The sign painter is one man who can always make a name for himself. No, Maude, dear; lumber vessels are not the only ones that carry log-books.

**28th YEAR.**  
OPENS SEPT. 2nd, 1902  
A thorough course, efficient staff, special rates.  
REV. A. S. DEMILL,  
President, St. Catharines, Ont.  
Mention this Paper.

ATHENS, AUGUST 27, 1902.

THE HONEY CROP

There is to be a honey famine this year, and also the land is to be simply flowing with that delicious product of the busy bee.

PRODUCE OF THE FARM.

Canada's export of wheat, according to unrevised figures, amounted for the last fiscal year ending June 30, to 36,446,537 bushels, valued at \$26,410,101.

neighbors are awakening to an appreciation of the Canadian potato which appears to find a ready market in the U.S. and Cuba.

WHAT EDITORS SAY.

"Strike for your altar and your fire," they said on that historic day.

Canada is showing wonderful enterprise in self development.—Boston Herald.

Gen. Buller is worth £2,000,000. He is a soldier of fortune.—Ottawa Citizen.

Anything that keeps young people from marrying is bad for business if not for morals.—St. Thomas Times.

Why is it that a girl who would rather dance than eat generally marries a man who can't dance at all.—Montreal Star.

The present generation of Boers have had all the fighting they want and the next will have forgotten nearly all about it.—Toronto Globe.

If this coal strike keeps on, it looks as if people will have to keep warm this winter playing ping pong.—Montreal Star.

By walking from California to Toronto a newspaper circulation agent has cured himself of consumption.

Hamilton is becoming more and more and more the chief manufacturing city of Canada, and Ottawa is becoming more and more the chief small-pox centre.—Hamilton Herald.

Canadian imports in July were nearly the same in amount as in July, 1901, but Canadian exports—our sales abroad—were two and a half million dollars greater.

Two weeks ago a painter on a scaffold in Trenton, N. J., fell asleep and he's asleep yet.

ADDISON

Mr. Harold Coleman spent Sunday last visiting friends at Mott's Mills. Probably he intends milling.

DELTA

Miss Estella Loverin, of Brockville, is visiting friends in this vicinity.

Mr. Charles Coleman spent Sunday last visiting friends at Mott's Mills. Probably he intends milling.

FALL FAIR DATES.

Ottawa, August 22 to 30. Kingston, August 25 to 29. Morrisburg, August 27 to 29. Sherbrooke, August 30 to Sept. 6.

CHARLESTON LAKE

W. J. Banta is again enjoying himself at his island home here.

Mr. E. A. Stevens and wife, of Toronto, after spending the holidays with his brother, Alex. Stevens, has returned home.

FRONT OF YONGE.

Mr. William Fortune suffered a great loss on Wednesday morning in the destruction of his new barn by lightning.

Mr. Frank Andrews is champion bicyclist of Millortown.

It was Peter Pinder who landed the \$2 lb fish and not John Lakens as first reported.

Mr. S. Janquin, wife and daughter, of Warren, Pennsylvania, are making an extended visit at the residence of Mr. W. T. Dickey, of Caintown.

Mr. A. Root, of Lynn, paid Caintown a visit last week. He is moving his machinery to Greenbush, where he expects to turn out large quantities of dry and liquid measures.

A young man in this township buys broncos and trades them for large ones. People want a change.

Mr. W. Graham and wife are visitors at the home of Mrs. Maryanne Hayes, Summer Side.

Mr. S. Janquin and wife have gone to Lynn, at which village they will spend a week hunting and fishing.

SEELY'S BAY

The social given by the Ladies' Aid of the Methodist church last Friday evening was well attended and a pleasant time was spent by the large number present.

Mr. Henry Whaley has returned home after visiting his daughter in Chantry.

Many from Soperton attended the Trinity church lawn social at Charleston and report it a success.

Misses Ethel DeWolfe, Jennie Cuglan and sister, Ida, spent Saturday and Sunday the guests of Miss Edith Whaley.

Some of the young people spent Sunday on Delta lake.

Miss Estella Loverin, of Brockville, is visiting friends in this vicinity.

Mr. Harold Coleman spent Sunday last visiting friends at Mott's Mills. Probably he intends milling.

Mrs. J. Murphy has a young daughter.

Miss Hazel Washburn was successful in her form 1 exam.

Mr. Wm. Findley has returned home after helping his brother Richard, at Charleston.

Mr. T. Thompson visited his sister, Mrs. W. H. Irwin, on Saturday.

Mrs. Lawson, Mr. Vernon and Miss Edith Lawson and Mr. C. Pritchard are camping at Union Park.

Mrs. G. E. Scott has returned from their visit at Alexandria Bay.

Mr. Charles Lewis and family are visiting with Mrs. Fields, his sister, and his brother, Prof. Lewis.

Mrs. Wilbert Mallory, of Mallorytown is visiting her brother, Mr. R. H. Field.

Mr. H. Stewart has been trimming up his shade trees and much improved the appearance of his premises.

Mr. and Mrs. Booth have returned to their home in Ottawa.

Mr. and Mrs. Vincent McDonald of Mallorytown have been visiting their daughter, Mrs. Vincent Booth.

both socially and financially. All present claim it to have been a very enjoyable evening.

Mr. E. A. Stevens and wife, of Toronto, after spending the holidays with his brother, Alex. Stevens, has returned home.

Mr. William Fortune suffered a great loss on Wednesday morning in the destruction of his new barn by lightning.

Mr. Frank Andrews is champion bicyclist of Millortown.

It was Peter Pinder who landed the \$2 lb fish and not John Lakens as first reported.

## LOOKING OUT TO SEE.

Most people are looking out to see everything that is in sight and comment upon it. If it's good, there is approbation; if bad, condemnation.

Our Summer Suits are made to withstand criticism. Because they're made right, of right material, it is commendation always.

They have a dressy appearance, fit perfectly, and wear with satisfaction.

Your money will get you more style, comfort, and durability in Hats, Caps, Colored Shirts, Underwear, Shirt Waists, Bicycle Hose, Fancy Socks, Bathing Suits, Sweaters, Belts, Collars and Ties, here than elsewhere.

### M. SILVER,

Main St., Athens.

## Perfection Cement Roofing THE TWO GREAT RAIN EXCLUDERS

THESE GOODS are rapidly winning their way in popular favor because of their cheapness, durability, and general excellence. Does your house or any of your outbuildings require repairing or a new roof? Are you going to erect a new building? If so, you should send for circular describing these goods or apply to

The McLaughlin Asphalt Roof Paint Company.

BROCKVILLE and ATHENS.

The practical side of science is reflected in

A monthly publication of inestimable value to the student of every day scientific problems, the mechanic, the industrial expert, the manufacturer, the inventor—in fact, to every wide-awake person who hopes to better his condition by using his brains. The inventor, especially, will find in *The Patent Record* a guide, philosopher and friend. Nothing of importance escapes the vigilant eyes of its corps of expert editors. Everything is presented in clean, concise fashion, so that the busiest may take time to read and comprehend. The scientific and industrial progress of the age is accurately mirrored in the columns of *The Patent Record*, and it is the only publication in the country that prints the official news of the U. S. Patent Office and the latest developments in the field of invention without fear or favor.

SUBSCRIPTION PRICE ONE DOLLAR PER YEAR.

THE PATENT RECORD, Baltimore, Md.

### HERE AND THERE

#### PICKINGS FROM FICTION.

Ghosts went out with gas.—"The Pagan's Cup."

It is only selfish people who cannot believe that they are selfish.—E. B. Benson, "Scarlet and Hyssop."

The things men inherit are mostly weights; they must grow their own wings.—"In White and Black."

Kings are great in the eyes of the people, but the people are great in the eyes of God.—J. Huntly McCarthy, "If I Were King."

One must love at least two women to appreciate either, and did the silly creature but know it a rival becomes like a patch.—Edith Wharton, "The Valley of Decision."

Men are singularly unoriginal when they make love or pray. Women and the Deity have been perpetually hearing the same thing from the beginning of speech.—"The Story of Eden."

A woman never does care for her own soul so much as she cares for the man she loves, but if she is good she cares for her soul more than for her happiness or even than for his happiness.

A Good Memory.  
When Theodore Roosevelt was governor of New York, he was a great friend of the porters and employees of the New York Central. One morning he took the 9:15 train from Albany west, and as he entered the car he said to Adams, the colored porter: "Hello, porter! You here still?"

"Yes, sir," replied the porter, "and I'm going to stay here till you get to be president, and then I want you to give me a job."

"I'll go you!" promptly replied the governor, and, sure enough, when Governor Roosevelt became president of the United States he surprised Adams by sending for him to go to work in Washington.—Schoolmaster.

What He Really Said.  
Mrs. Buffers—The teller at that bank says you are just the meanest, stingiest—

Mr. Buffers—Great Scott! What's that? He says—

Mrs. Buffers—Well, he didn't say it in so many words, but that is what he meant, of course.

Mr. Buffers—See here! What did the fellow say?

Mrs. Buffers—He asked me to endorse the check, and when I told him I hadn't the ghost of an idea what he meant he said he presumed I hadn't had much experience getting checks cashed, so there!—New York Weekly.

W. Coffey, a man about 65 or 70 years of age, was found dead in his room in the Haisley House, Napanee, Fridav. It is clearly a case of suicide by gas, which had been turned.

Hon. G. R. Murray, Premier of Nova Scotia, says the Fast Atlantic line is a settled fact. He believes the Elder-Dempster Company will get the contract.

The dead body of a laborer named Beauchamp was found in the Covo field, Quebec. A young man named Fortin, arrested for the murder, admitted fighting with the deceased with knives.

The British government has accepted the invitation of the United States government to take part in the exposition at St. Louis in 1904, but it is understood limits the exhibits to educational and fine arts.

A fake collector for the Chesterville tornado sufferers is going about the country collecting sums from five cents up and the money goes into his own pocket.

The Canadian Railway Conductors Association, at Montreal, passed a resolution refusing to work for any organization which used coal mined by non-union men.

Official cholera statistics from the Philippines give 25,664 cases and 18,040 deaths, but the actual number of cases and deaths greatly exceeds the official reports.

Water from an unused shaft broke through into a working level in the Josie mine at Rossland. Two miners, Charles Harkins and Josiah Lobb, were drowned, and several others had a narrow escape.

Good harvest weather continues in Manitoba and the Territories. Cutting is now general in Southern Manitoba. Six thousand harvest excursionists reached Winnipeg. The wheat crop of the territories is estimated at 15,000,000 bushels.

During the last three years Great Britain has been the net importer of 271,000,000. Now she is a net exporter of 210,000,000 more.

Canada's financial position is a peculiarly interesting one. The Baltimore Herald has an article that "Clerks in the Bank of Montreal now get a new deal.—B.F. 'Teacher of Finance.' They are also turning a new order.—C.F.H.—Commander of Fifteen Hundred.

T H I S O R I G I N A L D O C U M E N T I S I N V E R Y P O O R C O N D I T I O N

A WARNING TO FARMERS AGAINST TRAP-LANTERNS.

Catch Friends as Well as Enemies.

Department of Agriculture, Ottawa, Aug. 15, 1902.—Trap lanterns as destroyers of insect pests have been recently much discussed in the northern and western portions of Canada, as well as in the United States, and by the most persistent and often unscrupulous advertising...

is capable of killing several injurious insects, the prospect of capturing so many beneficial insects becomes a serious factor in considering the advisability of using trap-lanterns. It is not so much a question of how many insects as of what kind of insects will be captured.

Doctors

and people agree that Scott's Emulsion of cod-liver oil is the best thing to take for "don't feel well and don't know why," especially babies—they like it—men and women don't mind it, but babies actually enjoy it.

Still Had Hope. Barber—Will you have anything on your face when I have finished, sir? Victim—I do not know. But I hope you'll leave my nose, at least.

Steps the Couch and Works Off the Cold. Laxative Bromo Quinine Tablets cure a cold in one day. No cure, No pay. Price 25 cents.

Cured Them of a Bad Habit. A minister in a near-by town on a recent Sunday surprised his audience by reading the following notice from the pulpit: "The regular session of the Donkey Club will be held as usual after the service. Members will meet up in the outside door, make remarks and stare at the ladies who pass, as is their custom." But they didn't that Sunday.

Minard's Liniment Cures Garget in Cows. It is really a dangerous thing for a single man to begin to chirp up a bit in the matter of dress and in the tidying up of his bachelor home.

Know the Signs. "He's going to be married; I'm positive," said one woman, as the man under consideration was spoken of. "He's laying a new side-walk in front of his house."

Minard's Liniment Cures Garget in Cows. "Indeed," said the doubtful one. "Yes, and he has a new carriage and a Panama hat."

Minard's Liniment Cures Garget in Cows. The girl who had been listening gave a ringing laugh and answered: "She would probably have reported the cards having been sent out if she knew that he bought a new hammock yesterday."

Minard's Liniment Cures Garget in Cows. "Why His Wife Stripped. "Good story they got out about the professor, hey?" "What's the matter, did he forget again?"

Minard's Liniment Cures Garget in Cows. "Naw. Better than that. His wife got up the other morning, and was slipping her shoes on, when she gave a little shriek?" "What's the matter?" he asked.

Minard's Liniment Cures Garget in Cows. "Why, I was putting my shoe on and a snake slipped out of it, she cried." "Only one?" said the professor. "Why there should have been just one, I put them there last night to keep them warm."

Minard's Liniment Cures Garget in Cows. "New York Central and Hudson River Railroad. The above name is a household word and the superior excellence of the road should be sufficient to attract most people but now that the rate is the same to New York and the nearest east as by other lines no further recommendation should be brilliantly colored on the two, takes up his position on a stone or the trunk of a tree, and expands his wings in the sunshine so as to show them to the greatest advantage. The lady, a first, after the manner of her sex, disdains to notice them, or to seem to notice them. Gradually, however, their charm prevails over her, she comes nearer and nearer, walks round and round her lover, loses her heart to him, hesitates, and is lost.

Minard's Liniment Cures Garget in Cows. Names Famous in Canada. An engagement of great social importance is that of Mr. Dudley Carleton, only son of Lady Dorchester—a peeress in her own right—and Miss Violet Monkton, only daughter of Lord and Lady Galway. This young lady is an heiress of some importance, as second money and landed property by her uncle, and late Mr. Goeling; and is the owner of Busbridge Hall, near Godalming, a fine place, which has recently been retitled by her and Mrs. Cavendish. Miss Monkton is an attractive girl, with a fair show of good looks, fond of dancing in London, and of walking, driving and hunting in the country. Her father, Lord Galway, is a rich man and his state coach would have been one of the most splendid at the coronation.—M. A. P.

Minard's Liniment Cures Garget in Cows. A Useful Novelty. A Canadian firm recently placed with the Montreal and Toronto newspapers an advertisement of a new nursing bottle it had patented and was about to place on the market. After giving directions for use, the "ad." ended in this manner: "When the baby is done drinking, it must be uncrowded and laid in a cool place under a tap. If the baby does not thrive on fresh milk, it should be boiled."—Philadelphia Times.

Minard's Liniment Cures Garget in Cows. To Cure a Cold in One Day. Take Laxative Bromo Quinine Tablets. All druggists refund the money if it fails to cure. E. W. Grove's signature is on each box. 25c.

Minard's Liniment Cures Garget in Cows. Century's Greatest Work. Many of the most eminent Germans were recently asked to express their opinion as to which was the greatest work of the last century, and their answers, which crystallized showed that the majority attached most importance to the following achievements: 1. The establishment of the German Empire. 2. The proclamation of the rights of man. 3. The discovery of steam as a motive power. 4. Applied electricity. 5. The discovery of narcotics and of antiseptics. 6. The promulgation of the law of conservation of energy. 7. The work of Darwin. 8. The discovery of the modern scientific method of judging things, which is based on exact observation. 9. The discovery of the spectral analysis. 10. The discovery of the X rays. 11. Beethoven's ninth symphony. 12. The second part of "Faust." 13. The cantata of Geneva. 14. The primary school and compulsory education. 15. The movement in favor of woman's rights. 16. The exploration of Africa by Europeans.

Minard's Liniment Cures Garget in Cows. A Good Carriage. Mere beauty of face does not avail a woman much if she has a poor carriage, says the Philadelphia Ledger. A woman may have a face as perfect as a Greek goddess, her figure may be well proportioned, and yet she may appear unattractive because she does not carry herself well. Beauty of feature and form weighed in the balance against grace and carriage is always found wanting.

Minard's Liniment Cures Garget in Cows. A woman's gowns may be modeled after the most elegant Worth creation; her chapeaux may come from the snop of a Paris milliner, and yet it may be a source of annoyance to her that she does not make as smart an appearance as the governess of her children. Why? Simply because she does not stand properly. The minute she stands lightly on her feet, with knees straight, chest well out, stomach flat, shoulders back and the body from the waist tilting ever so slightly forward, she has acquired a certain smartness of effect that no amount of beauty nor fine clothes could give.

Minard's Liniment Cures Garget in Cows. A woman cannot stand correctly and look slovenly. And yet how few women do stand properly! One must note with regret the settled figures, for it is the tendency of the body to fall back heavily on the heels unless there is some exercise to offset the action. The springy step soon becomes a thing of the past, and walking, instead of being a rhythmic falling forward, becomes a jerky up and down movement.

Minard's Liniment Cures Garget in Cows. Seddon's Nationality. Mr. Seddon, New Zealand's famous Premier, is a Scotchman. He is connected with Anna's Dumfriesshire, on the maternal side, and on visiting that town the other day the Town Council conferred the freedom of the burgh upon him.

SALOONS AND DRUNKENNESS

Disparities in Statistics of Arrests Made in Various Large Cities. The number of saloons in a city does not bear any close relation to the amount of drunkenness in it, or at least the number of arrests for drunkenness.

New York, with double the population of Chicago and 50 per cent. more saloons has fewer arrests for drunkenness in a year than the big city on Lake Michigan. Baltimore has more than twice as many saloons as Boston, while Boston has seven times as many arrests for drunkenness in a year as does Baltimore.

San Francisco has 50 per cent. more saloons than St. Louis, but three times as many arrests. Indianapolis has more saloons than Paterson, but the number of arrests for drunkenness is 20 per cent. greater in Paterson than in Indianapolis.

Cleveland and Cincinnati have about the same number of saloons, but the arrests for drunkenness, in Cincinnati are 2,000 annually, in Milwaukee are 7,000 in Cleveland, Buffalo and Philadelphia have about the same number of saloons, but the arrests for drunkenness in Philadelphia are four times as many as those in Buffalo.

Washington has 500 saloons and Milwaukee has 1,700, but while arrests for drunkenness in Washington amount to 3,200 yearly, in Milwaukee they are only 1,400. Worcester, Mass., with 70 saloons, has 2,000 arrests in a year for drunkenness, and Detroit, with 900 saloons, the same number.

The explanation of these disparities is to be found probably in the fact that in the cities where there is an unusual number of saloons they are mostly for the sale of lager beer, whereas in the cities with few saloons more whiskey is sold.—N. Y. Sun.

A BOON TO HORSEMEN.—One bottle of English Spain Liniment completely removes a curb from my horse. I take pleasure in recommending it, as it acts with mysterious promptness in the removal of hard, soft or calloused lumps, blood spurs, splints, curbs, swellings, stiffs and sprains.

GEORGE ROBB, Farmer, Markham, Ont. Sold by all druggists.

Advice Sought. "You should be thrifty and lay something aside for a rainy day," said the man who gives advice ad libitum.

"Mister," said the Kansas farmer, "you talk like a blame theologian. What we peopled need is to lay something aside against a drought."—Washington Star.

Monkey Brand Soap cleans kitchen utensils, steel, iron and tinware, knives and forks, and all kinds of cutlery.

Parke.—After all, sir, the extreme simplicity of our American institutions must commend itself to every one.

Lane.—I know it. Half the time were without a cook.—Harper's Bazar.

Minard's Liniment Cures Colds, etc. Two Butterflies Courting. There is no prettier sight than that of two butterflies courting. The aerial flights and evolutions are a mere beginning—a sort of preliminary flirtation. The serious part of the business begins when the butterflies are at rest. The male, which is usually the more brilliantly colored of the two, takes up his position on a stone or the trunk of a tree, and expands his wings in the sunshine so as to show them to the greatest advantage. The lady, a first, after the manner of her sex, disdains to notice them, or to seem to notice them. Gradually, however, their charm prevails over her, she comes nearer and nearer, walks round and round her lover, loses her heart to him, hesitates, and is lost.

I bought a horse with a supposed incurable ringbone for \$30, cured it with \$1 worth of MINARD'S LINIMENT, and sold him a few months for \$85. Profit on Liniment, \$54.

MOISE DEROSCE, Hotel Keeper. St. Phillip's, Que., Nov. 1st, 1901.

To Night of Privacy. Of course, the majority rules, and that decision is now law in New York; but the Post believes the three dissenting judges were right, and that the decision will ultimately be set aside. If it be lawful to use, without her consent, the picture of a woman on a flour barrel, why would it not be equally lawful to use the pictures of judges, legislators, governors or even Presidents on beer barrels? Brewing is as lawful an industry as milling. There are a thousand ways in which "the so-called right of privacy" might be invaded, under this decision, to the annoyance and injury of succeeding men and women. Do not believe the course of other States will follow this New York precedent.—Washington Post.

Piles. To prove to you that Dr. Chase's Ointment is a certain and absolute cure for each and every form of itching, bleeding and protruding piles, the manufacturers have prepared \$100,000 in gold medals to be awarded to those who think of it. You can use it and get your money back if not cured. \$10 a box, at all dealers of EDWARDS, BATES & CO., Toronto.

Dr. Chase's Ointment. Mrs. Winslow's Soothing Syrup should always be used for Children Teething. It soothes the child, softens the gums, curbs wind colic and is the best remedy for Diarrhoea.

Keep Your Eye On. THE GREAT EYE REMEDY. Do your eyes itch, water, tire, or are your eyes over-worked, sore, red, misty, or do your eyes burn, twitch, or are they granulated? OPENE. No remedy for the eye so good. Easy to apply. Not injurious. Guaranteed as represented. All correspondence receives prompt attention. Mailed anywhere on receipt of 50c per bottle.

THE OPENE CO., Woodstock, Ont.

The E. B. EDDY CO., Limited. Don't experiment with other and inferior brands. USE EDDY'S. OUR BRANDS: "KING EDWARD" 1000s, "HEADLIGHT" 500s, "EAGLE" 100s, 200s, "VICTORIA", "LITTLE COMET". HULL, CANADA. PARLOR MATCHES. For Sale Everywhere.

A Basket of Files Killed with Wilson's Fly Pads. Nothing else will do this.

What frayed your linen? Not Sunlight Soap—No, indeed!

SUNLIGHT SOAP REDUCES EXPENSE

INEQUALITY ALWAYS.

A Dead Level of Rewards Not to be Desired. It is a great law of nature, from which there is no escape, that "by the sweat of the brow we must earn our bread."

Behamy's beautiful dream, "Looking Backward," is simply a dream, as impracticable and impossible as the stories of Jules Verne, "The Arabian Nights," or "Sinbad the Sailor."

Some must study law, medicine, finance, and a thousand things on which human happiness depends, and some must work in the coal mines or every furnace fire in the country would be extinguished, every manufacturing industry end, and we should relapse into barbarism.

It will never be possible to make the wages of all men the same. The man who works ten hours will earn more than his equal who works only five—the skilful more than the unskilful, the strong more than the weak—the well more than the sick—the industrious more than the lazy; and the man who in youth lives economically and saves his money will probably have in old age more than the wages of all men the same.

The man who works ten hours will earn more than his equal who works only five—the skilful more than the unskilful, the strong more than the weak—the well more than the sick—the industrious more than the lazy; and the man who in youth lives economically and saves his money will probably have in old age more than the wages of all men the same.

Labor will never, in the long run, be able to prevent capital from employing whoever capital sees fit to employ, and capital will always be compelled to support labor, whether at work or idle.

Every city and town must support its poor, and capital must pay the bills. Anarchy attempting to run our banks, railroads, factories and great commercial industries, would bring quick chaos, destruction and ruin—not only to capital, but to labor.—George T. Angell, in "Our Dumb Animals."

Children are in danger in our fierce summer months when cholera and other troubles are rampant. Save your little ones by giving them Perry Davis' Painkiller. Its directions will be found on each bottle.

Kitchener and Kerry. Kitchener is undoubtedly English by blood, and yet it was something that he was born in Kerry, and that he spent many of his early years there. Kerry is a county where the peasants are all gentlemen and ladies in bearing, in manner, in thought and in feeling. So it as their own skilful, friendly, courteous—they probably taught to the tall and lanky strapping who roved over their mountains something of the flexibility which has proved the turning-point in great moments in his history and in that of his country.—M. A. P.

\$100 REWARD, \$100. The readers of this paper will be pleased to learn that there is at least one disease that science has been able to cure in all its stages. It is called Catarrh of the Bladder. It is the only positive cure now known to the medical fraternity. Catarrh, being a constitutional disease, requires a constitutional treatment. Hall's Cathartic Cure is taken internally, acting directly upon the blood and mucous surface of the system, thereby destroying the foundation of the disease, and giving strength by building up the constitution and assisting nature in doing its work. The proprietor has so much faith in its curative power that they offer One Hundred Dollars for any case that it fails to cure. Send for list of testimonials.

Address F. J. CHENEY & CO., Toledo, O. Sold by druggists, 75c. Hall's Family Pills are the best.

FRUIT FARM FOR SALE.—ONE OF THE finest farms in the Niagara Peninsula, at Niagara Falls, Ontario. Two mature trees, 150 acres in all, 55 of which is in fruit, mostly peaches. Will be sold in one parcel or divided into lots of 15 to 25 acres to suit purchaser. This is a decided bargain. Address: J. G. HARRIS, Niagara Falls, Ontario.

LOOKS BAD FOR WILLIE.

"Willie, your mamma wants to give you some cookies, but she can't find the key to the pantry."

HERE AND THERE

Dean Bradley, of Westminster Abbey, has resigned.

Dr. Solmers, of Paris, declares that education breeds insanity.

United States capitalists will build a \$600,000 hotel in Winnipeg.

Lord Dundonald is the guest of Lord and Lady Minto at Quebec.

The new Lord-Lieutenant of Ireland, Earl Dudley, has been sworn in.

The last session of the K. of P. convention in San Francisco has been held.

Fowlds' grain elevator and 2,000 bushels of grain were burned at Campbellford.

Hog cholera prevails in Middlesex. Mr. Frank Chatter, near London, lost seventeen hogs.

It has suddenly been decided to hold the German manoeuvres in Prussia, instead of Poland.

The U. S. and the Porto are again likely to have difficulty over delays in promised settlements.

Mr. George Mahogany, of Southampton, was killed by the explosion of gas in a tank.

There is much excitement in the Peninsula of Yucatan, where petroleum has been discovered.

The Parliament of Cape Colony will meet to-morrow for the first time since Oct. 13th, 1900.

Powers, plaintiff in the N. P. Merger suit, has returned to New York and been placed in jail.

Several large herds of cattle are coming into Alberta and Assinibola from the United States.

The new Bishop of Keewatin, Rev. Jos. Lotius, D. D., was consecrated in Holy Trinity Church, Winnipeg.

The British Columbia Fruit-growers' Association is sending five tons of fruit to the Winnipeg horticultural show.

A horse driven by Mr. John Smith ran away near Jones' Falls, throwing out the driver, who was instantly killed.

A cloudburst uncovered about 75 coffins in a Madison, N. J., cemetery, and many of them were swept out of the graves.

The British Lighthouse Association is considering the establishment of a wireless service around the coast, including the lighthouses.

Willie, the four-year-old son of D. Johnston, was run over in the Canadian Northern yards, Winnipeg, on Saturday night and killed.

U. S. Senator J. R. Burton has been interested to visit Hawaii and inquire into ex-Queen Liliuokalani's claims to the crown lands.

Terra-cotta sleepers are in use on Japanese railways. The increased cost is compensated for by the greater resistance to decay.

At the request of Cardinal Gotti, prefect of the propaganda, a list has been furnished of the most important affairs pending at the Vatican.

Col. St. Remy, of the French army, refused to obey an order to close a congressional school, and will be imprisoned and court-martialed.

In a runaway accident at Seely's Bay, John Smith, farmer, aged 45, was killed. His body was badly crushed, and he died almost instantly.

E. E. Leadbeater, son of W. E. Leadbeater, of Woodstock, is home, after a trip to Martinique. He says he was the first man to ascend Mount Pelee after the eruption.

A strike was ordered to-day by the International Brotherhood of Blacksmiths and Helpers in all New York shops where an advance of 10 per cent. in wages is not granted.

A despatch from Cleveland states that Rev. Morgan Wood, formerly of Toronto, will run for Congress against Mr. T. E. Burton. Rev. Mr. Wood will be Mayor Tom L. Johnston's candidate.

Arthur Noble, Toronto, has been presented with the bronze medal of the Royal Canadian Humane Association for bravery in saving from drowning a lad named Fair at Oakville in July last.

Out of eighty men employed by the Gurney Co., Toronto, which has a strike on its hands, sixty-two are now said to be at work, and some of those who are absent are said to be away for private reasons.

The British Government has accepted the invitation of the United States Government to take part in the Exposition at St. Louis in 1904, but will, it is understood, limit its exhibits to education and fine arts.

Further news has been received of the Nordenskjold Antarctic expedition. The vessel is imprisoned in the ice and preparations have been begun to proceed in dog sledges. The health of the members of the party was excellent.

At a meeting of the Conductors' and Railwaymen's Association in Montreal, resolutions were adopted pledging its members not to use or handle coal moved by non-union labor. The association, it is claimed, represents over 20,000.

The Scotch machinists at the Kingston Locomotive Works have received notice of expulsion from the union from New York. They say the headquarters of their society is in England and their secretary there knew the circumstances before they left.

Walter H. McFarlane, a Toronto business man, left the city something like two months ago, the exact date being uncertain. The young woman in charge of the business seems very secretive on this point, and his residence at 1,508 West King street is vacant.

A Johnston, Dominion traveling immigration agent, was told by some immigrants that when they were crossing the Atlantic on their party, a man named Robert Hewitt jumped overboard and was never seen again, although a diligent search was made.

The Japanese Government cabled a few days ago to Hon. T. Noose, Japanese Consul-General, that they would accept Mr. Fisher's offer, and would erect a separate building of 7,000 square feet, for Canada, at the Osaka Exhibition, granting all rights and privileges given to other exhibitors.

The value of building permits issued in Winnipeg this year was \$2,500,000.

## ALL THE NEWS OF THE TOWN

### LOOK CHEERFUL

No matter how depressed you feel, look cheerful! A gloomy face is unattractive. Look cheerful! Nobody cares about your mood. Each has his sorrows, goodness knows! So why should you your grief disclose? Look cheerful!  
Though you are as blue as sapphire, look cheerful! You're prettier when you smile, you know. Look cheerful! The world abhors a gloomy face. And tales of woe are commonplace. So stir yourself and take a brace— Look cheerful!

### SOCIAL AND PERSONAL

Mr. W. C. Smith goes to Watertown, N. Y., on Monday to spend a few days with his brother James, who is laid up with a bad knee. An operation was performed last week and he is now doing well.  
Mr. and Mrs. W. A. Lewis leave tomorrow to take up their residence in Brockville, Mr. Lewis having opened a law office there a few weeks ago. They will live on the corner of James and Victoria streets. There is universal regret in Athens over their departure.  
Miss Ella Gardner, preceptress of Albert College, Belleville, and Mrs. Cowan, of Hamilton, spent Thursday in Athens calling on old friends. Many years ago these ladies were residents here, their father, Rev. J. Gardner being stationed on the Methodist circuit here.  
Mrs. Dixon and children, Edith and George, of Burlington, Iowa, enjoyed a few days this week with Athens friends being guest of Miss Patterson, Elgin street. Mrs. Dixon is one of Burlington's prominent singers and has made many warm friends here by her charming personality.  
Mrs. Clow entertained a few lady friends on Saturday evening, in honor of Miss Taplin, of Boston, those present being school friends of this young lady. Two or three hours were very pleasantly spent. Those present were, Miss Blanchard, Miss Arnold, Miss E. Wiltse, Miss Boyce and Miss J. Taplin.  
Mrs. G. W. Beach had a pleasant gathering at her home last evening in honor of her guest, Miss Kennedy, of Toronto. In the early part of the evening tennis and croquet were played and much enjoyed. Later the guests were nicely entertained with music. The songs by Mrs. Dixon, an honored guest, of Burlington, Iowa, were a treat and highly appreciated. She has a sweet, well cultivated voice, and her selections were rendered in a very pleasing style. Among those present were; Mrs. Dixon son, Burlington, Iowa; Miss Hickson, Brockville; the Misses Hattie and Lucy Patterson; the Misses Elma and Jennie Wiltse; the Misses Ethel and Jessie Arnold, Miss Berney, Miss Giles, Miss Blanchard, Miss Boyce, Miss Reynolds, Miss Slack and Miss Edna McLaughlin.

Mr. and Mrs. Stephen King and daughter are visiting friends in Uncle Sam's domain.  
Mrs. Boyce, accompanied by Miss Boyce, spent the week end with her son at Addison.  
Miss Byers, Main street, entertained a number of her lady friends on Saturday evening.  
Mr. and Mrs. W. G. Parish returned this week from their pretty summer cottage at the lake.  
Mr. Ed. Taylor again occupies his old position behind the counter in Mr. J. Thomson's store.  
Mr. and Mrs. and Miss Crothers, of Kingston, and friend, Miss Holden, of Lowell, Mass., spent Thursday and Friday last in Athens.  
Mr. S. Taber was able to go to his home in Morton on Saturday, accompanied by Mrs. Taber.  
Miss Blanchard, Miss Patterson and Miss Arnold have returned home from Elgin and Algonquin.  
Mrs. Truman Cowan has moved from Isaac street into Mrs. P. Y. Merrick's house on Wiltse street.  
Mr. and Mrs. Russell and son, of Ottawa, were the guests of Mr. and Mrs. Nelson Earl on Friday last.  
Mr. Lilhe, of Belleville, and Mrs. J. Lillie, of Lyn, are guests this week of Dr. and Mrs. C. B. Lillie, Elgin street.  
Mrs. S. Curzon Lamb left yesterday to spend a few days with relatives and friends at Smith's Falls and Ottawa.  
The Misses Bertha and Clara Rowe, of Brockville, are visiting in Athens, being the guests of Mrs. C. L. Lamb.  
Mrs. G. W. Beach and Miss Kennedy returned on Saturday from the lake, where they had spent an enjoyable week.  
Mr. H. Rowsome, of Brockville, is in Athens this week visiting his daughters, Mrs. T. Berney and Mrs. I. Kelly.  
Miss Taplin left on Monday for Brockville, where she will spend a few days before returning to her home in Boston.  
Mr. and Mrs. D. Fisher, and Mrs. A. E. Donoyan and children spent Sunday at Mr. Fisher's boyhood home near Perth.  
Mr. Harry Berney, the popular clerk in Mr. C. L. Lamb's store, is enjoying his holidays. He is taking in the Ottawa Fair this week.  
Mrs. Asher Wiltse, who has been visiting her sister, Mrs. (Dr.) Anderson at Mitchell, Ont., for several weeks, returned on Monday.  
Mrs. A. W. Blanchard, accompanied by Mrs. Hall, of Gananoque, left on Monday for Ottawa, where they will spend a week with friends.  
Miss Hickson, of Brockville, after having spent a delightful week with her friend, Miss Hattie Patterson, returned home this morning.  
Mrs. I. Wiltse and son, Harold, left today for Portland to visit her brother. She will also spend a few days with Mrs. J. T. Gallagher, Newboro.  
Miss Irene Mallory, who has been attending the Boston College of Oratory will give a recital in the High School Hall, Wednesday evening, Sept. 10th.  
Mrs. P. Y. Merrick has been in Athens for the past few days packing up her household goods for removal to Ottawa where she intends to reside in the future.  
Mr. W. A. Lee, clerk in T. S. Kendrick's store, spent his holidays at Lyndhurst. He now has a good supply of fish stories on hand, as most of the time he was handling the rod.  
Mr. Thos. Thompson, left on Monday afternoon to visit his parents near Brockville. From there he leaves tomorrow to resume his studies at the Mt. Hermon College, near Boston.

High and Public schools to reopen Sept. 2nd.  
Mr. PHIL WILTSE's fine stock of fall goods will arrive this week.  
An addition has been made to the E. & W. depot at Athens.  
HIGHEST price in cash paid for all kinds of grain—ATHENS GRAIN WAREHOUSE.  
MRS. MALCOLM BROWN wishes to tender her sincere thanks to her many friends for their kindness to her during her late bereavement.  
MR. T. S. KENDRICK is making extensive repairs to the Witheril property on Wiltse street, which he has purchased, before moving into it.  
A LARGE number of our young people are going to Brockville to-morrow night on the special excursion train. A monster lawn social is being held there.  
THE most enjoyable event of the season will be the excursion to Brockville to-morrow night. The young men of the Island city are having an immense lawn social and everybody is assured of a pleasant trip.  
DR. LILLIE has purchased through the local agent, Mr. Fair, a handsome pneumatic tire runabout from the McLaughlin Carriage Works. The doctor enjoyed his first drive in it on Monday evening.  
REV. MR. REYNOLDS, pastor of the Methodist church here, is now enjoying his holidays. He will visit his brother in Montreal. Next Sunday his work here will be taken by Mr. Servis, a young man well known here.  
THE annual Athens camp-meeting will be held on the camp ground 2 1/2 miles from Athens, commencing Aug. 27th. There have been a goodly number of cottages erected on the camp ground during the last year. It is expected that this will exceed all that have been on this ground.  
A CERTAIN lady had many sympathetic inquirers at Charleston on Wednesday evening last who wanted to know what caused a bad cut on her which caused a black eye. It appears that in her ticket selling enthusiasm while in Athens she ran against an iron railing in an effort to collar a victim.  
THE "Wallopers" go to Brockville on Monday to play the return match with the Boys of that town. The local captain is confident of a victory for his team. Many supporters will accompany the team. It is said the Brockville manager has notified the Athenians to put up at the Ottawa House!  
MR. W. H. DINGLE, whose music advertisement appears in another column, has had over twenty years of experience in teaching piano, organ and singing. He was educated at Leipzig, Germany, and has prepared many pupils for examinations, many of whom are now our leading professional musicians.  
THE Ontario Minister of Education has announced that hereafter no text books will be authorized for use in the schools of Ontario until after it has been published and in general circulation for at least six months. In this way their will be no difficulty in learning the opinions of teachers and experts concerning the books for which authorization is desired.  
MR. WM. HENDERSON, of McIntosh Mills, a former resident of Athens and the House of Industry, met with a painful accident on Wednesday last. While drawing in grain the horses ran away, overturning the load, and he was thrown against a fence. His arm was badly torn, necessitating seventeen stitches. Dr. Harte is in attendance. Mr. Henderson is improving nicely.  
THE social under the auspices of Trinity church, Lansdowne Rear, on Mrs. Johnston's spacious lawn at Charleson Lake on Wednesday evening last was a splendid success. Fully six hundred were in attendance, the evening was pleasant and a very nice time was spent by all. An excellent supper, consisting of cake, sandwiches, ice cream, and coffee, was served on the grounds. In a booth young ladies sold lemonade, peanuts, etc., and were well patronized. The grounds were attractively arranged, evergreens and flags forming a conspicuous part in the decorations. The grounds were well lit up by big Chinese lanterns and torches. There was nothing in particular to draw the attention of the large crowd, so the time was spent in eating, walking and talking. Part of the Lyndhurst band were present and they played one or two selections. The proceeds amounted to the handsome sum of \$150.

## GROCERIES

Fresh and palatable choice BUTTER, CHEESE and fresh EGGS always on hand. Good values in . . . . .

## Teas and Coffees

Also a nice line of Fancy Biscuits . . .

EXTRA GOOD VALUES IN . . .  
Dinner Sets  
Tea  
Toilet  
Water  
Etc., Etc., Etc.

A SHARE OF PUBLIC PATRONAGE SOLICITED.

## G. A. MCCLARY

R. B. Heather,

Has now on hand, some very fine—  
Bedding Plants,  
Choice Roses,  
Carnations and  
Floral Designs.

Call and be satisfied that this is true. Telephone or mail orders given SPECIAL ATTENTION.

R. B. Heather, - Brockville

## Soft Harness

You can make your harness as soft as a glove and as tough as wire by using EUREKA Harness Oil. You can lengthen its life—make it last twice as long as it ordinarily would.

## EUREKA Harness Oil

Makes a poor looking harness look like a new one. Makes a worn harness look like a new one. Makes a hard harness soft. Makes a stiff harness pliable. Makes a brittle harness strong. Makes a weak harness firm. Makes a short harness long. Makes a cheap harness valuable. Makes a good harness better. Makes a bad harness good. Makes a dull harness bright. Makes a faded harness new. Makes a soiled harness clean. Makes a greasy harness smooth. Makes a rusty harness shiny. Makes a cracked harness whole. Makes a broken harness strong. Makes a torn harness new. Makes a worn harness soft. Makes a hard harness pliable. Makes a stiff harness pliable. Makes a brittle harness strong. Makes a weak harness firm. Makes a short harness long. Makes a cheap harness valuable. Makes a good harness better. Makes a bad harness good. Makes a dull harness bright. Makes a faded harness new. Makes a soiled harness clean. Makes a greasy harness smooth. Makes a rusty harness shiny. Makes a cracked harness whole. Makes a broken harness strong. Makes a torn harness new. Makes a worn harness soft. Makes a hard harness pliable. Makes a stiff harness pliable. Makes a brittle harness strong. Makes a weak harness firm. Makes a short harness long. Makes a cheap harness valuable. Makes a good harness better. Makes a bad harness good. Makes a dull harness bright. Makes a faded harness new. Makes a soiled harness clean. Makes a greasy harness smooth. Makes a rusty harness shiny. Makes a cracked harness whole. Makes a broken harness strong. Makes a torn harness new. Makes a worn harness soft. Makes a hard harness pliable. Makes a stiff harness pliable. Makes a brittle harness strong. Makes a weak harness firm. Makes a short harness long. Makes a cheap harness valuable. Makes a good harness better. Makes a bad harness good. Makes a dull harness bright. Makes a faded harness new. Makes a soiled harness clean. Makes a greasy harness smooth. Makes a rusty harness shiny. Makes a cracked harness whole. Makes a broken harness strong. Makes a torn harness new. Makes a worn harness soft. Makes a hard harness pliable. Makes a stiff harness pliable. Makes a brittle harness strong. Makes a weak harness firm. Makes a short harness long. Makes a cheap harness valuable. Makes a good harness better. Makes a bad harness good. Makes a dull harness bright. Makes a faded harness new. Makes a soiled harness clean. Makes a greasy harness smooth. Makes a rusty harness shiny. Makes a cracked harness whole.
