Beautiful Hard-Burnt Brick,

which are manufactured by the most approved modern machinery, from a superior clay, thoroughly mixed with sand; have smooth surfaces, square edges, and ARE GUARANTEED TO STAND THE WEATHER. Our selected stock brick will look as well in the front of a building as some of the so-called face or repress brick, nor are they liable to chip or split with the frost. So far as tested they have not shown any of the WHITE SUBSTANCE, which so disfigures some brick buildings, and we believe them to be entirely free from this ingredient. We aim to keep on hand a large quantity, so that the trade can always rely upon being supplied with good brick.

Having a good wharf on our property and a siding of the W. & A. Railway, we can ship either by vessel or rail.

For the information of builders we publish herewith a certificate from a well-known architect.

The International Brick and Tile Company:

Gentlemen,—I took one of your stock brick promiscuously from a lot shown me and put it to a severe weather test, having boiled it in hot water and put it out to be frozen at once, and often in an open atmosphere, but have not yet seen the least change in the surface. Richmond, Virginia, and the occasion was made memorable by the enthusiasm everywhere manifested in the south over the event, and the honors paid to his body as it passed along. Had he been the hero of a hundred fights, returning home after a successful campaign, the demonstrations in his honor could not have been greater or apparently more enthusiastic. Houses everywhere were draped in black, flowers were strewn in the way and heaped upon his bier, and on all sides the southern flag was displayed. In short, the honors shown to him remind one of the descriptions of the funerals of Nelson or Wellington. These things would seem to show that there is even yet, in the suth the same sentiment which animated her people during that memorable struggle of thirty years ago. And while that sentiment remains, it will prove an element of procedures and of danger to the nation.

SPONAGLE—SLOCOMB.

Under the head of our marriage column to day will be found chronicled the marriage of Dr. J. A. Sponagle to Miss Bessie Slocomb, daughter of Jacob Slocomb, Esq., of Middleton. The ceremony was performed at Ricey's Cove, Lunenburg Co., on Thursday, June 1st, at the early hour of 7 a.m., by the Rev. J. L. Sponagle. The church was beautifully decorated for the occasion, an arch was erected, under which the bride and groom stood, and the isle was bountifully strewed with flowers. The bride looked extremely pretty in her traveling dress, and was attended by Miss Viccie Young, of Middleton, as bridesmaid. The groom was ably assisted by his cousin, Mr. R. W. Ford, of Westport.

After the ceremony the bridal party, augmented by a number of friends and relatives, repaired to the parsonage, were a sumptuous breakfast was partaken of.

The bride assisted by the Rev. J. L. Sponagle. The bride occasion, an arch was erected, under with flowers.

treme. There the dead southern leader is looked upon as one who was a traitor to his country; as one deserving, not the honors paid to the great and the good, but rather the execrations of all patriotic citizens. This incident has shown that the union between north and south is still but little more than one in name. The sword has decreed that the two sections should be united, but the people of the south are quite far from being one with those of the north in their sentiments and aspirations. The same and solves and the deal southern leader is of life. After the usual amount of congratulations had been gone through with, consequent upon cuch occasions, the happy couple accompanied by members of the heavy for Healifax, followed by the usual number of good-luck wishes from remaining friends, which we hope will be verified in the future.

Dr. and Mrs. Sponagle passed through that the two sections should be united, but the people of the south are quite far from and New York, where they intend spending a few weeks before returning to Middleton.

-At a meeting of delegates from many of the Baptist churches of New Brunswick, held in St. John last week, a resolution favoring a separate convention for that province passed by a vote of two to one. An agitation leading up to this object has been for several months, and the organ of the denomination, the Messenger and Visitor, has of late contained many articles pro and con upon the cles, although appearing over the signatures of clergymen, have contained fully as much sarcasm and warmth as we are accuston to see in the political press, so that it would appear that our good brethren of the cloth do not always come quite up to that high moral standard they occasionally set for the rest

As, however, every Baptist church is an entirely independent and self-governing body, subject to no control from association or ention, save what moral influence may be brought to bear upon it, a resolution of the kind passed at St. John can have no effect in binding those churches which disapprove of the succession movement Should the majority therefore decide to withdraw from the present convention there yet remains a strong probability that many f the churches refusing to follow their lead will remain in the maritime convention and work with it. This would leave the New Brunswick convention rather a weak body, as a good many of the leading churches oppose the present agitation.

Just what object is to be gained by the

baptists of New Brunswick separating them selves from their brethren of this province and of Prince Edward Island and carrying on their work alone is not easy to understand. There should be no jealousies be tween the three provinces. The fact that the pastors of several of the leading thes and some of the men prominent in educational matters in our sister province are Nova Scotians, seems to have given rise to more or less of that feeling over there.

Among these are Revs. Gates, of St. John; Harvey Heustis, Esq., of Providence, R. I., Crawley, of Fredericton; Goucher, of St.

Andrews; DeBlois, principal of St. Martin's academy; Black, editor of the Messenger and the company were found to be in a healthy Manning, secretary of the foreign missionary board of St. John. In addition to these, H. C. Creed, of the Normal School, Fredericton, is a Nova Scotian; while a few years ago Dr. Rand, another Nova Scotian, was secretary of characters of characters. We will see that the housand dollars were paid out last year, mostly for wood and wages, and nearboard of St. John. In addition to these, H.
C. Creed, of the Normal School, Fredericton, is a Nova Scotian; while a few years ago Dr. Rand, another Nova Scotian, was superintendent of education. We will say nothing just now of another of our fellow countrymen, Rev. Sydney Welton. The prominence gained by these men seems to have given rise to considerable sectional feeling, and it is quite probable that the present desire for separation owed its origin as much to this feeling as any other cause. But these men would have gained their present desire for separation owed its origin. Surface of the works of the company's works.

The bright Educard D., Corning master, was loaded at the works of the company in a dead weight of upwards of 300 tons, came in accordance with the law of the survival of the fittest. In fact, it is a way Nova Socians have, that of coming to the front wherever they go, and to feel envious of them under such circumstances is but to quarrel with the incorable laws of nature.

—Newfoundland it seems does not want to join the Dominion of Canada. In declinition, is a Nova Socian, was a superintendent of education. The 6ddfollows "At Home."

As a fitting tribute to the departure of Rev. E. M. Young, Grand Chaplain of Craming to unite with as she is but exercising the right and perhaps she is acting wisely in remaining as she is. But Newfoundland is rolling up a debt at a tremendously rapid rate, and it may be that when she becomes willing to join the dominion the latter may make consent. The policy of running into debt head over heels and then throwing the Country, debt and all, into the arms of the Canadians, is one to which the people of the dominion will probably object when the time comes. It books as if that were what her public men intend doing. They now propose to build 250 miles more of railway, to extend clear scrows his island. This will add four or five millions more to her between the propose to build 250 miles more of railway, to extend clear scrows he island. This will add four or five millions more to her debt, which is already quite gates the millions more to her debt, which is already quite gates the millions more to her debt, which is already quite large. MILLER—PARKER.

One of the prettiest weddings which has taken place in Bridgetown for some time past was that which was solemnized in the Baptist Church vesterday morning, when Mr. William R., third eldest son of William Miller, Esq., of Clarence, was united in marriage to Lizzie V., youngest daughter of Isaac Parker, Esq., a former resident of Tremont, but now residing in this town. The church had been most profusely decorated with choice house plants by the many friends of the young couple, and when the

A SCHEME TO BUILD A ROAD TO CONNECT WITH THE NORTHERN PACIFIC.

Montreal, May 27.—A big scheme is under way here among a number of prominent Canadian capitalists to organize a new railroad company that will enter into direct competition with the Canadian Pacific for transcontinental and other business. The scheme has been in embryo for some time, but the first steps at organization have now

scheme has been in embryo for some time, but the first steps at organization have now taken. The promoters are very wealthy men, and include several who were formerly interested in the Canadian Pacific Railroad company. The new company will act under a charter obtained at the last pointed delegates to the district convention to be held at Bear River next week.

On Saturday last the Lawrencetown base ball club, in answer to a challenge received on the previous day, went to Melvern Square to play a match game with the "Juniors" of that place. Although the majority of the Melvern Square club were young men and some we believe old enough to vote, the lads tinue along the south shore of the St. Law-rence to Levis and from Levis over the In-tercolonial and Baie de Chaleurs roads to Gaspe Basin, from which in connection with the railway, it is proposed to run a line of fast ocean steamships to Liverpool. At Duluth connection will be made with the Great Northern or Northern Pacific, and a complete transcontinental route in competi-tion with the Canadian Pacific will thus be

Returning to London she was sold to the Spanish government, by the latter converted into a cruiser, and employed against Don Carlos in the civil war of 1836, thus being the first steamer to fire a hostile shot.

There is still another curious fact that may have been overlooked—that troops withlatter season she was sent to London, and have been overlooked—that troops with-drawn from Canada, upon the close of the Anerican war of 1812–15, for the purpose of joining the army intended to crush Napoleon after his return from Elba, were transported down the St. Lawrence by a Canadian steamer. This was probably the first occasion on which a steam vessel was used for purposes of military transport.

Canada, therefore, not only furnished the model with the first team vessel but the world with the first steam war vessel, but she almost certainly provided the first steam troop-ship as well. - Toronto Evening News.

Interesting Stock and Horse Notes. Capt. J. R. Hall's farm stock at Middleton is well worth inspection. His thorough-bred polled Suffolk bull is a fine large ani-mal for the age of three years, and is the admiration of all fanciers of live stock. Capital Punishment.

The horrible lynching of the murderer Sulivan at Corunna, Michigan, last week, is being used by the believers in capital punishment an an argument for its restoration. Michigan abolished capital punishment nearly fifty years ago and murders in that state are asid to be increasing rapidly; while if we are to judge from the telegraphic accounts of the law appears to have so inflamed the minds of the semi-barbarians who live in the vicinity of Corunna that they decided on a summary enforcement of the death penalty. It is stated that only about 25 per cent. of the persons charged with murder in Michigan have been convicted and that the extreme penantly for murder in that state—imprisonment. The experience of Michigan would seem to stengthen the position of one pretextor another with a very few years imprisonment. POPULAR BRED STALLION!

SIR WILLIAM, 8287.

est Wilkes Sire, and is the sire of seventy-three with records from 2.11½ to 2.30.

SIR WILLIAMS' dam, Sadie L., is a full sister to Nelson, 2.10. Her sire, Young Rolfi, sired Nelson, 2.10; Aubine, 2.19½, and others with records better than 2.30.

GRETCHEN, by Gideon, produced Nelson, 2.10; Edna, 2.24; Sadie L. and other fast ones. It is needless to tabulate the list of producing sires and dams with which this fine young horse stands connected, as they are too well known to require further tracing back.

SIR WILLIAM is a dark hay, foaled 1887, bred at Maple Grove Farm, Auburn, Maine. He is very symmetrical and highly finished, with plenty of substance; this, with his very speedy conformation, gives assurance that he will not only be fast, but that he possesses the power of his ancestors to transmit their good qualities to their offspring, as his colts are beginning to prove. It will be observed that he carries the same per cent of the producing blood that produced Nelson as if he were a son of that noted horse. That, combined with the blood of Messenger Wilkes, 2.23, makes him a very desirable young horse to breed to. In 1891, as an eight-year-old, at the meeting of the Now England Trotting Neeting at Mystic Park, Messenger Wilkes obtained his record of 2.23. A few days after he made an exercise mile in 2.27, going the last quarter in 32 seconds—a 2.10 gaid. Sir William would have gone into training this season had he not come east. Sir William will stand at GRANVILLE FERRY and ANNAFOLIS certain days during the season, of which notice will be given in a few days.

"The rapture over the Union Jack was another glowing incident. The flag was brought down the hall and planted by the chairman place in the centre of the platform. The whole meeting jumped to their feet, cheered and shouted joyously. When the speaking commenced the flag was taken away. But this was not tolerated. Although the Duke of Abercorn was on his feet, he could get no hearing. From all parts of the hall came indignant cries of "The flag! the flag!" His Grace saw what was wrong, and at once had the flag brought back, and with his own hand helped to place it in position. Atumultuous burst of cheering well-comed the reappearance of the beloved flag."

Let him enjoy the music and rest. See, that on finest Ambrosia he feeds, He's had all the hades he needs, It isn't just hardly the thing to do, To roast him on earth and the future too

And so the scriptures come to pass
That "The last shall be first, and the first
shall be last."

A Slight Mistake. Up in the hills of Western Massachusetts, where the higher education and the higher critics alike have not vet penetrated, there lived in a small town an eccentric old man regular attendant at church meetin', and his voice was often heard in prayer and exhortation. Once the congregation met under the shadow of general hereavement. A prominent man in the church had suddenly transported from the scene of his earthly labors to the better land. A hush was upon the meeting as brother Hawkins arose and said: An' now, my brethren an' sisters, let us remember in our pra'rs the family of dear
