DEVOTED TO POULTRY AND PET STOCK.

Vol. 3.

STRATHROY, ONTARIO, FEBRUARY, 1879.

No. 3.

## PLYMOUTH ROCKS.

It gives us much pleasure to present to our readers this month, the above beautiful representation of a pair of Plymouth Rock fowls, which was made for our enterprising and successful young breeder, G. H. Pugsley, of Fisherville, Ontario, by a celebrated Philadelphia artist. The majority of electrotypes which appear in poultry journals are ideal, and represent the breeder's or artist's ideas of what first-class specimens of the variety should be. The above may not be an exception to the

rule, but it will serve to show that Mr. Pugsley's ideas of what constitutes a perfect pair of Plymouth Rocks are good; and that he is on the right road to produce his ideal is proven by the awards made by the experienced breeder and judge, W. H. Todd, at the late show of the Ontario Poultry Association, the prize list of which will be found on another page.

Plymouth Rocks have made rapid strides in public favor in Canada during the past few years. Three years ago half a dozen coops was about the number filled at the show of the Ontario Poultry Association, while at the one just closed, we believe the entries exceeded sixty. That they will maintain this popularity we feel satisfied, as all who have bred them pronounce them good fowls for every economic purpose, besides being handsome to look at. Their eggs are generally fertile, the chicks are easy to rear, and mature rapidly; the hens make good sitters without being much given to broodiness, and are good layers. As a table fowl they are excelled by few in quality of flesh. Their good qualities will make them popular with the farmer, while the difficulty in breeding them to a high standard will keep up the interest among fanciers.

#### Messrs. John Bailey & Son's Establishment.

While in London last summer I thought I would like to pay a visit to John Bailey & Son's, Mount Street, Grosvenor Square. They are wholesale and retail dealers in fancy poultry, pigeons, rabbits, &c., foreign and domestic. Everything from a Canada goose to a fantail pigeon can be supplied by them at the shortest possible notice. I had often read their big advertisement in the *London Field*, offering all kinds of foreign and English game birds, poultry from the antipodes, and silver pheasants from China, and I had almost made up my mind I was going to see a real zoological garden on a small scale.

Where I was staying was about seven miles from Mount street, and this even, in easily travelled London, in no small trip, especially if you want to do it on the cheap, as I did, and tramway and buss it all the way. It involves several questions of route to ask of the policemen, and several charges of vehicles, all of which I went through, and at last found myself landed in Grosvenor square. I had not then much difficulty in finding my way to Mount Street.

Now for the menageric. I enquired for Messrs. Baileys' establishment, and I was directed to it. I walked on, and thinking I must have passed it by, I turned back, looked over the shop windows for names. Ino. Bailey & Sons! Here it is. Why there must be some mistake about this, I thought;

still there was the name in plain, big letters, over the window, and one not likely to have a duplicate in the business, so I went in, and saw a man with a nice white apron on, and a short club in his hand; he was battering down the sharp breast-bones of some very poor looking dressed chickens, and skewering their legs up by the sides of their breasts in such a way that, looking at them, you would think they were fat. I asked if that was Messrs. Bailey & Sons' establishment. He said it was. "Why," I said, "this is a poulterer's shop; I thought Messrs. B. kept a large fanciers' store of fine bred poultry, foreign and domestic game birds, &c., &c." "Oh," he said, "we have another establishment at such and such a number, lower down; we only keep dressed poultry here." This would look as if their poor specimens were killed for the pot, and the good ones kept and sold for breeding purposes. Well, I don't know as there is anything wrong about that; in fact I have an idea that it is a good way to manage things. I hope all that are exposed for sale die a good, natural fowl's death; of course no smothered ones, or those choked to death, would be admitted; but even suppose a few such were, big London, with its millions to feed, would not know the difference, whether the chicks he ate died by having their necks stretched, or whether it got smothered in a crowded hamper coming up by rail from the country. After musing in this style for a few minutes and taking a good look at the dressed poultry, which certainly was displayed to the best possible advantage, I started for establishment No. 2, where I was to see, as I thought, the great collection of all kinds of birds and pets. It was my bad luck to walk by this the same way as I had No. 1. When I retraced my steps and found it, I discovered it to be a place with an archway entrance leading into a sort of small courtyard, and the whole premises had evidently previously been used as a stable by some resident in that locality. A lad answered the door and shew me into and through the establishment, was quite polite and gave me all the information I asked. I must confess, the place was not at all up to what I had expected to see; it was quite different in every particular. I had expected to see an immense collection of all kinds of game birds foreign and English, poultry pigeons, &c. &c., instead of which the display was of the most meagre description: some owls and hawks in cages, priced I think, at 3 guineas each, some Guinea pigs, several different kinds of ducks, poultry, pigeons and rabbits, comprised about all there was to be seen. I noticed a pair of Light Brahmas, and asked the boy where they were bred, he said. "Those are imported Sir." "Where from?" "From America." "Oh! indeed." Well, Philander Williams was not with me, or I think

he could not have kept a straight face. If they ever saw the western hemisphere they ought to have been left there.

Perhaps I had anticipated too much, and did not realize my expectations; certainly I was a good deal disappointed. I had expected to see a much better establishment. But I believe Messrs. B., like many business firms in London, do an immense business in very dingy old premises.

I understand they have large yards in the country from whence they draw their supplies. This firm's rural establishment may be something worth seeing, but certainly their London places are such that, as a fancier, I don't care to take a seven miles tramp through the city again to visit.

### Poultry on the Farm.

(Continued.)

Editor Review,

DEAR SIR:—I fear you will soon be commencing to feel a certain degree of weariness over my hen story to my farming friends. Nevertheless, I shall treat you to another dose of it this month, and shall try to settle it with my conscience (if a hen man can reasonably claim to have such an element in his composition) in this way: If we presume that moral excellence is only attainable by a series of victories over an opposing force which we find in ourselves, the existence of which being a necessity in this case, then I shall be engaged in the very laudable work of giving you a developing exercise in patience, and I know not what all I presume this is why editors are proverbial for their equanimity under the various provocations to which they are subjected. But I must proceed with your exercise, which shall be a continuation of a chat with my farming friends.

Now gentlemen, though we might multiply reasons to infinity, yet we shall confine ourselves to a few of the more potent reasons why it will be to your interest to provide suitable housing for your poultry. Well, sir, you have a city friend—who has not?—and we well know how they enjoy a few days' visit to the country occasionally, and we pity them, shut out; as they are, from pure air, and we will not add pure milk, butter &c., and how proudly you show them about the place—proud of your independence of the quality and quantity of the necessaries by which you are surrounded. Here are fruits, tempting in their rosy freshness, having but very little resemblance to those which have been tossed about in barrels and boxes till the flavor is that of storehouses rather than fruit. Lamb is lamb with you, and milk is milk. Well, let us suppose your friend is

paying you one of his periodical visits, and of course a tour of inspection will take place sooner or later, and you have your friend out to see your new buggy; your friend admires it greatly, compares it with a great lumbering cab, and is convinced that in this respect you have the advantage; but he innocently inquires if all the painting down in the country becomes spotted in so short a time—as he notices that sleighs and cutters &c., all look as if they have had an attack of small-pox. You simply inurmur hens! But now for some of the labor-saving machines. You have recently purchased a fanning mill, the separating power of which is truly marvellous, but being summer you have not been using it for some time; you mix a quantity of oats and wheat together and explain how nicely the machine will separate each kind of grain from the other; you put in the mixture and commence to turn while your friend, leaning against a beam is watching the process with great earnestness, but at the first turn you find that something is wrong; you examine the sieves, and here your hens have been again. In your annoyance you look up at your friend, only to see that his fine coat has received a woeful looking mark on the back; you are obliged to tell him of his mishap, and now you open fire all along the line against poultry, and assert especially that every egg they lay costs you two cents, and that you would not have them about on any account only for Mrs. —; in fact it is one of these cases in which your better judgement yields to the inferior judgment of the weaker sex just to please them. After taking your friend to the house and having the mischief repaired as far as can be, and not forgetting to let your wife hear a little hen news, you sit down to dinner and as your guest takes the liberty of an old friend, and diservingly praises the rich and wholesome dishes which the good lady has prepared, you say nothing of course of what a part good, fresh eggs took in the composition of those toothsome compounds. But what did you do? Decide then and there to build a poultry house. Oh, no! just threatened to kill every hen about the place. After dinner your experience is about the same: reaping-machines and cutting-boxes have all come in for a share. Go where you will and your poultry have preceded you; in barns and sheds, among fodder and grain you find marks of their presence. But your indignation reaches a climax when you bring out your trotter, hitched to your splendid new buggy, and invite your friend to jump in till you show him how we of the country get about. But just as he is about to plant himself comfortably on the splendid cushion, you give a yell like a Blackfoot on the war path, for him to look out—from your annoyance you had forgotten to shut your carriage-house door, and, sure

enough, the hens had got in and left their mark upon your fine cushions. You now express yourself emphatically; so much so indeed that you are glad upon coming to yourself again that he is not your minister.

Now, I do not mean to say that this state of things is the rule, but though it may seem like exaggeration, yet, I am sure you will recognize some of the features of this humble picture which I have drawn; for I can assure you that most of them have come under my notice. Now, my friends, for the sake of profit, and humanity, for the sake of decency and your own morality, for your wife's peace and your own reputation as an intelligent man, and for the sake of cleanliness, build a house for your hens.

### A Canadian Poultry Association.

FRIEND LERTON,—

I was much pleased in reading the article in the last issue of Review on the above subject, and fully endorse the opinion of your correspondent, that the time has arrived for forming such an organization, and if we ever wish to take a front rank as breeders of "standard poultry" we must take steps towards organizing ourselves into a "National Association" for mutual benefit and protection of our interests. Were we united as a body we should be in a much better position to advocate our interests than we now are, divided into so many small local bodies, each one in their own small way, striving to secure the support and patronage of the general public. We have only to look at the American Poultry Association to see what influence and power such an organization can wield in the country. The one thing needed to bring about such a result is the earnest co-operation of our breeders all over the Dominion: let them come forward and give us their views and ideas in the various poultry journals, over their own signature, so that it may be known who are alive in the matter, and before a great while we shall be in a position to assemble at some central place and discuss the matter, and bring about this desirable object.

A strong point in favor of such an organization is the question of judges for our exhibitions. We have among ourselves just as capable men as are the gentlemen who perform that duty for us from the States. By having such an association, judges could qualify themselves and secure a standing among the fraternity which they do not hold now. Why should we be obliged to send out of our own country for gentlemen to perform that duty for us, while we have the material with us to do it as well? But unless there are some means, or some duly au-

thorised body, to grant certificates of competency to judges, their decisions will carry no weight outside of their own immediate neighborhood. Mr. Smith may judge an exhibition, be perfectly competent; but somebody asks, who is Mr. Smith? Well, he is Mr. Smith of such a place, which simply amounts to nothing, but if he were a regularly qualified and appointed judge of the Canadian Poultry Association, how different would be the result.

Come, breeders, from east and west and let us have your views on this matter, and get it into shape; by no other means will we ever take the place we should. Our interests in poultry matters are identical, both in the Upper and Lower provinces; let us work together, and know each other better. We have the material among us to build us a powerful and influential body, which, at no distant day, would be looked upon with respect, and receive the support of all genuine fanciers, and would tend to awaken new interest in poultry matters in general, and give weight and tone to our calling, and we should hear less of such expressions as "Well, he is a hen Betty; don't amount to much," &c. It is well known that poultry exhibitions always create some new fanciers, but how much more would such a one as we could get up, were all to take hold of the matter, determined to make it a success. I believe it would be the means of making some thousands of new fanciers. I hope you will keep this matter prominently before your numerous readers until something tangible comes from it.

W. H. GIBSON.

### American Homing Notes.

This is the time of the year when everything in connection with the Antwerp fancy is generally very dull, but in this vicinity I think it has been just the reverse. It seems to me that the race we had from Hamburg Pa., last year woke the fanciers up, and shows them the necessity of arranging some map, and time allowance, so that in future there would be no possibility of any one being dissatisfied with the result.

For that purpose each club in this vicinity (the Hudson Co., New York, Newark, and Orange Clubs) have appointed a standing committee of two or three members to represent their club at the meeting of the committee, and I have prepared a diagram, showing the exact location of the different lofts within a radius of New York City Hall. The diagram is drawn on this plan: The centre is supposed to be New York City Hall, circles one inch apart, each representing a mile, are drawn around this point, and lines running across the diagram from the top, sides, etc., all meeting at the centre, to represent the points of the compass; then the exact position of all the principal Antwerp lofts are located by a dot at the exact distance and direction they are from City Hall; and the name and address of each loft is printed near the dot. This diagram shows at a glance the relative positions of all the lofts, and any one can see at a glance the exact time allowance to be allowed each loft from any direction.

At Philadelphia, on the 28th of last month, a large exhibition, of Antwerps only, was held by the Red Star Pigeon club, in the Industrial Art Hall of

that city. There was an unexpectedly large number of birds on exhibition, and in point of quality the finest collection of the kind that was ever brought together. Flyers at all distances were represented, and while New York and Jersey City bore of the palm in point of numbers, the representatives of Philadelphia were conspicuous for their excellent quality, and especially for their achievements.

The exhibitors, with a description of some of their more prominent representatives, were: E. O. Damon, Northampton, Mass., three pairs of imported birds, and a red checker cock and hen, bred respectively by John Van Opstal, of New York, and Joel Willard, of Utica, N. Y. Both have flown distances exceeding 150 miles, the performance of the hen being especially remarkable, having never been trained over the route previous to the fly.

Wm. Verrinder, Jr., Jersey City: "Plateade," mealy cock, 2 years old, bred by John Van Opstal; flown from Berks County Fair grounds, Reading, Pa., to Jersey City, a distance of 105 miles. "Pinola," a blue cock, year old, has flown 120 miles; "Whitehouse," a mealy cock, 2 years old, flown 80 miles; "Newark," red checker cock, 2 years old, 80 miles; "First Mate," red checker cock, year old 105 miles. Mr. Verrinder has also ten pairs of Offerman's importation, credited with long distance flying.

J. B. Welsh, Jersey City: display composed principally of Offerman's importation. In the collection were five 2-year-olds that have flown at various long distances, viz.: 340, 175, 300 and 360 miles.

John Van Opstal, New York: five pairs, two blue checker cocks, named "Hero" and "Swiftmess," hatched 1877, and bred by the exhibitor; have flown from Columbus, Ohio, to New York, a distance of 500 miles. Mr Van Opstal has also his noted blue cock, "Oscar," 2 years old, which has covered the same distance, and a 3-year-old blue hen and 4-year-old silver cock, both imported, which have covered 525 miles.

J. R. Husson, New York; 10 pairs, comprising the "Boss," a red cock, hatched 1878, bred by John Van Opstal, New York. This bird flew from Columbus, Ohio, to Brooklyn, 500 miles, last summer, having been liberated at 9:30 A. M., July 27th, arriving home at 11:45 A. M., July 28th. Among the other prominent representatives of this gentleman was "Surepop," a red checker cock, 2 years old, that has flown 500 miles in this country; "Nun," a blue hen three years old, bred by Waefelaer, of Hoboken, N. J., flown from Pittsburg, Pa., to New York, and the black and white cock, "Toby," 2 years old, bred by Van Opstal, of New York. This bird has been started at Cresson, Pa., and in 3 h. and 52 min. was discovered in attempting to gain admission into his cote in Brooklyn. The

distance between the two places is reckoned at 245 miles, and the bird therefore accomplished the fly at the rate of a mile in less than a minute.

E. J. Bramhall, Chambers street, New York; blue hen, 4 years old, imported by Waefelaer, flown from Millersburg, Pa. to Hoboken, N. J.; blue checker cock, imported by same gentleman, flown from Pittsburg to Hoboken, distance 300 miles; a blue hen and mealy cock, hatched in 1879, bred by Husson, of New York, and a box of imported blue and blue checker cocks and hens, which have flown distances of 180, 325 and 350 miles.

L Waefelaer, Hoboken, N. J.: two cocks; color, Silver and blue checker; aged 4 and 5 years respectively. Silver cock four years old, flown 43 miles in 8 hours and 18 minutes; blue checker 5 years, flown from Bayonne to Brussels, 588 miles. Also, five cocks that have flown from Stubenville, Ohio, to Hoboken, a distance of 343 miles. In another part of the room the same gentleman exhibits twenty pairs, foreign and home bred, of good quality and color.

At the head of the Philadelphia collection is the display of Mr. Jas. Grist, made conspicuous by the large card printed thereon: "Champions 'Napoleon,' 'Hurricane' and 'Young Gladiator,' the first birds in America to accomplish 500 miles." In corroboration of this each bird has attached to his cage the diploma of honor awarded by the Philadelphia Homing Pigeon Society, No 1, for their fly from Dayton, Ohio, to Philadelphia. "Young Gladiator" is a red checker, 4 years old; won first prize in inter-State race May 6th 1876, from Northeast, Md., to Philadelphia, 50 miles in 22 minutes and 48 seconds. "Napoleon" is a silver dun, 13 months and 13 days old, and besides accomplishing 500 miles, has made 350 miles from Zanesville, Ohio, to Philadelphia in 9 hours. "Hurricane" is a silver dun, 2 years old, and his 500 miles feat was performed in 33 hours and 10 minutes. Beside these three champions—which Mr. Grist offers to match against any birds in the United States at a long distance—there is a blue checker male, 3 years old, which has flown 70 miles—and won first prize—in 73 minutes; a blue checker cock, father of the long-distance bird "Napoleon," 12 years old, and a blue hen, 4 years old, which has flown from North East, Md., to Philadelphia, 50 miles, in 33 minutes and 47 seconds.

Henry Heintz, Philadelphia, has a silver dun, 2 years old, which has flown 126 miles in 5 hours, winning second prize, and a blue male, bred by James Grist, which has flown the same distance from Camersburg to Philadelphia in 6 hours.

John Parker's collection comprises the Silver cock, "Chippo White," 5 year old, the champion twenty-miler of America. In 1875 he won first prize from Chester to Philadelphia, 14 miles in 18 m. 8s.; the same year won first prize from Spring Mill, and in 1876 won, first prize, silver urn, which was exhibited, in fly from Spring Mill. He has also flown from New York to Philadelphia. Mr. Parker has also a red checker cock 4 years old which has flown from New York to Philadelphia; won second prize from Spring Mill, and a blue cock, which won third prize from Chester to Philadelphia.

Fred. Smith, Philadelphia has two excellent representatives of the homing pigeon in the "Big Injun," a blue cock, bred by himself, and which has won 8 matches, and a blue hen, which has flown from Reading to Philadelphia, and won one match.

Peter Kershaw, Philadelphia, has a blue pair of 2-year-olds, red checker pair, 3, and a pair of the same color, 4 years old. There is also the noted "Iron Duke," a red checker, bred by the exhibitor, and the long distance champion of 1877. The bird has flown 252 miles from Cresson to Philadelphia, and is said to be the first to cover that distance.

Robert T. Moore, Philadelphia, has "Rogers Jr.," and a red checker, the winner of three prizes from Paoli to Philadelphia, 20 miles, in 20m. 40s., 22m. 45s., and 22m. 35s.

Alfred C. Gohr, Philadelphia, red checker, male, 4 years old, bred by himself, has flown from Huntingdon and Cresson, to Philadelphia, winning third prize from the former place in 5h. 20m.

Thomas Grist, Philadelphia, has the blue cock, "George Peabody," 7 years old, bred in England, that has flown eight times from New York to Philadelphia, and once a first prize winner; and "General Washington," blue cock, 5 years old, bred by exhibitor, that has won two prizes from Baltimore. Mr Grist also exhibits a clock-timer, invented by him in 1872. It is very ingeniously constructed and is intended to note accurately the time of a bird when in training.

Joseph Hacker, Philadelphia, has an ash colored pair, bred by himself; also a red checkered cock, 2 years old, which has flown matches from 4 to 22 miles and won prizes in all of them.

Germantown is handsomely represented, not only in numbers but in excellence of breeding. J. Hall has a fine collection; Joseph and George Hargraves, W. H. Livezey and E. Rodes each has a good display of untrained ones, while Mr. Charles W. Henry exhibited in his collection a blue checker cock, hatched April 3, 1879, bred from imported stock, which won the first prize offered by the Red Star Pigeon Club, as well as the first prize (a gold medal) of the Germantown Society No. 1.

Mr. Edward T. Steel, the president of the club, exhibits several well-selected imported birds, and Mr. Daniel S. Newhall, of Philadelphia, has an excellent assortment of imported and home bred. Mr. George V. Cresson has a fine collection, of his own breeding; Peter McCoal, two pairs, bred by D. S. Newhall and William Webster, of the Kensington Pigeon Flying Society, a blue male and female, 2 years old, bred by Arthur Chambers, "Turnback," the male has flown 175 miles, and from Norriston to Philadelphia covered the distance in 16 m. 43s. Mr. Webster has also a pair of beauties—blue male and female—6 months old, which have already flown 54 miles.

Diplomas were awarded to Louis Offerman for blue checker, with the best European record, 575 miles; J. R. Husson, New York, red cock "Boss," best American record, 500 miles; Louis Waefelaer, Hoboken, N. J., for the best exhibit in appearance and best average American record.

There were also awarded prizes for the most beautiful bird of each color, the result being decided by the votes of exhibitors. Of cocks, Mr. Louis Waefelaer won the prize for blues—Mr. Verrinder, Jr., of Jersey City Heights, for blue checkers; D. S. Newhall, for red checkers; Edward Steel, for silver checkers E. J. Bramhall, New York, for meales; J. R. Husson, for any other color, and W. Ver

rinder Jr., for the handsomest pair. Of hens, Mr. Devos captured the prize for blues; Mr. Damon, for blue checkers; D S. Newhall, for red checkers; Mr. Hall, for silver checkers; John Parker, for mealies, and W. Verrinder, for any other color.

In the evening the visiting clubs were very hospitably entertained by the Red Star Club at the Merchants' Exchange, and a national organization, to be known as the "Atlantic Federation of Homing Antwerps," with Mr. E. T. Steele, Pres't Red Star Pigeon Club, as President; Mr. L. Waefelaer, Pres't Hudson Co. Antwerp Club, as Vice Pres't Mr. J. R. Husson, Pres't N. Y. club, as Secy; Mr. E. O. Damon, of Northampton, Mass., as Treas. A committee of four others, consisting of Messrs. D. S. Newhall Thos. Grist and, R. B. Mills of Philadelphia; E. J. Bramhall of Jersey City; and J. Van Opstal, of New York, was then appointed to meet with the officers, and arrange a set of by-laws to govern this organization. This is I think, a step in the right direction, and it will probably do away with this challenging business which I think would do more harm than good to the fancy.

The out-look for the coming season is very bright. Mr. Waefelaer, Pres't of our club, proposes to put up prizes (which are being made by Fifany & Co. N. Y.) for our club to fly for next season; they consist of a fine silver cup, to the winner of the first prize from Millersburg, Pa.; the race to take place about the middle of May; and a fine gold medal to the winner of the first prize from Cresson, Pa; the race will take place about the middle or June, besides the other prizes which will be offered by the club. There will be some pretty sharp competition for these prizes, as besides the already fine birds which we have in our own lofts, Mr. Louis Offermans, an old and experienced fancier from Antwerp, has received several of the largest and finest invoices of long distance birds from Antwerp, selected by his son from the best lofts of Europe, that have ever come to this country; some of which will probably take part in these races.

Fearing that I have already made my letter too long, I remain, respectfully,

W. A. CRANE,

Sec'y Orange and Hudson Co. Antwerp Club.  
Orange, N. J. Feb. 6 1880.

Our esteemed correspondent, "I. B. K.," of Toronto, sends us a programme for training homing birds from Toronto to Detroit, and we hope our Toronto friends, and others on the route, will act on it as soon as circumstances will permit. It is as follows:

Toronto to Detroit, 225 miles, air-line.

Toronto to Hamilton, 40 miles, in three stages, beginning with 5 miles, then 15 miles, then 25 miles, two days rest between.

Hamilton to Paris, 28 miles, 2 days rest.

Woodstock,	25	"	3	"
London,	28	"	7	"
G. encoe,	29	"	7	"
Chatham,	35	"	14	"
Rochester,	28	"	14	"
Detroit,	25	"	14	"

St. Catharines to Hamilton, 40 miles. Give the birds same stages and rests as from Toronto to Hamilton, and same stages and rests to Detroit from Hamilton.

Training to begin at the end of May or later.

In his letter he says: "The distances are only approximate, but can be accurately determined by measuring a good map. The training should not commence earlier than near the end of May, as by that time the weather will be settled, and the practices can be conducted without interruption. Young birds should not be tossed before the middle of July."

We cannot agree with our correspondent in leaving May out of the training season for old birds; it is generally one of the most delightful months of the year; the days are long, clear, and cool as compared with the three following months.

### Annual Meeting of Ontario Poultry Association

The Annual Meeting of this society was held in the Royal Hotel on Thursday afternoon. There were about fifty members present.

The president Mr. Thos. Gowdy, called the meeting to order, at 2:30, and before opening proceedings, called attention to the clause in By-laws requiring that the annual subscription of each member be paid the secretary before he would be entitled to voice or vote in the meeting. After all

had secured membership, Mr. McKenzie, Sec'y pro tem, called the roll.

The president read the clause of the act of incorporation referring to the annual meeting of the society, giving the routine business to be done thereat. He believed a speech from the retiring President was generally expected on such occasions as the present. Although for many years he had been prominently connected with the poultry shows held in the city of Guelph, still he could scarcely be classed as a breeder of fancy poultry. His experience as a fancier he felt was insufficient to warrant him in attempting anything in the way of a speech on the subject in the presence of such an array of experienced breeders. His favorite variety was the Plymouth Rocks, and he believed he had been more laughed at by his friends on account of his experience with this variety, than for anything else he had undertaken. Nevertheless he was happy to say that his choice of variety must have been a good one, as evinced by their popularity at present, they making up the largest exhibit of any single variety in the show.

The secretary read the financial report of the last show:—

Receipts, - - - - -	\$1,346 47
Expenditure, - - - - -	\$1,382 93

Leaving a balance due Treas. of \$ 36 46

The President explained that this deficit was caused by the great expenditure consequent on removing the coops from Hamilton.

The Auditors submitted their report, as follows:—

We, your Auditors, have examined the books and accounts of the Secretary-Treas., and find them correct, but very irregularly kept, on account of the practice of exhibitors not forwarding the entry fee with their entries, thus giving the Secretary a great deal of unnecessary labor. We would recommend that the rules on this matter be strictly enforced in future.

JAMES FULLERTON, }  
JOHN MCCLELLAND, } Auditors.

On motion the report was adopted.

Mr. John McClelland said that this society should make efforts to secure a representative on the Board of Agriculture. The President explained that efforts had been made with this object, but as yet without effect.

#### PLACE OF HOLDING NEXT SHOW.

Moved by Mr. A Bogue, seconded by Mr. W. H. Doel, that the show of this society for 1881 be held in the City of Brantford. In speaking to the motion, Mr. Doel said that he wished to correct a wrong impression which seemed to be held by some: that it was the intention of Toronto fanciers to get the show to Toronto, and by an effort at each annual meeting, keep it there

permanently. This was not the case. He did not believe it had ever been thought of by Toronto fanciers. The motion was carried unanimously.

#### ELECTION OF OFFICERS.

Mr E. Morris, nominated Mr. Buck as president, seconded by Mr. J. McClelland. Mr. Buck declined the nomination, and nominated Mr. E. Kester, of Brantford, seconded by Mr. Burr. At Mr. Buck's request his nomination was withdrawn, and Mr. E. Kester declared elected.

Vice presidents: 1st, Mr. W. H. Doel, Doncaster; 2nd, Mr. A. Bogue, London.

Directors: Geo. Murton, Guelph; F. J. Grenny, Brantford; J. McLelland, Peterboro; Jas. Lockie, Waterloo; G. H. Pugsley, Fisherville; J. W. Buck, Brantford; D. Allan, Galt; W. G. Burr, Brantford; S. Butterfield, Sandwich. Ex-President Gowdy was unanimously elected an honorary member of the board.

Auditors: Mr. E. Morris, Guelph; Jas. Fullerton, Strathroy.

The secretary read a communication from the Toronto Industrial and Arts Association, asking that two gentlemen be appointed to represent this society at their board. The president elect and ex-president were appointed.

Mr. McClelland, of Peterboro, thought this society was now of sufficient importance to make its influence felt with express companies, and secure more equitable rates for the transportation of fancy poultry than can at present be had, and gave a number of forcible illustrations showing the injustice of the present charges. He also called for action by the society to inaugurate a better system for the appointment of judges for fall shows, and gave as an illustration of this necessity the judging at last Provincial show at Ottawa, where one of the "judges" candidly acknowledged that he did not know one variety from another. Mr. Doel, and Mr. D. Allan, coincided with Mr. McClelland.

Mr Gowdy vacated the chair, which was occupied by Mr. Kester.

Mr Buck moved that the thanks of the society be tendered to the retiring president, Mr. Gowdy for his untiring zeal and the impartial manner in which he had discharged the duties of his office. The motion was seconded by Mr Jas Lockie, who spoke in the highest terms of Mr Gowdy, and the assistance he had given the fancy by his energy and good judgement while at the head of the society. He also spoke at some length on the rapid advance in the importance of the poultry interests of the Dominion, and said that he regarded the appointment of the nine directors, and their distribution over different sections of the country, as a most excellent move. He considered it the duty of these directors to do all in their power to advance the poultry fancy in their respective locali-

ties; and hoped that at the next annual meeting each would be able to give a good account of his stewardship. The motion was carried, and thanks tendered.

Mr Gowdy thanked the members for this evidence of their appreciation of his services, and said they would always find him in the future, as in the past, willing to give a helping hand, as he had always found it a great pleasure to be associated with the poultry fanciers of Canada.

The meeting then closed.

At a meeting of the directors, held immediately after the close of that of the association, W Sander-son was elected secretary, and F J Grenny, treasurer, both of Brantford.

At a meeting of the poultry fanciers, held in this town, on Saturday, Feby. 14th, a poultry association was organized, to be known as the "Norfolk Poultry Association," and the following gentlemen were elected officers for the ensuing year: Pres., A W Smith; 1st vice-Pres., Joseph Hyckoff; 2nd vice-Pres., W. J. Trinder; Secretary, S. Luscombe; Treasurer, Thos. Puzley; Directors: Messrs. Freeman, Fitzgerald, Dawson, Decoe, Glazebrook, Kitchen, Smith, H Trinder, Mahiney, and Woodley. It was decided to hold the first annual show on Thursday, March 25th. Prize lists will be issued in a few days. S. LUSCOMBE, Secretary.

Simcoe, Feby 16th, 1880.

SAGINAW VALLEY POULTRY ASSOCIATION.—At the meeting of the above association, held on the evening of Feby 5th, at the office of the President, the following persons were chosen officers for the next year:—President, Alex. Ferguson; Vice-Presidents, W. J. Bartow; S. Butterfield, J. B. Peter, F D Keeler, J K Rose. Sec'y and Treasurer—C T Beatty. Executive Committee: Mark Hodgson, George G Cook, Joseph Knaebel, W I Howard, J G Ayles, C S Dutton, Peter Lepp, C J Fraser and Frank McGray. The date of the next annual poultry show was fixed for January 11, 12, 13 and 14, 1881.

The exhibition of the Nova Scotia Poultry Association will be held at Halifax, N. S., opening on March 10th, 1880. Premiums will be awarded on single specimens by a competent judge; competition open to all. Entries to be made with R J Wilson, Secy., Halifax, N. S.

At the National, Indianapolis, R McMillan took all the 1st prizes on Spanish, and for best collection,—4 birds shown. Charles McClave, of New London, did the same with his Silver Polish; C A Keefer was successful with Plymouth Rocks, and Stahlschmidt with his Leghorns

## Subscription Premiums.

Any paid up subscriber will receive 25 cents commission on each yearly subscription sent at \$1.00. And anyone not now a subscriber, by becoming such, can get up clubs on same terms.

Through the voluntary kindness of a few of our best breeders, we are enabled to offer the following inducements:—

James O'Donohoe, Waterloo, Ont., will give to the first to send us six new subscribers, a pair of excellent pit games.

A. W. Bessy, St. Catherines, will give to the first to send us six new subscribers at regular rates, a pair of Homing Antwerps, A. No. 1 birds. To the first to send you five new subscribers, a pair of Birmingham Rollers, excellent performers.

Fred. E. Young, Colborne, Ont., will give to the first two persons sending us six new subscribers, a setting each of Plymouth Rock eggs, from hens of Britton, Felch and Keefer strains, mated with the cock "Mark Pitman 3rd," bred by I. K. Felch—delivered after April 1st.

W. STAHLSCMIDT, Preston, Ont., will give one setting of eggs, Brown or White Leghorn, to the person that sends us five yearly subscriptions to the Review; and a fine pair of Brown or White chicks to the one that sends us 15 yearly subscriptions at \$1 each.

JAMES LOCKIE, Waterloo, Ont., will give a real fine pair of Light Brahmas, worth \$15, to the first to send us fifteen new subscribers at regular rates.

SHARP BUTTERFIELD, Sandwich, Ont., says: For every five new subscribers at \$1.00 each, I will give one setting of eggs from any variety I breed except Black Hamburgs.

Fred. Whitley, Box 1815, P. O., Montreal, will give a tip-top pair of Birmingham Rollers to the first one who sends us five new subscriptions at regular rates.

FOR BOYS AND GIRLS UNDER 16 YEARS OF AGE.

JAMES LOCKIE, Waterloo, Ont., will give a pair of beautiful Blue Fantail pigeons, worth \$6, to the first to send us six new subscribers at regular rates.

We will give the boys or girls the following premiums:—

To the first to send us six new subscribers, a pair of beautiful, long, white Pouters, worth \$10.

To the first to send us five new subscribers, a first-class pair of Homing Antwerps, from stock imported from Belgium, delivered in May or June.

To the first to send us four new subscribers, a pair of young Birmingham Rollers, bred from stock imported from Birmingham.

To the first to send us five new subscribers, a setting of Plymouth Rock eggs, delivered in April, from 1st prize stock at Western Fair, London, and pronounced by the gentleman who judged at Toronto, Guelph, and Hamilton, "by far the best I have met this season."

To any one sending us four new subscribers, the American Standard of Excellence.

Now, girls and boys, don't be afraid to compete; if you are not the first, or if the prize is gone before you get the number, we will allow you the agents' commission, 25 cents on each name and dollar.

The prize-lists crowd out a number of very interesting articles this month

We have been informed that Sharp Butterfield was awarded some prizes on his fowls at Saginaw and Ann Arbor, Michigan. Further particulars next month.

BEREAVEMENT.—We regret to learn that Mr. W. Sanderson has lost two children by scarlet fever, and that four others of the same family are prostrated with it.—*Brantford Expositor*. We are grieved to learn of Mr. Sanderson's bereavement; he will have the sympathy of the whole fraternity, as he is universally esteemed.

ERRATA.—We wish to correct a few errors in the prize list of the Ontario Poultry Association, which appears on pages 45 and 46 present issue: In Light Brahmas, H G Charlesworth won 2nd on cockerel, and G H Pugsley 2nd on cock. In Leghorns, Brown cock, Hope won 2nd and Simpson 3d. In special list, J Aldous won on Golden Spangled Hamburg cock

We are sorry to learn that a number of our fanciers resorted to plucking, trimming and coloring in order to secure prizes at the late shows. There were birds plucked and colored at Guelph, three cases known, and one glaring case of coloring was shown up at Peterboro. The officials of the societies should make an example of such unscrupulous exhibitors.

Editor Review,

You will find inclosed \$1.00 to renew my subscription to the REVIEW, which I should have attended to before this late date. I gladly send you this, and feel satisfied it is well spent in securing the visit of our leading poultry journal once a month to my home. I hope the REVIEW will continue to receive that patronage from the fraternity which it deserves, and from year to year continue to prosper and grow until it becomes the foremost and leading publication of the poultry interest on the continent.

THOS. COSTEN.

Montreal Feb'y 13th, 1880.

### New Advertisements this Month.

Very few breeders in Canada have made such a brilliant record in so short a time as Mr. G. H. Pugsley, of Fisherville, Ont. He first exhibited last year, and his success was great, but reference to the prize list of the O. P. A., and his half page ad. in this issue, will show that this year his success has been wonderful, especially in Light Brahmas, Plymouth Rocks and Japanese Bantams.

C. A. Graf, proprietor of Seabright Poultry Yards, Fisherville, Ont., is delighted with American Seabrights, and believes, when better known, their merits will make them the most popular variety. Mr. Todd pronounced his stock the finest he had ever judged or seen. His Brown Leghorns are also very fine.

John James, of Yorkville, Ont., offers a lot of fancy pigeons for sale. He is one of the most successful breeders of pigeons in Canada. At the late show at Guelph, after the awards were made it was almost impossible to see his birds for prize cards.

J. F. Scriver, of Montreal, renews his quarter ad. for year. Reference to the prize list of the late show held in the above city, which will be found in this issue, will give evidence to the quality of his stock.

Thos Hall, Outermont Poultry Yards, Montreal, was very successful with his specialties at the late Montreal show. He solicits a share of public patronage in a quarter page ad.

H. H. King, Montreal, breeds White Leghorns, of a popular strains, and offers eggs for hatching. Mr. King is agent for REVIEW in the province of Quebec.

Read the card of Thomas Morris Jr. of Hamilton. He breeds Light Brahmas exclusively.

From Brantford we have the ads. of G. W. Burr, a very successful breeder of Leghorns, and F J Grenny, who breeds Light Brahmas; both of whom we confidently recommend.

Sharp Butterfield's ad. arrived at the last moment. He says he will fill his space with facts next month.

### In Search of Truth.

The exhibit of Black Spanish was far from being the least meritorious at the late Guelph show; in fact some of the specimens were so fine in face that the veteran breeder, Lamb—who is generally very little behind the main winners—could scarcely believe that they had not been painted. So strong did this belief become that he resolved, during the annual meeting on Thursday afternoon, which drew nearly all the exhibitors from the hall, to put the matter to the test. Supplied with a bottle of spirits of turpentine he proceeded to the coop of the first prize pair, and endeavored to "wash out their faces." In this he did not succeed, but the operation did not agree with the birds, as when they were discovered by their owner they were, as may be supposed, in great agony.

The president brought Mr Lamb sharply to task for such an unwarrantable act. He did not deny the charge, and the only plea he could bring forward in justification was, that "having been deceived by painted faces once, he always since regarded extra fine ones with suspicion, and was bound in this case to put the matter to the test."

Several other matters, changing of ducks, etc., were also debated, and a lively and exciting scene resulted for about half an hour, showing plainly that only in name does our old friend resemble the animal typical of innocence, etc., as he proved himself both able and willing to butt against all opposition.

These latter things may have all been mistakes, and the most charitable view is taken of them, but when such mistakes occur year after year it should convince the party making them that nature is giving notice that his showing days are over; and he should depute some younger person to attend the shows with his splendid exhibit, which the poultry societies cannot well spare from their shows, but will elect to spare rather than be subjected to the annoyance of such scenes as those they gave rise to, at the last two shows of the Ontario Poultry Association.

### The Shows.

From all the shows held in Canada this season we have received the most cheering reports: increased entries, improvement in the quality of the stock exhibited, and a greater interest manifested in the exhibitions by the general public.

The only show it has been our privilege to visit this season was that of the Ontario Poultry Association, held at Guelph, and in our opinion it compared favorably with any yet held under the auspices of this Society. The entries exceeded 1,150, and a great improvement was perceptible in a majority of the classes. Space this month will not

permit us to particularize.

The management was better than at any of the previous shows, which is accounted for by the fact that on this occasion the exhibitors seemed to realize that they also had duties to perform, and made their entries and delivered their stock in good time.

The officers and local committees proved themselves workers. Those fanciers who did not accompany their birds may be glad to know that they were handled and cooped by Messrs. Spragg, Crowe and Suddaby, who know just how to do it, and that the commissary department was under the control of Mr. Colson, a veteran fancier, who knows how and when to feed. It was a matter of universal regret that the secretary, Mr. G. Murton, was unable, through serious illness, to attend to the duties of his office. No poultry show at Guelph can appear complete without his presence at the desk. He had so far improved that on Thursday and Friday he managed to put in an appearance for a short time, but seemed very weak. We are glad to learn that he is nearly well again. The duties of Secretary were performed by Mr. McKenzie in a very satisfactory manner.

We are not in possession of much information regarding the show at Montreal, but are informed that a great improvement was apparent in the stock over last year's exhibit, and the birds were generally in grand condition. The pigeon exhibit was particularly fine. There was a splendid attendance of visitors. We will endeavor to give further particulars next month.

The Peterboro show was a very successful one in every particular. The fanciers in this town deserve great credit for the exhibitions they get up, giving good prizes and paying them promptly. Sharp Butterfield judged the birds. Particulars next month.

Sharp Butterfield writes: "Business never half so good as now; shipping every day."

Lists of awards of the National Show at Indianapolis, giving score of winning birds, may be had by addressing Dr. W. J. Estlin, Secy., Indianapolis, Ind., and by enclosing 3 cent stamp.

On February 18th, Mr C. A. Keef shipped to Messrs. R. R. Fowler, & Co., of Prebendal Farms, Aylesbury, England, two magnificent Plymouth Rock cockerels.

Among the articles crowded out this month is one from the pen of Mr. H. Cooper, judge of pigeons at Guelph Show, describing the exhibit, and one entitled "Rat Proof Poultry House," by "Pure Blood."

### Grand Sale of Japanese Bantams.

This is to CERTIFY, That this day I have sold my entire stock of JAPANESE BANTAMS to Mr. G. H. Pugsley, Fisherville, Ontario, Canada, and would recommend all those wanting stock to patronize him, as he undoubtedly has the best lot of Japanese Bantams on this continent. The sale comprised our choicest imported and prize birds, numbering over twenty pairs, and we have agreed with Mr. Pugsley that we will not breed that variety for at least ten years. Three years ago we started by importing from England trios at a cost of \$55.00 a trio, and were pronounced to be the smallest and finest Japanese ever brought to this country, and their breeding proved good, even producing some specimens better than the old stock. Mr. Pugsley is an honorable dealer, and all who patronise him will be fairly dealt with. To those who are not familiar with these Bantams, we will say, they are a beautiful variety in style, color and smallness of size, and we know of none more docile and attractive than those little beauties.
