## PREFACE.

The fact that upwards of 700 By-laws had been passed by the Municipal Council since the consolidation of 1879,—many to repeal or amend portions thereof and many (rendered necessary by changes in the Municipal Act) to enact matters not contemplated at the time of that revision, convinced the Council of 1892 that the publication of a new edition, could not, in the interests of the public, be longer delayed.

After being commissioned to undertake the work, I was authorized to confer with the several Standing Committees in regard to such portions of the consolidation as related to their respective departments; and my sincere thanks are due to the chairmen and members of these respective Committees for their courtesy to myself as well as for the consideration and assist-

ance rendered in the revision of the work.

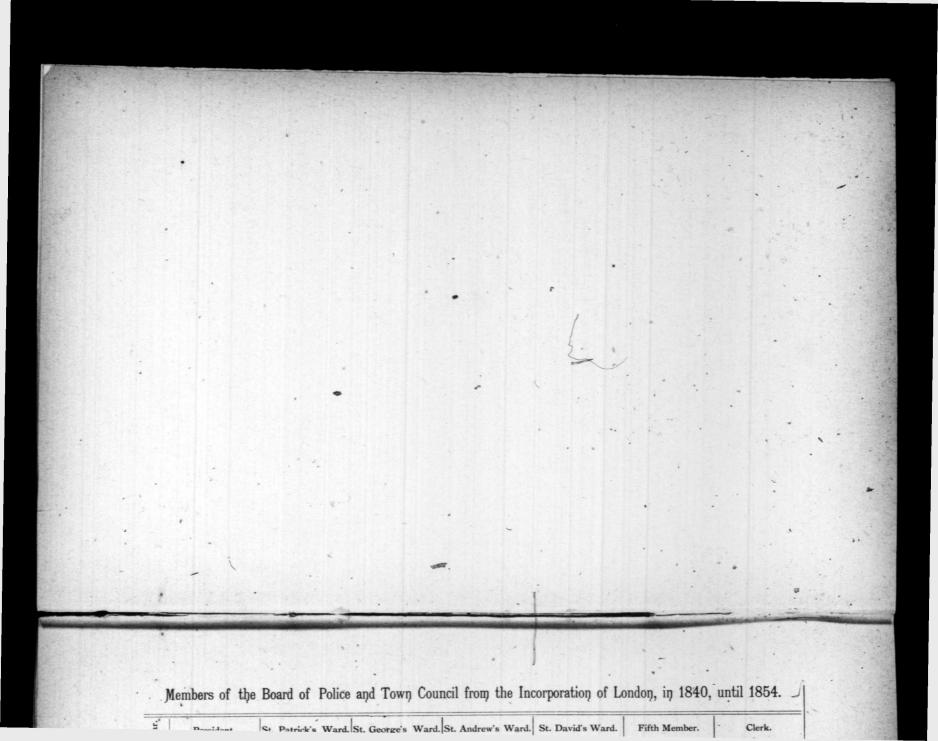

I have deemed it expedient to publish, in their serial order (see table I), the titles, dates, etc., of the By-laws passed since the last consolidation, except such as provide for levying rates to pay for local improvements—an abstract of which will be found in tables II to VI inclusive. It is hoped that these several tables as well as the index will be found complete and convenient for reference.

That the Volume as a whole may be found convenient and valuable to all whose duty it is to administer civic government as well as to any others who may have occasion to refer to it, is the sincere

desire of the compiler.

C. A. KINGSTON,

London, December, 1892.

And whereas it has been made to appear that the said indebtedness was incurred mainly in providing a system of waterworks for the said city of London,

in erecting and extending the high and public schools of the said city, in investing in railway debentures and other securities now held by the said corporation. and in improving by public works and buildings the said city, in order to keep pace with the growth and progress thereof, and that it is expedient that the said corporation shall be enabled to consolidate its said indebtedness and to effect a loan to pay off the same, at a lower rate of interest and payable at longer dates than apply to the existing debt; and whereas it has also been made to appear that \$596,823.19 have been expended by the said corporation on capital account in the construction and extension of the said waterworks system which produces a revenue to the said city more than sufficient to pay off the debentures which will be required to be issued to retire outstanding debentures to the amount of \$534,628.94 issued on account of the said waterworks and which said outstanding debentures form part of the said debenture debt; and whereas the said municipal council has by its said petition prayed for the passing of an Act for the purposes aforesaid, and that new provisions be made as to the limit of the borrowing power of the said corporation; and whereas it is expedient to grant the prayer of the said petition;

Therefore Her Majesty, by and with the advice and consent of the Legislative Assembly of the Pro-
