KING'S EVIL

Was the name formerly given to Scrofuls ecause of a superstition that it could be cured by a king's touch. The world is wiser now, and knows that SCROFULA

can only be cured by a thorough purifica-tion of the blood. If this is neglected, the disease perpetuates its taint through generation after generation. Among its earlier symptomatic developments are Eczema, Cutaneous Eruptions, Tu-mors, Boils, Carbuncles, Erysipelas, Purulent Ulcers, Nervous and Phy-sical Collapse, etc. If allowed to con-tinue, Rheumatism, Scrofulous Ca-tarrh, Kidney and Liver Diseases, Tubercular Consumption, and vari-ous other dangerous or fatal maladies, are produced by it.

Ayer's Sarsaparilla

Is the only powerful and always reliable blood-purifying medicine. It is so effectival an alterative that it eradicates from the system Hereditary Scrofula, and the kindred poisons of contagious diseases and mercury. At the same time it enriches and vitalizes the blood, restoring healthful action to the vital organs and rejuvenating the entire system. This great Regenerative Medicine

Is composed of the genuine Honduras Sarsaparilla, with Yellow Dock, Stillingia, the Iodides of Potassium and Iron, and other ingredients of great potency, carefully and scientifically compounded. Its formula is generally known to the medical profession, and the best physicians constantly prescribe ATEP'S SARSAPARILLA as an **Absolute Cure** For all diseases caused by the vitiation of the blood. The re-appointment of Postmaster Pear son was a surprise even to those who had worked hardest to secure it. They received no great encouragement at the White House, and Postmaster-General Vilas has openly opposed it. But the President, after thinking the whole matter over and examining the charges filed against Pearson, finally decided that as this had been made a test case, and the New York independents had set their hearts on having Pearson retained, he would order it done. Among the other considerations which influenced him was to show his utter disbelief in the charges against Pearson, the fact that no prominent Democrates asked from New York city for Pearson's removal, and his desire to thoroughly ignore Tammany by giving the Post Office to the Independents and the Custom House to the County Democracy. It was essentially a Cleveland ap-pointment. It was not submitted to the Cabinet, and Vilas was the only one who

This track is now occupied by the civilized Winnebagos. had no notice of Teller's intention and the first they knew was the irruption within three hours after the order was made, of a swarm of whites, who coolly proceeded to pre-empt the farms which the Winnebagos have cultivated for years. They protested that they were included in the treaty of 1868, which guaranteed their lands from seizure without their consent, and again in the Sioux agreeernment promised to secure to each Indian family a certain amount of land. The effect of Teller's order was to rob them of everything, and it was based upon the miserable quibble that as this reservation is separated from that of the Sioux by the Missouri River it was not protected by the treaties, although they were meant to cover it. The Indians have resisted this attempt to steal their homes, and the agent of the Indian Rights Association, Mr. Painter, presented their case first to Secretary Lamar. For motive power for Drilling Machine, we use a steam engine (four acres) power.

If solid rock is to be penetrated to get a sufficient supply of Water, we drill a 7 or 8 inch hole through the earth or alluvial deposit, and down into the rock a few inches, using a water tight metal casing down to the rock, making a water tight connection with the rock to shut off the surface water and all drainage. We then use a six inch drill inside of the surface casing and go deep enough to make a flowing Well if necessary.

Procuring a supply of good well water is only a question of depth, as it is a settled fact that water can be procured in every country at depths that can be easily reached with our portable mechanism. machinery.

If the well is not made deep enough to flow, a small engine can be used or a wind mill erected, or the water be pumped by man or horse power, and the water be forced into a tank in top of the house (in tower of mill) or in any other convenient place, thus having an equivalent to a flowing

house (in tower of mill) or in any other convenient place, thus having an equivalent to a flowing well.

If a wind mill is used have the tank made large enough to hold water for at least one day's pumping to last through a calm. This solves the question of water supply. Pure drinking water na bundance can now be had from Nature's fountains beyond a doubt in any and every country on the face of the globe.

By this system good and pure drinking water can be obtained in any locality, in marshy or low swampy districts as in more favorable localities, the question being only one of depth. It never fails.

The expense of sinking a well by the aid of our machinery is much less than the cost of the ordinary sunk or dug well, besides the inestimable advantage of always having pure and fresh water free from contaminating influences.

Persons who desire information about prospecting for minerals, oil, or want an estimate for water supply, or a well, should write us fully and describe the geological foundation. Nor bring me back departed joys,

But ye can try and save the boys.

Ye bid me break my fiery chain. Arise, and be a man again,
When every street with snares is spread,
And nets of sin where'er I tread.
No. I must reap as I did sow, The seeds of sin bring crops of woe; But with my latest breath I'll crave That ye will try the boys to save.

But by the wine-cup's ruddy glow I traced a path to shame and woe. A captive to my galling chain, I've tried to rise, but tried in vain; The cup allures and then destroys, Oh, from its thraldoms save the boys!

Into whose gilded snares I fell.
Oh! freeman, from those foul decoys,
