The copy filmed here has been reproduced thanks to the generosity of:

Bibliothèque nationale du Québec

The images appearing here are the best quelity possible considering the condition and legibility of the original copy and in keeping with the filming contract specifications.

Original copies in printed paper covers are filmed beginning with the front cover and ending on the last page with a printed or illustrated impression, or the back cover when appropriate. All other original copies are filmed beginning on the first page with e printed or illustrated impression, and ending on the last page with a printed or illustrated impression.

The last recorded frame on each microfiche shell contain the symbol → (meaning "CONTINUED"), or the symbol ▼ (meening "END"), whichever applies.

Maps, plates, charts, etc., may be filmed at different reduction ratios. Those too large to be entirely included in one exposure ere filmed beginning in the upper left hand corner, left to right and top to bottom, es many frames as required. The following diagrams illustrate the method:

L'exemplaire filmé fut reproduit grâce à la générosité de:

Bibliothèque nationale du Québec

Les images suivantes ont été reproduites avec le plus grand soin, compte tenu de le condition et de la netteté de l'exemplaire filmé, et en conformité avec les conditions du contrat de filmege.

Les exemplaires originaux dont la couverture en papier est imprimée sont filmés en commençant par le premier piat et en terminant soit per la dernière page qui comporte une empreinte d'impression ou d'iliustration, soit par le second plat, selon le cas. Tous les autres exempleires originaux sont filmés en commençant par la première page qui comporte une empreinte d'impression ou d'iliustration et en terminant par la dernière page qui comporte une telle empreinte.

Un des symboles suivants epparaîtra sur la dernière image de chaque microfiche, seion le cas: le symbole → signifie "A SUIVRE", le symbole ▼ signifie "FiN".

Les cartes, pienches, tabieaux, etc., peuvent être filmés à des taux de réduction différents.

Lorsque le document est trop grand pour être reproduit en un seui cilché, il est filmé à partir de l'angle supérieur gauche, de gauche à droite, et de heut en bas, en prenant le nombre d'images nécessaire. Les diagrammes sulvants illustrent la métho.

DOUBLES NOTES

Three miles south of Plattsburgh, N. Y., D. & H. R. R. Station (Bluff Point) and Steamhoat Pier in Hotel grounds.

FINEST AND MOST ACCESSIBLE DF THE ADIRDNDACK AND LAKE RESDRTS.

Vast and magnificent views of lake and mountains. A fine Golf Course. Fishing and hunting. Riding and rambling. Exquisite scenery. Romantic historical localities. A lofty and airy situation. Panoramic views of Adirondack and Green Mountains. The most convenient point to change from Railroad to Lake Champlain Steamers.

DELAWARE & HUDSON R. R.

THE SHORTEST, QUICKEST AND BEST LINE

Montreal and New York

"It may be questioned whether there is a railway journey in the world, which gives in one day a variety and spiendor of landscape to equal that which is enjoyed by the traveler taking the morning express by this line between Montreal and New York.—Prof. J. Clark Murray, LL. D., in Scottish Review for January, 1802.

INTRODUCTORY.

of of of

ONNECTING the Atlantic seaboard with the great lakes, a continuous railway line, under one management, extends from Portland, Maine, to Chicago, the great metropolis of the West. Crossing and re-crossing the border line between the United States and Canada, serving alike the business and commercial interests of the States and the Dominion, the Grand Trunk Railway System has acquired the title of "The Great In-

ternational Route;" and by reason of the vast extent of territory through which it passes, the important commercial centers it reaches, and its convenient lake, ocean and rail connections, its influence is a power in the transcontinental commerce of the country.

With this feature of its business, however, it is not the purpose of this work to deal. A great railway system, with over four thousand miles of track, must necessarily pass through a diversity of scenery; and it so happens that the GRAND TRUNK territory is most richly endowed in this respect; so much so, indeed, as to have won its added title of the "GREAT TOURIST ROUTE OF AMERICA." That this title is worthily bestowed, will be apparent at a glance at the list of resorts reached by or directly on its lines. Its eastern terminal, the city of Portland, itself a delightful summer resort, has the finest harbor on the Atlantic coast, and the beautiful Casco Bay, of which it forms a part, with its three hundred picturesque islands, is a veritable paradise for summer tourists. Scattered along the entire length of its main line and branches, are resorts of greater or less celebrity, including mountain, lake and urban scenery,

waterfalls, cascades and rapids, some of them widely known, others of comparatively recent celebrity. Of these, the great Cataract of Niagara stands at the head, sald to attract more visitors than any other natural wonder in the world. If to this we add the White Mountains, the Thousand Islands and the Rapids of the St. Lawrence River, Saratoga, Lakes George and Champlain, the Adirondacks, and the beautiful lakes and islands of the Muskoka and Parry Sound districts,—all reached by the Grand Trunk Railway System,—we have a list of summering places beyond which the tourist need not look for variety, as these will meet every desire, whether it be for sight-seeing, fashion, hunting, fishing, or absolute rest.

A tour of the principal cities on the line of the GRAND TRUNK SYSTEM offers more variety and novelty, from the tourist's point of view, than any similar journey on the American Continent. Architecturally, they present the most striking contrasts of the ancient and modern, some of these combined in the same city, as evidence of the march of progress,—the old gradually giving place to the new, but apparently offering stout resistance to its innovations. This is particularly noticeable at quaint old Quebec, one of the most interesting cities in America, with its fortifications, historic reminiscences, and its delightful scenery and surroundings.

This book will attempt to give the reader a brief outline sketch of some of the many attractions offered to the summer tourist by the GRAND TRUNK RAILWAY SYSTEM, dealing with description, illustration, and the more prosaic but no less essential details of routes and rates. The agents of this Company will be pleased to supplement its work by supplying full and complete information as to train service, connections, etc., on application in person or by mail.

HE GRAND TRUNK RAILWAY SYSTEM,

يو يو يو

ERATING under one management, 4,300 miles of track, is one of the most extensive railway properties in the world, extending from Chicago, Ill., to Portland, Me., constituting in fact as well as in name, a "Grand Trunk System," vast in the extent of its territory and mileage, international in the character of its commercial relations, and thoroughly modern in all it appliances for the com-

ort and safety of the traveling public.

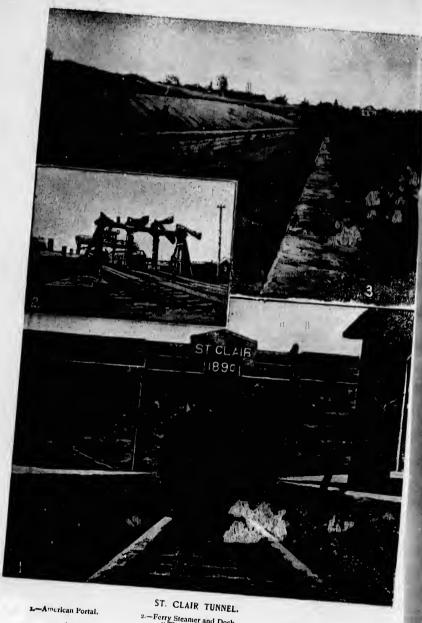

With its oceanic and tide-water terminals at Portland and Quebec and its vestern terminal in the great metropolis of Chicago, the system is readily ccessible from all points.

At Chicago, connection is made from all western points, directly for Port Huron via the famous St. Clair Tunnel, thence extending in a continuous line from the great western metropolis to the Atlantic seaboard. Over this route, from Chicago to Portland, there will be run during the tourist season of 1896, the Finest Passenger Train in the World, to be run as a Weekly Special Limited Pullman Vestibuled Train, solid from Chicago, through to Portland, the beautiful Casco Bay, and the coast of Maine, by the way of Niagara Falls, Thousand Islands, St. Lawrence River, Montreal, and the White Mountains. It is entitled the "Seaside and White Mountains Special," and will be found fully described elsewhere in this work.

At **Detroit**, connection is made with railway lines from the west and south, east to Niagara Falls; also to Port Huron, via the western shore of Lake St. Clair and the St. Clair River. The latter is the only line to **Mt. Clemens**, made celebrated by its mineral springs.

Windsor, opposite Detroit, is a thriving Canadian frontier city, with many attractions as a summer resort. From this point the trains of the Grand Trunk go over the Southern Division to Niagara Falls, via Chatham, an important town of some ten thousand population.

Port Huron is a flourishing city, beautifully situated on the St. Clair River, and having a population of about 25,000. It has an attractive summer resort at Huronia Beach, and is also a place of no little commercial importance, by reason of its manufacturing and shipping interests. It has recently become more widely known as the "tunnel city," from its being the location of the famous

ST. CLAIR TUNNEL.

This marvel of engineering skill and enterprise extends beneath the St. Clair River, connecting Port Huron, Mich., and Sarnia, Ont. It is a tubular tructure, of iron, bolted together in sections in the process of construction, and with its approaches, is two miles in length. Its cost was \$2,700,000. This expenditure seems amply justified when we consider that it entirely overcomes the obstacles presented by a navigable steam, literally alive with commerce during the summer, and often completely blocked with ice in winter. This stream has been called "America's greatest artery of inland commerce," from the fact that the enormous tonnage of the great lakes, and their varied shipping interests, all pass through this channel. It seems especially significant that this tunnel permits the intersection of this great water highway by an equally great railway system, without jeopardizing the international interests which are involved in both, and renders especially significant the title, "the link that blnds two great nations."

Sarnia, Ont. — This flourishing Canadian frontier city has a population of about 6,300, and like its American neighbor across the river, has numerous attractions as a summer resort. Several steamboat lines connect here for lake ports, and shipping interests are prominent factors in the city's prosperity, which is also further enhanced by important manufacturing industries.

EASTWARD FROM THE TUNNEL.

From Sarnia, the line extends eastward to Niagara Falls, through one of the finest sections of Canada, and Pullman and through car service is rendered to New York and Philadelphia, connection being made with eastern lines from Suspension Bridge. The through line for Montreal, Boston and Portland extends from Sarina via Stratford, Toronto, and the St. Lawrence River; also, to the Muskoka and Midland Lakes district, and Georgian Bay, localities which will be more fully described in later pages of this work.

In the route to Niagara Falls, we pass several prosperous towns, among them Wyoming, Watford and Strathroy, and fifty-nine miles from Sarnia, we are at

London, one of the most flourishing cities in the Dominion. It has a population of about 40,000, plenty of good hotels, and many attractions for summer visitors. Like its English prototype, it has its River Thames, and boating is one of the summer recreations. The manufacturing interests cover a wide range of products, and many of them are on an extended scale. London is an important railway center, and its station is always a busy place.

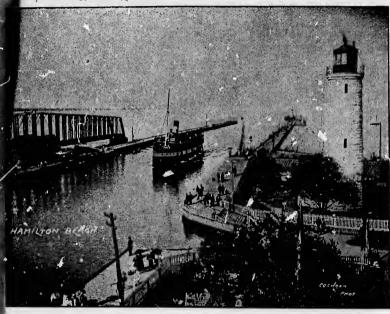

Continuing eastward, we pass Dorchester, Ingersoll and Woodstock, the latter being the crossing of the Georgian Bay & Lake Erie Branch of the GRAND TRUNK SYSTEM. It is a place of no little commercial importance, has a dozen or more hotels, and offers many attractions to touists for a summer sojourn.

each to Tunnel.

Paris is the junction point with the Buffalo & Goderich Branch of the frand Trunk, and has a population of about 3,500. It is an attractive place or tourists, having sulphur springs of recognized curative virtue, as well as icturesque scenery and pleasant drives. Harrisburg, ten miles from Paris, t the junction of the Wellington, Grey & Bruce and Brantford & Tilsonburg ranches of the GRAND TRUNK SYSTEM, is a town of about 300 population.

Dundas Valley. Just before reaching Hamilton, we have a view of one of the most picturesque bits of scenery in Canada. For several miles the road skirts the side of the mountain, at the foot of which lies the village of Dundas, with the valley stretching away at both sides of the town, the view from the train making a panorama of surpassing beauty. The town has a population of about 4,000, and is acquiring some celebrity as a summer resort not only for the beauty of its scenery, but for the mineral springs and baths, three miles distant.

Hamilton is a flourishing city of 50,000 people. It is beautifully situated on Burlington Bay, at the head of Lake Ontario, the streets rising from the shore to the foot of Hamilton mountain, a large portion of the town occupying a level plateau at the base of the highlands which overlook the city. The situation affords a rare combination of beautiful scenery. The lofty elevations, accessible by two inclined railroads, present beautiful views of the bay

Ni

th

Fi

gl

th

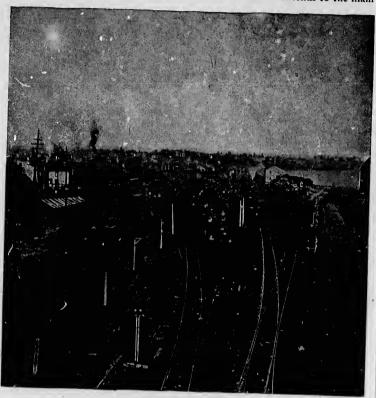

th 50

ta

du we

mi of de Ni ple su Me to ha po wint nin

and lake, with the city in the foreground, bustling with its animated business and manufacturing interests, which are of no small proportions. With its advantages for navigation and railroad facilities combined, the commercial interests of Hamilton are well cared for. The Port Dover Branch of the Grand Trunk extends from Hamilton to Port Dover, forming rail connection between Lake Erie and Lake Ontario; the Toronto Branch extends to the main

line, thirty-eight miles distant, and the Hamilton & Allandale Branch gives railway service to the Muskoka and Georgian Bay region. The railway dining room at Hamilton is one of the best on the line. It is kept by Mr. George Moore, whose efforts to please the public have given the station a fine reputation for the excellence of the cuisine and the courtesy and promptness of the service. The fine illustrations of Hamilton Station and Hamilton Beach, are from photographs kindly furnished by Mr. Cochran, a local artist, whose landscape views are very superior. From Hamilton eastward to

s animated business portions. With its ed, the commercial Branch of the Grand rail connection be-extends to the main

ale Branch gives on. The railway t is kept by Mr. wen the station a lessy and prompton and Hamilton an, a local artist, on eastward to

Niagara Falls, much of our journey lies along the shore of Lake Ontario, in the midst of what has been aptly termed "the garden spot of upper Canada." Fine fruit farms and flourishing vineyards greet the eye, interspersed with glimpses of the lake or bits of charming woodland scenery, with here and there a thrifty village giving evidence of the prosperity of the country through which we are now passing.

Stoney Creek, the first station east of Hamilton, with a population of 500, has a historic reminder in the Stoney Creek battle ground, and a fine beach, for a summer resort. Winona, five miles further, is a small and quiet place, with similar attractions in the way of lake shore resorts, where cottages may be rented for the season. Another five miles, and we are at

Grimsby, with its Grimsby and Victoria Parks, mountain views, and fine fruit farms. The town has a population of about 1,000, and several industries growing out of its fruit interests, such as canning and evaporating works, basket factory, etc.

Beamsville, 206 miles from Windsor, is a town of about 900 people, well known for its extensive stone quarries, the owner, Wm. Gibson, M. P., having supplied much of the stone for the St. Clair Tunnel. Jordan, six miles further east, a small town of about 200 inhabitants, offers the attraction of a twenty-mile lake beach, and the twenty-mile creek falls, eighty feet descent.

St. Catharines, with a population of about 10,500, is the center of the Niagara fruit belt, and an important shipping point. It has mineral wells, pleasant walks and drives, picturesque scenery, and other attractions for summer tourists, together with electric railway connections with Thorold, Merritton and Port Dalhousie. Extensive manufacturing interests contribute to the welfare of the city, including cutlery works, saw factories, paper mills, hair-cloth factories, etc.

Merritton, two miles further east, is a place of some commerical importance, having a population of about 1,800. It is the junction of the Welland Branch of the Grand Trunk System, extending from Port Colborne on Lake Erie to Port Dalhousie on Lake Ontario. Its principal manufacturing interests are paper and pulp, cotton, carriage goods, bent stuff, etc. It is nine miles from Niagara Falls.

NIAGARA FALLS.

* * *

HE greatest natural wonder of the world, as all travelers acknowledge, is the mighty cataract of Niagara, the grandest spectacle on the American continent, if not in the whole world. The waters of the great lakes, on their way to the Atlantic, make a grand plunge, over a precipice one hundred and sixty-four feet in height, and in volume unequaled by any water-

te.

to

ev

an

th wl

fall in the world. Other falls there are of greater height, but the stupendous proportions, the rapid sweep of the current, and the deep gorge through which it flows, all conspire to create a scene of unapproachable sublimity.

To describe Niagara is impossible. The finest writers in the English language are compelled to acknowledge the feebleness of words in attempting to convey to their readers an impression of the grand spectacle. One of the most graceful of modern English writers, Charles Dickens, describes his feelings on first beholding Niagara, in his "American Notes," and probably no description has been more widely read or more frequently quoted. He says: "At length, we alighted; and then for the first time, I heard the mighty rush of water, and felt the ground tremble underneath my feet. The bank is very steep, and was slippery with rain and half-melted ice. I hardly know how I got down, but I was soon at the bottom, and climbing, with two English officers who were crossing and had joined me, over some broken rocks, deafened by the noise, half blinded by the spray, and wet to the skin. We were at the foot of the American Fall. I could see an immense torrent of water tearing headlong down from some great height, but had no idea of shape, or situation, or anything but vague immensity. When we were seated in the little ferry boat, and were crossing the swollen river immediately before the cataracts, I began to feel what it was; but I was in a manner stunned, and unable to comprehend the vastness of the scene. It was not ut til I came on Table Rock, and looked - great Heaven, on what a

fall of bright-green water!—that it came upon me in its full might and majesty. Then, when I felt how near to my Creator I was standing, the first effect, and the enduring one—instant and lasting—of the tremendous spectacle, was Peace. Peace of mind, tranquillity, calm recollections of the dead, great thoughts of eternal rest and happiness; nothing of gloom or

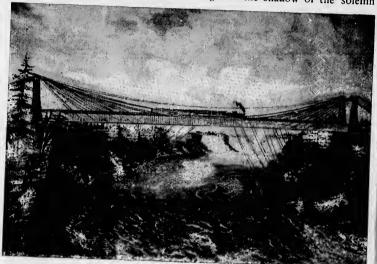

NIAGARA FALLS .- PROSPECT POINT.

terror. Niagara was at once stamped upon my heart, an image of beauty; to remain there changeless and indelible, until its pulses cease to beat forever. Oh, how the strife and trouble of daily life receded from my view, and lessened in the distance, during the ten memorable days we passed on that enchanted ground! What voices spoke from out the thundering water; what faces, faded from the earth, looked out upon me from its gleaming depths; what Heavenly promise glistened in those ungels' tears, the drops of

many hues, that showered around, and twined themselves about the gorgeous arches which the changing rainbows made! . . . To wander to and fro all day, and see the cataracts from all points of view; to stand upon the edge of the great Horseshoe Fall, marking the hurried water gathering strength as it approached the verge, yet seeming, too, to pause before it shot into the gulf below; to gaze from the river's level up at the torrent as it came streaming down; to climb the neighboring heights and watch it through the trees, and see the wreathing water in the rapids hurrying on to take its fearful plunge; to linger in the shadow of the solemn

THE GRAND TRUNK RAILWAY SUSPENSION BRIDGE.

rocks three miles below; watching the river as, stirred by no visible cause, it heaved and eddied and awoke the echoes, being troubled yet, far down beneath the surface, by its giant leap; to have Niagara before me, lighted by the sun and by the moon, red in the day's decline, and gray as evening slowly fell upon it; to look upon it every day, and wake up in the night and hear its ceaseless voice; this was enough. I think in every quiet season now, still do these waters roll and leap and roar and tumble, all day long; still are the rainbows spanning them, a hundred feet below. Still, when the sun is on them, do they shine and glow like molten gold. Still, when the day is gloomy, do they fall like snow, or seem to crumble away like the front of a great chalk cliff or roll down the rock like dense white smoke. But always does the mignty stream appear to die as it comes down, and always from its unfathomable grave arises that tremendous ghost of spray

SUSPENSION BRIDGE TOWER.

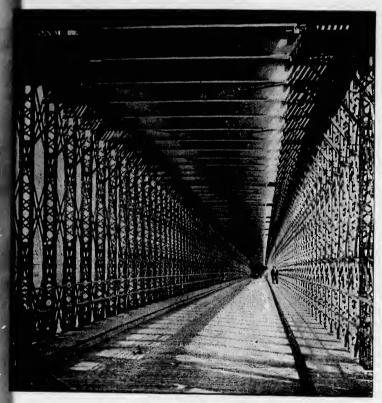

before the deluge—light—came rushing on creation at the word of God."

Since this description was penned, the river below the Falls has been spanned with bridges, hotels have sprung up on either shore, and facilities of approach have been multiplied, affording easy access to the surging throng of visitors from all parts of the world. The governments, of New

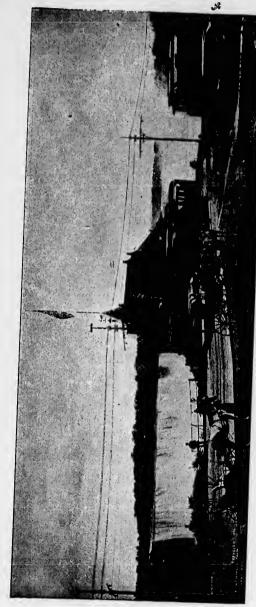

Brid Par Fall Riv paw

ork on the one side and Canada on the other, have won the gratitude of all by wresting from speculators the most desirable points of access, and creating free public parks, enabling the scenery to be enjoyed by visitors ithout the endless clamor for "bucksheesh" in the way of tolls, etc., such formerly characterized this resort.

SUSPENSION BRIDGE ROADWAY.

Prospect Park, on the American side, is reached from Suspension Bridge by electric street railway, landing passengers at the very gate of the Park, while on the Canadian side the finest and most complete view of the Falls and the river can be had from the cars of the NIAGARA FALLS PARK AND RIVER RAILWAY. This finely constructed electric line extends from Chippawa, above the Falls, along the Canadian bank in full view of the Horseshoe and American Falls, passing through Victoria Park and along the margin of

CLIFTON STATION, NIAGARA FALLS PARK AND RIVER RAILWAY.

the river past the rapids, spanning the gorge near the whirlpool, on a viaduct 500 feet long and 135 feet high, and continuing onward to Queenston, opposite Lewiston, N. Y., where the placid waters are reached, and the river commences to expand into Lake Ontario. This new line, twelve miles in length, affords opportunity to see the Falls, and what is of almost equal interest, the gorge, the rapids and the whirlpool below, heretofore unattainable except at large expense for carriage hire, and even then, in many cases, from less desirable points of observation. A similar line on the American shore, but nearer the water, is now nearing completion, and its cars are already in operation, running to Lewiston, and giving the tourist a view of the gorge at shorter range. Both these lines are well patronized, and add to the attractiveness

The Niagara River below the Falls is spanned at this point by Suspension ridge, the property of the Grand Trunk Railway System, and justly ranked one of the great bridges of the world. The height of the railway tracks bove the water is 258 feet. The length of the bridge between towers, 822 feet.

Aside from its scenic attractions, the entire vicinity of Niagara abounds historic lore, as well as ancient tradition less authentic. Indian legends are

connected with almost every point of interest, and stories of border skirmishes and battles more or less sanguinary, some of them of national importance, may be heard from the more intelligent carriage drivers, who combine the office of historian with that coachman, and often possess a fund information worth fully as much as their fare.

The winter views of Niagara are scarcely less charming than those of summer, as the ice bridge, frozen spray, and other features peculiar to the reign of "Jack Frost" combine to render it a scene of gorgeous splendor, especially in the dazzling sunlight.

One has never fully seen Niagara who has not witnessed all her changing moods, at all seasons of the year.

NIAGARA IN WINTER.

expand into Lake Ontario. TORONTO, THE QUEEN CITY.

يل يل يل

FAUTIFULLY situated on the north shore of Lake Ontario, surrounded with lovely natural scenery, ornamented with charming public parks, elegant buildings, and hundreds of church edifices, Toronto has an undoubted right to the title of "The Queen City

f Canada," as well as a good claim to the sub-title of "The City of hurches."

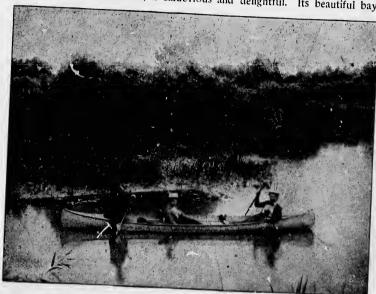

LIBRARY OF TORONTO UNIVERSITY.

The town was founded by Governor Simcoe, in 1794, and was given the name of York, by which title it was known until its incorporation as a city in 1834, when it received the Iroquois name it now bears. At that date it had a population of less than ten thousand, but gave promise of rapid growth, which has been fully realized, inasmuch as competent judges estimate the present population at little if any less than two hundred thousand.

This phenomenal growth is due largely to the energy and public spirit of her people, who have given substantial aid and encouragement to the location of new enterprises, and a hearty welcome to all new-comers, while maintaining an excellent standard of public morals, and a fine educational system, rendering the city a desirable place of residence from both a commercial and social point of view.

As a summer resort, Toronto has many attractions. Its climate, tempered by the lake breezes, is salubrious and delightful. Its beautiful bay,

ON THE HUMBER.

protected by the island from high winds or heavy currents from the lake, affords abundant facilities for aquatic sports, and regattas, carnivals, yachting trips and water excursions of every sort. Multitudes of steamers and ferry boats ply between the city and the pleasant parks and groves in the vicinity, and the pleasure-loving inhabitants and visitors give them abundant patronage. Hanlan's Point is the resort of the masses, and on pleasant days throughout the summer its avenues and walks are thronged with picnic parties and casual visitors. Lorne Park and Long Branch are reached by the Toronto Branch of the Grand Trunk, and are both delightful resorts, the former beautifully laid out, and free to all. Steamers make frequent trips to Long Branch, Victoria Park, and the Humber River.

The city itself is more than ordinarily attractive. Many of its streets are broad and beautifully shaded, adorned with elegant residences and stately

Toronto, the Queen City.

nergy and public spirit of uragement to the location comers, while maintainfine educational system, a both a commercial and

rrents from the lake, as, carnivals, yachting f steamers and ferry groves in the vicinity, and abundant patrond on pleasant days ged with picnic parare reached by the elightful resorts, the ake frequent trips to

Many of its streets esidences and stately

church edifices. Within its limits are many beautiful parks, and its outlying suburbs, in several directions, are magnificent tracts of woodland, laid out in fine drives and broad avenues. High Park, at the western terminus of the Queen Street car line, is a beautiful tract of two hundred acres, with undulating surface and wooded heights. Rosedale, at the northeast, is adorned with fine residences, while Queen's Park, the Horticultural Gardens, and other harming resorts are found in the heart of the city.

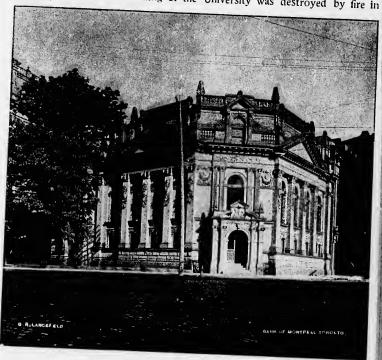

ROSEDALE, TORONTO.

The suggestive title of the "City of Churches" will strike the visitor as exceedingly appropriate, in view of the multiplicity of church structures, representing all denominational interests, and in an endless diversity of architecture. The St. James Cathedral, on King street, is conspicuous by reason of its spire, said to be the highest in America, while a multitude of other costly and imposing edifices greet the eye on every hand.

Toronto is the centre of the public system of education for Ontario, and in its successful workings the people take commendable pride. Educational affairs are placed in charge of a department of the Government, presided over by a Minister of the Crown, responsible to the Legislature. The public schools in Toronto are an index of popular sentiment on this paramount

question of education. The buildings are thoroughly modern, the teachers efficient, and the system the embodiment of the best suggestions. At this writing there are in Toronto 52 public schools, with 475 rooms, accommodating 27,000 pupils. The separate schools carried on under public authority by the Roman Catholics are large and efficient institutions. There are three collegiate institutes, a Normal School for the training of teachers, and the great University of Toronto, the keystone of the educational arch. The beautiful and historic building of the University was destroyed by fire in

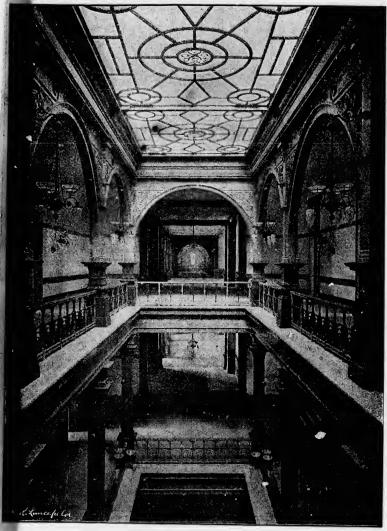

BANK OF MONTREAL, TORONTO.

February, 1890, but through the assistance of the Provincial Government, the City Council, and many liberal friends throughout the country, it has been restored to its former greatness, and now the work is being carried on in a building even better adopted to its needs than ever before. Among the other institutions of learning in the city, maintained by the public, are the Model School and Upper Canada College, the latter an institution of historic interest, and the *alma mater* of some of the most distinguished men Ontario has ever produced. Toronto is also the seat of Trinity University, McMaster

Iniversity, Victoria University, as well as of a number of great colleges filiated with the University of Toronto. There are besides, two Medical chools, a College of Pharmacy, a Veterinary College, a School of Practical cience, two great Colleges of Music, and many other institutions of learning. The Public Library is in truth a public library, maintained wholly and rectly by public funds, and open freely to all classes. It is accommodated a spacious and elegant building, well arranged for the purpose, and has on s shelves, at the present time, something over seventy-five thousand olumes.

TORONTO PUBLIC LIBRARY.

The Board of Trade <u>Building</u>, elegant in its architecture, is a fitting illustration of the city's commercial enterprise. This element of Toronto's prosperity is well set forth in the remark of a Chicago business man who was asked his impressions of Toronto, to which he replied, in words more forcible than elegant, "Well, she is business from the word go."

In addition to being the leading business and educational centre in Canada, Toronto is also the seat of government for the Province of Ontario, and the new Parliament Building, in the Queen's Park, opened April, 1893, for the first time, is abundant evidence of the prospericy of the Province and the importance of the city. This building is the most interesting feature in a city already more than usually attractive, and it is claimed that it is one of the finest structures in Canada, and is excelled by few on this continent. About \$1,500,000 have been expended in its erection, and it has been some five years in building. Although everything connected with it is the best obtainable,

ONTO.

and the Legislative Chamber and Members' Library are perfect models of richness and beauty, experts say it is the cheapest building of its kind ever erected in America. Its erection has evidently been free from the corruption and "jobbery" which so frequently attend the construction of public buildings.

The new Union Station is one of the finest in the Dominion, and equaled by few passenger stations in America. Architecturally it is an ornament to the city, and in the arrangement of its waiting rooms, offices, train sheds, etc., it is a credit to all concerned.

Toronto is also a favorite point for excursions and summer tours. The trip across Lake by steamer, and thence by rail to Niagara Falls, is one which meets when each favor among summer visitors, and is comparatively inexpensive. The Richelieu & Ontario Navigation Co. also make this the starting point for the St. Lawrence River trip to Montreal, Quebec and the Saguenay River, complete illustrated descriptions of which localities will be found elsewhere in this publication, with their attractions specifically set forth.

Trains for the Muskoka and Midland Lakes district and Georgian Bay also start from Toronto, and their locations will be found more fully described in later pages of this work.

THE BAY OF QUINTE.

This delightful resort, in the immediate vicinity of the Thousand Islands, is deservedly becoming more widely known as its numerous attractions present themselves to the yearly increasing throngs of visitors. A tourist who has enjoyed a visit to this famous resort, thus describes the trip:—

The steamer leaves Kingston every week day for the head of the Bay at 3:30 p. m., and returns next morning in time to connect with diverging railroad and steamboat lines for all points. Leaving Kingston, we pass close to the shore, and obtain views of the new government dry dock, the Provincial Penitentiary, and Rockwood Asylum for the Insane, Canada's largest institutions of their kind. Seven miles from our starting point we pass three small islands, known as "The Brothers," among which bass abound.

The first call is made at the village of Stella, then at the village of Bath, where was built the first steamboat that plied the waters of Lake Ontario. Following the main shore west, we come to Fredericksburg, opposite which is Prinyer's Cove, a famous fishing-ground, while three miles northward, across country, brings us to Hay Bay, where some of the best muskallonge and bass fishing, as well as duck shooting, can be had.

From this point west the shores become bolder and the channel narrower, offering the greatest variety of scenery the most artistic eye could desire, the well-wooded dells, the high and rocky bluffs throwing their deep shadows over the placid waters of the Bay as our vessel glides swiftly on. Rounding two small islands, called the "Twin Sisters," a call is made at Adolphustown. This spot is interesting as being the landing place of the

nd the channel narst artistic eye could throwing their deep sel glides swiftly on. " a call is made at anding place of the nited Empire Loyalists who, at the close of the war separating the Amerian Colonies from Great Britain, settled in this portion of Canada, naming townships about them after the members of the reigning family of eorge IV, viz., Marysburg, Sophiasburg, Ameliasburg, Fredericksburg, dolphustown and Ernestown. A monument and two memorial churches are been erected to the memory of those brave people.

Four miles further on, on the south shore, is Glenora, at the foot of a igh mountain, on top of which is found a charming little lake, not more

FIVE MILES BELOW GANANOQUE.

than a stone's throw from the edge of the cliff, with no apparent inlet or outlet, the theory being that, as it is on the same level as Lake Erie, it is fed by subterranean streams. Turning northward, the visitor is astonished with the delightful panorama of nature which is exposed to view. Not only can he see the channel of the Bay he has just passed through, but four others spreading out like the thumb and fingers of an open hand; and it is from this natural formation that the Bay derives its name, "Quinte." Directly opposite Glenora is Davy's Island, the vicinity of which is celebrated for its muskallonge.

Following the thumb of this watery "hand," we come to the town of Picton, a description of which can be given in one word, picturesque. A short drive of ten miles, almost the entire distance through an avenue, brings the tourist to the Sand Banks, a great natural curiosity, being mounds of the finest white sand, driven in by the wind and waves of Lake Ontario.

To proceed with our trip from Picton, the steamer is obliged to turn completely around, and retrace her course down the thumb and up the fore-finger of the open hand, so to speak, passing through the "Long Reach," a narrow channel whose high and precipitous banks resemble very closely the palisades of the Hudson River, until Deseronto is reached, a thrifty and prosperous town, having large manufacturing and shipping interests. This place was formerly called "Indian Woods," it being the reservation of the Mohawk Indians. Here an abrupt turn in the Bay to the west is made, the steamer passing many points of interest, and soon Sanguin Bay stretches to the left a little further on, and affords excellent fishing, being situated in close proximity to Massasaga Park, where good hotel accommodations are always afforded. A few miles further on we find ourselves entering the harbor of Belleville, "The City of the Bay," a city of magnificent churches, shady streets, and handsome residences. Here the steamer ties up for the night, to await her return voyage the following morning.

Parties can here take the Steamer North King, a splendid lake vessel of the same ownership, which traverses the few remaining miles of the Bay, passing Trenton, a lumbering town, and proceeding on through the Murray Canal, connecting the waters of the Bay with Lake Ontario. Fifty miles of rapid steaming across this inland sea brings the vessel to Charlotte, port of Rochester, N. Y. The trip just completed by the Steamer North King is a weekly occurrence. Leaving Charlotte every Saturday at 4 P. M., she crosses Lake Ontario, through the Bay of Quinte, to Kingston, arriving 10 A. M. Sunday morning, from which place during July and August her cruise is continued among the Thousand Islands, taking in both the Canadian and American channels, remaining at Alexandria Bay several hours, and returning by the same route to Rochester, arriving there Monday morning.

THE RIVER ST. LAWRENCE.

OT so wide as the Amazon, nor as long as the Mississippi, not so famous for historic traditions as the Hudson, nor for ruined castles as the Rhine, yet the St. Lawrence is more attractive to the tourist than either, and suffers by comparison with neither nor all of them. As the channel through which all the waters of the great lakes find their way to the ocean, it could not be otherwise than majestic, and being navigable its entire length, it presents unusual attractions and delightful contrasts to the voyager who takes a daylight trip

Leaving Niagara Falls in the early even-

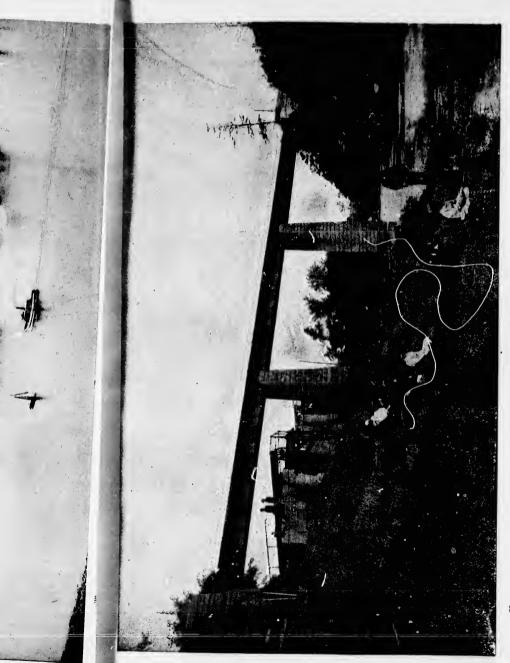

among its charming scenery.

ing, the tourist arrives at Kingston Wharf in the morning, where the boats of the Richelieu & Ontario Navigation Company are in waiting to receive such of the passengers as may choose to continue their journey by water. On alighting from the train, the broad expanse of water, and the pleasant situation of the village of Kingston, form a most refreshing picture. Our artist has happily reproduced a charming view, as shown on the following page, which is but one of a succession of delights, as the very inception of the voyage brings us into the midst of the wonderful archipelago.

The vicinity of Kingston abounds in lovely scenery, and the onward journey by rail is scarcely less attractive than the trip by steamer. The railway crosses numerous streams, which empty into the St. Lawrence, and occasionally a charming bit of scenery is presented to the view of the observant traveler, as the train dashes through some lovely glen or skirts the shore of some quiet lake. Our artist has selected a sample view, where the railway crosses the Rideau River, on the occasion of a quiet picnic and fishing party.

The steamers of the Richelieu & Ontario Navigation Company have been much improved for the passenger service, which is largely increased between Kingston and Montreal during the season of summer travel. The trip occupies the entire day, and from its inception at Kingston wharf to the landing at the dock in Montreal, is a succession of changing delights, embracing a panorama of shifting scenery in endless variety.

ON THE RIDEAU RIVER, NEAR KINGSTON.

As the lake begins to contract to a river, it would seem as though the land disputed its onward progress, and in the struggle for supremacy the resistless current has broken the firm earth into a thousand fragments, some larger, some smaller, which vainly endeavor to entangle the waters in their downward course to the sea. A more picturesque river archipelago probably nowhere exists, and while much has been written in its praise, the attractions of the locality have never been overdrawn, nor can they be fully described.

ON THE ST. LAWRENCE NEAR KINGSTON.

The islands number more nearly two thousand than one, and are of every conceivable size, shape and appearance, from the merest dot on the water to an extensive tract of many acres. "At times the steamer passes so close to these islands that a pebble might be cast on their shore; while looking ahead, it appears as though further progress were effectually barred. Approaching the threatening shores, a channel suddenly appears, and you are whirled into a magnificent amphitheatre of lake that is, to all appearance, bounded by an immense green bank. At your approach the mass is moved as if by magic, and a hundred little isles appear in its place."

seem as though the resupremacy the reid fragments, some the waters in their chipelago probably tise, the attractions be fully described.

d are of every in the water to es so close to ooking ahead, Approaching whirled into ounded by an if by magic, As the journey progresses, the vision is greeted, not by castles in ruins, as in a tour of the Rhine, but by the view of castellated towers in modern architecture, in a most comfortable state of repair, being the summer homes of some of America's celebrities. These may be less picturesque than cruin-

bling ruins, but are exceedingly suggestive of ease and luxury, for which this locality is celebrated. Nor is this comfort confined to castles, as evidenced by the less pretentious summer villas, and the tiny cottages which nestle here and there along the shores, while an occasional tent gives indication that camp life here presents its attractions to those who are disposed to "rough it" for the sake of a temporary sojourn in this health-giving climate.

It will readily be seen that, aside from its popularity as a watering place, this resort has more than ordinary attractions for the artist, who here finds abundant material in nature for summer sketching to adorn many a canvas in his winter work.

The first landing made after leaving Kingston is on the New York shore at Clayton, a flourishing town of some commercial importance, and quite a popular summer resort. Passing several large islands, on one of which is the celebrated Thousand Island Park, Alexandria Bay is reached, also

amo other mal-ness like ...is was islar isle and his I Deit

ing .

n the New York shore. This is one of the most widely known of summer reorts, and has been aptly termed the "Saratoga of the St. Lawrence." Its hotels nd villas are elegant and commodious, and here in the immediate vicinity may e found some of the finest residences on the river. The islands adjacent are otted with cottages, perched upon rocky bluffs, or nestling in some beautiul cove, springing into view as if by magic as the boat rounds a curve, or ssuming shape and proportions as a nearer approach separates them from he rock of which they seem a part. Some of the islands "are bristling with irs and pines, others lie open and level like a field awaiting the husbandman's are. Some are but an arid rock, as wild and picturesque as those seen

among the Faro Islands; others have a group of trees or a solitary pine, and others bear a crown of flowers or a little hillock of verdure like a dome of malachite, among which the river slowly glides, embracing with equal fondness the great and the small, now receding afar and now retracing its course, like the good patriarch visiting his domains, or like the god Proteus counting his snowy flocks. In the old Indian days this beautiful extent of the river was called Manatoana, or Garden of the Great Spirit, and well might the islands, when covered with thick forests, the deer swimming from wooded isle to wooded isle, and each little lily-padded bay nestling in among the hills and bluffs of the island, and teeming with water fowl, seem to the Indian in his half-poetic mood like some beautiful region dedicated to his Supreme Deit."

The locality is also a favorite resort for sportsmen, as the hunting, fishing and boating facilities are excellent. Many fine yachts are kept by the

summer residents, and with a "favoring breeze" the white-winged craft will often be seen skimming over the broad expanses of water in trials of speed.

The last of the Thousand Islands are called "The Three Sisters," from their proximity and resemblance to each other. They are nearly opposite Brockville on the Canadian shore and Morristown on the New York side, the two towns being directly opposite each other. The former was named after General Brock, and has received the title of the "Queen City of the St. Lawrence." Its glittering towers and church spires give it an appearance of splendor, which the tourist will observe as a peculiarity of the Canadian cities to be seen in his trip, the metal with which they are covered retaining its brightness in a remarkable degree, owing to the pure and dry atmosphere.

Ogdensburg and Prescott, also on opposite shores, are passed in our trip, then Massena Landing, and we begin the approach to the famous rapids of the St. Lawrence.

While the current has, in many stages of our journey thus far, been swift, the smoothness of the water has given no suggestion of the speed which is imparted to the steamer. The first rapids, the Gallopes, and the du Plat, are comparatively unimportant, and the enthusiasm and excitement of the passengers are not fully aroused until the arrival at the Long Sault. These are nine miles in length, divided in their center by several islands, forming two channels, both of which are navigable. The scenery in the passage of these rapids is grand and beautiful. The surging waters, in their onward rush, are here and there thrown into wild commotion like the ocean in a storm, while occasionally a line of breakers reminds one of a dangerous

te-winged craft will r in trials of speed. Three Sisters," from the nearly opposite New York side, the er was named after ity of the St. Lawan appearance of y of the Canadian covered retaining d dry atmosphere.

passed in our famous rapids

thus far, been n of the speed pes, and the du excitement of the Long Sault. I islands, formin the passage their onward the ocean in a a dangerous

reef at sea. The steady, onward motion of the boat, guided by the keen eye and unfaltering arm of the trusty pilot, gives exhilaration and zest to the trip, and awakens the keenest interest of the passengers. Occasionally a raft will be passed, with a crew of adventurous lumbermen struggling with the current, or singing merrily as they glide along, apparently regardless of the hardships of their voyage. Scattering logs, held by a projecting rock, or lodged along the shores, attest the fate of some raft which has preceded them, but still the precarious ventures are made, and with less fatality than would be imagined, as we see their frail craft whirled hither and thither by the seething river. The upward journey around these rapids is by means of the Cornwall canal, eleven and one-half miles in length. At the lower end of

R. & O. STEAMER SHOOTING LACHINE RAPIDS.

the Long Sault Rapids, the currents from the two channels unite, meeting with no little violence, forming what is called "the big pitch."

Below the Long Sault, the river expands into a lake, five and a half miles wide and twenty-five miles long, known as Lake St. Francis. The ride over its placid surface, past its many little islands, forms a notable contrast with the previous descent of the rapids, and serves to prepare for the next tumultuous rush through the eleven miles of Coteau, Cedars and Cascades, three sections thus named, of almost continuous descent. The Cedars are also called Split Rock, from a prominent feature in the channel. The Cascades are thus named from their resemblance to a series of short, leaping falls. Passing the Cascades, the river again expands, forming Lake St. Louis, which receives the waters of the Ottawa River, and is twelve miles long by six miles wide. We here get a glimpse of Mount Royal, twenty-seven miles distant,

and the ride through the lake is another stretch of tranquil sailing, a fitting preparation for the tumultuous passage of the Lachine Rapids. On the way we pass Nun's Island, a high mound of peculiar shape, near the mouth of Chateaugay River, belonging to the Grey Nunnery, in Montreal. Other islands are also to be seen, diversifying the view, and rendering the scenery attractively picturesque.

As the banks of the lake again approach each other, the quickening current indicates the proximity of the famous Lachine Rapids. Eager expectation dispels any indifference begotten of the quietness of the previous hour,

and the passengers seek available positions for observation. Just ahead, the waters of the river are lashed into foam, and here and there the spray is thrown high in air, as the current dashes against a rock, and eddies and circles in miniature whirlpools, or leaps over the obstruction as if in angry defiance of the attempt to check its mad career. The boat settles as she glides over the rapids, only to settle again at the next descent, instead of riding on the crest of the wave, being in this respect unlike the motion of a vessel at sea. The sensation is a novel one, and when experienced for the first time, the passenger is likely to hold his breath involuntarily until accustomed to the motion. Steam is shut off, and the boat is propelled solely by

anquil sailing, a fitting Rapids. On the way be, near the mouth of in Montreal. Other rendering the scenery

he force of the current. The devious windings of the channel compel the losest attention of the men at the wheel; and as an additional safeguard, he tiller at the stern is manned by an adequate force, and for the supreme noment all attention is given to the course of the steamer. The more timid mong the passengers glance alternately at the foaming waters and at the warthy giants at the wheel, realizing, if never before, the all-important neaning of the term, "trusty pilot." The intrepid nerve and skill required o navigate a rowboat through this tortuous channel is well exhibited in the llustration on the preceding page. This feat was successfully accomplished

VICTORIA BRIDGE.

by Col. Bond, of Montreal, in company with a friend, under the guidance of the intrepid Indian chief, "Big John," with two of his trusty oarsmen.

In our view on this page, showing a section of Victoria Bridge, made from an instantaneous photograph, it will be seen that a lumber raft, with all its belongings, has successfully made the perilous run of the rapids, and is still intact. To the hardy lumbermen who make these trips, the work partakes more of hard labor than of novelty; but to the occasional passenger, who "tempts Providence" by venturing the passage, it affords an experience full of startling sensations, and thronged with memories not soon forgotten.

After passing the Lachine Rapids, the river widens again, and a turn in the channel reveals ahead of us the famous Victoria Bridge, under which we glide, and are soon at our wharf in Montreal, at the close of a day that has been filled with a succession of delights, unapproachable in a day's experience elsewhere on the American Continent.

MONTREAL AND VICINITY.

st st st

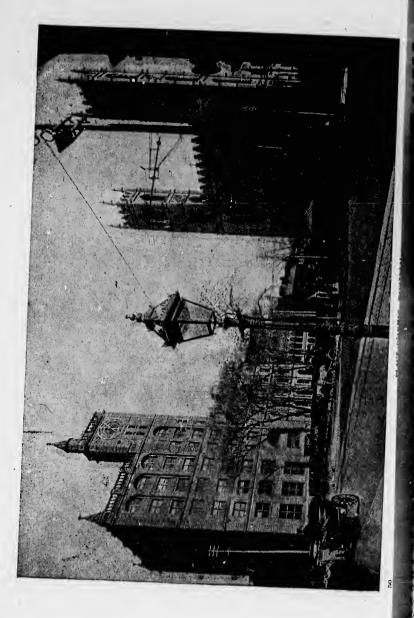

THE commercial metropolis of the Dominion of Canada, it will readily be seen that Montreal takes rank as the chief city of British North America. While this fact contributes largely to its interest and attractiveness to the tourist, its beautiful location, its charm-

ing surroundings, and the delightful contrasts of ancient and modern art and architecture presented to the observer, all conspire to render a visit to the place an event of rare interest.

The approach by the river presents a picture surpassingly beautiful. The solid stone piers and massive warehouses in the foreground, the

right-roofed buildings and glistening church spires in the middle distance. with the noble Mount Royal in the background, delight the artistic sense, nd inspire emotions of the keenest pleasure. Viewed from the mountain tself, the picture, while totally different, is none the less attractive. The field of view is greatly extended, and the eye takes in a grand panorama of river and mountain scenery, with the city below in near perspective. Almost at your feet, and excavated from the solid rock in the side of the mountain, is the storage reservoir of the city water works. Farther down, and sloping away from the foot of the mountain, the streets of the city intersect each other, adorned with public and private buildings, and beautifully shaded with trees and foliage. As far as the vision extends to the right and left, the sparkling waters of the St. Lawrence are to be seen, a throbbing artery of inland commerce, dotted with shipping, while the distant background is made up of mountain ranges, some of which are in Canada, while dimly outlined on the horizon are the peaks of the Green Mountains of Vermont.

A brief sketch of the city, in this connection, will be of interest to the general reader. It is situated on an island of the same name, about thirty miles long and ten miles wide, formed by a branch of the Ottawa on the north, and the St. Lawrence on the south. It is at the head of ocean navigation, and its port may be said to form the connecting link between this

lave ntion arm e isle e "g the e cli the ect from the read The read red in a lotre is two eet level hime other ower leriors

nch of commerce and that of the great lakes and rivers. Its commercial ortance will thus be apparent at a glance. It occupies the site of an an village, named Hochelaga, which was visited by Jacques Cartier, in 5, and seven years later Europeans began to settle here. A century later place was duly consecrated, and commended to the "Queen of the

A MONTREAL RESIDENCE.

Angels," and named Ville-Marie. Cartier had given to the mountain the name of Mount Royal, from which the present title of the city is derived.

To see the city at its best, the services of a "carter" should be secured. These hackmen are to be found in all quarters of the city, and as their tariff is regulated

law, the traveler can govern his riding by his inclination, with no contions at the end of the journey. The drives in and about the city are arming. The roads are macadanized for miles in every direction, and as e island is remarkable for its fertility, the suburban trips are made amidst e "garden of Canada." The ride around the mountain, and to its summit the easy grade of its carriage road, brings to view some beautiful scenery,

e climax of which the glorious prosct from the top, to hich allusion has ready been made.

The public buildngs of the city, otably its churches, re of more than rdinary interest. lotre Dame, with ts twin towers 220 eet high, one of which contains a hime of bells, the

other the monster "Gros Bourdon," will repay a visit, and the climb to the ower will be rewarded with a grand view. Other churches present rich interiors, adorned with fine paintings and statuary, while numerous hospitals,

market buildings and business edifices will attract attention in the rithrough the city. The water works, with its reservoir on the mountain side and the public parks and parade grounds, are also worthy of notice. Be among all the objects of interest, conspicuous both as a feature of the landscape and for the magnitude of its conception, is the famous tubustic VICTORIA BRIDGE, which crosses the St. Lawrence, and connects the islamby rail with the south shore. It is the property of the Grand Trunk Raway, and cost more than six millions of dollars. With its approaches, it nearly two miles in length, and rests upon twenty-four piers of solid mason besides the abutments. The center span is 330 feet wide, and the center turns.

NEW BONAVENTURE STATION, G. T. RY.

is 60 feet above the water. It is, altogether, a splendid triumph of engineer ing skill, and a credit to the company it so grandly serves. The new railway station of the same company, shown above, is a model of convenience, and an ornament to the city. Its comfortable waiting rooms, for both first and second-class passengers, are spacious and convenient. An elegant dining hall, serving meals and lunches at all hours, is kept in connection.

Aside from the charming scenery in and about Montreal, several delightful side trips furnish attractions to the tourist with time at his disposal If his approach to the city has not been made by way of the rapids, a pleasemnar

ANCIENT QUEBEC.

ي يل يل

CITY on the American continent presents such peculiar attractions to the tourist as does the ancient walled city of Quebec. It is a locality of much historic interest, and no less pleasing for its scenlc beauty. Thousands of tourists visit the city in the season of summer travel, on their way to the famous Saguenay River, or the equally famous White Mountain resorts. No tourist who has the time at his disposal should fail to make the trip, either by rail or boat, or a combination of both, facilities for which are at his command. The route from Montreal to Quebec is via the Grand Trunk Railway, or by the Richelieu & Ontario Steamship Line via the St. Lawrence, as the tourist's inclination may lead.

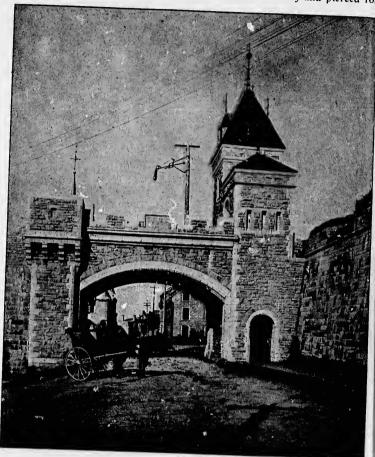

The view of the city as ap-

proached from the river, is singularly impressive, its situation and surroundings making it an object of striking interest. The fortifications, with their towers and battlements, frown upon you from the Plains of Abraham and from the lower town, and there surrounds the place an air of mediævalism at once novel and attractive. It is one of the oldest cities of America, as well as one of the most interesting. It was founded in 1608, and its history is replete with events of tremendous importance. The scene of many a battle and of untold carnage, the crowning event of all was the memorable engagement which transferred half a continent from France to Great Britain, and

immortalized the names of both the victor and the vanquished.

The city consists of two divisions, known as the upper and lower town. The upper town includes within its limits the Citadel of Cape Diamond, which covers the entire summit of the promontory, embracing an area of more than forty acres. It rises to the height of 345 feet above the river, and from its commanding position and the strength of the fortification, has been not inaptly entitled the "Gibraltar of America."

The shape of the city is triangular, the St. Lawrence and St. Charles rivers forming the two sides, with the Plains of Abraham for the base. The river fronts are defended by a continuous wall on the very brow of the cliff, with flanking towers and bastions, loopholed for musketry and pierced for

KENT GATE, QUEBEC.

cannon. On the west side, a heavy triple wall, with trenches between, formerly guarded that approach, but much of it is now demolished.

The nationality of the inhabitants is strongly French, and a visitor from the States can easily fancy himself in a city in France, so decidedly un-

mer treet se (treto ive a nore

nes between, forshed. nd a visitor from so decidedly unmerican are all his surroundings. The quaint houses, the steep and tortuous treets, especially of the oldest portions of the city, and the almost universal se of the French language in the ordinary channels of trade, require no tretch of the imagination to practically transport one to the old world, and twe a glimpse, as it were, of a foreign country. This characteristic is even nore marked in the suburbs of the city, being emphasized by the primitive nethods of agriculture, and the women in the fields. The view from the litadel, owing to its elevation, is surpassingly grand and comprehensive. The majestic St. Lawrence, alive with sailing craft of every kind, stretches

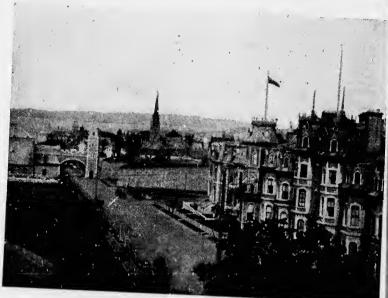

VIEW FROM THE FORTIFICATION.

before the vision in both directions, seeming like a band of glistening metal, beautifying the scene and giving animation to the picture. Directly below lie the crooked streets of the lower town, teeming with humanity, while its busy population, so far beneath, seem like pigmies, and you look upon the glistening roofs of the houses and down the very throats of the chimneys, into which it would seem an easy matter to toss a pebble. Looking to the eastward, the Plains of Abraham are spread out before you, together with the bluffs scaled by Wolfe and his brave soldiers in the preparation for the assault that ended in victory, but cost the lives of both commanders. The spot where Wolfe fell is marked by a handsome monument. Directly across the river is the settlement of Point Levi, and down the stream the beautiful

FABRIQUE STREET, LOOKING TOWARD BEAUPORT.

GRAND ALLEE AND ST. LOUIS GATE.

Isle of Orleans may be seen. This pleasant resort may be reached by ferry from the city, and it affords delightful drives, giving views of the Falls of Montmorenci, the Laurentian Mountains, and other objects of interest.

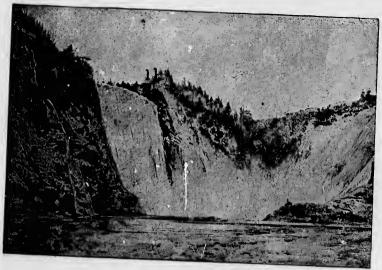

ORT.

WOLFE'S MONUMENT, QUEBEC.

The Falls of Montmorenci are among the most interesting of the objects which secure the visits of tourists to Quebec, both on account of their own attractiveness and the pleasant drive by which they are reached. The "car-

ters" of Quebec are as numerous as those of Montreal, and the roads around the city and in the country adjacent are among the finest to be found anywhere. The ride of eight miles all too quickly brings you to the River Montmorenci, and here you gaze upon historical ground, it being the scene of the battle of Montmorenci, which immediately preceded Wolfe's final victory at Quebec. Leaving your carriage, and paying a small fee for the privilege of crossing private grounds, you descend the bank of the river to look up at the fall from below. The river here pours over the cliff into the St. Lawrence, broadening at the edge to about 50 feet, and falling 250 feet, in a sheeny vail, half water, half spray, not sublime, nor even grand, but exquisitely beautiful.

FALLS OF MONTMORENCI.

The falls may also be reached by the trains of the Quebec, Montmorenci & Charlevoix Railway, the trains passing directly in front, and the round trip from Quebec being one of the features of the excursion season.

Returning to Quebec, the views of the city are enlivened by the peculiar feature of glistening towers and roofs, so noticeable in connection with many Canadian cities. The sunlight, glancing from the metal-covered roofs, spires, and dormer windows, which owing to the tortuous windings of the streets, are set at every conceivable angle, produces a sparkling effect. The road leads through quaint old hamlets, and the cottages with their picturesque dormer-windows, the thatched-roofed outbuildings, and the peasant-like appearance of the people, almost leads one to fancy that the rural districts of France or Switzerland are the scenes through which the trip is made.

the peculiar nection with overed roofs, dings of the effect. The their picturathe peasantale rural distription is made.

THE SAGUENAY RIVER.

st st st

HIS is the largest affluent of the St. Lawrence, which it joins about 130 miles below Quebec. The scenery of the Saguenay is strikingly grand and romantic, and unlike anything else east of the Rocky Mountains. It is usually visited by boat, and the trip down the St. Lawrence to Tadousac, at the junction of the two streams, and up the Saguenay, among its wild scenery, should be made, even at the expense of slighting of fashionable travel. Leaving Quebec by the steamers of the Richelieu & Ontario Navigation Co., you pass

through some remarkably fine scenery, in which the noble St. Lawrence abounds, the river being in some places thirty miles in width, and dotted with a multitude of islands, abounding in game. The Falls of St. Anne are on the river of that name, which enters the St. Lawrence off the lower end of Orleans Island, through a bold ravine. The quarantine station on Grosse Isle is passed, and is associated with sad memories of the famine in Ireland. It received twenty thousand plague-stricken emigrants, of whom six thousand now lie in a single grave, marked by a stone monument.

Ninety miles below Quebec is the fashionable watering place known as Murray Bay. The river is here twenty miles wide, and the tides have a range of twenty feet in height. On the south shore of the river, still further down, is Riviere, du Loup, a place of some importance, and six miles below it is Cacouna, already quite famous as a pleasure resort, and yearly increasing in popularity. Across the river from Cacouna is Tadousac, at the mouth of the far-famed Saguenay, formerly a place of some commercial importance as a post of the Hudson Bay Company, and one of the first towns on the St. Lawrence fortified by the French. It has a good hotel, near which is a little church over 250 years old.

The Saguenay River is remarkable, not only for its great depth, but also for the marvelous height of its banks. It seems to flow through a rift in the Laurentian Mountains, which appear to be cleft, as it were, to the very foundations, the height of the cliffs rising from the edge of the river being equaled only by the depth to which they descend below the surface. The source of the river is 130 miles from its junction with the St. Lawrence, in Lake St.

John, which is fed by eleven rivers, draining an immense watershed, the great volume resultant pouring through this remarkable gorge, in many places un-

fatho mile a At th tinels the w h wide, have the n

and for such Bay a very mark seaso the such being its in almost thus a

fathomable. At St. John's Bay, 27 miles above Tadousac, the water is one mile and a half in depth, and but little less at Eternity Bay, six miles beyond. At the latter place, the wonderful capes, Trinity and Eternity, like giant seninels guard the entrance, rising 1,500 feet and 1,900 feet, respectively, above he water.

Ha-Ha Bay is sixty miles above Tadousac, and is nine miles long by six wide. It has also been named Grand Bay. The first-named title is said to have come from the exclamations or delight which sprung from the lips of the navigators of the river on its discovery; and in contrast with the gloomy

TADOUSAC BAY, SAGUENAY RIVER.

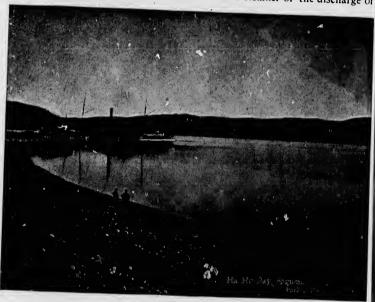

and forbidding aspect of the lower portions of the river, it would seem that such an outburst might be perfectly natural. The mountains around Ha-Ha Bay abound in whortleberries, or blueberries, as they are here called, and a very important industry with the natives is the gathering and shipment to market of the bountiful harvest thus kindly furnished by nature, the picking season extending from the middle of July until the falling of the snow, and the supply being inexhaustible.

Chicoutimi, a few miles beyond, is at the head of navigation, the river being obstructed beyond this point by rapids and falls. Lumbering is one of its important industries, the immense forests of the vicinity being as yet almost in their virgin state, and the harbor accessible to the largest vessels, thus giving it natural facilities of great value.

3

The fishing in the Saguenay River and its tributaries is one of the chief attractions to the sportsman. Salmon abound, and the quality of the fish taken from such deep, cold water can readily be inferred by the disciples of Walton. Game also abounds in the forests, some specimens being well worthy of the skill and nerve of the trained Funter. Those to whom the hunting grounds of the more densely populated sections of country have become tame and uninteresting will here find novelty, with an occasional spice of genuine excitement.

An interesting feature of Trinity Bay, inclosed as it is with frowning walls, is its wonderful echo. The whistle of the steamer or the discharge of

HA-HA BAY, SAGUENAY RIVER.

a cannon is the usual test of its powers of repetition. On the occasion of the visit of the Prince of Wales and his suite, a heavy 68-pounder was fired from the deck, near Cape Trinity. The result is thus described by one of the party: "For the space of half a minute or so after the discharge there was a dead silence, and then, as if the report and concussion were hurled back upon the decks, the echoes came down crash upon crash. It seemed as if the rocks and crags had all sprung into life under the tremendous din, and as if each was firing 68-pounders full upon us, in sharp, crashing volleys, till at last they grew hoarser and hoarser in their anger, and retreated, belowing slowly, carrying the tale of invaded solitude from hill to hill, till all the distant mountains seemed to war and groan at the intrusion."

the occasion of ounder was fired cribed by one of discharge there sion were hurled sh. It seemed as nendous din, and crashing volleys, d retreated, belll to hill, till all ion."

But we must take a regretful leave c? the Saguenay, with the feeling that ut faint justice can be done to its wonderful attractions. It has been rsely described by a writer as a "region of primeval grandeur, where art as done nothing and nature everything; where, at a single bound, civilizaon is left behind, and nature stands in unadorned majesty; where Alps on lps arise; where, over depths unfathomable, through mountain gorges, the eamer plows the dark flood on which no sign of animal life appears." A etter summing up of its peculiar features, in so few words, it would be diffiilt to find, and the tourist who visits the locality will have no occasion for grets, unless it

CHICOUTIMI, SAGUENAY RIVER.

Among the ttractive trips to e made from uebec is that to

lances where ours and days

ublimity and randeur of the cality.

ake St. John. The trains of the Quebec & Lake St. John Railway traverse a rtile section of the country, interspersed with wild forest scenery, and quaint amlets and Indian settlements. The lake is 190 miles from Quebec, and is the argest in the Province. It is the source of the famous Saguenay River, and is ed by several large streams. Its waters abound in fish, comprising fresh water almon, pickerel, pike, trout, cusk, perch, dace, etc. The village of Roberval, n the shore of the lake, is becoming famous as a summer resort, and has a ommodious hotel, of excellent repute.

The scenery of the Lake of St. John region is peculiarly impressive, and then to this attraction is added the abundance of fish and game, it is not to e wondered at that the locality is every year becoming more widely known nd more extensively visited by tourists, especially by those who desire to tudy nature in her wilder moods. This lake, and its tributary waters, are he home of the ounaniche, or fresh-water salmon, the gamiest fish that ever ested the skill of the angler. From early in June to late in September, the nost exciting sport is to be had here, and the followers of Walton come rom all parts of the country to match their skill against his prowess. When aptured, the game is well worth the conquest, its flesh being considered uperior to that of the ordinary salmon. The tributary streams abound in potted trout, many of which are of large size, weighing from ten to fourteen

pou able regis

ids, to (Ken rapi of aror sho ciali pete

> Rob of t 300 bath the a lo run well thor

on 7 stea and mad afte: train Bay

by s

pounds each. The forests afford noble sport for the huntsman, who will be able to test his marksmanship on bears and other large game. In short the region is a veritable sportsman's paradise, and well worthy a visit from the lover of the rod and gun.

A favorite sport with the more venturesome is that of shooting the rapids, which are numerous on the streams flowing into the lake. The descent to Chicoutimi by canoe, through the Belle Riviere and Lakes Kenogami and Kenogamichiche, is a grand trip, excelled only by the shooting of the wild rapids of the Grande Discharge, a distance of some forty miles, to the head of steamboat navigation on the Saguenay, interrupted by a few portages around cascades which are too perilous to be passed in boats. The trip should be made in charge of the experienced canoemen who make it a specialty, and who are thoroughly acquainted with the channel, and fully competent to guide a canoe through its tortuous windings.

THE NEW ROUTE TO THE FAR-FAMED SAGUENAY.

The eastern extension of the Quebec & Lake St. John Railway from Lake Chicoutimi is a very important addition to the system, by which tourists are offered a round trip, namely: From Quebec to Lake St. John and thence to Chicoutimi by rail, and down the Saguenay and back to Quebec by water, by the well-known steamers of the Richelieu & Ontario Navigation Co. It is no exaggeration to say that this trip, for grandeur of scenery, is unequaled in America.

Passengers leave Quebec at 8:30 a. m., daily, except Sunday, arriving at Roberval, Lake St. John (190 miles), at 4:30 p. m. The train runs to the door of the new and magnificent Hotel Roberval, which has accommodations for 300 guests, and is equipped with luxurious furniture, hot and cold water baths, electric light, and every convenience of a first-class city hotel. Here the traveler can enjoy an excellent dinner, and if he does not desire to make a longer stay, he may take the train the same evening for Chicoutimi. The run to that town (64 miles) will be made in two hours and a half, over a well-finished, well-ballasted road, built in the most substantial manner, and thoroughly equipped.

Trains will run to the steamboat wharf at Chicoutimi, connecting there on Tuesday, Wednesday, Friday and Saturday with the magnificent Saguenay steamers of the Richelieu & Ontario Navigation Co., until September 16th, and on Tuesday and Friday thereafter. The run down the Saguenay will be made by daylight, the steamer reaching Riviere du Loup at about five in the afternoon, where passengers may either drive to the Cacouna Hotel, or take trains for points on the Intercolonial Railway, or go by steamer to Murray Bay and Ouebec.

The Hotel Roberval is run in connection, and is in daily communication, by steamer, with the "Island House," a new and commodious hotel built on

an Island of the Grande Discharge of Lake St. John, in the center of "ouananiche" (fresh-water salmon) fishing grounds. These hotels control the fishing rights of Lake St. John and tributaries, all of which are free to their guests.

The climate at Lake St. John is beautiful, and has been pronounced by leading physicians to be very beneficial for invalids. A substantial, elegantly equipped steel-framed steamer, the "Mistassini," with a capacity of 400 passengers, runs on Lake St. John, especially for the service between Hotel Roberval and the fishing grounds of the Grande Discharge. Besides this most popular resort at the northern end of the road, there are numerous other places on the line, such as Lake St. Joseph, St. Raymond and Lake Edward (the latter famous for the finest trout fishing in America), which are

FISHING ON LAKE ST. JOHN.

tully described in the railway folder, in a beautifully illustrated guide book, and in the several books and pamphlets issued by this company, copies of which are mailed free to applicants.

Passengers preferring to return to Quebec by rail may leave Chicoutimi daily, except Sunday, in the afternoon, and Roberval daily, except Saturday, at 8:30 P. M., arriving at Quebec at 6 A. M. daily, except Sunday.

All day trains are equipped with elegant parlor cars, and night trains with comfortable sleeping cars. Upwards of a million dollars have been expended in improving the main line since it was opened for traffic from Quebec to Roberval, in the way of reducing grades and curves, additional ballast, new rolling stock, and in terminals at Quebec, and it is safe to say that the road is one of the best finished and equipped lines in Canada.

MONTREAL TO THE MOUNTAINS AND THE SEA.

يو يو يو

THIN the compass of a day's ride, is the journey by the Portland Division of the Grand Trunk Rallway from Montreal to the sea-shore, passing through the very heart of the White Mountains on the route; but the day thus occupied must live long in the memory of those who have enjoyed its majestic beauties.

". On every side
The fields swell upwards to the hills; beyond,
Above the hills, in the blue distance, rise
The mountain columns with which earth props heaven."

Nowhere in the space of a day's ride on the American continent, can there be found crowded into the short space of "from sun to sun" a more diversified collection of beautiful landscape scenery than that spread out in grand panorama before the occupants of a parlor car on the route about to be briefly described.

Crossing the great Victoria Bridge at Montreal, the train runs near the broad St. Lawrence River for some distance, affording views of the rich and stately city on the opposite shore. Passing the Boucherville Mountains on the left, it soon crosses the Richelieu River, under the very shadows of Belœil Mountain (mention of which has been made in a preceding chapter), with the high ridges of Rougemont farther distant. For some distance on, the route is over a rich and level country, inhabited by an industrious French peasantry, and affords continuous views of the Yamaska Mountains, until the populous French town of St. Hyacinthe is reached, its quaint appearance and the great Roman Catholic colleges attracting attention. After crossing the Yamaska River, a considerable expanse of open and comparatively level country is traversed, with quaint little hamlets seen now and then on either side. From here on, for the space of an hour, the route lies through a thinly populated forest country, until descending into the valley of the St. Francis the line crosses that river on a bridge 320 feet in length, and the charmingly picturesque village of Richmond is reached, this being the junction of the Quebec branch of the Grand Trunk Railway System.

The banks of the beautiful stream of the St. Francis are followed after leaving Richmond for twenty-seven miles. Seldom does the eye rest on a more lovely combination of rich valley scenery, especially if viewed with the glimmer of the early morning sun upon it. Passing the romantic island-

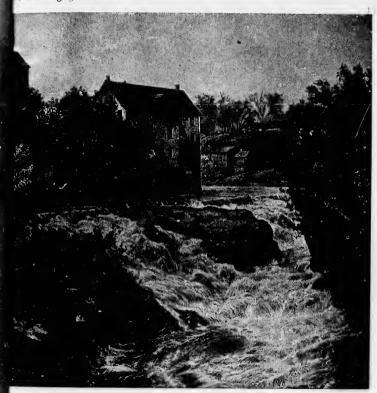

DEVIL'S SLIDE AND STARK VILLAGE.

strewr ting ar of She amidst of the

The of the state of the stant of your distant one-hal

strewn rapids of Big Brompton Falls, and traversing many an extensive cutting and costly embankment, the line reaches the prosperous and busy town of Sherbrooke, situated at the junction of the Magog and St. Francis Rivers, amidst a beautiful surrounding country. Near the village are the long Rapids of the Magog.

RAPIDS OF THE MAGOG, SHERBROOKE, QUE.

The next point of interest on the route is Lennoxville, at the confluence of the St. Francis and Massawippi Rivers. This is the seat of Bishop's College, an institution of high repute, under the care of the Episcopal church, with preparatory schools attached. It has been called "the Eton and Oxford of young Canada." Copper mines are worked in the vicinity, while not far distant is the beautiful Lake Massawippi, nine miles long by about one and one-half miles broad, swarming with many kinds of fish, among them trout, pike and bass.

ON THE ANDROSCOGGIN RIVER, NEAR GORHAM, N. H.

BERLIN FALLS, ON THE ANDROSCOGGIN RIVER.

Montreal to the Mountains and the Sea.

A little beyond, the line enters the valley of the Coaticoke, which it ascends to the United States frontier. The foot-hills of the Green Mountains are seen on the right, Norton and Middle Points being passed on the west. Ascending the pretty valley, the train soon reaches Island Pond, Vt., the frontier station, with its well-appointed summer hotels and railway dining-rooms. The traveler having passed from the dominion of Her Majesty, sees again the "broad stripes and bright stars," under whose protection the remainder of the journey to the mountains and the sea will be accomplished. The waters of Island Pond are about two miles in length,

ON THE CONNECTICUT RIVER, NEAR NORTH STRATFORD, N. H.

surrounded by a hard beach of white quartz sand. The views from Bonny-beag and other adjacent hills are of much interest and extreme beauty. Many of the drives in the vicinity are famous. The streams and waters in close proximity abound in many varieties of fish, chief of which is the spotted brook trout.

The route now follows a natural terrace, past Spectacle Pond, down the long Nulhegan valley, thence through a vast forest, whose ridges rise in rapid succession. Soon after crossing the Connecticut River, North Stratford is reached. This is the junction of the Maine Central Railroad, for Colebrook and Dixville Notch, and Fabyans, Crawford Notch, etc. The line follows the

con wit con traverse witten witten tain tio vice Pear bo by can

Riv Bo an Me pe it. M th Tl un fr St cl (s acc Ji lo o ri in A s p M F V

Connecticut valley for about twelve miles, passing beautiful meadows, prolific with vegetation, and bordered by mountains on either side. The scenery is a combination of the beautiful and the frowning, and of high interest to the traveler. The whitened summits of Percy Peaks soon appear to the left, and remain in sight for about eight miles as the road slowly rounds them. Beyond Stratford Hollow the line leaves the Connecticut valley, and passes over to the Ammonoosuc, Cape Horn and Pilot Mountains appearing on the right, with the rich plain of Lancaster beyond, and we reach Groveton, where the Grand Trunk meets the Boston & Maine Railroad (White Mountains Division), and passengers for Lancaster, Bethlehem, Fabyans, and the Franconia Mountains change cars, Fabyans being only forty miles distant, and close connections being made with all trains. There is some remarkable scenery in the vicinity of Groveton. Coming from the south toward the village, the Percy Peaks will attract the attention of the most indifferent observer, on account both of their symmetrical form and color. The village itself is surrounded by mountains. Cape Horn, three miles from Groveton (elevation 2735 feet), can be ascended without difficulty.

Soon after starting from Groveton, the train crosses the Ammonoosuc River, with Cape Horn and Mt. Bellamy on the right, and the Percy Peaks and Bowback Mountains on the left and front. Portions also of the Stratford and Sugar-loaf Mountains are seen to the north, and on the other side the Pilot Mountains soon swing into view. As the train speeds to the east, the south peak of the Percies advances over the higher north peak, and finally eclipses it. The line leaves the river for about four miles and runs under the Pilot Mountains, then crosses the river and stops at Stark, with the precipice of the Devil's Slide on the left and Mill Mountain close at hand on the right. The former is a sheer cliff 600 feet high, and bears evidence of ancient natural convulsions. Mill Mountain is 2000 feet high, and is sometimes ascended from Stark by a walk of one and one-half miles through the wood. Beyond Stark water-station fine views are given on the right and in retrospective, including the Pilot and Crescent Ranges, the Percy Peaks, Green's Ledge (sharply cut off on the south). The summits are seen to good advantage across wide and apparently level plains, and present a specially fine prospect. Just before and after leaving the station at West Milan, the traveler who looks forward from the right side of the train gains a beautiful, distinct view of the Presidential Range, arranged in stately order. The view down the river from Milan is very beautiful, including the vast forms of Mounts Washington, Adams and Madison. The line now leaves the banks of the rapid Ammonoosuc, and follows the course of a Dead river. At the lonely waterstation of Milan, the track is 1080 feet above the sea. Head Pond is soon passed on the right, and the traveler gains frequent glimpses of the White Mountains. The train soon crosses to the course of another dead river, passes a small pond, and approaches Berlin Falls. On the left, over the diverging track of the Berlin Lumber Company, the far-away blue peak of

Goos and s and s of the lew r Just l

Just fine Rev.

rassi tron by tl tide cours

Leaving falling Glimenthe Adam Gorl Engling est properties above a mather lington as in ive preson Rev.

or to conr ham The large gene the

and

Goose Eye is seen; and the train soon passes the fine cliffs of Mount Forist, and stops at Berlin Falls.

At Berlin Falls station we are only six miles from Gorham. It is the site of the great mills of the Berlin Lumber Company. The falls are within a few rods of the station, and are reached by a foot-bridge over the gorge. Just before descending to this point, the path crosses a ledge from which a fine view of the Presidential Range is to be had. It was much lauded by Rev. Thos. Starr King. The following words are from his pen:—

"We do not think that in New England there is any passage of river rassion that will compare with the Berlin Falls. . . . Here we have a strong river that shrinks but very little in long droughts, and that is fed by the Umbagog (Rangeley) chain of lakes, pouring a clean and powerful tide through a narrow granite pass, and descending nearly 200 feet in the course of a mile."

Berlin Falls is the point of departure for Errol Dam, Umbagog Lake. Leaving Berlin Falls, the railway follows a rapidly descending grade, the track falling at the rate of about fifty feet to the mile until Gorham is reached. Glimpses of the silvery Androscoggin River are gained on one hand, while on either side tower the lofty peaks of the White Mountain range. Mount Adams, as seen from the right about one and one-half miles before reaching Gorham, is said to be the highest elevation which we can look at in New England from any point within a few miles of its base. Indeed it is the highest point of land overlooking a station near the base, that can be seen east of the Rocky Mountains. The peak of Mount Adams (5794 feet high) is seven miles distant from the point of observation, whose elevation is 868 feet, above which it towers nearly 5000 feet. From the same point is also enjoyed a magnificent view of Mount Moriah, 3785 feet above the valley. We are in the heart of the mountains. Gorham is the nearest village to Mount Washington, and also the nearest village to the great northern peaks. It is in fact, as in name, "the Gateway to the White Mountains." Not only as an objective point from which to attack the mountains, but also as a summer tourist resort, it affords unsurpassed advantages - an ideal mountain village. The Rev. Thos. Starr King spent several seasons here, writing his most charming book, "The White Hills." Listen to his glowing tribute to this beautiful village and its surroundings:-

"No point in the mountains offers views to be gained by walks of a mile or two that are more noble and memorable. . . . For river scenery, in connection with impressive mountain forms, the immediate vicinity of Gorham surpasses all the other districts from which the highest peaks are visible. The Androscoggin sweeps through the village with a broader bed, and in larger volume, than the Connecticut shows at Lancaster or Littleton. As a general thing, Gorham is the place to see the more rugged sculpturing and the Titanic brawn of the hills."

The village is 812 feet above the sea, the air dry, bracing, invigorating and healthful. The nearness of the great peaks of Washington, Madison,

Jeffe drive have tions mana

ive f

vicir cogg teen and drive Brid Brid offer

> burn ison,

lefferson and Adams gives rare grandeur to the views of the environs. The drives and excursions almost without number in close proximity to Gorham, | | have had much to do with its great popularity. Add to these many attractions a first-class, home-like and well-kept hotel (the Alpine House, under the management of Mr. G. D. Stratton), and what more can be desired?

Space will permit of but very brief mention of a few of the many attractive features "in and about Gorham." One of the delightful drives in the

ALPINE HOUSE, GORHAM.

vicinity of Gorham is known as the Milan Road, which follows the Androscoggin through Berlin Falls to Milan Corners the distance being about fourteen miles. Starr King laments that so few tourists have yet taken this ride and enjoyed its superb prospect. Another one of the most notable carriage drives in America is that from Gorham through Shelburne to the Gilead Bridge on the south bank of the Androscoggin and back to Lead Mine Bridge on the north bank. "No drive of equal length among the mountains offers more varied interest in the beauty of the scenery."

Near the point where the Lead Mine Bridge road diverges from the Shelburne road, is a hill whence is obtained a magnificent view of Mount Madison, with a charming foreground of velvety meadow.

ant har the eas The Lead Mine Bridge Is about midway between Gorham and Shelburne village. From its center a noble view is obtained of Mount Madison with Adams and Washington, the river forming a beautiful foreground. The best time to make the visit is between five and seven of the afternoon. Then the lights are softest and the shadows richest on the foliage of the river, and on the lower mountain sides. And then the gigantic gray pyramid of Madison with its pointed apex, back of which peers the ragged crest of Adams, shows to the best advantage.

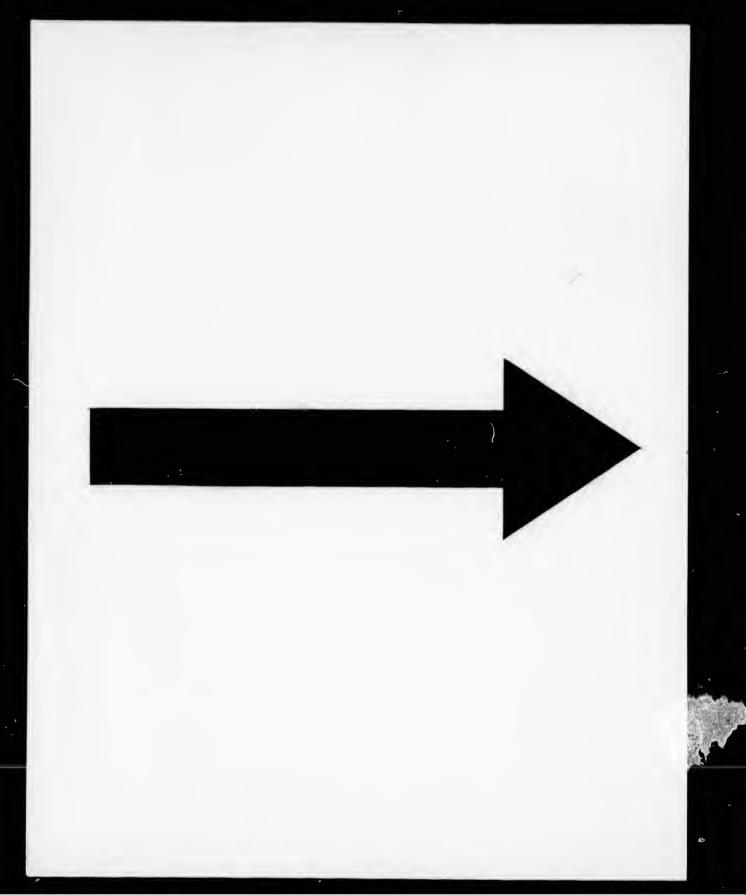

As the train leaves Gorham, and at a distance of about a mile from the station, one of the finest views from a railway train to be found anywhere, is secured from the right and rear. Its chief features are the noble prospect of Mou Moriah, Madison and Adams. Just before reaching Shelburne, what splendid symmetry bursts upon the view when the whole mass of Madison is seen throned over the valley, itself o'er-topped by the ragged pinnacle of Adams. For many leagues the route traverses a region of remarkable beauty and picturesqueness. The effects of cultivation are apparent in the rich meadows which border the gracefully winding stream of the beautiful Androscoggin, making constant and pleasing contrast with the wild grandeur of the adjacent mountains. As the fertile intervales of Bethel are reached, Lock Mountain rises on the left, while on the right are the ledges of Sparrow Hawk.

Bethel, Maine, is a pleasant and attractive old village on the Androscoggin River (1000 feet above the sea). On account of its elevation above the intervales, it is sometimes called Bethel Hill. The richness and fertile beauty of these intervales add greatly to the charming scenery in the vicinity, and are a striking contrast to the bold mountains on the north. The claims of Bethel as a summer resort are many. It was called by Starr King "the North Conway of the eastern slope." Drives in the neighborhood are pleasing and diversified, leading to quiet and sequestered districts. It is the point of departure for Lakeside, Cambridge and Rangeley Lakes.

Leaving the Androscoggin valley at Bethel, the road travels a wild and mountainous country, until we reach Bryant's Pond. We are still 700 feet above the sea. The "Pond" itself is a beautiful highland lake surrounded by mountains, its waters abounding in bass and other varieties of fish, while trout fishing is abundant at no great distance. Bryant's Pond is the point of departure for Andover and South Arm on Rangeley Lakes. Rumford Falls, reached by stage from Bryant's Pond, is said to be the grandest waterfall in New England.

Leaving Bryant's Pond, we soon discover that we are leaving the mountains behind us, and approaching the lower levels of that stretch of country leading to the sea-coast.

South Paris, the next point, is the railway station for Paris Hill, a pleasant hamlet situated on a hill 831 feet high. Mount Mica is near Paris Hill on the east, and is claimed to be "the most interesting locality for rare minerals"

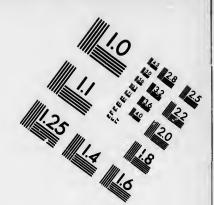

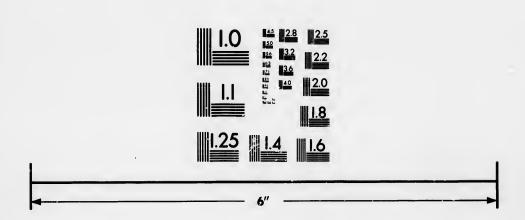

IMAGE EVALUATION TEST TARGET (MT-3)

Photographic Sciences Corporation

SIM STATE OF THE S

in the State of Maine." Here are found plates of mica six to ten inches square; green beryls; limpid, smoky and rose quartz; black, green, blue and red tourmaline; feldspar; garnets and other minerals.

Tudor says that Paris is "a place as little resembling its European original as a cottage does a palace. At the same time it may be said, that to the extent in which it falls short of its great prototype as to architectural beauty, does it exceed it in the beauties of nature, being surrounded by a circle of mountains of the most imposing and romantic features."

Leaving South Paris, we approach Danville Junction, twenty-seven miles from Portland, the point of departure for Poland Springs, South Poland, Me. It is situated about five miles from Danville Junction, at an elevation of

something over 800 feet above the sea. Its high altitude and invigorating atmosphere, in connection with the far-famed Poland Springs water, render the resort one of the most charming spots for tourists traveling for pleasure or in search of health. A fine line of six-horse coaches meet the Grand Trunk trains on arrival, conveying the tourist to the hotel.

Leaving Danville Junction, the train passes through the maritime towns of Yarmouth, Cumberland and Falmouth, and about three miles from Portland crosses the Presumpscott River on a bridge 300 feet in length, and for the first time a glimpse of the salt water is obtained, and a moment later, on the left, is spread out the first view of the beautiful Casco Bay, with its three hundred and odd islands, Cushing's Island with its fashionable hotel and summer cottages, Peak's and Diamond Islands, with their numerous hotels, cottages, and boarding houses, and the innumerable other islands, stretching away in the distance, surrounded by the blue waters of the Atlantic.

THE WHITE MOUNTAINS.

se se se

HE distinguishing peculiarities which render the White Mountains more attractive to summer tourists than any other range or group of mountains on the American continent are their ease of access, and the wonderful diversity of scenery they afford under varying conditions and from different points of view. Within a few hours' ride from Montreal, Quebec or Portland, they are rendered accessible by the conveniences of modern railway travel, with none of the hardships characteristic of

former years. With almost inexhaustible resources of entertainment for the visitor, they attract old friends and new in larger numbers with each recurring season.

The point of approach, conceded by all the most ardent admirers of the mountains to be the most impressive and charming, is by way of Gorham and the Glen. That delightful book from the pen of Rev. T. Starr King, "The White Hills," which has become a standard authority on the mountains, was largely inspired and written during the author's sojourn in this vicinity. The village of Gorham has long and pre-eminently enjoyed the distinction of being the "gateway to the mountains." It is the nearest village to Mount Washington, and is pronounced by Drake, another eminent mountain authority, as occupying a "position with respect to the highest summits more advantageous than that of any other town lying on the skirts of the mountains, and accessible by railway." Passing allusions have been made to the points of interest in and about Gorham in a previous chapter, and our limits forbid even a mention of the many delightful drives and walks which may occupy the visitor's attention during an entire season's sojourn. The grand panoramic view of the presidential range, however, must not be omitted. This is had from Mount Hayes, the "guardian of the village, creeting its rocky rampart over it, like the precipices of Cape Diamond over Quebec."

As a point from which to view Mount Washington, Starr King entitles it, —

"The chair set by the Creator at the proper distance and angle to appreciate and enjoy his kingly prominence. All the lower summits are hidden, and you have the great advantage of not looking along a chain, but of seeing the monarch himself soar alone, back of Madison and Adams, and seemingly disconnected with them, standing just enough to the south to allow an unobstructed view of the ridges that climb from the Pinkham road up over

Tuckerman's Ravine, to a crest moulded and poised with indescribable stateliness and grace. It completely dimmed the glory of Mount Adams. The eye clung, ever fascinated and still hungry, upon those noble proportions and that haughty peace. It was satisfactory, artistic mountaineminence and majesty that we were gazing upon."

The approach to the mountains from Gorham is by way of the Glen, and the ride by carriage is one of the few remaining vestiges of "mountain staging." Six-in-hand tally-ho coaches meet the trains of the Grand Trunk

EMERALD POOL.

Railway at Gorham, for the Glen Site and the summit of Mount Washington. The road lies along the course of the Peabody River, which flows into the Androscoggin at Gorham, having its sources far up among the mountains.

The road to the Glen is in a southwesterly direction, and frequent glimpses are given of the noble mountains as the journey progresses. The views from the Glen, the site of the Glen House, recently destroyed by fire, are grand and impressive. The five greatest peaks of the White Mountain group are here visible, and at one sweep the eye takes in Washington, Clay, Jefferson, Adams and Madison, the second being partially obscured by a spur of Washington, but more fully revealed by a slight change of the point of view. These five peaks are visible from the Glen in greater sublimity and

d by a spur
he point of
blimity and

grandeur than from any other point of observation. Their massive proportions, from base to summit, are clearly revealed, without the peculiar "foreshortening" effect of intervening foot-hills, so noticeable elsewhere. In a clear morning, shortly ... ter sunrise, they stand out in bold relief against the sky, while their rocky summits, ragged ravines, and scarred sides, with the wooded slopes in the foreground of the picture, fascinate the beholder and command the admiration of even the most extensive European travelers. In the afternoon, their sharp outlines against the illuminated sunset sky present a picture no less attractive, though differently lighted. And when the Storm King sweeps over their summits, crowning them with clouds or wrapping them in fleecy vesture, embroidered with the gold and tinsel of the lightning's flash, and anon, touched with the fleeting rays of broken sunlight, still another majestic and gorgeous scene is presented. So that, with all the varying moods of mountain atmosphere, the changing scenes, and the new groupings presented from different localities, coupled with the many attractions to be found in the immediate vicinity, the Glen is a most delightful spot.

A walk or ride of about a mile from the Glen brings us to the Emerald Pool, a view of which we present, and which cannot be improved upon by a description. It is a most restful place, the river itself here seeming to pause in its madly merry race toward the ocean, as if resting for the long, long journey to the broad Atlantic. Another mile, and a guide-board is reached. which points the way, by a diverging path, to Thompson's Falls. A short walk up the lower slope of Wildcat Mountain, and we reach a brook which rushes down the mountain side on its way to Peabody River. Over ledges of granite it comes plunging in a series of cascades, to which the name of Thompson's Falls has been given. From the upper height of the falls a view is afforded of Tuckerman's Ravine, while high above, the summit of Mount Washington looks frowningly down. The view thus afforded is declared by experienced tourists to be one of the best in the mountains, and it has been reproduced in "Picturesque America." The wildness of the scene amid the seclusion of the forest, the glistening of the cascade in its journey among the leafy surroundings, with its musical cadences falling softly on the ear, all conspire to render the spot most exquisitely charming to the lover of nature, and the visitor feels well repaid for the trip.

Returning to the road, another mile brings us to the path which leads to the Crystal Cascade, said to "divide with Glen Ellis the honor of being the most beautiful waterfall of the White Mountains." The path extends through the woods a distance of some three-eighths of a mile.

Glen Ellis Falls are about four miles south of the Glen Site, on the Ellis River, at the base of Wildcat Mountain. Their old name of Pitcher Falls, given from their shape, has now fully given way to the more poetic but less suggestive title of Glen Ellis, bestowed by a party of visitors in 1852. A graceful writer thus describes a visit to the spot:—

above in one The sh stunne down the cur ing briwith the

"Descending by slippery stairs to the pool beneath it, I saw, eighty feet above me, the whole stream force its way through a narrow cleft and stand in one unbroken column, superbly erect, upon the level surface of the pool. The sheet was as white as marble, the pool as green as malachite. As if stunned by the fall, it turns slowly round, then recovering, precipitates itself down the rocky gorge with greater passion than ever. On its upper edge, the curling sheet of the fall was shot with sunlight, and shone with enchanting brilliancy. All below was one white feathery mass, gliding downward with the swift and noiseless movement of an avalanche of fresh snow."

In addition to the cascades and waterfalls which have been already mentioned, there are numerous charming spots all along the mountain streams, and among the leafy glens, many of which have delighted the eye of the artist, and not a few of them have been transferred to canvas as a permanent reminder of the delights of a summer at the Glen. To the lover of the rod, the mountain brooks furnish the added attraction of being the home of the speckled trout, and many a famous "catch" has delighted the follower of Walton, and tempted the appetite of the epicure.

The mountain views in the direction opposite the great Presidential Range are scarcely less imposing than those already described. The Carter Range lies to the east of the Glen, and the peaks of Carter Dome, Mount Carter, Imp Mountain, Mount Moriah and Wildcat, are prominent features of the landscape. Imp mountain is so named from the grotesque profile which is visible from the road above the Glen House. From the summit of Wildcat a fine view of the Presidential Range can be had as a reward for an hour's climb.

But by far the most wonderful mountain gorge in the entire vicinity is the chasm in the east side of Mount Washington, known as Tuckerman's Ravine. This is best reached from the carriage road to the summit of Mount Washington. About two miles from the Glen Site, the path diverges from the carriage road, and follows the old Thompson bridle path to Hermit Lake, thence following the bed of the stream into the very depths of the Ravine. One remarkable feature of this gorge, to be seen nearly the entire season, is the snow arch. As the rays of the sun are excluded from the Ravine except during a short portion of each day, the winter's accumulation of ice and snow often remains until autumn. The mountain streams gradually melt out the under side of this deposit, forming an arch, often of great beauty. The walls of the ravine are called the Mountain Coliseum. Starr King says:—

"No other word expresses it, and that comes spontaneously to the lips. The eye needs some hours of gazing and comparative measurement to fit itself for an appreciation of its scale and sublimity. . . . It seems as though Titanic geometry and trowels must have come in to perfect a primitive volcanic sketch. One might easily fancy it the Stonehenge of a preadamite race,—the unroofed ruins of a temple reared by ancient Anaks long before the birth of man, for which the dome of Mount Washington was piled up as the western tower. There have been landslides and rock-avalanches as terrible in that ravine as at Dixville Notch,—the teeth of the frosts have been as pitiless, the desolation of the cliffs is as complete, but the spirit of the

place is not as gloomy as at Dixville,—is sublime rather than awful or dispiriting. . . . In Tuckerman's Ravine there is a grand battle of granite against storm and frost, a Roman resistance, as though it could hold out for ages yet before the siege of winter and all the batteries of the air."

The Mount Washington carriage road, from the Glen to the summit, furnishes opportunity for a delightful drive, and no visitor should miss the exhilarating trip. The roadway itself is a fine piece of highway construction, the ascent being accomplished by a winding course, with easy grades, not exceeding one foot in eight on the average. The carriages are strongly built mountain wagons, each drawn by six sturdy roadsters, driven by experienced "knights of the whip," who know every turn of the road. The traveler will note the changes in vegetation as the altitude increases, the heavy forests giving way to stunted shrubs, and these in turn to mosses and lichens, while at the summit the bare and desolate rock gives an idea of arctic climate, which indeed does prevail the larger part of the year.

The Summit House furnishes shelter to the visitor, whether his stay be for a few hours only, or for days or weeks. The view from the summit is indescribable. Its immensity is at first overwhelming. The line of vision bounds a circle nearly a thousand miles in circumference; and within that circle are lakes, rivers, mountains, valleys, dark forests, smiling villages, and in fact an almost endless variety of scenery, ever changing as the gaze is directed to the different points of the compass. In a clear day the distant glimmer of the Atlantic may be seen, off Portland harbor, to the southeast. In the opposite direction, the horizon is broken by the Green Mountains of Vermont, with a glimpse of the remote Adirondacks in New York. All around are lakes, mountains, rivers and villages. The view is greeted with a new picture at every turn, and as the eye learns to distinguish distances it gradually dawns upon you that you stand over a mile and a third above the level of the sea, at the highest altitude attainable in New England without the aid of a balloon.

The following description of a sunrise on Mount Washington is from, the pen of the author of "The Switzerland of America:"—

"The grand, culminating view from this lofty point of observation is to be had at the rising of the sun. . . . At early dawn the inmates of the house are roused, and such as choose to do so arise and dress, and take their position on the platform east of the building, to watch for the first appearance of the 'golden orb of day.' Beneath you the valleys are still in slumber, and a deep gloom is spread over all, in sharp contrast with the light of dawn which already illumines the mountain peaks around you. Banks of mist here and there indicate the location of bodies of water, and possibly overhanging clouds may partially hide some of the mountain summits from view. All eyes are turned expectantly toward the east, which is beginning to show a faint rosy tinge, deepening every moment till it reaches a crimson or perhaps a golden hue, a fitting couch from which the brilliant day-king is about to spring forth upon his glorious reign. Suddenly one point in the eastern horizon grows more intensely bright than all the rest, and the disc of the sun is then discernible, quickly increasing in proportions until the broad

face of the gaze beautifu sombre possible utes ha to drive

which to clir pies a afford engine the up ances a passopera T Bosto Gorh

Bosto Gorha many and the way to of im Juncting the tain, face of the great luminary so dazzles the eye as to compel a withdrawal of the gaze. Looking then into the valleys below, the effect is transcendently beautiful. While the spectator is bathed in the full golden sunshine, the sombre shadows are just beginning to flit away, presenting in the strongest possible manner the contrasts of light and shade; and not until some minutes have elapsed does the new-born day reach down into the deepest valleys to drive forth the lingering remnants of night.'

Leaving the summit, the visitor may return to the Glen by stage, or may descend the other side of the mountain by the Mount Washington Railway, illustrated opposite, and described below.. This railway connects at the base of the mountain with the Boston & Maine Railroad, one of the great highways of mountain travel, reaching nearly all the celebrated resorts of this region. Six miles from the base is the famous hostelry of Fabyans, where connection is made with the Maine Central for Crawfords, the White Mountain Notch, and Conway, while beyond, on the Boston & Maine line, are the Twin Mountain House, Bethlehem, and the Jefferson Meadows. At Bethlehem Junction connection is made for Franconia Notch and the Profile House, this line also being operated by the Boston & Maine.

MOUNT WASHINGTON RAILWAY.

This remarkable triumph of engineering skill, extending from the base to the summit of Mount Washington, now renders a trip to the summit accessible to everybody, and the fatigues attendant upon mountain climbing are here a thing of the past.

The novel road is constructed with an extra or center toothed rail, into which the cog wheel of the engine "meshes," and the train is thus enabled to climb the grade, as no ordinary engine could possibly do. The trip occupies about an hour and a half, and it is needless to say that the views afforded from the train are surpassingly grand. Each train consists of one engine and a single car, the engine being always below the car, to push in the upward journey and to hold it back in the descent. The safety appliances on the train are such that an accident is well-nigh impossible, and not a passenger has ever been injured in all the years the road has been in operation.

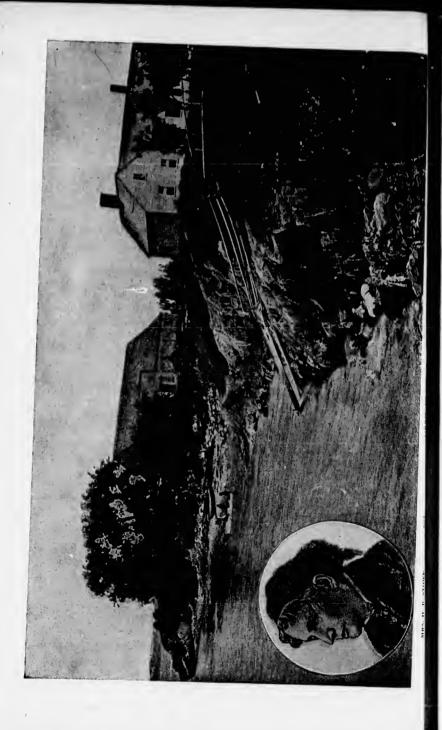

Tourists from the west may make connection with the trains of the Boston & Maine at Groveton Junction, direct for Fabyans, or at Berlin or Gorham, by way of Jefferson. A favorite "tour of the mountains" with many travelers who approach them from the north, is by way of Gorham and the Glen, including the stage ride to the summit, descending by the railway to Fabyans, from which place side trips may be made to all the points of interest, thence returning to the Grand Trunk Railway via Groveton Junction, Gorham, or Berlin. Or this trip may be reversed, the tourist leaving the Grand Trunk at Groveton, thence to Fabyans, and over the mountain, by rail and stage, to Gorham. .

THE SEASHORE.

PORTLAND, MAINE, AND THE BEAUTIFUL CASCO BAY.

se se se

HE coast of Maine is abundantly rich in all that goes to make a complete summer resort. Speaking of Casco Bay, of which the harbor of the City of Portland, the eastern terminus of the Grand Trunk Railway System, forms a part, the following extract from the pen of Edward H. Elwell, in his admirably written work entitled "Portland and Vicinity," will be found truth-

ful and concise, and convey as well as words can, some conception of this beautiful resort by the sea:—

"Here is a little bay, extending from Cape Elizabeth to Cape Small Point, a distance of about eighteen miles, with a depth of about twelve miles, more thickly studded with islands than any water of like extent on the coast of the United States, there being something over 300 islands in Casco Bay. Unlike the low sandy islands of the Massachusetts coast, these are of the most picturesque forms, while bold headlands and peninsulas jut far out into the waters. There is the greatest possible variety in the form and grouping of these islands. Some lie in clusters, some are coupled together by connecting sandbars, bare at low water, while others are solitary and alone. Nearly all of them are indented with beautiful coves, and crowned with a mingled growth of maple, oak, beech, pine and fir, extending often to the water's edge, and reflected in many a deep inlet and winding channel. In the thick covert of the firs and spruces are many green, sunny spots, as sheltered and remote as if far inland, while beneath the wide-spreading oaks and beeches are pleasant walks and open glades.

"For the most part they rise like mounds of verdure from the sea, forest-crowned, and from their summits one may behold on the one hand the waves of the Atlantic, breaking almost at his feet, and on the other, the placid waters of the bay, spangled by multitudinous gems of emerald, while in the dim distance he discerns, on the horizon, the sublime peaks of the White Mountains. It is impossible to conceive of any combination of scenery more charming, more romantic, more captivating to the eye, or more

suggestive to the imagination."

All the varieties of fish that frequent the New England coasts are to be caught in abundance in season, either directly from the rocky portions of the shores or in its immediate vicinities.

Portland, Maine, is, undoubtedly, the loveliest city on the Atlantic coast. It stands on a high peninsula some three or four miles in length. At its outer, or northeastern projection, the peninsula swells into the bold height of Munjoy's Hill, crowned with a light-house an an observation tower, from which the grand panorama of Casco Bay stretches out in the foreground, while in the other direction the magnificent range of the White Mountains closes up the vista.

Much has been written, in poetry and prose, of the beauties of Casco Bay, of which the harbor of Portland forms a part, Longfellow and Whittier being most remembered. The house in which Longfellow was born cill stands at the corner of Fore and Hancock streets, Portland, while next door to the Preble House stands the ancestral Wadsworth mansion, Longfellow's later residence and still the abiding place of the Longfellow family. A magnificent statue of the famous poet occupies one of the delightful squares for which this beautiful city is so noted.

The drives around Portland probably offer as delightful and varied attractions as can be found anywhere in this country. Among the most interesting may be mentioned the one leading by East Deering and the United States Marine Hospital to Falmouth Foreside, some eight or ten miles, with magnificent views stretching over Casco Bay, and its many islands; or over the shell road to Deering's Oaks and Woodford's; or to the beautiful Evergreen Cemetery with its many monuments. Again, to Pride's Bridge on the Presumpscot River. There is also a delightful drive leading down the coast by the great dry-docks and the ship-building hamlet of Knightville to the ancient and favorably known summer resort, called Cape Cottage, while just beyond is the tall lighthouse on Portland Head. The shores on this side of the Bay are remarkably bold and rocky, and after a hard blow a tremendous surf rolls in upon the unyielding cliffs with a dash of spray, and a roar heard for miles. Further down on this rocky coast stands the Ocean House, and not far away the lighthouses, known as the "Two Lights." Scarborough Beach lies still beyond.

One of the delightful excursions by boat from Portland is to Harpsweil, by the Harpsweil Steamboat Company, whose large new steamers, the "Merryconeag" and "Sebascodegan," make four round trips daily in connection with the Boston and New York steamers and the Grand Trunk trains. The route is known as "The 365 Island Route," and the steamers call at the most important of the islands, including Long Island, Creat and Little Chebeaque Cliff, Bailey's and Orr's Islands, on their way to South Harpswell. This company not only serves the summer residents at the many cottages and hotels, but also gives a lovely day's excursion to those whose time is limited, offering tickets for the passage and a first-class shore dinner for a dollar.

arpsweil, ers, the conneck trains. Il at the le Cherpswell. ges and limited, ar. Among the favorite island resorts of Casco Bay are Cushing's Island, Peak's Island, with its hotels and cottages, Big and Little Diamond Islands, Little Chebeaque, one of the most attractive islands in the Bay, for summer guests. Great Chebeaque covers 2000 acres, and has a considerable population of farmers and fishermen, schools and churches, good roads and several summer liotels; Long Island, with hotels, boarding houses and cottages; Hope Island, with its quiet little hotel. Further on, numberless islands gem the blue waters, crowned with tall trees and sheltering many a lovely cove and sandy beach. Those who come hither for a summer vacation should

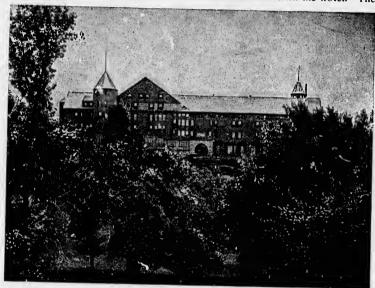

not fail to bring Mrs. Stowe's Romance, "The Pearl or Orr's Island," whose scenes were laid here among the quiet fisher folks, who for centuries have dwelt among these sequestered coves.

Orr's Island lies close to Harpswell, and is joined to it by a highway bridge. Off in the Bay, five miles, is Ragged Island, with its ancient houses, the scene of Elijah Kellogg's "Elm Island" stories; nor should be forgotten Whittier's beautiful ballad, "The Dead Ship of Harpswell," preserving an old legend of these romantic shores.

On a great many of the islands, and also upon the main-land on both sides of the Bay, are numerous cottages and summer resorts. It is not an exaggeration to say that many thousands of summer tourists can be provided for in this delightful vicinity.

Cushing's Island, in the beautiful Casco Bay, is two and one-half miles from the city of Portland, Maine,—eastern terminus of the Grand Trunk Railway System. It contains about 250 acres of land. The Ottawa House, one of the finest hotels on the coast of Maine, is situated on the island, on an eminence of over 100 feet above the sea, commanding from its broad veranda unrivaled views of the ocean, islands, main-land, harbor and city. with far to the westward the peaks of the White Mountains in the horizon. The hotel accommodates 300 guests; there are also a large number of cottages on the island, many of which are in connection with the hotel. The

OTTAWA HOUSE, CUSHING'S ISLAND.

average temperature during the summer months is sixty-six degrees, and because of its altitude and the invigorating sea breezes which continually fan its shores, and the balsamic odors from its fir and spruce groves, the island has long been famed for its renovating and health giving powers.

The views from the piazzas of the hotel are magnificent, and those from the cupola are especially fine. Looking seaward, "the broad ocean is before you, stretching far away to the horizon, where the white sails of the mackerel fleet mingle with the sky line. Far below you lies Ram Island, with the surf beating on its rugged shores; eastward lie the outer islands of the bay, and Halfway Rock, with its solitary lighthouse; westward is Portland light, and the two lights on the Cape; seaward the waves are all a-shimmer with sunlight, and departing ships cleave swiftly through them."

Port travel, as are easily ride, those Beach, Pi Rye Beac

ing the leaddition to woodland

Portland may properly be considered the objective point of tourist travel, as from it all the resorts of New England and the New England coast are easily accessible, most of them with but a few minutes' or a few hours' ride, those better known and in the closest proximity being: Old Orchard Beach, Pine Point, Scarborough Beach, Isle of Shoals, Portsmouth, Hampton, Rye Beach and other resorts almost numberless.

One hundred and ten miles northeast from Portland is the celebrated resort of BAR HARBOR, on Mount Desert Island. It is reached by the trains of the Maine Central Railroad, or by the boats of the Portland, Mt. Desert & Machias Steamboat Co. The island of Mount Desert lies quite near the mainland, being connected with it by a bridge. It is about eighteen miles long,

by twelve in width, quite irregular in shape, and covered with mountain peaks, some thirteen in number, the highest, Mt. Green, rising fully two thousand feet above the sea level, with a hotel at the summit, reached by a carriage road from Southwest Harbor. The shores of the island are deeply indented by inlets and bays, being in one place nearly cut in two by Somes Sound, and the diversity of scenery thus presented makes it an attractive resort. Bar Harbor is plentifully supplied with hotels, and is the favorite haunt of sketching parties, on account of the scenery.

OLD ORCHARD BEACH

Is one of the most widely known resorts on the Atlantic Coast, from its being the locality of so many temperance and religious camp-meetings. In addition to its vast expanse of beautiful beach, it has hundreds of acres of woodland parks and groves, stretching away from the shore, enclosing cool

half miles nd Trunk va House, island, on its broad and city. horizon. er of cottel. The

and beially fan e island

se from s before e mackvith the he bay, d light, er with retreats and shady paths, where the forest has been left almost in its primeval state. This happy combination of "woods and seashore" in one locality, affording a pleasing variety and gratifying the tastes of all, is one secret of the great popularity of this resort.

It is reached from Portland by the Boston & Maine Railroad, with frequent train service as well as popular excursions. Hotels and boarding places are numerous, ranging in price from one dollar to four dollars per day.

Still eastward, over the Boston & Maine, we pass Wells Beach, Kennebunkport, Salisbury, Hampton and Rye Beaches, Boar's Head and Revere

SCENE AT OLD ORCHARD.

Beach, the latter the popular resort for Boston, and sustaining the same relation to that city that Coney Island does to New York.

The Isles of Shoals, nine miles off Portsmouth Harbor, comprise a group of nine islands, the largest of which is Appledore. White Island is the location of a light-house, which the readers of the *Atlantic Monthly* will remember as the scene of many of the pleasing incidents in Mrs. Thaxter's "Child Life at the Isles of Shoals." These islands have been for years the favorite summer home of many of the prominent literary people of New England.

Many other localities on the Atlantic coast are rich in tradition and legendary lore.

THE RANGELEY LAKES.

A 36 36

eference has been made in a previous chapter to Bethel as the point of departure for the Rangeley Lake district. This section of country may also be reached by way of Bryant's Pond, Berlin Falls, or North Stratford. The chain of lakes, known collectively as the Androscoggin or Rangeley Lakes, lies near the western boundary of Maine, north and east from the

Grand Trunk Railway. They are six in number, bearing the unique Indian names of Oquossoc, Cuhsuptic, Mooselucmaguntic, Molechunkamunk, Welokennebacook, and Umbagog. Some of these are known by other names. They are reached by stage from the railway stations, the route *via* North Stratford, comprising a rail journey to Colebrook, thence stage through the famous Dixville Notch.

The country surrounding these lakes is an almost unbroken wilderness. Dense forests and high mountains seem to shut them in, as if to hide them from the prying eyes of civilization, and deer, bear, caribou, and the lesser wild animals roam the woods, while the waters of the lakes and streams abound in trout, land-locked salmon, and other fish.

As a health resort, the locality presents many points of comparison with the Adirondacks. Averaging about 1500 feet above sea-level, and hemmed in by mountains, the air is clear and bracing, while the forests contribute of their balmy odors to the health-giving "ozone," which here fills the lungs of the seeker for rest, quiet, and freedom from the cares of the "outside world."

To the lover of rod and gun, few spots are more attractive. Trout weighing from three to eight pounds are taken from these waters almost daily; one spotted beauty tipped the scales at exactly eleven pounds, and measured twenty-seven and a quarter inches, or three-quarters of a yard,—taken with rod and line, at that. Ye fishermen who rejoice over a one-pound trout as a good catch—and it is—how would you enjoy quadrupling and sextupling that weight at nearly every throw of the line? This you may do among the Rangeleys.

The journey by stage to the region is one of great interest, and in itself richly repays the effort. For illustration, take the trip from Bethel to Cam-

uO

bridge at the foot of Umbagog Lake. Directly after leaving Bethel, a splendid view is obtained of the meadows and intervales that lie along the Androscoggin River, the whole hemmed in by mountains towering loftily in every direction. The sharp contrast between the verdure-clad meadows, adorned with graceful elms, and the rugged mountains surrounding them, presents a picture that appeals strongly to the lover of the beautiful in nature, and one long to be remembered. A clear view of Mount Washington is to be had shortly after commencing the journey, and the Presidential Range, in stately grandeur, greats the eye at several points in the trip.

About eleven miles from the starting point a natural curiosity is seen on the bank of Bear River, known as the "Devil's Horseshoe," worn deep into the solid ledge, as though impressed by the shoe of a colossal horse. A little further on, you come to another curiosity, known as "Screw Auger Falls," a large spiral channel, worn deeply into the rock by the action of the water. A short distance from this is the "jail," a rocky cell with smooth sides of considerable height illustrations the idea that it is residued.

smooth sides, of considerable height, illustrating the idea that it is easier to get into trouble than our of it.

ne much

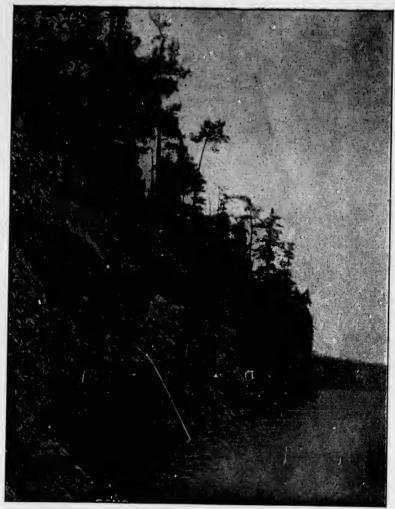

resembling the canyons of the Rockies. The road through this narrow defile extends several miles, passing at one point between two immense boulders called the Twin Rocks. Passing Moose Cave, another curiosity in natural sculpture, the road soon emerges from the Notch, and, still climbing upward, reaches a high plateau, from which the first glimpses are had of the Rangeley Lake system. Turning to the left and passing Upton postoffice, a ride of a mile and a half brings us to the Lakeside Hotel, at the foot of Umbagog Lake, in the town of Cambridge. From here, all points of the lake system are reached by the stages and steamers of the Androscoggin Lakes Transportation Company.

TROUT AND SALMON, AT RANGELEY LAKES.

Beyond the Androscoggin Lakes, and northward, in an almost unbroken wilderness, is situated Parmachenee Lake, reached either by way of Lakeside, Cambridge or Errol Dam. Steamers take passengers by way of the Magalloway River to the "Lower Landing," thence a buckboard road leads nearly to the base of Mount Aziscohos, a climb to the summit of which is rewarded by a superb panoramic view.

Round trip tickets to all points, in connection with the stage and steamer lines, are issued by the Grand Trunk Railway System, and are on sale at principal ticket offices.

THE MUSKOKA LAKE COUNTRY.

st st st

OOKING upon the map of Ontario, at the section of country lying north of Toronto and Hamilton, you are struck with the curious commingling of land and water. Islands of every size, and almost without number, dot the larger bodies of water, while lakes, big and little, diversify the surface of the land. It suggests the idea of some prehistoric upheaval on the great deep, resulting in a nearly equal division of the surface, for many hundreds of square miles, into land and water.

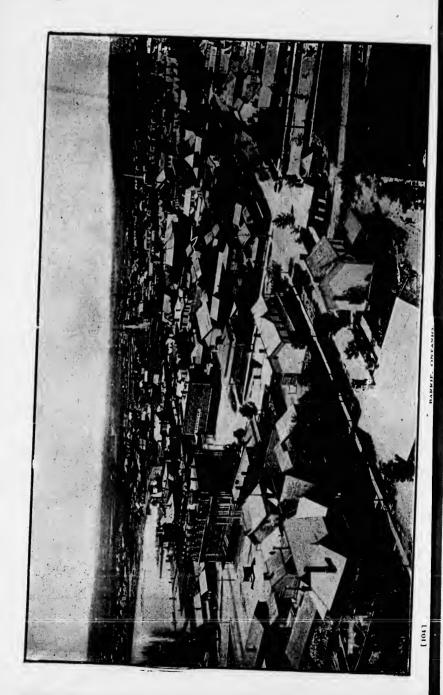

11

It may readily be inferred that such a section of country must present many attractions to the tourist in search of scenery or sport, and the reader will not be surprised to

learn that this region is constantly gaining in popularity as its advantages become more widely known. Ready access to this section is had by the trains of the Midland, and Northern and Northwestern Divisions of the Grand Trunk Railway System, and the summer schedule is arranged to accommodate the traveling public, with special reference to making close connection with the steamers of the Muskoka Navigation Company, which ply upon the Muskoka Lukes and Georgian Bay.

The Muskoka district, known as "the Highlands of Ontario," has some eight hundred lakes, varying in size from a mere pond to twenty or thirty miles in length, the largest being Muskoka, Rosseau and Joseph. Their elevation is seven hundred and fifty feet above Lake Ontario, and the healthfulness of the region is proverbial, while the hunting and fishing are not surpassed anywhere.

The chief port of the Muskoka steamers is Gravenhurst, at the southern extremity of Lake Muskoka. Here the tourist may embark for a most delightful water trip through the chain of lakes. The route to Bracebridge comprises ten miles of lake and six miles up Muskoka River. At Bracebridge are to be seen the High Falls and the Great South Falls, both notable attractions. The trip to Bala, the outlet of the lake via Musquash River,

some
F
may
did b
way o
locks
extre
daily

canal scene more lakes attrac conne abour

com

comprises twenty-one miles. At Bala, the water makes an abrupt descent of some twenty feet, forming an attractive waterfall.

Port Carling is twenty-one miles from Gravenhurst, and on the way you may tarry at Beaumarls, beautifully situated on Tondern Island, with splendid bathing and fishing facilities in the vicinity. Reaching Port Carling, by way of the Indian River, the passage into Lake Rosseau is made through the locks; and here comes in the title of "Interlaken." Rosseau is at the upper extremity of the lake, and Maplehurst is near by, and from here there are daily stages to Parry Sound, on Georgian Bay.

A MUSKOKA LAKE SCENE.

At Port Sandfield, Lakes Rosseau and Joseph are connected by a short canal. Passing into the latter lake, the journey is continued amid charming scenery, to Stanley Bay, twelve miles from Port Sandfield, while five miles more brings us to Port Cockburn, at the head of the lake. Besides the three lakes thus particularized, there are numberless smaller ones, scarcely less attractive, which may be reached overland, or by canoes up the streams which connect them with the larger lakes; and as many of these lakes and streams abound in fish, the angler will find himself well repaid for the trip.

North from Muskoka lies what is known as the Magnetawan district, comprising the river bearing the name, with the chain of lakes which it con-

nects. This region is reached by rall at Burk's Falls, where connection is made with a steamer for a run down the river, through Cecebe Lake, thence into Ah-mic Lake. The trip covers something like forty miles, and the river itself is as crooked as the proverbial "ram's horn." The region is comparatively new, but its beauties have been discovered by explorers, and keen-eyed sportsmen have found it to be a pleasurable and profitable resort.

The wildness of the scenery, and the peculiar attractions afforded by the opportunities for hunting and fishing, render a season of camping in the

CLIFF ISLAND, LAKE JOSEPH.

Muskoka region a delightful feature of a vacation trip. There are also numerous inexpensive hotels and boarding houses, both in the villages and among the lakes, at which the tourist may tarry, for a longer or shorter time, as his inclination may lead. Guides may be had at most of these houses, whose knowledge of places to hunt and fish will be of great service.

One of the most noteworthy characteristics of this region is the entire freedom from hay fever experienced even by the most acute sufferers from this malady. This is due to many causes—its great elevation above the level of Lake Ontario, the balsamic odor of the surrounding forests of pine, cedar and balsam, and freedom from damp, owing to the rocky nature of the country.

GEORGIAN BAY.

This great arm of Lake Huron, almost rivaling the lake itself in extent, is a wildly romantic body of water. Its northern and eastern shores are particularly attractive, the waters here being thickly studded with Islands, while numerous coves, bays and inlets contribute to the tortuous windings of the channels in this wondrous archipelago, and to the picturesqueness of the scenery. The islands in the bay are not less than 25,000 in number, and

ON SHADOW RIVER.

range in size from the merest dot on the water to the Great Manitoulin, many miles in extent. They also present a picturesque variety, as to their general appearance. Some are bare and rocky; others are clothed with verdure to the very water's edge. Here, one rises abruptly in castellated pinnacles, and anon another is densely wooded, with inviting shades, offering delightful shelter to the camper.

The fine, commodious steamers of the Muskoka Navigation Company afford a delightful trip among this charming scenery, connecting with the Grand Trunk trains at Midland and Penetanguishene for Parry Sound, passing

RAILWAY system with so many lake ports as are found on the line of the Grand Trunk tends to the development of summer resorts, from the fact that the large lakes present many attractions, in and of themselves. The network of railway lines by which the Grand Trunk System connects Lakes Erie, Ontario and Huron has a large number of lake terminals, some of which are acquiring no little celebrity as summer abiding places for the tourist in search of pleasure, rest, or a healthful climate.

On the north shore of Lake Erie, the following-named places have gained quite a reputation as summer resorts, and are visited yearly by large numbers of tourists:—

Port Colborne, 23 miles west of Buffalo, on the Buffalo & Goderich and Welland

PORT COLBORNE, ONTARIO.

PORT DOVER AND VICINITY.

tuni

the of P man break lake. touring p

Branches, is a place of some 1300 inhabitants, with an attractive resort known as Humberstone, and Erie Park, with a good summer hotel.

Port Dover, the southern terminus of the Georgian Bay & Lake Erie and Port Dover Branches of the Grand Trunk, has a population of about 1300, and offers pleasing inducements to summer visitors in the way of bathing and fishing, as well as attractive scenery in the vicinity.

Port Rowan is reached by the South Norfolk Branch, and is a town of about 800 inhabitants. The bathing and fishing facilities are superior, and a well-protected bay, one of the finest in the Dominion, furnishes ample oppor-

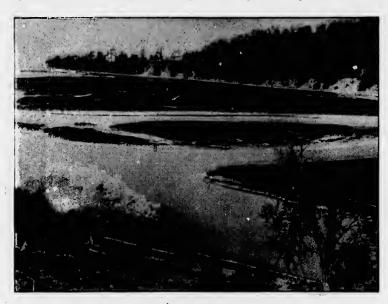

PORT DOVER.

tunity for boating. The place is becoming well known, and is growing in popular favor year by year.

Port Elgin.—Crossing now to the shore of Lake Huron, we find near the terminus of the Wellington, Grey & Bruce Branch, the flourishing town of Port Elgin, with a population of nearly two thousand, actively engaged in manufacturing industries, and enjoying the healthful climate, bathing in the breakers on the beach or in the mineral baths, and sailing the waters of the lake. To all of these, and other enjoyable recreations, they invite summer tourists, and extend the hospitalities of five hotels, as well as private boarding places.

Southampton, four miles beyond Port Elgin, offers many inducements to summer tourists, being pleasantly situated on Lake Huron, with good bathing, boating and fishing facilities, mineral springs, and other attractions. Cottages for summer use are numerous, and a large boarding house, well-kept, at reasonable rates, together with several good hotels in the town, will take care of all who desire their advantages.

Goderich, at the terminus of the Buffalo & Goderich Branch, is pleasantly located, on an elevation 125 feet above Lake Huron. It has fine mineral springs, excellent bathing and boating facilities, splendid bicycle roads, beau-

the

chapt ment some

ATTRILL'S POINT, GODERICH.

tiful drives, and claims to afford "lower livery rates than any other watering place in Canada." It has a good harbor, and the lake boats make this an important stopping place.

Kincardine, at the terminus of the south extension of the Wellington, Grey & Bruce Branch, also lays claim to many watering-place attractions, and has five hotels for the accommodation of tourists. The boating, fishing and bathing facilities are similar to those enjoyed by its neighboring ports, and the place is becoming favorably known to the summer tourist.

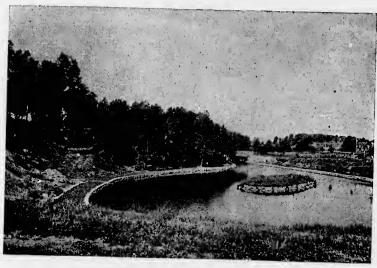

SOME CANADIAN CITIES.

THEIR ATTRACTIONS FOR SUMMER TOURISTS FROM THE STATES OR ELSEWHERE.

st st st

HE visitor to Canada from the States will find much to interest him in the thriving cities of the Dominion. In some of these he will observe a marked contrast with the cities over the border; in others, equally marked similarity; in still others, a striking contrast in different sections of the same city. The latter is particularly true of some of the older cities, in which

the march of progress is being felt, and there seems to be a struggle for supremacy between the ancient and the modern.

MAJOR HILL PARK, OTTAWA.

Many of these cities have already been referred to in the descriptive chapters of this work, and many others are worthy of more extended mention than the limits of this book will permit. A passing notice of some of them must suffice.

lucements with good stractions. buse, welltown, will

watering ce this an

'ellington, tractions,' ng, fishing ing ports, ' Ottawa—The political capital of the Dominion is a point of Interest, both from its importance as a city and from the beauty of the scenery which surrounds it. Some of the most picturesque landscapes in Canada are to be found in its vicinity, and the drives about the city and its suburbs are more than ordinarily attractive. The government buildings are magnificent, occupying a site of four acres, on the river bank, and are built in the Italian Gothic style. The view they present from the river is picturesquely beautiful.

T

The city is reached by the Grand Trunk System, in connection with the Canada Atlantic Railway from the east, and with the C. P. R. from the west, with through sleeping and parlor car service.

A pleasant summer trip is via the boats of the Ottawa River Navigation Co., the round trip comprising one way by rail and returning by water, or vice versa.

Peterboro, Ont., is a thriving city of some 13,000 inhabitants, pleasantly situated on the Belleville Branch of the Grand Trunk, and in close proximity to a fine chain of lakes, which afford excellent fishing, as the bass and maskinonge are abundant. There are plenty of hotel accommodations, and the locality is popular with summer tourists.

Cobourg, Ont., is pleasantly situated on the shore of Lake Ontario, and has a population of some 4,600. It has ten hotels, two of which are kept especially for summer tourists, who are attracted hither by the beautiful scenery and the other inducements which are presented to the visitor.

Port Hope, Ont., seven miles west from Cobourg, is an important lake port, and an excursion point for boat tours on Lake Ontario. It has a population about equal to Port Hope, and good hotels for tourists.

Belleville, Ont., at the junction of the Belleville Branch with the main line, has already been referred to in connection with the Bay of Quinte, and has a population of about 11,000. The attractions for tourists are too well known to need extended description, and as they lie in the highway of travel in the approach to the Thousand Islands from the west, the locality is becoming widely known and deservedly popular. It has several hotels, the Hotel Quinte standing at the head of the list.

Prescott, Ont., on the St. Lawrence River, is directly opposite Ogdensburg, on the New York shore, connected with it by ferry, and thus closely related commercially and otherwise. It is a pleasant abiding place, and popular with summer tourists as a point from which to make excursions on the beautiful St. Lawrence. It has several good hotels, and extensive breweries and other important business interests.

Cornwall, Ont., sixty-seven miles from Montreal, is a town of much commercial importance, having fine water power and large manufacturing enterprises, including cotton, woolen and paper mills, and has a population of nearly 9,000, including the suburbs. Its summer resort, Stanley Islands, about seven miles down the river, is growing in popularity, and is really a delightful resort.

Brantford, Ont., is one of the most flourishing towns in the Dominion, having a population of over 17,000. It is on the Brantford & Tilsonburg Branch of the Grand Trunk System, at the junction with the Buffalo & Goderich Branch. It has extensive bicycle factories, and hence among its summer attractions it naturally includes a fine bicycle track. Mohawk Park and Lake, two miles from the city, and connected by electric line, is a new summer resort, attracting not only the residents, but visitors from abroad.

On the main line of the Grand Trunk, between Toronto and Port Huron, are several important towns, interesting to the tourist, though making no special claims as summer resorts.

GOLDIE'S DAM, GUELPH, ONTARIO.

Georgetown, Ont., at the junction of the Hamilton & Allandale Branch, is a town of some sixteen hundred inhabitants, and of no little commercial importance.

Guelph, Ont., with a population of from ten to eleven thousand inhabitants, is aslo a railroad junction point, being at the intersection of the Wellington, Grey & Bruce Branch with the main line. It wears an air of prosperity, and is an attractive-looking city.

St. Mary's, Ont., is pleasantly situated, on the main line, and is also the northern terminus of the London Branch. The view on the next page will give some idea of its picturesqueness.

This list of attractive towns and cities might be extended almost indefinitely, so numerous are the localities which hold out inducements for the tourist, and in such variety as to meet all tastes; but our limits forbid the use of further space for this purpose.

THE ADIRONDACKS.

LAKE CHAMPLAIN.-LAKE GEORGE.-THE UPPER HUDSON.

يل يل يل

HE "Adirondack District" is a term applied to a tract of country having for its general boundaries the St. Lawrence River on the north, Lakes Champlain and George on the east, the Mohawk River on the south, and the Black River on the west. The en-

croachments of civilization have so trenched upon these boundaries, that the "Wilderness," so called, comprises only the central, unsettled and uncultivated portion of this tract, almost in its primeval state, with a border of settled country on all sides. The limits of this work forbid an extended description of this region, which even now is only partially explored. Indeed, one of its chief delights consists in the new discoveries that the venturesome tourist may make in his search for the game which abounds in its forests, or the fish which teem in its waters.

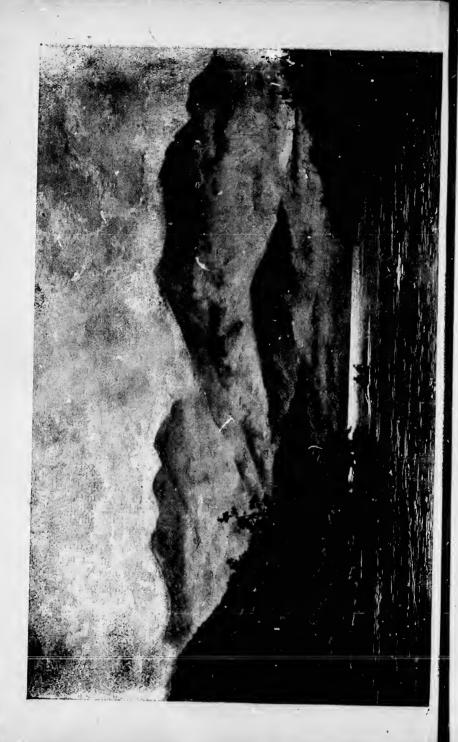

The peculiar character of the wilder portion of this region—a wilderness completely surrounded by civilization—is well set forth in the following extract from the Superintendent of the Adirondack Survey:—

"In these remote sections, filled with rugged mountains, where unnamed waterfalls pour in snowy tresses from the dark, overhanging cliffs, the adventurous trapper or explorer may carry upon his back his blankets and a heavy stock of food. His rifle at times replenishes his well-husbanded provisions, and his ax aids him in constructing, from bark or bough, some temporary shelter from storm, or hews into logs the huge trees which form the fierce, roaring, comfortable fire of the camp. Yet, though the woodman may pass his lifetime in some section of the wilderness, it is still a mystery to him.

. . . . It is a peculiar region; for though the geographical center of the wilderness may be regdily and easily received in the little.

wilderness may be readily and easily reached in the light, canoe-like boats of the guides, by lakes and rivers, which form a labyrinth of passages for boats, the core, or rather cores of this wilderness extend on either hand from these broad avenues of water, and in their interior, spots remain to-day as untrodenen by man, and as unknown and wild as when the Indian paddled his birchen boat upon those streams and lakes. Amid these mountain solitudes are places where, in all probability, the foot of man never trod."

To the lover of curious scenery the Adirondacks present great variety. The region abounds in lakes, large and small, surrounded by mountains, or embowered in forests, and the rivers which find their way between the mountains seem, in some places, to have cut their way through, leaving the sheer precipices on either hand to mark their pathway. A notable example of this is seen in the celebrated Ausable Chasm, not far from where the river flows into Lake Champlain. The galleries, caves, and castellated columns are a study for the geologist and a source of delight to the curious, and several hours may be pleasantly spent in its exploration.

dotted peninsu lakes, an Henry, o plained sess mu-Indian V

The Rouse's bans and The

found d rates, etc the Grar agents o Upper Ausable Pond, with its surrounding mountains, presents a scene wild and picturesque beauty.

Lakes Champlain and George, bordering closely upon the eastern boundary of the Adirondack country, add much to the attractions of the locality as a summer resort, the whole constituting a happy combination of lake, mountain and river scenery, uniting a salubrious climate to fine opportunities for sport with rod, canoe and gun. The facilities for camp life are unexcelled, and the balsamic atmosphere of the Adirondack woods is well known

for its curative properties in cases of lung difficulty.

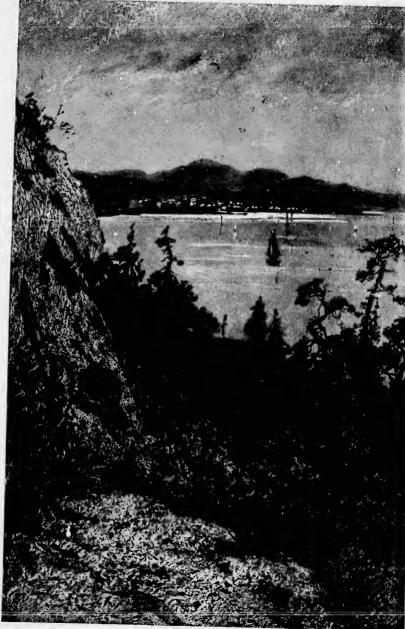

The visitor to the Adirondack region will scarcely fail to include in his trip a longer or shorter stay among the lovely scenery of Lake Champlain and Lake George. These lie directly in the route between Montreal and New York, via the Delaware & Hudson line, which also brings the tourist within easy access to the Catskills and the upper Hudson region, made famous by the quaint legends preserved by Washington Irving. Lake Champlain is a long and narrow body of water, its extreme length being about one hundred and twenty-five miles, its width varying from a few rods to thirteen miles. Its waters abound in black bass, pickercl, perch and other fish, while its irregular shores furnish delightful camping places for those who wish to indulge in outdoor life. Hotels and summer boarding places are sufficiently numerous to meet all demands, and the locality is therefore growing in popularity, as it justly deserves to do.

Lake George, while considerably smaller than Champlain, possesses many of the same characteristics. From its nearness to Saratoga Springs, it furnishes an outlying retreat from the gayeties of that fashionable resort, many summer visitors spending their time alternately between the two localities.

The lake is about thirty-four miles in length, and its surface is thickly dotted with islands, which, combined with its irregular shores and jutting peninsulas, apparently breaks the lake into a chain of four or five smaller lakes, and presents a great diversity of scenery. Forts George and William Henry, or what remains of them, are an answer to the European who complained of America that it "has no ruins," and to the antiquarian these possess much interest, reviving the memories and traditions of the "French and Indian War."

The Adirondacks may be reached by the Delaware & Hudson Route, via Rouse's Point and Plattsburg; also by the Central Vermont Line, via St. Albans and Burlington, or via the O. & L. Division by way of Norwood.

The routes by which these and various other resorts are reached will be found described in the pages following, to which the reader is referred for rates, etc. For time schedules, consult the current folders and time cards of the Grand Trunk Railway System. For information not here given, apply to agents of the Company, at stations or city ticket offices.

THE FINEST PASSENGER TRAIN IN THE WORLD.

A Solid Pullman Wide Vestibuled Train, from Chicago to Niagara Falls, Thousand Islands, The St. Lawrence River, the White Mountains, and the Seaside Resorts of the Atlantic Coast.

OMMENCING Wednesday, June 24, and each Wednesday thereafter, until and including August 26, 1896, the GRAND TRUNK RAILWAY SYSTEM will run a SOLID PULLMAN WIDE VESTIBULED TRAIN from Chicago to Portland, Me.,

as follows:-

Leave CHICAGO Wednesdays, 5.00p. m., arrive NIAGARA FALLS Thursdays, 8.55 a. m.; leave NIAG-ARA FALLS Thursdays, 7.10 p. m., arrive at Kingston Wharf Friday mornings for connection with steamers on St. Lawrence River for daylight ride through the THOUSAND ISLANDS and the RAPIDS OF THE ST. LAWRENCE to Montreal, steamer arriving at Montreal 6.30 p. m. Fridays. The train arrives at Montreal Fridays, noon. Passengers preferring afternoon and evening at Montreal to the river trip, remain on the train. Passengers for the ADIRONDACK region make connection via Prescott and Ogdensburg or Montreal and Plattsburg. Leave Montreal 1.00 a. m. Saturdays, passing North Stratford, 7.07 a. m. (junction point with the Maine Central R. R. for Twin Mountains, Fabyans, Crawford Notch, etc.); passing Groveton (junction of Boston and Maine

Composite Car.

R. R., for Mt. Jefferson, Bethlehem, Profile House, Fabyans, etc.,) 7.22 a. m.; passing Gorham, the gateway to the White Mountains, 8.45 a. m., connecting with stages for

summit of Mount Washington; connecting at Berlin Falls, Bethel and Bryant's Pond with stages for the Rangeley Lakes, and at Danville Junction with stages for Poland Springs, and with Maine Central R. R. for Bar Harbor (Mt. Desert), arriving at

Portland shortly before noon Saturdays, reaching all Seaside and Mountain Resorts in New England on Saturdays.

West bound, train leaves Portland 9.00 p. m. Sunday, June 28, and each Sunday thereafter to and including August 30, arriving Chicago 10.45 a. m. following Tuesdays.

This magnificent train will be composed entirely of Pullman Wide Vestibuled Composite, Dining, Drawing Room, Sleeping, Parlor, Library and Observation Cars, and will consist as follows:—

A Pullman Wide Vestibuled Composite Car, containing baggage compartment, electric light apparatus, Barber Shop, Bath Room, and a commodious and beautifully appointed gentlemen's lounging and smoking room, with buffet and library.

A Pullman Wide Vestibuled Dining Car.

Two Pullman Wide Vestibuled Sleeping and Drawing Room Cars,

Library.

containing every modern appliance for luxury, comfort, convenience and beauty known to the Pullman Company. Each of these cars contains ten full sections and two drawing rooms, with separate toilet annex for each room, and one smoking room.

A Pullman Wide Vestibuled Combination Sleeping, Library and Observation Car; the Observation Room being at the end of the rear car on the train,

The cars in this train are finished in mahogany and vermillion, and are upholstered with beautiful frieze plushes of fawn, empire green and steel blue colors. The carpets are Wilton, and draperies and curtains of silk and silk plush. The combination of the rich tints of the mahogany and vermillion and the blue and gold of the decorations, and the varied shades of the upholstering, together with the carpets, draperies, furnishings, lounges and easy chairs, present an ideal picture of comfort, safety and luxury, absolutely without an equal on any train in the world.

The cars are built with Wide Vestibules, covering the entire platform and steps, and also have the patent anti-telescoping device.

Another special feature is the **Observation Car**, from which an uninterrupted view of the Finest Scenery In the World is obtained. The windows on the sides and rear of car reach nearly to the floor. The sides are composed of bow windows, and in the decoration of this car, the highest achievement of the wood-carver's art is displayed.

Some idea of the beauties of this journey, embracing as it does, Niagara Falls, Thousand Islands, Rapids of the St. Lawrence, the Mountains of New England, and the Sea, is conveyed in various tourist publications issued by the GRAND TRUNK RAILWAY SYSTEM, which will be cheerfully mailed on application to any address. Patrons of this Sea-Side and White Mountains Special experience all the advantages of a personally conducted tour, all the luxuries of first-class modern hotel accommodations, and a variety of scenery not equaled on the American continent, if in the world,

ing as to sections and drawing rooms. To reserve a section, passengers will be required to purchase two railway tickets; to reserve a drawing room, they will be required to purchase three railway tickets, a half ticket, for the purpose of reservation as above, figuring the same as a whole ticket.

On the west-bound journey, the regular Pullman fares apply, namely: For double berth, \$5.50 Portland, Gorham, Groveton, North Stratford, Island Pond or Richmond to Chicago; \$5.00 Montreal to Chicago; \$3.00 Toronto to Chicago. On the west-bound journey, strictly first-class meals served in the dining car at seasonable hours at the usual Pullman rate of \$1.00 per meal order.

Full particulars of this train are to be found in the Sea-Side and White Mountains folder, a copy of which can be obtained from any Agent of the Grand Trunk Railway System.

cago, being calculated upon the basis of one passenger:-Pullman Fares from Chicago

GENERAL INFORMATION.

HE Tourist Fares shown on the following pages cover only the principal resorts reached by the lines of this Company and its connections. If trips from or to other points or additional routes are required, fares will be furnished on application at any ticket office of the Company.

The Tourist Tickets by routes given herein are on sale at the City Ticket Offices of

the Grand Trunk Railway System at the following places: -

Detroit Mich. London Ont. St. Thomas Ont. Woodstock "Brantford "Guelph"	Toronto. Ont. St. Catharines. " Peterboro " Belleville. " Kingston. "
	Kingston
Hamilton	Frescott
Niagara Falls	Ottawa
TICM TOLK XI XI	MontrealQue.
Alexandria Bay	Quebec

Only routes marked ‡ are on sale at principal station ticket offices of the Company, but any of the tickets can be obtained by giving the station ticket agent (or the city ticket agent at places not named above) a few days' notice.

Where the letters "R. W." appear against Round Trip Tours, going one way and returning the other, it is to be understood that they can be reversed at the time of purchase, If more convenient to the Tourist.

The figures and letters appearing under heading of "Form," as for example, T.

32, X 357, are for the information and guidance of agents only.

Tonrist tickets are on sale from June 1st to September 30th, except to certain points which are specially marked, and, unless otherwise specified, are available fo travel until November 1st of the year in which issued.

*Stop-over privileges will be allowed as follows:—

Adlrondack Raliway.

(See D. & H. R. R.)

Bay of Quinte Railway & Navigation Co.

Stop-over allowed on notice to conductor.

Bennington & Rutland R. R.

Stop-over checks good for thirty days issued upon application to conductor.

Boston & Albany R. R.

Stop-over allowed for ten days on notice to conductor.

^{*} Note.—It should be understood that the stop-over privileges extended by the several lines (as noted above) require passengers to take such trains or boats as make stops regularly at the desired stopping places. These stop-over privileges do not apply on tickets limited to continuous passage.

Boston & Maine R. R.

Stop-over for ten days allowed at any station (except between Ware, Concord, Wilmington, Stoneham, Salem, Marblehead, or Reading and Boston) on notice to conductor.

Canada Atlantic Railway.

Stop-over allowed on notice to conductor.

Canadian Pacific Railway.

Stop-over allowed on notice to conductor.

Central Vermont R. R.

Stop-over allowed at any station on notice to conductor.

Champlain Transportation Co. (Steamer on Lake Champlain). Stop-over allowed on notice to purser.

Chateaugay R. R.

Stop-over allowed on notice to conductor.

Citizen's S. B. Co.

Steamers make no intermediate landings.

Day Line Steamers (on Hudson River).

Stop-over allowed on notice to purser.

Delaware & Hudson R. R.

Stop-over allowed at any station on notice to conductor, only on summer tickets bearing final limit of November 1, 1896.

Thousand Island Steamboat Co.
No stop-over allowed.

West Shore R. R.

Stop-over allowed at any station on notice to conductor, on summer tourist tickets bearing final limit of Nov. 1, of the year of issue.

Transfers.—Transfers between stations are not included in these Tourist Tickets unless specially noted. There are not many points where transfers are required, and they are mostly places at which passengers would wish to stop over.

Optional Tickets. — Tickets which read optional by G. T. Ry. or R. & C. N. Co.'s Steamers must be used to destination of coupon on the rail if journey is commenced on rail, or on the boat if journey is commenced on the boat. Passengers can change from boat to rail, or vice versa, only at points from or to which coupons read.

Tickets reading by Delaware & Hudson R. R. between Plattsburg or Hotel Champiain and Fort Ticonderoga will be honored on the Steamers of the Champiain Trans. Co. and vice versa. Passengers have the privilege of changing from rail to steamer, or vice versa, either at Plattsburg or Hotel Champiain (Bluff Point).

Exchange of Tickets.—Tickets of Grand Trunk issue reading by steamer across Lake Ontario between Niagara Falls and Toronto will be exchanged for all-rail tickets on application to the Company's Agents at Suspension Bridge, Niagara Falls or Toronto.

Coupons of tickets of Grand Trunk issue reading by Richelieu & Ontario Nav. Co.'s Steamers between Kingston and Alexandria Bay, Clayton, Round Island or Thousand Island Park will be honored on the steamers of the St. Lawrence River S. B. Co., or will be exchanged by Grand Trunk Railway Agent at Kingston for tickets via Gananoque and Deseronto Nav. Co. Coupons reading Richelieu & Ontario Nav. Co., Kingston to points beyond Alexandria Bay, will not be honored on the St. Lawrence River S. B. Co.'s Lines, but will be exchanged at Xingston Junction or Kingston City ticket office for tickets via Gananoque, on payment of \$1.00 each.

Parlor and Sleeping Car Service.—Commencing June 15th, and continuing through the season of navigation, a Pullman Sleeping Car will leave Suspension Bridge (Niagara Falls) daily, except Sunday, at 4.55 p. m., Toronto, at 8.45 p. m., and run through to Kingston Wharf for the convenience of tourists desiring to take the Richelieu & Ontario Nav. Co.'s Steamer leaving at 5.00 a. m. next day for Montreul via the Thousand Islands and Rapids of the St. Lawrence. Commencing July 13th a Pullman Sleeping Car will in addition leave Toronto for Kingston wharf on Sundays at 8.45 p. m.

From about June 22d until end of August, a parlor car will be run between Toronto and Muskoka Wharf (Gravenhurst), leaving the former place at about 10.35 a.m., daily, except Sunday, and connecting with the Muskoka Nav. Co.'s Steamers for Muskoka Lake points.

In addition to the above, parlor and sleeping cars are run on all through trains. For particulars, see time table folders.

Attention is directed to the fact that the Central Vermont and Delaware & Hudson R. R. trains for Boston, New York, etc., etc., depart from the Grand Trunk depot at Montreal, thus saving passengers who reach Montreal by the Grand Trunk Railway System from any transfer.

Many of the steamer lines, and some of the railroads in the White Mountain District, cease running or make irregular trips prior to the close of the Tourist Season. Nov. 1st, and passengers should consult the advertisements of each Company and be suided accordingly.

When it is desired to make one or more of the side trips shown herein, tickets covering the transportation should be purchased at starting point, as in some cases the cost of trip will be higher when ticket is purchased at junction point.

Meals and berths are extra on all steamer lines, unless specially noted to the contrary.

· Children between five and twelve years of age will be charged half-fare; over twelve years, full fare.

Tickets are not transferable, and if unused in whole or part, application should be made to the General Passenger and 'Ficket Agent, Grand Trunk Railway System, Montreal, for refund of value.

Stages run regularly from Bryant's Pond to Rumford Falls and Andover at 4.00 p. m. week days.

INSTRUCTIONS TO AGENTS

AS TO

Making Fares from Points Not Shown.

ONE-WAY TRIPS .- EASTBOUND.

Optional-Rail or Boat, from Toronto or Kingston to Montreal.

To Montreal.

PRINCIPAL OFFICES WEST OF TORONTO are supplied with Form X 250, reading G. T. R. tó Toronto, G. T. R. or R. & O. N. Co. to Kingston, Prescott and Montreal. Fares to Montreal will be made by adding \$10.00 to local single fare to Toronto.

PRINCIPAL OFFICES BETWEEN TORONTO AND KINGSTON, viz., Whitby, Oshawa, Bowmanville, Fort Hope, Cobourg, Belleville, Napanee, Orillia, Lindsay and Peterborough, are furnished with Form 49-1 T, reading G. T. R. to Kingston, G. T. R. or R. & O. N. Co. to Prescott and Montreal. Fares will be made by adding \$5.25 to local single first-class fare to Kingston.

To Points South and East of Montreal.

When passengers desire to purchase through tickets to Boston, New York, etc., agents at other points will deduct \$11.25 from the fares from Niagara Falls, to find the basing rate from Montreal, excepting those marked as covering continuous passage only. To the basing rate from Montreal, the fare to Montreal, on the basis given above must be added. The Route No. chosen (with those of any side trips selected in addition) must be filled in on Form 2. Agents issuing Form X 250, or X 251, not in possession of the Form to destination, must issue exchange order on Montreal calling for same. Agents west of Toronto not in possession of Form X 250 must issue exchange order on Toronto calling for such forms as they require. In all cases a telegram must be sent the agent at Montreal or Toronto (as the case may be) advising him particulars, so that tickets may be ready for passengers on their arrival.

Agent: between Toronto and Kingston not in possession of Form 49-1 T will draw exchange order Form M on Mr. T. Hanley, Kingston City, advising him particulars by wire.

Between Kingston and Prescott, agents will issue for the tourist routes east of Montreal, by using Form M, to be exchanged at Montreal, advising Montreal agents particulars by wire. These tickets will be all-rail to Montreal.

Care must be taken to in no case exceed the fare quoted for same trip from a point more distant on the direct line.

Round-Trip Tourist Fares to Eastern Resorts.

Agents at points from which fares are not shown will make them as follows:—
Agents between Montreal and Prescott will add fare and one-half, not exceeding
85.00 to the Montreal fares; agents between Brockville and Kingston will add fare and
one-half to Montreal fares for tickets all rail to Montreal, and ordinary return fare to
Brockville for tickets optional rail or steamer to Montreal, on eastbound journey;
agents west of Kingston will add fare and one-half to Kingston Jct., for tickets all rail
to Montreal, and ordinary return fare to Kingston City for tickets optional rail or
steamer to Montreal on east-bound journey; agents west of Toronto will add fare and
one-half to Toronto for tickets all-rail to Montreal and ordinary return fare to Toronto
for tickets optional rail or steamer to Montreal on east-bound journey.

In no case must the fare quoted from a point more distant on the direct line be exceeded.

Where lower through fares are given for corresponding routes in Tariff No. 66 (10), such lower fare should be used.

Agents will pay particular attention to the foot notes, giving additions which have to be made to all-rail rates quoted from Brockville, Kingston, Toronto, etc., in order to arrive at fares for optional tickets.

Round-Trip Tourist Fares to the Great Lakes, Michigan Points, Etc.

Agents at points from which fares are not shown will make them by adding ordinary return or tourist return fare (if any) to the fare shown from whichever of the principal stations on the route of passengers will make the lowest through fare, not exceeding the fare shown from a point beyond, on direct line. For fares to Ashland, Duluth, etc., going and returning by Lake Routes, agents will refer to Tariff 77 (10).

On exhibition in the rooms of the Recreation Department of the Outlook, 13 Astor Place, N. Y., are photographs of many scenes along the Grand Trunk Railway. Information concerning any resort on or reached via our line, and copies of our Tourist Book may be had free on request. Facilities are also afforded, without charge, to inquirers desiring to write in regard to rooms at the Hotels.

The Richelieu & Ontario Navigation Company SUMMER ARRANGEMENTS.

Commencing June 1, the Steamers "PASSPORT," "CORSICAN," "ALGERIAN" and "SPARTAN" will make tri-weekly trips every Monday, Wednesday and Friday, and as soon as business warrants, not later than June 15, DAILY (Sundays excepted). Leaving Toronto at 2.00 p. m.; Kingston at 5.00 a. m., and Clayton at 6.20 a. m., arriving at Montreal at 6.30 p. m., connecting with the Steamers for Quebec and the Saguenay.

RETURNING, leave Montreal at 10.00 a. m., calling at intermediate ports

going and returning.

In addition to the regular line from Toronto to Montreal, from July 13 to August 22, Steamer will leave Kingston every Monday at 5.00 a. m., and **Clayton** at 6.20 a. m. for **Montreal**, calling at all intermediate ports, thereby making a daily service between these dates from Kingston to Montreal.

All these Steamers pass through the enchanting scenery of the Lake of

the Thousand Islands and the exciting Rapids of the St. Lawrence.

MONTREAL-QUEBEC LINE.

The Steamers "OUEBEC" and "MONTREAL" are now running DAILY between Montreal and Quebec, leaving Montreal at 7.00 p. m., and Quebec at 5.00 p. m., calling at intermediate ports.

SUNDAY SERVICE.—Commencing May 24, Steamers will leave Montreal

and Quebec at 3.00 p. m. every Sunday until further notice.

MUSIC.—A first-class orchestra will be on board these Steamers during the season.

SAGUENAY LINE.

The Steamers "CAROLINA," "CANADA" and "SAGUENAY" will perform

the service between Quebec and the Saguenay, and will run as follows:—
Prior to June 13, Steamers will leave Quebec for the Saguenay and intermediate ports on Tuesdays and Saturdays at 7.30 a.m., and from June 16 to July 11 on Tuesdays, Wednesdays, Fridays and Saturdays at 7.30 a. m., and from July 13 until further notice, daily (Sundays excepted) at 7.30 a. m.

Steamers leave Chicoutimi the day following their departure from Quebec, at 9.30 a. m.

For further information apply to

OF THE

NIAGARA FALLS AND RIVER

Can be seen best and cheapest from the Observation Cars of

The Niagara Falls Park River R'y,

THE NEWEST, MOST SOLIDLY BUILT AND BEST EQUIPPED ELECTRIC RAILWAY ON THE CONTINENT.

· ROCK BALLAST. ---

NO DUST. & NO CINDERS. & NO SMOKE.

Letween Queenston and Chippewa, two of the most historic fowns in Canada, this line is situated on the brink of the Niagara River, and passengers do not for a moment lose sight of the seething waters of four inland oceans, as they rush downward to Lake Ontario.

From the Company's specially designed Observation Cars can be had the best possible views of the battle-fields of Queenston Heights and Chippewa (through both of which the railway passes), Brock's Monument, the awful Gorge, the Whirlpool, the Whirlpool Rapids, the Americar and Horseshoe Falls, and the Rapids above the Falls. The whole of the Queen Victoria Jubilee Park is crossed at the very edge of the water, and the beautiful Dufferin Islands are reached by means of three immense steel bridges, which span portions of the roaring river.

A short distance above Chippewa, connection is made with the

RICHELIEU & ONTARIO NAVIGATION COMPANY'S STEAMER.

"COLUMBIAN,"

Which makes regular daily trips between that point and BUFFALO.

THE NIAGARA HOTEL is one of the most attractive and comfortable hotels for tourists and families in this country. It contains nearly 150 large, handsomely furnished and well ventilated rooms, with or without connecting baths, and is located in the quiet, residential portion of Buffalo, adjacent to beautiful parks, and only a short distance from Lake Erie and the Niagara River.

The Hotel is within Ten Minutes' Ride of the Business Center of the City, via Niagara Street trolley line, and is free from noise, dust and smoke.

One of the many pleasant features of "The Niagara" is a large Conservatory filled with rare and beautiful palms, plants and flowers, which adjoins the main rotunda and diningeroom

dining-room.

The Culinary Department is in charge of a competent and experienced Chef, the table and service unsurpassed, and the general surroundings of the hotel are such as to afford to its guests all the comforts of an elegant home.
