* WAR SUMMARY *

THE DAY'S EVENTS REVIEWED

EFORE sending their surplus forces eastward to fight the Russians the Germans yesterday tried to achieve a distinct success at Verdun, and in heavy all-day fighting they captured French first line trenches between Hill 320 and Hill 321, and also the first line trenches in the Thiaumont fortified work. In all the Germans attacked a front of three miles and one hundred and sixty yards, and Times Says Rumor of Earl hey were repulsed in the other segments of this line assaulted, namely, the woods of Vaux, Chapitre, Fumin, and Chenois and the Damoup battery. Where they gained ground is in the region southeast of Douaumont Fort and here, breaking clear thru the first lines of the French, they came down as far as the Village of Fleury. There they were met by French troops, fiercely attacked, and repulsed. On the whole the German gain of ground consists of first line open trenches on a front of perhaps a thousand yards, and the result of their fighting is similar to the results of the fighting at the Darda-nelles a year ago. Sir Ian Hamilton was then able to capture an announcement issued by the colontheir fighting is similar to the results of the fighting at the Dardatrenches, but not to push on to the seizure of a strategic point which dal office. It is evident that the Germans had built great expectations on the results of this last attack, for they used large calibred shells in profuse quantities for the prefatory bombardment, kept up during the night. Now, it is only about once a month or so that the enemy is able to accumulate a sufficient head of the big shells to indulge in all night bombardments. It is true that heavy bombardments Duke of Connaught is incorrect. have been raging round Verdun for many weeks, but for the most part these were conducted by the medium and lighter classes of shells. In the preliminary bombardment for the grand assault that started the struggle in February last three million shells, a great part of heavy calibre, were fired in a few hours by the enemy.

tish gunners, as the case may be, fill these trenches with shell till the enemy can hardly live in them any longer. Then the positions are taken by a counter-attack.

Bukowina continues to be the theatre of continued Russian advance and they have already traversed almost the entire length of this crown land. Three villages west of Radautz have been occupied and the Town of Visnitz, on the Bukowina-Galician border, 35 miles southwest of Czernowitz, has also been seized. The Russian program appears first to be the clearing of the Russian left flank and the securing it by holding the passes of the Carpathians. When this is done it will permit of the making of an advance in southern Galicia, with the probable object of taking possession of the line of the Carpathians as the Russians proceed

The heavy blows inflicted on the Austrians have evidently greatly disturbed the German general staff, which is continuing to hurry forward einforcements from France and Italy to confront General Brusiloff. The fermans say that they made progress in the fighting on this front, but rogress in their sense refers more to gaining time than to anything else. If they take a position, they term this tactical success an advance.

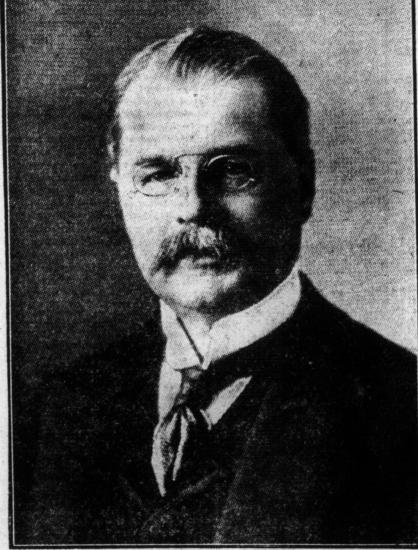

On the rest of the eastern front, south of the Pripet, the Russians still appear to be devoting their energies to the repairing of the railway lines which the Austrians destroyed or partially destroyed in their retreat and to making preparations for another battle. They are also restoring the divisions engaged in the recent heavy fighting to their full strength. As to the next battle it is uncertain whether it will be forced on the enemy again, or whether the enemy will attack the Russians to regain his lost

The French presume that the active artillery firing of the enemy and his infantry attacks in the region of Verdun are now being really undertaken to mask the transfer of large forces from the west to the east. The next thing to look forward to in the west is some form of allied demonstration, or will that be started in the Balkans? Such a system of launching a big offensive is what is known as attacking the enemy in echelon, first, as has been done in Russia; next, say in France, or Italy, or the Balkans, and next in either of the two remaining of these three theatres of the war. To divine the exact plans of the allies would be fruitless, for their endeavors will be to use the element of surprise, such as has been used in Russia in attacking the Austrians on the 275-mile front between the Pripet marshes and the Roumanian frontier.

The action of the French in sending out aeroplane squadrons on nocturnal raids on stations and cantonments of the Germans north of Verdun indicates also that the enemy is shifting about troops. As he is calling men from France to go east, the inference is that troops are being transferred to the Russian theatre from the Verdun region. But it is also probable that the crown prince will keep up the launching of attacks before Verdun all summer, as he launched attacks in the Argonne a year ago. It will be remembered that he occasionally captured French first line trenches then as he has done now, but nothing further resulted from those operations, except that the French, watching their opportunity, retook these when

On the British front the Germans showed signs of activity by emitting gas on a very small part of the line southwest of Messines, but they did not send out their infantry to attack anything. German patrols were driven off east of Wytschaete and west of Pilkelm. The British exploded a mine opposite Haisnes and occupied the lip of the crater. The Germans exploded a mine east of Neuville St. Vaast, but it did no damage to the British positions and caused no casualties. Two British aeroplanes were brought down by the enemy and British artillery obtained direct hits on two Teuton anti-aircraft batteries, causing the ammunition of one to continue exploding for 20-minutes. It also silenced a German battery west of Lens.

MILLIONS IN TAX REACHES TO KNEES Number Does Not Indicate the

ness. Tells How She Made Her Hair Grow.

Mrs. Esther Emery is the fortunate possessor of marvelously beautiful hair, which, when loosed from its coils, falls to her knees. Moreover it is of soft, sliky and fluffy texture and in color a glorious glossy gold. Yet just one year ago she was threatened with baldness. Urged to tell how she had obtained this wonderful growth in so short a time, she said: "Had anyone told me such marvelous results could be accomplished so quickly, I positively would not have believed it. Twelve months ago my hair, which then reached barely to my shoulders, was falling out at an alarming rate and growing very thin, actually exposing the bald scalp in several spots. It was dull and lifeless in color, turning grey in patches, and very dry and brittle. My head was covered with dandruff and itched like mad all the time. I tried fully a dozen different hair tonics, but they were all the same and never did me a bit of good. One day I chanced to read in my home paper of a simple home prescription to make the hair grow that was recommended by a well known physician. It said that by taking ordinary Lavona de Composee and mixing with Bay Rum and Menthol Crystals and applying to the scalp each night with the finger tips new hair would grow very rapidly. I decided to try it and I had my druggist mix 2 oz. of the Lavona de Composee with 6 oz. of Bay Rum and ½ drachm of Menthol Crystals, and started to use it. My, how quickly my hair did grow. First the hair stopped falling, the liching ceased and the dandruff disappeared. Then tiny little hairs appeared all over my scalp. These grew and grew as tho nothing would ever stop them. They are growing yet, and while, of course, I have used the treatment steadily and expect to continue it at least until my hair reaches the floor, I might have stopped and been perfectly satisfied at the end of three months. I think that any woman can get long, thick, beautiful hair by using this prescription as I have recommended it to several friends and all are delighted with the result. The prescription is very treasury, yesterday. Hon. T. W. Mchitches where people had not understood the working of the act, the tax had gone into effect without friction. Now at 50 a miracle of vitality and his face. which proves conclusively the as-tonishing power of nuxated iron to restore strength and vitality even in Not long ago a man came to me who was nearly half a century old and asked me to give him a pre-liminary examination for life insurance. I was astonished to find him with the blood pressure of a boy of 50 a miracle of vitality and his face beaming with the buoyancy of youth.

As I have said a hundred times over iron is the greatest of all strength builders. If people would only throw

Iron is absolutely necessary to enable your blood to change food into living tissue. Without it, no matter how much or what you eat, your food merely passes through you without merely passes through you without doing you any good. You don't get the strength out of it, and as a consequence you become weak, pale and sickly looking just like a plant trying to grow in a soil deficient ent in iron. If you are not

sickly looking just like a plant trying to grow in a soil deficent in iron. If you are not strong or well you owe it to yourself to make the following test: See how long you can work or how far you can walk without becoming tired. Next take two five grain tablets of ordinary nuxated iron three times per day after meals for two weeks. Then test your strength again and see for yourself how much you have gained. I have seen dozens of nervous run-down people who were ailing all the while, double their strength and endurance and entirely get rid of all symptoms of dypepsia, liver and other troubles in from ten to fourteen days time simply by taking iron in the proper form. And this after they had in some cases been doctoring for months without obtaining any benefit. But don't take the old forms of reduced iron, iron acetate or tincture of iron simply to save a few cents. You must take iron in form that can be easily absorbed and assimilated like nuxated iron if you want it to do you any good, otherwise it may prove worse than useless.

Many an athlete or prize fighter has won the day simply because he knew the secret of great strength and endurance and filled his blood with iron before he went into the affray, while many another has gone to inglorious defeat simply for the lack of iron.—E. Sauer, M. D.

HIPPODROME.

"Bobby Heath's Song Revue of 1916," a miniature musical comedy that embraces the best of the season's song successes, pleasing dancing features, bright, clean comedy and clever instrumental selections, headlines the bill at the Hippodrome next week. "The Waifs," a new Triangle feature, with Jane Grey and William Desmond in the stellar roles, is billed as the special feature film. Martini and Maximilian have made millions laugh with their funny burlesque of magicians, illusionists and strong men, while Major Doyle, the lilliputian monologist, has some clever material. BIG BILL AT STRAND.

A feature of exceptional strength will headline the bill at the Strand Theatre for the first half of next week. This will be "For a Woman's Fair Name," a strong V.L.S.E. production, with klobert Edeson in the leading role. The photo-drama deals with the problem of whether a man should sacrifice a hidecus and unjust accusation, to save a woman from the forked tongue of scandal. The bill will also include a comedy, as well as the Strand Topical Review. The last named will include pictures of the recent garden parties at Casa Loma and Normal School, and the review of troops at London by the minister of militia.

To Keep Skin in Fine Condition All Summer

It would be much better for the skin if little cream, powder or rouge were used during the heated term. Mixed with perspiration, dust and grime, these things are anything but beautifying. Ordinary mercolized wax will do more for the complexion, and without giving an oily, streaked, spotted or pasty appearance. It is the ideal application for the season, as it not only keeps the pores clean, but daily removes particles of scarf skin which have been soiled by dirt or weather. By constantly keeping the complexion clear, white, satiny, it does more toward perpetuating a youthful countensance than any of the arts or artifices commonly employed. One ounce of mercolized wax, obtainable at any drug store, will completely renovate the worst complexion. It is applied at night like cold cream and washed off in the morning.

To keep the skin from sagging or wrinkling, or to overcome such condition, there's nothing better than a face bath made by dissolving 1 ounce powdered hazolite in ½ pint witch hazel.

Cockburn Asks Big Sum for Alleged Wrongful Dis-

A. A. Cockburn brought an action for \$9000 damages, alleging wrongful dismissal, against the estate of the late yesterday before Mr. Justice Middle-ton. He declared that he was em-ployed by the Dominion Linen Mills under bond given by the Kloepfer estate, and a Mr. Dodds of Guelph, and that he was dismissed two years be-fore the expiration of his term. The defence was that plaintiff purchased the assets of the linen mills and made Catchy songs, bright costumes and a bevy of the handsomest women in burlesque round out the Dandy Girls a large profit, and later became sales agent for the company. It is alleged that he suffered no financial damage.

Judgment was reserved.

Last year he had no alternative, but a similar obstruction proposal. We suggested that the tracks be laid on Yonge street on an agreement without prejudice to either party, but this proposal did not suit the mayor. He tore up the tracks and let the people walk thru the snow and the rain. All of which they will dutifully remember. Now the city has to do what it might have done at first without any difficulty, and in addition it will have some extra expense in tearing up the payement on Yonge street which was laid so recently.

The mayor states that he has recovered the franchise for the city on the portion of the street upon which the track was torn up, but this does not affect the contention that the by joining the lines up and using the fallals of his career as a "Soldier's Joy," he will make more progress.

New Zealand Leads Canada

The able under the voluntary system was recruited in Great Britain and New first, and reminds one of a list of sleep-Zealand that the compulsory policy was adopted.

It is doubtful whether Canada would furnish the spirit of New Zealand even in a worse crisis than the present. Things could not be much worse than the king and his ministers in Great Britain have represented them to be. We cherish the hope that the worst is past, and that the crisis of the war has been reached, but the simple fact is that the worst is never past until a war is over and peace declared. We do not know what development of the military situation may throw us back any day into a condition which would entail worse sacrifices than any we have yet been

More Advice for the Farmers

W. Sanford Evans has been telling the western farmers that they should not rush their wheat to market as soon as harvested. Not only do they glut the market and depress the price, but, according to Mr. Evans, they add heavily to their burdens of transportation charges. So great is the rush to get the wheat out that the railways have to provide rolling stock for three months out of the year which lies idle for the rest of the time, and the number of grain carriers on the Great Lakes is in his opinion unnecessarily large.

their crops, and as a rule the farmer in the Canadian west is urgently invited to do so. With the threshing he gang come representatives of his creditors, including the government, the bank, the loan company and the implement manufacturer. He is almost forced to sell, and usually sells at a lower price than his neighbor south of the international boundary line. The reason is that our exportable surplus of wheat is often 80 per cent, of the crop, while the exportable surplus of our neighbors will not am-

Johnston. lize on his wheat compels the roads to double their motive power and rolling stock and the inland navigation companies to treble their tonnage, intereby leading to a great advance in freight rates. But if increasing tonnage would decrease the cost of transportation, but we find with less tonnage on the Atlantic in 1916 than there was in 1906 that the cost of carrying a bushel of grain has advanced from 5 cents to 45 cents a bushel.

We fear it will always be found that the farmer will have to divide what he gets for his wheat with the transportation, but the farmer will have to divide what he gets for his wheat with the ramsport attion companies. Doctor Wishes to Restrain Motor Co. From Disturb ing Home Life.

Judgment was given at Osgoods Hall yesterday by Mr. Justice Lennox for \$894.05, with interest from August 11, 1915, the full claim of the Bank of Ottawa in their suit against Thomas E. Smith and others. Action was entered to recover the above sum with interest, being the balance of an overdraft due by the Great Western Coal
Co. Defendants were security for
loans to this company which the Bank
of Ottawa made from time to time,
Chancellor Boyd made an order that
the question of whether Harold Cronk
or his wife shall have the custody of
their three-year-old child shall he their three-year-old child, shall be tried by a judge immediately after the close of the long vacation. The father is to have the custody of the child meanwhile, with an understanding that the child shall be kept within the jurisdiction of the court. W. K. Murphy, jr., appearing for the mother, requested that she might have the privilege of seeing the boy from

time to time. Objection was taken to this by T. N. Phelan, for the father, who stated that on Tuesday, the mother, on leaving Osgoode Hall, had icst one in the family and has no signs of the old ailment. We cannot say too much for 'Fruit-a-tives' and would never be without them.

GIVE ME A CHANCE TO CURE YOUR RHEUMATISM FREE

Mr. Delano took his own medicine. It cured his rheumanism after he had suffered tortures for thirty-six years. He spent thousands of dollars before he discovered the remedy that cured him, but I will give you the benefit of his experience for nothing.

If you suffer from rheumanism let me send you a package of this remedy absolutely free. Don't send any money. I want to give it to you. I want you to see for yourself what it will do. The notture shows how rheumanism twists and distorts the bones. Maybe you are suffering the same way. Don't. You don't need to. I have the remedy that I believe will cure you and it's yours for the asking. Write me today. F. H. GARDEN TRACTOR USED AS STATIONARY ENGINE

One Gallon of Gasoline Runs Engine Five Hours in Field Without Difficulty.

A garden tractor with covers about twice as much ground as a handwheel cultivator and can be used in numerous ways as a stationary engine, has recently been placed on the market by a Minneapolis company. The machine has two power wheels and is guided by handles like a cultivator; to the handles are attached the finger latches by which the engine is governed. Back of the two main wheels are two caster wheels which can be adjusted to regulate the depth of the hoes or knives accurately. The machine is so made that it can be fitted with cultivating attachments of various makes and varieties, and can be set to suit rows of various widths. The tractor is 25 in. high, 17 in. wide, and there is a space of 10 in. between the wheels; it weighs 449 lb. Operating a belt as, for example, for a cream separator, fanning mill, pump, etc., it develops 4 h.p. and, on a draw-bar, 2 h.p. Its sped is from one to three miles per hour. By removing the wheels, etc., the engine can be mounted on a binder and made to operate it so that only two horses are needed to pull the machine. The tractor can be attached to a lawn writes: "About ten years ago I was troubled with severe attacks of neuralgia and nervousness, and was for several months so bad that I could properly along the several months ago bad that I could properly according to the several months ago bad that I could properly tractor can be attached to a lawn mower. One gallon of gasoline will run the engine five hours in the field, and seven hours on a belt. Truck gardners have found the machine especially useful.

The East Riverdale Recreation Centre held their weekly athletic meet last night. G. F. Fitzsimmons and A. Taylor acted as judges for the 62 boys who made entries in the following events: 100 yards, running broad jump, pole vaulting, and bicycle racing. There were four heats in the bicycle race. The first man in each heat went in the final, which resulted in R. Cooper coming in first, R. Ponton and J. Cleghorn a close second and third. R. Cooper did some very fine pole vaulting for a junior, clearing 7 feet 5 inches. Judging from the night's work-out, the boys of this centre are going to keep up the reputation won by our members, who are now making names for themselves as soldiers. PITTSBURG. June 24.—When James J. Callahan assumed the management of the Pirates he didn't know more than three players or the team. He decided to make friends with the men by treating them royally. But Cal soon discovered that good fellowship amounted to little or nothing. He arrived at the conclusion, therefore, that kind words and leniency did not obtain the desired results. So he changed his tactics and notified the Pirates that he intended to rule them with a rod of iron. He proceeded to enforce discipline without fear or faver, and used the big stick in such a manner that several easy going vetting with the process which were a made to understand that they would have be show more energy and ambilion or give way to younge pleases.

he was suspended indefinitely for the rowdy tactics of yesterday, and, in addition, a substantial fine was tacked onto the other sentence.

Shocker was in uniform, but was fined \$10 for his part in the comedy. However, Manager Birmingham sat in the stand in the rear of the Toronto bench and directed the play from that point, the umpires refusing to see him.

Uunlike yesterday's affair, the contest ran along as smoothly as a sled down hill, not a whimper being made by anybody. There were no kicks against decisions and no spectacular stunts. But the came was crowded with sensational plays in the field, especially by the Leafs, Herbert was given the finest sort of support, one hand catches and stops, brillent catches in the outfield and base hits cut down right and left featuring the work of the men behind him. Peters worked for the locals, and, while in splendid form, was hit hard, the outfield having all the work it could attend to handed out by the visitors. Eayrs, in left field, on three occasions pulled the ball out of the air from drives that had all the earmarks of long hits. Powell also had almost uncanny luck in nailing files generally good for two or more bases. Nothing but the almost phenomenal fielding of the Grays' outfield saved Peters from a bad beating.

The Leafs put up a grand game, and one that will land five games out of six with the breaks even. Both of the errors made by the visitors were on ridiculously eays chances, both Thompson and Murray dropping fly balls that fell squarely into their hands, Murray's muff costing a run, while the slin of Thompson had no direct bearing on the result. Rehg's error in the fourth was directly responsible for a run, the slip being due entirely to carelessness.

Tutweller doubled in the second, took third on Fabrique's out to McTigue, and scored on a wild pitch.

With one out in the third, Powell hit to Graham and beat his toss to Herbert. Sloan flied to centre, but Murray, after making the catch, dropped the ball. Onslow forced Shean at second, Powell taking

Emphasizing Style For Stout Men

VOU'LL find most stores carrying clothes for stout men; merchandising their stocks with the idea that FITTING a man ought to be sufficient satisfaction.

HICKEY service to stout men goes beyond mere fitting-we provide quite as fine style as for men who are more slender-it's a point to consider.

HICKEY Suits for stout men are not creations of mammoth bulk, but rather enlarged models of the very styles that are in vogue. All sizes. Priced at

BASEBALL GOSSIP

Yesterday in Brooklyn began a base-ball series that has got all the fans of Greater New York by the ears. It brings together the leading Brooklyn Superbas and the New York Giants. Last week it would have been a battle between the leader and the second in position, but as it is, the games, which extend thru next Tuesday, are fateful ones. The Giants will be away from the jinx which has lurked around the Polo Grounds most of this season, and Ebbets' Field is the scene of the battle. Uncle Robbie's team has held the lead in the National League for more than a month, a circumstance which has caused much wonder and enthusiasm among the Brooklyn devotees of the game. The Giants, the now hammering along in third place, have a chance to drag the Dodgers from the top, whether they get there themselves or not. These teams have played against each other in five games this season, Brooklyn winning four of them, with a total of 27 runs to 18. The the Robins were outhit 59 to 48, they earned 19 of their runs against 16 by the Giants, the latter making 11 errors against six by Brooklyn. The series will be watched with much interest all over the country.

Eddie Mulligan, the Cub shortstop, is the sensation of the western baseball world, according to a Chicago critic. After showing a few flickers of brilliant work last year. Mulligan just escaped going to a minor league club for seasoning, tho Joe Tinker substituted him for Mike Doolan occasionally. Suddenly Mulligan seemed to find himself, and began playing like a house after and hitting like a demon. Tinker was so impressed that he installed him permanently and asked waivers on Doolan. Mulligan has kept right on improving, and Tinker is now not a bit foorry that Doolan took up with McGraw. Mulligan is a youngster and great things are predicted for him.

The Boston Red Sox deserve a vote of thanks for putting a stop to the Yankees. Bill Donovan and his men were winning too many games to please some of the managers in the league.

Bert Niehoff, the Phillies' second baseman, has been discredited more than any other player in the game, but he pays in thirty no attention to the press notices and factory.

Lee Fohl has added two more pitchers to his staff in Dana Filligim, the star hurler of the South Atlantic League, and John Ferguson, said to be the best in the Ohio State League. Fohl certainly will need more pitchers if he intends to keep his team up at the top of the list.

Pitcher Foster of the Red Sox may be finxed for the rest of the summer after pitching a no-hit game. Jimmy Lavender says he does not want any more space in the hall of fame, for it was too expensive for him last year.

The pinch hitters' craze, with which baseball managers appear to have become afflicted, has a strong opponent in B. B. Johnson, president of the American League, according to a statement made public by him. He declared that he favored baseball legislation to curb the pinch-hitter habit. Mr. Johnson thinks that managers by constantly shifting their pitchers are not only injuring the pitchers, but are reducing the interest felt by steady patrons of the game in the players.

PARIS.—The French Government's borrowing operation in foreign securities is taking on important proportions in the American as in the other foreign list, One institution alone has already secured 120,000,000 frances (\$2,400,000) in Americans, and it is felt by steady patrons of the game in the players.

ENGINE OF MODERN TYPE HAS BIG POSSIBILITIES

A rotary steam engine which may work great changes in the designs of steam prime movers because of its simplicity, compactness, and power, is now being brought out in the States and in Canada. In principle it bears some resemblance to the steam turbine. The steam enters the centre of the engine thru a stationary sleeve about which revolves a central rotating member or shaft, to which two pistons are attached. The steam on passing thru a port in one of these pistons enters one of three steam chambers that surround the shaft; its expansion causes the shaft to revolve. As it turns around, the pistons successively come in contact with three conical cylinder heads which revolve on their axes and by reason of a pocket in the side of each allow the pistons to pass. This revolving of the shaft and pistons likewise serves to open ports which permit the cylinders to exhaust. The engine can be reversed at any speed without jar or shock, since the inertia of the mass of steam is cushioned

Large Number, Including But Many Students, Not Accounted For.

PETROGRAD, via London, June 24. The los of life on the steamship Mercury, which was sunk by a mine in the Black Sea, has been undoubtedly large from late reports received in

regard to the disaster. The Mercury was traveling from Odessa to Kherson with eight hundred passengers, including a large number of college students, who were bound for their homes for the summer vacation. The vessel struck the thirteen miles from Odessa and two miles off shore in a rough sea. The bow was blown off and the ship sank ir five minutes. Only two lifeboats were launched, and both, laden with

pessengers, were overturned.
Thirteen boats which were sent the rescue were unable to appro the scene owing to the heavy sea, but succeeded in rescuing passengers who were strong swimmers or who float to them on fragments of wreckage. In this way a majority of the pas-sengers were saved, but a large number were unaccounted for. Twenty eight bodies have been washed ashore

The disaster was witnessed by the captain of a Russian steamer, who, however, did not attempt to come to Police booths are being installed by the rescue because he believed that the city of New York, at the intersective ship had been torpedoed and that his own vessel would suffer the same

WHEAT TOUCHES LOWEST LEVELS

Chicago Market Closes Heavy on Lack of Export Demand.

CROPS GROW BETTER

Only Manitoba Grain Finds Shipping Outlet at Scaboard.

CHICAGO, June 28.—Wheat drop-ped today to the lowest prices yet this season, going for the first time under \$1.00 a bushel. Enlarged crop estimates and the lack of export deestimates and the lack of export demand appeared to be chiefly responsible. The market closed heavy, 2 5-3 to 3 1-8c net lower, with July at 93 3-4c. and Sept. at \$1.02 3-4. Other leading stables too. all underwent a setback, corn 1 5-8 to 2 1-2, oats 5-8 to 1 1-12c. and provisions 12 1-2 to

of the wheat market thruout the session. The most acute weakness, howsion. The most acute weakness, how-ever, was shown in the last half of the day. This period was subsequent to the issuance of a comprehensive crop report by a leading expert, who represented that a notable improve-ment had taken place of late in con-ditions in the eight principal winter wheat states. Better weather for the a handicap to the bulls, and was inthe early declines in the market. In the final hour of wheat trading, the effect of the absence of shipping call, especially the dearth of any industry from Europe, because more and more apparent. The total shipping sales here amounted to only 1000 bushels. No export business, whatever, was noted barring 500,000 bushels at the seaboard, all from Manitoba. Coarse grains weakened with wheat Warmer temperatures in the corn belt brought about larger offerings belt brought about larger offerings from the country and more than offset the influence of a Liverpool upturn due to prospects of a removal of taxation of the alcohol industry in Argentina. In the cats market rust reports from Nebraska and Illinois attracted attention, but were ineffective to stop declines. Lower prices on hogs left provisions without support. Recent buyers of futures were the largest sellers.

LONDON. June 23.—The stock market, while steady, was still subdued today. Dearer money is checking expansion in most directions, and a revival of activity is not anticipated until the remaining minimums are removed. Russian issues reflected good war news, and Japanese, Brazilian and colonial bonds, and a few specialties in the industrial sections were steadily supported, but home securities sagged, and American shares finished uncertain on the Mexican situation.

Money and discount rates were firm, and there was a good demand for treas-

HEAVY SHORT SELLING

Bears Had a Good Day-Tennessee Copper Slumped Abruptly.

NEW YORK, June 23.-Unsettlement verging at times upon demoralization overtook today's market, developments in the situation with Mexico affording an excuse, if not an actual reason for a fresh outburst of liquidation. The decline gathered additional impetus from the extensive operations of a confident short interest, which engaged in a succession of drives against the weaker

Chief among these were Tennessee Copper, which opened with a decline of 5 1-4 points on overnight announcement of the suspension of the divid-end, subsequently extending its loss to 8 1-4 points; U. S. Industrial Alcohol ,which broke 12 or a total of 19 points in two days; shipping shares, which were lower by four to five; motors 2 to 3, and the more active

motors 2 to 3, and the more active metals, zinc issues excepted, 1 to 9. That the severe reversal was largely made possible by the existence of an over-extended bull account in the more mercurial specialties was demonstrated by the firmness of representative stocks. including dividend paying rails and U. S. Steel. These resisted pressure through making only

paying rails and U. S. Steel. These resisted pressure thruout, making only nominal declines at most.

Series of Declines.

The trading consisted of a series of declines, relieved temporarily by feeble railles, but each new selling movement brought prices to new low levels. Many "stop loss" orders were uncovered as a result of impaired margins, especially in the intermediate session, when support for some issues seemed utterly lacking. In the final hour, however, railies, to which short covering contributed, effected a partial readjustment, Alcohol for instance, regaining almost half its loss. Total sales amounted to 725, our sales amo

000 shares.
General news, in its broader application to market values, was in most respects encouraging. Local banks are expected to show further additions to their reserves, countrywide bank exchanges are well sustained, and time money is hardening to receive to increased mercantile tained, and time money is hardening in response to increased mercantile demands. Railway earnings as exemplified by Southern Pacific, which reported a net increase of \$1,442,000 for May point to excellent transportation conditions, and more gold was received from Canada, bringing the total beyond the \$75,000,000 mark.

LIQUIDATION LIGHT

New York a Direct Influence on Local Market, But Sales Are. Quite Small.

With a decline in prices, the Toronto with a decline in prices, the Total stock market showed a disposition to drift into further dulness yesterday. The Mexican affair is having quite an influence on financial sentiment in the United States, and as many Canadian stocks have had quite a following in New York during recent months, it is not unnatural that sales of holdings may be made until the situation clears. Locally except for the annual statement of the Maple Leaf Milling .Co. there were no market developments. This company showed earnings of 10 per cent. for the year on the common stocks, com-pared with 28 per cent, the previous year and 3.6 per cent. the previous year and 3.6 per cent. two years ago.

The earnings for the year 1914-15 were accepted at the time as obnormal and comparisons were ac-cordingly not made except with this in view. The market evinced a little disappointment, however, and the stock sold down a point from 93 to 92. The usually active and speculative issues were inactive and without exception easier. The small amount of stock coming on the market after the prolonged advance is considered the best evidence of the stability of the position.
