

WAS A PRISONER  
IN EAST AFRICA

The terrible conditions which prevailed in East Africa under German rule were described last night by Rev. Dr. T. B. Westgate when he addressed a large meeting of men in the Church of England Institute and asked for support for missionary work among the Indians and Eskimos in Canada. Dr. Westgate had visited St. John on two previous occasions, fifteen years ago and five years ago. He was recently appointed director of the Anglican missionary work among the Indians and Eskimos in this country. Before returning to his headquarters in Winnipeg he will visit several places in the province. He is the guest of Rev. A. L. Fleming during his stay here. Dr. Westgate served as a missionary in German East Africa before the war and was a prisoner of war of the Germans there for two years. He afterwards served with the British forces in East Africa. Last night he gave an interesting account of the work of the Canadian Anglican Church among the Indians and Eskimos. This work was carried on by the English authorities for more than one hundred years, but they could no longer maintain it, he said. He drew on his own experience in Africa to explain why the English authorities had been compelled to give up the Canadian work. His personal experiences under the German colonial policy had been appalling, he said. That policy was according to the Bismarckian ideal of "blood and iron" and twenty years of its barbarous methods had resulted in diminishing by 200,000 the population of German East Africa. He did not hesitate to say that he saw the hand of God in the fact that Germany had been deprived of her colonial empire and he regarded the British mandate to assume charge of the German territory in East Africa as the call of God to give these people the best spiritual care and government. He said that in the United States had wasted their money in assuming the responsibility for missions to the Eskimos and Indians the Canadian Anglican Church was helping the authorities in England shoulder their heavy responsibility to the people who had been rescued from the German yoke of tyranny, since the home church was now conducting missionary work in what was formerly German East Africa.

that the association was in favor of an export embargo on what it bought but not on what it was its business to sell. Mr. Geoffron challenged the statement of the association that "the American mills which are now kept in operation by the use of Canadian pulpwood are for the most part old and of an obsolete character with an extremely high operating cost. They are in any event being gradually abandoned or converted to other uses as their share of the output is taken over by newer mills; but this process is slow and will last for many years." Mr. Beck modified the statement, admitting an exaggeration. He said that the statement may be made to read to the effect that some of the American mills had old machinery.

**WHEN A NEW TRIBE IS DISCOVERED**  
Occasionally a new tribe is discovered that has lived for ages untouched by the diseases of civilized races, which destroy them as soon as they take on civilized habits. Why does an ancient race perish from tuberculosis, cancer, kidney and other diseases, under the influence of civilization? The answer is the white man's food, robbing of its growth and repair substances, destroys the "protective" elements of the blood, lessening resistance to disease. One serious defect of civilization is the failure to think about our foods. If we did, we would know that if we refine out of our most important food stuffs, the grains, their "protective substances," decay, disease, and premature deaths must follow. Yet we do that in making white flour, refined cereals, polished rice, white sugar, etc. Our blood must be alkaline or we perish. Foods must keep it alkaline, yet it is their alkalis we remove when we refine out of the grains the brown flour. This makes their "protective" acid blood lowers resistance, strains vital organs and permits disease germs to destroy the body. Roman Meal is the only alkaline cereal. It corrects the acids of our cereals, meats, and sweets. It is therefore of the utmost importance that Roman Meal should be served to your family. It makes the most delicious porridge on which to start the day. Added in 25 per cent proportion to white flour it restores the valuable growth and repair element lost in making four white and improves in flavor everything you bake. Roman Meal is sold by grocers everywhere.

**HOW THE MONCTON TRANSCRIPT CUTS COAL COST**  
"The Robb Coal Carburetor which you recently installed in the Transcript Building is giving us splendid satisfaction. We find that it will be the means of saving us a considerable portion of coal, probably twenty or twenty-five per cent."  
That's the experience of all users. Installed in your furnace door, it automatically feeds oxygen to the fuel bed, igniting gases that used to be wasted. No cost of operation—and the small cost of installation is more than returned the first season in reduced fuel bills. Write for illuminating circular.

VANCOUVER'S GROWTH.

A despatch from Vancouver yesterday said that grain shipments and bookings for the current season to date are 18,178,801 bushels, compared with only 19,169,628 bushels in the whole of last season, although only the first quarter of the current season is past.

In a recent issue of the Vancouver Sun are various news items which show that the Pacific Coast city is progressing in other ways. Thus three vessels were chartered in one day to load lumber for Japan.

With regard to building in Vancouver, the value of new structures erected this year is estimated at \$2,200,000, or \$3,000,000 greater than in the previous year if the Ballantyne pier is excluded.

THE WEST AND RAILWAYS.

Hon. Ernest Lapointe, in the course of a speech in Saskatoon last week, made some observations on the Canadian National Railways.

"I am glad indeed that they have already shown such a wonderful change. I was told in Winnipeg the other day by gentlemen who are far from being friendly to the government that the best action and most commendable of the government since it came into power was the appointment of Sir Henry Thornton.

Mr. Lapointe's reference to Sir Henry Thornton was applauded by his western audience. The Saskatoon Star, however, was by no means satisfied with the speech.

"For long weary years the people of Saskatchewan have clamored for a salt water shipping port of their own, for the opening of the Hudson Bay route, for direct access to the markets of the world with their grain, cattle, hogs and dairy products.

The morning despatches carry the news that the Moderationists in Saskatchewan and Ontario will demand a referendum on the liquor question. The result in Alberta has given them new courage.

Attempts to restore the monarchy in Germany are not likely to meet with general sympathy. That country has had enough of the Hohenzollerns.

LOYD GEORGE

Lloyd George sailed on Saturday last for England, after a veritable triumphal procession through Canada and the United States. He is a man of magnetic personality, and those of us who saw and heard him when he was in Montreal can readily realize the charm of the winning ways of the Little Welsh wizard.

It is apparent that the English speaking peoples of this continent were as much impressed as those at home with the popular verdict that he had contributed more than any other individual British statesman to the winning of the war.

**SYMPATHY FOR CAT LANDS HER IN JAIL**

Irish Native Breaks Store Window to Save Trapped Animal.

New York, Nov. 7.—Because Policeman Just of the West Sixty-eighth street station doesn't know an expression of anguish on a cat's face when he sees it—or maybe because Mrs. Catherine Smith doesn't know the difference between an expression of impatience and an expression of anguish on a cat's face—Mrs. Smith is locked up in the West Thirtieth street station charged with malicious mischief, and the cat is held at the West Sixty-eighth street station as evidence.

Mrs. Smith, who is 33, was passing the furniture store of Lech Ginsberg at 146 Amsterdam avenue. She saw many children looking in the window of the store and looked to see what it was all about. She saw a cat with an expression on its face which she thought was the fruit and symbol of unbearable pain.

The cat had become wedged between a picture of a castle in Malta, where Maltese cats come from, and the plate glass window. The picture was in a heavy frame, held against the window by a table, and the cat was caught so tightly in the trap that it couldn't squeeze.

Mrs. Smith hurried to the nearby station house and reported a cat was caught in a ptery in Ginsberg's window and had an expression of anguish on its face. Lieut. Hamill sent Policeman Just around to see about it. Policeman Just carefully scrutinized the cat and reported back to Lieut. Hamill that it was not a cat at all, but a grey kitten, and that it did not have an expression of pain upon its face, but merely an expression of impatience. Moreover, the door of Ginsberg's emporium was soundly locked and Ginsberg's address was not known.

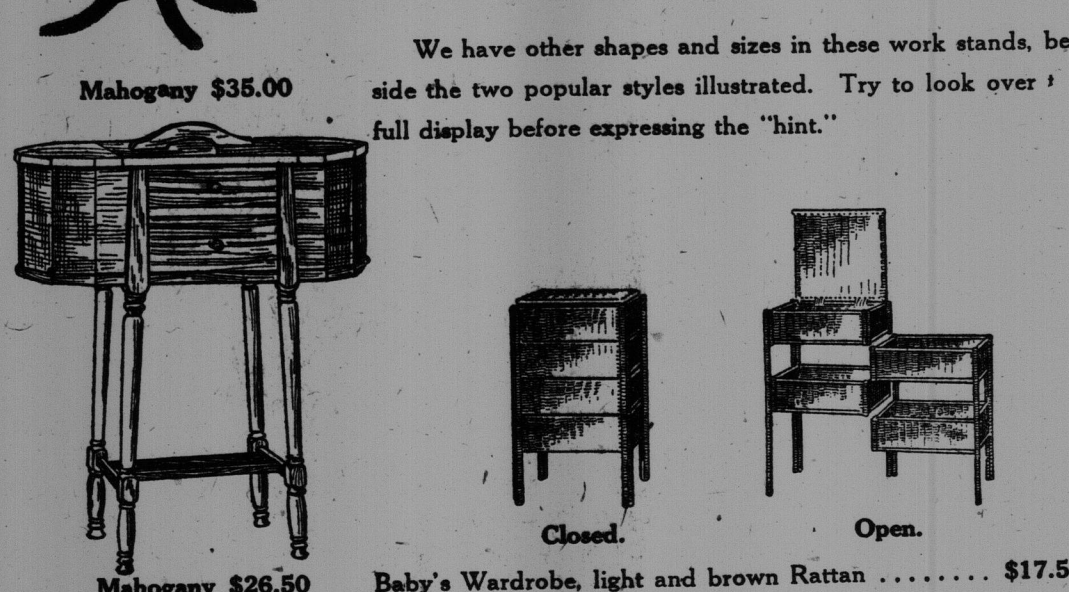

That suited Lieut. Hamill. But in a

This very useful article is always of special interest to the tidy house-keeper, probably not alone for its practical benefit, or handsome appearance in the home, but because it is the one particular piece of furniture that can be called "her very own."

In it can be stored scissors, needles and threads, the "necessaries" for the weekly mending, etc., etc. Seldom does the woman need to invest her own money for one of these desirable stands—just a casual "hint" to the "men-folk" and the valued gift is soon in her possession—equally acceptable as birthday or Christmas favor.

We have other shapes and sizes in these work stands, beside the two popular styles illustrated. Try to look over full display before expressing the "hint."

**DEER DIES AFTER NEAR BEER SPREE**

Buck Hurt So Badly That Authorities Have to Shoot It.

New York, Nov. 7.—The smell of near beer was sweet to the nostrils of a young deer in Evergreen Cemetery, Brooklyn. Well, anyway, he smelled it, and it must have meant something to him, for he foretook the quiet and loneliness of the cemetery for the more lively atmosphere of the beer garden in the rear of Trommer's Hall.

Being a young buck, the deer literally horned in on a party that had been quiet up to the time of his arrival. He cleared a fence and landed smack on the table. He sported. The near beer addicts did likewise, and more so.

It would have been difficult to tell which was the more active, which the more excited. The appearance of a two-pronged buck out of one's beer glass, so to speak, is disconcerting. But the beer party quit playing follow the leader right then and there. They did not attempt to go the way of the buck across the yard, over a pile of barrels, over obstacles of chairs and tables, over the rear of the automobile parking space and into an excavation. They let the buck go his pace alone. In the excitement he stopped. Not because he had lost energy but because he couldn't make the grade out of the hole.

John F. Trommer, owner of the place, called up the S. P. C. A. Half an hour later ten men from Prospect Park with a black and tangle and a truck took the deer out and away, while everybody else stood around and gave advice to everybody else.

Overnight the deer was kept at the Prospect Park Zoo. Keeper John O'Brien found yesterday that it had broken its leg and had been hurt so badly otherwise it had to be killed.

Mr. O'Brien thought the animal had been somebody's pet that had escaped. Otherwise he doesn't see how it could have reached the cemetery and the near beer place without attracting more attention than it did.

**TERRIBLE CONDITIONS.**  
(Hong-Kong Press.)

"The requisites of personal health are well known: adequate food, light, and air, shelter, cleanliness, exercise and elbow-room. All our eastern countries contain crowded cities and in these cities a large proportion of the poor live in crowded slums. How is health possible when men, women and children lie down to rest huddled in airless rooms—rooms where consumptives, made tuberculous through its very overcrowding, spit on floors and pawing infants introduce infected sputum into their mouths? In some of these slums when the floors are full, human beings pay one-quarter of their monthly earnings to sleep on shelves tier above tier in dark passages. In these slums where a single bath and latrine, often contiguous to the kitchen, are used by 30 or 40 people, cleanliness is impossible." We are well familiar with such conditions in Hong-kong.

THE EVENING TIMES-STAR, ST. JOHN, N. B., WEDNESDAY, NOVEMBER 7, 1923

### American Eagle Falls Victim To Love of Almighty Dollar

THE AMERICAN EAGLE.

(By Harry B. Hunt, NEA Service Writer.)  
Washington, Nov. 6.—The American eagle, symbol of liberty, freedom, independence, is threatened with extinction. If present inroads on these birds are permitted to continue, the only place where future generations may find them, according to the American Nature Association, will be on the great American dollar.

And a strange paradox—it will be the dollar that will have been responsible for the eagle's disappearance!

Whole sale slaughter.

For up in Alaska, which is the last foothold where American eagles are now to be found in any numbers on American soil, these birds of freedom are being slaughtered by the thousands for a territorial bounty of 20 cents each.

Under pressure by the salmon canning interests in Alaska, the territorial legislature passed a law offering half a dollar for each eagle killed. The law provides that the gunner can get his money by cutting both feet from the bird and producing them, together with an affidavit, before any Alaskan commissioner.

Since 1917, 96,000 eagle feet, cut from 19,000 birds, have been counted and accounted for on the bounty records. But, says the Nature Magazine, broadcasting the warning of the association—

**Blame Packers.**  
"It seems safe to say that instead of 18,000, probably 25,000 American eagles have been killed since the campaign began. Some were wounded and not caught. Many have fallen into inaccessible places, where they could not be reached. A large number have been shot for sport by people who have not collected the bounties."

The depredations of the eagle on the Alaskan salmon industry, these nature enthusiasts insist, has been largely over-stated by the packers who sponsored the bounty law.

"At certain seasons of the year," they say, "fish in Alaska are abundant and the bald eagle undoubtedly lives largely on salmon. But it is a well-known fact that salmon die after spawning."

"The banks of streams are at times lined with the bodies of spawned-out fish. And it is these, in great part, that are carried away and eaten by these birds."

**Asks Schools' Aid.**  
An appeal to save the eagle, America's symbol of liberty, is to be broadcast in the hope of stirring public demand for the repeal of Alaska's bounty law. Bulletins will be sent to school principals and classes will be asked to unite in protest against the destruction of America's national bird.

The eagle stands firm before every earthly power except the hand of man, the association points out. "He is our symbol of courage, our emblem of freedom. Are American ideals in the

**SKATING RINK AT CHAMONIX FINISHED**  
Chamonix, France, Nov. 6.—How to provide shelter for the 20,000 to 30,000 visitors expected here, from January 20 to February 6, during the winter sports events which mark the opening of the 1924 Olympic Games is the problem confronting the town authorities and French Olympic Committee now that the work on the skating rink, high-sleigh chute and ski jumps is finished. Chamonix, a little town of 3,000 inhabitants, perched high on the slopes of Mont Blanc, possesses normal accommodation for about 1,500 to 2,000 transients and by the placing of additional beds in ballrooms, corridors, billiard parlors of the hotels and private houseowners to let out the "guest room" this might be increased to 3,000.

**Nobody Home Now.**  
A curious reminder of the commercial enterprise of other days in St. John has come to light in the demolition of the old building in Dorchester street close to the corner of Union street. The building which is being torn down was a low wooden structure which was used as a stable and on the side of one of the walls now exposed to view there is plainly written in letters about three inches high the notice, "Trunk Factory Uptairs." Not for very many years has there been any upstairs in that particular location and no record could be discovered of any trunk factory that was established there. Historians of the city are being asked if they can give any clue to the mystery.

### WORK PROGRESSES ON ORPHANS' HOME

Big Barn Rolled 250 Feet to Make Room For New Wing

Work on the new wing to the Manchester property, Manawagonish Road, recently purchased by the New Brunswick Protestant Orphanage corporation as a nucleus for the modern institution, is progressing quickly under Contractor Clark's personal supervision. Two floors are standing already and the concrete moulding is going on, apace. The wing will have capacity for ninety-two children, which is singularly enough, the exact number to be taken from another of the three orphanage divisions in town in order that the new place be occupied and an older building closed. It is probable the infants will be housed in new quarters once extra room is provided for the older children.

In connection with the erection of the new wing to the Manchester property it is interesting to note that a large barn and storehouse, which rested on the site, has been rolled to a location about 250 feet distant, further back in the field adjoining the hydro substation. Samuel Johnston, who effected this removal, used specially selected malleable rollers and finished the job in a few weeks. The building is 80 by 30 and three stories high. It is a massive structure and suitable for a dwelling.

**CARLETON W. M. S. MEETS.**  
The W. M. S. of the Carleton Methodist church held its regular meeting yesterday at the residence of Mrs. I. O. Beattie with Mrs. George Barrett, the president in the chair. Mrs. F. T. Bertram conducted the devotions and Mrs. Charles Watters had charge of the reading of the third chapter of the study book "Building a Nation." Papers on the subject were read by Mrs. Barrett, Mrs. Beattie, Mrs. W. Adams and Mrs. A. B. Thorne. Arrangements were made for the district meeting to be held in the Carleton church on Nov. 15. Mrs. Beattie read interesting extracts from a letter written by Miss Minnie Robertson, missionary in Yokohama, Japan, describing the recent earthquake disaster. The meeting was well attended and it closed with the Miphah benediction.

**RECORD STANDS.**  
Paris, Nov. 6.—The Aero Club of France has officially accepted the altitude record of 11,445 meters (37,894.88 feet) made by Sadi Lecointe, the French aviator, at Issy-les-Moulineux, on Oct. 30. The former record, also made by Sadi Lecointe, was 35,178.89 feet. Columbus outfitted 17 vessels on his second voyage in 1493. The ice cream cone was invented in 1904.

Do you know there are two kinds of Bon Ami—cake and powder? Both are made from the same ingredients—both are equally good.

It's a matter of taste which you use. Many women prefer the powder in its handy sprinkler-top tin—it's so easy to shake the powder on a damp cloth.

Others prefer the solid cake—that's rubbed on the cloth like ordinary soap.

Many women keep both kinds on hand—they prefer the cake for some uses, the powder for others. It's a splendid idea to keep both—why not try it?

Are you familiar with the principal uses of Bon Ami—they're listed at the right?

### ST. DAVID'S LADIES HOLD TEA AND SALE

St. David's hall was artistically decorated yesterday afternoon, when the Women's League of the church held a well attended tea and sale. The sale room was particularly pretty, with covers of autumn leaves in rich tints, that had been preserved and arranged by Miss Ethel Shaw over the lights. Others on the decorating committee were: Mrs. A. R. Melrose and Miss Bessie Carmichael. The ice cream booth was a bowl of pine greenery, the same being used for a background in the sale room, which had tables for many useful and pretty articles. Mrs. Atkinson Morrison was general convener for the whole affair, and was assisted by a large and energetic committee.

Mrs. Hugh Miller, wife of the pastor, Mrs. Peter Chisholm, Mrs. R. C. Craik, Shank and Mrs. P. C. Johnson presided at the tea table, which was in the form of a St. Andrew's cross and set out with bronze chrysanthemums, orange candles and beautiful silver articles. The small tables were centred with orange candles all afloat, making a pretty effect.

The various tables were as follows, with their conveners and workers: Fancy, Mrs. Hial Brown, Mrs. John Malcolm, Mrs. David McColland, Mrs. Robert McLean, Miss Ethel Shaw and Mrs. Bruce Weston; candy, Mrs. Fenwick McKelvey, Mrs. W. A. Simonds, Miss Bessie Henderson and Miss Jeanie Grosset; home cooking, Mrs. A. W. Petch, Miss H. Burrell and Mrs. John F. Vanwart; baby, Mrs. A. D. Malcolm, Mrs. George Shaw, Mrs. William Smith and Mrs. J. H. MacFarlane; oppons, Miss E. Willett, Mrs. F. Banks, Mrs. I. T. Allen and Mrs. Alexander Corbet, and books, Mrs. A. K. Cox.

Mrs. A. R. Melrose was in charge of the tea committee and had for assistants the following: Mrs. William Nase, tickets; Miss B. MacFarlane, at the door; Mrs. Otty Fraser and Mrs. F. J. Cameron, ice cream. Mrs. Robert Reid, Mrs. H. V. McDavid, Mrs. George Ewing, Mrs. R. Purchase and Mrs. David MacPherson were in the kitchen to oversee the delicious refreshments, which were served by the following ladies: Mrs. W. J. Steen, Mrs. R. M. Penderigh, Mrs. Fred Gilvan, Mrs. John MacKinnon, Mrs. J. S. Edgart, Mrs. Fred Olive, Mrs. H. O. Clark, Mrs. D. W. Ledingham, Miss S. McMurray, Mrs. R. A. Dickie, Miss E. Sherry, Mrs. Mayes Case, Mrs. B. Smith, Mrs. David M. Lawson, Mrs. Susan McLean, Miss M. McCollan, Miss Ada Williams, as waitresses. Mrs. V. J. Bingham, Mrs. David Willett, Mrs. W. H. Stirling, Mrs. J. Gifford assisted in replenishing.

**PUBLICITY AND TOURIST TRAFFIC**

**Vancouver Alderman Outlines California's Plans and Results.**

Some interesting points of information on organization needed to bring tourists to the province of Quebec were given by Ald. F. Crone, of Vancouver, at a luncheon of the Quebec Tourist Association last Friday.

Mr. Crone said that as regards publicity, California stood as the best example of the value of advertising, not only in the way of getting tourists, but also for getting settlers, and disposing of California products to their advantage.

The campaign in California had started in 1914, and the first annual trek into the state had resulted in thirty millions being spent in and around Los Angeles. Last year the amount spent had reached 300 millions for Los Angeles and vicinity. Mr. Crone next told of what the northern part of the state had done, and pointed out that 75 per cent of the tourists secured by the joint chambers of commerce became permanent settlers.

**Vancouver Enterprise.**

Coming back to Canada, Mr. Crone said that the cry of "See America First" had had a great result, and Americans were spending half a billion dollars a year in travelling alone, and why should Canada not get a substantial share of the amount? He spoke of the Northwest Tourist Association, formed by British Columbia, Oregon and Washington states, each contributing. This association had brought many people to the Pacific coast. It was now out of existence, the two states of the union having refused to make their grants, but Vancouver had gone ahead on its own. The policy adopted in Vancouver was to raise public subscriptions among business men, and the city council gave an

amount equal to the total of the subscriptions, and for next year there was available by this means \$140,000 for publicity work. Portland, Ore., had raised \$300,000, and Seattle \$200,000 for the same purpose. Vancouver was advertising in the daily newspapers between Winnipeg and Vancouver, telling the people of the prairies to go to the coast for the winter months as soon as the harvest had been reaped.

**Wheat Growers' Rest.**

"You would be surprised if I told you that people are trekking in by thousands," said Ald. Crone. It was impossible to rent a furnished house in Vancouver after November 1st, and vacant houses became scarce. These prairie people stayed until April, and their presence stabilized business, preventing the months of January and February being "dog days." In April and May, the Vancouver Tourist Bureau commenced advertising in California, and the result of this policy was that this year 15,000 automobiles from California had come into Vancouver. Tourists to Vancouver were welcomed on arrival by the first traffic policeman who met them, his task being to hang a welcome tag from the mayor to their automobiles.

Mr. Crone spoke of the tourist camps that had been established, each one being able to care for 500 cars, and the charge was only 50 cents a day. Camps of this kind existed all up the Pacific coast from Mexico to Vancouver. The Vancouver bureau kept a man at the international boundary to supply information to visitors.

**PRIDE IN GUN WAS FACTOR IN DEATH**

A touching circumstance surrounding the sudden death this week of Kenneth Flewelling, the 11-year-old son of Mr. and Mrs. Sandy Flewelling, of Clifton, has come to light. It appears that Kenneth was very fond of a small gun that had been given him by his father, and he took great pride in keeping it clean. On Sunday afternoon the boy had as a companion Cyril Wetmore. They were in the garage, and Kenneth remarked, "I wonder if daddy's gun is as clean as mine?" He was looking down the barrel when the gun was accidentally discharged, the bullet entering the eye, passing through the brain and killing the boy almost instantly.

The funeral of Kenneth Flewelling was held yesterday afternoon from the residence of his parents, Mr. and Mrs. Sandy Flewelling, Clifton. The funeral was largely attended and the young lad's schoolmates attended in a body. The services were conducted by Rev. Canon Daniel, of Rothesay, in All Saints' church, Clifton.

**Soprano and Bass Reproduced Naturally Because of 6 Sound Openings**

HE reproducer is the most important part of a phonograph. On the quality of the reproducer depends the quality and naturalness of the voice or instrumental music reproduced from the record.

For many years, the perfect reproducer has been sought in vain. It remained for Elmer Fletcher, an American genius, after many years of patient experiment, to discover and complete the McLagan-Fletcher reproducer, which has been proclaimed by musical critics to be the long-sought perfect reproducer.

**Mr. Fletcher's New Ideas**

The McLagan-Fletcher Reproducer is unlike any other.

For example: It has six sound openings. Mr. Fletcher discovered that the high or soprano notes are made in the centre of the diaphragm of the reproducer and the low or bass notes are made nearer the edge, varying, of course, with the pitch of the voice.

After much experimenting, Mr. Fletcher found that six sound openings

placed at certain positions provided for the proper spacing and control of all ranges of human voices—soprano, contralto, tenor, baritone, bass—and musical instruments. He found that, by means of these six sound control openings, each and every musical note is given its full value as recorded on the record.

**Perfect Reproductions**

Particularly is this noticeable with orchestra accompaniments. The McLagan-Fletcher Reproducer doesn't muffle them. It brings them out clearly. You do not have to strain to hear them. The low orchestral notes are very distinct.

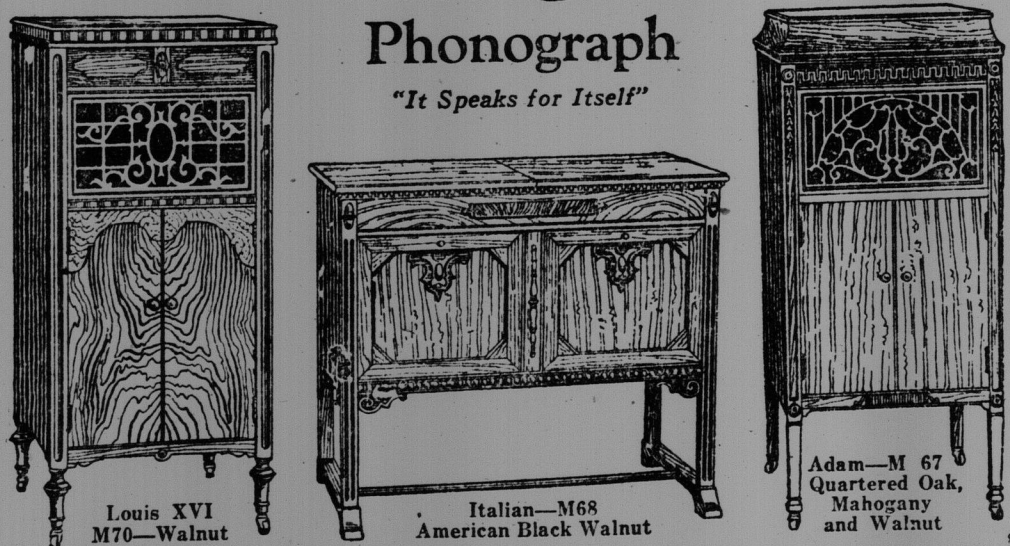

The McLagan-Fletcher Reproducer plays all types of records—Columbia, Victor, Pathé, Edison, Vocalion, etc.—plays them better than you have ever heard them played.

**Beautiful Period Models**

The cabinets encasing the McLagan Phonograph are the very finest of examples of Period Furniture craftsmanship—uprights, consoles and tables, in beautiful figured mahogany, walnut and oak. Twenty different models. See them and hear the McLagan play.

Crippled Lawyer Makes it Cheery For City's Afflicted Kiddies

Minneapolis—From the purse of a hopeless cripple comes a magnificent gift—a gift measuring \$1,000,000 in money but priceless in the measure of its aid to a stricken humanity.

Dr. C. F. Pirquet (left), one of his little patients, and William Eastis, friend of the crippled kiddies.

William Henry Eastis, former mayor of Minneapolis, helplessly lame since boyhood, has saved and struggled through life in order that he might prevent other children suffering as he has suffered.

Affliction and despair have made no misanthrope of him. He is a warm hearted old bachelor, a happier man than has been for more than three-score of his 78 years, in the realization that at least he has fulfilled his wish despite the terrible handicap fate imposed upon him.

Gets Noted Surgeon. Eastis has set apart a million dollars from his savings for the erection and perpetuation of a hospital and convalescent home for crippled children to be administered by the University of Minnesota.

And he also makes it possible to have the hospital placed in charge of Dr. C. F. Pirquet, world famous pediatric specialist, who has resigned from the University of Vienna to come to the University of Minnesota and look after the Eastis enterprise.

Eastis hasn't always been a cripple. He, too, has known what it is to run and play.

The huskiest of 12 children, his father, once entertained hopes of his becoming a blacksmith.

Suddenly Stricken. "And blacksmith I would doubtless have become," says Eastis, "had I not been struck, as though by a bolt of lightning, when I was 15."

It was not lightning, though. It was necrosis. It confined him to a couch for the better part of the next six years, leaving him permanently crippled.

Later he was able to get around on crutches, and then he went to school, although his father feared he was wasting his time. His father by that time wanted him to be a cobbler, since his affliction prevented him from following the blacksmith's trade.

But young Eastis taught school in the spring and fall terms and went to the academy in winter. Then he went to Wesleyan College in Connecticut and took a liberal arts course, selling life insurance to keep going.

Leaves for West. After getting a diploma, and incidentally, a Phi Beta Kappa, he went to New York for a law course at Columbia.

"I practiced," he tells us, "for five years in partnership with Judge John R. Putnam in Saratoga Springs, N. Y.

Then I decided to strike a bigger town. They told me Minneapolis was the fastest growing city in the middle west, so I came here.

First opportunity I bought a downtown corner. Then I got another one, out of my savings from my law work. And I kept buying until I had seven.

"Yes, I was pretty lucky in picking corners. That's the way I have made most of my money."

"If it hadn't been for my illness when I was a boy, I suppose I'd have been a blacksmith. But it's been worth a life on crutches to be able to do something for the little fellows who badly, they need it when they are crippled."

Open to All. One of the conditions of Eastis' endowment is that all children, regardless of race, creed or color, may have the advantages of the hospital and the home. Those who can pay will be allowed to, but the treatment for rich and poor will be the same.

Eastis was a candidate for governor in 1908, but was defeated by John Lind. He is a great lover of horses and until two years ago he insisted on driving his horse instead of an automobile.

His gift will be known as the Minnesota Hospital and Home for Crippled Children. He refused to have his own name connected with it, saying in his letter to the university:

"In a generation or two my name will be forgotten. The name I suggest should inspire faith among parents and children alike, and in the years to come when the little folks are restored to health and vigor, they will look back upon the institution as their alma mater."

WANT MORE MONEY IN KINDERGARTENS

To supplement the grant made by the School Board for carrying on the free kindergartens in the city it would be necessary for the kindergarten association to raise about \$500 yearly. It was announced at the meeting of the executive of the association held yesterday at the home of the president, Mrs. Allan G. McAvity. It was explained that the grant amounted to \$5,000 and current expenditures would be about \$5,250, while equipment, materials and some fuel would require about \$250 more.

The response to the appeal for milk and biscuits for lunches for the kindergarten children had been generous but it was reported that two kindergartens, the north end and the Mabel Peters were still without a regular supply of milk and biscuits.

The teachers' reports showed that there was a very good attendance at each kindergarten. Arrangements were made for the annual meeting of the association held next Wednesday afternoon.

Mrs. McAvity is the convener for the Kindergarten Association's work on Poppy Day and she asked for volunteers to assist in taking charge of Duke's ward.

## MCGRAW NAMES 3 GIANT FIXTURES

Willing to Trade Any Man Excepting Young, Frisch and Jackson.

"I am ready to trade nearly everybody on the Giants, with the exception of Ross Young, Frankie Frisch and Travis Jackson, if I can be shown that I could strengthen my club." This was the reply of John J. McGraw when asked what he intended to do this winter toward an effort to regain the world championship which the Yankees wrestled from the National League titlholders last month.

"I have formulated no concrete plans as yet in my campaign to make the Giants a better and more consistent club," said McGraw. "I am going to give plenty of attention to the problem on my way across the Atlantic and on my way home. I will sail for Europe in company with Mrs. McGraw and Hughes Jennings and Mrs. Jennings on the 18th. I will have plenty of time and opportunity to cogitate and confer with Hughes while we are on the high seas."

"How about the reports about Hornsby?" I asked. "Is it true that you sent Kinsella to Sam Breadon last week with a proposition looking toward a trade?"

Would Make a Trade.

Mac did not care to say whether he had sent Kinsella to St. Louis or not. But he did declare that he still would welcome Hornsby to New York. "I am ready to talk business with Rickey and

Breadon if they are ready to let Hornsby go," replied McGraw. "However, the New York club would not give anything like what it would have given for the second baseman two or three years ago. I will not make any cash offer for Hornsby. If St. Louis wants to take players for the infielder let Rickey speak up. Several years ago I offered \$300,000 for Hornsby, with the proviso that St. Louis was to get another \$50,000 if we won the pennant. The Giants finished second that season, but with Hornsby they would have won the championship.

"Now things are different. I don't need Hornsby so much. Besides, he is thirty years old now and, what's more serious, he has developed a bad leg. Injuries of that sort hang on. Look what a bad leg did to Heinie Groh, who, by the way, is one of the greatest ball players who ever handled a grounder. Groh played through the 1923 season with a double hernia. No other man would have done that. He's going to a hospital soon and have that injury attended to."

"Yes, I would take Hornsby for players. But not at anything like the terms we once offered. He's still a wonderful player and a wonderful hitter and would be a great hit with the fans at the Polo Grounds."

"Young, Frisch and Jackson are fixtures with the Giants because Young, Frisch and Jackson won the pennant for us this year," continued Mac. "If it hadn't been for this kid Jackson being able to step right in and make up, first for the absence of Groh and then for the loss of Bancroft, the Reds would have walked in with the pennant. Next season Jackson ought to de-

velop into one of the most valuable players in the league. He's a coming star, and no mistake. Young and Frisch played hard, game baseball all the way, and nothing I could say as a tribute to them would be extravagant praise."

"I note that you have not excluded Kelly from your trading material. Would you let him go?" I asked.

"Well, who's any better than Kelly?" Mack came back. "Yes, I would trade him, but whom could I get? I like Bottomley of the Cardinals, but as I look along the line Kelly seems to be good enough. He had his greatest season in that was due to his Japanese trip with Irish Meusel and Casey Stengel. They went stale and they were not right physically all season on account of the effects of the trip to the Orient. They will not go again. There is something in the vegetables in Japan which hurts a westerner."

Looks to O'Connell.

"I am counting on the Japanese travelers to get their punch back in 1924. Incidentally, I am counting a lot on Jimmy O'Connell. He did not show much this year because he never was fit physically. It takes a year for a ball player to get over the effects of typhoid fever, which knocked O'Connell over last winter. Then, when we came home, he suffered an attack of influenza. O'Connell is going to make a great ball player in spite of the poor showing he made this year."

"Of course, you saw in the world series that you needed more and better pitching. You saw it during the season too. What are you going to do about it?" I queried.

"What can I do about it?" McGraw replied with a smile. "I do need pitchers, but where are you going to get them? No, I am not going to buy Lefty

Groves of the Orioles. I have abandoned that deal. After looking the southpaw over in the little world series, I came to the conclusion that he was not a great pitcher—and that Jack Dunn wanted heaps and heaps too much money for Groves. Groves knows nothing about pitching. He has a fast ball and uses nothing else. That would not do in the National League."

Why, you would be surprised to know how little pitchers know when they come up. I had to take Bentley in hand and teach him from the ground up. In five years in Baltimore nobody ever told him how to pitch to any particular batter. He too came here with a fast one and worked it to death. Next season Bentley is going to be a much improved hurler."

McGraw's word that he has passed up Groves is particularly interesting in view of the fact that Ed Barrow told me the other day that the Yankees had abandoned the deal for Joe Boley, the great shortstop of the Orioles. Dunn had held his stars too long. Report had it that McGraw had bought Groves for \$80,000 and that the Yankees had paid more than \$100,000 for Boley.

After dismissing the Groves affair McGraw said: "I am counting a lot on a young man by the name of Mahan, whom I have bought from Wichita for \$17,000. I hear that he is ready. I think that Watson will be a better pitcher next season, after he has had his tonsils cut out. They are infected and have impaired his physical condition. If there are any pitches of class to be got we will go for them."

Mac does not know just yet where the Giants will train. It looks as if they might go to Florida. He has abandoned San Antonio definitely. "We want to get into new territory, play new cities this spring," he said. The Giants trained in Florida at Gainesville in 1919, the year they abandoned Marlin, Tex.

In conclusion McGraw said: "Don't believe stories that I am ready to retire as manager. My hat is still very much in the ring. I want at least one more world championship."

## QUALITY

### NO TREASON

PRICE has always been of secondary importance in the blending of KING COLE Orange Pekoe. It has to be, if that characteristic rich flavor is to be maintained. Unusually choice teas are continually sought for it, and the cost of these is frequently changing.

KING COLE Orange Pekoe is for the real tea lover to whom a fine cup of tea is a delightful necessity. Any lowering of the quality would be treason.

The price of KING COLE Orange Pekoe has changed slightly from time to time, and may again be higher or lower according to market conditions, but its original exclusive flavor remains unaltered.

U.N.B. TACKLES A BIG PROPOSITION

Acadia Has Not Been Beaten on Home Field Since 1895

The University of New Brunswick's young football team, which left yesterday for Truro, en route to Wolfville, N.S., to play Acadia's fifteen there on Thursday afternoon of this week, will attempt to do what teams from Fredericton have failed to do since 1895—that is beat Acadia on its own grounds. There has been several draws in the football records between the universities but never a win for U.N.B. To top the league championship this year, however, Acadia must defeat U.N.B. by a large margin as the New Brunswick boys have piled up a total of 18 points to far and, according to a resolution adopted at an intercollegiate meeting recently, points will be decided in case of a three-cornered tie.

HAIR STAYS COMBED, GLOSSY

Millions Use It—Few Cents Buys Jar at Drugstore

Even stubborn, unruly or shampooed hair stays combed all day in any style you like. "Hair-Groom" is a dignified, combing cream that gives that natural gloss and well-groomed effect to your hair—that final touch to good dress both in business and on social occasions. "Hair-Groom" is greasyless; it helps grow thick, heavy, lustrous hair. Beware of greasy, harmful imitations.
