EDITORIAL NOTES.

There is a rumor current that Sir Lionel Sackville West, the British Minister to Washington is shortly to be removed to St. Petersburg. It is true that a thoroughly posted man on all questions that may arise between the two countries, and as the most important and difficult ones are those that are of vital interest to this country, we should think that one of our most prominent and able public men should be appointed to the position. Upon both sides of Canadian politics we have men able and qualified for the position and we think the British Government would be simply doing an act of justice to this country by taking this course. An impression has long prevailed among the people of Canada that small disputes between the United States and the British Empire, their interests were invariably sacrificed to those of the mother country. But if this course were taken Canadians would feel better satisfied owing to their interest being in the hands of one whose duty and inclination would lead him to protect them.

The report of Mr. Eugene Coste of the Geological Survey on the mineral operations carried on in Canada during the year 1887, has just been issued. According to this report we learn that the value of the mineral productions was \$10,000,000 and the exports of mineral products mined or manufactured amounted to \$4,000,000. The total production of gold was 5,282 tons valued, manufactured at the quarries, at \$68,000. There was 884 tons of antimony ore, nearly all of which was produced in Nova Scotia, valued at \$1,000,000. The total production of coal was 2,368,891 tons valued at \$4,758,000 at the point of production. The total production of iron ore was 67,370 tons, valued at \$1,178,637, and about 3,310 men were employed in gold mining and mining. The yield of the various provinces were: British Columbia, 40,886 oz. or \$694,509; Nova Scotia, 21,211 oz. or \$412,614; Ontario, 450 oz. or \$6,700; Northwest Territories, 3,690 oz. or \$63,100, and Quebec, 90 oz. or \$1,604.

The total production of iron ore was 76,330 tons, valued at \$1,446,197. In regard to petroleum an increase of 10,790 barrels with the year before is shown, and an increase of \$25,844 in the value. The total marketed production of salt was 50,173 tons, valued at \$1,056,394 at the works.

The Montreal Gazette says that every project with which Quebec has to do needs a bonus out of the public purse. The latest scheme is a hotel, with bar, with a view to the province to donate the site, the projectors holding, it is said, a Government promise to this effect. No wonder the province is poor and is looking for more subsidy from the Dominion Government.

The Presidential Election. As a general rule the Americans, like the English, are extremely jealous of any government interference with them in their trade and business relations. The remarkable way of the United States has for years carried on a large and profitable trade with Canada. But the recent message of President Cleveland threatening to inaugurate an era of non-intercourse with Canada and thereby interfere with one of the regular channels through which the trade and business of the country has been carried on for years, has caused anything but a friendly feeling to him and the Democratic party among this influential class of the electors of the country. During the last Presidential election, the mercantile and railway interests threw their influence in favor of Cleveland and were suspicious that Blaine, if elected, would enter upon an even course than Cleveland is now threatening to pursue. Now, however, that their faith in Cleveland has also been weakened, the mercantile and railway interests appear to be more friendly disposed towards Harrison and his chances are said to be looking up. It is said that Cleveland cannot be elected without the vote of New York State, and if he loses the support of the mercantile and railway interests he will be sure to have his adverse vote. If that is so he will be sure to lose the election for the Presidency. It is quite immaterial to Canada as far as the enforcement of the retaliation measure is concerned whether the Democrats or Republicans gain the election. The Americans are a sharp, shrewd, money making and money loving people, and they will not quietly submit to the enforcement of laws that is to deprive them of a large and profitable business, simply because it may do Canada a like injury. No, Brother Jonathan is not so foolish as to cut his nose because it will spite his face.

Canada's Destiny. The recent crusade of American Senators and Politicians against Canada has brought this country and its relations to the mother country more prominently before the British people. Paper after paper has taken the matter up, and many of them, in lengthy articles, have shown that they have not only begun to study Canada but are beginning to understand and appreciate not only its vast and limitless resources but the energy, business, push, pluck and independence of its people. In referring to Senator Sherman's recent utterances with respect to the annexation of Canada to the United States, the London Standard, in its issue of September 22, has a long and interesting article upon the subject which shows that it thoroughly understands and appreciates the sentiments which actuate and move the great majority of our

people with respect to our political and commercial future. Independent of that sentiment which would be against their taking a new allegiance that might force them against their desires at some future time to take up arms against England, they have enough pride, independence and love of country to prefer to work out their own destiny if it should so happen that they had to choose between annexation and independence. In his article the Spectator says: "It believes that Canada will dispose of her own destinies. There is no ground to suppose that she purposes being absorbed in the republic. It also expresses the surprise it always felt that the attraction of the States has been so small for Canadians, for were there a union of the Dominion and the United States, no State on earth would have such territory, such position, such potential resources. Canadians have begun to think that they have a third alternative, namely, to become a nation, with a history of their own. At present they are content, but if a change should seem inevitable, it believes the Canadians will at last try to be a nation."

Sons of Temperance. EVER ONWARD DIVISION BATHURST.—Bro. Wm. P. Bishop, of Bathurst, N. B., writes us from Ever Onward Division, that they were organized March 7th, 1887, with twenty-two charter members, since which they have increased to fifty. They hold their meetings weekly on Monday, and have not missed any sessions during the last two quarters. They were visited by Grand Scribe Thompson in April last. There is some liquor selling in Bathurst but they are doing the best they can to counteract its effects. There are two Divisions with ten miles and they have had several victories this year. The Division is increasing in numbers and the prospects are very good for the winter. He thinks that there will likely be a delegate attend the Annual Session at Woodstock from their Division, although he is not positive whether he can attend himself. They have about \$20 worth of property made up of Division funds.

DECEASED DIVISION.—At a regular meeting of Hibernia Division, No. 42, Sons of Temperance, the following were chosen officers for the ensuing quarter: W. P.—Fred Ferguson, W. A.—W. J. Smith, R. S.—George Livingston, A. R. S.—Fred Black, F. S.—Robert W. Biers, T.—Robert Phinney, Chap.—Silas James, Sec.—Jas. Whitten, A. C.—Harry Brine, I. S.—Oder Black, O. S.—Alex. Leggett, P. W. P.—W. Carman Biles, Organist, Fred Phinney.

The Division is in good working order and gives promise of doing excellent work the coming winter. The Blair Liquor License Act is in force in the County, but the spathy of the Inspector tends towards constant violations; and these, too, in the most public manner.—Official Correspondence Temperance Journal.

NEWCASTLE DIVISION.—At a regular meeting of Newcastle Division, No. 45 S. T., the following officers were elected for the ensuing quarter: W. P.—R. Parker, R. A.—W. S. Brown, H. C.—M. O'Brien, A. R. S.—Clara Cottler, F. S.—W. McMaster, Treas.—W. J. Miller, Con.—E. O'Donnell, A. C.—J. Black, I. S.—Donald McGarr, O. S.—Jas. Falconer.

How To Treat Land Grabbers. At a late sitting of the Illinois legislature it had up before it the operations of an Irish landlord who some years ago obtained a large tract of land in that state and had introduced and was attempting to enforce the methods he formerly practiced in Tipperary. A late exchange says: "To the 60,000 acres of land which he originally secured Mr. Scully began to add farms purchased from his neighbors, until it seemed as if his estate would embrace whole counties. The legislature took hold of his methods at two valuable points. It declared void the contracts by which he bound his tenants to pay the taxes on their farms during the terms covered by their short leases, and it required the ejection to the state of lands left by aliens if they were claimed by alien heirs. His heirs would have to take steps to become citizens at once, with grave apprehensions lest he should die before the five years' term should have expired; and his tenants are prepared to pay the taxes on their farms and local taxation, which has been much heavier than formerly during the last few years. It is noticed that his agents no longer buy up property in the neighborhood of the estate, and that they have disposed of several fine farms at good but not excessive prices. There is reason to believe they are prepared to sell Mr. Scully out as fast as they can get such prices for the lands, which are of superior quality and well situated. The wonder is that he should have been able to find people to occupy his farms on the oppressive terms he exacts."

A Correction. The World says:—We Rigley was fined \$50 in the Chatham Police Court, last winter, for liquor selling, and the fine allowed to stand during good behavior, Rigley promising faithfully to cease selling. He kept faith with the court for a time, and then began selling at Newcastle. He boasted of his intention to skip out as soon as a summons should be served on him, and Magistrate Murray, on being informed of the facts, issued an execution for the outstanding fine. It was promptly collected by the Deputy Sheriff.

The latter sentence does not convey the facts of the case. Rigley was arrested by the two Newcastle policemen and lodged in jail when to get out as soon as possible he paid the fine over to the jailer. In whose hands the commitments were placed as the law requires.

George Francis Train. This gentleman is noted for his eccentricity in words and deeds, and it is a great pity that there are not more like him in the world, with his pure and brave qualities of head and heart. He has volunteered to go to Jacksonville to act the good Samaritan to the inhabitants of the death stricken city.

Death of Rev. Dr. Crawley.

Our exchanges received during the week past the death of Dr. Crawley at Hillsdale, Wolfville, N. S., on Thursday last in pneumonia. Dr. Crawley was in his 90th year, and was the youngest son of the late Thomas Crawley, R. N., of Sydney, C. B. He was born at Ipswich, England, and at the early age of twenty-three was called to the bar, which profession he subsequently relinquished to enter the Baptist ministry. In referring to his death the Halifax Herald says:—"For over half a century he faithfully served the church of his choice—and lived to witness, a few days ago, the Jubilee celebration of the University of which he was the most active founder. Last evening he was 90th year of his age he was called to his rest. To him the Baptist church and the province of Nova Scotia owe a debt of deep gratitude. His earnest, whole-souled, faithful life cannot but prove an inspiration to those who are now, and to those who may hereafter be called upon to fill his place in the Church and in the University. He was a man of pure heart and simple child-like faith, yet his was one of the intellectual giants of his age. We may be thankful that he was spared to us for nearly a century, and have no cause to mourn that now, in the dim twilight of life when he had lived to witness the triumphant success of his bright hopes, God has called him home. To Acadia University he was a father and a friend. In almost every capacity, as lecturer, professor and president he has faithfully served that institution. He being dead will ever live in the hearts and memories of our people; and his biography will be one of the brightest pages in the annals of the province of his adoption."

A Bathurst Boy Abroad. John M. O'Brien, who for the past two years has so ably and acceptably filled the editorial chair of THE COLONIST, resigned that position some time since for the purpose of joining F. C. McLaughlin in promoting the Vancouver World, and yesterday severed his connection with this paper. Mr. O'Brien by his many good qualities of head and heart, and his unvarying courtesy, has won for himself the respect and esteem of all who were brought in contact with him, and his departure from among them is sorely regretted. Society in Bathurst made many true friends in the city, and will also miss his genial presence. He followed into his new field of work by the good wishes of all that he met with the large measure of success which his ability and worth entitles him.—Victoria, (B. C.) Colonist Sept. 16.

Mr. O'Brien, who for the past two years edited the Colonist, has severed his connection with that paper and will leave for Vancouver in a few days to take a similar position on the World, which will make his debut on the 29th. The World will be published jointly by Messrs. O'Brien and McLaughlin, who will be the proprietors and editors. It is needless to say that if the success of the new Journal is dependent solely upon John M. O'Brien's ability, his prosperity is assured. Society in Bathurst will carry with him from Victoria the good wishes not only of the profession of which he is a young and able member, but also of all those who had the pleasure of his personal acquaintance. He will spend a few days at the Harrison Hot Springs before resuming work.—Victoria Daily Times, Sept. 17.

Norwegian Barque Wrecked. Early on Sunday morning the 23rd inst., the Norwegian Barque Nord Cap, Captain Walloe, ran ashore. Henry W. Phillips, the temporary Light House keeper at Point Esquimaux, observed a barque sailing towards a jale of wind, and at once signalled her to keep off. He heard that the Captain continued on his landward course and ran upon a reef about half a mile west of the Light House. By signal Mr. Phillips informed the Captain that it was safe for boats to land. The Light House keeper then reported to head quarters at Chatham asking that a steam tug be sent to the aid of the barque, when the Light House keeper shortly after met the Captain and informed him that he had telegraphed for steam tug assistance. The Captain replied that what he signalled for was assistance to land himself and crew. However the prompt action of Mr. H. W. Phillips brought one of Mr. Snowball's steam tugs, in consequence the barque Nord Cap is now lying on one of Mr. Snowball's wharves at the upper end of the town of Chatham.—The Captain's proper course would seem to have been, when daylight appeared, to have run out to sea and awaited a pilot.

Mr. Moller, agent of the underwriters, New York, has been here trying to effect a settlement with Mr. Snowball, for losing the barque Nord Cap off Esquimaux reef. Mr. Snowball valued \$8,000 and Mr. Moller valued the wreck at more than half that amount. The owners would therefore have Mr. Snowball a big bill even though he should keep the barque as part payment. The insurance amounts to \$2,300. If the barque could be sold for more than the salvage claim, the underwriters would get half of the surplus. If the parties fall to agree, the matter gets into the courts, there will be nothing left, as experience has shown, for anybody, after the payment of the legal expenses. Mr. Moller, left for New York Friday night, saying he had left the matter in such a way that, if the underwriters didn't get anything, nobody but the lawyers would. The interested parties could make their choice. His final proposition was that the vessel be sold and half the purchase money go to Mr. Snowball. Mr. Snowball offered to take 70 per cent, or to keep the bark and pay the owners \$200. Mr. Moller says, but this offer was not accepted.—World.

Matthew Carroll, sworn: I reside nearly opposite the post office, Nelson, I knew the deceased and Isaac Jackson. I was present before and after the shooting. About 9 o'clock I was sitting on my own platform, with Henry Gitcheil and Isaac Jackson, the latter standing up. The deceased and his brother Patrick drove up and stopped where we

Killed by a Bullet.

As stated in last Wednesday's Advocate, a shooting affray took place in front of the Post Office, Nelson, on Tuesday evening, Sept. 25th, whereby John O'Brien, of Rogersville, was instantly killed by a bullet from a pistol in the hands of Isaac Jackson, of Chatham Head. As usual liquor was the cause of the trouble and the wounding of Jackson, and he and the deceased began to talk a little. Some conversation took place in reference to a capias for his brother. I then saw John O'Brien and Isaac Jackson, the latter abusing Jackson, but I took no notice of what was said. Jackson stepped away a short distance, and he and the deceased began to talk a little. NORTHUMBERLAND.

To the Editor of the Advocate.

Sir.—A few days ago the writer learned from the Press of the Upper St. John, that the Hon. John Galt had resigned...

He was greatly pleased to have the honor of turning the first sod of the proposed railway up the Tobique valley...

This is all very well and we of Northern New Brunswick are also delighted to learn of the completion of the "Temiscouia Railway"...

Speeches were also made by the Post Master General; the local M. P., and other leading men...

as well as K. F. Burns, Esq., the highly respected representative of Gloucester County, may come to our aid and generously suggest to Sir John A. Macdonald to fill the present vacancy by the appointment of a gentleman, a resident of this County of Northumberland.

Newcastle wants a railway from the deep water terminus through the North West and thence through the splendid lumber lands of the province to the vicinity of Woodstock there to tap the railway, running from Quebec to St. John via the Grand Falls. A glance at a Dominion map will show any person what a splendid route this would be for a short through line and then it has valuable mineral and other advantages, upon which I have not space to enlarge in this letter.

Newcastle also wants a line of railway from the deep water terminus to Shippegan, via Douglasstown, Oakpoint, Négus and Tabusintac. Northumberland wants a breakwater at Point Esquinac, also piers on both sides of the Miramichi.

sent her husband with a son, and the young stranger weighed just two ounces under twenty pounds. Dr. Harrison pronounced him the finest specimen of a young New Brunswicker that he ever saw.

Charles Dodge, cashier of the legal firm of Shipman, Barlow, Larocque & Choate, New York, committed suicide by turning out the gas in his bedroom. The firm is the one recently victimized by Greger Bedell. Dodge signed all the cheques of the firm, and was much distressed by the discovery of Bedell's forgery, and was worked up to the idea that he had been, even innocently, an aid to him in his felonious work. His books are perfectly straight. He leaves a wife and two children.

OTAWA, Sept. 27.—It is understood that the department of customs has declined to appeal from the decision of Chief Justice Ritchie in the celebrated case of Ayr & Co. vs. the Queen. It appears the judgment related to construction of a clause in customs act which was amended at the last session of parliament, and as the decision of the appeal court as to the construction of the repeal clause would not be of any public utility it was not considered worth while to push the matter further.

A southern paper remarks: Typhoid fever kills more people in this country every year than most of the yellow fever epidemics do. Yet nobly runs away from typhoid fever. They stay where they are and take the chances. But at the first hint of "Yellow Jack," country settlements, villages, towns and whole cities lose their heads and run off as fast as legs will carry them. In Havana yellow fever prevailed all the year round, but the citizens stay there, and American tourists go there and never think of danger. Why does a touch of the disease in this country produce such a general scare?

Richard McGinly, senator of West Carolina, N. S., after the keeping the pledge for two years, went down to California on Thursday evening and got a box containing four trunks of rum, which he opened a bottle while in the wagon on his way home, drank half of it and after he arrived home, drank with some friends a bottle and a half more. He was carried to his bed about midnight, and woke up about 2 o'clock and complained to his wife of a pain in his stomach. He went to sleep; the next morning his wife felt that his forehead was cold and discovered he was dead. Verdict of coroner's jury—died from excessive drinking.

New York, Sept. 28.—Advice from Valparaiso, Chile, give particulars of the disaster which occurred there on August 11th. An artificial pond 800 feet above the level of the city burst, flooding the Valley Yungai and several streets. The flood came down an irresistible torrent sweeping everything before it and bringing down rocks and trunks of trees with it. The steam came rushing through the Valley Yungai and several streets. SPAIN'S HILL, Sept. 27.—Was Joseph Ackles murdered? This is the question which is exciting Springfield since his lifeless body was discovered in a ditch on Church street. The clothing seemed quite recently notwithstanding the rain, and a number of townsfolk excursionists who passed up the street, about 7 o'clock in the morning did not notice the body at that time. It is therefore evident that it was not there all night. There were wounds about the head and marks on the throat, which indicate foul play. All kinds of rumors are being circulated concerning rumors being heard at the dead man's house at midnight, but the whole is still a mystery. Ackles was very poor, and was not a drinking man. He lived with his four children in an isolated place.

HOMICIDE.—The horrible story recently telegraphed from Cape Breton is confirmed by the North Sydney Herald which tells the following story:—A dreadful homicide occurred at Cow Bay on Wednesday last. It appears from what we can learn that several young boys had been watching the killing of a pig. In some way this aroused their curiosity, and, as such sights sometimes do, it made a very strong impression upon the minds of the children. During the day they attempted to imitate the killing of the pig and found one of the young fellows hand and foot and held him on the ground. An old rusty knife being the only instrument at hand it was tried with bad effect upon his throat, and an ugly wound made from which the blood flowed freely. It is said that they also inflicted a deep wound in his abdomen. The little fellow, who might as much resistance as he could, was unable to avoid being cut. He managed to escape, however, and was taken home, when he took sick and expired next day. His death was caused, principally, by blood poisoning introduced by the rusty knife making a gash in his throat. This is an extraordinary case, and it seems to realize the terrible nature of their deed.

A BATTLE-BEATED VETERAN.—War is serious business—as the hero of this story evidently thought—but it has its amusing incidents, and its amusing revelations of human traits. A soldier of the Sixty-third, which was put in active service for the first time in the Dalton campaign, presented himself at the hospital in the rear of the army, where the following colloquy took place between him and the surgeon:—Surgeon—What is the matter with you, my man? Patient—I've got the romanticists mighty bad, and I'm pretty high wate out. Surgeon—How far, have you come to-day? Patient—Night on to thirty mile. Surgeon—Have you ever been in a battle? Patient—Lor, yes! You'd a thought so if you'd been there. Why, a bombshell went right over our company!—Annual of the Army of Tennessee.

On Sunday last Monroe Wilkinson, a notorious negro, entered a colored church at Scottsville, Ky., and broke up the congregation by drawing a revolver and threatening to shoot. Barry Merriman, an aged and respected colored man, led him out of the church and remonstrated with him. As he turned away Wilkinson shot him in the back, killing him. The murderer was captured and the colored people have made several attempts to lynch him.

Many young children become positively repulsive with sore eyes, sore ears, and scald head.

A young lady teacher was completely prostrated last week. The sickle's five-year-old girl was the plural of trousers.

Queen Victoria has a remarkably fine head of hair, for a lady of her age; but her son, the Prince of Wales, is quite bald.

We meet at the Siamese for worshipping the elephant, but think of the money that is spent in New York annually just to see it.

As soon as you discover any falling of the hair, or greyness, use Hair Renewer to tone up the follicles and prevent baldness or grayness.

Whenever you see a big hat at the theatre you make a certain there's a woman at the bottom of it.

Castor is recommended by physicians for children teething. It is a purely vegetable preparation, its ingredients are published around each bottle.

N. S. COAL. Long before President Cleveland's retaliation was ever heard of, the World had taken the stand that Canada, in order to be independent of her powerful neighbor to the south, ought to be able to supply her own coal and fuel, and that as a matter of fact, what with Nova Scotia coal and the lignite existence of immense beds of lignite in the northwestern part of Ontario, near Hudson's Bay, it was not necessary that we should be dependent on the coal beds of Pennsylvania and Ohio for our supplies.

What is Sciglies running for? "I didn't know he was running for anything." "Oh, but he is, he's running for church last Sunday."

Gen. C. Richards & Co. "I took a severe cold, which settled in my throat and lungs and caused me to entirely lose my voice. For six weeks I suffered great pain and discomfort, and tried numerous remedies. My wife advised me to try MINARD'S LINIMENT and the effect was magical. After only three doses and without any further application, my voice returned and I was able to speak in the Army that night. A privilege I had been unable to enjoy for six weeks. These facts can be verified by numbers of people in this town." CHARLES PLUMMER.

Why, then, are not the shoes I ordered," exclaimed the lady of the house, with extreme vexation. "This is a pair of \$10 French kids. I can't afford such shoes as these."

"Beg pardon, madam," said the messenger, respectfully; "but you've ordered the wrong package. This \$5 pair is yours. The other was ordered by the hired girl."

APPLICATION OF MANURE.

ADVANTAGES OF SPREADING IT ON THE SURFACE OF LAND IN SUMMER. The practice of hauling manure made during the winter months from stables and feeding-yards directly to the fields where it is to be applied, and of spreading it over the surface of the ground, has now become general. It saves time and insures a degree of cleanliness about the farm buildings. Farms have comparatively little to do during the winter, and they can haul manure over grass-fields without doing any serious injury to the soil. Manure is also better washed away or injured if it remains for long time in heaps about the farm buildings. If spread on the surface of the soil with which it is to be incorporated none of it will be injured or lost.

A FOOL'S POLLY.

Some extraordinary statements in regard to Canada are appearing in United States papers, as a result of the feeling begotten by the retaliation flurry. The following is given space in the New York Times. No one in Canada will appreciate it better than the farmers, to whom it especially refers.

"I know the mental characteristics of Canada. A large number of them work in New England's mills, and their only thought is how to save sufficient money to buy a barrel of American pork. These are the intelligent Canucks who possess sufficient intelligence to enable them to find the boundary line which separates an intelligence, progressive people from a thick-headed and unprogressive race, and to cross it to hunt for work to enable them to live. The stay-at-homes habitually sit around on fire-blackened stumps or on rail fences, or on the bank of a stream, and scrape their jaws with dirt-caked hands, and when asked a question pretend to engage in the mental process of thought, and finally answer, 'I don't know.' Think on any subject yes, they would know how they can get into America, where they can find work and pork barrels. This for Eastern Canada in the Western provinces the people are more intelligent, but they are wholly discouraged. Their land is mortgaged. Their grasping Government, i. e., the Canadian Pacific railway, clutches every dollar which they earn. Their towns are dead, and patiently wait for the arrival of an enterprising wholesale undertaker, who will bury them cheaply. The profits of agriculture in normal years have disappeared, and these people have developed an amazing capacity to sit around to watch pigs root in the ground, and dogs fight, and crows chew cut, and in the winter, snowbanks increase in size. And they, too, are prone to run hard-knaked fingers through shocks of unkempt, yellow hair, and to shove answer 'I don't know' to any and all questions that may be addressed to them."

The Teacher

Who advised her pupils to strengthen their minds by the use of Ayer's Sarsaparilla, appreciated the truth that it would do for them as well as for other things. For persons of delicate and feeble constitution, whether young or old, this medicine is remarkably beneficial. Be sure you get Ayer's Sarsaparilla.

"Every spring and fall I take a number of bottles of Ayer's Sarsaparilla, and my health is greatly improved. I have a very bad habit, but six bottles of the Sarsaparilla has cured me of it. APPLICATION OF MANURE.

ADVANTAGES OF SPREADING IT ON THE SURFACE OF LAND IN SUMMER. The practice of hauling manure made during the winter months from stables and feeding-yards directly to the fields where it is to be applied, and of spreading it over the surface of the ground, has now become general. It saves time and insures a degree of cleanliness about the farm buildings. Farms have comparatively little to do during the winter, and they can haul manure over grass-fields without doing any serious injury to the soil. Manure is also better washed away or injured if it remains for long time in heaps about the farm buildings. If spread on the surface of the soil with which it is to be incorporated none of it will be injured or lost.

A FOOL'S POLLY.

Some extraordinary statements in regard to Canada are appearing in United States papers, as a result of the feeling begotten by the retaliation flurry. The following is given space in the New York Times. No one in Canada will appreciate it better than the farmers, to whom it especially refers.

"I know the mental characteristics of Canada. A large number of them work in New England's mills, and their only thought is how to save sufficient money to buy a barrel of American pork. These are the intelligent Canucks who possess sufficient intelligence to enable them to find the boundary line which separates an intelligence, progressive people from a thick-headed and unprogressive race, and to cross it to hunt for work to enable them to live. The stay-at-homes habitually sit around on fire-blackened stumps or on rail fences, or on the bank of a stream, and scrape their jaws with dirt-caked hands, and when asked a question pretend to engage in the mental process of thought, and finally answer, 'I don't know.' Think on any subject yes, they would know how they can get into America, where they can find work and pork barrels. This for Eastern Canada in the Western provinces the people are more intelligent, but they are wholly discouraged. Their land is mortgaged. Their grasping Government, i. e., the Canadian Pacific railway, clutches every dollar which they earn. Their towns are dead, and patiently wait for the arrival of an enterprising wholesale undertaker, who will bury them cheaply. The profits of agriculture in normal years have disappeared, and these people have developed an amazing capacity to sit around to watch pigs root in the ground, and dogs fight, and crows chew cut, and in the winter, snowbanks increase in size. And they, too, are prone to run hard-knaked fingers through shocks of unkempt, yellow hair, and to shove answer 'I don't know' to any and all questions that may be addressed to them."

The Teacher

Who advised her pupils to strengthen their minds by the use of Ayer's Sarsaparilla, appreciated the truth that it would do for them as well as for other things. For persons of delicate and feeble constitution, whether young or old, this medicine is remarkably beneficial. Be sure you get Ayer's Sarsaparilla.

"Every spring and fall I take a number of bottles of Ayer's Sarsaparilla, and my health is greatly improved. I have a very bad habit, but six bottles of the Sarsaparilla has cured me of it. I have had a very bad habit, but six bottles of the Sarsaparilla has cured me of it. I have had a very bad habit, but six bottles of the Sarsaparilla has cured me of it."

"My daughter, sixteen years old, is using Ayer's Sarsaparilla with good effect. I have had a very bad habit, but six bottles of the Sarsaparilla has cured me of it. I have had a very bad habit, but six bottles of the Sarsaparilla has cured me of it. I have had a very bad habit, but six bottles of the Sarsaparilla has cured me of it."
