Feast of St. Anselm Observed Fittingly in Westminster Cathedral.

Church Needs No Pretty Pageants For Saints, Says Monsignor Moyes.

(From our Correspondent.)

London, April 22.—It is well to see at such a time as the present, when pageants and rumors of pageants are so much in the air, that the Catholict Church in England is forestalling the attempt to rob her of the great and noble men whom she made what they were, and who, we are told, are to be drawn captive in the triumphal car of Protestantism at the forthcoming "Church Pageant" to be held under the auspices of the Bishop of London at Fulham Palace in June. St. Anselm is one of these, and though a faint effort to mark his festival yesterday was made by the usupers who now possess the glorious Cathedral at Canterbury where his body reposes, the eighth centenary of his death was celebrated with a solemnity and magnificence at Westminster Cathedral which entirely eclipsed the Canterbury service, which mainly consisted of a Te Deum—Latin, too—in stream of the care to the content of the care of the care of the care of the canterbury service, which mainly consisted of a Te Deum—Latin, too—in stream of the care of t (From our Correspondent.) ral which entirely ecipsed the charteriory service, which mainly consisted of a Te Deum—Latin, too—in memory of a man who to his latest breath asserted his firm and undivided allegiance to the See of Blessed Peter. THE SPIRIT YET LIVETH.

Unfortunately for her and her claims, the spirit that inspired him 'yet liveth,' and when the Fulham Palace pageant astonished the country with its galaxy of great and holy men whom it claims amorgst its spiritual forebears, the intelligent public will be apt to remember the fine press accounts of yesterday's ceremony at Westminster and possibly to say, Why, Anselm was a Catholic saint. What's he doing here?—a question which it is to be hoped may lead to others. lead to others.

Interest in the doings of Catholics is intense, just now, from one cause and another, and our doings are always before the public in one way or another, but usually treated with a reverent and intelligent appreciation of the beauty and solemnity of our services and the devotion of our people. Only the other day one of the daily papers here came out with a really magnificent photo of the high altar of St. Peter's, just at the very altar of St. Peter's, just at the very moment when all the lights flashed moment when all the lights liashed forth about the picture of the new Beata, Joan of Arc, and to obtain this, one of their staff had been sent specially to the Eternal City, and obtained permission from the authorities of the Basilica.

The Archbishop of Westminster, vested for Mass, came last, bestowing his blessing on the kneeling throngs as he passed. To this he adds a fine delivery, and a command of graceful language in which he vividly narrated the struggles which this early occupant of the See of Carterbury had to undertake to preserve the Church from the rapacious hand of the Red King, and later, from the ambition of Henry I. Emphasis was laid upon the Court of Appeal sought by both Archbishop and King—Rome,—and when the preacher spoke of the sacred Pallium, which was brought to England by a Papal Legate and bestowed on the caint in glorious Canterbury, as the same sign of jurisdiction from St. Peter as the Pallium which our Archbishop was wearing that morning eight hundred years after, a little wave of appreciation ran silently through the vast congregation.

At the close of the Mass the Papal brief was read which empowered the Archwas read which empowered the Arch ishop of Westminster to impart His Holiness' blessing to all present, and His Grace gave it standing on the steps of the sancturry. Then the long procession made their stately way back to the sacristies, and the crowds poured forth into the prosaic London streets, their units mingling with the crowds of heretics at his each modern ideal care, with athiests, and modern idolaters, with, it is hoped, a truer perception the truth of Monsignor M Moves words,—that if our work for the conversion of England to the faith of St. Anselm is to be fruitful, our own lives must show the faith that inspires them.

THE SCOFFING ENGLISH.

The English are a peculiar people. How they scoff and jeer at anything How they scoff and jeer at anything at all approaching sentiment, how they even ridicule Catholics for their adornment of their churches and altars with flowers and beautiful works of art. And yet—go and take a look at the statue of Lord Beaconsfield opposite the House of Parliament, any day near the 19th of April, and you will see it surrounded with a carpet of pale primroses, upon which lie more of spring's maid of honor, in every conceivable device all offered to the memory of the all offered to the memory of the great statesman. The question is occasionally asked in Canada as to the position occupied by the Irish people in regard to the fiscal policy. That query is, in some measure, answered by a recent reader in the Weekly Freeman, of Dublin, here appiended:

We have been hearing a good deal recently about the Fiscal Question as it affects Ireland; about free trade and protection, and how this country stards between them. Without trying for one moment to belittle the greatness of the great fiscal issue; without trying to give Irish readings on the points in controversy; without ignoring the fact that Ireland is certgin to be very closely touched by the result of the agitation for tariff reform; it is open to us still to declare that even from a commercial point of view the great and important question for Ireland is not whether British free "trade is justified itself or the reverse, or whether British trade would be the better of a little protection, but rather whether the Irish people are own industries the protection of our great stand and help to put the small industries on their feet." That is a summary of the situation as pregnant as it is terse, as sagacious as it is pithy. It embodies a principle, a doctrine, a policy that cannot be too urgently recommended, and we are seen seen seen seen we should give our industries the Protection of our Preference. which ference

The Irish peo-ple were the most kindly and the most peaceful people in Europe. It was as true of them as it was when it was said in Queen Elizabeth's time it was said in Queen Elizabeth s time by an English Attorney-General that there was no people under heaven that so loved justice as the Irish people did (cheers). They were eager for social peace, but if Ireland was forced to choose between disorder and decay she would vote ever always for disorder (cheers). He asked the critics of Mr. Farrell and asked the critics of Mr. Farrell and his movements to consider his objects. Mr. Farrell looked about and saw half Longford under unprofitable grass. He saw the vast ranches marked still with the ruins af homesteads, and with the ridges that spoke of recent tillage, given up to the wasteful and depopulating sysspoke of recent unage, given a ver-the wasteful and depopulating sys-tem of ranching. The Irish nation had been long enough sacrificed to the ranching system. They had come to a period when the ranching system must be sacrificed to the Irish nation. (cheers.) They were resolved that the locked-up fertility of the Irish soil must come to the people and to the plough; that the padlock of the eleven months' system and the untenanted land must be stricken off, un-off,

All civilization came of the fruitful marriage between land and labor, and they said from that platform that the graziers and the grabbers of Co. Above is a sort of pyramid on which St. James is represented at the battle of Clavigo, dealing death to the infidels. The tomb rests on four angels, and a golden star surmounts the whole. At one time there were a thousand lamps buring before it, but of these most were carried away in 1809. However, the incensorio under the cimborio still remains and will give an idea of what the rest must have been. The transept is, perhaps, the most picturesque spot in the whole interior, and special interest attaches to the Byzantine cross of gold-plated wood and filigree work studded with gens. This was presented by Don Alonzo and Dona Jimena in 874 A.D. A side staircase descends to the crypt containing the graves of the Apostle and his two faithful disciples. Behind the altar are the steps which the pilgrims ascend, placing their hands on the shoulders of the image To those who can indulge in the pastime there is no better form of recreative exercise than handball. It is a game that demands quickness of muscle and eye; instant action, an alert watchfulness and controlled balalert watchfulness and controlled bal-ance. It requires that the mind be centered on the play, that the mus-cles act in harmony with the mind; in brief, it offers such employment for mind and body that is requisite in the development of muscle con-trol. It is not, and Ir thousands of homes throughout Canada Baby's Own Tablets is the only medicine used when the child-ren are ailing, and the mother who keeps this medicine on hand may feel sit as if the weight of age had bent their shoulders. It is not, and for such carelessness in boyhood are penalties to be paid as one advances in age. Therefore all boys should learn to play some game that demands lively action and natural movement. When boys act clumsily they cramp nature, and nature proves very vengeful when tampered with. I know well enough that not all boys can join in violent sports, yet boys must not be coddled. There is no need of Spartan training, but it is well that the coddled. There is no faced of Span-tan training, but it is well that the boy should be inured in his early years because that which is learnt boy should be inured in his early years because that which is learnt earliest remains longest. the ancient Irish played it. Others of the old races were fond of handball, and such people as the Basque nation have brought the game: to a perfection that is amazing. The Spaniards have a form of handball that requires rare skill to indulge in. However, for all practical purposes the style of handball played in Montreal is good enough. Many of the schools have excellent courts, and the pity of it is that there are not some public courts where the game could be enjoyed by the elder brothers of the more fortunate boys. How useful the exercise is can best be understood, perhaps, when it is said that the professional pugilists, who have need of every muscle being properly trained, invariably use handball as a training ground their ring work. Some of the boy readers page may have heard of Dr. page may have heard of Dr. Maurice Powers. Boys who indulge in read-ing baseball gossip know that Dr. Powers was a star catcher for the Philadelphia American League Club. He died recently at Philadelphia. He was catching in the opening game at Philadelphia on Easter Monday and was taken ill during the seventh-in-ning but continued until the close of the game, when he fell unconscious ning out continued until the close of the game, when he fell unconscious and was hurried to the hospital. Gangrene, the result of a spiking, had set in. Despite three operations Dr. Powers was unable to rally. The dead catcher was thirty-three years of age; a native of Pittsfield, Mass. He was a graduate of Holy Cross He was a graduate of Holy Cross, the famous Catholic College at Worwhich so many cester, Mass., from which so many great ball players have come. He afterwards entered Notre Dame Uni-versity and graduated in medicine. Dr. Powers made his professional debr. Fower made his professional debut in Louisville, in 1898, afterwards playing in Washington, Indianapolis, and, later, the Philadelphia Americans. He was one of the best known and most popular players in the United States. The writer last saw him in Richmond. Many boys want to stick it out and play until, in their own language, they are "ready to drop." That Is two wrong. When the muscles are tired they cannot lorg sustain the strain and should be given a rest. So when you are tired STOP. This applies to every form of sport and should always be remembered.

remarkable cure they have wrought in Mr. Olding's case.

During a visit to my home in Merigomish, N.S., some years ago, I was grieved to find our next door neighbor and friend, Michael Olding, very low. "He is not expected to live," my mother informed me, "And you must go over and see him as he is liable to pass away at any moment." "Not expected to live," that was the opinion not only of the doctor who attended him, but of his wife and family as well. Upon visiting him myself I found abundant evidence to confirm their opinion.

he had always been ailing. In sheer despiration he had asked his wife to get him Dr. Williams' Pink Pills. They soon began to help him. His appetite and strength began to improve, and to the astonishment of his family and friends he rapidly regained his health. Now, though the burden of well-nigh four score years is upon him, he is able to do a fair day's work, and is in the enjoyment of good health, even the asthma has ceased to trouble him as its former years. years.

Mr. Olding himself, as well as his neighbors and the writer of this let-ter, confidently believe that his resuse from the very jaws of death-seemingly so miraculous—is due, un-der God, to the timely and continu-ous use of Dr. Williams' Pink Pills.

myself I found abundant evidence to confirm their opinion.

Mr. Olding had for years been afflicted with asthma and bronchitis, but now a complication of diseases was ravishing his system. He had been confined to his bed for months about my wonderful cure, for I fidently believe that if it had been for Dr. Williams' Pink Pilik and was reduced to a skeleton. REV EDWIN SMITH M.A. Mr. Olding himself writes: "I am glad Rev. Mr. Smith has written you and was reduced to a skeleton. Though evidently glad to see me, he conversed with the greatest difficulty, and seemed to realise that it was the beginning of the end. He was daily growing weaker; his feet were swollen to twice their ratural size, and the cold hand of death was upon his brow. "It's no use," he said feebly, "the doctor's medicine is not helping me and I am going down rapidly." I prayed with him as for a man soon to pass into eternity, and when I took his hand in parting it was the last time I expected to see him in the flesh.

Three years later while on another visit to my mother's Michael Olding was seemingly in better health than I had ever seen him, for, as I said,

QUESTION OF RACE SUICIDE.

QUESTION OF RACE SUICIDE.

There is a tendency among some to smile at President Roosevelt's position on race suicide, but the situation is a serious one in this country as well as in European countries. The serious condition among the French, the continual decline in the birth rate among the native French people and the various efforts, legislative and individual, which have been made to stay this tide of physical degeneracy have been noted elsewhere but it is not generally realized that the conditions in England and the United States are becoming scarcely less serious. "According to a distinguished authority, the subject of the diminishing brith rate is of so great importance to the British Empire, that if the nation could see its true proportion it would be found to dwarf all other questions of the day." "The birth rate throughout the whole of the West is diminishing, while that of the East GRussia, Japan, etc.) is expanding. The percentage of yearly loss in the years 1894-98 is shown to be greater in England than in the other countries of Europe; the number of marriages does not seem to have declined. In Australia the decline is still more rapid, and the birth rate is now below that of any European mation. Mr. Karl Pearson, from careful study of the inheritance by children of the mental and moral as well as the physical characters of the progenitors, concludes, "The reason for the deficiency is that the mentally better stock of the nation, enervated by wealth or by love of pleasure or following an erroneous standard of life, have ceased to give in due proportion the men wanted to carry on the ever growing work of the empire." This statement might easily have been made of the United States. It is by no means a law of nature

anything about suitable diet either for themselves or for the children. But the greatest responsibility falls to the Physical Director in the use of his influence to prevent the abuses arising from stimulants and marcotics. The consumption of alcohol is definitely correlated with the increase of criminality and pauper—

LIVER COMPLAINT

The chief office of the liver is the seems of bile, which is the natural regulator of the bowels.

Whenever the liver becomes deranged, and the hid duets clogged, liver complaints is produced, and is manifested by the presence of constipation, pain under the right shoulder, sallow complexion, yellow eyes.

The cow does not soil the floor or use a spittoon; she has no brown spots at the corners of her mouth and her breath is sweet and clean.

Spitting is so disgusting that even the word itself is disagreeable and we hate to use it. Still there is no other word that is quite so easy to understand.

PREVENTION OF SOCIAL EVIL.

Equally significant and far reaching is the recent organization in New York and Chicago for the prevention of the spread of the social evil. Nothing has been more poverful in the production of racial degeneracy than sexual 'impurity. The great nations of the past who have fallen attest this fact: the weak nations of the present attest it. The present growing slackness of public present g tion and to mistaken ideals of indi-vidual liberty and of the sacredness of the home. To give the right edu-cation along these lines we must have facts not fancies, we must get rid of "tasty niceness" and a false sentimentalism and realize that the power of reproduction is the highest function of man and the home of the function of man and the hope of the

function of man and the hope of the evolution of a finer rave.

You ask how a Physical Director is to help in meeting these evi conditions. By becoming possessed of absolute facts alone these lines: by feing wining to part win them; by attempting to influence legislation wherever needed; by public lectures an: talks in the right quarter.

casses of the proportion of the week cased to give in due proportion the men wanted to carry on the ever growing work of the empire." This statement might easily have been made of the United States. It is by no means a law of nature that ancient kingdoms or peoples must decay. "Japan." says a native of that coutry, "is in no danger of race suicide: the mothers are not shirking maternity as in other regard for marriage and their regard for marriage and their regard for marriage and the baring of families. The artificial limitation of offsprirg is not practiced and they seem to live not individually, but racially among the people with whom they dwell. They show no sign of real decay.

Not only is rave suicide incurred wholesale by a poor heredity and by wilful violation of the laws of sex, but a laso by a deplorable general ignorance of the laws of diet. Half of the human race die before they are five years of age. Forty per cent. of the mortality in finants in Great Britation of prace and for the United States. Artificial feeding. DUNS SCOTUS, THE VICTOR.

Duns, Scotus, who is called the champion of the dogma of the Immaculate Conception, received orders from his superiors to defend this privilege of Mary against the attacks of the doctors of the Paris University. The plous and learned friar implored from the Queen of heaven the science and light necessary to establish on a solid basis the truth of his assertion. Casting himself on his knees before her statue he beseeched her aid in these words. "Deign that I may praise thee, O holy Virgin, and give me strength against thine eremies." It is related that the statue of our Blessed Lady inclined its head as a token that his prayer had been heard. Two hundred objections were made against his thesis. When his ndversaries had

CATHOLICS AND THEIR LAWS.

In the judgment rendered this week by Mr. Justice Fortin relative the annullment of a marriage by His Grace, the Archbishop, the point Catholics in this province are governed by the laws of the Church, episcopal enactment must be confirmed by the court as regards its civil effects. In this province the ecclesiastical rights are firmly tablished by the law of the land, and the principle is thoroughly tablished that the episcopate full power to interpret Church laws for members of the Church.

THE CATHOLIC SAILORS' CLUB

The work done by the Catholic Sailors Club is an excellent one, and one which should receive the heartiest support from the people of the All ports offer temptations Faith. to sailors. How true this is was told in an impressive manner by an application recently presented to the License Commissioners, by certain license holders along the water front, asking that their places should be permitted to remain open on Sunday so that the sailors would find tertainment in these places without wandering uptown." The sailors' employed on a steamer—and his pleasures are, therefore, likely to be strong ones. Modern conditions and modern methods demand temperance on the part of the present day seman. The Catholic Sailors' Club aims at providing clean, healths. one—the term being tertainment for the stranger seaman. It is like enough that the seaman would not frequent the saloon were there other and better enter tainments. Hence those who aid the Club, help the seaman. a Recorder's judgment to bring attention to the that Montreal's stages much entertainment that is unfit for presentation in any community, and, ast of all, in this Catholic Not all of our theatres deserve this stricture; that applies to what are knowe as the "burlesque" houses. It. is probably true that these places re the sanction of the police censor, and true, too, that, on performances contain no one act that, in a strict sense, may law. It is in the suggestions offer-ed on such stages that the harm is To this it may, perhaps, be ed that the suggestiveness de litogether upon the state of

There are various degrees of demerit in these performances, but they seldom rank above vulgarity and from them one would not find any moral lesson. The audiences of these places are usually made up of a considerable proportion of young men and young wo-men, and it is certain that each performance which they attend serves a large part in weakening the fibre of the spectators

A PATRIOTIC PLAY.

Leaving aside artistic considera "An Englishman's Home" is a striking play. It is a clever tire and there is an important meanng in it. We are not sturdy impe rialists, but we do appreciate fact that preparation for war is a necessity of all states. In the Eng lish-speaking countries and in the English-speaking dominions and colo nies, military service is considered largely a matter for the other fellow to attend to. With several corps in Montreal it may be thought that we have paid attention to our duties, but one has only to see the country corps at an annual encampnent to learn how inefficient, as a is the Canadian volunteer force. We are not preaching militarism, but the good citizen should receive some intelligent tuition in the use of arms and in such matters as will teach him to act to good purpose in the event of his services being called upon. Christian tions should not be warlike Christian peoples should not seek the blood of their fellows, but since we have not reached a state of perfect Christian humility, it is well to be prepared to participate effective ly in such trouble as may thrust itself upon us. "An Englishman's Home" satirizes the inefficiency of the British volunteer force; the Canadian volunteer force requires some whipping up, too.

THE CITIZEN AND THE CHURCH.

It is considered by priests that men in cities have many temptations in their path to make the road to church on Sunday rather difficult No Catholic requires to be told what absence from Mass on the Sabbath means. Yet we hear such words of warning from the pulpit on occasions was held that as marriages between that suggest a frequence of such ab-The weak flesh can offer

A man is not a practical Catholic when he absents himself from Mass on Sunday and it cannot be expected that he will persevere in the faith if such absences are often repeated. For that reason the figures given below should prove of deep interest. The Federation of Churches, of New York, presumably a non-Catholic body, recently made a house to house canvas in Harlem, and the results were made public last Sunday by Rev. John Lyon Caughey, Presbyterian pastor. According Mr. Caughey:

"Of the 12,000 families interview ed by the canvassers, representing a population of nearly 60,000 people, over 80 per cent. of the Hebrew families are without any regular milies are without any regular church or synagogue connection. And about 12 per cent. of the Roman Catholics and almost 32 per cent. of the Protestants are reported to be without any Church home. That is to say, nearly one-third of the people who claim to be Christian and Protestant in their belief are not actively interested in any church, and tively interested in any church

this city and nation. If this indifference to organized religion continues it will indeed be true, as the paster of the Broadway Tabernace has recently said: That Manhattan Island will become the next great field for the foreign missionary."

CITY IMPROVEMENT LEAGUE.

That the City Improvement League grantme we glean from a communication by Dr. Atherton, the executive secretary. In the first place, ' the ation on the part of all bodies which have an interest in civic improveoffermus, so that there may be an intelligent concentration of effort. It is intended, too, to seek expert aid advice, and to that end men who of have technical and practical know-

vited to help in the work. In way it will be possible to secure nent hygienists, medical practition ers, engineers and architects; indeed it will be possible for the organiza tion to secure such expert aid practical value to all citizens will be shown in the future development of Montreal. For convenience in carrying out their plans, the Lea gue has organized committees including a school and education committee, Lanes tee, a Legal Committee and a Hous-Committee. The organization ing will work in harmony with all bodies that may desire to help and in their work they will have the benefit the experience of older leagues Philadelphia, Chicago, St. Louis and New York. If one may be permitted a suggestion, it is that first attention be given to Montreal's lanes After being thoroughly cleaned, they should be paved; indeed the pave ment of lanes is a more imperative work than the pavement of streets Having been paved they should maintained in a cleanly way, and they should receive weekly flushings. Not only should they be paved and cleaned, but they should also be lighted. Darkness shelters crime, it is remarkable how street lamps are placed away from these byways Often one reads that a man, or men jumped from the shadow of a and proceeded to the attack. Lighting of city streets and lanes is, per haps, costly, but thorough illumination is cheaper when it leaves dark places in which criminals car congregate.

That the Irish are a wonderful people is not an original observation by any means. But the Celtic is a tractic race, too. No people have giver to the world more romantic material than have the Celts, but the dead races left behind them no more intense tragedies. There can be no doubt but that in the fitness of things, good has come out of their misfortunes, and that more good will find birth in their troubles. This is true of all the Celtic peoples, not alone of the Irish. Yet an Irishman in these times may be pardomed for hazarding the wish that the good had been wrought some other way. One finds much to enkindle proud feelings in reading Irish history. The blood warms and courses swifter as the eye scans a tale of the noble land. Could one read only of the chid valrous and patriotic Irish, then all would be well indeed.

But there were urprincipled and tumpatriotic Irishmen in the old days, men in whom individual interests were allowed to dominate It was a heavy price that the race paid for it the disloyalty and faction of the past. To read of "Anglo-Irish" makes one desire the power to tear certain pages from the written books of history. But that cannot be. There they remain, and present day Irishmen must learn to their rue that their ancestors were not such perfect people as we would like to believe them. One would think that the approach of the common enemy would have resulted in such an uprising of the country that the solidative of the common enemy would have resulted in such an uprising of the country that the slight of the defence would have maintained a free Ireland. But it didn't. There is little consolation in the fact that our Celtic brethren, the Scots, were no more fortunate. The real facts are not pleasant.

The Irish were more fortunate abroad thar they were at home, so, too, were the Scots. Europe is well reddened with Irish blood. "Creamon, Lille and Ghent; We're all over Austria, France and Spain, wherever they spread a tent." The nations of the more recent converts to the abroad where the

na, Lille and Ghent; We're all over Austria. France and Spain, wherever they spread a tent." The nations of Europe welcomed these fighting men and the wars of the world are the chronicles of the Irish. Honors came to these men. High rank fitted them easily. They led in war then, as they do in peace now, and, when one reads of the success of these venturesome Irish abroad, one wonders what would have been the result had their swords flashed in victory on their own fair hills and green fields. The travelling Irishman to-day comes upon many traces of his bold countrymen; it seems that

man to-day comes upon many traces of his bold countrymen; it seems that they were ever ready for the field wherever they made their home.

There is just off the press the first volume of a work which tells of the wanderings of Irishmen. "Ireland and her people" is to be, to quotte from the title page, "A library of Irish biography together with a popular history of Ancient and Modern Erin, to which is added an appendix of copious notes and useful tables, supplemented with a dictionary of supplemented with a dictionary of proper names in Irish mythology, supplemented with a dictionary of proper names in Irish mythology, geography, genealogy, etc., embracing a period of forty centuries of legend, tradition and history." It is prepared and edited by Thos W. H. Fitzgerald and is published by the Fitzgerald Book Company, Chicago. It was a perusal of this first volume that gave rise to the reflections

Cardinal Vaughan remarks in the introduction to the original edition—"The fact of the existence of any religious conviction, capable of creating in men's minds, one after another, and quite independently of each other, a revolution involving the greatest losses in the natural order and oftentimes the most acute personal agony, challenges the attention of the most languid as it does of the worldly."

These records are full of strong interest and most attractive human document. For it is indeed difficult to trace the working of the mind and the moving of the spirit that at last leads one to the Light. The unanswerable difficulties of Anglicarism showed many the path; the lack of that unity which was to be the sign of the visible church; the lack of authority—"for of what practical use would be infallible truth with a fallible mouthpiece?" asks one, and apother—"for of all absurd figments, that of a closed revelation to be its own interpreter is the most absurd." (p. 200).

Then again there was wanting characteristic sanctity and apostolicity, Rome alone has produced saints, she alone has a Catholic or universal message. "The Reformation in England was mere statecraft, at contractive in the contraction of the contraction of the contractive was more statecraft.

England was mere statecraft, England was mere statecraft, at every stage it was marked by the surrender of inalienable spiritual prerogatives to Caesar, it was heretical and schismatical in the most exact sense of those words as used by the Fathers; in short it was an apostacy" (p. 142).

apostacy (p. 142).

Figh. Broad and Low Churchmen come in for some hard knocks, but there is nothing disrespectful or offensive and a reasonable non-Catholic matter than the contract with the fensive and a reasonable non-Catholic would enjoy the book as much as a Catholic. Dr. Littledale's "Plain Reasons against joining the Church of Pome" precipitated the entry of many into Her Fold. Then, of course, Newman. Faber, Wiseman and Manning have helped much by their writings. But apart from these general influences, these is the individual state of mind of each one, of circumstances and so forth, and these it is that help to give the personal note of interest. Mr. J. Godfrey Raupert has done the work of collating and writen a suitable preface.

"I thought upon the noble souls
That have from age to age
O England! shone upon the rolls
Of thy historic page:

I thought upon the nobleness That yet in thee appears, After the wasting heresies Of thrice a hundred years;

And musing on thine earlier day, 'Dear native land,' I said, 'It cannot be, for all they say, That thou art wholly dead. . .

Thy descrated shrines once more Shall their true Lord receive, And kneeling Englishmen adore Where now they disbelieve."

It is with deep regret that we announce the death of the Very Rev. Canon Horris, P.P., of Donnybrook. He had nearly completed fifty years of earnest and fruitful work in the Church, having been ordained in June, 1859. Slender suppleness will make even the ex-treme models of this type effectively picturesque; but the average woman, if she goes in for moyen age effects, should content herself with a modi-fied versiom

The princess model is, perhaps, the nost popular this season, and if not exaggeratedly moyen age in its straightness of lines, is at least only semi-fitted. Many models have girdle on belt effect at the sides with straight front and back. Linen, more popular than ever, is a favorite for these long princesse frocks, French hand woven linen is the loveliest for these, but there are those less expensive which work up very well. The colorings in these linens this season are amazingly beautiful. Soutache and hand embroidery are the favored trimmings, while some dainty gowns are simply trimmed exaggeratedly moyen age straightness of lines, is at dainty gowns are simply trimmed with bias bands and buttons.

MONTREAL CITY REPLACEMENT OF THE CONTROL OF THE CONTRO

TO LOVERS OF ST. ANTHONY

Dear Reader,—Be patient with me for telling you again how much I need your help. How can I help it? or what else can I do?

For without that help this Mission must cease to exist, and the poor Catholics already here remain without a Church.

out a Church.

I am still obliged to say Mass and give Benediction in a Mean Upper-Room.

Yet such as it is, this is the sole eutpost of Catholicism in a division of the county of Norfolk measuring 35 by 20 miles.

And to add to my many anxieties, I have no Diocesur Grant, No Endowment (except Hope)

We must have outside help for the present, or haul down the flag.

The generosity of the Catholic Public has enabled us to secure a valuable site for Church and Presbytey.

We have money in hand towards the able site for Church and Presbytery.
We have money in hand towards the cost of building, but the Bishop will

Address—

Father Gray, Cathelic Mission, Fakenham, Norfolk, England.

P.S.—I will gratefully and prompt-y acknowledge the smallest donation and send with my acknowledgment a eautiful picture of the Sacred Heart and St. Anthony.

Letter from Our New Bishop.

Dear Father Gray,—You have duly accounted for the alms which you have received, and you have placed them securely in the names of Diocesan Trustees. Your efforts have gone far towards providing what is mecessary for the establishment of a permanent Mission at Fakenham, I suthorise you to continue to obtain authorise you to continue to solicit alms for this object until, in my judgment, it has been fully attained. Archbishop Ireland's Activities.

A Churchman Who is a Practical Man and Alive to American Needs.

The Wonderful Career of the Irish Boy, by a Non-Catholic Writer.

In that wild frontier town of '52, where Indians in gay blankets stalked the streets and scalping was still known, the eager, blue-eyed lad became again ar altar-boy in the rugged pile of slate that was at once cathedral, school, dormitory, refectory, and bishop's palace. Here he came under the influence of the first of the master from whom in the company of the stalked was a cathedral to the roars of the trudging regiment. In good fellowship he was thus accepted by all, and, at need, Protestants as well as Catholics were not lacking to help firm build bowers for his altars. first of the master from whom in his youth he abundantly drew character and inspiration, a priest who set his imagination flaming with pious zeal, and strongly forged his life in purpose

It was the missionary Cretin, the first Bishop of St. Paul, who had won Voltaire's town of Ferney back first Bishop of St. Faul, who make won Voltaire's town of Ferney back to the Faith, and here in the wilderness lived many months on crackers and cheese, that he might tend his little flock without taxing their poverty. In sympathy and with he was an American, a quairt and lovable old man, whose room contained a busy printing-press and a hundred mechanical wonders of his own invention. He was idolized by the dozen boys of the school, who gathered about him of nights at the organ, where they learned to shoult lustily in chorus both Yankee

A boy of fourteen who day after day would depate of theology with the Presbyterian minister to whom he carried milk, whose one passion was reading after the chores by the light of candles which he made of taper ends thriftily saved from the altar—such a boy was plainly destined for the priesthood. He was keen to learn, and he was patient while the other boys were rebellious when there was wood to be sawed by the old bishop's heavy lumbering treadmill. And so ar aged French was practical. by the old bishop's heavy lumbering treadmill. And so are aged French missioner of that day still tells how, one evening, Bishop Cretin, watching from his window the boys at play, called to John Ireland and to the young Thomas O'Gorman—now the Bishop of Sioux Falls—to come into the church. He asked if they wished to become priests, and when they had told him "Yes," "Then wished to become priests, and when they had told him "Yes," "Then kneel down," said he, "I am going to consecrate a seminary to the Lord." In charge of the guardian, Father Ravoux, they were soon on their way to be educated in France.

A DISTINGUISHED SCHOLAR.

A DISTINGUISHED SCHOLAR.

At the lower seminary of Meximieux, in the valley of the Rhone, John Ireland distinguished himself in mathematics, ran the eight years' course in four von medal after medal, and carried off prizes in the French language and literature from the very lads of the land. Already there were seen in him the strength and virility of his forming character—yet here again, and more clearly, he showed the modeling power of the teachers whose influence he deliberately sought. There was Tarlet, just and stern, the Rector Superior, a born covernor of boys; Perrier, the literary genius of the seminary, who taught him the habit of accurate thought, and a style terse yet touched with poetry; the devout Rebelin, whom he took for a spiritual guide.

spiritual guide.

It was during these school years that, in the mystic fervor of his faith, he twice make pilgrimage to the sainted shepherd Vianney, whose miracles, humility, and terrific austerities have since brought canonization—the Cure of Ars, to whom every sorrow and sickness came for healing: whose sermons were ardent appeals of "Love the good God! Love Him dearly!" in rapturous repetition; who said to the children in church: "Little ones, when you strew flowers before the Blessed Sacrament, hide your hearts in your baskets and send them amid your roses to the Lord Christ."

With the Marist Fathers at Hyères, on the Riviera, he took his philosophical and theological course.

BECAME A CHAPLAIN.

Immediately on his return to St. Paul to live with a Southerner bishop and a small household of French clergy, John Ireland became a very evangelist of Unionism. He sought occasions, and, French-mannered and awkward, with impulsive eloquence preached conscription and the Northern cause. Following the ordination of so manful a patriot priest, there came of necessity his appointment as chaplain of the

The Wonderful Career of the Irish Boy, by a Non-Catholic Writer.

The large place in American life occupied by Archbishop Ireland is the subject of a most interesting sketch by John Foster Carr which appears in the May Outlook. After an introductory dealing with the place of the Catholic Church in America, Mr. Carr proceeds:

"Born among the green hills of Kilkenny, his native Ireland gave him a warm and generous heart, a glowing spirit, an impetuous will for the fray. His father, a carpenter was a gaunt, fiery man, alert in mind, domineering, rigorously honest; his mother, silent, hard-working fervent in religion. The family drifted into the mid-century stream of Irish migration, and his early boyhood gave memories of Boston; of an altar boy's awed and careful service in Burlington, Vermont; of an altar boy's awed and careful service in Burlington, Vermont; of an altar boy's awed and careful service in Burlington, Vermont; of an altar boy's awed and careful service in Burlington, Vermont; of Galena, and the voyage up the Mississippi by the famous Nominee to St. Paul.

In that wild frontier town of '52, where Indians in gay blankets stalked the streets and scalping was still known, the eager, blue-cyed lad became again ar altar-boy in the rug-

A CHURCHMAN POLITICIAN.

He is our first churchman to become a politician, but he remains a politician without political influence. His strict academic choice of Republicanism was confirmed for the characteristics. publicanism was confirmed for the characteristic reason that he saw the majority of Irishmen in this country becoming Democrats, and he thought it intolerable that either Irish-born or Catholics should be largely classed with any party. In the end he grew to be a sturdy enough partisan to insist often on his citizen's right of public speech. He took the stump for McKinley; and loud were the Democratic protests in that summer of '96, when he met

. Power and dignity clothe the stalwart form of the preacher. His large, strong face, framed by hair of silver steel, stamps itself on the memory—the great, boldly carved, eagle-like nose, the broad and heavy chin, the wide eyes that in their low flame of azure gray are seen the length of the cathedral aisle. Word by word he reads and weighs the text. He expounds his weighs the text. He expounds his argument in professarial way, with a pointed explanatory finger. The a pointed explanatory finger. The gestures are restrained and angular. There is crisp statement, lucid thought: there is form of logic savoring of the schools, much striking realism, some poetry. For the fame of the man you listen curiously, until, you know not how, your heart is suddenly captive by an overwhelming force, human and moral, as you hear preached the olden Gospel of Galllee in that voice, the most ex-Galllee in that voice, the most Gallee in that voice, the most extraordinary among orators. It is narrow and hoarse, and echoes from the mouth. It falls to a broken whisper: it rells in a heavy bass. There is an explosive rasp and drawl to it, a stress, a staccato throb, a plangent flow? In a moment of great carnestness, words tear themselves from his lins. from his lips:

It was far more than that. He thus hailed as the hope of his Church an aggressive American, modern in ability and knowledge, a Christian of leading and unshakable faith—the complete type of man to captain for to-day the armies of Christ. The Irish Teacher.

Under the National Board He Has an Impossible Task.

The affairs of the National Teach-

The affairs of the National Teachers of Ireland are the affairs of the ration, says the Leinster Leader, and continues: When we read the proceedings of the annual congress of the Teachers we are brought into direct contact with facts and conditions which are not exclusively of interest to National Teachers, but of interest to National Teachers, but of Headaches concern to the community at large concern to the community at large. The only education which thousands upon thousands of Irish children get is that of the National School. The National School system, as every-body knows, is not perfect. It was instituted mainly to perform an im instituted mainly to perform an impossible and inhuman operation, namely, to convince the frightened little Irish pupil that he, or she, "was a happy English chrild" and to sing the praises of "the goodness and the grace" that left him, or her, in that wonderful condition. The National School system has broken in that wonderful condition. The National School system has broken down in its English mission. Nature As a positive cure for headaches, not merely relief but cure, Dr. A. W. Chase's Nerve Food stands without a rival because it gets at the cause of the trouble and builds up the nervous system to health and strength.

Mrs. Geo. Fuller, Lakeland, Man., writes: —'Dr. Chase's Nerve Food cured me of Nervous headache, from which I was a great sufferer, and I am no longer troubled with twitchings of the Nerves in the arms and legs.''

Nerve Food.

National School system has broken in the Edward in the Double outraged. The Irish born pupil could no more feel "a happy Bashi-Bozauk. The man who endeavored to turn the National School of Ireland into an institution for rearing up a race of "happy English children," whom God expressly created Irish, might as well have expected to succeed if he had issued an edict that the backbones of all Irish babes were to be cut out. But from that famous day down to this the whole system of National Education has been twisted and warped. It is only natural to expect that the teachers who work under that system are ill at ease and discontented, and that this discontent finds expression at their annual Congress. The National Teacher of the present day has to perform arduous and most

important—we know no more important — work under conditions which are galling and depressing. To begin with, he is under-paid. He has no proper equipment at his disposal, Oftentimes he has to work in a school which is so inadequate and so insanitary and unsightly that it is little better than a breeding-bed for disease. He has to sacrifice money out of his own salary for things which he should be no more liable than the man in the moon. He has to work under a system which he knows is wrong and which he feels pinching him at every turn. He has no feeling of comradeship with those in authority in the system except the managers. Inspectors have him at the mercy of their individual whims. They can make him the victim of a star-chamber. He has no right of appeal. As a citizen he is supposed to be non-existent, for he is allowed no civic freedom. When he has rendered, under these conditions, the services of a long life of endeavor he is rewarded by a pension smaller than that of a policeman—a matter which has ever moved the Irish Times this week to call it "a scandal."

These Pills Cure Rheumatism.—To These Pills Cure Rheumatism.—To the many who suffer from rheumatism, a trial of Parmelee's Vegetable Pills is recommended. They have pronounced action upon the liver and kidneys and by regulating the action of these organs act as an alternative in preventing the admixture of uric acid and blood that causes this painful disorder. They must be taken according to directions and used steadily and they will speedily give evidence of their beneficial effects.

During the procession and Benediction Prof. McCaffrey's choir was heard to good effect. Throughout the entire month of May the splendid ladies' choir, under the efficient leadership of Miss M. Mahoney, will charm the church-goers with their fine singing, during the 7 o'clock Mass. The evening devotions will consist of the Rosary, a short sermion and benediction. The instructions this week will be livered by Rev. Father Walsh.

AN INDEPENDENT VIEW

To the Editor, True Witness:
Ours is evidently the classic age of exaggeration. Every talker and rhymster considers some supposed idol of his—one for the necessary passing hour—the master of his century, and preaches or prates of him as such from the rooftop.

Much has been said and written about the poetry of the late Dr. Drummond; and it were only just, I think, that people who cannot claim to be students or professors at the

think, that people who cannot claim to be students or professors at the ecstatic school, should be given a bearing or a reading, as freely as those with whom they differ.

Given Dr. Drummond's qualities of mind and heart, no man will seriously question his noble character or belittle his aims, ideals, and purposes; while, given his poetry just as it is, not everyone is willing to say that Ireland has not had a sweeter singer or French Canada a truer artist for its pen-pictures of national life. First of all, the author of "The Habitant" cannot strictly be called a poet; he himself would have been the first to concede this. Then, as a versifier, it is hard to rank him with any singers of note, notwithstanding any singers of note, notwithstanding outbursts of heartfelt, tear-begotten outbursts of neartiert, tear-begotten enthusiasm to the contrary, and in spite of all Grub-street. That he wrote very acceptable verse, that his stanzas contain real sentiment, and none of the sentimentality of those who draw a giant-sized picture of
