JOHN McCLOSKY, SILK AND WOOLLEN DYER AND CLOTHES CLEANER, [FROM BELFAST.]

No. 33, St. Levis Street, near Doneganas' Hotel,

Begs to return his best thanks to the Public
of Montreal, for the kind manner in which
he has been patronsed for the last four years, and
now craves a continuance of the same. He will
carry on his Trade as formerly in all its branches,
viz:—Dying all kinds of Silks, Satins, Crapes,
Woollens, &c.; as also, Scouring all kinds of
Silk and Woollen Shawls, Moreen Window Cuttains, Bed Hangings, Silks, &c., Dyed and Watered. He begs to state he has procured a new
Patent Watering Machine for Watering Silks.
Shopkeepers, Tradesmen, and others, who may
require anything done in the above line, will find
it greatly to their advantage to call on him. He
also engages to renew the colour of all sorts of
Woollen Cloths that has lost them, and to make
the cloth look as when new. All kinds of Stains,
such as Tar, Paint, Oil, Grease, Iron Mould, Wine
Stains, &c., carefully extracted.

N. B.—As many of my customers are of opinion
that I have opened another Establishment in Notre
Dame Street, I wish to correct the mistake, by
informing them that I have nothing to do with any
place but the above, and that I have leased the
same for six years from the 1st May.

Mr. LAROCQUE, proprietor of the PLANTAGE-NET MINERAL SPRINGS, has handed to us the following certificate from the Hon. A. N. Morin, Speaker of the Legislative Assembly. The numerous highly respectable signatures from medical men, as well as the attestation of a gen-

tleman so highly respected and so well known as Mr. Monin, is a sufficient testimony of the valuable properties of these Waters:— Montreal, (Canada,) Nov. 12, 1849.

I, Augustin Norbert Morin, of the City of Montreal, Speaker of the Legislative Assembly of Canada, do hereby certify that I am acquainted with Mr. LaRocque, proprietor of the Plantagenet Springs; that the Plantagenet Waters have been widely used in this city and district, and with marked advantage, as far as I can judge by universal report. I have looked to the printed paper hereto annexed, the original certificates not having been shown to me. I have no doubt of its genuineness, from the well known position of the medical gentlemen and of others who have signed, and from the publicity which these certificates have had in the newspapers. The physicians whose name they bear are among the most respectable of the Faculty. Mr. Hunt, the Chemist, is also well known to me. He has been, I believe, an occasional correspondent of Silliman's Journal, and his character and capacity are well established. MONTREAL, (Canada,) Nov. 12, 1849.

A. N. MORIN.

SIR,—At the request of Dr. Morin, my medical adviser, I was induced to take some of your really valuable Plantaganet Mineral Waters; and, for the benefit of my suffering fellow-creatures, and mankind in general, I cannot but bear my humble testimony to their beneficial effects. Having suffered, for some time back, from severe attacks of optical delusion, and derangement of the lower intestines, I was induced to try the Plantaganet Water, from the use of which I have derived incalculable benefit. If my testimony should appear to you likely to induce others to try the Water, you have my full consent to use it such manner as may seem most advisable to yourself. I subscribe myself, dear Sir, with gratitude, your obliged servant, (Signed)

The meeting was opened by a proposal by the Mayor, that the Honble. R. The Mayor having thereupon taken the Chair, Dr. Davignon was invited to address the assembly, but this he declined, saying that he was neither the convoker nor the tool (instrument) of the meeting, and it was, therefore, for those who had called it to speak first, after which he would make any remarks he thought necessary.

That was not the time, he said, to go into details, but it had been, and could easily be, shown, again, that Annexation would add greatly to the prosperity of the people of Canada, in giving them good and cheap Government, and access to the markets of the United States. In allading to these topics, he mentioned the immense disproportion between the salaries of the public functionaries in Canada and the United States, and the inconvenience and loss to which Canadians were exposed by the Customs' Duties on their products going across the Lines.

Mr. Laberge followed,—he stated that the obnot more reasonable, and every way better, tha the Governor should be chosen by the governed by the people, might be had, as in the States, feed and or £400 per annum. The new Bishop of Norwich has been accused of entertaining heretical opinions on the subject of the Trinity and the character of our Saviour. For example, that the three persons of the Trinity are only manifestations of God, and not distinct; that our Saviour was but a man, with a manifestation of God in his person, and that all that he said and suffered could not be taken as the act and suffering of God. He has denied the charge, but rather evasively.

Thus far Prof. Walster has borne his confinement and solitude with most singular firmness, to all appearance, complete as it is with a dreadful crime; very little effect has been made risible upon his body or mind. His family, been made risible upon his body or mind, His family, and these visits have in some instances been prolonged to hours, the same instances been prolonged to hours, the same instances have reading most of the foremost in his cell, devoting the time to reading and conversation. deceases, has any variety deceased, the consolation, under twice, mutually offering to each other consolation, under the severe affictions which Providence has cast upon them.

We have also heard it stated, from the highest and best authorisy, that some of the friends of Dr. Parkman waver in their belief, as to the remains found in Dr. Webster's close to being times of Dr. Parkman, vielding to the conviction of other circumstances, strong in their nature, that the unfortuned sust, while laboring ander an aberration of mind, wandered away and came to his death in some manner, to them unknown. This belief is based upon past and the sum of the death of the past of the past

Prof. Weister, with his counsel, has been engaged nearly all the time during his confinement in arranging the defence, and the trial will be one of the most interesting upon record.

On the acrest of Prof. Webster, on the charge of murder, Mrs. Parkman despatched a letter to her son, who has been for some time in Europe, informing him that his father had been "missing" for more than a week, and impotring hims to return home without delay. He is expected by the next steamer. — Boston Mad.

AFFAIRS IN ORREON,—The Oregon territory seems to be progressing very rapidly towards greatness, wealth and population. The people have sent a de eguie to Washington, and, for the first time, that distant territory will be represented in the Congress of the United States. There is nothing to prevent Oregon from becoming the most wealthy State in the confidence. Its agricultural resources are inexhaustable j is forests are full of the finest timber for lumbering purposes, and its streams abound with 8sb. It does not, like Galifornia, contain precious metals to any extent but there is a mine of coal at Vancouver's Island, which is admirably well calculated for purposes of steam navigation, and which adds to its wealth as much, to any extent the but there is a mine of the laland, which is admirably well calculated for purposes of steam navigation, and which adds to its wealth as much, perhaps, as gold would. The value of this article, in such a stuation, and to a commity possessed of such resources, cannot be over estimated. The proper productions of the gold of California, in exchange for its agricultural productions—the latter country being admitted, on all hands, to be badly adapted to farming. This new territory ought be relieved of some debts which are now pressing upon her, and evardance her progress. She has paid some two hundred thousand dollars to the Indians, which Congress must saume and refund at the carliest opportunity. This is own great a sum for this new territory to pay out of its own or great a sum for this new territory to pay out of its own and it resources, and we hope that the matter will be acted upon by Congress as soon as possible.—New York Heratel.

REDUCED RATES OF PREMIUM—HALF CREDIT RATES OF PREMIUM,

CREDIT RATES OF PREMIUM.

THE great and decided success which has attended this Institution has induced the Directors to REDUCE the RATES originally required in British North America to the ardinary European Rates. The result of such Reduction is to enable parties to avail themselves of the important benefits of Life Assurance at much lower Rates of Premium than those of any other Assurance Company transacting business in Canada. The Directors have also resolved to extend to British North America the advantages afforded by the HALF CREDIT RATES of PREMIUM which have been so highly approved and are so by the HALF CREDIT RATES of FRENTLY which have been so highly approved and are so generally adopted by Policy Holders in the United Kingdom. The most liberal conditions are likewise offered to the Ausured in the limits to which they may proceed by sea or land, to other parts of North America without affecting their Interest in their respective Policies.

My Dear Sia,—I have great pleasure in informing you that my wife has received great benefit from the use of Kesling's Cough Lozenges, you recommended her a short time since. Previous to this she had been troubled with a severe cough, and was under some of our first medical men here without experiencing any relief; however, Kesting's Lozenges have done wonders.

RESTORATION OF VOICE BY KEATING'S COUGH LOZENGES.

GLASGOW, 12th January, 1847.

Fir.—I have great pleasure in informi g you of the great good your sceellent COUGH LOZENGES have done me. In December, 1845, I caught a severa cold from riding two or three miles, one very wet night, which seitled in my lungs, and quite took away my voice, so that I could not speak above a whisper from that time until December last. I traed nil kinds of medicines, but they were of no avail. I was then advised to try your Lozenges, which I did only to please my friends; but before I had finished a 2s. 3d. tin, my voice, to my great joy, came back as strong as 6ver. a strong as ever.

Marriage requires the fulfilment of several conditions, in order that it may be really the cause of mutual happiness. Could the veil, which covers the origin of domestic vestchedness, be reised, and is true source in every instance disclosed, in how many could it be traced to physical disqualifications and their attendant disappoin ments. Excesses are always injorious; the gift which, when used in moderation, is fraught with advantage, becomes, when abused, the prolific source of mischief, and of greater or less injury to the constitution and vital powers.

The particular excesses, on the nature and consequences of which this Treatise professes to dilate, are productive of greater misery to the human frame than any other to which it is subject.

This Work contains an accurate and complete second of the Apistomy and Physiology of the Reproductive Organs, and of their relative conditions in health and disease. Nor are these the sole contents of the work the means of escape, as well as the sature of the danger, are pointed out in clear and intelligible language. It deservedly requires the closest of the work the means of escape, as well as the sature of the danger, are pointed out in clear and intelligible language. It deservedly requires the closest attention and study, for what subject can be of more importance than the preservation of health, and of the physical capabilities of which every man should be possessed. It unfortunately happens, that, the unhappy fietim of excessive indigence and victous habits, whether acquired in early life, or from the follies of advanced age, while suffering from their invaliable consequences, analysely entertains a fear of applying to a qualified physician for relief. These Medicines have now heen before the public for a period of FIFTEEN YEARS, and during that time have maintained a high character in almost every part of the globe for their extracted in almost every part of the globe for their extracted in almost every part of the globe for their extracted in almost every part of the globe for their extracted in a second period of disease to which the human frame is liable. IN MANY THOUSANDS

of certificated instances, they have even rescued sufficient from the very verge of an unlimely grave, after all the deceptive nestrume of the day had st-terly falled; and to many thousands they have sufficient from the very verge of an unlimely graye, after all the deceptive nestrums of the day had atterly falled; and to many thousands they have permanently secured that uniform enjoyment of health, without which life itself is but a partial blessing. So great, indeed, has their efficacy invariably and infallibly proved, that it has appeared scarcely less than miraculous to those who were acquainted with the beautifully philosophical principles upon which they are compounded, and upon which they consequently act. It was to their manifest and sensible action in purifying the springs and channels of life, and enduing them with renewed tone and vigor, that they were indebted for their name.

manifest and sessions and channels of life, and enduing them with renewed tone and vigor, that they were indebted for their name.

Unlike the host of pernicious quackeries which beast of vegetable ingredients, the LIFE MEDICINES are purely and solely vegetable; and contain neither Marquary, nor Antimony, nor Arsenie, nor any other unineral, in any form whe lever. They are entirely composed of extracts from rare and powerful plants, the virtues of which, though long known to several Indian tribes, and recently to some eminent pharmaceutical chemists, are altogether unknown to the ignorant pretenders to medical science; and were never before administered in so happily efficacious a combination.

The first operation is to loosen from the coats of the atomach and bowels the various impurities and crudities constantly settling round them; and to remove the hardened faces which collect in the convolutions of the small intestines. Other medicines only partially cleanse these, and leave such collected masses behind to produce habitual Contiveness, with all its train of evils, or sudden Diarrhona with its imminent dangers. This fact is well known to all regular anatomists who examine the human bowels after death; and hence the periodice of these well-informed men against the quanch medicines of the age. The second effect of the VEGETABLE LIFE MEDICINES is to cleause the kidneys and the bladder; and, by this means, the liver and lungs, the healthful action of which entirely depends upon the regularity of the urinary organs. The blood, which takes its red color from the agency of the liver and lungs, before it passes into the heart, being thus purified by them, and nourished by food coming from a clean stomach, courses freely through the voins, renews every part of the system, and triumphanily mounts the banner of health in the blooming cheek.

The following are among the distressing variety of human diseases in which the VEGETABLE LIFE MEDICINES are well known to be unfallible:

INFE MEDICIALS are well already and the first and second stomachs, and creating a flow of pure healthy bile, instead of the stale and aerid kind; FLATULENCY, Loss of Appetite, Heartburn, Headache, Restlessness, Ill-temper, Anxiety, Languor, and Melancholy, which are the general symptoms of Dyspepsia, will vanish, as a natural consequence of its cure.

Ostiveness, by cleansing the whole length of the intestines with a solvent process, and without violence; all violent purges leave the bowels costive within two days.

within two days.

Diarrhona and Cholera, by removing the sharp acrid fluids by which these complaints are occasioned, and by promoting the lubricative secretion of the mucous membrane.

Fevers of all kinds, by restoring the blood to a regular circulation, through the process of perspiration in such cases, and the thorough solution of all intestinal obstruction in others.

The Life Maddiana have been known to cause PRETIMATISM permanently in three

cure RHEUMATISM permanently in three weeks, and GOUT in helf that time, by removing local inflammation from the muscles and ligaments

of the joints.

Dropsies of all kinds, by freeing and strengthening the kidneys and bladder: they operate most delightfully on these important organs, and hence have ever been found a certain remedy for the worst cases of GRAVEL.

Also Worms, by dislodging from the turnings of the bowels the slimy matter to which these creatures adhers.

of the bowels the alimy matter to which these creatures adhere.

Asthma and Consumption, by relieving the air-vessels of the lungs from the mucous which even slight colds will occasion, and which, if not removed, becomes hardened, and produces these dreadful diseases.

Sourry, Ulcers, and Inveterate Sores, by the perfect purity which these LIFE MEDICINES give to the blood, and all the humors. Sourbutic Eruptions and Bad Complexicing, by their alterative effect upon the fluids that feed the skin, and the morbid state of which occasions all eruptive complaints, sallow, cloudy, and other discrepable complexions.

other disagreeable complexions.

The use of these Pills for a very short time will effect an entire cure of SALT RHEUM, and a striking improvement in the clearness of the skin. always be cured by one dose, or by two even in

the worst cases.

PILES. As a remedy for this most distressing and obstinate malady, the VEGETABLE LIFE MEDICINES deserve a distinct and emphatic recommendation. It is well known to hundreds in recommendation of these values. recommendation. It is well known to hundreds in this city, that the former proprietor of these valuable Medicines was himself afflicted with this complaint for upwards of THIRTY-FIXE YEARS; and that he tried in vain overy remedy prescribed within the whole compass of the Materia Medica. He however at length tried the Medicine which is now offered to the public, and he was cared in a very short time, after his recovery had been pronounced not only improbable, but absolutely imounced not only improbable, smible, by any human means.

FEVER AND AGUE.

For this securge of the western country these Medicines will be found a safe, speedy, and certain remedy. Other medicines leave the system subject to a return of the disease—a cure by these medicines is permanent—TRY THEM, BE SAmedicines is permanent—TRY TISFIED, AND BECURED.

Billous Fevers and Liver Complaints.

General Debility, Loss or Appeties, and Debility and these medicines have been used with the most beneficial results in cases of this description:—King's Evil, and Schopula, in its wornt forms, yields to the mild yet powerful action of these remarkable Medicines. Night Sweath, Nexyous Debility, Nexyous Complaints of all kinds, Palettations of the Heart, Painter's Colic, are speedily cured.

THE EAST INDIA COMPANY.

THIS SALVE, prepared from the origine recipe procured from a celebrated Turks. Hakim, (physician) of Smyrna, in Asia Minor, and which has obtained an unprecedented celebrity in Great Britain and the East indies, from the astonishing Cures performed by it in both these countries, has lately been introduced into Montreal. As might be expected, its popularity has followed it, and its use is becoming general samong all classes. The Proprietors, prompte by the very flattering reception it has met with in the Metropolis, have determined on extending in usefulness to all other parts of Canada; and, for that purpose, have established agencies in all the principal Cities. They flatter themselves that when its wonderful properties shall become more generally known, they will meet with that crouragement which the introduction of such a valuable medicament into a country justly entire them. The contracted limits of an advartisement necessarily precludes their entering into any advante detail of its menta, but, for the information of the public, they intend to publish, from time it ime, such statements of curea as have or my occur, and for the present will content the neitre with merely caumerating some of the co-aplaint for which it has been used with the m at complete success.
