## Technical and Bibliographic Notes / Notes techniques et bibliographiques

The Institute has attempted to obtain the best original copy available for scanning. Features of this copy which may be bibliographically unique, which may alter any of the images in the reproduction, or which may significantly change the usual method of scanning are checked below.

## Coloured covers /

Couverture de couleur
Covers damaged/
Couverture endommagée
Covers restored and/or laminated /
Couverture restauree et/ou pelliculee
Cover title missing /
Le titre de couverture manque
Coloured maps /
Cartes géographiques en couleur
Coloured ink (i.e. other than blue or black)/
Encre de couleur (i.e. autre que bleue ou noire)
Coloured plates and/or illustrations /
Planches et/ou illustrations en couleur
Bound with other material /
Relié avec d'autres documents
Only edition available /
Seule édition disponible
Tight binding may cause shadows or distortion along interior margin / La reliure serree peut causer de l'ombre ou de la distorsion le long de la marge intérieure.

L'Institut a numérisé le meilleur exemplaire qu'il lui a été possible de se procurer. Les détails de cet exemplaire qui sont peut-être uniques du point de vue bibliographique, qui peuvent modifier une image reproduite, ou qui peuvent exiger une modification dans la méthode normale de numérisation sont indiqués ci-dessous.

Coloured pages / Pages de couleur

Pages damaged / Pages endommagées
Pages restored and/or laminated /
Pages restaurées et/ou pelliculées
Pages discoloured, stained or foxed/
Pages décolorees, tachetées ou piquees
Pages detached / Pages détachées
Showthrough / Transparence
Quality of print varies /
Qualité inégale de l'impression

Includes supplementary materials / Comprend du matériel supplémentaire

Blank leaves added during restorations may appear within the text. Whenever possible, these have been omitted from scanning / Il se peut que certaines pages blanches ajoutees lors d'une restauration apparaissent dans le texte, mais, lorsque cela était possible, ces pages n'ont pas eté numérisées.

NIAGARA FALLS, ONT.,
risks were concerned the year just past was an exceptionally favorable one. of course there may, and probably are some companles upon whom fortune refused to smile; " in the returns of 'last year dispelled certalnly some of the gloom that has so long overshadowed marlue insurance, and the underwiters are proportionately encouraged thereby.
Truly it was time that some change for the better took place inf marine insurance. For the past few years premlums in this important branch of underwriting have been steadlly on the decline, and it may be feared that had 1893 been even an average year, as regards losses, the number of gaps in the ranks would have been large. Nothing has been more significant of late than the disappearance of oue marine insurance company after another, and the steady with-drawal of underwitt ling "names" from Lloyds. And, had the previons bail records been maintained, there would have been but a slen. der chance of the reduction being lessened. Many causes have led to this aresult. The tendency of large steamship companies to do thetr own insurance, the depression in busincss, the encroachment of foreign "wild cat" companies and the severity of competition among the underwriters themselves, Lave all contributed to lower premiums and thus have lessened the chances of profitab:e business. Across this gloomy outlook the experience of the past year fashes like a ray of sunlight; and now that the companles tacitily admit that rates luave descended to a polnt below which they camot go and remaln remunerative, it is to be hoped thàt a brighter future is before marine insurance.

Of course it may be earlyl yet to congratulate the companies unon the business of 1893. No inconsiderable amount of last jear's risks have jet to run out,
and too sanguine predictions may prove prematupe. But on the figures as they stand there is good ground for satisfaction, for "It is certain that no dosses of exceptional inagnitude took place, and that, in spite of the severitity of the gales, but little damage was done to marine risks. Had it been other: wise, disaster must have followed; for with premiums at their present low obb even a year of moderate casualtics would dave left very little margln of profit for the companies. Fortumately, after the many years of continuous losses, 1893 tipped the scale ind the other direction, and, for once, marine risks proved exceptionally profitable.
That this must be attributed more to fortuitows condltions than to amy Improvement in the management of the companies appears evident., Excellent thein management is, and always has Been. Yet the results of the various pienrs show discrepancies and fluctuations for which no change in the conduct of the companies could account. The fact is that the business of warine insurance is'largely one of seientific speculation. It is a profession of well. considered chance, carried out on a basis which, when spread over a num. ber of years, is bound to yield an avex. age of proflt to the carefu' underwriter. But none the less ls it one of exeeptional risk, now that the larger, selfer, and therefore more proiltable vessels largely carry their own lusurance. Most. of the learling steamship lines have now their own insurance funds, the profits of which, when they exist, are used in Improving their. service elther by the building of new vessels or the alteration of the existing ships of their flects. As a result the majorithy of risks left open to marine underwriters may be looked upon as of secona. ary grade. The cream has been skimmed off the business before it comes to them, and In these days ol "Jerry'bullt"
ships and "thn-tank" steamers, what remains is often of an exceptionally haz ardous naturt Jnly in years like 1893 is profit possible or even probable for the marine underwriters, and that another year like the last can be antleip. ated is more than doubtiul. It is ilitthe wonder, then, that they are branching out into other lines of insurance where the prospects of profit, if not greater, are all events not so remote, br that the committee of Lloyds should have found it necessary to warn insurexs placing fire, burglary and guarantee risks with its members thate the security exacter from them did not cover such bustmess. Some alternativè form of insurance, the prospective profits of which might oifset any loss on their marine risks, had become a neceselty, and the nembers of Lloyds are realiz. ing that lact in all its gravamen.

THE OUTIPUTR OF GOLD.
It has always beon one of the prin. cipal arguments of the advocates of s!lver colnage that the world's pro. duction of gold, if not absolitely decliming, was at all events at a standstill. It was on this that they wased their domand for the continuation of the bi-metallic standard and the constant repetition of the statement that the production of goid was not sufficient to fill the monetary require ments of the nation caused it in time to be looked upon as an actual tact. To a certam extent it. was true; for during the gears :iwhen, owing to the actlon of the Unilted States under the Sherman bill, the production of sllwer was stimulat ed Into an artificial activity, tha gold mining industry did fall off. But, no sooncr was that act repealed, and the announcoment made that India had closed her mints to the frec colnage of silver by private parties, than the production of gold recelved a remarikable
impulse all over the world. Mining enterprlse turaed from allver to gold, and In the United States the gold output Increased from $1,597,098$ ounces in 1892 to $1,603,111$ ounces in 1893, or an increase of about $52,000,000$, and it is conceded that the lmpulse thus given will rasult in a much larger output during the present year.
In Australla, Ilussia and Aprica-the three largest gold-producing countries outside of the United States-simi.arin. fluences are at work, and everywhere the output of gold is rupidly growing. The low prices ruting for all other products have maturally led to inereased attention belng paid to a metal of such stable value. New gold fields are peing coustantily opened, and in South Africa more especially, the increase in pioduction has been reaily marvellous. From a total output of only 29,754 gunces in 1887, the mines of the Dark Continent have steadiy inereased thelr activity until in 1808 they senti to Europe $1,563,106$ ounces, or very near. Iy as much as the United States. Their out tuirn has more tian doubled since 1891, and there is no reason why they should noti seep up their average increase of 300,000 ounces per year. With Improved machinery and wetter communication with the coust, gold can be mined to-day with proflt at places where formerly it cost too much to pro. duce. Hydrantie pacer mining has enabled low-grade rects to be worked at practically a minimum of expense, and as long as the jellow metal malntalns its present high price compared with other products, so long whll the extension of lts production we continined there. In Australia and leussin the progress of the gold ymining Industry is less marked; But $\ln$ woth the official statisties show that it is presend. From both the exports were larger by from 20,000 "to 35,000 ounces than they were a year ago, and in woth new fields are being senrehed for and developed.

With the fact, then, that the world's production of gold has steadily grown during the past twenty years from 4 ,859,502 ounces in 1883 to $7,201,307$, in 1893, und that the production of lasib "year was the largest in the past quarti cr of a centurs, confronting us, it is dificult to see how the argument that Whe colnage of sllver is a vital neces. sitig because of the searelty of gold could ever become current. And yet. It has. More than thas, it has been se often insisted upon, that mang welllatormed peoplo hava accepted It as a
truth, lgnoring the fact that the supply of gold, like that of any other commodity, is regulated by the laws of supply and demand. a rise in value, increases its production at once. And although the price of gold has not advanced in ltself, such a rise has ween produced relatively by the fall in the price of other products. Consequently more attention has been paid to gold, increased activity in mining and prospecting has led inventive genlus in the discovery of cheaper and more comprehenslve methods of extracting it, the advance in hydraulic mining has rendered the woxking of the poorest placers prolltable and the improvements in machinery and methods of luansportation and extraction have done the same for quartzores. There is nothing to hinder or reduce the out. put of gold. Every Imterest and op. portunity is present to favor its in. clease. Under these circumstances, then, a worlin's famine of gold is out of the question, and one of the strongest arguments put forth in fayor of the coinage of sliver thus falls to the ground.

THE COAL UUTIES.
It is probabic that nothing has so contributed to the wealdh, and industrial progress of Great Britain as the pubundance of coal round in the Brltish lslands. The Dominion is favored, not ouly with plenty of coal but with excaustiess stores of ores as well, and there is nothing to indleate that the conl and hon age has had much more than a fair vegluning.
Manufacturers in general, miners and large buyers of coal, lave naturally found much to interest them in the dlscusslon at Washington relative to the Iree admission, Into the Onlted Staltics, of raw material, motably coal, bron and wool. Talsing up the quéstion of coal first, it may be muted that the policy of the Dominton has deen much more enlightened than that of our nelghbors. If we except a few mines in the Northwest, Canada possesses but little anthracite, or what is commonly called, hard coal, consequently we anmit it free and have done so for a long series of years, both before and after the adoption of tie higher protective poifey. For many years its price to the house. holder has varied but little, and when an attempt was made a few summers ago to clap on a duty and the fax went, clean into the otitaiva treasury and did not benellt any domestic intarest, an outery. was ralged which
speedlly caused a reversion to the old order of things, and a reduction 'in price took place exactly corresponding to the extinct duty.
Canada possesses great coal beds in Nova scotia and Cape Breton which are the autural sources of supply for the chief Industrial centres in New England but thels, as many of our readers know, is exciusively dituminous or soft coal, chiefly in use dy manufacturers. an enilghtened policy would, for many fyears past, have given this coal free access to the United States, and so have enabied the Amerlican manufacturer to come down to bottom ligures and stave off forelgn competition. The admission of coal free into the United states will make the fortunes of those Americans who invested so largely in Nova Scotia collierles a year ago. Whether thely foresight was merely commercial in its nature, or due to secret news lrom Washington It is not in our province to enquire, but a serious misapprehension remains to be corrected, to the effect that all the Nova Scotia mines are included In the American comibination. There are several excellent serles of mines in independant, and successful operation, by Canadians, and considerable colliery ground is still in their possessioni.' The Dominion lmposes a duty of 60 c per met ton of $2,000 \mathrm{lls}$, on soft, or bituminous coab, to secure a market for the product of our mines in the lower province, whilst the Americans euforce a duty of 70e, thue injuring certain sections of their country removed from American coal deposits, but withIn easy reach of Canadian sources of supply.

A i: illl
The abolitlon of the duties on sort coal would be hailed with satisfaction by the railway companies, and the numcrous matufacturers in both countries. Mine owners, fear the competition of Sritish coal, some of which is super. lor to our own, and which would again be brought up the St. Lawerance as ballast, or at a merely nominal frelght rate. It would be surprising therefore if they do not fight for a retention of duty in some form. The British supply would of course be limited by the tonnage seeking this port and while not ample for all requirements, would cause a serfous disturbance in the market. A large wholesale merchant calculated that if the duty was removed Nova Scotia coal would sell 20 e to 250 per ton lower in Montreal, and no more because the american demand would
absorb a large proportion of the output, and put prices up at the mines. Western Canada would fare better, is What a Toromio contemparany, says in the following exiract is correct:-The people of Ontario would get the beneIft of 60c per ton on all the, softcoal We use, as practically the whole of it Is imported. The soit coal used in Toronto annually amounts to about 300, 000 tons, and the removal of the Canact. Ian duty means an 1 tem of $\$ 180,000$ to the manufucuirers of 'Joronto."
Enough has been sald to show that smaill consumers are only affected indyeetly, unless indeed soft coal should replace anthracite in our homes, which is not likely. The point made by American mine owners, opposed to free coal that the imtroduction of Canadian coal into the Enilted staytes will re. duce prices all over the Republic, js ridiculed by the trade here, "who' state that the demand will freely absorbl all offerings, and that the interests of dmericanf manufacturers are wore welghty even than those of the coal barons.

## MMAGRATION.

The announcement that the Government of Manitoba will cease to make any active cfforts to attiract immigration to that province, and that it wlll soon close all its immigration offices In Europe, coupled with the determination expressed by the Dominion Government to discontinue the payment of bonuses to cmigrants after 'the first' of next month, marks the incoming of an era of common tense unusual in offleial circles. Long slnce it had ibeen apparemt to rallroad and steamship agents that the Work of Government immigra--tion agents in Europe was unsatisfactory, and that the ciass of gettlers they secured was largely of an undesirable character. Naturally the efforts of these agents were directed solely, toward the shipping of the largest quan. tity of people they could induce to emlgrate, in order to prove that they were earning thelr salaries, and they did so often by representations which, if not exactly incorrect, were certainly cal. culated to produce a wrong impresssion of the actual condition of the labor market in Caniada as well as of the cost of living in this country. The mislead. ing statements isused in what was familiarly known as "hmmigration lit. erature," Whether Lssued under Govern. ment ausplecs or not, were the most fruitfulcause of intending setiters lear. ing thls country, shortly after thelr ar.
rival and before the outlay made in securing them had been recouped. They faturally felt bitter agalnstb a country whlel they belleved had dellberate. ly decelved thein, and this feeling: of Wittermess they carried with them across the line. In fact much of the aggressive attitude of the United States towards Canada to-day, can be traced back to immigionits who found the roseate prospects so inserally set befure thèm in the old country fade into the harsh stern features inseparabe from a young Dominion striving to hew out a future for itses. The live and a half millions of dollars, then, which Canada has expended upon :mmigration since the provinces become confederated, may be practically looked upom as daving been thrown away. A large number of the immigrants it represecuts were of a cluss useless to any country. They were the fallures of every uation in Europe. The ones who remained to buid up this country generally pald their own way here, and desplsed "clarlty"passages with all the vigor of thler manly independent nat. ures. In the expericnce of every local. Ity "assisted" immigrants were a misNake. They were largely of the pauper, and not seldom of the criminal, class. They were mostly men drawn Irom the lower ranks of the large cities and though described as farm dabourers Lad rarely seen a farm. As such the toil and privation inseparable from ingriculture in a new country proved anendurable to them. Gradually they dirited back lito the towns and citles. Gometimes they sceured more congenial employment. Oltener they ald not. In the latter case they elther swelled the rauks of our crifminal population, or contrived to return to England, eitiaer by means of the local charlties or by appeals to their relatives. In elther case the country benefiteri more by their absence than by their presence.

Had the money thus represen'ted, or puen a portion of it, been placed in the hands of the steamship and rallway companles, instead of conflaed to Govermment officials appointed by political iniluence and often unfltted for the pecullar position they were selected to till, the result miglit have been kliferent: We do not gay it would; putit might. Railhoad men; are tolerably shrewd judges of character, and had the selection of emigrants been lefi in thelr: hands, and had it been understood. that thelr work would be Judged by lts results, we may salely
say that the Dominion of Canada would We largely the gainer to day. The total volume of immigration would not we so large. There would not be such fmposing rows of ilgures in the blue books. But the population of Canada would be a larger one than it is to day and what we now have would not have been selected by the paluful and expenslve process of weeding ou't the useLess and the dazy.

## OPENLNG TEE CAMPAIGN.

The departure for Wiunipeg of three firc lisurance managers, Messis. G. F. C. Smith of the Liverpool and Londor and Glove, Lansing Lewis of the Caledomlan and E. P. Heaton of the Guardinn marks the opening of the campaign upon the part of the coompanies agalnst the extension of the veantious Ontario Insurance act to the provinces of Manitoba and British Columbia. Bills based upon this plece of what some of the companies term "hayseed leglslation" have already been introduced Into both of the far-Western local houses, and it is to combat the most annoying features of these bills that the insurance campanles whose canadian headquarters are in this city have despatched tbree representative managers to the Prairie Province.
Of course the primary object of these bills is to tax the companies. The one fixed ldea, inseparable from the granger intellect, is that in great and prosperous institution, owing its success to the skill and energy of those who gulde its operations, is an object to be bled and black-mafled simply on that account. The very fact of its prosperity renders it an owject of suspicion, to him. He contrasts its progress with his own, and because it is greater than any he or his nelghbors have been able to make, he jumps to the conclusion that in some mysterious way iti makes lts money out of him. And so he is reads to vote for any measure that will retard that progress or place ob. stacles in the way of its further extenslom.

The eompantes do not object to taxation. They are perfectly willing to bear a little more than thelr righteous share of it, and, were slmply a license fee charged for dolng business, they would pay it freely. What they object to is the pharisalcal way in which the tax is imposed, and the petty annoyances and restrictions with which it is surrounded. .: Why should they be compelled to malntain attorneyw in
every province to recelve service of pro. cess? Why could mot process be ser. ved on their agents as it is here? Why should they be compelled to furnish claborate statistics fto satisily every "granger" superintendent of insurance put in authority over them? They fur nish one set of complete statistics to the Dominion Government covering cvery posstive pliase of their buslness. Should not this suffice for the varlous provinces also?
Provinizial buperintendents are simply uscless annoyances to the companies. They are usually cobuiitry politicians whose tenowledge of insurance statistics is-to put it mildly-hampered ly Hmits. Their idea. of earning wheh moncy is to worry the companies for useless and elaborite returns which they to not understand when they! gat them, and which have no bearing what soover apon the stablility of the com panics as lluancial institutions. Very often these officials may falrly bo classed in the category of "cranks." Such men are a con sitant thon'n in "the sides of our Busy mevrance men. There is no know fing what obstacles they may place in their way or what trouhe they may put them to. They are the apthors of the petty yet wearisome jeguiations with which lusurance is now surrounded. Is it not natural then that the companies should desire to lrave as few as possible of these moin in nuthority over them, or that they should exelf every finfluence they can bring to bear to avert the appolathaend oi new ones?

MONET MATTERS ARROAD.
The conversion of the French four-and-a-lulf per centes Ins been eurenty looked forward to by the Paris money market, as it is hoped that it will lend to $\pi$ shirting of investments, hud so to much greator activity' upon 'the Bourse. That is usually the result of conversions upon a large sealo, and probably will happen in France. The bperation is not so large ns thint undertnken by Mr. Gosehen a low yeary ago; but it is very large in itgelf. As the French reekon their debt by the rento-that is, the interest payable-it depends upon the way in which it is capitalised how'wo stato tho n'mount; but, roughly, it may be ataid that the four-anda half por centis are not less than 272 millions sterling. They represent, it will be recollected, the indemnity paid to Germany at the close of the war, and a portion also of the french oxpenditure. Originally the intorest was 5 per cent.; but in 1888 it was. reduced to 4 1-2 per cent., with an undertaking that no furthar conversion should take plince for ten yenrs. Now the Minister of Finance proposes to reduce the interest further to 81.2 per cent.f undertaking that. there
is to bo tho further reduction for eight yoars. It was generally expected that M. Burdeau would follow the example set by Mr. Goschen, and that he would propose a lowering of the interest by three stepe of 1-2 per cenit. at a timo-bay, at intervals of five years. He has decided, however, to make a larger reduction at once, and to trust to chance to make a further abatement in 1902. Whether his decision is wise or not will depend, of course, upon events, and especially upon whether peace is maintained. . If there is continued peace, there is no doubt that it will be possible to reduce the interest eight years hence to 3 per cent. But if there is war, further reduction will then have to be postponed. It is not difficult to understand why M. Burdeau has chosen to reduce tha interest by 1 per cent. immediately, iustead of following the example set by Mr. Goschen. As everybody knows, the expenditure of Prance is larger than her revenue. It is not thought expedient by Ministers to increase taxa. tion proportionately, and it is thereioro very wolcome to them to have a means of covering a large part of the deficit at once, without adding to tha burden of the taxpayers. Roughly, a reduction of 1. per cent. in the interest of the four-and-u-half per centa, will give a suving of about 23 millioxs sterling amually-a very large saring, tundoubtediy, apid very converient at the present time. The bill introduced, besides pledging the Government to make no further conversion for eight yoars, and providing lor the expenses of the immediate operation, further takes power to issue threa-and-a-half per cents, so as to enable the Government to pay off any of those holders iwho may not care to submit to an immediate reduction of 1 yur cent. in their intorest. It does not seem probable, however, that very many will refuse to! convert. 'lhose who may be dissatisiied will prefer to sell in the open market. Selling upon a considerable scalo : doubtless would lawer the price, which stamds now at a considerable premium. But, for all thats a large amount might le sold without any great fall. Further, French investors are not in the habit of buying the securities of other countries upon a largo seale-always excepting those of lussia, Spain, Egypt and Turkoy. The Freach holdings of Russian bonds are immense in amount, and it does not seem likely that holders of French reutes will profer Russian fours to Frepeh three-and-ahindis. Spain is not in a condition to attract investors, and neither is Turkey, while Dgyptian becuritien are very high. of course, it is possible that the French investors may depart from their usual custom aud may buy securities not now held largely in the country; but the grantor probability is that they will submit quietly to the proposals of the Government, and that the conversion will be a great success. After all, a Frenchi Govir prment security siolding $3 \cdot 1-2$ per conth hivithout any risk of reduction for: cighes jears is a very attractive investment for ordinary Frenchmmos 'But, while it is reasomably certain that the conversion will bes that a considerable number . will sell Those who desire to have a highar intereat for their money, and espectally thone

Who are well acquainted with other conntrics, and who know that investment can be made now on very profitable termis to themsolves in foreign securities, may do
so. The probability, then, is that there will be a shifting of securities upon a considerable scale; and it is possible that that shilting may not only increase business upon the Paris Bourse, but may even give a fillip to our own market. For example, if there were to be a French domand for any class of securities largely dealt in upon! the London Stock Ex. change-bay, our colonial securities or United States or South American ohares or bonds-then the French demand would tend to raise prices here, and would certainly give courago to operators in our own market. Apart, then, from the poitical importance of the operation, and from its influence upon. French linancef the conversion bas an interest for all investors throughout Europe.-Sat. Rev.

## PRICES OF TEA

A western subscriber in the grocery trade recalls to our attention a series of articles in the "Journal cf Commerce" In the early days of the N. P., and wants to know if we can furnish him with the average prices at which tea is entered in this country. The averages are as follows:

Black Tea per pound - . . 17\%cts Green and Japan Tea per pound 151/c. To this, for the further information of our grocery readers twe may add the average prise of.
Coffec, green per pound - . . - 21cts.
Ihese figures may seem startling,but they can be verifled by the returns of the Department of Customs.

## IHE GEO. BISHOP ENGRAVING COM

 PANY'S FAILORE.The follapse of the Geo. Bishop Prlintfug and Engraving Co., alrendy refer ded to in these columns, was not a subprise to many in the trade or to a few out of it, to whom ill-concealled facts and the ulhquitous sparrows are intelliglole. The fact that Mr. Geo. Bishop (managing director) real estate speculator and proprietor, had employ. ed paper of the company to the extento of some thirty-odd thousand dollars, was enough to make the concern stop to take breatir. ' On counting their moncy, and whint was consldered near ly if no: quite as good, they found a state of affanis which though not appalling, was bad enougli to warrant a cansultation with their creditors. The following statement was maile:-

Liabilitics.-

| Liabilities.Bills payable - | - \$ 8,500 |
| :---: | :---: |
| Open accounts : | - 4,800 |
| Special (Geo. Bishop) | '81,000 |
|  | \$44,800 |
| Assets.-. |  |
| Stock - | -\$31,500 |
| Bools debtes 6 | - 18,750 |
| Machinery, etc. | - 38,000 |
|  | \$113,250 |

Now this was not a bad ehowles for the creditors; and even the ownera of
the capital stock of the concern (\$90,000 ) slouid not have felt dismayed. But these printing assets pas known occas: iomally to fire insurance offices) bave a wonderful "alacrity in sinklng;"and there are others besides underwiters who keep fairly well informed in thls respect. Some of these others suggested an appralsement and, accordinglÿ, Mr. Geo. B. Burland of bank note fame, and Mr. David Macfarlane one of the ripest stationers in the citiy, were chosen to make a valuation. Note the shrinkage:-

Special (G. B.) -

- 31,000

Look at this picture, amd 误en on: that! There yet seams to we a good noniminal surpius for creditors. On the basis of it, however, an offer of $\overline{5} 0$ cents in the dollar, payable in two years without secunty, was made; and now both parties are waiting for somebody to move further in the mat. ter. Those among the banks who hold a large share of the $\$ 31,000$ are not likely to be very stiff, but one bank, otherwise interested, is not likely to abate much: It is probable on the whole that a much larger offer must bemade as an alternative to an ap. plication of the Joint Stock Companies, Act; and there is some reason to believe that a partor whole cash tender conslderably over the above offer could be obtained in case of a refusal by the creditors. It is generally Delieved that a change of management would not do the concern much harm. The case of Mr. George Bishop himself is pitiable in the extreme, but those conversant, with all the facto will not be slow to admit that he has himsell to blame moresthan any of his creditors, some of whom have acted with lighly commendable leniency towards him, a lenlency which we hope may have its usefuiness as well as lts eventual reward.

## A MISSLNG BROKER.

Louis Larivee, one of the partners of the firm of Gauthler and Larivec, 'cus. toms brokers of thls elty, is missing, and it ls belleved that one of our banklug institutions has been defrauded out of from . $\$ 2,500$ to $\$ 3,000$ by him. His method was to open, accounts with other banks in fletitlous names. He drew cheques against these and presented them to tbe cashed at his own - bank. The first ones were for simall amounts and were always paid. Then The presented larger ones, and induced the band officials to cash them with. out acceptance. When thes were teturned marked "no Tunds" he had always some excuse to present, and as Hls account had always been ciatiatac.
tory, and his partuer was known to be a substantial man, these excuses Nere accepted. No blame attaches to the 'oanle's offleers, as owing to the character of the firms busluess, the occasional dejection of cheques was to pe expected in the ordinary course. It is hoped that his partner will step into the oreach and settle up the liabilitles; but in the meantime. Mr. Larivee Is ljelog looked for by the detectivas.i

## FUR VALUES.

British Columbia sealers feel discouraged over the prices realized for sealskins at the January sales. They averaged only 48 shillings. For Lobos Island sealls. prices ruled at 48 shilinge for middyinge and smalls, 42 shillings for large pupe, 37 shillinge for midaling pups and 18 to 27 shillings for small pups. This decline occurred in spite of the fact that the sealers induced the Hudson's Bay Co. to auction a portion of their skins in order to prevent any combination on the part of fur buyers at the sales of C. M. Lampson \& Co. and Culverwell Brooks \& Co. Prices sagged steadily, owing to thr belief that under the new Behring Sea agreement, sealers flying any other flag than that of England or the United States will be able to kill seals with inpunity outside of the three-mile limit. It is rumoured that Russia and Japan have agreed to accept the decision of the arbitrators; but, unless the other nations do so also, there is nothing to provent vessels flyiug foraign flage from kill-- ing seals under the noses of the cruisers providing they keep outside of the marine league. This has naturally demoralized values in sealskins and the effect has spread to other furs; the latest prices quoted being as follows: Beaver, firsts, large, 30 to 57.6 ; seconds, do, 28 to 46 ; thirds, do, 16 to 25 ; small and cub, 8.6 to 12 shillings per skin. Otter, firsts and small, 30 to 00 ; seconds and small ${ }_{x}$ 20 to 45 ; thirds and small, 3 to 25 shilings per skin. Marten, selected, 20 to 45 ; firsts, 10 to 22 ; seconds and pale, 6 to 18 ; thirds and small pale, 2 to 10 shillings per skin. Mink, firste, 10 to 20 ; seconde, 5 to 12 ; thirds and fourthe, I to 2.6 ghillinge per shin. Silver for, firste, 18 to 130 ; seconds, 5 to 85 ; thirde, 2 to 8.10 pounds; fourthe, 5 shillings to 80 shillinge. Crose for, $\mathrm{Iirstg}_{8} 95$ to 75 ; seconds and pale, 80 to 55 ; thirds, 17.6 to 25 shillings per eblin. Red fox, iirsts, 7 to 15 ; seconds, 5.6 to 12.6 ; thirds, 4 to 0 ; fourthe, 2 to 4 shillings per skin. Black bear, firsts, 80 to 200 ; seconds, 50 to 85 ; thirds, 20 to 60 ; fourthe, 2 to 8 shillinge per skin. ikacoon, firsts, 2.6 to 12 ; seconds, 2 to 8 ; thirds, 1.2 to 2.4 shillings; fourths, 8 i pence to 1.4 shillings por skin. Skwnk, fruita, 5 to 10 ; seconds and thirds, 3 . thirds, 1.3 to 8 shinlings; fourthe, 7 pence to 1.3 shillinge per iskin. Wollf firsta, 5 to 10 ; seconds nad thirds, 3 to 7.8; first extra large Jlue, 14 to 25 , shillinge per skin. : Son otter, large, 20 to 215 ; middling, 24 to 62 ; small, 10 to 32 ; cubs 1 to 10 pounds per slini.
The changes in values at the January salea' were: ${ }^{\circ}$ Hudson's ; Bay Company'e male : Benver firats declined 7 1.2 $\quad$ o-
conds declined 15 per cent; thirds unchanged. $\therefore$ Musquash, firsts advanced 10 per cent., seconds and thirds unchanged.

Messrs. C. M. Lampson \& Co.'s sale: Tho following declined :- Beaver, firsta, 71.2 per cent: $:$ seconds, 15 ; lynx, $20 ;$ Japanese fox, 121-2; marten, 15 ; rac* coon, 10 ; musquash, 100 ; mink, 15 per cent. Adyanced: White fox, 10 ; woll, 10 ; thibet, 10 por cent. Unchanged: Beaver thirde, beare, red fox, Russian sable, gray fox and Australian furs. Sama as in June: Skunk and American oppossum.

## A. BENEFIT CASE.

A case of much importance to benefit societies has been decided by Mr. Justice Lyuch at Siweetsburg. Louis Phille, a contractor of Farnham, has been a member of the St. Jean Baptisto Society vince September, 1884. In March last he net with an accident whilst at work, and broke his log. He was, at the time, nineteen monthe in arrears, and indebted to the society to the extent of $\$ 6.05$, out of which $\$ 4.75$ was for monthly contributions of 25 cents. On April 6, 1892, he paid up the arrears and filed a claim for the weekly allowance provided in such cases. The sociels declined to pay upon tise ground that, under its by-lawa, a mo wher who is in arreare cannot receive such allowance during the time he is indebted, and that, after paying up, he is bound to wait during as long a period as that of his indebtednces. The plaintifi, acting under advice of his counsel, waited for mipeteen months, and then brought an action. The society then pleaded that a member in default, who has paid up all arrears, has no claim for any benofits under its by-laws. The plaintiff answered that if any such by: laws existed, they were beyoud the power of the socioty and ultra vires. The court adopted this viow and condemned the society to pay Mr. Phillie the amount to which he was outitiod and all..coste.

## HE HAS A SCHEME.

It is reported from St. Paul that President Hill, of the Great Northern, who is now in New York, and is expected to risit Europe shortiy, has a selieme on foot to circumpent tho pians of the Canadian Pucific in regard to tho proposed combection of the latter road witi Duluth by means of tho Duiuth and Winai peg: The lostility between the cireat Northern and the Canadian Paeific has grown strouger slice the Great Norchern compieted its coast extenfion and severed its rolation entirily, with its 'Cunadifan rival. Should the Cainadiaiss - Pacific now, by means of the Dulath and Winnipeg, obtain access to the head of the lakes and an entrance to the rich mineral country of Northern Minnesota, it would seriously threaten the business of the Great Northern:

## THE MERCANTLE TIRE.

Mr. Israel D. Bowman, president of tha alercantile Fire Lisurance Co., of Vater 100, had the sa'tisfaction of announcing to the shareholders at the oighteenth annual mecting of that company, that the year's busizess showed an increase of 2 biper centh
over ite predecessor，both in tho amount of insurance granted and of premiums receiv－ edd．The total of insurance now in foree has reached the fum of $\$ 14,22,4,778$ ，and the re－insurance liubility thereon is $\$ 08$ ，－ 655．Durige the year the promium income of the company was $\$ 103,294$ ，and adding to this the sum of $\$ 0,371$ for interestion investiments，the total income of the com－ pany was $\$ 100,064$ ，as arpainst disbursit－ ments of \＄148，740，The balauce of assete over labilities at the close of the yend was $\$ 143,423$ ，and altorether the company seems to be in a most flourishing condition：

## THE NOMTH AMERICAN LIFE

The North American Life Absurance Com－ pany，whose thirteenth annual report ap－ pears in mother column of this jssue，hat the umisum experience in lifo insurance of tinding its casin moterest receints more thani bulificient to meet all death and endowi ment claims maturing under its policies． Alter mevting all expenses it was able to place os per cent．of its incomes to its surr plus fund，so that ite reserves nowi reach the relatively large sum od $\$ 1,319,510$, During the yeur appications for now in－ surances to tho estemt of $\$ 2,0,0$ el，350 were grauted，and the total of insurates it Ioreu is alow $\$ 13,220,142$.
Much of the success of the company in this city is due to the efficienty of their proviuciul manager，Dr．Chus．Aulk，M．D．

## A GRALLPYING S＇AATEMENTS．

Ono representative wholesalo house has found business thus fur in 189.1 about $\delta$ per cent．more than for the correspobin－ ing period of 1803，and remittapees on

－In Ontario，Li Akhatughin，gemerar blore，Athens，is olitering Duc：on the dohar， －balf cash and the balane：on time，liabils ities being \＄12，000．Le was formerly of Williams it Mchaughim，who dibsolved iut the summer of $32 .-$－. ## MONTREAL WHOLESALE MAREETS．

 Thursday Evg．，Feb．8，1808،In many departments of trade，Febru－ ary is tho dullest month of the yearq Produce moves slowly，the weather is depressing and Ient is not a cheerful feature．Since our last，few changes in staple quotations hape taben place，obll， gations to the dry goods houses werd heary this mouth and many renewals had to bo effected．Paymente from near－by points were，with fow exceptional local－ ities in Ontario，better than anywhere eleo in tho Dominion．Travellers re－ port country orders for the spring as fair，and there are renernl expectationss of more renumerative prices，during the coming seasou for the product of the farm．
Ashes．－Receipts continue fair．First pots sell at $\$ 4.80$ to $\$ 4.85$ ，seconds $\$ 3.80$ to $\$ 3.85$ ．First pearle wanted at $\$ 5.50$ for now brand．Shipments to date just about balninco receipts of ables．Re－ ceived since lbt January 200 brls pote，

6 brle. pearla ; delivered 180 brls. pots, 15 bris. pearla; in store 8th Feb. at p.m. 58 . bris. pota and 81 lbs. pearls.
$\therefore$ Butter and Chense.-These markets luve been quiet, this boing tho duilest period of tho year for shippers. Fine table but ter and rolls are selling to the retail trade at steady príces. Fall creaivery is worth 24 c to 25 c lor best and summer stock 22 c to 28 c . Best Townships duiry. $211-2 \mathrm{c}$ to 28 c and roll butter 20 c to 21 c . Mor isburg and bockille tub butter 192 Morrisburg and B.ociville tub butter 20 c . Cheese quiet and only jobbing to 20c. Cheese quiet and only jobbing,
business passing. Fine lall at in 1 -2c;
Coal Oil.-Wholesale prices are given at $61-4 \mathrm{c}$ to $61-2 \mathrm{c}$ per gallon, the former being for largest lots. The retail price varies from 12 c to 1 DC , or 17 c to 20 c , and even as high as 2 coc in remota places where freight to which is an inportant itum. The highest figure above prevaiis in Nanitoba and the Northwest.
Drugs and Chenicais.-Opium is stronger abroad. Smyrma cables quoting ios Gd |f.o.b. Uuinine in moderate demand at: the adrance. Morphine is lirm. Gambler is held firmly. Sumac quiet, but firm and cutch steudy. Heary ehemicals quiet at old values. Gums unchanged, as a rule. Counphor is casier.
Dry Goodk.-A good deal of paper became due this month and there were, no doubt, many renewais, probably more than a year ago. Still the results were not disappointing to the best houses, in view of the general outcry about bad times, much of which is due to imagination. Noar-by points did weil, comparatively speaking, and there is considFatively mpeaking , and there is consid-
erable back-bone to the country yet. The continued low price of grain has been a great cause of disappointinent, and at the same time a farorite excuse why money is not remitted. Hay, appies, butter, cheebe, egga, etc., have, however, dune well ond prospects for lumber are brightWell aud prospects iod lumber are brigat-
oning. One thing offsets another and another bad grain year is scarcely probable, or even possible. For some cause or another city buying has dropped off. This is probabiy the most melameholy and the worst trade month of the year. Lent may have something to do with it, but the weather is also wintry and unpromising. Customers do not waut to buy. any more winter wear, if they can posbibly avoid it, and it is too early to dispose of spring stock, although goods should soou berin to come Iorward. Liverpool cotton, quict; American middlinge $41-2 \mathrm{~d}$. New York cotton, futures steady; Feb. T.6Gc, March 7.i2c, April T.Tuc, May 7.85c. ICose, spots, stendy; uplands $71 \mathrm{~b}-16 \mathrm{c}_{\text {, gull }} 8316 \mathrm{c}$. Futures steady; sales, Feb. 7.70e, March 7.73c,
 .7 .58 c .
Flour and Grain,-There hats been a trille more doing but buyers will not operate ahead, Sales are in small lots for immediate use. Peas are lower at ,60c to 67 c , while oats have sold at 39 c to $301-2 \mathrm{c}$. About 15,000 bushele of malting barley sold on private terme. No. 1 hard Manitoba whent is nominal at 72 c to 73 c . British markets are quiet but there is some movepuent of whent to France. Cargoes slow. Australian, Whent. off const, 278 ; to arrive 20 s Gil Chilian $2 \bar{s}$ and 248 6d, Cnlpiornia 20800 and 26d 9 d . Engliah weather mild. Canadian peas 4 Elld . Cash whent in Chicago $585-8 \mathrm{c}$, corn $341-8 \mathrm{c}$, oats $283-4 \mathrm{c}$, pork $\$ 12.15$, lard $\$ 7.371$ 1-2 and short ribs $\$ 0.20$. The western markets wero iweak, owing to heary reccipts, fine weather, lower cables ant heavy shipments from Baltic and sundry ports coupled with fair Indian shipments and moderate seaboard clearances. Receipts of wheat werg in excess of a year ago, Minneapolis
getting more of the wheat than ChicaigofThe longs liquidated largely and the main support came from prolonged buy ing by the heaviest individual short tra-: der, who kept his brokers busy on scale orders to buy.
Fish and Oilg.-Ash Wednesday found the market only moderately supplied in some lives and there has been a brisk movement and an adrauce in prices, especially in groen cod. - A Halifax man ini town with three cars of fish found no dilficuity in closing out at higher prices than bo expected. A good trade is bang done in fresh, frozeu stock such as herring, coi and hadduck. importers were asking as hifl as $\$ 7$ to $\$ 7.00$ tor large green cod. Oils steady and in only moderato demand.
Green Fruits.-The variety of iruit is nomewhat limited and demand is not heavy. Florida oranges were higher at a range of $\$ 2.25$ to $\$ 3.25$, and are the favorited just nuw, being not so tart as California, athough the Latter are cleaner looking and brigiter in color. California naveis were selliug at $\$ 2.75$ to $\$ 8$. Lemons $\$ 2.75$ to $\$$ \$. Sume fine looking pine apples were offered at 20e to 30 c each. Janamas $\$ 3$ per buach. Tomatoes in . 0 basket carriers, $\$ \pm . \overline{0} 0_{4}$ Caladian apples $\$ 4$ to $\$ \overline{0}$ per brl., a iew fancs spies being held at $\$ \overline{5} . \overline{\mathrm{v}} 0$. Spanish oniuns wo per crate. at auction four cars oi Messina and Palermo lemons realized from $\$ 1.25$ to $\$ 2.37$ 1-2 per box as ot quaiity. Three cars of fancy Florida oranges brought from $\$ 2.121 .2$ to $\$ 2.871-2$ per box; 1 no barrels of apples sold at irom $\$ 2.20$ to $\$ 4.40$ per barrel. A small lot of Washipston pavels sold at $\$ 2.87$ 1-2 per barrel: Buracove cocoanuts brouglit $\$ 3.25$ to $\$ 3.50$ per 160 . Valencia oranges, 420 size, $\$ 3.25$ per 'box; do 714 size, $\$ 4.25$.
Groceriest-Trade is about up to the average. Sales have been kept to small compass and close to requirements for some time past, and payments are well distributed and do not fall on certain dates to such an extent as in dry goods, ete. Jobbers report busiuess slack and competition keen in Ontario, but the Propiuce oi Quebec is in a fair position. So uneventiul is the market that many, in the trade said they lud absolutely nothing to reportt Sume little attention is still concentrated on Valencia raising which can be quoted at 4 3-4e to be for good fruit. Raw sugar is firm. Late cables quote beet for Fobruary, Mareh at 13 and speak of a rising market. Beet has already advanced about 9d from its lowest poiut. On this market, granulated is unchanged at refinery at $43-8 \mathrm{c}$, and yollows are quoted at 8 5-16c to 313-16c. A new York report saye of raw sugar: Eaough has leaked out to chow coustantly advancing cost, and good! reason to beileve that bugers are not fyet satisfied. Current direct arrivals may serve to in part satisfy local wants of the combine, but refineries at domestic outparts and in Canada want atock, und trying to get it. Europe or 3 razil furnished nothing iresh on coffee. Stock United States, ashore and afloat, is ouly 300 bags less than a jear ago. Rio und Santos markets are cabied firm. Canned goode are quiet. The legislatures of the various States have, for many years, been asked to provide lawe requiring canners to mark upon the cans the year in which the goode are packed, but the influence of the canners has generally had a killing effect, backed up by expert apinion. In some cases laws passed both houses and were then vetond by the Governor. Ohio is now being pressed to legislate against the industry, and the wholesale grocers of Cincinuati are said to have had their feelinge doubly injured from the fact that the committee to which
the bill has been reforred is made up of four larmers, one real estate agent and oue physicians. Probabiy the grocery èspert will deliver a dendly blow on the last round. The first of the new crop Brazil yuts are expected at Nem York about 15 th inst. One hundred tons is said to be in the invoice, and $51-20$ is quoted for the goods to arripo.
Iron and Hardware.-There are no depelopments of importance and busiuess in heary goods is likely to be dull all the month. Travellers are said to have done fairly in staple hardware and specina ties. Speculation is at a standstill in the United States markets. Pig tin is in ample suppls and trade quiet. Spoculators appear to be bearish on copper. Lake Superior ingot 9 T-8c to 10e. Pig lead and Spelter show a firm frout. Antimony just about bolds its own. With relerence to tin plate, United States operators have discounted tarill uncertainties in a great measurg. Prices on this side have been closely lowered to the basis of actual cost under the proposed new duty, and so low that manufacturera offer sparingly.
Meal and Feed.-Ontmeal is unchanged, in price, but dull. Standard in bags $\$ 1.95$ to $\$ 2.05$, granulated $\$ 2$ to $\$ 2.05$, rolled onts $\$ 2$. Feed in demand and firm. Brau $\$ 10$ to $\$ 17$, shorts $\$ 17$ to $\$ 18$ and mollie $\$ 22$ to $\$ 24$.
Provisions and Eggs--Little is doing in either pork or lard. Dressed hoga were selling at $\$ 6.60$ in a retali way and at $\$ 6.20$ to $\$ 6.40$ by the car load Hams 12e to 13c and bacon 111-2c:to. 12 1-2c. Lard in paiie. 11 1-4c to 121-4c, common refined $81-4 \mathrm{c}$ to $81-2 \mathrm{c}$. May pork in Chicago \$12.25 and 1ard \$7.22-12. Large suppies of egge have been crowdod on the market in expectation of a large lentendemand and prices are lower. Boiling stock 20c to 22 c , held fresh 14 c to 15 c and limed 12 c to 14 c .
Wool,-At tho London sales continental buycrs made large purchnses of merinoes and home buyurs bid eagerly for croses breds, Pieces sold readily. The tune was a shade steadier. Prices obtained for greacies were as follows: Now South Wales 5 1-4d to 9 1-2d, Queenisland Gd to $91-2 d$, Victoria $6 d$ to 18, New zealand 6 1-4d to 101-2d, Gape and Natal 43-4d to 78-4d.

## Meetines, Reponts 8 cc,

THE RICHELTEU AND ONTARIO NAV: IGATION COMPANY.
The annual mecting of the Richelieu and Ontario Navigation Co. was held at the Company"e offices, 228 st. Paul'st.; Montreal, on Thureday, the 8th inst., Mr Michael Connolly, the Acting President; i, the chair.
Anong those present were Messre. L. J. Forget, Col. Henehaw, R. Foryet, H. Mnick enzie and W. R. Miller, with Messers. (illdersifievo, J. B. Murphy and Jas. Swift, of Kingston, and Mr. Joseph Louib, of Quebec.
The President read the following report:
Gentlemen,-Your Directors have to lay belore you to-day statements of the past jear's business of the ppebent condition of your property and a general account of their ndministration since the last anual meeting.
The total trallic receipts were $\$ 610$, 971.65 , the expensen $\$ 583,702.00$; lenving a balance of $\$ 27,268.66$, which added to the balance of last year, $\$ 84,456.78$ amounts to $\$ 111,725.30$, out of which is anpropriated lor interest $\$ 20,183.88$, nccidentra $\$ 19,259.83$, net a sundrié $\$ 2$,

09504 lenvinc atill a- balance to aredit of profit nind losis necount of $\$ 00,286.24$, The result of the past year's operations is disuippointing in comparison with the record of previous years.
From first indications increased tray elling facilities. were requisite tol meet the expected demands of the travelifing public. Adnitionnl boats had to be kept rruning on both the Eastern and Western lines, involving a; much larger operating and outritting expenditure while the receipts owing to the causes and financial crisis hereafter alluded to were considerdbly lese than in propious years with fewer boats in commission.
Notwithstanding the amounts written off, consequent upon the now valuation of the enpital asisets, and also from unsattled chaims due to the Company, not ousidered fully vealizable, there remaine bolance in the Reserve account of $\$ 33$,
367.02. These two amounts aggregate net surplus over all liabilities of \$03, 053.26 .

At the commencoment of the past year great resintes had been expected of inaronsed trafic growipg out of the World's Fair, then about to open in Chicago, and in order to prepare for this and meet the wishes of important railways making close connections with your Compaty, your Directors felt it incumbent unon them to increane your fleet ap also to inako improviments, where necessary. To this end, the otr. Carolinim was purchased, the Comada, Quebec, Mng: not and Bollemian extensively improved. Your fleet is in very good order, and for some time to como wid not requiro more with very few exceptions) than ordinaary repnirs to koep it in good ruming condition.
Contary th expectation the Worldind Fair added little or nothing to the strenm of travel by way of the St, Lawrence, but rather diverted it towarids the United States, whilst the great financial crisis of 1803 felt alike in Europe, America and Australia, culmianting in the failure of apwards of six handred banks and of sonle seventy-five large railrond conipanies in the Uniten Staten, had the effect of keeping at home the classes who wanally travel for recreation duriag the season of mavigntion.
Tour Mirectors, however, leel happy in being able to sany that the lochl traffic was fully up to expectations and gave promise of future increase.
The str. Conadin was wintered in the Govermment Graving dock at Levis and her hull partly robuilt and greatigy strengthened. She is now stronger than when first built.
The str. Quebec received new simfts; feathering gear wheols were much imi proved and her padde boxes renewed in ron plates instend of wood.
On the str. Bohemian the joiner work was romodelled, her cubing and anloon newly upholstered, a spacious dining room placed on the main deek and aluned comuter provided. This bont is in first class condition.
Tho str. Lamparie whe rebuilt. in viow of the ronewal of the eantract for nine years with the Munictiphlity of Laprairie 0 , rim the forry
Extensive additione and improvements ineluding in new building for officost stores, ete., ete., have beon mallo to your proporty ati Quebec. By this improver mont it is expecteil tino Comprasy will be ablo to accommodatio all its steamers touching at Quebee at its orn whart of rectivig a saring of about three thouband lollares per animum:
Ieretofore the Company hold part of the Sorel proporty onia lense only from tho Govermment who haid, under the terms of the lense, the right to nseume all buildinge, wharves and other improvements. at $a$ valuation. Before the expiration of the lanse in 1805, Jour Directora thought it advisable to buy out the rights of the Government in the property, Which thay accomplished upon reasomable terme.

The Company's Tworkshops at Sorel wer completely destroyed by lire on the 20th Auguet. The loss, however, was partly covered by insuraince. No steps have yot been taken to : rebuild thom. Youn wharves and stopes at Batiscan, Threc Rivars and Sorela, etc., otc., have been maintained in a good state of repair
The question of expert valuation of ysur property has been considered by different Boards of Dirsetors for bevaral years, sud your Difectors lately decided in view of the oxtensive special perma nent improvaments made on many of the steamers of the fleet to have a now! valu ation made of your capital plant qnd to this end, two of the best qualified men obtainable, Mr. George: T. Davio of Levie and Mr. James A. Gputim, of Montreal both marive cugincers and practical ship builders, wore appointed to make a tho rough examination of all your steamers and other property, and place their estrimates of values upon them.
Their report which has been adopted by your Directora; as a true statement of these assets of the Qompany, showe a reduction in assets as compared with the valuntion of 1802 of $\$ 190,964.80$, whiel has been charged against Reserve account ereated for that purpose. The reduction in voluation of the Saguenay line is $\$ 145$, 1.20, which consisted entirely of the good will of the Sagucuny lise, purchased by the late President, Mr. Senecal. The raduction in the Longuenil line is $\$ 35$,000 , which represented also the good will of the Longueuil Ferry Company, but which the appraisers considered in hoth instances of no commercial value, Owing to the unfortunate washonts occurring on the Quebee nad Lake St. John Rail way, the arrangements for interchange of traflic were not carried out as natiofactorily as expected. It is, however hoped that the ronte will become popular and add considerably to the businese of the lower steameri. The policy ndopted by the Board during the past seasou of placing a through bont from Montreal to the Saguenay, met with great favor, and was much apprecinted by the trarelling public.
The summer Magnet was specially fitted out to run between Montreal and Hamilton and intermediate ports via Bas of Quinte, with the intention of running the whole season, but the reault was not katisfactory. Better results may be ex expected next senem as the route becomes better establiahed.
The financiel depression which has been so startiing and widesprend, embracing every clacs of business seems to be passing over. Thare is overy hope that thi Company will have a prosperous senson this year, and it must be satisfactory to knuw the goodicondition of the flect and its ability to meet the wants of the public. Detailed statements of the affuirs of the Company, duly audited, are on the tnble for font inspection. All the Directors retira, but are eligible for ce-election.
The whole respectiflly submitted.

## IICHAEL CONNOLLY

 Actiug President.The meoting went off very quietly, the shareholders bọiug evidentjy woll satisfied that their interests had been carefully attended to, and that though dividends had not been fortheoming of late years, they knew that they had'their va. lue in the practical improvemonts made in their property, where the money had been as safely invested as they conld ox. pect to havo done individually had it been paid out to them in casb,
Mr. Michaol Connolly tras electod President and Mr. Trm. Wainivright (G.T. R.) Vice-President for the current year. The new directors are Messrs. Hector Mackenzie, J. S,wift, 'L. Ji Forget, Ruholpha Forget, - W. A. Miller, Joseph Louis, F. O. Henghami and Alton Glerk. The fact that lour of them are stock brokers excited mome comment on the streat,

## a pear of grdat and jepreeOEDENTED PROSPERITY.

The thirteenth annual meeting of the North American Life wias held at the head oflice, 22 to 28 King etreet west Toronto, on Thursiday, the 25th of Jarnuary, at which there was a large and influential attendance. The report showe that 1893 was its most successiul year.
The insurance arititen was in excess of any previous year, while the termina tions showed a decrease, an excellent feature, fand the total amount of insurance in force reached the large amount of $\$ 18,220,192$. A substantial increase was made in intereat receipts, and the amount received from that source was more than sulficient to meet all doath and endowment claims, also payments to annuitants during the year. A very large addition was made to the Reserve and Surplus Funds, being over 58 per cent, of the year's income. The addition made to the net surp!us excecds that of any former year, and aggregates the relatively large sum of $\$ 297,062.26$.

Summary of the Full Financial Stato. ment and Balance Sheet for the Financial Year Ending Decomber 30th, 1893:
Expenditure (inc'd'ug death
claims, endowments, pro-
fits and all paymenta to policy-holdera)

216,792.45 Assets -
$1,708,453.39$
$1,319,510,00$
Reserve Fund - . . - 1,319,510,00
Net Surplus for policy:
holders:
297,062.26
Auditad and found correct.
JAMES CARLYLE, M.D.

## WILLIAM MeCABN

## Managing Director.

On the motion of Second Viee Preaident J. K. Kerr, Q. C., secouded by Wm. Lount, Q. C., the allocation of profite to policies in the investment class maturing in 1804, as reported by the Consultiug Actuary, was adopted.
The report of the Consulting Actuary, Mr. W. T. Standen, weil hnown as an eminont authority, weat very fully into the position and affairs of the Company, and in tendering his congratulations to all those connected with it for the excelleuti position it had attained, he stated it was gratifying to him to again report that the actual amounts he was able to hlocate to investment payments maturing in 1894 was in excess of the estimated: resulte in the book of estimates in use by the Compary's agents. Ha considered it a mattor of encourngement that insurers ahowed such a marked preference for, the Company's 20-jear investment plan insurance, as under that form of insurance it was likely that more atisfactory resulta would be given to policya holders than almost on any other plan of ingurance. In conclusion, ha stated that the excellent condition of the Company! mud its financial management is an angury of future strangth, based upon a business that appears to be eminenthy ontiofactory in every detail and requirement.
The President, Mr. Johin t. Blaikio, in moving the adoption of the report, mada an admirable address. He referred to the extraordimary, financial disturbunces in many countries, and espectially in the neighboring Republic, and said it was cause for congratulation that our own financial institutions remained in sach splendid condition, and that so many of them: were showing such markad progress, even during buch an period of depreselon, In the case of the North Amer-
lemin Lito, he pointod out that last year

had been the most successful in the Company's history, and made an comparison With the standing five yeare ago and at the close of 1893. The progress during that short period of time has been something remarkable-for instance, the assets lave increased loy 151 per cent., the int surance in force by 07 per cent., the cash income by 75 per cent., and the surplus in which. the vouderful increase of 48 SI per cent. In dravisir attention to thio preat incracu. drawing atus the pregident pointed out that the aim was to make it a policrholders' company, and from the resulte they had already paid policyholders, it was folt they had succeeded ind doing this; and, moreover, from the position attained by the Company, there was mo reason why it could not do as well for its policyholders, if not better, than any other Company. To illustrate this, he pointed out that the North American Life during the past year had put by to its reserve and surplus 58 per cent. of its income, whereas from the figures bitainable from the last official re borts there was tho Americanl or Char ports therpany who had been able to dian Company who had baving in one show. the like result of saving in this year. The companies included in this comparison were the leading Amenican companies doing busliness in this country President Blaikle, in concluding his speech, impressed upon his hearers the fact, that notwithsthanding the large int crease in business, it had all been ac complished at a reduction in the ratio of expense, whitich is in strong contrast to some of tho large companies, whose expenses, instead of showing any reduction, show a grent increase, all of which is detrimental to the policyholders. Vice President G. W. Allan, in seconding the ablo remarks of the President as to the reat progress and success of the North American Life. He solid that he felt proud indeed that they had succeeded in building up such i successful jinstitution as the North American Life. Ho roferred in very kind terms to the late lamented President, the Hon. Alex. Mackenzio, and told those present, although the adeceased gentieman was of late in feeble health, he freely give the compramy the benefit of his great ability and ex cellont judgment.
Mr. James Scott, merchaint and director of the Dominion Bank, in moving a resolution of thanks to the Company's naditor, which was seconded by Mr, John Dryana, dircetor of the Traders Banks anid that he had given a great deal of time and attention to tho Company'd investments, and had at the close of tho year made a careful investigation of the same. Hé found that all the investments wero made on a most conservative basis, that the interest was well paid; and moreover he did not see that there, was any likelihood of the Company's investments resulting in any loss. Ho mentioned that the amount of outstanding interest was small, in fact it ouly averaged about 3-4 of one per cent. of tho total cash invest ments of the Company; and when com pared with other financial institutions it would be found that this was an exceedingly favorable thowing, and fully demonstrated what he had said as to the excellent investments hold by the Company.

The Right Rev. Bishop Campboll, in moving a vote of thanks, to the directors, officers, agents, etc., said that he was ono of the oldest polieyholders in the Company-in fact, he held almost all lis: insurance in the North American Life and having been somewhat intiimately connected with its working nnd knowing well the inside management of it, said it afforded him very much pleasure in being present and bearing testimony to the greatest care and skill that hans always been : hown in the management of the Compamy.
Hon. 8. C. Biggs, Q. O., seconded the motion, and in doing so said:
"When things are well it le perhaps prell to remain quiet. It is perhaps hhw good a testimony as I could give of my. satisfaction, yot if iny expression in words is needed I am glad to support the resolution for if angthfing can please a policylolder it is to know that hid investment is a good one, that every: thing pertaining to it is upon the eroundest and most economical basis, and from the report which I have heard to-day. I ame satisfied that the Company is conducted upon those sound business principles wilici enablo a policyholder to sleep cass, knowing that if he never wakes up the amount of his insurance will be patd to hifs family at and porbops that oupht to bo enoury rate. perhaps that ought to bo enough to fay about any investment, but I think that the energy with which the directore have conducted the businees the compade and the fine sulowing that they have mado all their apent shous frionds and be all their apents and others to follo great inducement to they can in this' company."

Hearty votes of thanks were tendered the board, officers and agents of the company, and at a. subsectuent meeting of the newly elected board Mr. John L. Blaikie was unanimonaly re-elected president, and Hon. G. W."Allan nad J. K. Kerr,

## MERCANTILE FIRE INSURANCE CO.

18 th annual reporti of the Mercantile Fire Insurance Co, for tho year ending 30th Dec., 1898.

suditors.
Waterloo, January 13th, 1804.
-Auditors' Report.-
To the Stockholders of the Mercantile Fire Insurauce Company.
Gentlemen,--We have the honor to report having made a enreful investigation of the company's books of necount verifying the premium entries by comparison with the appications and cheeking the posting of the totals into the ledper.
The items constituting the expense account have also been compured with the vouchers therefor and the securities held for the Compnny's investments have been examined and the accrued interost thereon computed to Dec. 31st. 1893.
We have now much piensure in certifying to the correctuces of the Secretary's balance sheets and statements of assets and liabilities as well ne in stating that the various books of accounts are carefully, nently and clearly arranged nad kepl, which reflects much credit upon the secretary and his assistants.
All of which is respectiully submitted,
I. D. BOTMMAN,
; THOS. Hilllard,
Auditors.
Waterloo, Jauuary 13th, 1894.
-Minutes of Annual Meeting.-
Stockholders representing $\$ 104,100$ of the subscribed capital were present.
The President, Mr, I. E. Bowman, M.P.; occupied the chnir, and Mr. Jns. Lockie acted as Socretary of the meeting.
The minutes of the previous annual meeting were read and adopted.
Tho loregoing financial statements were read.
The President, in moving the adoption of the reports, dwelt at some length on the condition and prospecte of the company, and after gome discussion the motion whs beconded by Mr. John Shuh, and carried.

Moved by Mr. Geo. Moore; seconded by Mr. E. W. B. Snider, that Mesers. L. Poine and F. Colqukoun be appointed

Scrutineers for receiving and reporting the ballot for the clection of directors The Scrutineers reported as follows:
Wo certify that the old Board of Directors, viz., I. E. Bowman, M. 'P., D.' g. Bowlby, M.D., J. H. Webb, M.D., Geo. Moore, John Shuh, Robert Melvin and E: II. B. Snider, M.P.P., have been unanimously re-eleeted Directors.

> L. PEINE,
> F. COLQUHOUN,

Scrutincers.
January 27th, 1894.
Moved by Mr. S. Snydet, seconded by Mr. P. Lautenschlager, that Messer: Is: rael D. Bowman and Thomas Hilliard bo and are appointed Auditors for the current year. Carried.

The Board of Directors met at the close of the annual meeting and re-elected Mr. I. E. Bowman, M. P., President, and Mr. Jolun Shuh, Vice-President of the Company:

JAS. LOCKIE;
Secretary.

## SPECLAL NOTICES

ELECTRIC MOTORS FOR JEWELLERS.
The advantages to the jeweller of having an even power of such a nature ins to be easily controlled by him are 80 manifest that we find the electric motor rapidly makiug its way to the benches of all who are provided with the electric light, and also in mbny cases where ith must be run by battery, the increased control over the work in many operations, giving greater accuracy, and effecting a marked saving of time and as decided improvement in the quality of the work done. The Crowdus electric motor is having extensive sale for all work of this clage. We have no space to go into details, but it may be stated that. by a simple lever switch passing over eight buttons the armature shaft, which carries the pulley, may be made to revolve in either direction at $800,1,500$, 2,200 or 3,000 revolutions per miaute. The advantages of high speed in polishing, jewelling, etc., need only be referred to. These motors are furnished wound to connect direct to the 110 -volt inenadescent circuit, or thoy can bo [urnished to run at 4, 6, 8, 10 or 12 volts for use with stornge or primary batiteries, very efficient types of which may also be obtained from the company. . Besides the storage battery method for chemically transforming and storing the lifger voltage obtained from electric light systeme, they offer a direct currant transformer. This consigts of one shalt carrying two

distinct and separate armatures; revolving in one common magnetic field. The 110-volt carrent being almitted by one: pair of binding poste, drives the slaft and transforms the energy into a 6 -volt current, which is taken off from the other pair of posts. The power absorbed by the motor is 110 volts and 1-2 am* pere, equal to one 16 candle power lamp; that given off, is 6 volts and 9 amperes. This little transformer is so compounded that the speed, the voltage, or the amperes can be increased or decreased without altering its efficiency, by manipalating the switch either on the motor or generator side. It is perfectly adapted

for charging storage batteries，electro plating，runniug motors，ctc．，and is the most efficimt mechanicnl method of transforming the hipher volt current into one of lower voltage．For further in－ formation see illustrated catalogues，etc． Adddress，the Turney Electric．Manufact－ uring Company， 43 East Van Buren et．， Chicago，Ill．

## $\triangle$ BOON TO SMOKERS．

A new Chicago wonder has turned up in the Turney vest pocket cigar lighter．it is certainly a departure from the well benteu paths of mateh boxes nad cigar lighters，and makes a perfect little pocket piece，very little largor than a silver dollar，and weighing appreciably lesg．It coutains no tapes，oin，caps；fuses or li－ quids，has no wheels，gearing or delicate mechanism to get out of order．In ahort， it is so original and cute that we fecl justified in withholding from the icader the exnct manner in which the flame is produced，believing that it would be ni－． kind to rob our readers from the pleasure of the novel surprise gained on pressing the button for the first time．The lighter is offered to the jewelry trado as an eas－ pecinlly attractive and rapid selling，as well ae usefnl novelty for the holidays， being finished in polished nickel，polished silver，oxidized eifyor and．satin nilver．； in lact，in any，style desired．

## SOMETHING NEW FOR GONFECTIONERS

## R. ©AVAGE \& CO.,

MANURAOTURERS OF CONFECTIONERS' TOOLS AND MACHINERY.
Nos. 42 \& 44 MIOHIGAN STREET, CHICAGO, ILL.

Bend for Oatalogne and Prices for Oheck Perforators. Large Paid Gancelling Machlae (8omething new) Numbering Machines and Ooin Beale. Orders should be eent direct or through authorized Agents, as we do not sell to the trade. Beware of imitations. Look at the fame plates and patent daters.

## Abbott Check Perforator.

The only Maohlne adapted to Forelgs Erohange, as it contains the Poond Marix or the word Paid. The punches never get dull, the figarea will not tear, the difs and all wearing parts are made of Alaminum Bronze which will not rust or corrode and wears better than stecl. In ordering panches for trial, specify whether it hall contain the word Paid or the Poand Sterling aign.

 The only Machine containing all of these Characters.

## THR ABBOTT MACHINE CO., Manufacturers,

Offces and Factory, 47849 S. Canal St, Ohicago, Ill.
Branch Office, No. 31 Broadway, New York, N. Y.

Our catalogne of 1894 containg the greatest variety of perforating tamps ever made by one concern. Datine, cancelling, receipting and numbering perforators of all sizes, capacities and prices.
Bend for it and for illuatrated pamphlet giring names and teati-

A Check Perforator must be SIMPLE in construction, RAPID in operation, EFFECTIVE in protection afforded, and DURABLE. THEN the price comes in.

## Thè Ghicago Check Perforator

has all these qualifications, and in a higher degree than any other, at a amaller cost. This is posbible becaase of its pecultar construotion (patented) that gives it mechanical advantage over any other.

For these reasons it has become the most popular machine mado; 17,500 users endorse it, Canadian dealerg sell it; or addrẹ日 the manufactarers menial letters of users of our machines.

Figures are reduced one-th'rd.

##  <br> Every Machine Warranted.

 Sent on approval when deaired.( . . . . . FIRST ON THE LIST OF AWARDS WORLD'S FAIR, 189:

## Why is it the ACME?

It is the Acme in BPEED, because it can perforate 15 cheobs in a minate.
"." of Simplicity because it only needs ONE HAND to operate it. Yon asve in punching your oheck and $\frac{1}{2}$ in taking it out.
" " of Accoracy, because the allgnment and spacing are invartable and IT HAs A DROP FEED
" " of Darability, because ite mechsnism is the almplest. The punches never get dall and never rust.
Write for Catalogue and Prices.
Be sare you ees the "Acme" and learn price before you parchase. Bent on approval. We supply Machines with the Pound Mark or any Foreigu Characters.
