way of machine gun barrages. Two hundred and fifty rapid fires were brought up and concentrated. These guns opened a terrific barrage, during which each one of them pumped 25,000 rounds of ammunition into the German defences. The enemy was absolutely overwhelmed. Those upon whom it was swept could neither retreat nor advance, and large numbers surrendered. But the casualties were great. In one small place, for example, three hundred dead lates were found.

In Gauche Wood the Germans had four British tanks which they had previously captured. These tanks were used as machine gun fortresses, and held out for hours before being taken.

Late in the afternoon the Germans opened a heavy attack between Havrincourt and Villers-Guislain with the sixth German division. This assault was directed not only at the British who were engaged in yesterday's operations, but against positions a little further to the morth which the British had taken in the past few days. The attack succeeded in relling the British back somewhat on the left, but this ground was quickly regained in a counter-move, and the Germans were everywhere repulsed with heavy losses.

"ONCE-OVER" TILLER TO INCREASE PRODUCTION

A number of gentlemen intereste in the increased production of food for our allies witnessed a series of mov-ing pictures yesterday afternoon in the parliament buildings, illustrating the operations of the "once over" Tilier. Briefly stated the "once over" does the work of the plow, the disc and the harrow. In addition to the plow blade there is an attachment, may have as many discs as the nature of the soil demands, and this pulverizes the soil turned up by the plow. This attachment is revolved by gas power and does its work so completely that the ground to a depth of nine inches is thoroly broken up forming a fine seed bed. This method was shown to be superior to the old, in that not only the surface is broken but all the ground dislodged by the plow blade, as well and experiments have shown that ground pulverized by the "once over" produces five bushels where only four were produced under the old methods.

The pictures covered the work of the Sunday school commission of a simplified service for children which stration was conducted by Joseph M Ness of Minneapolis, representing the company that manufactures the ma-chines, and it was explained that he was in Canada in the interests of the Soldiers' Re-Establishment Commis-sion. There is a proposal to admit free of duty implements for the use of returned soldiers who intend to adopt farming, but nothing definite has been decided; but it seems to be a near probability that the company will establish a factory in Canada, as the tariff of \$165 would make the implement practically prohibitive to the Canadian farmer.

HAVE SPECIAL CLASS FOR ALL DEFECTIVES

His reply to those who argued that this would preclude the child from becoming familiar with the service of the church was that, by presenting such a should immediately be made for a should immediately be made for a Dr. John Noble said that no at-tempt should be made to give mentaily defective children much academic education. For over 59 years Turnbulls have been making good knitted underwear in Canada—and underwear exclusively—They came from the Old Country with the knowledge of how to make good underwear bred in them—They brought out expert workers from the Old Country from time to time as their business grew—thus have always kept their products up to the highest stan-dard, being made with that thoroughness and care for which the Old Country workers are famous.

The reason for this tremendous growth and popularity can be summed up in one word "Quality" first and all the time— You cannot get away from the fact that Canadians appreciate "Quality" more than anything else-

-his Mother, his Home!

Our 'mid bursting shell and battle's roar; out in the awful abyss of a man-made hell; in a strange land, thousands of miles from home, a brave Canadian mother's son is, this minute, fighting, bleeding, dying-enduring all the agonies of this terrible conflict that the world may be free. There, amid the victorious cheers of our men, the maddening curses of a savage foe, the cries of the stricken and the wails of the dying, his mind goes back to Canada, to the land he loved so well; to a dear old mother's home, to the comforts he found there. He sees her bent in longing for her boy "Over There," and his heart aches to comfort her with a letter of good cheer. Hear him, in a voice with anguish filled, calling, pleading, praying to those for whom he fights, to furnish him with the comforts that they themselves would want.

We carry to YOU this plea from far across the sea, from your loved ones "Over There," that they may have a few of the comforts that YOU daily enjoy.

ites and others of similar beliefs from the United States will no doubt be ever advantage they are entitled to in the way of exemption. Whether they should be encouraged to come in or compelled to stay out is another question. The important thing to remember is that the Mennonites who came into Manitoba in 1873 are immune from military service because they came into this country with the express assurance of such immunity. They are withdrawn from the operations of the Military Service Act by a clause of the schedule to the act which

those persons exempted from military service by order-in-council of August 13, 1873.

Much apprehension exists in the public mind on this subject and all do war, with the furnishing of supplies not distinguish between the classes of any kind, with the despatch of rewho may claim exemption under the inforcements, or with the maintenance Military Service Act and classes who of communications, to see that no deare declared to be not hable to the fection, no slacking or shirking, no act. The order-in-council exempting the Mennonites who came to Manitoba in 1873 may or may not apply to their descendants born in Canada. It certainly cannot be stretched to cover the case of the newly-arrived immigrants. Whether or no these immigrants did actually come here relying upon an assurance from a Dominion official which in equity might be considered a pledge of the crown, remains

(By J. F. B. Livesay.)

With the Canadian Forces, Aug. 12.

Wednesday night last presented a sky clear and starry, with light just sufficient to illuminate the white roadway and silhoutte the regulated avenues of trees inseparable from a French highway of the first class. Against the eastern horizon was the usual pyrotechnic of trench warfare—neither more nor less. Once every few minutes one of our heavy howitzers sends across a shell; a dull report and then a wobbling vibration, before it steadies down upon its appointed course. More seldom comes a reply—a shrill messenger ending in a roar of explosion.

Attempts were made by the radical factions attending the congress to secure endorsation for an amendment which urged that all wages should be increused when the price of commodities went up, but the attemps were unsuccessful. A motion which was dropped for that ultimately carried, asked for the appointment by the Dominion Government of a commissioner to fix the prices of necessities of life.

The congress also adopted a resolution calling for the nationalization of the practice of medicine and all hospitals.

Of the players' strike in the recent world's series, an American writer says:

'However, aside from the harm it did the players, the strike emphasized the unjust division of the world's series receipts imposed on the participants by the National Commission's arrangement, adopted last winter. The Cubs complain, and no doubt with justice, that each regular got only a little more than \$500 for playing the series, whereas the second-place Giants got almost as much. Likewise, the Clevelands got nearly as much as the Cub regulars. It is apparent that this situation is not an equitable one, and that if it remains for another series it will bring on only more trouble and dissatisfaction.

"This is no justification of the strike, remember. The Red Sox and the Cubs knew of the new division of the receipts before they went into the series. But, with all that, it behooves the National Commission to do away with that foolish division, It was arranged in order to curb the tendency of the series to be-

PREPARE TO HELP RESULT OF TEAMS HEADED BY WOMEN BELGIAN TAG DAY

Eight Thousand in

Committee and Captains Dis- Collected More Than Fiftycuss Plans for Getting Funds.

Preparatory to the Belgian Tag Mrs. G. R. Baker, chairman of the ladies' division, announced yesterday the totals of the sums collected by the different women's teams in the sailors' week mittee and captains was held yester-

day, Oct. 1, a meeting of the committee and captains was held yesterday afternoon in Dominion Banit building, corner King and Yonge streets. Mrs. Arthur Pepler presided and explained the needs for the appeal which will be made to the public on that date.

Describing conditions as they exist or have existed during the past few months. Mrs. Pepler said that the soup line had increased from one and a half to two and a half millions and that for the Belgian children in particular there was special need. Investigation had shown that only 16 per cent. of these little ones were in a healthy condition, the remainder suffering from some form of disease brought on from mainutrition or other hardship.

The Belgian Relief of Toronto is preceding its "tag" by asking citizens to have a week of self-denial. To deny oneself a night at the theatre, a dish of ice cream or cigar as the case may be is not a great hardship, but the aggregate of the denials will make a splendid offering of sacrifice if there is a generous response. To heip Belgium is not a charity but justice, Miss Constance Laing announced the rules which would govern the day, the chief of which was a little change in the time, all workers to be ob hand not later than 9 am., those in the factory districts to begin earlier. Supplies will be had at 95 West King street, phone Adelaide 8 on day of Tag.

Greeks Co-operate in New Attack in Balkans-Serbians

Cross Cerna.

Paris, Sept. 19.—Describing the operations in Macedobia under date of Sept. 19 the war office communication tonight says:

"On Sept. 17 and 18 the allied armies in the east greatly extended the successes of the two preceding days. The Bulgarian divisions engaged on the front of the attack retreated in disorder on the Cerna. Our troops in their pursuit, have reached the Cerna on one part of its course and have occupied in the mountainous zone Gyurov, Kamen and Chazerna, have crossed the Belashnitsa River and gone beyond the region of Rojden, as well as the Blatets Massif.

"The enemy left behind prisoners and considerable material, which have not yet been enumerated.

"In the region of Lake Doiran British and Greek troops likewise have carried forward an attack and gained a foothold in the enemy first position notwithstanding stubborn resistance. A great number of prisoners have already fallen into their hands. The attack continues."

H. P. Kennedy, Limited.

During the week the H. P. Kennedy Co., Limited, in their stocker and feeder division, handled about 350 cattle, and yesterday Fred Maybee, of the firm, told The World that from the opening on Monday, which was a trifle lower than the close of last week, the market had gradually eased up to the extent of from 50c to 75c at the close, and this view was generally shared on the exchange. Common stockers cost from \$7.50 to \$8.50; yearlings, \$8.50 to \$9.75; feeders, \$9.75 to \$11, according to weight and quality. Mr. Maybee regarded the outlook for choice feeders, weighing from 950 to 1056 lbs., as good at any time during the season, with the prospects for the common run likely to go lower.

It has long been known that a gharp division of opinion as to the wisdom of an early disbursement to the holders of the junior shares exists among leading interests in the company. President Carruthers is understood to take the stand that the company is doing well enough for the present in keeping up regular payments on the preferred after clearing up the old arrears, and that the company, with its need of large working capital and with the post-war business uncertainties to be faced, cannot afford to impair its position by paying dividends on the common stock. On the other hand, some large holders of the common are raising the clamor that they are en-

HEAVY DEALINGS

Stock Sells Off After Establishing High Record-Russell Motor Strong.

Canada Steamships common com-

pietely overshadowed other issues on the Toronto exchange yesterday, with transactions of nearly 1800 shares, or two-thirds of the aggregate of all stocks. The rumor that the interests in favor of a dividend declaration were practically in control and that a dis-bursement at the rate of six per cent. per annum would be announced short-ly caused the stock to open strong at 48, with a subsequent rise to 481-4, point 1 5-8 above the previous high Bonds

at 48, with a subsequent rise to 481-4, point 1 5-8 above the previous high record, but a flood of offerings brought about a reaction to 47 with the closing at the lowest level of the day. The final bid was 46 1-4, with stock on offer at 47. Only 10 shares of Steamships preferred changed hands, the price being 76 1-2, an advance of 1-2.

A rather irregular tendency was manifested by the market as a whole. Twenty shares of Maple Leaf came out at 125, a decline of 1 1-2, with the closing bid 122, and other reactionary issues included Mackay at 73 1-8, a loss of almost two points, and Canadian General Electric (with a decline of half a point to 101. On the other hand, Russell Motor common opened three points. Canadian General Electric with a decline of half a point to 101. On the other hand, Russell Motor common opened three points up at 85 and extended the gain two points further to 87. Shredded Wheat moved up 21-2 to 112, comparing with recent sales at par, and Barcelona gained a large fraction at 11 3-4. The steels continued inactive but were firmer, and Brazilian held at 48 1-2. An interesting incident was the demand for Tuckett's common, which sprang up in the afternoon, when 140 shares were bought at 21, with that figure bid for more without offerings. The transactions were the first in this sales were made at 17.

Trading in the war loans dwindled to almost nothing, but prices were steady.

LA ROSE IS AGAIN MARKET LEADER

Asked. Bid. Buying From North Causes pine Crown Still Firm.

La Rose resumed its leadership of the mining market yesterday, large buying orders making their influence felt at the outset of the trading. The stock continued to grow scarce as prices rose, and the closing was at the best level of the day, 55, equal to the previous high point in the past few weeks, and a gain over Wednesday of 2½. Transactions in La Rose amounted to 10.260 shares, and once again it was buying from the north which zave the movement its impetus. The fluds on the property have emphasized the truth that the potentialities of the Cobalt Camp are still only to be guessed at, and that scientifically carried out development work-on old properties discarded in the early years of the Cobalt boom may yield astonishing results. Timfskaming is a notable example of a mine which has "come back" two or three times after it appeared to be exhausted; in fact, several of the present silver producers have gone thru the axperience of gaining a new tenure of life after ore reserves had run low.

Porcupine Crown was again sought after, hearly 7000 shares being taken up yesterday at from 16½ to 16¼ with 16½ as the final bid and 17 asked. The price is still much below the intrinsic value of the shares.

The general tone was firm, but, for the time being, such usually prominent stocks as Dome, Hollinger and McIniyre are in a state of eclipse. The bid for Dome was lower at 8.75, and there was a considerable spread between the Hollinger asked price, 4.85, and the bid of 4.80. McIniyre was traded in "ghtly and was steady at 1.47. Dome Extension remained firm at 15, and Lake Shore held at 70, With the increased milling capacity which this property will soon have it is expected that it will become one of the big gold producers of the north country. Hattle was dealt in at from 70 to 69. Boston Creek was a point off at 19; Newray at 12, Thompson-Krist at 5 and West Dome at 10 were unchanged.

La Rose absorbed practically all the interest among the silver stocks. Beaver was off ½ at 30, and Ophir ¼ lower at 5%, while Peterson

were uncovered near the location of the winze and values ranging from \$30 to \$1600 to the ton were secured. When the exploration of these lenses of ore is prosecuted on the contact it is expected that they will show even better values and more permanent ore bodies than on the upper levels.

The explanatory circular recently issued by President Lang of the Ophir Mine states that the Mining Corporation's option is at the rate of 16% cents per share on a stock basis.
