Mears of Railway

From First Crude Stations To Huge Palace Planned For Construction This Year Is a Far Cry-This Year Sees Railways Deep Into Biggest Program of Improvements in City's History.

HE GROWTH of the railways in Toronto really represents the growth of the city. A real estate man, who has been selling residential property for the last forty years. dated the phenomenal growth of Toronto from the day that the Canadian Pacific Railway ran its first train into the city. For twenty years

YEARS AGO, IT CALLED THE STATION THE FINEST IN THE WORLD. THAT WAS EARLY IN STEAM RAILROAD DEVELOPMENT.

before that day in 1887, Toronto had steam road facilities, but the growth was nothing re-

markable. The C. P. R. made Toronto the com-

of cities. " It has had as much to do with the de-

velopment of a city as all other forces

combined. With the growth of the manufactur-

ing and commercial interests in Toronto, the

railroads have also spread out their octo-

pus-like arms, taking into their possession

first one district and then another, increasing their

holdings and their rights until now hundreds of

acres within the city limits and even greater areas

on the outskirts have been acquired for their own

has this increase in railroad interests been more

Probably at no time in the history of the city

The modern railroad is a breaker and maker

mercial gateway to the New Canada.

THE UNION STATION, TOBONTO, IN 1859. THIS SKETCH (FROM THE JOHN ROSS ROBERTSON COLLECTION) IS IN STARTLING CONTRAST TO RAILWAY SCENES TODAY, OR THE GREAT MARBLE STATION PLANNED FOR THIS CITY.

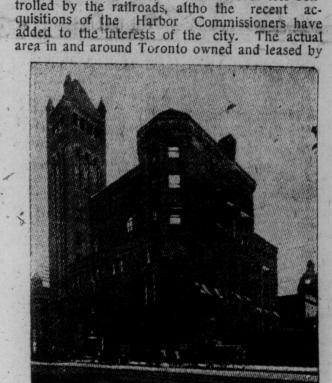

Huge schemes, Northern amount to as much

for costly improvement.

The freight sheds of the Can-

which displaced the old Government House, are already assessed at one million dol-lars, and they are not yet half completed; the property south of King street, from Simcoe to Spadina avenue, has largely been acquired by the company for future use. Plans are ready in Montreal for the new joint C. N. R.-C. P. R. North Toronto station, that, when completed, will cost over a million dollars. The grade separation of the north side tracks from Dufferin street to the Rosedale ravine, is now nearing completion. Property all along the route of this north side line has been purchased as an investment, and will be resold later for industrial purposes. The ercction of a six-track trestle by the C. P. R. and Canadian Northern over the Rosedale ravine will carry the lines to Leaside, where improvements costing several million dollars will be carried out. The Canadian Pacific controls the stock-carrying business into Toronto, something which has in the last few years reached enormous proportions, and has meant the building of new yards for the handling of the extra traffic in West Toronto.

The C. N. R., in addition to the erection of a 10 story office building, which it will putup for its head office in the near future, has recently bought

the railroads would be hard to estimate, but the land and property necessary to handle the business carried by the 300 trains that pass in and out of Toronto every day would pale into insignificance even the most optimistic estimate of the men who lived when Indians swarmed the platform of the first Union Station.

Some of the dates that marked Toronto's early leaps to railway greatness are: Oct. 15, 1851-Lady Elgin turned first sod

for the Northern Railway.

April 16, 1853—Toronto Locomotive Works completed the "Toronto," first locomotive built in

and sturdy boys carrying rifles of latest "protested" type and garbed in new uniforms from the lepartment of militia, will march up University avenue and mass in Queen's Park for peaceful celebration. Fifty-two companies, each averaging 50 men, will represent the oublic schools of the city, while fifteen companies will parade for the high schools and the various other cadet organizations recently formed. In all, close on 4000 soldiers in the making will do homage to the flag and the representative of the King. The cadet system has been responcible for more recruits into city regiments than any other organization; it has also given to many housands of growing youngsters the first insight into the necessity of national defence beside breeding

a spirit of patriotism and love for The history of the cadet movenent is an interesting one. From the day, in 1865, that the first military drill was given in Toronto public schools, the wonderful growth of the movement and the splendid support that it has been given during recent years is almost entirely due to the untiring efforts If the drillmaster and colonel of the cadet regiment, John T. Thomp-

Col. Thompson's First Taste of Drill

It was in 1865 that Colonel Thompson, then a pupil in the public schools, received his first taste of military drill, as given in the schools. He from the first pounded his ideas into the heads of obtuse members of the Board of Education, and altho for the first few years interest in the new venture seemed to languish it was still the pet hobby of the

young military enthusiast. In 1876 the cadet movement was allowed to drop. The work of organizing a permanent cadet corp had been started several years before by Major Denison, and military drill, with that end in view, had been inaugurated in the city schools. He met with many obstacles and much opposition, but his work was appreciated, and the public school board at the end of the first year passed the following mark of appreciation: "Resolved that the thanks of the board be presented to Brigade-Major Denison for the care and attention he has manifested in providing and superintending military drill instruction for the elder pupils attending the city public schools, during the current year.

Work for Years Carried on

(Signed) J. McMurrich, Chairman."

In Half-Hearted Way For nearly twenty years the work of the cadets was carried on in a half hearted manner, and received very little support except from one or two members of the board and the Chief Inspector. The first pubic exhibition ever given by the boys was in 1879, when the drill company from Wellesley School paraded after the distribution of prizes in the Gardens. This event was just two years after Colonel Thompson had been placed in charge of the entire work of re-establishing military training and physical exercise in the schools. Since then, over 37 years. the cadets have been under the

charge of Colonel Thompson. In 1881 the first competition held between different companies of cadets was for a banner, presented by James Beaty. M.P., which was won by Wellesley school. Every year since 1881, the cadets have paraded on Empire Day, and have decorated the monuments

For a long time the companies drilling had to content themselves with "bed slats" or wooden rifles only. About 15 years ago, however, Sir Frederick Borden recognized the organization of cadets in public schools as well as in high schools, provided the boys were fourteen years of age or older. Six companies of regular public school cadets were organized, one in each of the following schools: Dufferin. Wellesley. Jesse Ketchum, Ryerson, Givens and Parkdale. From that time forward the cadets made steady progress.

Trip to Tampa Gave Impetus to Movement

One of the milestones in the history of the Toronto cauets is the trip to Tampa. Florida, taken by a company of selected boys in 1899 as the guests of the state. The company was intended to take part in the military convention called by Governor Bloxham for the purpose of considering the reorganization of the state militia and establishment of military drill in the schools. Fiftysix boys, accompanied by Major CADETS BUILDING A BRIDGE DURING OUTDOOR MANOEUVRES.

Thompson, Col. Hughes, S. W. Burns, and J. M. Godfrey took the trip and were given a remarkable send-off by the citizens. The tour was a complete success. To this day Col. Thompson firmly believes that the Tampa trip was in a large measure responsible for the Government recognition of the organization. Among those who went to Tampa as cadets are: Alderman Meredith and H. H. Cousins of the Harbor Board.

Shortly after the recognition of six companies by the Government, the then Inspector Hughes, as the public school board had no authority to provide uniforms, determined to raise the necessary sum by private subscription. He secured over \$2.000. Later on Earl Grey, then Governor-General of Canada, gave him warm encouragement in the work and Lord Strathcona, unasked, sent him a cheque for \$7.000 to uniform all the prominent men became interested and numerous trophies were presented to keep up interest among shoot outdoors over a 100 yards

Cadets Now a Full Military Regiment

Of more importance, however, following the festival held in the Arena recently, is the work that the cadets' corps will do in the future. The exhibition of bridge building given by the cadets and the work of the signal corps has opened up a field that is the inten-

largely during the next few years. Now that the Toronto public school cadets have the honor of calling themselves a military regiment, with a full list of regimental commanders and battallion officers. it is expected that this work will be greatly improved. A signal corps, possibly with wireless equipment and a fully equipped ambulance corps to interest and instruct the young hopefuls, are to be added to the regiment during the coming year, while the new "Baby" Ross 22 calibre rifles, voted by the militia department, will be ready for distribution before the schools open in the autumn. This rifle is an exact reproduction of the standard military rifle in use by the adult regiments but is light and who were often exhausted after drill companies in the city. Many carrying the heavy guns thru a long parade. The "Baby" Ross is unrivalled for indoor shooting and will

> range. This Is a Busy Month

> > This month will probably be the busiest in the history of the cadets for not only will the entire force but the following week will undergo the regular annual inspection and in addition will join, for the first time, the garrison parade and

tion of the organizers to develop will this year be held, at the Arena, The cadet camp at Niagara, to be held from June 29 to July 4, will in all probability, be the largest in the history of the cadet movement and the work planned for the week than any that has heretofore been

attempted for any but adult ma-It is only the recent growth in the popularity of the cadet movement that has made the founding of a cadet military camp possible, altho the Hon. Sam Hughes has fostered the idea ever since it was first camp at Niagara, it is expected, will become one of the big institutions of the country, of immense benefit in developing not only young manhood but national defence. While the training indulged in is not in any way exhaustive it covers a large realm of elementary knowledge invaluable, should the student in later years be called upon to defend his country or to make use of military

training in other lines. Dress a Boy As a Man And He Will Act As a Man

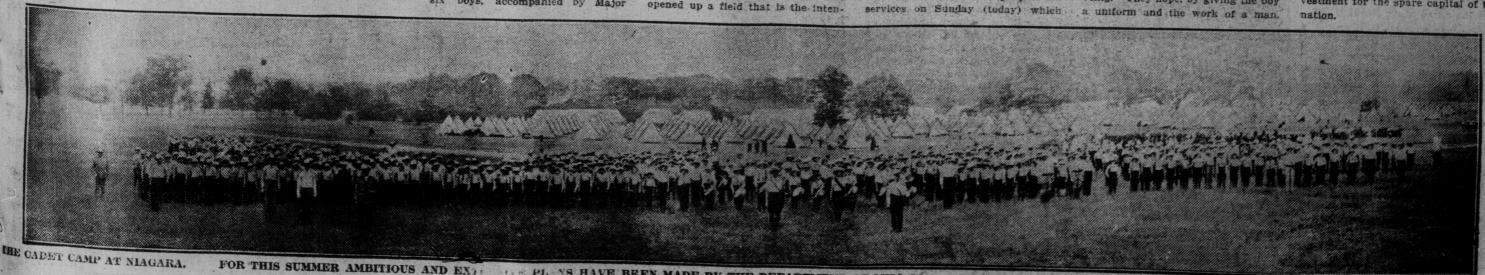

"Dress a boy up as a man and he will try and act the part" is a common maxim and it is on this hypothesis that the authorities have spent hours of labor and thousands of dollars in bringing the cadet camp into being. They hope, by giving the boy

of the camp, this often mooted obection to "camps in general" will pear ho weight. It is hardly posweek at a military camp will ever lose the strain of military spirit grafted into him. He at least will have a foundation of military knowledge that will enable him in later years to form just opinions on any military topic he may be called upon to discuss and contravene.

Militia Department Supplies Everything

Military equipage, tents, food and uniforms, in fact, everything but the boys themselves are supplied by the militia department. Good food and the necessary personnel for the instruction and organization of the cadets and for their care and protection from sickness will be given practice and instruction in the care and use of arms and ammunition will be part of the instruction. But it is the skirmish and formation drill with the desultory firing from a chance position that pleases the young soldier. The formation of the ambulance corps will give opportunity for an extended course in field ambulance work and first-aid to the in-

At present the work will be entirely for infantry and whether the government will inaugurate a cavalry cadet camp to work in conjunction remains to be seen. This of course, would have to be devoted to the older boys and students. The camp last year gave good promise for the success of this year's venture and has raised the question of the possible advisability of lengthening the time which the cadets shall remain across the lake. The summer military camp for boys may be looked upon by peace loving citizens as a possible menace but it is unquestionable, that the opportunities it offers for even greater results than those already obtained make it a good investment for the spare capital of the

The Two Classes of Canoes Defined

To be able to load a canoe, paddle or sail across open water, overcome the difficulties of a heart-breaking portage, run down or pole up a treacherous rocks, make a shelter of a canoe, and do all these in all kinds of weather, is the highest test of canoemanship. There are a great many different types of canoes built nowadays; but nearly all can be roughly divided into two classes. The flat bottoms, those built wide of beam with the "tumble-home" or inward curve at the thwart is one class. These models draw less water, but paddle harder than those of the curved bottoms. They are suited for travel with heavy loads on shallow waters, and are safer and better adapted to all-round use. The curved bottom class vary from the Indian birch bark to the exaggerated racing types. They paddle easier, but require more skill in handling, One with a slightly curved bottom, just off the flat is an ideal craft, as it has speed as well as being reasonably safe. There are two distinct styles of paddlers: The Indian with

his quick choppy stroke, which

shoves the canoe along steadily, and

ing stroke and drawn-out finish, ter with as little splash as possible their weak points. It is a white man's stroke with an Indian finish Don't "Break" the Water

Stroke Should Be

The stroke should be a rhythmical never hesitate at the finish of a has mastered the "critter" one day, motion, propelling the canoe along

The paddle should be of the proper length; that is to say it should reach the vicinity of the mouth when measured by the height of the user. Paddles vary a great deal in width of blade and quality of material. Extremely wide blades cannot be used to advantage, except as steering paddles. Some of the best are made from white ash, white cedar, butternut, and maple. Those made of maple are tough, but apt to be heavy and are liable to become bent, and also to lose their resiliency if not turned frequently while paddling.

How to Enter a Canoe And Stay There

When entering a canoe the foot should be placed in the centre, paralel to the sides. Kneel directly in front of the centre thwart, spreading the knees well apart, and resting on the thwart a little to the side

-so that you feel a part of the canoe itself. To a beginner the ribs of the canoe will feel a trifle hard; but only something very small should be used as a cushion. If the knees are continually slipping about it may mean a spill. The finish of the stroke is the most important part of it. The lower hand should grasp the paddle just above the shoulder of the blade. In making the stroke, swing the blade around and sink it in the wa-

twist-the edge of the blade nearest the cance turning backward and outward-the upper hand doing the twisting and pressing downward, while the lower hand pulls up. This offsets the effect of the straight pull, and swings the bow back to its

Get the paddle in the water as cleanly as possible without breaking the solidity of it. By so doing you

on the same side of the paddle as the fingers. It will save a bruised thumb-knuckle.

Practise Is the Big Thing

is difficult to describe the many finer strokes with any deof clearness, because of complexity of motion. It is largely a matter of practice and experience. If wishing to turn around, reverse the stroke, reaching well back when beginning it. At the finish of two such rushing strokes, the blade over to the other side and pull in the usual manner. will swing the canoe around neatly and quickly.

In approaching a landing is where an inexperienced paddler usually shows his class, either by stopping

too far off, or else by grashing into it. It is better to let the stern paddler bring the canoe in to the landing. Here is a method practical as well as artistic. Approach the landing straight on, keeping up a good speed until the bow is three CLOTHES WHICH ALLOW FREE-DOM SHOULD BE WORN, SAYS the stroke quickly and firmly. The bow will swing to right or left according to the side you are paddling on, and the speed will bring you alongside without humping. A friend who attempted this trick, while yet only on an upsetting acquaintance with a cance, misjudged the acceleration of his craft. failed to clap one the brakes quick enough, and succeeded in demolishing the filmsy dick-and great was the precipitation thereof.

portage than for two, unless it is a short lift. Two men can work to better advantage by changing about from time to time, one carrying the canoe and the other the packs. If carried right-side up on the shoulders it is continually slipping off, sometimes taking the skin with it. which is unpleasant to say the least.

There is an air-cushion made for carrying a canoe. I have used one of these for many seasons, and

THE CLEAN-CUT FINISH

shoulders, turning the terrors of portaging into pleasant work. Have a Care With Canoe

The life of a canoe depends on the care it gets. Often in the spring when a cance is brought out for the first time, it will be as cranky as an "unbusted" broncho. This is due to careless storing, and consequent warping. Canoes should be stored in a dry place, and in such a position that the weight is equally distributed. There are a number of things

which may be taken along on a canoe trip for filling leaks or patching holes. For filling seams, wax, soap, tallow, paint and pitch are good, and for patching purposes, canvas, stout water-proofed cotton or . tin may be used. Of these pitch is by far the best, as it will stop a leak, or can be used to stick a patch over a hole. It is easily gathered from any of the pine trees. and should be burned or heated, and applied hot. If there is a crack in the canoe, which persists in leaking, which fits over the shoulders, hav- first fill it with wax from a candle; ing creases in which the paddles rest apply a patch of any kind of material-cheese cloth will do in a pinch—then apply the pitch boiling

Plenty of Training Essential in Racing By LOU SKUCE

(Winner of 7 Canadian Championships.)

pulled up on shore and overturned,

RACING canoe is a tricky craft. To those who have never paddled one the feat almost looks impossible, something like trying to hang on to a plank while going over the breakers. The canoeist who has had experience will tell you that, the main point about paddling or racing is the knack of being able to keep your balance properly. At first it is almost like learning to ride a bicycle. When it bolts from side to side you should hold your upright position and keep on with your strokes as if you were in a flat bottom punt. With a little practise you will gradually get proper control and be able to keep the canoe steadled down.

There are really no fixed rules as to the proper position ye should occupy in a racing craft. Your position in the canoe should depend entirely on the best way you can get the most speed with the least energy. The common practise is to kneel on one knee while some canoeists are known to prefer both knees. With regard to the use of the paddle the long pull with the quick recovery has been the favorite with most racing men. Of course, the light man can use a very fast arm stroke to good advantage.

By all odds the most essential thing in canoe racing is plenty of training. A canoeist must be in the pink of condition to do himself justice. He must have lots of heart, for it is no lady-like

We know SOME sinners, just a few;
But so, we fear, good friend, do you?
Ah yes, we smoke, but rarely curse—
We say, "———!" but nothing worse.
We brush our teeth and wash our face,
We walk with staid and stately grace.
We DON'T wear SPATS, as you can see—
Like our small, fat friend, H. F. G.
Nor have we ever tried to look
Like Bridle or like Britton Cooke!
We may have said, we'll say again,
"Eccentric habits cause us pain."
We thank whatever gods there be—
We don't quote French—like P. O. D.
"The Colonel" snorts and slaps his boot,
WE blow our horn with modest toot.
We steer a course that's safe and sane,
Our ways are neither dark nor vain.
WE'RE not a bumptious prideful cuss,
Thank God, THAT can't be said of US!

Keep Off Our Grass !!!!!

We had rather choose whom we would know than know whom we

Even He Can't Manage the Women Folks.

Our esteemed pard, The Man From Mimico, has been telling us that since the opening of the ball season his wife and some of her lady friends have organized THE IMPERIOUS ORDER OF THE DAUGHTERS OF THE UMPIRE. He says that as far as he can learn the order is to be non-political, non-religious and nonsensical.

It's Our Own Funeral.

While searching for "the makin's" in the ferry dock pen the other day, we wrote the following—title and all—on a cigaret paper:

We are dying, Egypt, dying,
We are dying for a drink!
We are dying; Egypt, dyeing,
We are dyeing our grey hairs PINK!

Don'ts.

Don't eat with your knife—if it's a sharp one.

Don't talk about money—if your board is overdue.

Don't be argumentative—in police court.

Don't knock—break the door open.

It All Depends On the Thermometer.

Maybe by the time you read this it will be warmer than variegated blazes, but we are going to spring it anyway. Tuesday, we asked an asgriculturally-minded person what he thought was the best thing to do for a garden. He replied, "Get into the house and light the furnace!"

This Week's Litany.

This Week's Litany.

FROM baggy trousers and from bag-pipes, from roller skating, from roller towels and from wash day, from home-grown vegetables and from diamond tie-pins, from pigeon potple and from the sound of lawn-mowers, from merry-go-rounds, from moonlight excursions and from Niagara Falls, Ont., from custom tailors and from Custom Houses, from colored hatbands, from spats (moral and physical), and from the smell of gasoline, from Three Castles and from Castles in Spain, from Art exhibitions and from exhibitions of bad temper, from tire trouble, from heart trouble and from other people' troubles, from money-lenders, but much more from money-borrowers, from golf and from guff, from International conventions and from stupid and restraining conventions, from green hats, from green jockies and from spinach, from slow ferry boats, from twelve-foot dinghies, and from amateur sailors, from slow coaches and from sloe gin, from militancy and from Middletoncy, from three-legged stools, from three-legged races, from Mexican hospitality, from housecleaning, from dirt and from disarrangement of our plans, from abortive political scandals, from canned soup, from the Canada Temperance Act and from Oakville on a Sunday—Good Lord Deliver Us.

Utterly Depraved.

There is a terrible word in Bernard Shaw's latest play which should never be used except in connection with noses.

At the recent convention of the I.O.D.E., the chairwoman (We 'Ope to the 'oly 'evings that the compositor keeps in the i) had to request the launghters who spoke to speak a little louder—

Oh where are now those thund'rous tones
That keep your husband meek?
An Empire waits to hear your words—
Speak, pretty creature, speak!

Why Nots-Not Y. Nott's.

Why not try our hair restorer?—We need the money.
Why not buy on the instalment plan—Our profits are only 100 per

Why not take youur broker's advice?—You'll lose your money, but Ich

Why not marry the girl-You'll have to pay the gas bill you are now Why not become a humorist?—The answer is Y. Nott!

Our Own Personal Yowl.

Time was when, facin' hog, dog or divil, we got out this column just is we dod gastit pleased; but now, what with what the editor cuts out for ear of hurtin' somebody's feelins, with what Bobby, The Man From Mimico and Our Friend the Apothecary stick in and with our best jokes gummed by Certain Party-WE are lucky to get a word in edgeways and in small

MISS BLOOD'S OFFER CREATES GREAT STIR

Prize of \$1000, As Announced Thru The Sunday World, Causes Widespread Interest Among Canadian Playwrights-Now Appears That Judges Will Have More Than Enough Work to Dos

The announcement thru The Sunday World last week of the thousand-dollar-play contest inaugurated by Miss Adele Blood, the popular actress of "Everywoman" fame, who is opening the summer stock company at Shea's Theatre in "The Marionettes," on Monday, May 25, has created a big stir among Canadian writers. Already several plays have been received at Shea's Theatre, and it is beginning to look as if the judges will have their work cut out to go thru the manuscripts submitted and pick the winner.

For years members of the theatrical profession have deplored the lack of Canadian-written plays. All actors and actresses who have visited the Dominion, looked upon it, and Toronto in particular, as an ideal place to play in. Canada has produced her famous players, but has still to produce many famous playwrights. Little inducement has been offered in the past, but Miss Blood, in making her offer of a prize of \$1000, feels certain that to her will belong the credit of discovering a real star.

The conditions of the contest are very simple and easily remembered. No vice or white-slave plays will be considered, nor any that attack any religion. In addition to giving a prize of \$1000, Miss Blood will make the prize play, if it proves to be a success, her starring vehicle for next season. Manuscripts must be received at Shea's Theatre, addressed to The Adele Blood Play Contest, by June 15, and the winning play will be produced on June 29.

"Half-and-Half" Is the Very Latest Dance To Take the Place of Maxixe and Tango

Broadway Tango.

O YOU half and half?

If you don't, you will. Mr. and Mrs. Vernon Casties, who are making a whirlwind tour of the principal cities of the country, showing people how to dance properly—and also showing how beautifully they dance themselves—and who will appear in this city for one afternoon and night only, on Tuesday, May 19. at Massey Hall, have put a new verb in the bright lexicon of dancing. They half and half.

Terpsichorean fashions change ra-

Terpsichorean fashions change ra-pidly, and society always wants sored so recently by Mrs. Stuyves-ant Fish, is still in the repertoire of the Castles, but they have found that new dances are constantly need-ed. So they invent them. The half and half is the latest thing.

Please don't ask the same question all at once—Is is proper? Yes, it is. Furthermore, it is pure. It is moral. It will never bring a blush to the cheek of innocence. Even the mother and grandmother of innocence will never be shocked by it.

And the average pair of drawing-room dancers can dance it, and enjoy it, as they can any of the dances described in their new book, "Modern Dances."

Where It Belongs.

The half and half, as its name im-

young fellow dead.

plies, belongs about half way between the stand-off-and-don't-touchme frigidity of the innovation and the caloric clinch of the Broadway tango. But the name has still another significance. In the quarrel over the new dances, reformers have urged that they be banished by means of a revival of the waitz and the twostep. The lovers of dancing have retorted: "We have danced those old things until we are tired and sick of them, and nothing will induce us to take them up again."

two-step, really partakes of the nature of both. It retains the good qualities of the old dances, with the additional charm of novelty. This is how Vernon Castle, himself, ex-

plains it:

"The half and helf is really a fivestep. The most peculiar thing about
it is the time. In dancing it, the
count is one-two-three, one-two. A
long step, like a waltz step, is followed by two short steps, such as
are used in dancing the two-step,

"The dance is really not at all
difficult, once the dancers get the
music into their heads. It is different from any music used before
in a dance hall."

Just Obey the Music-Mr. Castle has always insisted that, good dancers must "feel the music."

Drink and the Navy.

Apropos of the American Secretary
of the Navy's establishment of a teetotal navy. Dr. Hiram Corson Wilson,

the noted economist, said in an ad-

ty of movement. He has said that almost any two tangoers will dance differently from any other two, and he does not frown upon independence so long as the music is obeyed. "Those who first attempt the half and half," said Mr. Castle, when discussing this dance, "will probably try to make a waltz of it. But they will find this impossible on account of the peculiar time. I do not believe they will have much trouble picking it up, however, for I worked it out with the idea of making it a drawing-room dance. The innovation dance wasn't one, of course, for two persons must be something more than ordinary social dancers think the new order will do good. They don't get any too much pay, you know, "They tell a story about a young fel-low who wanted to enlist. He made inquiries at the naval recruiting office.

particularly in dancing the tango. His version of the tango is noted at once for its delicacy and for variety of movement. He has said that

left, a short step with the right, and hen another long step with the left. Instead of circling the ball-room, Mr. and Mrs. Castle danced back and forth across it, width-wise, in a very graceful and delicate version of what college men know as "the serpentine." On the turn after each long step, Mrs. Castle's slender foot swept backward in a small semi-circular kick, which of itself stamped the dance as belonging to the year 1914, despite the mingling of the steps of yester-year.

The half and half is one of the featured dances which the Castles will include in their special program of fancy and ball-room dances, on their present spring tour of the principal cities, and the book which The Toronto World is about to distribute on the popular coupon plan. Maude Turner Gordon has just closed at the Gayety Theatre in Mr. Savage's new play, "Along Came Ruth." Miss Gordon is one of the best known character women in Broadway and will be a great favortic in Toronto. te in Toronto.

"Visions of Art" Big Feature of the Strand

of Art." with marvelous illusion effect, in consonance with which the Strand Theatre, becoming the Strand Theatre, becoming the Strand Theatre "shady nook," will be transformed into a veritable bower of beauty. Flowers will be everywhere, an electric fountain will be playing the entire beauty. tain will be playing, the entire house will be done in French cretonne, the carpets of an exquisitely delicate shade will be entirely new, the radiators will have disappeared, and the atmosphere of cool, delightful summer will pervade the house. Directly one enters the lobby, festioned with plants and flowers one will get a second sec enters the lobby, restooned with plants and flowers, one will get a sense of summer with its beauty. Entirely new furnishings thruout, smart new uniforms of the ushers, an exquisite velours curtain in lieu of the usual painted one, lamps in wicker baskets with wicker and in wicker baskets with wicker and cretonne shades, a new retiring room for ladies with every toilet requisite that thought can provide—such as a few of the features which will harm-onize well with a scepe of delightful color. The seven-piece orchestra will be on the stage enshrined in a bower of flowers.

A splendid program will be presented. There will be a one-act play, as well as a Keystone comedy, and two songs by Miss Catalano, a soprano vocalist from the Buffalo Conservatory of Music, who is the possessor of a voice of singular color and sweetness. But the piece de resistance will be the photo-play, "Dope," an uplift drama, which constitutes a powerful and compelling protest against the "dope" habit—the use of drugs in the nature of opiates, such as cocaine, morphia, of opiates, such as cocaine, morphia, and the like. The story told by the

and the like. The story told by the play is one which might well wring tears from a stone. It graphically describes the downfall of a son and daughter of good family who begin the drug habit in all innocence, and who become enslaved by it. There is not a single objectionable feature in the play, while its moral is potent to all—the moral that the weak must be protected by the strong—and it places the responsibility for one of the greatest scourges of modern life in no uncertain way. It is claimed that this play has saved thousands of persons from the drug habit, and it has received the emphatic endorsation of Dr. Charles Parkhurst and of Mrs. W. K.Vanderbilt, Sr, who is heading such a great work in New York for the saving of children from the drug habit.

Comedies now on the boards.

First, there is the inimitable Dave Marion himself. Mr. Marion is so well known to the devotees of burlesque in particular, and to theatregoers in general as to need little comment. Besides Mr. Marion has this season arranged an unusually elaborate belief of Roses," in which no less than sixty extraordinarily pretty girls are said to dance in a manner never seen before under the leadership of the charming Emila Bartholetti, the gremier Parisian danseuse. Then there is that captivating prima-donna Agnes Bechler. not forgetting Phil White, Inez de Vedier. Wm. Lawrence, Mark Thompson, Max Gordon, James Matthews. Frank Clayton, Edward Bentley, Henry Plunkett, also seventy-five girls in the chorus.

Manager Schlesenger, of the Strand
Theatre, is noted for his fertility of
invention. And one of the best and
cleverest of his inventions will be presented at the Strand next Monday, and
during the entire week of May 18. It
is a scenic production, entitled "Visions
of Art." with marvelous illusion effect,

She is noted for her fastidiousness in dress, and wears about ten different gowns in the course of the play, and these are shown with remarkable completeness of detail.

Special summer prices are to prevail—matiness 5c and 10c, and evenings 5c, 10c and 15c.

'The Lady in the Case". Princess

of the most celebrated American play-wrights, Paul Kester, who is already well known for his immense hits of "Sweet Nell of Old Drury," in which Ada Rehan starred, and "When Knighthood Was in Flower," the rip-plingly merry dramatization of Charles Major's romance, made by him for Julia Marlowe

In "The Lady in the Case." Mr Kester is declared to have written a human comedy of deep heart interest, and clever characterization. It proved to be the crowning success of Miss Russell's triumphant ten weeks' season, just ended in Philadelphia. Miss Russell is to have her own playhouse in the Quaker city next fall, and meanwhile is making a brief supple. meanwhile is making a brief supplemental tour with her Comedy Company in this pronounced success of her l'hiladelphia engagement. The story of the play deals with the modern divorce problem, and views it from a new and fantastic angle. A remnant of an old Southern family of Virginia tradition—a young women Virginia tradition—a young woman, her aunt and a male cousin—come to New York to mend their depleted family fortune The young woman New York to mend their depleted family fortune. The young woman tries as a chorus girl, while the cousin aims to be a lawyer. Both are in sore straits, when suddenly an unexpected deliverance comes to hand, in the shape of a millionaire and his famous divorce case. By a set of curious circumstances Emily Dinviddle is persuaded to act as a "Professional co-respondent" in order to fessional co-respondent" in order to help her cousin in this suit. She assumes a false name, and complications at once begin to entangle her in the most surprising situations. Neither she nor the young millionaire knows each other's identity, and this adds to mirth and mischief. The scenes are aid to overbubble with the heartiest ighter, and yet as Emily, Miss Rusell has opportunity for many touches f gente emotionalism and sentiment.

to be one of his greatest successes and was also the means of firmly es-tablishing Miss Robson as one of the leading actresses in America. The play and star not only became famous in New York in a night, but it was subsequently halled with delight in London. Mr. Zangwill took for his heroine a "slavey" in a cheap lodging house in London, the temporary home of a number of actors, musicians, writers, etc., upon whom Dame Fortune has refused to smile. All inhabitants of the mythical land of Bohemia. The hero was a young comhabitants of the mythical land of Bohemia. The hero was a young composer. He noticed with compassion the loneliness and friendlessness of this young servant so unaccustomed to the ways of a great city. He showed her many little attentions, and gradually fell in love with her, regardess of the difference in their education and birth. In time fortunes take an unexpected turn, and for a time they drift apart, but meet again in entirely different surroundings, where their love story is brought to a happy end.

surroundings, where their love story is brought to a happy end.

"Merely Mary Ann," will be presented by The Bonstelle Players, at the Alexandra Theatre, next week. The play gives splendid opportunities for good work by all the members of the company. Miss Proctor will enact the role of Mary Ann, and Mr. Robins will portray the young composer. A beautiful scenic production of the play is promised. Matinees will be given on Wednesday, Friday and Saturday.

"The Rose of Kildare" Grand

Fiske O'Hara in a sumptuous revival of the beautiful romantic play "The Rose of Kildare," written for him by Rose of Kildare," written for him by Charles Bradley and Edward Paulton, will be the offering of Augustus Pitou, Jr., at the Grand Opera House tomorrow night and all of the week. The story revovles around 2 young Irish leader in the insurrection of 1798. Gerald O'Donnell, who has made a voyage to France to enlist the aid of the government of Napoleon in the voyage to France to enlist the aid of the government of Napoleon in the cause of the insurgents. Incidentally, he visits the father of his flancee. Lady Moya Fitzpatrick, The Rose of Kildare, to obtain for her information pertaining to the whereabouts of a charter granted by Charles II, to one of her ancestors, and which would prevent her estates from being confiscated by the Crown. The French warship is wrecked by a storm on the coast of wrecked by a storm on the coast of Wicklow, and almost all on board are lost. Gerald manages to swim ashore and takes refuge in a cave. The miliand takes refuge in a cave. The military authorities, led by a loyalist. Brian Burke, seek for him among the unfortunates washed up by the sea, and identify the body of a French officer as his. In the meantime, his friends bring him to the Inn of Dan Reardon, from which he escapes to Ballymara Castle, the home of his sweetheart, in the County Kildare. Burke discovers the escape and pursues him relentlessly. At Ballymara Castle he has of gente emotions and action of the first two acts are laid in New York City, one of them in the law office of Watt, Dinwiddle, and the others in lessly. At Ballymara Castle he has him surrounded but Gerald escapes by a clever ruse, and flies to the Wicklow Mountains, where Dan Reardon has a secret cave in which he has been engaged in making pikes and swords for the rebels A sny gives Burke informed. mily's flat. The third act transports the audience to the picturesque old Virginia mansion—Dinwiddie Hall.

lancy, Albert West, James E. Miller, Byron Russell and Lina Bloodgood. The scenic enhancement of the piece is unusually beautiful and the costumes, which are historically true to that period, are very rich and picturesque. Vaudeville Shea's

Toronto will have its first opportunity next week to see the Harry Lauder singing-talking pictures, wilhich will be one of the features of a very fine bill at Shea's Theatre, including the best acts in vaudeville. These pictures are the invention of Dr. Kitsee, a famous German scientist, and are a new departure in talking pictures. During the week Mr. Lauder will be seen on the screen, singing and dancing four numbers from his extensive reportoire.

repartoire.

The special extra attraction for the week will be the first vaudeville appearance of Vaughan Comfort and John King, late of George (Honey Boy) Evans' Minstrels. As members of that organization they are not unknown in Toronto. They are presenting a one-act legal satire by Junie McCree called "The Coontown Divorcans." Mr. McCree has, as usual, hit on more laughter producing lines to fit into 20 minutes than is often produced in a two-hour comedy.

Another strong feature of the bill

Another strong feature of the bill which will be hailed with delight by theatregoers, is the appearance, after long absence, of Maud Lambert, the musical comedy favorite, and Ernest Ball, the popular composer. Both have enviable vaudeville reputations and have established a following both as individuals and as a team. Miss Lambert has a charming personality and irdividuals and as a team. Miss Lambert has a charming personality and delightful voice and is ably assisted by Mr. Ball at the piano. Mr. Ball's songs have been of the "whistling" character. He wrote "Love Me and the World is Mine" and "Till the Sands of the Desert Grow Cold," while many of the recent popular rags are from his

Bert Fitzgibbons, the original Daffy Dill, who is also a feature, has been described as eccentric, irregular, anomalous, singular, odd, erratic, uncommon, whimsical and abberant. In other words, he is an "amusin' cuss." There is genuine hilarity in everything he says and does. It is droll, comic, farcical and burlesque, but it never fails to hit the bull's eye, of comedy. Hal and Francis are among the new-comers to vaudeville. They have a scng skit called "The Stock Farm," and introduce as laughable a bit of patter scng skit called "The Stock Farm," and introduce as laughable a bit of patter as has been heard for some time. They both sing several new songs well and dance with ease and grace. Miss Norton and Paul Nicholson have an excellent offering in a Dramatic Cartoon. The Three La Peers are not excelled as comedy bar artists, while Kuting's Animals have the reputation of being the best trained on the vaudeville stage.

Vaudeville Winter Garden

An unusual show will be offered at Marcus Loew's Winter Garden the coming week, with three strong headliners. The feature act will be ofthe audience to the picturesque old Virginia mansion—Dinwiddie Hall. Miss Russell is supported by her own Comedy Company, among its leading players being such footlight favorites as: Oswald Yorke, who enacts the millionaire; William Raymond, that popular juvenile, who is the young lawyer Watt; and Kate Jepson, who has a most original characterization as "Aunt Maria." Thoma Draper, Alan Crosland are also in the cast.

"Merely Mary Ann"

Alexandra

When Liebler & Company of New York, decided to make a "star" of Eleanor Robson, their first important work was to find a play for her. None being in evidence, that they thought would enswer the purpose Israel Zangwill, the noted dramatist was appealed to. The result was the writing of "Merely Mary Ann." which turned out "Mary Ann." which turned out "Ann." which turned out "Ann." which turned out "Ann." which turned out "Mountains, where Dan Reardon has a gueret so the Wicklow Mountains, where Dan Reardon has a sepended in making pikes and swords for the rebels. MUSICAL COMEDY IS WITH US STILL

Despite Many Disastrous Failures, the Combinations of Girls, Jingles and Jokes Are Being Turned Out—"High Jinks" Has Made Good in New York-Stage News From Broadway.

By W. Bob. Holland.
W YORK. May 16.—Some years ago we heard that the end of the popularity of musical cometic been reached, and it is certain discovered by the popularity of musical cometic been reached, and it is certain discovered by the popularity of musical cometic been reached. These two successes proved to be disastrous for similar plays that improved the company of the popularity of the company of the mediately followed, not only at the Majestic but at other theatres. Do you remember "The Man From China?" It remained at the Majestic for several weeks, and if it had not been forced to a comparison with "The Wizard" and "Babes." it would, doubtless, have made a great hit. Paul West wrote the book and the lyrics, and he put the book and the lyrics, and the book and the lyrics are lyrically the book and the lyrically the book and

in read money to last but two or three All these failures have depleted the accounts of producers, but with ched fingers they have continued

says that he made a fortune out of timber in Dakota. If he did he is a wonder because there is no timber there. Of course, when his name is mentioned he is always asked if he is any relation to the former champion. He replies that he is not, that he is not the pugilist either, and that he spells his name "ey." Mr. Jeffreys grows peevish and threatens to appeal to the legislature to chance his name. Legislatures move slowly in such matters, and the suggestion is offered that the appeal be made to the author. This cheap method usually gets a laugh after it is repeated a few times, and leads one to wonder why Otto Hauerbach, the librettist, did not follow the idea further and play on names

Hauerbach, the librettist, did not follow the idea further and play on names until the directory was exhausted.

Englishwoman for "Money Makers."

Miss Alexandra Carlysle, one of the most beautiful women of the English stage, has been engaged by Selwyn & Co. to play the leading role in Charles Klein's play, "The Money Makers."

There are only two women characters in the play, but a dozen or more men will be in the cast.

Steele Maynew is a Hit.

A dozen years ago "The Wizard of Oz" opened the new Majestic Theatre and set a new highwater mark by remaining for nine months, and the piece was playing to absolute capacity when it was started on the road to make another fortune and let "Babes in Toyland" enter the Majestic. This Hazel Dawn in New Comedy. Hazel Dawn, who won renown in the title role of "The Pink Lady," and more recently appeared in "The Little Cafe," has signed a contract with John C. Fisher, and will be presented in a new musical comedy your below. in a new musical comedy, now being written especially for her by Harry B. Smith and Robert B. Smith. Victor

'Some Town' Says Bert Leslie In a Slang-Bang Interview

The Sunday World approached Mr. Bert Leslie, the headliner at the Winter Garden Show last week, for a special interview, and list to what he said:

"Say, just take those pins out of your listeners and hug close or you won't get this. Some town, eh, Toronto. Every time I get here I feel as happy as a hack driver's conscience after relieving a tipsy passenger. If you don't believe me, back to your egg, you're not hatched yet. Sure, put a quarter in your meter, your gas is low, and say, I guess the booze parlors here don't handle the blue ribbon stuff, eh? Anybody that don't steal to the suds in this burg might take them out and pin a fool medal on them.

"Why, I only know two guys here that don't bend the elbow, and lift cunning glasses to cute lips. And say, they are so small they could chase each other round on a penny for ten years and never meet. And they don't deal from the bottom here with their booze-you know what I mean-don't refill. Do you get me? Why if they did anything like that in a town like this it would be as funny as a cry for help, and they would make them stay after school and write five hundred words. I guess I'll cancel that rave.

"I was reading yesterday where a fellow was drowned in a beer vat. Gee, some folks pass away happy. You see, boys that don't care for the throat polish must add up their talk. They got three figures in the wrong column and no fountain pen is going to meet them. They want to throw

BERT LESLIE AS HOGAN, THE PAINTER.

away their ledger and buy a day book, take two trips on the merry-go-round, get the brass ring and ride on. They just want to put crape on their nose, the brain is dead. I'll bet in the town they came from they take the sidewalks in every night at nine o'clock. Hold fast, you're going around a

"And say, I must hand it to those other nifty ball tossers. I was out to see them annoy the pellet. They made the other team sneak right under the carpet with the rest of the dust, and if you don't think they play fast ball, then step high, you're near a puddle; sand the track, your slipping; steal softtly to the pillows, pull comforters over you, and wait for Big Ben to annoy you. Have you basted on to my gab?

"And I guess the President of the Toronto bunch isn't perfect candy eh? Some Pres.—Jim McCaffery—great gink, he is always throwing the last line out for speedy ball players. He is there by a thousand miles and the block system working fine. He has handed the peanut to this town a few times. and that is working fast, eh? If you don't get that, why off with your ear muffs, and put grease in your pan, your fish is burning. I'm for Mac, and anybody that isn't must be named after that town in Massachusetts-Marblehead. I often go in to see him play with his hat when he is talking, and it is a picture to see him dash his thumbs in his suspenders. Anybody that wouldn't take to Mac is as bad as a postoffice pen,

and if I knew the fellow I would take his plate away.

"And I suppose Joe Kelley is bad, eh? He makes some of those other managers look like they could wear a peanut shell for a Panama hat. He can certainly make those youngsters show speed. He makes them take the car ahead, ding, ding, to get on, ding to get off, thru the tunnel, daylight, hurrah!

"When they give him an argument he just shouts, 'Snow again, I don't get the drift; back to the scuttle with the rest of the coal.' Tells them they talk like a green peanut and need roasting, and if they don't rub the chatter off the slate it is under the sink with the rest of the pipes. I am strong for Kelley, and when a fellow gives you the kind of baseball he does why it puts a knock in the rose class. Yes,

"Why you have the nicest set of bartenders I was ever rushed in to meet, and they never make a holler if you press the two-finger limit. Why, if you know how, you can get a cunning edge on in two places, saving the following day for a new route. I like bartenders. I suppose it is because we are so often together. I ask them for their pictures so I can remember the kind-hearted ones. It always makes a good route when I get back. I have had a dandy week at the Winter Garden and if you don't think so, why back to Mexico and dodge a bullet. A real fellow that don't cut loose in this town wants to oil up his thinking clogs and sneak back to the oven, he is not done yet. I love Toronto like a baby loves to get rattled, rattling his rattle. Well, so long, I am off to the drama cottage."

(Translated by E. Y. Watson.)

Draw near and give your attention or you will not understand. Toronto is a city of splendid opportunities. Every time I come back to it my feelings can only be compared to those of a dishonest cabman gloating over \$3.75 extra from an intoxicated passenger. If your mind fails to grasp the significance of my simile, it is in an unfledged and woolly condition. Your brain may be likened to pressure is not strong. But, to resume as I was about to remark, the brand of liquor commonly served in the caravansaries of this fair city is excellent. In my opinion, any resident of Toronto who neglects such opportunities is extremely unwise and subject to contempt as well as ridicule.

And the Toronto baseball team — they are undoubtedly a very competent organization. To any who will have the temerity to question my assertion, I can only suggest the solace of profound sleep as a remedy. James J. McCaffery, the president, is a personal acquaintance of mine, and I enjoy with much relish his tales of pennant triumphs. To hear him chronicle the victories of his men, and to note the chest expansion accentuated by the thumbs which he inserts in the apertures of his vest, is a delectable treat.

And, as for Mr. Joe Kelley, manager of this splendid coterie of sportsmen, he is extremely intelligent and aggressive, particularly in argument with those individuals known as umpires.

Invariably, I have found the gentlemen of the white jacket and towel, who preside over the counters where liquor is served, polite, courteous and attentive. Of many of them I will bear away with me the fondest recollection. My week at the Winter Garden has been one of unalloyed joy. Toronto occupies a place in my affections from which it can never be dislodged by any process of alienation.

The Hambourg Conservatory closing recital will take place at Massey Hall on June 3. The event is being eagerly looked forward to by the large following of that institution. Stanley Adams, the tenor, is giving an evening of Song and Story at the Canadian Academy of Music, on May 20th, in aid of the Heather Club graduate nurses fund. He will be assisted by Leila Auger, Winifred Lanceley and Earl Newton. Mr. Adams should be greeted by a large audience as his entertainments are worthy of liberal patronage.

by applying to the registrar.

David Ross, the well known vocal master at the Hambourg Conservatory, may be congratulated on the very excellent recital given by his pupils on May 7 at the Columbus Hall. Sixteen, in all, took part in the program, each one showing evidence of having received masterful training. Smoothness, perfect tune, excellent phrasing and sonority were the outstanding features.

Those contributing were Laura Homuth, Barbara Foster, Annie B. Niven, E. Pearl Brook. Bessie McKinnon, Anne Inch, E. Letitia Irving, M. McCoy, Christina F. Irvine, E. Cecil Roberts, Albert E. David. Kenneth Angus, Goldwin Stewart, Frank Alan Sim, J. Arnold Davidson and Dr. Russell Marshall. For many years Mr. Ross has been looked upon as one of our very best vocal teachers, and that his work continues up to the very highest standard was noticeable throut the evening in a marked degree.

Hope Morgan, whose studio is the rendezvous of those seeking the best obtainable in voice culture, announces a recital at Foresters' Hall on Saturday evening, May 16, when a number of young ladies, who are being prepared both for concert and opera will appear in one of the best programs that Miss Morgan has yet given.

A life-like portrait of Prof. Michael Hambourg is on view in the Bell plano warerooms. It is the work of Rosis and a poetic and warvend temperalectic more proposed to the program and a poetic and wayward temperalectic more proposed to the very highest standard was noticeable throut the evening in a marked degree.

MASTER PLANIST

The performances of the Boston Opera Company at the Champs-Elysees Theatre, Paris, are being so generously patronized by the citizens of the French capital that managers of rival houses are becoming alarmed as to the welfare of their own ventures. The reason given for the warm reception of the American company is that the artists are better and the stage management and scenic equipment is far in advance of the local standard. The chorus is also said to be much better than that usually heard in Paris.

As an extra special attraction for Monday and Tuesday, "Germinal," or the "Toll of Labor," one of the most sensational picture stories ever produced will be shown.

On Tuesday night the usual amateur competition will be held.

The vaudeville acts for the last part of the week will be Boyd & Viola, in a high-class singing act, Appollo & Reno, and Doc Marshall.

Part ten of "The Adventures of Kathlyn" will complete the program for these three days.

Dr. Karl Navratil, teacher of theory and a composer, died in Vienna last month. Dr. Navratil was well-known by a number of Torontonians.

In addition to the high-class vaude-ville acts.

On Friday evening the ninth series of "The Adventures of Kathlyn" will be shown.

Dr. Karl Navratil, teacher of theory and a composer, died in Vienna last month. Dr. Navratil was well-known by a number of Torontonians.

"MILITANT SUFFRAGETTE" STORY "DAY OF DAYS" AT YORK THEATRE **MAKES AN INTERESTING PLAY** The leading feature at the York

Motion Picture Drama of Love and War Shows the English Woman in Arms for Her Rights - Window Smashing and Forcible Feeding Introduced Into Novel Production.

This is an attractive picture in oratory of her older and homlier sisters and presently she joins the window-smashing brigade. She is arrested and put in prison. As she is strife and turmoil in the life of a milibooks particularly pathetic in her prison garb everybody sympathizes trays the fighter for women's votes and this in itself makes the picture worth while. Asta is nothing if not prison versatile, she possesses the "verve" and daring, which shine to special advantage on the screen, and she displays a more than ordinary lot of it in

Corsman," a magnificent dramatic production featuring some of the best known players in the motion picture business. This play met with considerable success when first produced in this city two weeks ago.

On Wednesday and Thursday "His Wife," a splendid two-reel play will be shown. This is a story of heart interest, and one that has always been greatly appreciated.

On Friday and Saturday "The Drama of Hayville," a screaming twois a laugh in every turn of the handle in this play, which introduces a comedy of local actors making an at-

looks particularly pathetic in her prison garb everybody sympathizes with her when she is subjected to forcible feeding. Of course, she becomes a martyr on her release from prison and addresses enthusiastic "Votes-for-Women" gatherings. The battle with the men in parliament rages hotly and all the batteries of the frenzied feminists concentrate their advantage on the screen, and she displays a more than ordinary lot of it in this production. She holds the centre of the stage fifty minutes out of the hands of the antis fall into the hands of the suffragettes and Nellie is sent on a blackmailing mission to the hostile leader. If he does not abandon his resistance to the promote the ideader. If he does not abandon his resistance to the promote of the suffragettes the letters will be published and his ruin brought about. As Nellie is ushered into the patients will be publ frenzied feminists concentrate their attack on the leader of the anti-suf-

the throne, becoming once more an American sentleman of private life, and triumphantly claiming his American sweetheart, whom he prefers to the foreign titles which are offered him.

As an extra attraction the manage ment has secured for Friday and Saturday "The Path of Genius," a magnificent two-reel production. This play has many things to recommend it, the foremost being its wonderful photography.

As an extra attraction the manage cross which he will hang about her little neck. The child has become fast friends with a little orphan, and, when all the other children are passing with their presents, the little waif photography.

BIG NICKEL THEATRE

week. Special features have been secured for every performance which, together with the usual high-class program for which this house is noted, help to make the entertainment one

of particular merit.
On Monday and Tuesday "Mystery of the White Car," a magnificent and stirring detective story, will be the leading feature. There are few more exciting story at present being shown than this and there is no doubt that it will greatly please the many patrons of this popular theatre.
On Friday and Saturday part six of "Lucille Love" will occupy the chief position on the program.

THE GOLDEN CROSS" AT HIS MAJESTY'S THEATRE

An exceptionally interesting feature has been secured for Monday and Tuesday at His Majesty's Theatre, Yonge street, when "The Golden Cross" will be produced.

Founded on an old Italian story, it is full of heavy interest.

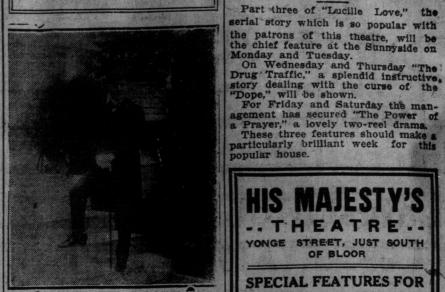

s full of heart interest. The story opens with Count Gaston as a deck hand. Before him passes the vision of his early infatuation for an actress which prompted him to leave his wife and family and follow PARKVIEW THEATRE her to America. She eventually leaved him for another and he returns to his native land and sinks to the lowest rungs of depravity, in which condition he is found by a friend and advised to make his peace with his wife. Naturally, his advances are repulsed. His daughter having grown up. is put in a boarding school, where Gaston goes to implore the Padre, to allow him just one look at his child. It is arranged folling the schemes and inaction of the crown. John Armitage diverts toward himself the murderous aims of the conspirators directed against Frederick, while meantime he secretes the rightful heir until the time when he can present his claims to the throne. During the course of the action, John Armitage risks love, fair name, liberty and life ditself. But his labors are not in vain, and in the end he sets Frederick upon the throne, becoming once more an American gentleman of private life.

American gentleman of private life, infinity in the course of the specific production. This production is a course of the action, John Armitage risks love, fair name, liberty and life ditself. But his labors are not in vain, and in the end he sets Frederick upon the throne, becoming once more an American gentleman of private life, and the course of the course of the action, John Armitage risks love, fair name, liberty and life ditself. But his labors are not in vain, and in the end he sets Frederick upon the throne, becoming once more an American gentleman of private life, and the course of the chief attraction and is claimed to be one of the best of the recent comedy releases.

"The Surgeon's Experiment," a two-reel dramatic production, has been secured for Wednesday and Thursday.

As an extra attraction the management has secured for Friday and Saturday "The Path of Genius," a magnificent two-reel production. This fast friends with a little orphan and when all the other children are passible to make his place. His daughter having grown up, is put in a boarding school, where Gaston goes to implore the Padre, to allow him just one look at his child. It is arranged that he should take his place in line on Easter Sunday, but he must not reveal his identity. Milking the Cow.

I was only a youngster at the time and ought to have known better but you know how a city kid is teased to death in the country.

Well, I was sent to the country to things. The end is bound to come, and asked me if I knew where the farmer

answered him. He then asked me if I knew how to go about the milking proposition. At this I was stuck but did not show my ignorance so, grabbing a stool and a pail, set off to the barnyard. There they found me half an hour later trying to extract lacteal fluid by setting the pail before the hind legs of the cow and squeezing its tail. The bunch unmercifully teased me to extreme embarrassment and I was glad to get back home where things like this did not happen.

home of a minister whose flock was of a wicked looking parrot.

I blew the first note and was startled could jump four feet. We did it once, by hearing a disgusted "Shut up!" from the parrot. It was with difficulty that I kept on playing, but when a second and more disgusted "Shut up!" came, I broke down completely and laughed, actually laughed, while not a smile showed on a single face in the

congregation. Greatly embarrassed I cook up the solo once more. The parrot started in again, and its mistress covered the cage with a cloth, whereupon the parrot yelled with a world of gratitude in its voice. "Thank goodness!" Thank goodness!"
The result of this was a loud blas

on the cornet caused by a spasmodic laugh into it. The startled congregation looked at me pityingly, and embarrassed and disgraced. I went to my seat.—B. A. F.

Took Her Cook Book. The most embarrassing moment of

my life was at a Christmas celebra tion. I was to have a reading, and in my hurry picked up a book, supposing it to be the right one. When I was on the stage I opened it and found it was a cook book which I had taken by mistake. I had to leave with the audience, looking bewildered.—H. S.

My next door neighbor has a little Boston terrier, of which I am very

Criticised the Gift.

Shortly after my marriage some neighbors called One of them started to take a certain chair, whereupon I exclaimed: "O, do not take that one, it is most uncomfortable." Then it dawned upon me that the person ad-dressed had given us the chair for a wedding present .-- R. L. P.

Her Husband Wasn't Excited. My husband was going to the near-est town with a load of hay. I wanted to go and take some eggs. He tried to dissuade me, but I persisted. On the way we came to a particularly muddy place in the road and one wheel jogged suddenly down into a deep hole. I slid down and rolled over in the mud. Just about covering myself with it, while my eggs scattered in the mud. Just about covering myself with it, while my eggs scattered
all around me.

With his exasperating calmness, my
husband turned and asked, "Did you
say you were going to town with me,
Maria?"—M. E.

I tried to pull him away but his
owner cried out, "Don't do that; he'll
bite you."

So, much to the enjoyment of the
crowd, I experienced the greatest feeling of embarrassment of my life.—
H. M. G.

The Most Exciting Moment of My Life Was When---

Have you ever had an exciting experience that you could relate? One that lives in your memory and could be put on paper in a few words?

It may have been the happiest or saddest moment of your life, but if it was really the most exciting, the most thrilling, hairraising moment, write about it and send your letter to the Excitement column of The Sunday World. If your letter is printed you will receive one dollar Write on one side of the paper. Enclose your full name and address, the not necessarily for publication.

the ballast train, returning when they had unloaded.

On this particular day I was reurning on a train of empty flats, and when I had found two suitable shingles the train had attained con-

siderable speed. It had been my intention to jump on the van, but noticing the speed of the train I started for a flat, thinking they might be going too fast if I waited for the van. I therefore threw my shingles on one car and jumped for the next. I landed alright, but both legs went clear thru the little iron foot step on the end of the car, and my ankles were resting on the fast turning wheels. To make matters worse, I was losing my grip, and thought I was surely done for. One of the train-men in the cupola of the van happened to spot me, and the precarious position I was in, and to that fact I own my life.

precarious position I was in, and to precarious position I was in, and to that fact I owe my life.

He applied the emergency air, and the train stopped very quickly, and I fell to the road-bed too shaky to stand and trembling like a leaf.

From that day till I left my position in the fall, I never jumped a fast moving train.

moving train.

That was without doubt the most exciting moment of my life. M. B.

In The Mud.

I was about twelve years old, my Some years ago I gave a cornet solo chum was the same. We were rambat a religious meeting held at the ling by the side of a stream where we could do all kinds of jumping and of the long faced, never smilling var- fooling, so dear to the hearts of boys. lety. As I took my position to play, At one part the water ran along a I noticed that I stood beside the cage ditch about four feet across the top,

Boston terrier, of which I am very fond. When Mr. and Mrs. L. go out they leave the dog with me.

The other evening they went out to dinner and as I had an engagement I said I would send Prince home early. After dinner my father went right up to his den, and, not knowing I had a gentleman caller, yelled down at 10 p.m.: "Marion, send that pup home and come up to bed."—M.L.D.

Criticised the Gift.

but on the return trip I missed my footing and fell backwards, head first. The most exciting moment was when I felt the water running round my neck and could see the blue sky between my feet which had remained at the top, while my head went down. I had to remain in this reversed position until my comparison pulled me out, covered with the soft mod which had luckly broken my fail.

trick. I ordered that at the station above to meet me here."—J. B. S.

Monkey "Shined Up" to Her. I was standing in a large crowd watching a little monkey perform tricks. The hand-organ man called out in a loud voice, "Show the lady how much you love her."

I happened to be the lady of his choice. The little beast sprang to my shoulder, put his arms around my neck, and hugged me as hard as he could.

Appropriated Her Tea.

The most embarrassing moment of my life was when touring in Ireland I stepped from our train on to the platform at Athlone and saw a boy running along the platform with a cup of tea and bread and butter. "How much is it?" says I. "Six pence," he says.

I was devouring it ravenously when a lady with two children thrust her head out of the next compartment. Locking at me angrily and yet good naturedly, she said. "That's a mean

Safety First at Indianapolis -Ford Cars Sold on Time -Racing Gossip.

(Special to Sunday World).

DETROIT, May 16 .- "Safety First" will be the watch word of the officials held an extended conference in Chicago, when it was agreed that it would to use May 29th., for a rehearsal of the start of the contest. All cars and their drivers are to be forced to get out on the track, and the drilling will take the better part of the day. This will remove much of the nervousness from the new men. In order to carry cut this "Safety First" idea, it is proposed to make it easier for the faster cars to get thru at the start. To do this, it is proposed to have the first row start two cars less than the back row, and to pull one car out of the this, it is proposed to have the firstrow start two cars less than the back
row, and to pull one car out of the
second row. This will remove the congestion up in front. The fast cars in
rear lines will have the opportunity to
get thru without causing accident. Another new rule is to be enforced. All
contestants in the race will have to be
on the speedway May 20th. Those reporting after that date will not be allowed to start. The technical committee of which F. E. Edwards is the
head will see to it that the steering
knuckles and rods on each car are
changed two days before the race. This
is a new rule instituted by Carl Fisher
himself, to help guard against accicidents. It could not be put into effect last year because the foreigners
did not bring spare parts. This time,
however, the European pilots have had
their instructions to bring spare parts,
and no excuses are to be tolerated. The
failure of the foreigners last year to
bring parts for their cars, resulted in
the almost complete rebuilding of one
prominent foreign car in an Indianapolis factory, and during this rebuilding many American parts were substituted including a rear axle. Appar-

Automobile Engineers.

Charles F. Redden, sales manager of the Maxwell Motor Company, cannot recall a season that set buying marks so early as this year. Mr. Redden has been in the automobile business since the very start, and at all times in the selling management. He says that business all thru, the south has been particularly good and to that section of the country he has paid special attention. What has surprised him most has been the ever increasing demand in the north which is consumding cars right up to its normal state.

As the B flow demand in glow being made on the for highways improvement on a large scale.

Many New Members.

No less than two Lundred and Sfty new members were elected at the meeting of the board of directors of Ontario motor league held last week. This membership increase followed a similar increase the previous month, so that the league's membership may now be said to be advancing more rapidly than ever before in the history of that organization. A great deal of credit for the added membership this year, which is coming largely from points outside of Toronto, is due to the league, Dr. P. E. Doolittle. At great the indefatigable president of the league, Dr. P. E. Doolittle, At great personal inconvenience he has been to be in Indianapolis 500-mile race, a position he filled last year. He has been asked to be in Indianapolis May 28, when Starter Tom Hay, A.A.A., representative Beencroft and Referee Pardington are slated to address all of the race participants. All instructions for the preliminaries to the great race will then be given.

the indefatigable president of the league, Dr. P. E. Doolittle, At great personal inconvenience he has been work at the progressing very of the indianapolis 500-mile race, a personal inconvenience he has been brought visiting all the cities and towns where automobile clubs have been formed, stirring them up to renewed activity with great success. As an instance, the visit of the president to the City of Stratford resulted in the re-enrolment of sixty motorists there, immediately following a meeting which he addressed. The first vice-president, Mr. W. W. Digby, has ably seconded the president in this directions.

The Montreal congress is expected to have great educational effect, especially in the Province of Quebec, where road-building has been even more backward than in Ontario, but where a start is now being made on a scheme for highways improvement on a large scale.

Pay Goodyear Prices For Your Tires

Else Require a Reason for an Extra Price

Eighteen American and Canadian makes of tires this year sell above No-Rim-Cut prices.

Some are nearly one-half higher. That means much added tire expense unless those tires are better.

We claim that none are better-none so good. And we cite these facts to prove it.

possible. And we control the only feasible method yet found to end this waste. Needless blow-outs, due to wrinkled fabric, are prevented by our "On-Air" cure. This

No-Rim-Cut tires make rim-cutting im-

extra process adds tremendously to our own cost, and no other maker employs it. Loose treads are combated in No-Rim-Cut tires by a patent method used by no one

else. It lessens this danger by 60 per cent. All-Weather treads excel all other anti-skids. They are tough, double-thick and enduring. They are flat and regular, so they run like smooth treads. Yet

OOD No-Rim-Cut Tires

With All-Weather Treads or Smooth

wet roads such sharp-edged, resistless grips. All these costly features — these money-saving features — are found in No-Rim-Cut

What Extra Value?

Then what of extra value can higher prices buy?
We know of no way at present to build better tires
—to give lower cost per mile. We have tried
thousands of formulas, fabrics, methods and processes. But no man as yet has found any way to improve on No-Rim-Cut tires.

Users have found these the best tires built.

That is shown by the fact of the largest sale. And they gained that top place when No-Rim-Cut tires cost more than other tires.

Mammoth output has cut Goodyear costs. Modern equipment has cut them. We employ the same scientific methods and equipment in our Bowmanville, Ont., factory as in our factory at Akron.
In 1913 our price reductions totaled 23 per cent.

Those are the reasons for Goodyear prices. It is easy tomake alower-pricedtire; but a higher-priced tire worth the extra price

has not yet been created. Prove this by comparison. Any dealer will supply you if you ask for Goodyear tires.

HOW MOTORDROMES ARE CONSTRUCTED

Information and Explanations About Toronto's New Board Track.

Very few people in Toronto have any idea as to the style of construction of a high-speed motordrome such as is being erected on Greenwoods avenue by the veteran track builder, George I. Kreamer. The latter has had many ridiculous questions put to him regarding the appearance of a motorcycle bowl and the manner in which races are conducted thereon. One enthusiast even went so far as to enquire if the racing machines were attached to long cables suspended from a pole in the exact centre of the field like the ribbons from a Maypole. Any number of people think that because the track is sloped at an angle of 60 degrees that the competitors are virtually climbing a hill durors are virtually climbing a hill during the entire action of a race.

From the driving of the first stake, the 'drome is built according to scientific principles. First of all, the field must be made perfectly level and surveying instruments are used to lay out an exact circle running 440 yards, or a quarter of a mile, in circumference. The motorcycle racing surface is built at an angle of 60 degrees because it has been found that the centrifugal force is overcome by the speeding of a machine from 75 to 90 miles per hour on this slant. Because miles per hour on this slant. Because of this slope, it is similar to riding on a straightaway course instead of on a curved surface, altho the tendency is to shoot outwards, or, rather, upwards, when a rider loses steering control of his machine. Experienced riders can chase themselves around a board track without touching the handle-bars but the practice is prohibited be-cause of the possibility of accidents. Altho the track is made according of scientific measurements, racing on a scientific measurements of the scientific measurements. a motordrome is not mechanical by any means. Strange the it may seem, a rider with a slow machine has frequently beaten a rival on a faster mount, thanks to better racing judgment, and a sharper mind. Seizing the psychological moment for a spurt has often resulted in victory for a man with a slow motorcycle.

In motordrome racing, the handle-bars of a machine are useless except for one purpose, namely, providing something for the rider to hold on to. In other words, the motordrome racer does absolutely no steering with his hands. When traveling at great speed, the racer finds himself pressed tightly against the top of his ma-chine—it is tiresome for him to hold nis head up. Then to steer his mount he merely swerves. A slight ean to either side will change the direction of his motorcycle. To attempt to steer with the handlebars would mean a spill and a slide of two hun-

A commendable feature about the Toronto motordrome is that several makes of racing motorcycles are to be used in all races, thus giving true competition and adding to the gen-eral interest.

The Dundas Road

Thru wanton neglect, the Peel County Council have permitted that part of the Dundas road lying within the county to fall into a state of fearful disrepair. This road, which a couple of years ago was one of the best in the countryside, is now a menace to public safety, so deeply has it become rutted and worn away. It is estimated that the road could be put in good condition now by an expenditure of approximately a thou-sand dollars a mile, while if no attention is given the road this year it would mean that entire reconstruction would become necessary, at a cost of from four to five thousand dollars a mile. It is said that the county authorities are holding back, waiting for the assistance in maintenance which the Government Highways Commission foreshadow—that is, forty per cent. of the cost. But this would be most shortsighted on the part of the county authorities, because their portion, or sixty per cent. of the cost of rebuilding the road would be three controls. per cent. of the cost of rebuilding the road, would be three or four times as great as the amount now required to put the road in good condition. It is to be hoped that a few of the well-informed good roads advocates living in Peel County will be able to convince the countiller. able to convince the councillors of the need of immediate action when the council convenes early

THE FIELD OF ART

Fine Collection of Early and Modern China in Royal Ontario Museum Illustrates the Progress of the Art -Much Interest Taken in Etching Work-

ments of that era were found they were set as jewels.

The colorings are particularly lovely. Softest grey, blue, and cream and green, and the forms of the bowls and instance are a delight to the eye.

China just after that fell before the Mongols. A few pieces were made for these Mongol conquerors, who fell upon the reigning dynasty—pieces which influenced largely the art of Japan, but had no influence on the art of China—it was merely an offshoot. Up to that time the development had been steady. At this period they developed a heavy thick porcelain, which went on hundreds of years without alteration—Celedon it was called in Europe. There is one case in the museum that for 400 years remained almost unaltered, the process being arrant. They are examples of one of the greatest periods in Chinese ceramics—wonderful are the tints of green on the underglaze in the earliest, with an occasional ornamentation of black. Then comes the rise after the driving out of the Mongols, and the rise of the Ming dynasty. There was an enormous enthusiasm all over China; prosperity followed this enthusiasm; temples and palaces were built on every side. One of the results was that great soon as an industry becomes so important that it is promoted from ordinary level of mere trade into the honor out of the Mongols, and the rise of the Ming dynasty. There was an enormous enthusiasm all over China; prosperity followed this enthusiasm; temples and palaces were built on every side. One of the results was that great use was made of glazed earthenware for out of door purposes. Ridge tiles were decorated with the little models of the great sages on the temples, houses and for the decoration of gardens, strong colors and rich glaze were used. The effect of these decorated temples against the background of gardens was most wonderful.

background of gardens was most won-So far the pottery was only a back-ground covered with a colored glaze; put on thus, the inclination was for colors to run into each other. The tenlency was to depict scenes on vases with one or two colors, and m order to overcome the difficulty of the running of the glazes they made little mechanical dams to keep the color from flowing in the heat of the furnace—showing the aiming at pictures

on vases.

Another case points out the development—this time by an entire change of arrangement. The pottery is now made and painted, and then covered by a glaze which is transparent. The number of colors at their disposal being necessarily limited by the test as to whether they would stand the furnace, they kept pretty well to blue and white, thereby causing the great popularity of blue and white china. To obtain other colors a third process was gone arity of blue and white china. To obtain other colors a third process was gone into. After the overglaze was put on, a second firing was given at a lower temperature with a lower grade of glazing having less resistance to the heat.

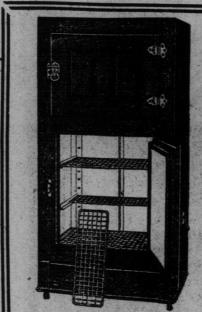

deather with a lower grade of glazing having less resistance to the heat.

With this process they had practically completed their knowledge, as far as porcelain had gone in the rest of the world. The museum possesses some beautiful plain blue, and is especially fortunate in having specimens of the underglaze colors of blue and peach bloom, the former being obtained from wood and the latter from copper. This red or peach bloom underglaze was very tricky, probably not coming out right once in twenty times. The specimens are, therefore, of enormous value—in America bringing \$40,000 for the small pieces. The museum is singularly fortunate in having some of the most beautiful pieces in America, and in fair number.

Then came the period when the Chinese potters were able to do anything.

things on one side came a develop-ment to a perfect simplicity and a desire for the most beautiful of colors. In one of the long cases at the side of the gallery this is exemplified,

GRANT-CHIPMAN. The marriage of Eleanor Phyllis

Frances, daughter of the late Mr. War-wick Chipman and Mrs. Chipman, to the Rev. Anthony Vivian Grant. De Winton Alta., was selemnized on Friday after noon in St. George's Church, Montreal the Rev. Vial, Lennoxville, assisted by the Ven. Archdeacon Paterson Smyth. officiating. The decorations in the church were of pink and white carnations, daffodils and palms. Mr. Warwick F. Chipman, gave away his sister, who wor a gown of white satin with overdress of imerick lace and tulle veil arranged with a wreath of orange blossoms, and carried a bouquet of white roses and o'clock on Wednesday afternoon, when the marriage was solemnized by the pastor, Rev. J. Macpherson Scott, of Victoria of Alyce, youngest daughter of Mr. and Mrs. Charles Edward Spong, to Mr. Richard Fullerton Kingdon, son of Mr. and Mrs. George Kingdon, carlaw avenue. The bride, who was escorted to the altar by her father, was attired in a white satin gown embroidered with pearls and a shadow lace bodice. Her vell, which was of embroidered Brussels net, was caught with sprays or orange blossoms and she carried a shower of liles and roses. Miss Minnie McGregor attended as bridesmaid, wearing blue brocaded crepe with shadow lace and black hat with plumes. She carried a bouquet of pink roses and wore the groom's gift, a cameo ring. Mr. W. Broufield was best man, and the ushers were Mr. H. Spong and Mr. Harold Priest. A reception was afterwards held at the family residence in River street, Mrs. Spong wearing Copenhagen blue satin, and Mrs. Kingdon black brocaded satin and lace. Mr. and Mrs. Kingdon left later for Atlantic City and New York, the bride travelling in a French gown of cadet blue and blue hat with velvet and forget-me-nots. ies-of-the-valley. She had one attend-

the W. A. A: gave a musicale in the galleries on Tuesday afternoon. The large number of guests were received by Mrs. Geo. Castle, Mrs. William K. Murphy, Mrs. R. S. Deacon, Mrs. J. Squair, Mrs. Synge, and Miss Doherty. Those who helped make the program a very delightful one were Miss Rita Haynes, Miss Helen Murray, Little Miss Violet Dunn and Mr. Frank Full-motion of legislation and enforcements.

At the regular meeting of the S. P. C. A. Mrs. Dorie emphasized the urgent need of financial aid in furthering the work of the society, and put in a strong plea for the ill-used horses of the city, worked almost to death by their heavilless owners. She reported the city, worked almost to death by their heartless owners. She reported tavorably on the work of the shelter for cats, and announced that she would spend two months this summer in London and Paris looking into the systems of the humane societies work in these centres.

Queen Mary has consented to become patron of the British Counci of Women, according to an announcement made by Mrs. Creighton, one of the British delegates to the international Council delegates to the international Council of Women. Mrs. Creighton, who was greeted with great applause, when she made the announcement, added that the English union was in favor of woman suffrage, but not of militancy, which was advocated by only an insignificant minority of the women of England.

At the Sunnyside Orphanage benefit in the Royal Alexandra, on the 14th inst., the program sellers were:

Imagine this "Moffat" Range in YOUR Kitchen!

No other Range can offer you so many conveniences as a "Moffat"

LL the best features of the Moffat Ranges built into the most compact and best made gas cooking range you ever saw. So modest in price, too. Here it is!

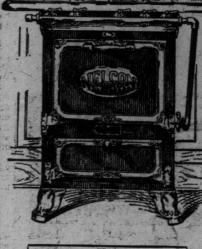

The Nelson Gas Range First of all it will cut down

your gas bills. That's important. Then, too, it is compactly built and occupies but little space. The width is 33" and the depth 26". The "Nelson" is just the range for a kitchen of limited size.

The secret lies in the Moffat star burner. Each burner is star shaped, and made in one plees, so that there is nowhere for the gas to leak. You get a clear blue flame—always intensely hot with a small consumption of gas.

Perfect heating The two ovens (one for bak-

ing, one for broiling) are so made as to spread the heat evenly over every part. No hot spots here or there, but a well heated, uniformly hot oven-always under perfect

Covered in top

At a small extra cost the
"Nelson" is supplied with
a covered in top. No open
burners. You take off the
circular covers just as you
would from a coal range. This
feature means greater economy in gas as well as cleanliness. When not in use the
range always looks neat and
trim. This is a very attractive feature of the "Nelson."

You'll admire the finish of the Nelson: A blacksatin enamel finish, not just painted over, but baked into the steel. Cannot tarnish or discolor. Easily kept clean, and guaranteed rustproof.

City

On Monday, Tuesday and Wednesday of the last week of May an international con-

Planning
Conference

the last week of May an international conference on city planning will be held in the Convocation Hall of Toronto University. Testimony to its importance is afforded by the fact that it will be formally opened and addressed by the governor-general, and by the nature of the papers to be read by experts in the various subjects that fall within the scope of the conference. This continent has been slow to realize the necessity for city planning and the vast benefit which results from wise preparation for the future requirements of an expanding community. Germany has been far ahead of English-speaking peoples in this respect, and has now become the resort of public officials and students interested in city planning. Not the least notable of the sessions will be that at which the draft of a Canadian Planning Act will be criticized and discussed by experts from Canada, the United States, Britain, and Germany, and this, it is to be hoped, will lead to more public attention being accorded to orderly city development. At the recent banquet of the Association of Municipal Corporations, Mr. Herbert Samuel, the new head of the Local Government Board in the British Cabinet, remarked that in England no fewer than 189 local authorities were now engaged in the elaboration of town-planning schemes, and the board had official cognizance of 78 schemes covering 116,000 acres of ground. Their fathers and grandfathers, he said, did not have sufficient foresight to plan in advance the land on which these towns were developed, and their mistakes should not be repeated.

Remarkable progress is being made in Japan in the knowledge of the English language. Recently five hundred teachers of English gathered in Tokio for their

Learning English

of English gathered in Tokio for their second conference. The proceedings were entirely conducted in English, a fact noteworthy since only five per cent. of those attending were British or American men or women. Baron Kikuchi, president of the Imperial University, took the chair, for which he is exceptionally well qualified thru the many years he has spent in England and his degrees from Cambridge, London and Glasgow universities. Japan has 100,000 boys and girls studying English as a part of their secondary course. For this, seven hours a week for five years are required in the case of boys, and at least half that time in the case of girls. From present indications, it is probable that in the course of a few generations the knowledge of English will be almost universal in Japan, since that enterprising country can boast the largest percentage of school attendance in the world. This may be a revelation to western peoples, but it again displays This may be a revelation to western peoples, but it again displays the qualities that have transformed Japan within living memory.

America's New

Niagara Falls, Ontario, will enjoy a brief period of unwonted attention during the sittings of the representatives to whom is committed the difficult task of finding a way out of the Mexican trouble. The

Brazil, and Chile, and its acceptance by the United States, is an event of considerable intrinsic importance, whatever may be the outcome of the conferences. For it is the beginning of a development which, to all appearance, will mean united action in the future for the preservation of peace and order among and within the Central and South American States, and more particularly the former. South America has at last settled down to an acceptance of boundaries and conditions, and its governments will have quite enough to do in looking after the expansion of agriculture, industry and commerce. After a long period of turbulence, revolutions and unrest, the South American communities have educated themselves up to a point where real self-government, tho in varying measures, has become possible, and growing experience will increase their capacity and provide a class of public men who will seek political power by other means than arms. With the opening of the Panama Canal a new opportunity will come for the Pacific States, rich as they are in mineral wealth that only needs trans-

Interviewed last week on his return from the west, Sir Thomas Shaughnessy, gave a summary of the results of his investigation into western conditions. On the whole, it is optimistic, because shrinkage is apparent everywhere, the people

Canadian Conditions

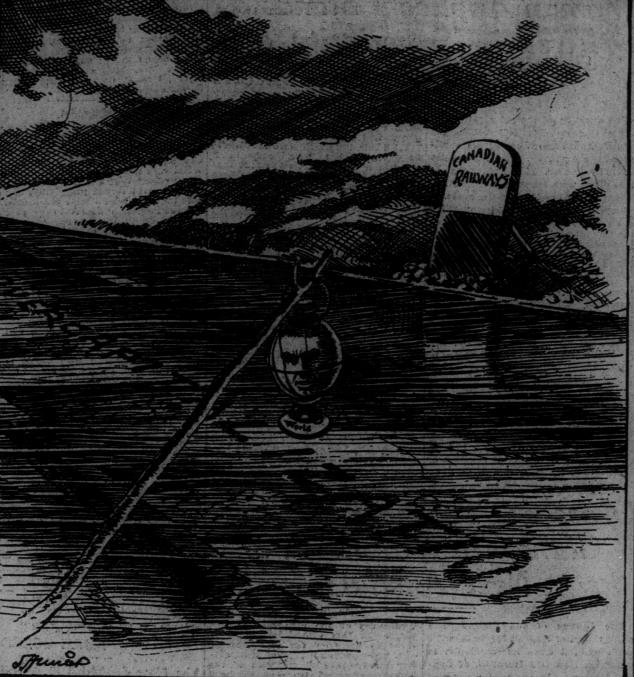

are on "an even keel," and are "marking time." If this year's crops are good, Sir Thomas looks for a recovery of a wholesome and national nature. Nothing, in his opinion, indicates that the country is fundamentally unsound, from a business point of view, and no vital interest is irretrievably hurt. This judgment is in accordance with that of other competent observers. It shows how much Canada is dependent on the soil as the basis of its prosperity, and this again emphasizes the importance of using every effort to strengthen and expand the agricultural industry. The provinces that are encouraging production and increasing the attraction of rural life, are best building for the future, and rendering themselves more immune from the consequences of genral world depression. Good roads, good schools, social centres, provision of cheap light and power for the farmer, telephone and telegraph communication on easy terms, the extension of the postal library system, and other developments of kindred character are all important methods of encouraging and maintaining land settlement and cultivation.

> Huerta In The

Steadily the toils are closing on the Mexican dictator. Tampico was evacuated last week, and is now in possession of the constitutional forces. The fall is attributed to Huerta's army having expend-

ed all its ammunition, and evidently no reserve depot had been prepared or stocked. The incident must convince him that his day is nearing its close, and he is credited with having arranged a way of escape before the end arrives. For the fate of Mexico City itself there is grave ground of anxiety, should no authority be capable of maintaining order. Nor does it appear to be possible to extend neutral protection to the residents, whether native or foreign. Little reliance can be placed on Pancho Villa, whose record exposes him to the suspicion that he will take the opportunity to fulfil his threat to punish every Mexican who has given even moral or financial support to Huerta. Moral support is a very elastic term, and financial support may well have been compulsory, rather than voluntary. But Villa, embittered as he is, will not be inclined to distinguish, even if he could understand the distinction. The flight of priests and nuns from the Huerta territory shows their fear that Villa will extend to all members of the Catholic party similar treatment to that with which he is already credited in the districts he controls.

IN FLOOD TIME.

Legislative Reference Work

Among the latest organizations designed to assist legislators in the discharge of their supposedly onerous duties is one in the United States, whose purpose is summarized as "legislative reference work." It may be described as an omniscient institution, of a kind which undertakes to enlighten those who undertake the duty of making laws for their fellow citizens. whether state or city, respecting the novelty and sufficiency of the measures they desire to father. As, for example, whether the proposals are already upon the statute book, in substance or in form; whether they conflict with constitutional or charter provisions; how they compare with similar laws elsewhere, and what the results in operation of similar laws have been. Information of this nature is invaluable to amateur statute makers, and may even be needed by ministers, however encyclopedic their real or presumed knowledge.

That the movement has caught on in the United States is shown by the fact that nine states have established independent legislative reference bureaus. They are California, Illinois, Indiana, Maryland, Nebraska, Ohio, Pennsylvania, Vermont, and Wisconsin. In twenty-one other states, official libraries or universities have been authorized to add legislative reference work to their previous functions. Eight cities maintain municipal reference departments and eight universities are offering facilities for volunthry municipal reference work to students, who are being trained to remedy the evils attending municipal adminsitration. Even the United States Congress is engaged in an effort to instil knowledge into legislators, and to improve the drafting of bills intended to improve the law.

What is needed in every country is a public department that will draft bills introduced by the government, and revise those proposed to be submitted by private members of the legislature. Much confusion among and miscarriage of remedial laws have followed upon bills drafted by laymen either ignorant of the laws they aimed to amend or unaware of the construction placed upon their provisions by the interpreting courts. Given an expert department, whose office it is not to dictate or interfere with the policy or principle of a measure, but to so construct it that it will effectually perform its purpose, the result of careful revision is bound to be salutory. It could also prevent the heaping up of often contradictory amendments, which leave the law unsettled, and even more unsatisfactory than it was originally.

Improving Rural Condi-

Our neighbors are much given to bragging and boasting about the extent and wonderful natural resources of their country. For neither are they themselves entitled to credit, but they are certainly responsible for the manner in which, they have used and developed their magnificent heritage. They have recently been told some very plain facts regarding their shortcomings by a member of President Wilson's cabinet-Mr. Houston, secretary of agriculture. Speaking about his own department, he declared that the United States is still in the pioneer stage of farming, and that less than twelve per cent. of its farm land is yielding even fairly full returns. The point has been reached, he said, when real thinking and planning must be done. Agriculture has been neglected, while great industrial enterprises have been built up, but Mr. Houston more than hints that it is the farmer himself who has been at fault.

The United States, to use the words of the secretary of agriculture, had better face the fact frankly that it is relatively inefficient, take stock of its shortcomings, and earnestly seek for the remedy. "That we," he continued, "have practically reached the stage where we have ceased to be an exporting nation of food products, and are becoming dependent on foreign nations for the necessaries of life, is a commentary on our use of the opoprtunities bestowed upon us." This change in the status of the United States not only affects that country itself, but is having important economic consequences, and promises, unless the older position is restored, to remain a factor in the high cost of living.

But Mr. Houston's indictment does not stop at agriculture. He arraigns the rural schools as a failure, methods of distribution as crude, and bungling, rural hygiene as undeveloped, and country roads as a disgrace. Three things are to him, he remarks, a source of constant wonder. Why most of the teachers in the rural districts continue to teach; why communities continue to employ them on any terms; and "why a man who has any rgard for the future of his children will remain in the rural districts as they exist today, if he can possibly get out." The average salary of a teacher in rural districts, Mr. Houston says, is but \$300 a year-in some states, even in New England, it is as low as \$200 a year. To his mind, the first duty is to improve the conditions of living in country regions. There is a lesson in all this for Canada, quite as much as for the United States.

ASOUITH COOLS IRE OF MEN WHO CHAFE AT DELAY

ment to Punish Those Who Participated in Recent Gun-

BY WEEK'S INACTIVITY

LONDON, May 16 .- Little has been done during the past week towards arriving at a solution of the Ulster problem. The delay has re sulted in the strengthening of the influence of the extremist sec completed, the top will be about 320 tion of the opposition, and there parliamentary attitude. Meanwhile, many ministerialists are chaffing at the seeming hesitancy and indecision of the government, and at its refusal to attempt to punish those who participated in the recent guntunately missed hitting any of the running coup. The feeling, indeed, revolt, and a strong deputation had a private interview with Mr. Asquith, who is understood to have presented various facts and circumstances **HYDRO BEFORE JUNE 1** which served to allay the irritation and caused the collapse of the moveas ordered the rate reduction into effect on June 1. Before that time ar-

vesterday, when questioned on the Toronto commission's stand on the recent order. No intimation whether the decision would be one to submit or fight was given, however. None of And against the treatment accorded to the people by the railways rule bill indefinitely, or even until authorities demanded the work of

A Revolt Against a System

The whole of Ottawa, and the whole of Canada is in revolt—revolt against a system. Against the system under which we have built our railways.

that they have created. The Canadian Pacific, a great railway, but rich and arrogant, defying the public interest and the credit of the country by resorting to the ways

of high finance in order to cut melons for its shareholders. The National Transcontinental and the Grand Trunk Pacific, costing pursued. The point on which they are it was learned today, have caught hundreds of millions of public money and public credit, lying, half of it, at one is the determination to force the war fever. Persistent appeals to idle on our hands because the Grand Trunk is in a legal position not to a general election before home rule Col. William G. Haan, chief of staff,

and may never be. Interest charges—on the country—ten millions a year in the meantime. The Canadian Northern asking us for a credit of forty-five million BRYAN LAUGHS AT dollars in order to complete their road, but which they now propose to

share with the country if the aid is granted. It is this proposal that has caused the revolt, tho the revolt is against the whole system. That system could not be worse.

And yet the Canadian Northern request must be dealt with or we throw the country into financial disaster. The government of the day, by the mere fact of being in office, are responsible for the situation, and must deal with it, the they did little to create the system that has caused this wide-spread revolt.

Nickle, Bennett, say what you may of them, are only speaking the deep disgust of the Canadian people.

Even Graham and Macdonald, the much closer connected with the situation that confronts us, say they are speaking for the public against

For the first time parliament seeks to get clear of the system, and in the current issue of The Commoner, the men who are trying to cut loose from it must have their hands strength- "is back within reach of the teleened or a national calamity will ensue.

The question, therefore, is one of terms between country and company, and still avoid disaster. If you press too hard the promoters of the The colonel's test of a new race is company will leave the whole thing on our hands, or they will sell out to whether the members thereof ever the Canadian Pacific and take out at least thirty millions with the road unfinished and the provinces burdened with the interest on all their guarantees. And they may lay this on the doorstep of the Dominion if we re-

fuse aid now.

The Borden government have not been lobbied into action, nor have the Conservatives been lobbied to grant aid; but both government and party have been forced by circumstances to intervene in the interest of the country. If anyone can suggest any other course that would be less onerous to the country, let him say so now.

But we can start to end the system, and it is now under way in re
be the presidential nominee of the progressives and the Republicans in 1916 is still being repeated, and apparently is finding a few believers. If that should happen it would be less onerous to the country, let him say so now.

But we can start to end the system, and it is now under way in re
be the presidential nominee of the progressives and the Republicans in 1916 is still being repeated, and apparently is finding a few believers. If that should happen it would be less onerous to the country, let him say so now.

But we can start to end the system, and it is now under way in re
be the presidential nominee of the progressives and the Republicans in 1916 is still being repeated, and apparently is finding a few believers. If that should happen it would be less of esteemed Republicans spell-binders to revise the campaign speeches they made in 1912."

May 16.)—George Brandels, the farmous Davis' no-tip-ing bill will be followed by a revolution in the hotel and restaurant business, and a strike of the workers that will be nation-wide and bitter. This is the opinion of more of the workers that will be nation-wide and bitter. This is the opinion of more of the from the followed by a revolution in the hotel and restaurant business, and a strike of the workers that will be nation-wide and bitter. This is the opinion of more of the strike of the workers that will be nation-wide and bitter. This is the opinion of more of the strike of the workers that will be nation-wide and bitter. This is the opinion of more of the progressives and distinguished policies, in an interview says:

If that should happen it would be less

gard to one road. And the first step is the hardest. The country will POLICEMAN FACES get the Canadian Northern in a year or two at the most. We pray by purchase at a reasonable rate and not by default! But we are going to get it, and once in possession of one transcontinental system, we will be Ottawa Officer Said to Have masters of a system that has brought us to the revolt of today.

The Borden government has its faults, and so have Conservatives and the Conservative party; but what can they do but act as best they can for the country? Can they take the responsibility of a crisis? Should they resign and let into office the Liberals and the transcontinental?

There is nothing to do but to do their best. They will welcome any suggestion that will help in working out the problem.

But the Canadian railway system, as we know it, has come to its end. Something better will come now that we've found it out and have in our hands the means of making the roads respect our views. One transcontinental road in the hands of people's representatives, who believe in public ownership, and a road running in every province, is the first step toward recovering our supremacy—of freeing ourselves from the entanglements, the conditions, that men are now denouncing in parliament.

The rising of the Canadian people has been long in coming, but it's here, and the railways will soon know it. If we do the paying, we're going Kieth as the burglar. He was re-

POLICE ARE AFTER PAPER THIEVES

Dailies Are Given Warning

Application of Birch Advised as Corrective Measure for Wayward Lads

As a result of complaints from small boys stealing morning papers, the police are making determined efforts to put an end to the annoyance. Last Monday two lads about 10 years of age were arrigned before the commissioner in the juvenile court for stealing Sunday Worlds from delivery wagons. The commissioner emphasized the serious nature of the offence and sentenced the youthful delinquents to six months in the Victoria Industrial School. Sentence, however, was suspended on their promise to mend their ways.

An official in discussing the matter pointed out that it would be well if parents would impress on their boys the seriousness of this petty thieving. Many people have also voiced the opinion that the authorities are too lenient in disposing of such cases. They believe that in the case of habitual offenders an application of the birch would prove exceedingly effective as a corrective measure.

company. He is a Canadian by birth, born at Barrie, Ont. Previous to joining the National Cash Register Co. he was on the staff of the Canadian Cycle & Motor Co., and before that time represented the Gould Blcycle Co. in the maritime provinces.

Since joining the staff of the National Cash Register Co., Mr. Rogers' rise has been rapid.

Mr. Rogers assumes his new duties at once,

SAFETY FIRS

Stop! Look! Listen!

Public interest is being aroused in the movement for "Safety First." It is an effort along the right line and should be encouraged. Whether in conduct on the public highway or in privat premises or in the making of personal investments "Safety" should be the first consideration. Apply this principle to the purchase of your Summer Clothes. How does it

work out? You will, first of all, make sure you are dealing with a house whose reputation and guarantee are absolutely reliable. You will be sure also that the price is right and that you will get good service.

Crawford Tailoring and Service fill all these requirements. This is exclusively a Men's Tailoring house and has been in business in Toronto for over 25 years. Its guarantee has never been violated. Its prices are right. Note this special:--

Suit Made to Your Order, Style Fit and Workmanship

We give you a choice of a big range of imported worsteds and tweeds, every new pattern and color being represented. We make these suits to individual measure, and in whatever style you desire. Your investment is absolutely safe—and that the price is right is self-evident when you consider that most tailors want to make at least \$12 profit on a suit, the entire price we ask. It is no exaggeration to say that these suits are easily worth from \$18 to \$25. Try one. You will find that it will give you lasting service.

SUITS ORDERED UP TO MONDAY NIGHT WILL BE FINISHED IN TIME TO BE WORN ON THE 24TH OF MAY.

Crawfords, Limited Open 211 Yonge Street Opposite Albert

VERNON CASTLE
TROPHY
TR The city will be competing against Boston, Chicago, Washington and other large American cities, but Torother large American cities, but Toronto will be very well represented, and while our American cousins have taken up the modern dances some little time before the craze struck here, still good judges believe that a couple will be selected at Massey Hall out of the number of accomplished dancers that will compete there that will have a grand opportunity of bringing back the Castle Trophy from New York.

To select the best in the art in this city to compete at Massey Hall rests with Pavlowa Academy. All entries must be made through this academy, and their decision will be final and

place at Pavlowa Monday night, May 18, when a complete selection of the twenty couples for Massey Hall will be made by the judges. Out of this number Mr. and Mrs. Vernon Castle will select a couple to go to New York as their guests to compete in the international tournament for the Grand Castle Trophy.

ANOTHER VICTORY! Toronto, May 14, 1914.

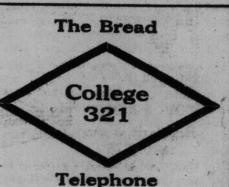

Ontario Oxypathor Co.,

100 Crawford street.

Dear Sir: I have had asthma off and on for over six years, sometimes not able to do anything, then it would wear off for a while, but last fall it came to stay, and for six iong weeks I was bolstered up, could not lie down night or day; in January I was induced by a friend to get the Oxypathor; the second treatment gave me relief, and I went to work. I treated only seven nights, and have not had a trace of asthma since. I had cold since, but put it on once and it left. It used to take me about an hour to come home from Queen street, only six short blocks, I have also proved it the best possible thing for constipation. Hoping this may be of service to you, will cheerfully recommend it to others with asthma. Yours truly,

Man's Two Most Vital Spots

The two most vital spots in the average human are the STOMACH and the POCKET-BOOK. While in other cities, and by other bakers, the bread offered for sale is a burden to both, and a possible benefit to only one, the bread baked, advertised, and sold, as

LA WRENCE'S Home-Made Bread

is a benefit and comfort to the stomach and touches the pocketbook with gentle kindness, much appreciated in hard times by rich and poor alike. Now think of it! The big 24-ounce loaf of Lawrence's Bread, of a quality other bakers cannot equal at double the price, is actually delivered in Toronto at half the price people have to pay for other bread at the stores and carry it home. At the grocery you get 12 ounces for five cents; from Lawrence you get 24 ounces—delivered fresh—for five cents. Think it over and telephone your order, first thing Monday morning, College 321.

GEORGE LAWRENCE, Baker.

Adams' Charge Account Service is the Connecting Link Between Anticipation and Realization

Dreams of a happy home come true in this store. The weary waiting can end right here and now. June is just around the corner. Mr. Man you can prepare to marry at once. The dawn of a bright day is ready to break for you two. By means of our broad gauge liberal method of furnishing homes on the easy payment plan, hopes are realized und anticipation becomes a living fact for young folks with but little ready cash. You can choose from great new stocks of fairly priced and trustworthy homefurnishings, distributing the payments at convenient intervals over a year or more, beginning at once to enjoy a complete home of your own choice and liking. Don't put off another day. Come in and see us Monday.

Tango, rapidly taught. Special attention given to club
dances and children. Telephone Mission Tea Rooms,
Adelaide 325, for further information.

LUMGAIR-DICKSON.

The marriage took place very quietly on Monday, the 11th inst. in Montreal, on the arrival of the bride from England, in St. Paul's Presbyterian Church, of Mr. George Maurice Bolton Lumgair, Toronto, only son of the Hong. M. Lumgair and of Mrs. Lumgair, Hove, England, to Vida Archibald, youngest daughter of Mr. and Mrs. A. Dickson, 3 Spadina road. The Rev. Bruce Taylor. D.D. officiated, and Mr. E. G. B. Malcouronne played the wedding music. The bride, who was brought in and given away by her brother-in-law, Mr. Angustus Bostwick, in the absence of her father, looked very pretty in a smart white tailor-made, with gold embroidery, and a corsage bouquet of mauve orchids and lilies, and a hat to match with rose-tipped white plumes, and wore the gift of the groom, a string of pearls. Mr. F. Norman Creer, Toronto was best man, the bride was unattended. After the ceremony the wedding party adjourned to the Ritz-Carlton, where the dejeuner was served at a table with Richmond roses, the same lovely flowers being carried by the hostess, Mrs. Bostwick, who wore a tailor-made of pale green and a black tulle hat with osprey. Mr. and Mrs. Lumgair have arrived in town, and are occupying Mr. and Mrs. Dickson's house in Spadina road until the autumn, when they expect to return to England.

FROST-COOPER.

A wedding was solemnized on Tuesday, May 12, at the house of Mr. and Mrs. George Cooper, Kendal, when their eldest daughter, Winnifred May, was married to Dr. Robert Oakley Frost, only son of Dr. and Mrs. Frost, Kinmount. The ceremony was performed by the Rev. H. A. Frost, pastor of the Charlotte Street Methodist Church, Peterboro, cousin of the groom, assisted by the Rev. R. L. Edwards. Newtonville. The graceful bride, who was given away by her father, was gowned in ivory satin with shadow lace, and were a tulle embroidered veil arranged in a juliet cap with orange blossoms. She carried a shower boquet of bridal roses and lily of the valley, and wore the groom's gift, a diamond bracelet, and a diamond and pearl-pendant, the gift of the groom's mother. The bride was attended by her cousin. Miss Louise Cowan, who wore peach crepe de chene with mob cap to match, and carried a sheaf of pink roses. The bride's mother was becomingly gowned in black satin and cerise, and wore Richmond roses. The groom was supported by Mr. Lavergne W. Cooper, brother of the bride. The groom's gift to the planist, Miss Winnifred Stalker, and to the bridesmaid, was a pearl and amethyst brooch. The groomsman and Mr. Charles M. McLean, who sang "All Mine Alone" during the signing of the register, received gold fobs. Mr. and Mrs. Frost left for an extended trip abroad, and will return in the early autumn.

KIRBY-BLAKE.

The marriage was solemnized on Tuesday morning in St. Michael's Cathedral, the Rev. Father C. Can-tillon officiating, of Marion, daughter the music.

Miss. Clara Johnston was the nostered a miscellaneous shower on Saturday evening, silven in honor of Miss Marvel. B. Gentleman, and June bride, was that of the many entertainment given in honor of Miss Marvel. B. Gentleman, and June bride, was that of the many entertainment given in honor of Miss Marvel. B. WOOD-DUNSMORE.

A quiet wedding was solemnized in High Park Presbyterian Church, on Tuesday, 12th inst., at ten a.m., when Missell Parmer, Richmond Hill. The marriage will take place in June.

Mr. and Mrs. J. B. McColl announce the engagement of their daughter. Mr. and Mrs. Thos. Ellis, Tuliamore, and Mr. Enoch Wood, eldest son of Mr. and Mrs. Wm. Wood, Wildfield, Ont., were married. The ceremony was performed by the pastor of the church, Rev.S.C. Grant. The bride, who was unattended, was given away by her uncle, Mr. John Dunsmore. She wore her travelling sown of midnight blue satin with hat to match and a pearl necklace, the gift of the groom. The wedding march was played by Mrs. Thornton. A reception was air terwards held at the home of Mr. and Mrs. John Dunsmore, West Marion St. after which Mr. and Mrs. Wood left by the noon train for Sarnia and Detroit.

The latest styles in reasonably priced Millinery for the June wedding or the races at Rutherford's, 542 Yonge street.

ENGAGEMENTS ANNOUNCED

BUS SERVICE IN NORTH TORONTO

Toronto is promised a most up-to-date bus service. This proposition will be met by the firm of Robins, Limited. To begin with a boulevard 88 feet wide is under construction. The boulevard will start from a point near Melrose Park on Yonge street and continue across properties to Bethuret street Park on Yonge street and continue across properties to Bathurst street and Wilson avenue. This service will run winter and summer, as conditions will be such that the course may be always open for transportation. The high-priced properties will not be the only ones to benefit from this, as the line will run directly into the cheaper lands farther north. The bus will be of the single deck type that is much in use in England at the present time. The chassis will be imported but the body built here. This is the beginning of far more extensive plans.

WILL CALL DR. JESSOP.

ST. CATHARINES, May 16.—Certain Liberals declare today they will go after the \$1000 offered by Dr. Jessop, M.L.A., for proof that he promised not to become a candidate for the legislature again. Following a bitter attack by the local Liberal paper last night, some of Dr. Jesop's friends have advised him to institute a libel suit, which the newspaper is said to court.

Messrs. A. F. Webster & Son, 53 OLD DRIVERS FAVOR RIGHT-SIDE DRIVE

They Would Rather Watch the Ditch Than the Car They are Passing.

seems to have reached its heighth. The motoring papers are full of the discussion and in every local salesroom the subject is threshed out daily.

As one rider states it: "The greatest argument in favor of the right-side drive is that the driver can watch his off wheel and the ditch much better. It seems to me this is such a strong argument that it outweighs all that can be said in favor of left-side drive. They say that when one gets used to it, one can judge where he is driving and how close he is to the ditch; but don't you believe it. Men who have driven both kinds of cars say they cannot.

curb, probably a close enough estimate can be made, but when it comes to country touring, and that after all is the best fun in motoring. I want to know just where the ditch is. I want to actually see it. I don't want to have to estimate where it is nor trust to chance that there is no hole or open culvert that I want is no hole or open culvert that I may drop into. I am not afraid of the other fellow's hitting me and I am not going to watch him.

sven the worst freckles have begun to disappear, while the lighter ones have vanished entirely. It is seldom that more than an ounce is needed to completely clear the skin and gain a beautiful clear complexion.

Be sure to ask for the double strength othine as this is sold under guarantee of money back if it fails to remove freckles.

CUSTOMS CRUISER ARRIVES.

ST. CATHARINES **EXCITED OVER JESSOP CHARGES**

Liberals Making All the Capital Possible Out of Charge Hurled at Sitting Member-Flat Denial is Extended

ONE BIG TOPIC OF STREET DISCUSSION

Special to The Sunday World. ST. CATHARINES, May 16 .- So thing of a political sensation is buz-Catharines today as the result of a Elisha Jessop, the sitting member in the legislature, by the president of the local Liberal Association. Not the fact of the charge itself, but that it is being followed up vigorously and that it will in all likelihood culminate in the courts, is providing subject for debate in the market and business centres today. Throngs of people are on the street and the one topic is bechance for victory at the coming provincial election and are making the most of it. The charge made in the columns of the recognized Liberal organ by J. M. Elson, editor and assoclation president, is that Dr. Jessoy in accepting the provincial nomina tion on Thursday has violated a solemnly worded contract made in 1911, that if allowed acclamation he would never run again. In vitriolic terms the charge is made and the member s branded as "one of the most danger-

is branded as "one of the most dangerous men who could seek the votes of
intelligent people, tricky and deceitful, and crowning 14 years in the legislature with falsehood and treachery.
If he is again elected he will again
sit in parliament with the brand of
crookedness upon his brow."

To all of these charges and denials
Dr. Jessop this morning extended a
flat denial. He states that he made
no contract to drop out of the next
election, and that even had he done
so, the situation now existing would
relieve him of accepting the nomination. By the new redistribution act
his old riding has ben divided and it
is the new St. Catharines City seat
which he contests.

So indignant is he at the charge,
which he claims is trumped up and
ridiculous, that he offers to lay down
\$1000 in cash for the man who can
produce a Liberal to testify to his ever
having made such a contract. It is
understood here this afternoon that
the Liberal party will take him up and
that affidavits of persons swearing that
they heard him agree to it, are now

the Liberal party will take him up and that affidavits of persons swearing that they heard him agree to it, are now under preparation.

On the other hand, there is an understanding that Dr. Jessop is placing the matter of the savagely personal attack in the hands of a lawyer, and that an action for libel may be started early in the week. In this afternoon's edition, the formulator of the charge adds the word "perjury" to the category he lays at the door of the member. This, from a legal standpoint, allows opportunity for a charge of libel to be made on good grounds.

Dr. Jessop repudates the whole affair as launched in a vain effort to set up the standard of Liberalism on the grounds vacated fifteen years ago. By tying him to some imaginary contract of this nature they will then have the chance of putting their man in the field against a new Conservative nominee. Dr. Jessop thinks that their endeavor is to start a roorback campaign, and if he yielded the point Mr. deavor is to start a roorback campaign, and if he yielded the point Mr. Elson would confidently offer himself as the Liberal candidate of the riding. From the intensity of the feeling which is accumulating the coming election striggle promises to set a which is accumulating the coming election struggle promises to set a pace for provincial ridings. One of the Liberal claims is that the doctor has disappointed many of his Conservative friends who have been patiently standing by for years to have an opportunity of running when he dropped out. They state that when the proper time comes they will call some proper time comes they will call some of these to witness that they had un-

erstood Jessop was prepared to retire.

The political history of Dr. Jessop shows the following majorities: 1898, 359; 1902, 640; 1905, 860; 1908, 1150; 1911, acclamation. Local Conservatives are reticent over the whole situation and claim that the matter rests in Dr. Jessop's hands. They do not consider the matter to have sufficient importance to become excited over till an early provincial election is assured. The word and standing of their member has always been held in highest regard by the constituency.

ency.

C. B. Hare, a prominent Conservative here, who it is claimed bore the wording of the contract to the Liberal executive and now refuses to corroborate, also comes in for wholesale condemnation by the layer of the charges. He is designated as a "corruptor" and "welcome to the fruits of his deviltry."

He is said to "thurn like a rice." is deviltry."

He is said to "turn like a viper and

epudiate the contract."

YOU NEED A GOOD SPRING TONIC. Do you feel languid? Do you not sleep well? Are you tired in the mornings? Then you certainly need Sanguinol. Sleepless nights and loss of appetite play havoc with the strength of the body, and the nervous system. Sooner or later your system will become so "run down" that work will be impossible. Before you allow your system to become weakened, use a tonic that will ensure real health. Use Sanguinol, a safe, reliable spring tonic. You'll enjoy life better. Regular treatment will keep you in robust health. No harmful drugs or stimulants. Simply Nature's own food for the blood and nerves, Sold in Toronto by the Owl Drug Stores: 282 College street, corner Bloor and Brock, 990 Bathurst street, corner Bloor and Spadina, 1631 Dundas street, corner Parliament and Carlton. 770 Queen east, corner Balsam and Queen.

Kind Of.

The KING'S CAFE, 14 King street east, has solved that vexatious problem of where to dine in Toronto.

The King's Cafe has recently opened under the efficient management of Mr. Stockholm, who brings to this high-class Toronto cafe all the experience gained in the famous cafes of New York and Boston. Toronto visitors to the large American and continental cities, returning home will recognize and appreciate the same little details and features of the King's Cafe that make American and continental cafe life so enjoyable. The cuisine is excellent, the linen spotless, silver newservice ideal, and the music the best that can be produced. The Schumann Orchestra plays daily from 12.00 to 2.00 p.m., 6.30 to 7.00 p.m., 10.45 to 12 p.m., Sunday, 4 to 6 p.m. The KING'S CAFE, 14 King stree

Many of the foremost citizens of Toronto, who have already dined at the King's Cafe, find that it is a delightful "oasis" in a desert of tall buildings and business. The King's Cafe is at the very heart of things, at 14 King street east, and on the first floor with good elevator service, is easily reached.

The dining salon is spacious, prettily decorated in pleasing greens, browns, and greys. It is a grove of potted palms, amid which are arranged tables topped with snowy linen, upon which gleam polished silverware and tableware spick and span. The height of cleanliness gives zest to appeint.

The dining-room and its appurten ances are as clean and careful as watchful eyes and nimble fingers can make them. The cuisine is unsur-

Castle

A MARVELOUS DANCE INSTRUCTION BOOK NOW OFFERED TO ITS READ-

The Toronto World

A CASTLE POSE

The Latest and Newest One-Step

Up to the present moment by far the most popular of all dances is the One Step. There are many reasons for its popularity, the chief being that it can be learned in a very little time by any one, old or young, who is able to walk in time to music-and, in fact, by many who cannot. Another reason is because the music is rag-time. The Waltz is beautiful, the Tango is graceful, the Brazilian Maxixe is unique. One can sit quietly and listen with pleasure to them all; but when a good orchestra plays a "rag" one has simply GOT to move! The One Step is the dance for rag-time music.

> THE ONLY CORRECT WAY TO DANCE THE ONE-STEP IS IN

Readers of THE DAILY WORLD can obtain this book by clipping the Coupon and presenting or mailing it to THE WORLD, 40 Richmond Street West, Toronto, or 151 Main Street East, Hamilton, to-

FUNERAL ON MONDAY

Remains of Dead Official Reach Montreal From Atlantic City

MONTREAL, May 16 .- The body of he late William Wainwright, senior ice-president of the Grand Trunk Railroad, arrived in Montreal this morning from Atlantic City. At the

As a mark of respect to the memory of the late vice-president, an order has been issued by President E. J. Chamberlin that at 2.30 on Monday afternoon every train on the Grand Trunk and Grand Trunk Pacific Railways, from Moncton to Prince Rupert, and from Montreal to Chicago, should come to a standstill for one minute, and that for the same space of time every shop on the system should cease its activities, as a silent memorial to the man who, for over half a century had been identified with the

BANGOR, Me., May 16.—Bangor elected a reform Mayor last March, and already the men who voted him into office are denouncing him. He instituted various reforms that the reformers had never dreamed of, including wholesale cleaning out of slot machines, censorship of public dancing and bothersome regulations conmachines, censorship of public dancing and bothersome regulations concerning the conduct of theatres, and it is now feared that he will employ the police force to enforce the prohibitory liquor law, with which they have not meddled for more than forty years, with the exception of one brief spasm which was quickly discouraged. Just what reforms the reformers expected is not clear, but they don't like the kind the new mayor is giving them.

Can't Please Either Side.

Last year Gov. Hains called the legislature in special session for the purpose of removing from office several sheriffs who had failed to enforce

basement of the court house is filled to the ceiling; also the two fireproof vaults and the quarters formerly occupied by the public library. Not in twenty years has so much liquor been seized as O'Connell has taken in the single year that he has held office, yet the prohibitionists are not satisfied. They expect the sheriff, with five deputies, to make it absolutely impossible to get a drink in Bangor—a condition that never has existed and doubtless never will exist.

BACK YARD IMPROVEMENTS.

The first view of your home should create a feeling of pride in your home surroundings. The condition of your home and yard is an indication of your character. Make your home "show" how much you think of it. Make your farm "look" as well kept and prosperous as it really is.

The most unsightly, inharmonious "eyesores" in the modern Canadian towns and cities, is their ugly board fences. We take great pride in our homes, the style of architecture, the decorations, and the furnishings in side. The front lawn is usually well kept, but it is only a step to backyards, that, except for a shrub or vine here and there, is not unlike a series of pens in a stockyard.

In Toronto, thru the efforts of Parks Commissioner Chambers, the health department, Civic Guild, and Ratepayers' Association, a "clean-up and openup" campaign has been started, and in some sections neighbors are co-operating with each other to tear down the shabby, unsanitary, germ-breeding, old wooden fences, and erecting in their place neat, handsome, ornamental lawn fence.

An artistic fence like this around a house is like an artistic frame around a painting. It's not absolutely necessary, but mighty nearly so. Home improvements of this nature cost so little, the wonder is that people generally have not adopted it. Modern conditions demand such improvements. Ornamental lawn fences in either iron or wire, are the only logical solution of the city backyard problem.

Board fences keep out the smilight and frash air afford a hiding place.

purpose of removing from office several sheriffs who had failed to enforce the prohibitory law to his satisfaction. Among the sheriffs who thus lost their jobs was Maj. Emerson of Penobscot County, and in his place the governor appointed a member of the legislature, J. Fred O'Connell of Milford.

Sheriff O'Connell started right in raiding the liquor dealers and has kept steadily at it ever since; yet now he has been asked to resign because he has not made Bangor dry—something that no sheriff has ever been able to accomplish.

"I don't know what they want," says the sheriff. "When I raid right and left and selze liquor by the carload the liquor dealers curse me and the public denounce me as a ramroder; when any one finds a saloon open and doing husiness under cover the Presbyterian Komen of the Presbyterian Church in Canada. Old dates are revived with fresh pride only to give way to a new one. Glowing chapters of a record of 38 years long are reread, but fade before the glory of the page just opened of the new story. And names, never-te-be-forgotten, of saints nearly all translated, pass while the capable leaders of today are written in indelible memory.

The meaning of it all is this: At one time the world was divided into heathen and Christian, just as it had previously fallen into Jew and Gentile. That was not so long ago. Canada shared the common rule and had only its ecclesiastical problems, plus the heathen Indian of the frontier and the Presbyterian women of the Presbyterian women of the Presbyterian church in Canada. Old dates are revived with fresh pride only to give way to a new one. Glowing chapters of a record of 38 years long are reread, but fade before the glory of the page just opened of the new story. And names, never the just of the page just opened of the new story. And names, never the just of the page just opened of the new story. WORKLESS ARMY MASS ON THE CHAMP DE MARS

Montreal's Unemployed Problem Takes Troublous Turn.

Takes Troublous Turn.

Takes Troublous Turn.

MONTREAL, May 16. — Grave feary are entertained in police and civic circles of an outbreak among the unation of Europe. Hence with miners and mixed races coming in unorganized masses to the country, they presented a claim upon the church, which challenged the exclusive foreign mission service of Presbyterian women. Such was the origin of the youngest society, the W.H.M.S.

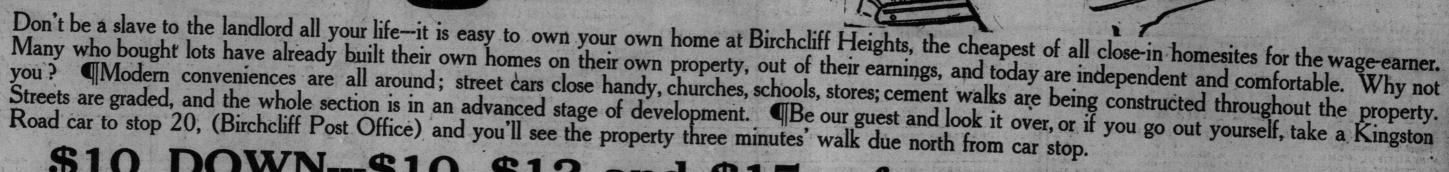

Alongside of the said societies, a principle has been powerfully at work within them. It is the evolution of the idea that there are really no sealed up parcels of mission work. The world is getting too small or close to us to be called foreign, and our homeland has no longer its picket-fences suggestion, but is the public house of all strangers.

May 15. 1914, marks the first stage of this great development. The three independent societies were on that date amalgamated. Two thousand hives of industry have seen a new horizon showing a wider field needing larger hearts and keener intellects. The new constitution will for many a long day be the centre of vision, leaving new gowns, et cetera, as a very dim side issue. And the story of deeds will await an historian to put them in the rapidly increasing volumes of missionary classics.

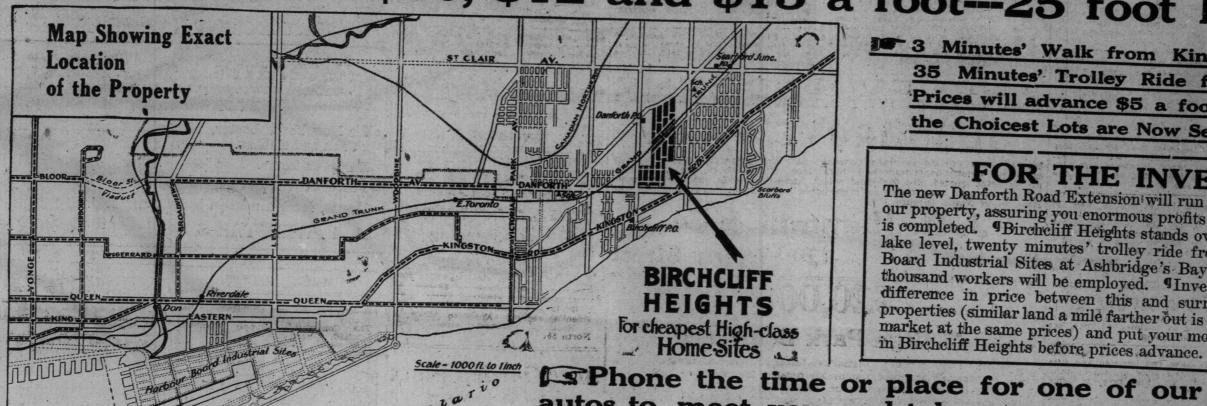

Use Your Rent to Build a Home at

Birchcliff Heights

\$10 DOWN---\$10, \$12 and \$15 a foot---25 foot Frontage

3 Minutes' Walk from Kingston Road Car Stop. 35 Minutes' Trolley Ride from King and Yonge. Prices will advance \$5 a foot in a few weeks, and the Choicest Lots are Now Selling.

FOR THE INVESTOR

The new Danforth Road Extension will run along the south end of our property, assuring you enormous profits as soon as the work is completed. Birchcliff Heights stands over 300 feet above lake level, twenty minutes' trolley ride from the Harbor Board Industrial Sites at Ashbridge's Bay, where fifty thousand workers will be employed. Investigate the difference in price between this and surrounding properties (similar land a mile farther out is on the market at the same prices) and put your money in Birchcliff Heights before prices advance.

BONDLAKE **GARDENS**

Free Lots

Think it over. Think of the pportunities presented to you a ew years back, when the St. Clair avenue district was developing. Think of the prices you could have property at then and compare them with to-day's values. You have the same chance now in "BOND LAKE GARDENS," part of Bond Lake district. Situated between Yonge and Bathurst, and also fronting on Bathurst street, Stop ting on Bathurst street, Stop 57, Metropolitan cars, on Yonge street. To advertise this valstreet. To advertise this valuable property we have decided to give away a couple of hundred lots free. Each lot is 25 feet frontage by 100 feet deep. The only thing that you have to pay is for legal papers and office expenses, namely, \$25, and you will get a free and clear deed. We are not appealing to your imagination, but stating facts. The property is but a very few minutes' walk from street cars; there is a pubstreet cars; there is a pub-lic school on the property; also near the property there are churches, postoffice, stores, and quite a number of houses. That district is building up well and is growing very fast. Don't miss this opportunity. Write, call or phone to IMPERIAL REALTY INVEST-

OSHAWA HASN'T A MAN OUT OF WORK

Every Plant in the Hustling Young Industrial Centre Running Full Time.

RAILWAY FACILITIES

Improved Services Shortly-Past Week Notable One in Town's History.

OSHAWA, May 16-(Special to The Sunday World.)-Times are booming in this centre of industrial activity. in this centre of industrial activity. The McLeughlin carriage and automobile plants are running overtime with the orders recently rushed in. The same is true of the Williams plano factory. All the other plants are making full time. The city officials do not know of a man without work. All the builders have contracts. President Mitchell of the board of trade pect of an important new industry—one for making automobile accessories.

Mr. Mitchell furthers do the second accessories.

Mr. Mitchell further declared that the past week had been one of the most noted in the history of the town and prophesied an era of increasel growth and prosperity.

Three events were outstanding: one the visit of a party of Canadian Pacific Railway officials to inspect the new line and railway station and to size up the possibilities of Oshawa as a manufacturing and therefore a freight centre.

fore a freight centre.

Another event that drew a crowd of spectators was the unloading of the last train of ballast in the town's portion of the Toronto & Eastern Electric Railway.

A third is all way.

A third incident mentioned by Mr Mitchell was the subscription of \$10,000 in fifteen minutes at a meeting of St. George's Anglican congregation toward a new \$50,000 stone church. This sum made a total of \$30,000 from members of the congregation, with a general canvass yet to be made.

Disadvantages Wiped Away.

Speaking of the transformation which the coming of the Canadian Pacific would bring about, Mr. Mitchell said: "For many years we have been under disadvantages. While there have been improvements late years, we are still given scant justice. With three transcontinental lines we shall have much better treatment than when we had only the Grand Trunk. The complaint most general in connection with the text.

when we had only the Grand Trunk. The complaint most general in connection with that road is that the night train from Toronto to Montreal does not stop at Oshawa; it would be a great convenience if our people could take in the evening events of Toronto and return by a train home leaving the city between 10 and 11 o'clock. At present the last train stopping here leaves Toronto at 8.30. No particulars of the stops of the new service to be put on by the Canadian Pacific have yet been furnished by its officials. The board of trade president suggested that it would be a nice thing for the C. P. R. to do, especially when the Dominion parilament was in session, to run a seven-hour service from Toronto to Montreal in the contract of the contract o ment was in session, to run a sevenhour service from Toronto to Ottawa
and from the capital to Toronto, both
ways, every evening. He strongly
supported the view which he had noticed in The Toronto Sunday World,
that such a train with a dining-car,
would be of great value to the manufacturers and other business" men
going to the capital, as they would
certainly be in much better condition
for work after a night's sleep in a
hotel rather than a night in the often
misnamed "sleeper."

misnamed "sleeper."

The presence of the big gangs ballasting the Toronto & Eastern Electric Line had revived interest in that route to Toronto as it promised an hourly service.

Town Clerk Morris said to The World that he regarded conditions in Oshawa as satisfactory in every respect. The growth of the population, which had doubled within five years and was approaching the 9000 mark which had doubled within five years and was approaching the 9000 mark, was phenomenal and had been without any slump or unhealthy boom features. While real estate values had doubled, the prices had not become inflated and rentals had not become excessive. He pointed out that a \$35,000 new school had recently been completed and the increase in the school population had given rise to an agitation for another new school of agitation for another new school of

Mr. Morr's also called attention to the new armories being completed on Simcoe street, facing the city clerk's fice. The building is to be opened.
Hon. Sam Hughes. Minister of Mi litia, on May 25. Processions, speech-es and a grand ball under civic and military auspices, will feature the celebration. The site was furnished by the Town of Oshawa; the building will cost the Dominion government \$50,000.

ment \$50,000.

Improvement of Harbor.

The improvement of the harbor between Oshawa and Whitby by the Dominion at a cost of \$100,000, is the chief new public undertaking started this spring. The ground has been cleared of the old buildings and the old road is being diverted in accordance with the plans for a large area for wharves and buildings. When the new harbor is completed a revival of the lake freight shipping is confidently anticipated.

ly anticipated.

The official opening of the new C.

P. R. line will take place on May 31.

Twin City Advances to 107, Reports Afloat That Some and Other Issues Are Steadily Firm

Saturday closed a week of considerable improvement in the local stock market. Business was of a limited nature, but the support was substantial in all the active stocks, at fractional redugtions from best prices. Twinctity came into more prominence with an advance to 107. Little stock came out on the advance and it is again surmised that an increase in dividend may not be far off.

In the low priced issues Bread was conspicuous, with sales up to 23 7-8. The word is being pussed round that the company is earning 6 per cent. on the common stock and this has brought in some speculative buyers.

C.P.R. closed in London at 191 7-8, but was firmer on Canadian and Amprican exchanges and closed at 192. Brazilian strengthened after an easier opening, but failed to reach Friday's high price.

In the bank stocks Commerce was casier, with offerings at 204 1-2 exdividend.

The market goes into next week with a better undertone than was the case a week ago. but the outside following is still slim.

LONDON'S VIEWS ON THE OUTLOOK

Financial Position Shows Favorable and Unfavorable Influences Struggling

SPECULATORS A WORRY

If Various Problems Are Settled, a Sharp Recovery May Follow

NEW YORK, May 16.—The London correspondent of The Evening Post cables as follows:

The scope of the trouble which overhung our market all last week and which had now been averted, has been exaggerated in many published accounts; but it was sufficiently serious. It concerned not a firm, but an individual, who until recently was partner in a moderately important financial house.

clearing up of the Mexican, Irish and Brazilian problems would mean sharp recovery. But we find it difficult to picture an early and general removal of these obstructive influences.

The money market outlook favors a further moderate rise in rates always supposing your market does not send large amounts of gold to London. Inwhich case there might be a return of considerable ease. It is believed that Russia has been strongly advised to desist from purchasing gold.

Unless it can be demonstrated that your new Banking Act is likely to have a really great effect for the better on American finance, we are likely to continue lethargic about Americans. American finance, we are likely to continue lethargic about Americans. At the bankers' annual assembly last Wednesday, Sir Felix Schuster referred sympathetically to your coming banking changes and expressed the belief that, if successful, they would not only stabilize your home affairs, but would aid in expanding your business abroad. Furthermore, his opinion was that neither your country nor ours has anything to fear from such expansion.

AMERICAN STOCKS HAVE A SETBACK Lindsay in the Saturnia and Montfort grounding cases. "A farce!" said one officer when he learned that the two pilots who were held responsible for the accidents, had been let off with suspension for three months only. Capt. Lindsay has since accepted an appointment as head of the Pilots' Corporation at Quebec. It is said that his position on the wreck commissioners' bench will be filled by Capt. L. A. Demers, formerly of that position, but now harbormaster here.

Speculative Leaders Lost Large Fractions on London

NEW YORK, May 16. - A sharp don registered its effect on prices here at the opening of the market today. Most of the international shares were lower. Steel, Amalgamated, Union Pacific and Reading, the speculative leaders, all lost large fractions. Altho the undertone was heavy, the movement was not uniformly downward, as a few shares, including St. Paul and Canadian Pacific, showed improvement. Reading was slow, and no attempt was made to extend the opening losses. The list stiffened slightly after the first few minutes.

The market closed easy today. Early heaviness, due to the decline of prices in London, was of short duration, but after the losses had been recovered the NEW YORK, May 16.—The statement of the actual condition of clearing house banks and trust companies for the week shows that they hold \$39,706,100 reserve in excess of legal requirements. This is a decrease of \$1,977,550 from last week.

Actual condition: Actual condition: Loans, increase \$22,723,000; specie, increased \$848,000; legal tenders, increase \$2,631,000; net deposits, increase \$26,933,=000; circulation, increase \$243,000; excess lawful reserve, \$29,706,100; decrease \$1,977,550.

after the first few minutes.

The market closed easy today. Early heaviness, due to the decline of prices in London, was of short duration, but after the losses had been recovered the list eased off again, and the session ended with a majority of small declines. The cheerful tone of the weekly trade reviews, good weather conditions for the crops and the favoring investment position disclosed by the ready absorption of bond and not issues supported bullish opinion, and little was accomplished by attempts to sell the market on the initial declines. Absorption of opening and dividend rumors, caused a few sharp advances but the general movement was narrow. Bonds were irregular.

SELLING BY PARIS

MINING MARKET

SOMEWHAT LOWER SOMEWHAT mary of state banks and trust companies in Greater New York not included in clearing house statement: Loans and investments \$568,711,800; gcld \$53,946,800; currency and bank notes \$10,866,300. Total deposits \$686,310,000. HALIFAX, N. S., Mey 16.—The government steamer Minto has been ordered from Charlottetown, P. E. I., to the assistance of over 100 fishing schooner, whose passage thru the Straits of Canso has been blocked by heavy drift ice. The schooners are bound north for balt.

DEPRESSED MARKET

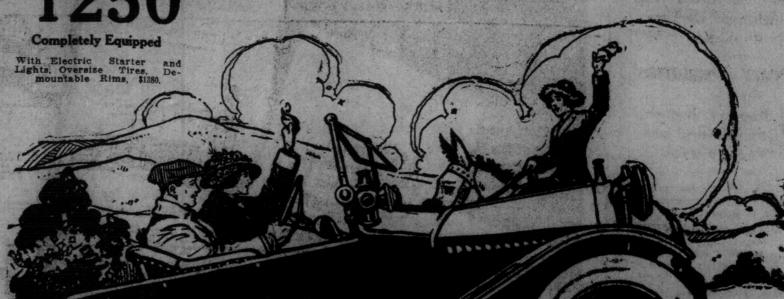

Continued Weakness in Russian Mining and Oil

LONDON, May 16.—The stock marget ended the week quietly and rather depressed. Continued weakness in Russian mining and oil shares and selling by Paris created fears regarding the outcome of the Paris settlement. Consols fell an eighth and Mexican Rails improved early, but later declined with other speculative issues.

American securities opened irregu-lar, and later the list declined under realizing and continental selling. The closing was easy with prices ranging from unchanged to ½ below parity. Money and discount rates were

hupmobile

The Car of the Canadian Family

Next Spring—Not This!

How will you feel next Spring about the car you buy this Spring? That's the one, the all-important question.

Will it wear as a Hupmobile wears, and run as a Hupmobile runs, after twelve months of persistent pounding?

Will the motor be the same sweet-running, mellow motor the Hup longstroke motor is in its second, its third, and its fourth season?

We ask for the purpose of pointing out the marked characteristic that makes people buy Hup after Hup-or use the same Hup, season after season.

Service—Low Cost Service

That characteristic is long-continued, apparently everlasting service - and the consistent

That's the service from which Hupmobile reputation springs; the service that has made the Hupmobile "The Car of the American Family."

That's why Hup owners are our most successful selesmen

And isn't that quality what you must consider, first and last, in any car?

How will a lower price compensate you, a year from now, for a worn, shabby down-at-the heel car, which you are compelled to sell for a song?

How will a neat, natty exterior this Spring compensate you for a broken-down interior next Spring?

Continuous service at a lower cost and a higher price when you want to sell at second hand—that's what makes Hup owners loyal to the car.

Think this Spring of next Spring, think of the one hundred thousandth mile and not the ten thousandth—and your investigation will surely bring you to the choice of the Hupmobile.

MIMICO SCHOOL FOR BOYS SHOULD **BE CLOSED AT ONCE**

Institution Has Lived Too Long Unchanged, Declares J. J. Kelso.

WIFE OUT "MERCER"

Farm for Women Delinquents Should Be Established and Named "Pleasant Valley."

The Mimico school for erring boys should be closed at once, declares J. J. Kelso, Ontario's superintendent over neglected children. In an interview with The Sunday World he tells why this institute is out of date.

"Once a man is publicly branded as a criminal it is almost impossible for him to reform. Many a young fellow has struggled hard, but in vain to get out of the net woven by his own misdeeds, evil associations, an intricate, vigilant, and relentless police and legal system, and a curious gossip-loving public. Just as he almost succeeds in extricating himself some blundering official or companion gives him a jolt and he is in the meshes deeper than ever.

and he is in the meshes deeper than ever.

"In addition to giving a man a bad name, the institution provided by the state for his rehabilitation acquires in time a most unsavory reputation. It may be doing fairly good work with unpromising material, but it is sure to be classed as the community's inferno. 'Sent to the Mercer' means in the estimation of the average citisen that a woman is beyond hope, and has been thrown into a horrible prison from which she will emerge ten times worse than when she went in it is useless to explain that the superintendent is a capable, sympathetic woman, who devotes her life to the work of restoring the unfortunates committed to her care. That is seldom considered. The place has a bad name, and is unanimously condemned anyhow. The term 'Sent to Penetang grew so unsavory that the old reformatory for boys had to be closed, for the lads known to have gone there had no chance when they got out. Altho it is a fine university town, to be 'sent to Kingston' conjures up at once a vision of the cell and the stone-pile that the poetic traveler's guides can never dispel. Auburn, Sing-Sing, Dartmoordo not these names instantly suggest the lock-step, the sullen cropped heads, the guard on the wall with his handy rifle?

Not Mercers But "Pleasant Valleys."

Not Mercers But "Pleasant Valleys."

"It is a grand thing for Ontario as well as for many a poor devil who has made a mistake that the expression Sent to the Central' will soon be forgotten. A new institution starts with a clean record, a new hope, a fresh inspiration, and enthusiasm—in fact, with a well-nigh irresistable appeal to a man to reveal his best nature, and that is one-half the battle in getting back to good citizenship.

back to good citizenship.

"The time has come when 'the Mercer' should be wiped out, and the name forever abandoned. A country home tor training school for women away back in the hills, with a name like 'Pleasant Valley.' or 'Sunny Glen,' or 'Sheltered Nook' would do more for its whilom visitors than all the bolts and able-bodied guards in the world. It is justice, sympathy, kindness that this old world wants, whether in the correctional institution or out of it. And the great curative agencies are the simple things of life: sunshine, fresh air, agreeable occupation, humane treatment. Strive as we may, the ills of human nature will always yield to such medicine.

Leading the Wayward Boy Aright

the ills of human nature will always yield to such medicine.

Leading the Wayward Boy Aright.

"Then there is the wayward boy, for whose welfare and reformation every good citizen should have a deep concern. Here is the momentous problem, the wonderful opportunity—fraught with far more serious consequences to the country than any other issue, and yet, today, the least considered and the most scantily financed social work in the province. If I had my way I would close up the Mimico institution at the earliest possible date, and this without the slightest reflection upon the present management. Twenty—five years is long enough for any reform institution to remain unchanged. 'A Mimico boy, on the same general principle already referred to. The institution is in a rut, it is overcrowded, it is too close to the city. It should be on land fully as attractive as the agricultural college. It should have self—contained close to the city. It should be on land fully as attractive as the agricultural college. It should have self-contained cottages with a father and mother, and not more than ten to twenty boys in each. Separate dining-reoms, separate playgrounds, and, if possible, separate everything. This is the one class that should not be thrown indiscriminately together. Buildings should be substantial, but plain, and all work calculated on the development of each boy's power of observation, and imitation. It is not mental training these boys need, but the moral power that comes thru self help and self development under the guidance of wise leaders who prompt and suggest rather than do.

"This is the problem, the opportuni-

than do.

"This is the problem, the opportunity, the need, the imperative call. Save these boys, and the nation is saved a tremendous loss in citizenship, and the heavy and continuous burden of expense in maintaining life-long criminals and wastrels."

KANSAS FARMERS GET

TWO CROPS OF WHEAT One Man Says They Can Plough

All Their Land Up Now.

HUTCHINSON, Kan.. May 16.—The farmers of the Central Kansas wheat belt could plow up every one of their millions of acres of wheat and be ahead of the game right now.

"We are going to get two crops off our wheat this year," remarked J. C. Richmond. who has 1800 acres of wheat in Edwards County. "We already have realized more from the pasturage of the wheat this winter and spring than our wheat crop made last year. We could plow it all up now and call it a crep. But we have the best prospect cres. But we have the best prospect ahead we've had in years for a big yield

"Pasturage alone has been worth more than all the cost of seeding, la-bor and preparation. The wheat we get now will all be net gain, clear."

THE HOUSEHOLD BRIGADE RACES

This is the famous and aristocratic annual race meeting of the officers of the British army. It is quite a society function and is always graced by several Royal guests, amongst whom attended this year Prince Arthur of Teck, Canada's next Governor-General. The racing is always keen and of a very ssuperior porting spirit, for the honor only of winning cups for their respective regiments. The picture shows the winner, Brampton V, of the 1st Life Guards Challenge Cup, clearing the water jump.

PLATE TRIAL WAS A DISAPPOINTMENT

Saddle on Bee Hive Went Bad, and Horse Was Stopped

Hearts of Oak Finished

the jumps.

Barry Littlefield worked the Seagram string and set the platers down quite a few notches. Froissart and Dark Rosaleen went the full plate route, the fractional times being: One-eighth in .12 2-5, quarter in .25, three-eighths in .38, half in .51 2-5, three-quarters in 1.18, sevenelghths in .131 1-5, mile in 1.45, 1½ in 1.59 finishing the 1½ miles in .212 1-5, This was a particularly good performance, and they were not at all distressed. Vastatio and Sea Lord were also sent the full plate distance—one-eighth in .12 2-5 quarter in .25 3-5, three-eighths in .38, half in .51 3-5, three-eighths in .38, half in .51 3-5, three-eighths in .31 2-5. mile in .148 2-5, quarter in .25, three-eighths in .31 2-5, mile in .148 2-5, like in .158 2-5, and 1½ in 2.13 2-5. Puritan Lass and Rustling worked together, the former going the three-quarters and publed up, while the latter finished the mile—one-eighth in .12 2-5, three-quarters in .25, three-eighths in .37 3-5, half in .51, five-eighths in .37 3-5, half in .51, five-eighths in .39, half-mile in .49 2-5, Golden worked from the barrier a half-mile—one-eighth in .12 2-5, quarter in .25, three-eighths in .39 half-mile in .49 2-5, Golden Jug. Charon and Smithfield, from barrier: One-eighth in .12 2-5, quarter in .25, three-eighths in .37 3-5, three-eighths in .39 half-mile one-eighth in .12 2-5, quarter in .25, three-eighths in .37 3-5, three-eighths in .39 half-mile one-eighth in .12 2-5, quarter in .25, three-eighths in .37 3-5, three-eighths in .39 half-mile one-eighth in .12 2-5, quarter in .25, three-eighths in .37 3-5, three-eighths in .39 half-mile one-eighth in .12 2-5, quarter in .25, three-eighths in .39 half-mile in .49 2-5, Golden .30 half-mile one-eighth in .12 2-5, quarter in .25, three-eighths in .39 half-mile in .49 2-5, Golden .30 half-mile one-eighth in .12 2-5, quarter in .25, three-eighths in .30 half-mile in .49 2-5, Golden .30 half-mile one-eighth in .12 2-5, quarter in .25 half-mile in .49 2-5, Golden .30 half-mile in .49 2-5, Golden .30 half

Henry McDaniel worked the Davies string fast, and they all looked in best of condition after the work. Queen Sain, mille in 1.50; Beware and Fair Annie, mille in 1.54; Calgary and First Sight, mile handily in 1.422-5; Amazement and Sky Rocket, three-quarters in 1.172-5. Recoil and The Usher % in 1.161-5. Gold Bud, the plater, worked the full plate distance alone—half in .511-5, mile in 1.45, and 1% miles in 2.131-5. The most of the others were just given good, stiff gallops.

Eddie White worked the Hendrie string. All of the two-year-olds were sent a half around 52. Slipper Day and Privet Petal worked together the half in .484-5, pulled up, and then galloped out the three-quarter in 1.164-5. Rockspring did three-quarters in 1.16, fighting for his head; Martino, half in .503-5.

Henry Bondy breezed the Lamb contingent: Dead Shot, five-eighths in 1.04 4-5, under a strong pu!!, with about 130 pounds up; Jimmie Gorman, five-eighths in 1.07. Bon Rose was just galloned.

W. P. Fine worked Sir Blaise three-eighths in .37, and finished the three-quarters under restraint in 1.18.

F. J. Greffer breezed Harry Laudenhree-quarters in 1.18 easily. Dr. Doherty breezed a half in .48 1-5.

Pepper Sauce and Cannie Jean breezed a half from the barrier in .52. They worked nicely together.

Harry Giddings worked St. Bass, who seems to be training well, a mile in 1.483-5. Ottero was schooled at the barrier.

Toronto Man's Great

sanded him in first place by a wide margin.

Starting off his first game with three spares. Mac then doubled and after two more spares, finished with four strikes for a 231 count. Keeping up his good strike bowling by bunching five straight strikes to commence the second string, and after making the next two spares, put in three more strikes in a row for a 256 total. With 487 for two games it looked like he had the event clinched. However, McMillan was there, just as strong at the finish, only missing one strike from the fourth frame to the finish of his last game for a 232 count. Altogether he made 21 strikes and 13 spares without an error or a split.

By winning the event McMillan received a gold medal and \$75 prize money, and as the tournament was sanctioned by the A.B.C. it is quite probable he will also receive the gold medal donated annually by that organization for high three games.

This Will Be Leanest Year In the History of Easeball

NEW YORK, May 16 .- John B. Foster, the Giants' genial and glittering secretary, vows and declares that he isn't a pessimist despite the fact that he predicts that the current year will e the leanest one baseball has suffer-

Organized Fold.

As secretary to the National League champions, Foster is pretty well wised up to the inside workings of the game from a financial viewpoint, and it is his opinion that very few chubs will season much ahead of the game. Furthermore, he says, it will not surprise him in the least, if some of the clubs in the smaller leagues will be forced to the wall.

Foster attributes the depression of paseball business to the war scare with Mexico, and backs up his argument with the fact that the public is so intensely interested in the Mexican situation, that it has so far shown very little enthusiasm over the national game. The attendance figures for the games that the Giants have played this season, both at home and on the road. back up Foster's statement. On only a few occasions have the Giants drawn well, the rest of the time, the crowds being small. Comparing present conditions with those of last year, the owners' receipts are far below those of 1913, one of the most prosperous years baseball has known.

"Under present conditions," said Foster, discussing the situation, "I don't the steady of the studion, 'I don't see how many clubs will make money this year. Indications point that way now. It wouldn't surprise me if many clubs lost money before the season is over. I don't think, however, that the big fellows will reel it so much as the little ones. In the first place the the little ones. In the first place, the Federal Deague has caused a lot of trouble for some clubs in organized ball. Many of them had to pay out large sums to keep their stars, and this is what is going to hurt them most

to feel it for the public in most cities won't patronize a loser.

"Then again thefans aren't patronizing baseball the way they did last spring. Our crowds this year are not nearly as large as those of last spring."

To make matters worse, the Federal League will do a lot of harm to clubs affiliated with organized ball. Down in Baltimore, it is reported, the Orioles are having a tough time of it, and the Feds are not doing much better. In Foster's opinion the majors won't feel the presence of the Feds as much as will the International and American Association clubs. He can't see how cities like Kansas City and Indianappers."

Take tor intering holds whim in eighth place, with an average of .315, an increase of eight points and an advance of five places since last week. Two weeks ago he ranked thirty-eighth, with an average of .240. Jackson of Cleveland leads the batters with .407. Then come Crawford, Detroit, .375; Lelivelt, Cleveland, .346; E. Foster, Washington, .337; Milan, Washington, .329; Barry, Philadelphia, .308; Hartzell, New York, .306. Club honors for the week go to Philadelphia, with .264, with Detroit next, with .260. Blackburn of Chicago leads the base-stealers, with 10. see how

John B. Foster Says Giants already are anxious to sell their franchise. Several other owners also are Are Doing Poorest Business said to be sorry that they ever put on Record—Baltimore Is receipts haven't been as large as expected. Foster says that baseball is Hard Hit—Look for Feds in period, and that instead of progressing as it has for the past few years, it will be wrecked and that the owners will have to begin all ever again to build it up.

It is my epinion, however, that with-

in a year or so, organized basebal will still be organized baseball. The Federal League, very much alive will be amalgamated with other leagues. There'll be no more baseball war, Probably the circuits will be enlarged to take in twelve clubs. The backers of the Federal League are all business men. They have put up great sums of money, building ball parks and paying increased salaries to players. They are going to protect their investment. If the "Mexican war," or war scare, keeps people away from ball parks it will burt the organized baseball people, who have their main investment in base-ball, more than the Federal League backers, who have other interests working for them, and are taking up baseball as an outlet for superfluous

capital. The players are the ones who need bably as soon as the various magnates ping off of superfluous expense. And, as there'll be no competition for piayers. prices will take a flop. We'll go back to the days when the "\$10,000 beauty" was popularly believed to be merely the

PAR VALUE \$5 EACH ALL STOCK COMMON

This company owns and holds clear deeds for twelve hundred and fifty feet of Welland land, on which it is proposed to build workingmen's homes. It is also the intention to build on Dufferin Street, Toronto, and other close-in localities. The directorate is composed of men who are thoroughly acquainted with present and past conditions and future possibilities, and are conversant with the building trade in all its branches. Advice is being secured from Toronto's foremost architect, and building operations will be undertaken on an extended scale. To the investor the opportunity is here presented to ally your money with our money, plus the experience of this company. Sixteen thousand dollars has already been subscribed. Twenty thousand is offered for sale in allotments of \$25 and up. Send for full particulars.

BUILDING OPERATIONS COMMENCE AS SOON AS ARRANGEMENTS ARE COMPLETED

SEND FOR FULL PARTICULARS

Sixteen Canadian land companies in the To successfully handle the projects we past three months have declared and paid have in hand, additional capital is requirwere over 135 per cent., and one reached 300 per cent. It is proposed to operate but this announcement is made to make carefully and safely, with the double object of earning large profits consistent with the very best security. With the experience and ability of an economical management, substantial returns should be expected within a very short time.

dividends averaging 125 per cent. Nine ed. It is not thought advisable to spend a large appropriation to sell this stock, known our proposition to any seeking "safety first" with dividends attendant. Toronto needs 10,000 homes-Welland needs 700 homes. We propose to furnish some of these homes, and would like to tell you more about our proposition.

International Boxing

Tourney This Month

The Riverside Athletic Club have been granted a sanction to hold an open international boxing to the last of this month in the Arena. The club propose to bring the best amateurs from Boston, New York, Cleveland, Hann from boxed. The Riverside boxers are asked to report at the club on Monday right.

I was reading an article the other day by a local fistic expert, in which the day and a dvanced that Ritchie will hardly consent to a ten round bout with Welsh, should the latter groved several years ago, when he had had little experience in the ring, that he was capable of siving Freddy a hard buttle from start to finish of their twenty round bout. Therefore, it is only natural time ought to be able to take care of himself, even in a short bout with the great it may be capet to see Welsh.

The Riverside Athletic Club have been granted a sanction to hold an open international boxing tournament two alphs to see Welsh make a runaway sure-ning of it in a short bout, should bear in mind that in Ritchie he will be able to take care of the last of this month in the Arena. The club propose to bring the best amateurs from Boston, New York, Cleveland, Hann in from Boston, New York, Cleveland, Hann in from Boston, New York, Cleveland, Hann in find that in Ritchie he will be are all a hard and scientific hitter.

Ritchie will hardly consent to a ten from the ignominy of a clean knock-out, when the chirch the third round saved Cross from the inpominy of a clean knock-out, when the gening to the hear the third round saved Cross from the ignominy of a clean knock-out, when the gening to make the show it as a more polished per forment regions the heart to finish of their twenty round hout the leaver proved several years ago, when he had believe mery round hout between the time I do not believe the is made of the same time I do not believe the transition of a clever boxer ago when he had better from the ignominy of a clean knock-out, whe

By James J. Corbeta.

Former Heavyweight Champion of the World.

NEW YORK, May 16.—(Special to The Sunday World).—Jim Tywford, a veteran hand at the game, is opening a new boxing club at Ulmer Park, a Brooklyn suburb near Coney Island. Tywford will stage a splendid card for his opening attraction with Freddy Welsh and Jack Britton in the star parts. Probably a better matched pair could hardly be found unless Packey McFarland was to be substituted for the clever Britton.

Boxing fans are favorably impressed with Welsh's business-like methods of creating a demand for a bout between Ritchie and himself. He surely is going the right way about it to land the match. In the last few months the English champion has disposed of two of the leading aspirants of the lightweight division, in the persons of Joe Rivers and Leach Cross, and a clean cut victory over Britton will establish his rights to a match with Ritchie beyond all question.

his eligibility for the match Willie can be depended upon to "sign the papers" for the promoter who comes to the front with the highest bid.

Welsh Polished Performer.

I was reading an article the other day by a local fistic expert, in which the opinion was advanced that the opinion was advanced that Ritchie will hardly consent to a ten from the ignominy of a clean knock.

An Automobile slogan that's eight years old and still true

"No Hill Too Steep—No Sand Too Deep"

A WAY back in 1905—which really is "away back" in automobile development-the Jackson was as sturdy as the Jackson or any other high-grade; car of today. It had a two-cylinder motor that was a wonder for power. Wherever the car was put in service, it conquered the hills and laughed at the roads. It went everywhere it was asked to go.

So we said: "No hill too steep, no sand too deep." That was the truth eight years ago, and that's the truth today. The Jackson has power to spare.

weteran, his debut ante-dating that of Weish, who has been boxing nine years, but he can still go ten rounds at a remarkably fast pace. And Britton is not so very far behind Freddy in the matter of science as rated in

Advices from Sydney indicate that the present crop of Australian boxers is not of a higher grade than it has been at any tipre in the past decade. The American boxers who went there last winter have about cleaned up cverything in sight, and the only real opposition they encountered was from opposition they encountered was from one another,

Americans Doing Well.
Young Saylor, the Indianapolis lightweight, who was badly beaten by Jack Britton and several others on this side, is a regular bear-cat among the Australian light and welterweights. So far Saylor has won something like six

or seven battles, and has knocked out Hughey Mehegan, the lightweight champion, and Herb McCoy, the sec-ond best boy in the Antipodes. Harry Stone, a local welter who was not considered much here, was a sensation in Australia. And Eddie McGoorty had an easy time of it in his battles with the natives. Eddie's toughest fight was with Jeff Smith, a New Jersey boy, and detailed accounts of the battle indicate that the referee's decision favoring McGoorty was de-cidedly unpopular. McGoorty, I am informed, is on his way back to America, and Smith remains to tackle Jimmy Clabby the latter part of this month. I rather fancy that Clabby will not have much trouble outpointing Smith, unless Jeff has improved greatly over the form he showed at

There was a time, not so long ago, that Australian boxers were rated

NEWS OF THE WEEK OF BOYS' DOMINION

them "to play the game like men."
In this connection the act to govern athletes passed by the boys' dominion parliament shows that the boys themselves have the right ideals, and under

proper conditions will put those ideals into operation.

Under the heading of "The Athletic Code of Morals for the Boys' Dominion," the act says that all playing rules should be regarded as agreements between gentlemen and that stealing advantage in a game is to be regarded as any other kind of theft. Visiting teams are to be treated as honored guests, no unfair advantage to be taken of officials, players on rules; official decisions to be abided by, even when they seem unfair; gentlemanly conduct to be displayed thruout even when opponent's conduct is ungentlemanly or unfair; officers and opponents to be regarded as honest in intention, but when opponents are not gentlemen or officers dishonest, or incompetent, future relationships to be avoided. The act also makes gamb-ling disorderly conduct use of shores. ded. The act also makes gamb-disorderly conduct, use of tobacco profane language, punishable nces. The boys' parliament, hav-enacted such legislation, will be sted in enforcing it by the offi-

cials of the Boys' Dominion League.

Boys' Dominion League (sector of the Boys' Union Leagues). It is the policy of the Boys' Union Leagues. It is the policy of the Dominion and of the Boys' Dominion Exhibition Association held their annual banquet Friday night. The guests of the evening were H. G. Hammond, prov. secretary leagues, to provide clean, healthy takenes, to provide clean, healthy takenes. bition than that of last year. Eight thousand prize lists are being issued, and may be had by writing the secretary or phoning Ade 61.

The Hundred Dollar Club will hold their second monthly supper on Monday night, 6.30 to 7.30.

The Collectors' Club will meet Tuesday night at 8 p.m. An address on stamps and stamp collecting will be followed by a stamp exchange. All boys interested are invited to attend.

Red Sox—will never play ball again.
At least that is the inside information.
Wagner is said to be permanently
crippled, either by chronic rheumatism or some other aliment which
has bent the right forearm so that he
can neither grasp nor throw a ball.

Wagner's superb defensive work
aided the Red Sox to win the 1912
world's series with the Glants. Wagner gained his first experience as a
semi-pro in the Bronx, and also was a
member of the Glants before John McGraw took hold of them. When the
Glants turned him loose Wagner drifted to the Newark club. He made
rapid progress there, and it was not
long before the Red Sox purchased
his release. Wagner quickly won his
spurs in Boston, where he became one
of the greatest favorites that ever
wore a Hub uniform.

Wagner's arm began to bother him
last season, yet he took part in 105
games. When he arrived at Hot
Springs, Ark., he found that his arm
was practically useless. The baths did
not help him and several specialists
could do nothing. The arm was placed
in a plaster cast, which was recently
removed, with the result that Wagner discovered that his case was hopeless. He will draw his salary in full,
however, as President Lannin believes
in rewarding him for past services.

conds. Dexter Girl, by the same sire, has been a mile in 2.32, last 1-2' in 1.14. This pair look particularly promising. Consequence was gelded just about five weeks, and has not had as stiff work as he woud have had otherwise, but when ready he will make them all step to beat him.

F. Shakett, of Fort William, has a string of five. Alfrit C., has not stepped very fast altho the fastest horse in the string, he is going slow with his best mile in 2.40, last half in 1.10. New Books :-:

THE STRONG HEART.

Heroine, Whose Strength of Character Keeps Her Safe in Trying Places.

HAT the possession of money, or tatics of people, is the conclusion to

be drawn from reading this story. Two women-one the wife of a clerk the other the wife of a lord. are each drawn as of a selfish, sordid narrow-minded disposition - both seemingly thinking only of her own position and how to make all things work together for her own selfish One has a daughter-the heroine of the story. The other has a son, who eventually marries the heroine. Two narratives run concurrently with separate characters. Each deals with life in a different sphere, but with

a strong likeness in the characteristics of the actors.

Barbara Murray, possesses the "Strong Heart." which brings her safely thru the real temptations which assail her as typewriter in a man's office, and the lesser ones (strange to say) to be incurred as a harmaid in a public house.

armaid in a public house.

A real suffragette plays a part in the story—even to assaulting a policeman and being arrested and fined. The suffragette gets over her mania, when thru a marriage bureau she secures a husband. The author hints that this is the proper cure for

similar cases.

Barbara finally meets Lady Gregory's son, and the two narratives merge. How Barbara overcame the deeply-rooted prejudices of her mother-in-law is of such a startling and unexpected character as to amaze the reader as much as it did Lord Gregory. Without approving of Lord Gregory. Without approving of the climax of the story, we must give the author credit for the originality of the idea. (Bell & Cockburn, Pub-lishers). W. McK.

THE RECONNAISANCE.

South African Mounted Policeman as Heir to British Title, and Hero of Adventurous Love Story.

THE Reconnaissance." tells the story of a young man who found himself, or rather weighed himself and discovered just where he was "wanting." In it a woman also realizes that romance is but it is sometimes dangerous for a girl to expect too much of it from the every-day world.

The main feautre in the book is the feat performed by the man. Mr. Leslie, while a Protectorate Frontier Mountd Policeman in South Africa. The natives had been causing a lot of trouble, and one night Leslie lost his horses and guns while out with a sergeant, whom the natives had wounded in the knee rendering him unable to walk. Rather than face the veldt steeped in darkness, and alive with hostile blacks, Leslie refused to go on alone to Fort Derby for assistgo on alone to Fort Derby for assist-ance. His main reason was fear of the awful lonliness of the veldt with which he was then, but little ac-quainted. He took the only alter-native and carried the sergeant on his back, traveling by night and hid-ing by day, until they reached the P.F.M.P. Camp at Macteali, totally exhausted.

exhausted. News was awaiting the sergeant that he had come into Lord Dane-borough's estates and title, and when both were well enough to travel, he took Troopr Leslie with him to Italy and then to England. In Italy, Leslie met the woman in the case who fell in love with his romantic character, the he was many years her junior. Leslie received the Victoria Cross for saving th sergeant's life, but at first he had many misgivings about keep-ing it because fear had inspired his bravery. However, he had found his failing.

It is a good story, and if the reader likes adventure, the first few chapters give an excellent description of the conditions that existed in South Africa before the war, but he may be rather disappointed when transferred early in the book to Italy and England to enjoy a quiet little love story, where no real adventures are related, Gordon Gardiner is the nor, and McMillan Co., the pub-

Stirring Adventure Story of India in Mutiny Days.

UNG HO! is one of the most entertaining books we have read this season. The scene is laid in India at the time of the mutiny. The atmosphere of the East is well maintained thrucut the whole story, and after the first chapter one settles down to read the book with the happy conviction that the author is well conversant with his subject. The fact is evident that he has a story to tell and intends to set about it at once. Even if one so wished, it would be difficult to tell the story in a few words. The book is crammed full of incident; there are no long descriptions, no wearisome monologs. Plot and bye-plot are so interwoven as to make the whole somewhat complex, but none the less interesting.

Prince Jaimihr, the brother of the reigning Maharajah of Howrah, desires the throne, and plans to make Rosemary McClean, the missionary's beautiful daughter his Maharanee, Mahommed Gunga, a particularly fine character does his best to protect her and her father from the

Prince.

The arrival of young Ralph Cunningham brings great hope and joy to the heart of Gunga. His father, Colonel Cunningham, had been a friend to the Rajputs and his memory remained with them as one to be honored.

"Cunningham-bahadur!" show us such another man as he was, and I and "Cunningham-bahadur!" show us such another man as he was and I and mine will ride at his back!" When Ralph, proven by difficult tests, showed himself to be such another, the Rajputs kept their promise.

The whole book is well written, but the capture of Jaimihr at Alwa's fortress, and his subsequent escape, is a piece of work that calls for special admiration. No words are wasted and the result of the consiseness, is a pleasingly vivid picture. The love story, without which would scarcely be complete, is rather felt than expressed. One knows it is there, but the author says very little about it. This fact, which might prove disappointing in some novels, admirably fits in with the scheme of this one.

For a stery of enthralling interest, full of adventure and excitement, we can recommend this book most heartily. Rung Ho! by Talbot Mundy. (Musson Book Co., Ltd, Toronto)

CURING CHRISTOPHER.

Or How to Treat Husbands Afflicted With the "Actress Mania." PINHE theme of this novel is the infatuation of a very re-spectable, middle-class Eng-

infatuation of a very respectable, middle-class Englishman, of very ordinary intellect Christopher Brown, by name, for a decidedly attractive opera singer. It happened while Christopher's wife was spending a couple of months at the seaside and he was living at his club. Mrs. Brown is pretty, a most exemplary housekeeper, a devoted wife and mother and, of course, when she returns Christopher finds it difficult to be a model husband and a passionately devoted lover to two different women in two different places at one and the same time. His strange behaviour causes his wife to fear that he is losing his mind and, when he comes home at 2 a.m. in a taxi with a cut head and gives no reason for it save a lapse of memory, she knows her worst fears are realized. At once medical aid is secured and a keeper installed. Well, if you want to know how it turns out just read the book yourself. It is well worth it. The humor is decidedly bright and clever all the way thru, very much like that of another English author, W. W. Jacobs, whose "Salthaven" is considered by some the best continued humor ever written. "Curing Christopher" certainly makes a good tonic for weariness. If the cure depicted were administered to every married man who is afflicted with the "actress mania" that disease might, in time, become comparatively rare.

There are, besides, two interest-

comparatively rare.

There are, besides, two interesting sidelights—a man's frank confession in regard to his disinclination to assume the bonds of matrimony and the methods of Christian Science as they create the second mony and the methods of Christian Science, as they are very apt to be pursued by their devotees. Both also given with a twang of humor that is irresistable. On your next holiday read a copy of "Curing holiday read a copy of "Curing Christopher," by Mrs. Horace Tremlett. Bell and Cockburn, publishers, Toronto.—A. C.

EDITEDBY DONALD G. FRENCH Stories of Famous Masterpieces

Author of "Omar Khayyam" And Baby's Bread-and-Milk

Present Occupant of Fitzgerald's Former Home at Woodbridge Tells a New Story of Him-How He Told on a Nurse Who Ate the Food of Her Infant Charge-Rose From Omar Khayyam's Grave Grows on That of His Translator-Navvy-Poet and Bernard Shaw.

By HAYDEN CHURCH

In the little Suffolk town where the translator of "Omar Khayyam" first saw the light and spent the greater part of his days, his name is held in real affection and there are few people there who cannot tell a visitor all about him. This district of East Anglia is rich in its association with the great men of the past. Only twelve miles to the south of Woodbridge lies the Constable country, where the painter chose the scenes that he immortalized—often exchanging the products of his art for a receipted tradesman's account! But Fitzgerald's pen is far better known there than Constable's brush, and many of the humble folk whose cottages dot the pleasant countryside cherish as their most precious possession a copy of "Omar," tho, so far as their understanding of Fitzgerald's masterpiece is concerned, it might as well be printed in the original Persian.

The recent discovery of four previously unpublished "Omar" quatrains aroused, of course, no end of interest in this country—the equally, of course, there have been no end of literary bigwigs with half the alphabet after their names to denounce them as spurious, and this discovery led me to take advantage of the recent Easter heliday to pay a first visit to Fitzgerald's birth-place. N the little Suffolk town where the translator of "Omar Khay-yam" first saw the light and little supper.

Trinity ale, and he would get some oysters in that we might have a little supper.

Sleepy Little Rural Town.

y CODBRIDGE, a "sleepy,"

typically rure! typically rural and typically beautiful town of some four thousand inhabitants, is slightly over two hours' journey from London. During Fitzgerald's lifetime there he was unknown to the outside world, tho Thackeray and Tennyson admired and appreciated his work to the full, but since his death many buildings in the village have become a Mecca for other literary pilgrims. A tablet on the uninteresting looking stone house uninteresting looking stone house on the market hill records that the poet lodged there, while a winding lane will lead you past to Boulge Churchyard, where he gies under Churchyard, where he lies under the shade of a rose tree—grown from the very rose tree that blooms above Omar Khayyam's resting place in far away Naishapur. On your way you will pass Farlingaye Hall—that most beautiful of old Suffolk farmhouses, which was tenanted by Fitzgerald for seven years. Nearby is Bredfield House, the poet's birthplace, and Little Grange, his last home.

Grange, his last home.

Fortunately for the traveler who loves his "Omar" there remains alive in Woodbridge a life-long friend of Fitzgerald in the person of John Loder, a local magistrate and man of substance, who is seldom weary of talking of the poet. Incidentally Loder, who is \$8, is one of the most wenderful old men living, and celebrated his \$6th birthday by going for a swim in the North Sea.

. . . Boyhood Days With Fitzgerald. WAS only fourteen when

first met Fitzgerald," he said. "He used to walk over from
Boulge Cottage with his friend,
Mr. Crabbe—the son of the poet—
and I would listen to him talking to my father. As I grew up we be-came more and more intimate, and latterly I visited him three times a latterly I visited him three times a week and more. Fitzgerald never saw newspapers, and it was thru me that he learned of the doings of the outside world. One day I read in the press that Thackeray was dead. In the evening I went down to the 'Quarter Deck,' near the almshouses, which was his favorite walk. I told him that his friend had passed away, and then left him to his thoughts, for it was obvious that the sad tidings came as a great blow to him. Tall and dark, Fitzgerald resembled a Spanish grandee as he paced along, wearing a red boating cloak. Perhaps he had Spanish blood in him—4t was a fancy of mine that he was descended from someone who was wrecked in from someone who was wrecked in

the Armada. "He was comfortably situated. He wrote entirely for his own gratification, and he did not want to be bothered by the outside world. His work was little appreciated while he was alive. I think he was disappointed with the reception of the few copies he had printed of the 'Omar.' Indeed, he never breathed the word 'Omar' to me. For all that he was always writing, and used temporarily to blind himself with

ITZGERALD was a very rebear being spoken to in the street. Of an extremely outspoken nature, he once snubbed Tennyson. He did not like something that the latter wrote, so he suggested that Tennyson should compose something more suited to his pen! If there was one person that he really liked it was Posh, the boatman, who I believe, still living. Posh was to him a little god, and he was ex-tremely fond of the river, where he would cruise in his yacht Scandal. Once while reading Tacitus on board he became engrossed in the classic that he got knocked overboard by the boom. However, he escaped with a ducking. "He was a most simple-living man, and ate practically nothing. Indeed, an occasional bun was

ittle supper.

"As for his other literary activities he once intended to publish a revised version of 'Suffolk Words and Phrases,' but nothing ever came of his idea. He was a painstaking man, and while the 'Little Grange' was being built he kept continually altering the design. First he had one thing done, and then another; finally, perhaps, rejecting both. When the bill for the work came in he made a great fuss about the cost. Afterwards he always called the builder 'the little bird with the long bill.'"

Here, by the way, is an unpub-

Here, by the way, is an unpublished anecdote which shows that Fitzgerald was both sympathetic and practical. It is told by Miss Welton who now lives at Farlingaye

"Once my parents lived opposite to the house on the Market Hill where he lodged," she said. "Looking out of his window one day, he watched the nurse feeding a sister of mine in the nursery. Instead of giving the bread and milk to the baby the nurse was liberally helping herself to spoonfuls of the food. Fitzgerald was exceedingly annoyed, and sent the following message to my mother: I think Mrs. Welton ought to know that the nurse is eating the baby's bread and milk."

Bernard the Blunt. All the talk about Bernard Shaw anent his use, in his new play, of a

generally tabooed adjective, reminds me of an anecdote of Shaw that is told me by Patrick Magill, the other day. Magill, of course, is the exnavvy who blossomed out as a poet so successfully, that he first was offered a berth on a London newspaper, and later became assistant librarian of the Royal Chapter Library at Windsor, where he still remains. Meanwhile his recently published first novel is generally admitted to be great stuff. One of his newspaper's first assignments was to get an interview with Shaw. As he entered the great man's presence G. B. S., glared at him with great severity.

great severity.

"Tell me Magill," he demanded,
"why did you leave honest useful
work like navvying to be on the

Poetry Competition

Corrymeela (Moira O'Neill).

Prize Answer.

I OMESICK, oh, so homesick, is the countryman of Erin whom Moira O'Neill pictures in the above-named poem as toiling in England, but longing with all his heart for his native Corrymeela.

Everything in his new surroundings is so strange and different so lonesomely unfamiliar. The deep dumbriver, the prospering, well-clad people—the serious care-charged air of things stand out in aching contrast to the home river, to the picturesque poverty of his home people, to the care-free air of them all. There are people around him everywhere in this strange land, yet he is lonely and alone. These people do not understand him—do not speak his language of affection—do not know the spontaneity to which he is accustomed. His heart cries for familiar scenes, for sympathy, for companionship, for the loving understanding of his own countrywomen, and so he hungers for Corrymeela, where he has ever known and enand so he hungers for Corrymeela, where he has ever known and en-

where he has ever known and enjoyed these things.

Corrymeela is a wonderful little poem. Into its few short stanzas all the aching sensations of loneliness and homesickness have, been crowded. At first reading we wonder how this has been accomplished, but reading the poem again we find the closing line of every stanza brings us back alwayc to Corrymeela, and contrasting it with his English surroundings, we begin to realize and to understand the poor Irishman's gnawing homesickness.—K. O'N.

Winners of No. 4.

Winners of No. 4.

THE first prize in the Moira O'Neill competition (Corrymeela), was won by a namesake, Miss Katherine O'Neill, of Toronto; second prize, by Miss Lilian Leveridge, Carrying Place, Ont. The number of answers received shows that interest in the competition is increasing. Very many of the answers were excellent, but most contestants failed to answer the question as to "how" the loneliness and homesickness was emphasized.

NO. 7 COMPETITION ON W. B. YEATS.

Give briefly your explanation of the meaning of this poem: That the Night Come. She lived in storm and strife— Her soul had such desire For what proud death may bri For what proud death may bri
That it could not endure
The common good of life,
But lived as it were a king
That packed his marriage day
With banneret and pennon,
Trumpet and kettledrum,
And the outrageous cannon,
To bundle time away
That the night come.

First water a convent of "The

11. Coleridge's Ancient Mariner

AUNT, wild-eyed, driven by the resistless force of conscience that compals him to recite crime, the figure of the "Ancient Mariner," is one of the striking creations of English literature. That such a character should have originated from a suggestion by Wordsworth seems out of keeping with our conception of him as the high priest of simple nature. The genesis of the poem is, however, explained thus: Wordsworth and Coleridge, who were close friends and companions, planned in 1797 a little waiking tour by way of holiday, and to raise the modest sum required for their expenses, they decided to write in collaboration a poem, to be sent to a magazine. Coleridge, who was imaginative to a high degree, took as his theme the idea of a person laboring under a curse for the commission of some crime. This came to him from a dream related by one of his friends. Wordsworth, who had been reading "Shelvocke's Voyages," suggested that the here of the poem should be a seaman, and that his crime should be the shooting of an albatross. With the exception of a line here and there in the first stanzas, and the idea of the navigation of the ship by the dead men, Wordsworth contributed nothing further to the poem, Coleridge, being quite in his element in matters pertaining to the supermatural.

matic by representing the story as being told by the mariner to a guest whom he has delayed on the way to a wedding feast. There are, indeed, three gallants on their way to the ceremony, when almost at the door, they are accosted by the "ancient mariner with long grey beard and glittering eye." He singles out one gallant who is next of kin to the bridegroom, the guest protests that he cannot stay, he can hear even now the merry din of the guests; he must be going. Rudely he shakes off the skinny hand. "Hold-off! unhand me, grey-beard loon." The hand is dropped, but that compelling, glittering eye holds the unwilling wedding-guest entranced, and he sinks down on nearby stone and "listens like a three-years' child." HE poem is made strongly dra-

The ship was cheered, the harbor cleared—
Merrily did we drop
Below the kirk, below the hill,
Below the lighthouse top.

Thus begins the recital of the voyage, and altho the wedding-guest hears the music of the wedding but must listen while the mariner carries along his acount of the progress of the ship towards the South Polar regions and norwthward

At length did cross an Albatross— Thru the fog it came— As if it had been a Christian soul, We halled it in God's name.

The sailors hailed the bird as a good omen, and it followed the vessel day after day until, in a moment of reckless murderous impulse the mariner takes his cross-bow and shoots the albatross.

QOG comes down and envelops the ship. The sailors blame the mariner for the killing of the albatross, believing that it has brought them lil-luck, but when the fog lifts they fickle-mindedly commend the shooting, "Twas right they say, such birds to slay, that bring the fog and mist."

Soon after this the vessel approached the equator, and becomes becalmed. The crime of shooting of the albatross is bringing its revenge. The horrors of this part of the voyage are pictured with powerful realism by the poet:

Day after day, day after day,
We stuck, nor breath, nor motion;
As idle as a painted ship
Upon a painted ocean.

Water, water, everywhere, And all the boards did shrink;

The very deep did rot! O Christ!
That ever this should be!
Yea, slimy things did crawl with
legs

About, about in reel and rout
The death-fires danced at night;
The water, like a witch's oils,
Burnt green, then blue, then

Burnt green, then blue, then white.

"With throats unslacked, with black lips baked," the crew imagine they see a vessel approach. It is phantom ship, sailing without a breeze and manned by two spectres, who play at dice for the possession of the crew. Death wins all, but the mariner, and he passes to the other spectre, "the nightmare life-indeath." Down upon the deck fall the lifeless bodies of the entire crew, but the mariner is left to expiate his crime by a living death. He is, indeed, being punished now; the sailors who would throw the whole guilt of the crime upon him had fastened the dead body of the bird about his neck, where it remains a constant reminder of his sin. And even as each shipmate falls dying to the deck, he "turns his face with a ghastly pang" and curses "with his eye" the man whom he blames for all his misfortune.

Alone, alone, all, all alone.

Alone, alone, all, all alone.

Alone on a wide wide sea;

And gever a caint teek pity on My soul in asony.

"HE terror—inspiring recital of the sufferings of the mariner strikes fear into the wedding suest and he cannot believe but that he is listening to a spirit from the realms of the supernatural. "Fear not, fear not thou wedding-suest: This body dropt not down." soothes the mariner, but he must needs recite the continuing punishment; "seven days and seven nights" he saw that curse from the eyes of the dead men. But in the midst of his suffering as he watches the living creatures of the sea. a change comes over him, "a spring of love sushes from his heart." and the spell of punishment begins to loosen. He has repented; he can pray and the albatross falls from his neck and sinks like lead into the sea.

He sleeps. When he awakes, he finds that it has rained, and he is refreshed. Spirits from above cries.

He sleeps. When he awakes, he finds that it has rained, and he is refreshed. Spirits from above enter the bodies of the crew and the ship is standing upon the deck, stunning him with that awful curse—but the speil now snaps, the curse is finally explated, and the mariner finds himself in his home harbor. The vessel was suddenly wrecked, but the mariner was rescued by the pilot and the hermit of the wood. He beseeches the hermit to shrive him from his sins, and until he has related his story, "a wcilul agony wrenches his frame." Then fails the penance of his fife:

Since then, at an uncertain hour,
That agony returns:
And till my ghastly tale is told,
This heart within me burns.
I pass, like night, from land te
land:

I have strange power of speech; The moment that his face I see. I know the man that must hear

me:
To him my tale I teach.
And with the wedding-guest he leaves this lesson, which is undoubtedly the moral lesson of the poem:
He prayed best who loveth best All things both great and small;
For the dear God who loveth us,
He made and loveth all.

Good Illustrations.

Catsup--Catchup--Ketchup -:- By Dr. Helen MacMurchy

Bulletin No. 275 from the Laboratory of the Inland Revenue Department at Ottawa gives the three spellings. This presumably makes them all official and so we may take our choice. The three all saem to have the same meaning—"a little sup."

This is not the first time that Ketchup has been made the subject of a department bulletin. Seven years ago the late Chief Analyst, Mr. T. Mac-Farlane issued Bulletin No. 120 on the same subject, and a paragraph from it is quoted in the present pub-

Adulteration is legally defined in the act. Food is deemed to be adulterated if it is so colored or coated or polished or powdered that damage is concealed, or that it is made to appear better or of greater value than it really to than it really is.

FETCHUP is, of course, more properly termed a condiment than a food, but it has several characteristics that make it of importance. Its almost universal use, its preparation from native fruit, its undoubted value in increasing appetite and so promoting digestion (thru the so-called "appetite-juice." to which the attention of physiologists and of the modical profession conwhich the attention of physiologists and of the medical profession generally was called by Pavloff) all mark it out as one of the most important of accessory foods. The chief importance attached to the study of ketchup so far as health is concerned, is of course, connected with the question of purity.

So far as the fruit is concerned, Canadian tomatoes are conteinly

Canadian tomatoes are certainly abundant, cheap and of good quality, especially now that gardeners and farmers have begun to recognize the value of thinking a slittle about the size and variety of the fruit and its suitability and otherwise for table use. When the fruit is sound, fresh

when the fruit is out of season and the pulp is kept in stock too long, and may be bought very cheaply or may be really worthless, that unscripulous persons are tempted to add preservatives in order to ar-rest further decay and coloring matter to produce an imitation of the attractive color of fresh, red, ripe fruit. There are two ways of finding out these wrong-doers who have yielded to such temptations. One is to calculate the number of bacteria found in each cubic centimeter. The other is to examine a small quantity of the ketchup spread out very thin on a microscopic slide for signs of yeats or moulds or their spores, in-visible to the naked eye. The bulletin is based upon such investiga-tions as these made of the seventy samples of ketchups bought by our Dominion food inspectors from deal-ers in Halifax. N.S., to Victoria. B.C., and many places between. The results in many cases are good, but not in all. There were specimens in which 35 per cent. of the microscopic fields examined showed yeasts or moulds or both, and there were even moulds or both, and there were even specimens in which 50 per cent. of the fields under the microscope showed these signs of putridity and decay. Moreover, there was one specimen of ketchup among the seventy samples which yielded no less than 36,000,000 bacteria in one cubic centimeter of ketchup. This addition to one's slice of cold meat would be no improvement! The cold meat would be better without it.

HIS is, indeed, the fourth time that Canadian ketchup has

to the presence of preservatives we do not seem to be improving, as the following tabular statement shows:

Per Cent.

Another interesting point is the character of the preservative. Formerly salicylic acid and benzoic acid were both used, but in the 1914 butletin the preservative reported was

letin the preservative reported was benzoic acid only. This shows that benzoic acid only. This shows that placed salicylic acid as a preservative.

N the other hand seventeen out of the out of the seventy samples were found in excellent conwere found in excellent condition and color and there was no trace at all of any preservative. This disposes of the argument which we may anticipate from the defendant that "People will have their ketchup colored and will not buy it unless it is colored."

The best brands of ketchup are not too watery. They have some not too watery. They have some substance in them. But of the sev-enty samples bought in Canada some enty samples bought in Canada some had a very low solid content.

Four samples had less than 10 per cent solids; 24 samples between 10 per cent, and 15 per cent, solids; 14 samples between 15 per cent, and 20 per cent, solids; 11 samples between 20 per cent, and 25 per cent, solids; 3 samples between 25 per cent, and 30 per cent, solids; 11 samples had above 30 per cent, solids.

B ELOW ten per cent. solids is pretty low down. Milk is supposed to have not less than 12 per cent. solids.

First-Don't frighten yourself. It

is not the purpose of this article to add another terror to your already sufficiently difficult life.

Second—Take a little more interest in your ketchup. Shake the bottle and see if it is too watery. Compare the color with the true Compare the color with the true tomato color. It should not be any

Third-Do not be too anxious to get ketchup at bargain prices. Moulds and bacteria are not cheap at any price.

Fourth—Remember that good ketchup does not spoil even when opened. In one experiment conducted under factory conditions and on a commercial scale in the United States ketchup was allowed to stand ten months unopened and at the end of that time it showed no indication whetever of enciling. It indication whatever of spoiling. It was also shown that good ketchup stood opened at a temperature of 67 degrees for eight days and there were no moulds developed in it. But be sure to keep your ketchup in a cool place all the same.

Fourth-Labels should not lie. ! it is tomato ketchup, say so. If it is a mixture of tomato ketchup and is a mixture of tomato ketchup and benzoate of soda—say so. We pay our money and we take our choice. Benzoate of soda is not poisonous, not very harmful, and not quite as unpleasant as the chlorine that some Canadians drink in their water. But there are Canadians who would rather take their ketchup "straight." Fifth—As for dyes, one would rather not have them in ketchup. Forty-two out of these seventy samples of Canadian ketchup had all the dye at all in them and these were better than the other samples that had the dye. The label should also give us this information: "Coloring matter added." Reputable manufacturers say that the use of dye is unnecessary when the ket-

Kit's Column

A Weekly Letter Of Comment And Opinion

O DOUBT you have read Mr. H. G. Wells' story of the "Invisible Man,"—a strangely startling and exciting—an almost convincing story—better, I think, than some of that novelist's later works. Mr. Wells' hero became invisible by chemical process and treatment.

visible by chemical process and treatment.

A German scientist—a new-comer, announced lately that in a very short time he hopes to be able to show that invisibility is not impossible; in other words, that by following his method—and probably taking his medicine, anyone will be able to render himself invisible at will. It sounds like a tale of old magic, or witchcraft—a fairy tale of long ago. But in this age of wonders and discoveries nothing surprises. Then think what a benefit might accrue from it. There would be no more sin in the world. Sin is a secret thing, at best confined to companies of three or four. Murder, for instance, is usually committed by one person, or a small number banded together for the purpose. Then Scandal—that deadliest of the Seven Scarlet Sins. Every neighbor would be afraid to gossip about another. Servants' tattle would be ended. No man would know whether his greatest enemy was within hearing or not. We would all hear little good of ourselves, and our affairs. Just think of what wives and husbands might discover! It gives one the shivers even to imagine the awful situations that might be developed. The worst or best of it is that not until the medicine or dope wore itself out in the invisible man, could he again be seen. Neither wife nor husband could take vengeance at the moment on the erring one. No sleuth could catch a murderer he could not see. Altogether, the world would be a very much less comfortable place to live in, which seems to be a rather frightful way of putting it after saying that invisibility would kill sin.

The Legend of the Fern Seed.

OUBTLESS the main ingredient in our German scientist's

OUBTLESS the main ingredient in our German scientist's

"invisible" medicine will be

fern seed—unless, indeed, that
learned gentleman despises Shakspere and legend. In the first part of
"Henry IV." Gadskill, the footpad,
says: "We have the receipt of fernseed, we walk invisible," to which
the chamberlain replies: "Nay, by
my faith, I think you are mere beholden to the night than to fern seed
for your walking invisible."

The popular belief was that the
seed of any kind of fern was invisfible; but that if it could be collected

seed of any kind of fern was invisfible; but that if it could be collected
the lucky possessor caught the same
quality, and became invisible so long
as the seed was upon him. The difficulty is, of course, to collect the
seed. According to ancient belief,
fern sheds its seed only on Midsummer night. There are others—old
herballsts—one we used to gossip
with in Toronto in days past—who
insist that the plant bears neither
flower or seed—which we in turn insisted—was absurd. Many believe
that the bracken (fern) blooms at
midnight once a year; the flower
lives only a moment, but whoever
gathers it before it dies will gain the
power of invisibility and omnispower of invisibility and omnis-cience. In "Guy Mannering," Dan-dle Dinmont says that the common belief about Meg Merriless was that she had gathered the fern seed, and could "gang ony gate she likes, like Jock-the-Glant-Killer in the ballant, wi' his coat o' derivers and bit wi' his coat o' darkness and his shoon o' swiftness." Oh, we can tell you that when we find a news item like that about the young German scientist, we read up a lit-tle to get our facts and legends on fern seed, and the like, the stories of the old collectors of quaint and curious matter, and delightful read-ing it is.

The Korp-sten.

THE next best thing to render one invisible is the Korpsten, a pebble only to be found in the body of the raven. Swallow it, and no man can evermore see you with mertal eye. But
first catch your raven, and then
search for your stone. In Ireland
we had a legend that he or she who
sips a bit from the gauzy gown of
a fairy dancing on the rath, or
quaffs from the goblet of
Queen Mab — will for all
time "remain unseen of the Queen Mab — will for time "remain unseen of t eyes of man." The writer had eyes of man." The writer had great-great-uncle who did a daring thing of this sort. It was not the snip of the lady's gown he was after I'm afraid, but the quaff from the goblet. Be that as it may—he was never seen again. And this was gospel among the family. I love to think of him playing the family. of him playing tag with Thomas the Rhymer and Queen Mab—and I wish he would come across and fetch me.

Who and What is Mr. George Ham? THE best asset of the C.P.R. The saddest humorist we ever met. The kindest man we know. The most loyal friend. The man who never fails you. To a whole army of

journalists Mr. Ham has been as a plank in time of shipwreck. He owns every newspaper man (and woman) in Canada. Unassuming and modest, he is yet the most "notorious" man in the Dominion. Everybody has heard of him. Most of us know him. He stands in the front row with Canada's greatest men. His heart is so big for his body that he has to wear it outside where daws may ters, sometimes vicious and abusive letters, love-letters, but oftenest of all those stories of the dull commonplace lives which are so infinitely pathetic—found their way into the editor's letter basket. Even yet old shadow-children write demanding their playground back. Well, there is always "Someday," and "Perhaps." The dictionary of Life is filled with such words.

wear it outside where daws may easily peck it. And they peck quite often. In fact some of them have attained to sublimest heights in the art of pecking. But the big heart and the big man are there for all that. When his hour comes—and may it be lowed distant. To the substitute that However, "I take this oppoortunity," as the men say in their after dinner speeches—of thanking my numerous friends," and correspondents for the letters brilliant, bitter, melodious, melod melodious, malignant, affectionate, and love-like which always are to be found when the newspaper mail bag is terned out upon the wait.

Among the letters that drifted in may it be long distant—to travel that journey we must each of us take—our united wish for him is a first-class pass swift and—straight into within the last very or so, there are two or three which dealt with strange occurrences relating to the NE would think after the maportent of dreams, ghost raps, warnings, etc., to KIT'S COLUMN, re-

NE would think after the malicious scoring of the famous Rokeby Venus by a Militant Suffraget, consequent on which every important gallery and museum in London was closed for a time, orders would be given to have women scarched before they were admitted on opening day—or that some perhaps less repulsive form of protection for the pictures would have been established. But no—the amiable and maternal government does no garding the vision that came to a New York woman journalist. While we need not "believe" these stories, still everything touching on the occult or unknown carries with it an odd attraction. "Old Country workers" Man" writes:

One family in the small Somersetshire village of Knowle, not far from
Bristol and Bath, heard the death rap
once under very distressing circumstances, tho it was not the first time
that this uncanny power possessed by
them had shown itself. On the first
occasion it was clear that no imagination had been at play. As a rule we
may take it for granted that hardworking, steady and prosperous farmers are so well occupied that they
have hardly the leisure or morbid
imagination to see or hear things not
connected with their daily work, but
this is what did actually happen to a
well known farmer of that peaceful
and almost unknown village.

No. 2 with HER little hatchet, and destroys Sargent's magnificent portrait of Henry James, the novelist and stylist—perhaps the most notable of Sargent's famous portraits—a really superb picture. The militants are mad. They should be confined in asylums for a while. It will be a poor year for the American, or Canadian tourist if every gallery and show place at London is closed; it will likewise be a poor season for London. Already, we hear, several prominent families have made arrangements to leave Old Smoky out and almost unknown village. "Squire came home early tonight," said Farmer Jenkins (this is not, for obvious reasons, his real name) to his wife at supper time. "I heard Swallowtail pass the door half an hour area." of their itinerary. That would be like taking the caviar out of the sandwich. A pestilent lot, the militants.

Some Day—Perhaps.

"Swallowtail is in the stable," said Mrs. Jenkins. "I have been to the house, and squire didn't go out all

E WISH it were possible to "Then somebody else rode the horse, for he passed the door, I tell you, at half-past eight. I know, because I was winding up the clock and setting it by my watch. I can't mistake Swallowtail." respondents whose letters arrive each week, but there is not place for "Answers to Correspondents" in such a column as this. During to such a column as the During to such as the Durin ing years of newspaper work the letter column was always our favorite playground. But the editor of the department which the writer conducted one time—saw fit—unwisely we thought at the time, and think still—to ban the gossipy department of letters, and so put much of the human interest quality out of his paper. All sorts of letters, surprisciply clever and well-written exiets confidential letters containing the secrets of women—unknown and challenger.

Country people are as familiar with the gait, the small tricks and pecularities of their four-footed friends as we are with those of members of our own families, in town, and neither the farmer nor his wife knew that the squire was lying dead on the ficor of his library at that fateful hour of 8.30.

I do not pretend in any way to explain the curious fact, but it will strike everyone that there was not the slightest connection between the peculiarity of the horse's trot and the sudden death of the squire, and it is equally evident that imagination could have nothing to do with it. The furmer heard Swallowtall pass in the road, as he had done hundreds of times before, and thought nothing of it, connected it with nothing on earth; so much is clear. What actually did or did not pass, giving unsuspicious Mr. Jenkins that unmistakable, familiar, and quite commonplace impression, is a question to which there may be a series of the same transfer.

and quite commonplace impression, is a question to which there may be a gruesome answer if we only knew.

The Police Woman-Man.

THE-HE comes from Paris along with our modes. They dress their young beardless policemen up as women in that gay city, and set them to catch mashers or "satyres" as they eloquently call such spineless cads over there. A grinning satyre who was annoying women in a certain district of the French capital, was suddenly pounced on by a young lady in a neat tailor suit, and soundly trounced, after which he was briskly marched to the nearest police station. The other day people waiting for a train were enlivened by the spectacle of a stalwart lassie with a bunch of white violets in ample corsage twisting an elderly

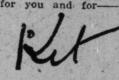

Knights of old, princes and pageant-makers of the bedizened But the really astonishing and puzzling thing about past may have been all very well in their way, but these NEW persons in these new dreams have a way of finishing the pictureespecially on the brink of June. Naturally, ALL dreams can't DREAMS. Jolly dreams these, because you control them, pat come true. This is what makes them so much of a gamble. And and steer and mould them to suit your fancy. The bluest blue, it depends a good deal on how sincere you are, doesn't it?-or

> satyr's arms behind his back, and kicking him up the stairs with a pair of very business-like boots. Another victim of the beardless bobby. Every day now, some fine athletic girl dressed in the latest fashion—tight skirt and all—may be seen hailing some evil-faced old demon to his fate. It is only on mashers that the police man-woman exercises her-his strength. Now, it is only small, tiny little women that your street loafers ventures to accost—and even then he keeps a wary eye out for any tall, fine looking girl he sees coming along. The next step will be to dress the police woman in male attire, and keep her on hand to arrest unfortunate Cigale when she attempts to ply her sorry trade either in Moncaeu or Montmartre.

> . . . Pauvre Satyre. DOLAIRE, THE woman with the smallest waist and widest mouth in the world, served her elderly satyre to a sheck with her own fair hands. The old being used to besiege her dressing room nightly. He even brought a camp stool and some chaps wenned up stool, and some chops wrapped up in paper, and ate his dinner there. The other night this repulsive person, who hadn't shaved for a month, had the temerity to ask the lady for

a kiss, for which he offered to introduce her to M. Poincare—the president of the French. Onlookers heard a roar of rage, and saw le vieillard flying out of the dressing room, his hat over his ear, shedding a basin of soap suds as he flev. There was a "Sacr-r-e!" a slam-Bacchus—smelling horribly of cog-nac—was dragged off by a neat young lady in a shepherd's plaid suit, and the latest Parisian hat. We beg to call the attention of our own police commissioners to this new note in Parisian fashions. It is indeed le dernier cri. Give the beardless boy a chance.

Not The Worst.

Kit, the first women war-correspondent, has NOT gone to Mexico to report "from the front." You are spared that—which is a lucky thing for you and for—

Notes For Summer Wear

Now that the time has come to get Light Basques and Full Tunics out summer dresses to see just what can be done to make them wearable this year, a hint or two concerning their renovation may be in order.

The popular cotton voile of the past year or two was frequently trimmed with a touch of black satin, and when such a dress is to be laundered there is always a chance of the black running into the lace yoke, cuffs and insets. The trouble of taking out the latter is quite worth while, particularly if the lace is of good quality, but it is an excellent idea before doing so to run a line of coarse white basting cotton around their exact outlines. It saves much worry later on to have such a guide, especially if as sometimes happens the lace trimmings and cotton dress shrink in slightly different ways.

If it is decided to trim cotton dresses made this summer with black, buy the waterproof satin, sold for bathing suits, and work of this description will not be necessary in future years.

The Midget Parasol

The midget parasol, which was supposed to have been designed solely for the use of the very young generation of girls, has been adopted by their grown-up kinswomen as a portion of the motoring outfit. These parasolettes, as they are sometimes termed, are scarcely larger than were the old-fashioned Victorian carriage sun-shades and are made in lace, satin, striped or flowered silk similarly to the full-grown ones designed for garden parties. But they double up into smart looking little leather handles and they fit into cases matching the material of their

Does the description of a taffeta dress, buttoning straight down the front, six inches below the belt, with darts over the bust and seams at the side and back, remind you of the dresses of long ago? Quaint and charming are these dresses, espe-cially as they are not snug fitting and worn as they are over the new corsetless figure with the wired or-gandie collars. The tunics are in-

gandie collars. The tunics are invariably long, occasionally are they of the apron variety and usually worn over the tight, narrow skirt, which closely resembles pantalettes. Striped Silk Linings

Coat linings are receiving much attention. Vivid stripes are used inside the plainest of tailored cloths. A dark serge is most inconspicuous until the coat flares open to display brilliant orange, green or blue stripes on a white ground.

An Easy Lesson In Economics By Elbert Hubbard

CONOMICS is the science of the production

commodities that human beings require.

The producer is the man who produces commodities of use or beauty. The most important producer, of course, is the farmer; next is the manufacturer. The jobber is a wholesale dealer who sells to retailers. Commission men are known as middlemen.

The retailer is a man who sells to the consumer.

The consumer is the man who purchases for his own use or consumption.

Competition is the rivalry between manufacturers or dealers, each promoted by the desire to increase his own individual, trade.

In law, competition always refers to prices. In the broad and general sense competition refers to quality and service. . . .

"The Life of Trade." HERE is a folk saying to the effect that "Competition is the life of trade."
Competition possibly was the life of trade in the days of the handi-

This was when commodities were produced by the family and sold to the neighbors. Manufacturing was then done in the kitchen.

There things were whittled, carved, fashioned by human hand.

The wife was the weaver. The man was the blacksmith, the carpenter, the shoemaker. Manufacturing began for home use, and business began when a surplus was produced and sold to the neighbors. If the neighbors did not come in ard buy all that the family had to offer, the man of the house went "on the road," just as Henry Thoreau's father made lead-pencils and Henry peddled them out, or the father of Seth Thomas made clocks and Seth sold them.

The Law of Diminishing Returns. ing returns is a law which provides that because a thing is good is no reason why you can not get too much of it.

Many things are good up to a certain point; beyond this you get a gradually diminishing return of good, until the thing which was good in small quantities becomes in large lots a positive evil.

For instance, a moderate amount of food is good. It gives us strnegth and ability to act. Double your quantity of food and you do not double your strength. Too much food will certainly weaken you, just as surely as will a lack

conditions is well. But when competition forces the price below the cost of production it ceases to be beneficent and be comes destructive. And anything destructive is suicidal, and that which is suicidal is dying—dead. In the days of the handcrafts, when competition pushed things to a point where the men could not manufacture and sell at a profit, the producer turned to something else. He had no fixed investment, no plant, no bonds, no stocks, no mortgages, no payroll.

Competition became destructive when machines were invented whereby production exceeded the immediate demand of the public. Then it was discovered that it was better for the manufacturer to produce and sell things at cost than to close down his factory.

In fact, he had obligations; con-OMPETITION under certain

In fact, he had obligations; contracts, perhaps, for materials, contracts with employes, many workers depending upon him, looking to him for bread and butter. Towards these he had a moral obligation to

. . . O SHUT down a factory means rapid deterioration. The first thing is a jump in insurance, and in fact many insurance companies will not write a policy on a factory property if it is not running, and operating, too, on a paying basis. To let machinery stand still is a very serious proposition. Interest never takes a vacation. Rats, mice, microbes, and a multitude of mites in the way of germs and bacteria send out word, and the germs of dissolution come a-running, like shysters folfowing in the wake of an ambulance.

So when competition pushes the manufacturer too hard, instead of going angling for cod or signing before the mast, he clings to his factory and sells his product at cost. And any man who sells at cost is becoming for the commissioner in hankruptey.

bankruptcy.

It is only a question of time before the referee in bankruptcy will drive up in his auto.

Then there is a shut-down. A great many employes are thrown out of work. Naturally many of these suffer. A majority find new jobs, but some there are, old and unskilled, to whom change is death.

Unlimited Competition.

THE FALLACY in the saying that competition is the life of of trade lies in the as-sumption that the consumer thrives when prices are low. The fact is that low prices, or high prices, are relative, turning on buying If bread is a cent a loaf, and you haven't a cent, then bread is very

nigh.

nigh.

A cut in price below cost is bound to be paid for by the public in a decreased purchasing power.

When farmers are making money; when factories are getting a fair-return for their commodities; when railroads receive a just return for the one thing they have to sell, that is, transportation; when the iron mills have orders ahead, and rails are being produced at a profit; then we are all prosperous.

Not one is out of the work who is willing to work and can work.

Is willing to work and can work.

These things spell buying power.

Competition may be a good thing where little men in small deals are concerned, but when we get vast

facilities for production, unlimited competition becomes destructive, and to insure prosperity, co-operation must take its place.

Quality Competition.

ND HE who assumes that co-

operation and conspiracy are one, should have his mentality rated in guinea-pig power.

The tendency of big business is to compete in quality, and not in the matter of price.

Big facilities beyond the immediate demands of society suggest just one thing, and that is an increase in consumption.

increase in consumption.

Thus we find the United States Steel Corporation maintaining a promotion department, which has for its object the education of the public to an increased consumption of steel products to the end that more metal shall be consumed.

The steel-framed sky-scraper came, not as a suggestion on the part of the builder, but as the idea of a rolling-mill man who had metal to sell. There being a dearth of demand for steel in proportion to its possible production, new ways must be devised for its consumption, and so today we are manufacturing garages, portable houses, doors, window-frames, railroad-cars, fence-wire, and fence-posts—and a multitude of other things from iron and steel which came as innovations.

Let a manufacturer increase his profits beyond a reasonable amount, and he invites competition that may embarrass him, and possible wipe him off the slate. So wisdom prompts a wise producer not to put too high a price on his products.

Big Business.

IG BUSINESS has come as a result of natural law, and natural law, and natural law obtains in economics exactly as it does in biology.

Economic law is a part of nature. In economics, energy plays a big part, and energy should always be spelled with a capital. Energy is the secret of God. What it is we do not know—we see only its effects.

Energy moves things. Work is the intelligent direction of energy. Energy takes various forms. We have chemical energy, gotten from distegration and combustion. Thus do we produce heat at will, and take advantage of the natural law that water expands when heat is applied.

is applied. Then we have animal energy, or the use of horses, oxen, camels, elephants. Animal energy of course includes the labor of human hands. Then we have electric energy. And the invention of machines for the diffusion of electric energy has been the chief factor in modern pro-

You can not operate an electric fan, a sewing-machine, a gramo-phone, or a piano by steam. The big thing about electric energy is that you can divide it up into very small units, and use it for a multi-tude of delicate operations, and this most economically.

To say that electricity is the life of trade is a deal nearer true than to say that competition is. And the success of electricity as the chief factor in modern civilization did not come as a matter of competition.
Savages compete; wise men co-

"What a wonderful color you've

"Ive been rushing around so get-ting dressed that naturally my face got pink."
"Naturally, dear?"

All those feet had Corns

Watch the feet that now trip lightly. All of them had corns.

But the owners learned of Blue-jay. They applied it in a minute. There was no more pain. The corn was forgotten. And in two days the corn came

Soon or late you will treat your corns in that way. You will stop the paring, stop the old-time treatments. You will deal with corns in a scientific way.

You will take them out, with no soreness, no pain, no inconvenience. Nearly half the corns in the country are now ended by Blue-jay—a million corns a month.

Why wait? Other ways, as you well know, don't really end a corn. Why don't you try this easy, painless, most effective way?

Why don't you try it now?

Blue-jay For Corns

purchase of a refrigerator or ice the most important item of the outfit. It should not be entered htly or without due considerawhere it is to be kept when t and how readily the refrigeraelf is built for cleaning and ng. Preferably a refrigerator not be kept in the cellar for if no other place for it, the cellar very dry, the floor level and a nd near a window so that nd air will be at hand. or outer kitchen is the best

for a refrigerator; here it is with-

Consider the Interior, Not the Case. FIRST of all, let us consider the best kind of an ice box to buy. Do not be deluded into selecting an ornamental case, because it will look well. There are, to be sure, most fascinating white enameled refrigerators (that is of iron, painted a snowy white), but while these seem well fitted for a modern tiled kitchen they are not, you will find, guaranteed not to peel off, nd in a few months your pretty white casing will have ugly spots bare of paint and present a most untidy appear-

Select an oak or white pine exterior if it is possible to get one within your limit. These are more durable even than ash, and oak is superior to any casing unless one feels like providing white porcelain outside as well as inside, and this is beyond the reach of ordinary mortals.

It is possible to buy a good-sized oak refrigerator from fifteen dollars upward, which contains a separate ice chamber within convenient reach Some models have the ice chamber at the top reached by a lid, so that it is necessary for the average woman to stand on tiptoe to look inside and remove the inte for support for cleansing purposes. With such an arrangement it is often necessary literally to remove the entire interior arrangement to get at the drain.

cated must be avoided, even if its care is not to be entrusted to the maid. In such a case the old-fashioned ice chest is easier to handle, but the disadvantage of the ice chest is that while cheaper it is all practically one comparts vhereas the up-to-date refrigerator has its chambers all separate with a wellregulated system of cold air drafts reaching down from the ice chamber and outside air currents passing behind to give proper circular Side Door to Chamber Best.

AN IDEAL ARRANGEMENT.

THE ice chamber is easier to clean and to handle in every way if the door is on the front like a closet rathe than on the top. Beyond doubt the desirable refrigerator is lined in every part with white porcelain. If this is too ex-

pensive an excellent style comes with the ice chamber of galvanized iron and the other compartments for food lined with the porcelain, doors and all. Galvanized iron is all right for the ice chamber, but it is not advocated for the food compartments. Here if they are not porcelain or glass zinc is preferable. There is one style with the door of the ice chamber on the side, which is so arranged that the entire cast iron ining of the chamber lifts out like a big box so that it can be cles also the air chamber and lining back

A painted or enamelled interior has not the durability of zinc or porcelain,

as in time the paint will peel off, and a sanitary zinc lining is preferable, provided it is carefully soldered at the cracks to prevent the moisture from eaking into the inner lining. While zinc looks spotted and ugly after a time, it is satisfactory in its wearing qualities. It is really a matter of taste as to whether the shelves are of slate or wire or glass, but they and the drain pipe should be easily removed and the drain arly should be easily within reach and so constructed as not to clog.

Many Conveniences for Large Households.

HERE are very complete refrigerators for use in apartments, or where a large number of different stuffs must be kept as in a store. In these there should be a special compartment entirely separate for the milk and butecially if baby's milk is to be kept in the family ice-box. There is a glass-bottomed compartment for butter in some of the large styles. When this is pulled out like a drawer, the wooden back completely covers the opening so made and prevents the interior of the refrigerator from getting heated while the drawer is extended.

There are more expensive and wholly delightful interiors lined with opal glass, with tiled floors bedded in cement, and glass doors, including all sorts of practical devices, and these are the best of

be considered is the ease of cleaning and the regularity and thoroughness with th the cleaning is done. Once a week in Winter and at least twice in Summer, the whole interior should be emptied of its contents and thoroughly washed out with soap and warm water, then the drain must be flushed out with boiling water and if there is any suspicion of odor or dirt in the drain, a little washing soda should be added to the

The dealers say that the interior of the refrigerator should not be washed with boiling water if it can be avoided, as it is likely to crack the porcelain or eat through zinc. Porcelain can, of course, be scrubbed, which is another advantage in addition to its good appearance, but care must be exercised to avoid sand soap or anything that will scratch the surface. Zinc should not be scrubbed, or in time it will eat into holes. The careful housewife, however, will find it advisable to flood out the interior of any refrigerator from time to time with boiling water containing a lit-

tle soda. The best way to clean the drain nine is to swab it with a stick wrapped in a cloth, or a brush such as is used for lamp chimneys will answer the purpose. Every crack and crevice indeed of the whole interior must be frequently cleansed if the health of the family is to be

In Regard to Drinking Water. WHEN the ice chamber is provided with a faucet and the water is used for drinking purposes the ice box should be thoroughly washed out and dried every day before the new supply of ice is added. There is a very nice refrigerator of this sort with a deep ice box extending all the day down one side, lined with porcelain with a curved bottom, so that there are no dirt-haring cracks to menace the health. A little care must be exercised in putting in the ice to avoid cracking the porcelain, but it is admirably fitted for frinking water. The trouble with the ordinary ice chamber of this sort is that

the faucet must be raised about an inch

from the bottom to avoid the sediment and while this is an advantage in this way it is also difficult to remove said dirt from the bottom when it cannot be drawn off. In the nursery refrigerator it can be remedied, because it is so small that the whole thing can be easily lifted or turned over and drained out, but with the large kitchen refrigerator this is not possible. can it be put out in the yard to air thoroughly now and then.

Porcelain lining betrays soil very easily, so that makes it possible to watch the ice chamber very minutely. Personally, the writer thinks it advisable to put the children's milk in a separate refrigerator, so that it may be kept upstairs under the mother's supervision. This is particularly necessary when the family ice box has only one compartment. Of course, in a modern refrigerator with separate doors leading to the various chambers this is not so important if the mother keeps close watch over conditions. It never

pays to run any risks with the food meant for babies and little children. Never leave the refrigerator closed it necessary to the preservation of the contents unless there is ice inside to keep it cool. Artificial ice melts more rapidly than natural ice. Pineapples, canteloupes and fish should

never be kept in the refrigerator, as they taint the milk and butter almost immediately. Even oranges will do this at times, and if it is necessary to cool such fruits in hot weather place them in a bowl with cracked ice and set them in a cool place.

Never put the food right against the ice in an ice box, a properly constructed refrigerator will be cool enough without direct contact with the ice. The ice itself must always be thoroughly washed off before it gets into its chamber or all the sterilizing of the refrigerator itself will be useless against a fresh influx of dirt.

A piece of charcoal laid in a refrigerator will remove any odor, but even so the interior should be aired from time

RHUBARB RECIPES

one of the wise provisions of nature that it should appear at a time when the system craves acids most. The housewife, glad enough at first to serve it as a sauce, soon turns it into a pie, and afterward, if she is wise, manages to keep her family eating it by mixing it with taploca and custard. Its possibilities are unfortunately somewhat limited, but still we could do more with it than we usually attempt

A rhubarb jam, for instance, is one of the few good things we must put up for ourselves, as it is not sold at Brown. Betty can be made for a

change with rhubarb sauce instead of apples. Place alternate layers of the sauce and buttered breadcrumbs in a outtered baking dish. Sprinkle a little cinnamon over each layer and cover the top with crumbs. Bake in a quick oven and serve with sweetened cream or a hard sauce made by creaming a cup of sugar with half a cup of butter. Rhubarb Cobbler-Line a deep baking dish with short biscuit dough. Fill with rhubarb sauce thickened by the addition of a well-beaten egg. Wet the edges of the pastry with flour and water, put on the perforated crust. pressing it around the edges, and bake about half an hour. Serve with cheese. Later, when rhubarb gets cheap, try making jam. Scrape and cut in inch pieces and to a pound of rhubarb use the same quantity of sugar. Sprinkle the latter over layers of rhubarb the day before you intend cooking it. Drain off the sirup in the morning and boil until thick; add rhubarb and cook about. fifteen minutes. The addition of orange or lemon juice and a bit of grated rind improves the flavor for some people. Use one orange or lemon to every two

Use one orange or lemon to every two pounds of fruit and sugar.

For a taploca pudding use the recipe given on the box for apple pudding, substituting sweetened rhubarb sauce.

Rhubarb Pudding—Mash two cups of stewed rhubarb through a sieve; sweeten, add a little cinnamon, the grated rind of a lemon, the beaten yolks of half a dozen eggs and the whites of two, and two tablespoonfuls of butter. Line a baking dish with puff paste, fill and bake, half an hour. Serve with a sauce made by creaming half a cup of butter with one cup of sugar and adding one cup of cream or rich milk. ing one cup of cream or rich milk. Str well and flavor with lemon, taking care that it does not curdle. Put in

cold place until ready to use.

Tarts or small individual rhubarb ples are improved both in taste and appearance by the addition of a spoonful of whipped cream just before serving.

STRAWBERRY DESSERTS

heavy desserts we are all more than willing to turn to lighter berries are more than likely to "top off" the average Sunday dinner for some time to come, and there are so to the familiar shortcake and "straw berries and cream" combination, that we seldom tire of them. As for short cake—a keen rivalry exists between lovers of a beautiful but deceptive dish made of sponge cake, whipped cream, and berries; and the rather unprepossessing cake of biscuit dough, "the kind that mother used to make." Here's a fairly safe tip-if cooking to please a nan, make the latter; if the guest of honor is a woman, the former; but like all "sure things" it has exceptions.

Strawberry charlotte is a variation of our old friend, charlotte russe. Line a glass dish with sponge cake or lady fingers, cover the bottom with mashed, sweetened berries and heap whipped cream over all. Gelatine can be added to the berries if a more solid dessert is

about as substantial as its name-are the whites of four eggs, one and a half cups of sugar and a quart of berries Mash fruit and sugar together, add the whites and beat until light and foamy. Serve in a deep glass dish or tall

Strawberry souffle. Over a quart of prepared berries pour a custard made of five eggs, one quart of milk, a pinch of salt, and sugar to taste. Cover with a meringue made by adding four table-spoonfuls of sugar to the stiffly beaten whites. Garnish with large whole ber-

Custard will never curdle if the scalded milk is poured from the double boller over the beaten yolks and sugar, silrred for a moment and then returned to the boiler to cook until of the right consistency. Add prepared extract or fruit juices after the custard is cold for the sake of both flavor and econ

Pineapple, either fresh or canned, is now especially acceptable because of its agreeable acid. The simplest way of preparing it is to put it through the neat grinder, then sweeten it and serve with ice cream, blanc mange, gelating

A delicious pudding is made with a shredded pineapple or a can of the fruit, the same weight of sugar, half as much tutter, five eggs and half a pint of cream. Cream butter and sugar, str in the beaten yolks, then the prepared the beaten yolks, then the prepared rineapple and the cream. Finally, fo'd in the stiffly beaten whites, line a baking dish with puff paste and pour in the mixture. Bake in a rather slow wen until the pastry is thoroughly

An orange pudding is easily made by bringing one cup of water to the boiling point with the juice of three orange. and one lemon. Thicken with three tablespoonfuls of cornstarch previously moistened with cold water, and coo about ten minutes. Add the beaten be whites of three eggs and after the mix-ture stands a few minutes pour part into a bowl or mold wet with cold ater. Arrange alternate layers of pudding and sliced oranges and set aside to cool. Serve with custard made of the yolks and flavored with grated orange peel.

Lettuce that marked that ut it down to allowed to remain for some tematic error. ha bowl of cold water will show is a real abing of even wilted leaves. Pull at separately from the heart, if more preit is to be served as "hearts nebulae were sorption could salad, whereby the head

is halved, quartered or cut into smaller

The outer leaves of head lettuce should not be discarded, however bruised they After allowing the same to freshen in cold water, remove the brown parts and, with scissors, cut into quarter-inch strips, dressing with French our cream or boiled dressing. This stripped lettuce is excellent for sandwiches, dressed with mayonnaise, and proves delicious for the lunch box.

Romain, chicory, endive, dandelion and watercress are greens excellent for plain salad, when dressed with French dressing.

Grape Fruit Salad.

Grape fruit forms the body of an easily digested and appetizing salad. It is an excellent salad to serve at evening parties for this reason. Remove the thick outer skin of the fruit and pull into quarter portions for easy handling. Tear the walls of each section to remove the pulp, which should be kept as whole as possible. Large portions of the pulpmeat are more attractive in appearance and prove more appetizing than small broken bits.

Under no conditions cut pulp with a knife and do not fail to remove all the inner skin. When possible, prepare the grapefruit immediately before serving. Contact with the air causes the fruit to lose its juice, and the original quantity prepared will be appreciably lessen-

French dressing is the most satisfactory for grapefruit salad. Garnish with thin strips of green or red pepper, or both. Oratige pulp may be combined with grapefruit pulp

Cherry and Pineapple Salad. RUIT combinations must of necessity be varied as the products of the season become available A salad of sweet cherries, pineapple and celery is delicious. When possible select both red and white cherries as by so doing an attractive appearance is gained. Stone the cherries by cutting half their portion to remove the stone, keeping them whole. Cut the pineapple into thin slices and dress with French mayonnaise or

boiled dressing. Marshmallow and Pineapple Salad. Pare a fresh pineapple, remove the eyes and cut into quarter-inch slices, these again cut into inch squares. Use plain vanfila marshmallows, which may be clipped with scissors, into small pieces and mixed with the pineapple. Dress with whipped cream that has been seasoned with salt and red pepper. This is a sweet salad. Canned pineapple can be used if fresh fruit is not to be obtained.

Chicken, Apple and Celery Salad. An appetizing salad, and one sufficiently light to assure quick digestion, is one combined of chicken, apple and elery. Cut all ingredients into thin strips two inches long and not more than a quarter-inch thick. Use about equal proportions of each, but only the white meat of the chicken, dress with mayonnaise or boiled dressing.

If a sweet salad be desired with this combination, a dressing may be made by boiling water and sugar together. until it forms a thin sirup. When cold, add a medium portion of ground cinnamon, and flavor with vanilla or lemon Apple, celery and English walnuts make a good combination. Cut apples and celery into cube portions. combination can also be used for stuffing tomatoes whose centers have been removed.

ALAGA and Tokay grapes form M the body of many delicious salads, sed together or separately. Raisin and California hothouse grapes, because of their purple color and delicious flavor, also add to the general attrac tive appearance of the salad. Grapes ould always be seeded by cutting the grape half across its length, aiming to keep it whole. After seeding same, put in cool place to become chilled, thus preventing bruise marks from appear-

These grapes combine well with most all fruits and nuts. When pears and peaches are in season they add a rich flavor to a salad, especially when combined with malaga grapes, orange, apple and celery.

Banana Croquette Salad.

of mayonnaise. Place same on bed of lettuce leaves, giving ample portion. Cut a banana in half and pare blunt end the shape of the natural end. Roll the banana in ground black walnut kernels, and place in the center of each plate. Dash a spoonful of mayonnaise across

the banana. well-stocked garden of vegetables affords choice material for salad making. The new vegetables, which are sweet and tender, require so little cooking that a salad composed from them can be quickly prepared.

Beet and Tomato Salad.

BOIL, skin and slice two bunches of new beets; if the beets are large quarter before slicing. Skin and cut into nch cubes six medium size tomatoes, chop fine half a green pepper and two medium size stalks of celery. Through this combination mix gently mayonnaise dressing made from two eggs. Serve in bed of lettuce leaves. This amount will serve six or eight persons. Garden Salad.

Use equal portions of peas, beans, string beans, celery and sliced onions, the latter if desired. The first three vegetables should be cooked. Place the mixture in a bed of lettuce leaves and dress with French dressing. Cabbage Salad.

Shred finely a half head of new cabbage; chop fine half a red and half a green pepper, add half cup of finely chopped English walnuts and mix thoroughly all ingredients with mayonnaise

made from one egg. Serve in individual portions on lettuce leaves. This same mixture, minus the mayonnaise, with the cabbage chopped instead of being shredded, makes a splendid individual salad when molded in gelatin. Asparagus Salad. Boil and chill one medium size bunch

of asparagus, paring well away the tough white end. To half pint of a vell-made French dressing add four tablespoonfuls of chopped cabbage, celery and olives in equal proportions. Serve the asparagus in individual portions on lettuce leaves. Add dressing Seed Amalga, Tokay and raisin or and two strips of sweet red pepper to California hothouse grapes, using equal each portion. Serve in a ring of either proportions. Mix with generous portion green or red pepper.

MAKING A HOME OF ONE ROOM

themselves transplanted, so to speak, from the commodiousness of a house to the confines of a single room, and at first the possibilities for comfort and convenience seem very few and insufficient. But the girl or woman who rooms of necessity, or whose object in rooming is worthy of the sacrifice of a home and its associations, can turn her lonely moments to good ac-count, for opportunities are plentiful in large cities, and a little judicious planwill make almost any room home-

THE first essential to real homehappiness is to develop a sense of personal possessions—the housewife pride that says: "This room is mine, its appearance is a reflection of my most intimate nature to all who enter it." It you are really in earnest you will be surprised to find how soon your room will grow cozy, how it will seem to wait for your return, and how welcome its cheeriness will be to you. For your room must be cheery. It needn't be large or luxurious, but if you know how to select a room, you can eliminate many inconvenient features and the grayness that sometimes comes with the ost expensive apartments. If you select your room in Winter, don't forget the sultry days in Summer, when small or insufficient windows will be unbearable, and if you suffer greatly in warm weather, and cannot get a room with a southern exposure, at least, try to have an east room, so that the afternoon sun will not linger in every crack and crevice until midnight. After the window question has been settled satisfactorily take the heating apparatus inconsideration, the closet space and

The present custom of furnishing the edroom like a sitting room to make up for the absence of a common living om or reception hall in which to entertain one's friends, is likely to make the bed a secondary consideration Many girls turn to box couches with drawer space, when what they really need is a good substantial couch

S OME from choice, others through bed, with a soft mattress, bedding that force of circumstances, find can be circumstances. space beneath the bed to conceal the laundry box, suit case and traveling bags, that in the absence of a store-room usually encumber the clothes

> DLAIN paper, medium dark, adds much to the refinement of the room and every piece of furniture should be selected with a view to making it serve a dual purpose. Instead of a spindle-legged desk, one with a few substantial drawers would be more practical. A hat box rack made to hold two cretonne-covered boxes, can be made still more attractive by a flat board top, covered with a pretty doylie and topped with a heavy vase or image. One clever girl we know has a lovely set of book shelves built over her steamer trunk, which is entirely concealed by a dainty curtain on a brass rod. Her closet door is fitted on the inside with a nickel towel bar, tumbler and tooth-brush holder, sponge rack and soap dish; and instead of the usual frail chafing dish table, she has a little flattop cabinet with drawers and a little compartment fitted with a door in which keeps a tin cake box for storing little dainties against a rainy or stormy day when a walk to the nearest restaurant isn't relished. A champagne basket hung outside her window is an excellent place to keep food stuffs fresh in all but the warmest weather.

THIS same practical girl has a tiny chest filled with all kinds of home remedies, first aids to the injured, a hot water bag, and a good sized gas burner for heating water quickly. A perfectly fitted sewing basket is another feature of her equipment, and an iron stowed way out of sight never leaves her at the mercy of the weather or her laundress, should the hem of her skirt get wet or her last clean stock meet with some mishap. She is really housekeeping on a one-room scale, and has lost every bit of the "detached feeling" that so many girls experience.

YOUR GARDEN AND MINE

GRANDMOTHER'S FAVORITES

By Katharine More Matlack.

ARTICLE VIII. (Cut out and paste in your note

1. Never plant a seed deeper than four times its size. Look carefully

up, but if one does come, cover with newspapers, held in place by twigs

less you want the seeds blown 4. Pulverize the soil. Try using

an old kitchen strainer, or buy a small sieve.
5. Press the soil firmly with a thin board.

6. Water lightly with the finest of sprinkling cans—don't use the

7. Should the sun be very hot, cover with newspapers, but be sure to remove them before sundown.

8. Before planting soak perennial seeds for twenty-four hours; this hastens germination.

9. Do not soak seeds of annuals.

10. Sow evenly, and don't be afraid to thin out when the young plants are about two inches high.

THIS HAS been such a late spring that we are all behind hand with our planting and must sow a great many seeds this week and next. Consequently, cannot go into details with all of them, as I should love to do, but will talk of the most old-fashioned flowers among them and give you a list of the others. Next week I

a list of the others. Next week I can take up a few more.

Bear in mind the height of each plant, arranging tall ones in the background, those of medium height in the centre, and the low-growing varieties in the foreground of your beds. Buy seeds and plants from reputable firms, as cheap sorts give poor saisfaction and are dear in the end.

Herdy passentials

which survive the winter and re-turn again year after year, are the mainstay of the garden. Neverthe-less, there are many annuals (plants less, there are many annuals (plants that must be sown every year) that could not be spared because of their brilliant colors and profusion of bloom, being well worth the little trouble to sow them, and the small amount they cost for seed. In this connection it is well to remember that some plants have both an

at small cost.

No matter whether you have a country estate or a small

If some of your new perennials do not bloom this year, don't be discouraged; a few, like the holly-hocks and fox-gloves, bloom the second year, unless you start with year-old plants instead of seed. Foxgloves (Digitalis).

Strictly speaking, the foxglove is a biennial, but it can be made perennial by removing the flower stalks right down to the ground, together with some of the leaves, when it is done blooming. The result is a number of new plants starting from the old crown, which produce splendid flowers the following summer. This is the most peautiful garden flower of them all (I'll probably say this of something else, but don't laugh—if you love flowers you know how it is). Tall, stately, with great spikes of creamy, spotted, pink, lavender, and purple flowers, they are very decorative. Plant these by all means, in clumps or rows at the back of your beds. They add a dignity and grace to a garden that only tall plants, can give. Whatever you do, do not make the mistake of growing only things of bushy form and medium height.

Foxgloves thrive in sun or partial

Foxgloves thrive in sun or partial shade, in any ordinary soil, but like all flowers do better for some care and feeding. They grow four to six feet, and bloom profusely in June and July. When protecting for the winter, do not cover the tops of the plants. This is also the rule for Canterbury bells.

Canterbury bells,

Sow a fifteen cent package (¼ ounce) of digitalis gloxiniaeflora, mixed, and also put out a few plants to make sure of this season's bloom. Do this, too, with your Hollyhocks.

These stately handsome flowers are indispensable to the old-fashioned garden. They want good soil and sunshine, and plenty of water in dry weather. Give a protection of manure in the winter.

of manure in the winter.

In planting hollyhocks, keep the colors together, pinks, reds, white and yellow, if possible, tho they are attractive in any arrangement. They bloom from June till frost. As they grow tall re-

ment. They bloom from June till frost. As they grow tall, remove the enormous lower leaves, so that nearby plants may not be deprived of sunshine. You may have to do this more than once.

Golden Glow (Rudbeckia).

This is fine for cutting during August and September. The flowers resemble both the small flowered sunflowers and coreopsis. It must

Campanula.

The campanulas are the adorable bell-like flowers, the old-fashioned Canterbury. cup and saucer, peach bells and Carpathian hare bells. The usual color is blue in wonderful shades, but there are pinks and whites also. While they vary in height, they are usually about three feet, and flower freely in June, July and August. If the flowers are cut as they fade, the blooming season is greatly prolonged. They like rich soil, partial shade and must be staked to prevent breaking by the wind.

Larkspur.

The larkspur is tall and graceful, easy of culture and with flowers charming for cutting or for the garden. These are usually in marvelous shades of sky blue, turquoise, or purple-blue, but there are rose and white varieties. The plants must be staked and, if the stalks are cut close to the ground as soon as each crop of flowers has faded, will bear a second or third crop. At these cuttings add a little bone meal about the roots.

Plant your golden coreopsis be-

a second or third crop. At these cuttings add a little bone meal about the roots.

Plant your golden coreopsis between the blues of larkpur and Canterbury bells for a charming effect in color. All these plants are suitable in height for the middle row of your beds.

Columbine.

Columbine.

Columbine being, on the stage, the daintiest of dancers and beloved of Harlequin, I've often wondered whether she was named for the dancing flower or if for her sweet sake. However, a certain man I know, who seems possessed of all odd bits of knowledge, tells me that the flower is named from the Latin "columba," a pigeon, its spurs resembling the beak of that bird. Yet in the face of wisdom, I like the dancing lady best. And how my yellow and rose and white and blue and scarlet blossome will be pirouetting in a week or two! Yours, too, I hope; you'll just love them. They rise on slender stems two feet above their nest of fern-like foliage; they want good soil and sunshine and are perennial. Since they bloom so early in the season, I would put out a few plants now for this year's flowers and sow a package of mixed colors a little later for next year.

Lady's Slipper (Annual).

a package of mixed colors a little later for next year.

Lady's Slipper (Annual).

Be sure to sow ten cents' worth of balsam, or lady's slipper. This old friend has been much improved during the last few years and grows in immense clusters on beautifully straight stalks. In July and August it bears lovely camellia-like flowers in coral, white, pale pink and purple. Sow in a large clump, but purple. Sow in a large clump, but do not crowd the plants. They are about two feet high, and mine grew in partial shade last year and were lovely. They will grow almost any-where, merely asking for plenty of

I cannot say too much in favor of this handsome flower. Tall. straight and clean, its flowers last for weeks during July, August and September—and such artistic colors! Last year I had the "giant" favored varieties in buffs, browns, soft brange, old rose and lavender. The colors all had an "old" faded look. I saw some in a neighbor's garden that were very ugly—magenta reds and glaring yellows. But you will never be without them if you get the proper colors.

I strongly recommend sowing this beautiful and showy annual. Altho an annual it sometimes survives the winter for me; so do not pull it up next fall, but cover heavily with manure. Seeds sown now will bloom from July till frost. Sow in ordinary good soil and sunshine.

Your sweet pea trellis of poultry wire (or brushwood) should now be in place; and don't forget to spray your rose bushes.

J THE CASE OF JENNIE BRICE MYSTERY, DESPERATE AND BAFFLING, IN REAL LIFE THE BEST OF THE MYSTERIES OF MARY ROBERTS RINEHART

Continued From Last Sunday.

"Explain that."

"Most of Jennie Brice's decollete gowns were cut to a point. This would conceal such a scar."

Miss Hope was excused, and Jennie Brice's sister from Olean was called. She was a smaller woman than Jennie Brice had been, very ladylike in her manner. She said she was married and living in Olean; she had not seen her sister for several years, but had heard from her often. The witness had discouraged the marriage to the prison-

"Why?"

"She had had bad luck before."

"She had been married before?"

"Yes, to a man named John Bellows. They were in vaudeville, together, on the Keith Circuit. They were known as The Pair of Bellows."

I sat up at this for John Bellows had boarded at my house.

"Mr. Bellows is dead?"

"I think not. She divorced him."

"Did you know of any scar on your sister's body?"

"I never heard of one,"

"Have you seen the body found at Sewickley?"

"Yes"—faintly.

"Can you identify it?"

"No, sir."

A flurry was caused during the afternoon by Timothy Senft. He testified to what I already knew—that between three and four on Monday morning, during the height of the flood, he had seen from his shanty-boat a small skiff caught in the current pear the Niew.

Bridge. He had shouted encouragingly to the man in the boat, running out a way on the ice to make him hear. He had told him to row with the current, and to try to steer in toward shore. He had followed

him hear. He had told him to row with the current, and to try to steer in toward shore. He had followed close to the river bank in his own boat. Below Sixth street the other boat was within rope-throwing distance. He had pulled it in, and had towed it well back out of the current. The man in the boat was the prisoner. Asked if the prisoner gave any explanation—yes, he said he couldn't sleep, and had thought to tire himself rowing. Had been caught in the current balore he knew it. Saw nothing suspicious in or about the boat. As they passed the police patrol boat, prisoner had called to ask if there was much distress, and expressed regret when told there was.

Tim was excused. He had made a profound impression. I would not have given a dollar for Mr. Ladley's chance with the jury, at that time.

CHAPTER XIII.

The prosecution produced many witnesses during the next two days:

Shanty-boat Tim's story withstood the most vigorous cross-examination. After him, Mr. Bronson from the theatre corroborated Miss Hope's story of Jennie Brice's attack of hysteria in the dressing-room, and told of taking her home that night.

that night.

He was a poor witness, nervous and halting. He weighed every word before he said it, and he made a general unfavorable impression. I thought he was holding something back. In view of what Mr. Pitman would have called the denouement, his attitude is easily explained. But I was puzzled then.

So far, the prosecution had touched but lightly on the possible motive for a crime—the woman, But on the third day, to my surprise, a Mrs. Agnes Murray was called. It was the Mrs. Murray I had seen at the morgue.

I have lost the clipping of that day's trial, but I remember her testimony perfectly.

day's trial, but I remember her testimony perfectly.

She was a widow, living above a small millinery shop on Federal street, Allegheny. She had one daughter, Alice, who did steno graphy and typing as a means of livelihood. She had no office, and worked at home. Many of the small stores in the neighborhood employed her to send out their bills. There was a card at the street entrance beside the shop, and now and then strangers brought her work.

work.

Early in December the prisoner had brought her the manuscript of a play to type, and from that time on he came frequently, sometimes every day, bringing a few sheets of manuscript at a time Sometimes manuscript at a time. Sometimes he came without any manuscript, and would sit and talk while he smoked a cigaret. They had thought

smoked a cigaret. They had thought him unmarried.

On Wednesday, February twenty-eight, Alice Murray had disappeared. She had taken some of her clothing—not all, and had left a note. The witness read the note aloud in a trembling voice:

"Dear Mother: When you get this I shall be married to Mr. Ladley. Don't worry. Will write again les. Don't worry. Will write again from N. Y. Lovingly,

From that time until a week before, she had not heard from her
daughter. Then she had a card,
mailed from Madison Square
Station, New York City. The card
merely said:

"Am well and working Alice"

Station, New York City. The card merely said:

"Am well and working. Alice." The defense was visibly shaken. They had not expected this, and I thought even Mr. Ladley, whose calm had continued unbroken, paled. So far, all had gone well for the prosecution. They had proved a crime, as nearly as circumstantial evidence could prove a crime, and they had established a motive. But in the identification of the body, so far they had failed. The prosecution "rested." as they say, although they didn't rest much, on the afternoon of the third day.

The defense called, first of all, Eliza Shaeffer. She told of a woman answering the general description of Jennie Brice having spent two days at the Shaeffer farm at Horner. Deing shown photographs of Jennie Brice, she said she thought it was the same woman, but was not certain. She told further of the woman leaving unexpectedly on Wednesday of that week from Thornville. On crossexamination, being shown the small photograph which Mr. Graves had shown me, she identified the woman in question. As the face was in shadow, knew it more by the dress and hat: she described the

black and white dress and the hat with red trimming.

Then called me. I had She came, heavily coated.

with red trimming.

The defense then called me. I had to admit that the dress and hat as described were almost certainly the ones I had seen on the bed in Jennie Brice's room the day before she disappeared. I could not say definitely whether the woman in the photograph was Jennie Brice or not; under a magnifying-glass thought it might be.

Defense called Johnathan Alexander, a druggist who testified that on the night in question he had been roused at half-past three by the prisoner, who had said his wife was ill, and had purchased a bottle of a proprietary remedy from him. His identification was absolute.

The defense called Jennie Brice's sister, and endeavored to prove that Jennie Brice had had no such scar. It was shown that she was on intimate terms with her family and would hardly have concealed an operation of any gravity from them.

The defense scored that day. They had shown that the prisoner had told the truth when he said he had gone to a pharmacy for medicine that night for his wife; and they had shown that a woman, answering the description of Jennie Brice, spent two days in a town called Horner, and had gone from there on Wednesday after the crime. And they had shown that this woman was attired as Jennie Brice had been.

That was the way things stood

That was the way things stood on the afternoon of the fourth day, when court adjourned.

Mr. Reynolds was at home when I got there. He had been very much subdued since the developments of that first day of the trial, sat mostly in his own room. and had twice brought me a bunch of jonquils as a peace-offering. He had the kettle boiling when I got home. "You have had a number of visitors," he said. "Our young friend Howell has been here, and Mr. Holcombe has arrived and has a man in his room."

Mr. Holcombe came down a moment after, with his face beam-

Mr. Holcombe came down a oment after, with his face beam-

"I think we've got him, Mrs. Pitman," he said. "The jury won't even go out of the box."

But further than that he would not explain. He said he had a witness locked in his room, and he'd be glad of supper for him, as they'd both come a long ways. And he went out and brught some oysters and a bottle or two of beer. But as far as I knew, he kept him locked up all that night in the second-story front room. I don't think the man knew he was a prisoner. I went in to turn down the bed, and he was siting by the window, reading the evening paper's account of the trial—an elderly gentleman, rather professional-looking.

Mr. Holcombe slept on the upper

Mr. Holcombe slept on the upper landing of the hall that night, rolled in a blanket—not that I think his witness even thought of escaping, but the little man was taking no

chances.

At eight o'clock that night the bell rang. It was Mr. Howell. I admitted him myseif, and he followed me back to the dining-room. I had not seen him for several weeks, and the change in him startled me. He was dressed carefully, but his eyes were sunken in his head, and he looked as if he had not slept for days.

Mr. Reynolds had gone up-stairs, not finding me socially inclined.

"You haven't been sick, Mr. Howell, have you?" I asked.

"Oh, no, I'm well enough, I've been traveling about. Those infernal sleeping cars—"

His voice trailed off, and I saw him looking at my mother's picture, with the jonquils beneath.

"That's curious!" he said, going closer. "It—it looks almost like Lida Harvey."

"My mother," I said simply.

"Have you seen her lettely."

"My mother," I said simply.
"Have you seen her lately?"
"My mother?" I asked, startled.
"No, Lida." "I saw her a few days ago."

"Yes. She came, here, Mr. Howell-two weeks ago. She looks badly—as if she is worrying." "Not—about me?" he asked eager-

ly.

"Yes, about you. What possessed you to go away as you did? When my—bro—when her uncle accused you of something, you ran away, instead of facing things like a man."

"I was trying to find the one person who could clear me. Mrs. Pitman." He sat back, with his eyes closed: he looked ill enough to be in bed.

"And you succeeded?"

'And you succeeded?"

"No."

I thought perhaps he had not been eating and I offered him food, as I had once before. But he refused it, with the ghost of his boyish smile.

"I'm hungry, but it's not food I want. I want to see her." he said.

I sat down across from him and tried to mend a table-cloth, but I could not sew. I kept seeing those two young things, each sick for a sight of the other, and, from wishing they could have a minute together, I got to planning it for them.

"Perhaps," I said finally, "if you want it very much."

"Very much!"

"And if you will sit quiet, and stop tapping your fingers together until you drive me crazy, I might contrive it for you. For five minutes," I said. "Not a second longer."

He came right over and put his arms around me.

"Who are you, anyhow?" he said. "You who turn to the world the frozen mask of a Union street boarding-house landlady, who are a gentlewoman by every instinct and training, and a girl at heart? Who are you?"

"I'll tell you what I am." I said,

"I'm a romantic old fool, and you'd better let me do this quickly, before better let me do this quickly, before I change my mind."

He freed me at that, but he followed to the telephone, and stood by while I got Lida He was in a perfect frenzy of anxiety, turning red and white by turns, and in the middle of the conversation taking the receiver bodily from me and holding it to his own ear.

it to his own ear.

She said she thought she could get away; she spoke guardedly as if Alma were near, but I gathered that she would come as soon as she could, and, from the way her voice broke,

The next day was the sem one of the trial. We wen every phase of conviction: Brice was living. Jennie Brice dead. The body found at ley could not be Jennie Brice body found at Sewickley was Brice's. And so it went on. The defense did an unathing in putting Mr. Ladley stand. That day, for the fine showed the wear and tea ordeal. He had no flower buttonhole, and the rims of were red. But he was quality to endure the eye crowd, but to find in its gaz of stimulant. He made a geness, I must admit.

He replied to the usual quality after five minutes Mr. Liewellyn got down to "Mr. Ladley, you have syour wife was ill the night fourth?"

"Yes"

"She had a functional trouble, not serious."

"Will you tell us fully the of that night?"

"I had been asleep when awakened me. She asked medicine she used in these I got up and found the bottle was empty. As she

TERVES are the one thing we Women get no sympathy for.

Men have scant patience with an ailing female, and even the convalescence following a severe illness is a sore trial to them. So it is no wonder that when it comes to a thing like nerves, men are entirely without comprehension.

Altho we are acknowledged to be the weaker sex, we are expected to keep our deficiencies out of sight. If we make a parade of anything approaching symptoms, domestic war follows at once. As one man brutally put it, "If there is nothing else the matter with a woman, her feet hurt her."

SUNDAY MORNING

put it, "If there is nothing else the matter with a woman, her feet hurt her."

So we women have learned prudence, and/no matter how much we may feel inclined to "fly out of our skins," we are skilled in presenting calm exteriors to our men folks. This may indeed be one of the reasons why our nervous fits seem to grow worse instead of better.

**E MAY be rushing pell mell thru a department store, and and have just about decided that in order to get all of our shopping done before our matinee engagement it will be necessary to omit our usual midday ice cream soda, when whom should we bump into but our so-called lord and master, out on his noon hour; and when he inquires have we had lunch, or would we like some ice cream, we must just simply let ourselves relax, forget all the things we had to do, and give ourselves up to our regular female occupation of smiling and talking agreeably. We must not even permit ourselves the consciousness, that this inopportune encounter will necessitate a helter skeller trip down town in the morning, sandwiched in somehow beween our housework and our engagement with the dressmaker. In the evening, if he suggests that we go to the moving pictures or hurry off to the first performance at a vaudeville house, we must put out of our minds the basket of stockings up stairs, profess ourselves delighted, and stack the dishes, with no thought of now tired we will be on our return, nor how utterly impossible it will be to do them in the morning, all thick with grease, and all the regular work to do besides.

We must always be ready in the evenings for some two-handed pinochle, or prepared to get up a game of bridge, no matter how we may ache with fatigue, and we must in the bargain urge our exhausted minds into playing a really intelligent game, notwithstanding how stupid we seem to have grown about other things.

WOMAN'S nerves are a thing to be loked at: they say they

WOMAN'S nerves are a thing WOMAN'S nerves are a thing to be joked at; they say they are a doctor's means of livelihood, and so on; they are a failing peculiar to the sex, a deformity to be always concealed. Yet, if women should really settle themselves to an intelligent review of their troubles, they would see that their nerves are not so much the fault of circumstances as of themselves. Much as we may rail inwardly at the enforced ice cream, the movies the enforced ice cream, the movies and the vaudeville performance, we must really acknowledge to ourselves in all justice, that all of these things are a relaxation not only for the man of the house, after his exacting day at the office, but for our-

acting day at the office, but for ourselves as well, after our siege with the babies and the housework. Amusement of this character is about as good a rest as any for the jaded nerves, whether they be feminine or masculine.

For, what do you call it when a man comes home tired and finds nothing on the dinner table to suit him; when immediately after dinner he wants the children put to bed; when on holidays and Sundays he wants them sent outside to play? Is that nerves? Of course not (the men will tell you) only women have will tell you) only women have

are not around, it is often a comfort to discuss these things. There are frequently times when we feel we simply cannot stand any longer the eternal round of housework, it is never over, and it never gets us any-

THE everlasting procession of meals, the buying and the cooking of them, takes away our appetite, and often induces a real nausea. It is an old and hackneyed saying that cooks never eat their own viands. We spend two hours preparing a meal, and an hour clearing it away, while on the other hand it takes only twenty minutes or so to consume it, and we say to

But even with the man of the house away, there are a million things to upset a woman's nerves. There are days when no matter how hard we work we never seem to get caught up with our housework. Dust appears mysteriously where only that morning we had cleaned thoroly; and when company arrives unexpectedly we cannot entertain them for looking at the white dust on the mantel, nor for smelling that ash receiver that seems to fill up while our back is turned.

The bath-room seems to be always dirty, and if there is one thing more than another that annoys us it is an untidy bath-room. It seems that we have no sooner scrubbed it and laid out freshtowels, than it is upset again. The other members of the family do not bother to fold their towels, but invariably throw them

ash receiver does seem to have a way of filling up, just bear in mind that a house without those "dirty, smelly things" is often a house of

As to the bathroom, no doubt if you went about it in a cheerful, tactful way, you might be able fo train your family to better habits. Possibly they have simply gotten into the habit of expecting you to wait on them, and you have just worried along and done it.

ONCE knew a man that had no idea where his clothes were

ONCE knew a man that had no idea where his clothes were kept, and so could not dress until his wife had laid them out for him; and another who could not get into bed until his spouse had laid out his pajamas and turned back the covers.

As to the tub, why not persuade the men of the family to bathe on the evenings immediately preceding the days on which the room is to be cleaned anyway? The women of your household can be trained to do their own straightening up, and so need not be tied down to systematic bathing.

Then, again, it often seems that we no sooner have the living-room swept and dusted and arranged nicely for company, than the baby proceeds to pull the magazines off onto the floor, and the next oldest spreads the crumbs of his bread and butter all over the rug, not to speak of the embroidered sofa pillows that get piled in the middle of the floor, while we are away answering the door bell. Of course, this only means that the room must be done over, and after a few such experiences, evening finds us with nerves all a-quiver. All day long we have never seemed to get caught up but have hustled along breathlessly conscious of all the things yet to be done.

N CERTAIN days the children seem to be especially bad, days when we are sewing or geting ready for company; and yet when they are in bed and we are able to think it all over calmly, we realize that it was we who were the bad ones and not the children. They would have been as usual if we had not been so busy and possibly if we had sat dawdling over a bit of embroidery they would have all been little angels.

We do not feel called upon to conceal our feminine failings from our children as we do from our husbands, with the result that one day

WOMAN of intelligence, how-A ever, will not permit her nerves to get ahead of her manner. Housework can be in this manner.

the way, with no occasion for doing

Of course, if the downstairs rooms

be carefully swept and dusted for possible company, and then if the upstairs dust be swept from the bedrooms and upper hall in its one natural direction, of course the par-

for and dining-room will have to be done over. A woman who finds her-self in the chronic position of never

getting anywhere should take a day off and with pencil and paper plan out her work for the week, and then, no matter what happens, adhere rigidly to this arrangement.

Allowance must be made for other

people's failings and comforts. If the

any part of it over.

back on the rack any old way, and as for wiping off the basin or the glass shelves, why, they wouldn't think of such a thing. It would seem that it is always our lot to be tidying up after other

we must confess we are glad to pack lunch baskets and send our children off to school, when it is a real, soothing relief to settle them so planned that it does get out of for a nap, send them out to play, or tuck them into bed right after NE EVENING I heard a woman, the happy (?) mother of twin boys, inquire of her husband every few minutes, "What time is it now?" and when

she finally announced her inten-tion of putting them to bed anyway, notwithstanding the fact that it was still light, a woman on the adjoin-ing porch remarked audibly that some women should never have been As it had been two decades at least since the uncharitable one's children had been little, she had no doubt had ample time to forget her own trials and tribulations, that she had experienced even to the control of th

never made me nervous." The daughter had to blushingly acknowledge the truth of the accusation, but privately she could not see how she had committed a crime. We seem to live a totally different life from the country of the country

different life from the one our mothers led. We cannot be still and it is very difficult to relax. If we seem to have two minutes of

leisure, there is always something

There are days so strenuous that

had experienced even in the smooth, no-hurry, why-worry world in which it had been the fortunate lot of her youth to live.

It had probably been the experi-It had probably been the experience of the mother of the twin boys, as with the rest of us, that whenever she attempted to sew, the children made it a point of climbing all over the bed that had temporarily become a cutting table, and she was lucky if she did not jump right in the middle of her tissue paper pattern; she could not move her elbows owing to their proximity; and she was afraid to run the machine for wondering where little feet and fingers were.

gers were.

If she or any of the rest of us were If she or any of the rest of us were to make the mistake of mentioning these troubles to the head of the house, he would merely turn to the sporting page, put his feet up, and inquire. "Well, why sew? Mend' your old things and save money."

Whenever we go to sweep a room, the children are under our feet every minute, and as soon as we are thru.

minute, and as soon as we are thru

their own brooms; whenever we set the table, they pull down the cream pitcher so that it spills all over the tablecloth and the rug; the minute we lift the kettle of boiling soup from the stove, they are right there apparently waiting to be tripped over and scalded.

I once heard a porveyer years

I once heard a nervous young mother observe to her toddling child. "Now if mother falls over you, it will not be because she wants to, but because you were under her feet and tripped her." When we all laughed, she failed to see the joke.

HE could not perceive, in common with many other women like her that her that

ME could not perceive, in common with many other women like her, that there was nothing wrong with the children, and that the trouble lay entirely with herself. If when she had some important work to do, she had first given herself to the task of providing them with something to keep them amused and happy, she would not have found them half so trouble-some, and the task would have been completed in one-half the time.

If, when sewing, she had given

completed in one-half the time.

If, when sewing, she had given them some scraps and a needle and thread, they would have taken great delight in making clothes for dolly; and if when settling herself to her correspondence, she had provided them with pencil and paper to scribble on, all would have been peace and quietness. Very important duties should be attended to during the babies' nap hour, or during the time the older ones are at school, or if you have a relative that will occasionally take them for a walk, save your most nerve-racking tasks for this period.

I once looked in amazement at the fresh-cheeked, bright-eyed young mother of three boys, aged six, four and two, and as I knew her very well, I said to her: "However do you manage it? Most women in your shoes would have been in a sanitorium long ago."

She laughed and replied: "Well, I Very important duties should be

sanitorium long ago."

She laughed and replied: "Well, I get up at six in the morning, as soon as they are awake, and in the afternoon, when the two youngest are asleep, and the oldest is out playing, I lie down myself. Sometimes I do not really sleep, and sometimes five minutes is all I can spare, but at least I lie down in a darkened room and try to think of absolutely nothing. At five o'clock I take a bath and put on a different dress and somehow my mind feels just as resomehow my mind feels just as re-freshed as my body does. Then, too. I take my oldest to school every day and bring him back again. I think my daily airing does me as much good as anything."

T may be all very true that women never get any real va-cation, but then each woman must find her own means of relaxa-

own salvation for surely we of mod-ern times should realize the truth of what they knew in the old days of mar, namely, that we ourselves are heaven and hell.

MEN who possess an endless amount of small talk are usually spoken of as popular and so they are to a certain extent. There is another type with a more or less far-reaching influence in the community. She is the tactful talker and accommodates herself to the one she is talking with at the time. I'll describe my favorite type of woman.

She must be more or less well read, gradually leading the person she is talking with to the subjects most congenial to both, but talk herself just enough to be interesting. If my favorite type doesn't happen to know much about the subject touched upon she wisely has cultivated the habit of asking intelligent questions.

There is one form of popularity that is the outward effect of unselfishness, merely a desire to cause pleasure for some one else. My favorite type of woman listens if the other one wishes to talk and talks if the other person objects to doing so.

Any charm there may be in socalled small talk is merely in avoiding topics of conversation better not
touched upon. Most women have had
the experience from time to time of
having some friend say: "What did
you do to So-andSo.' he couldn't
praise you enough?" Nine times out
of ten the answer will be: "Nothing,
I just let him talk about himself."
Women who are wise and judicious
not only refrain from talking too
much, but also cultivate the habit
of listening intelligently. Why? Because every one who has given the
subject careful thought realizes that
nothing tires a woman more than too
much talking and also that to be a
good listener is instructive or entertaining, as the case may be.

Two Smart Actors.

In a very serious drama a prisoner was obliged to read aloud a letter which the jailer brought to him. To save himself the trouble of committhing it to memory the actor had been accustomed to have the actual letter handed to him. One evening the jailed thought it would be a good joke to hand the prisoner a blank sheet of paper. The prisoner, starting to read it, was for a moment thrown off his balance, but, recovering himself, said with the most sering himself, said with the most ser-ene calmness:—

"I am obliged to make an avowal to you. Brought up by parents of low estate, I do not know how to read. I beg that you will have the goodness to acquaint me with the contents of the letter."

The spacer was ground but his

The snarer was snared, but his wits saved him, too. After fumbling at the letter the jailer said:— "Willingly; but I must go and look for my spectacles."

PAGE OF THE BEST OR OF, THE WEE

A town youth got a job on a farm, and the farmer put him to work at

"It's the spring," the farmer said, and I want you to make the pig-sty and the cow-stable and the hen-house and all the other homes of the stock clean and sweet and com-

fortable."

The new hand from the city worked with a will for two days. But, on the third day, he rushed into the farm kitchen with both eyes closed, his mouth swollen, and red lumps standing out all over his face and neck and hands.

"Clue me my money" he said "Give me my money," he said,

What's the matter?" the farmer "Matter?" said the youth. "No more country jobs for me. Matter? Bothered if I know what's the matter, but it happened when I started to spring clean the beehives."

Effect of the Sermon.

It' was the morning of the Sabbath. As Sandy was making his way homeward after attending kirk the minister happened to overtake him. "Eh'," said Sandy, "that was a powerful discourse on 'Thrift' ye preached this morning." The minister smiled benignly. "A'm glad ye were able to profit by it," was his gratified reply. "Profit!" exclaimed Sandy. "Why, mon, I would ha' put ma saxpence into the plate wi-out a thought for yer providential words. They saved me fourpence there and then." Effect of the Sermor

A Nice Calculation.

A tourist in Scotland came to a wide ferry. It was stormy and the wind was constantly increasing. The Scotch ferryman agreed to take the tourist across, but told him to wait until he had first taken a cow across. When he had returned and started across with the traveler the latter became curious. "Will you tell me why you took the cow over and made me wait?" he asked. "Well, now," explained the ferryman, "ye see, the coo wur valuable, and I feared th' wind wud increase so th' boat micht upset on th' second trip."

Lady: "Please send me a ton of your best coal."

Coal Merchant (just returned from week-end in Paris): "Yes, madam. Will you have them a la cart or coal de sack?"

"Why, look here," said the merchant who was in need of a boy, "aren't you the same boy who was in here a week ago?"
"Yes, sir," said the applicant.

And didn't I tell you then that I wanted an older boy?"
"Yes, sir. That's why I'm back, I'm older now."

Just Normal "Are you as perfect physically as you seem to be?" he asked.
"Certainly," she replied.
"Has there ever been any insan-

ity in your family?" Have you a depraved taste of any kind?

"Certainly not."
"Are your teeth in good condition and do you see and hear perfectly?" "Ves."

"Are you ever bothered by insomnia, or headache, or indigestion?"

"Thank heaven! Now let's make love a little while."

Disappointed.

"I saw you and your hurband at the play last night, Mrs. Wedgcomb. How did you like it?"

"Tm sorry we wasted our money on it. Several people told me I would be shocked, but I wasn't."

First Clubman—"Well, how are you?"

First Clubman—"My dear chap, I didn't mean ek I thought I was in for rheumatic sever, but just managed to stave it off, and today a twinge in my left shoulder suggests—well, it may be neuratis or—"

Second Clubman—"Er—so-so, perhaps. Last weit literally."

"About how much a day?" "Oh, nae mair nor a quart."
"Why," protested the author, "I couldn't drink that much water in a

Put His Foot In It.

A club of eccentric young men had one of their rules that on Tuesday evenings any man who asked a question in the clubrooms which he was unable to answer himself, should pay a fine of ten dollars.

One evening McLoughlin asked the following:

following:

"Why doesn't a ground squirrel leave any dirt around the top of his hole when he digs it?"

After some deliberation, Mc-Loughlin was called upon to answer his own question. "That's easy," said he; "the squirrel starts at the bottom and digs up."

"All very nice," suggested a member, "but how does he get to the bottom?"

"Well,' 'answered McLoughlin "that's your question.?"

Not to Be Trifled With.

A New Yorker tells of a unique experience in an establishment known as the "Palace Hotel," in a small town of the Middle West.

This New Yorker had been assigned to a third-storey room. About the first thing he noticed when he had unpacked his suit case, was that no water or towels had been provided for him. Accordingly he rang the bell. No one answered.

Another ring—no reply. Four times did the New Yorker endeavor to get an attendant.

Finally, in desperation, the New Yorker placed his thumb upon the bell and held it there until the summons was heeded.

A waiter entered. He was a glant of a man, gaunt, black-visaged and forbidding.

"Did you ring that bell?" he de-

The Greedy Fox.
One cold winter's day a hungry fox was wandering where he could get something to eat, when he saw a man with a small wagon full of fish;

ADVENTURES OF THE TWINS AND GOOD, KIND, DEAR DOG MUTT. JOHN GOES TO SLEEP ON A MAT AND WHAT HAPPENS.

A carpet lay upon the grass, John thought, "I'll on this lie. And have a sleep right here, out doors; While no one else is by." His brother said, "Now John, please don't, You know you're doing wrong." John said, "Say! kid, you make me sick, You always sing that song."

Now in the evening Jane came out, And up she rolled the mat; John did not wake, so there he was, Just caught like any rat. Then, by and bye, young John awoke; "Oh! oh!" he screamed, "Oh! my! Please take me out, do take me out, Or else I'll surely die."

Poor Pa stands there, his eyes pop out, He tears his hair and cries, "Oh! something's got my child in there,
Right now before your eyes."
Well! Mutt, good dog, was there, of course,
And great was his distress;
He showed more brains than Pa or all,
I really must confes.

"Oh! Oh!" he screamed—"Oh! My!
Please take me out, do take me out,
Or else I'd surely die."
Mutt grabbed the mat, you see,
Then shook so hard he shook John out
As nicely as could be.

Now, when he saw John's squeezed up plight, He grabbed the mat, you see,

Then shook so hard he shook John out; As nicely as could be. John was not hurt the slightest bit, But Mutt, I'll have you know, Had dust all in his eyes and nose:

Poor Mutt was choky all that night; Oh, dear; to hear him puff! But now he's sneezed it all away; By using S. F. Snuff.

'Twas sad, but it was so.

Perhaps you do not know what S. F. Snuff is. S. F. Snuff is SMILING FACE snuff, of course -SMILING FACE snuff is a joke-a joke is something that makes you SMILE—so a SMILE and S. F. Snuff, must be almost one and the C. A. Macphie.

QUESTION MARK TELLS TURVEY WHY A CERTAIN BIRD IS CALLED THE SWALLOW.

NOW I HOPE YOU ARE once more.

You know if you live in Canada you think the Canadian flag is the only flag; now don't you?

If you live in the United States you think the United States flag is the only flag; now don't you?
If you live in the Fiji Islands, you think the Fiji flag is the only one; now don't you?

Well! in those days the birds had a flag, (Now what do you think of that?), and they thought it was the only flag, too, just as we do. It was very small; just about the size of a cork to a small bottle, and was in the shape of a pair of wings.

My! those birds were proud of that flag! In fact, some of them were too proud, and made much, too much, of a fuss over it.

The peacock strutted 'round screaming out; "What flag is like ours?—NONE." The turkey walked 'round gobbling out, "What flag is like ours?—
NONE." But my! I wish you could have heard the rooster; my dear, I really wish you could have. How he pranced! how he now he crowed -"What flag is like ours?— NONE, NONE, NONE." It would make you weary to hear him, it really would. After a time the animals, squirrels, monkeys and every one got sick and tired of hearing about the flag, and nothing but the flag, day inand day out. So one day they all put their heads together to think

of a plan to get rid of it. They said; "Tonight, when the moon is dark, Mr. Squirrel (the nimblest of us all) must climb the tree where the flag is kept and fly with it. When he reaches the

Mr. Squirrel said he would, so that night, when the moon was dark, he crept step by step, up the rocks, till he reached the place where the flag was kept, but guess what happened. (Now guess hard). Why! the fork-tail saw him coming (just in time too), so he pulled the flag from the place where it was, and away he flew with it over hill and dale.

Next day all the animals put Next day all the animals put their heads together again, and said, "The only thing to be done now is to wait till the moon is dark, then creep QUIETLY up the precipice where the fork-tail has taken the flag, throw a noose over his legs, and there he is."

Mr. Squirrel said he would, so that night, when the moon was dark, he crept quietly, quietly, step by step, up the precipice, till he reached the place where the flag was kept. Little fork-tail

the flag was kept. Little fork-tail was sleeping away, dreaming the nicest of dreams, so Mr. Squirrel took the noose, threw it, and there the poor little fork-tail was tied, hand and foot, you might

However, things do not always turn out as they might, (which is a very good thing), for when the fork-tail saw what was going to happen, and that his dear little happen, and that his dear little flag was almost gone, guess what he did. (Now guess hard). Why! he made a dive with his beak, a twist with his neck, and down went the flag just like a fly—in other words he SWALLOWED

So, if you are accustomed to putting two and two together, and have any sense as well, you can see for yourself why the fork-tail is called the SWAL-

All the birds were very sorry to lose their flag, but, as the poor little fork-tail was rather ill next day (I am sure you would be too you had swallowed a whole flag) they had to nurse him back to health, and bring the SUPER-ALAGLORIOUS SMILE back to his face once more.

Turvey's ma said yesterday, "I wonder why that child does not like the wings on my new

Don't you think "Fork-Tail" is a more sensible name than Swal-

pond down he must jump, in the water it must go, then that will be the end of this strutting, gob-

bling, and crowing. guess what happened. (Now guess hard). Why! the forktail bird (that is what the swallow was called in those days) saw him coming, so he pulled the flag from the branch and away he flew with it, over hill and

Next day all the animals put their heads together again, and said, "Tonight when the moon is dark, Mr. Squirrell must climb the rock where the fork-tail has

C. A. Macphie A FOREST SECRET. "Do you know how to tell a hardwood tree from a softwood tree?" asked a forester. "I'll tell you how to do it, and the rule holds good not only among the familiar pines and walnuts, but in the antipodes, among the strangest banyans, baobabs and whatnots. Softwood trees have needle leaves, shim, narrow, almost uniform in breadth.. If you don't believe me, consult the pine, the spruce or the fir. Hardwood trees have broad leaves of various shapes—the oak, the ebony, the walnut, the manogany, and so on."—The ing's Own.

It Takes Two to Make a Quarrel. A funny incident occurred in a city street not long ago in which a monkey and a dog were concerned. An organ grinder appeared on the street accompanied by the usual bright little monkey. A big dog appeared at the same time and seriously objected to the presence of the monkey. The dog broke away from the children with whom he had been playing and made a dash for been playing and made a dash for the stranger, growling furiously. To the surprise of everyone, the monkey did not seem in the least afraid. He stood perfectly still in evident curiosity, waiting for the dog to come up to him. This dis-concerted the dog at once, for he would much prefer to chase some-thing that would-run, and not stand its ground.

As soon as the dog was close beside the monkey the funny little scarlet-coated creature courteously dofffed his cap. Instantly there was a laugh from all the bystanders. The dog was non-plussed. His head dropped, his tail dropped between his legs, he looked like a whipped cur and not at all like the fine dog he really was. He turned and ran back home, and the laughing chilback home, and the laughing children could not persuade him to return. As for Jocko, he climbed upon his master's organ and went peacefully on his way. Evidently, althounly a monkey, he wanted no disagreement, and he knew instinctively that it took two to make a quarrel.

The editor of the Evening Star was deeply engrossed in his work when he was suddenly interrupted by the office boy, who remarked:

"There's a tramp at the door, Mr. Hyde, and he says he ain't had nothin' to eat for six days."

"Fetch him in," said the editor. "If we can find out how he does it, we can run the paper for another week."

Little Tommy ran into the kitchen, all out of breath, with a piece of "The Sunday World" in his hand. Of course it had the "SMILING FACE" page in it. He showed it to his mother and said, "Oh, mother, look! Everybody has a chance to send in a nice story, to be printed." So his mother said, "Tommy, then I don't see why you shouldn't send in a story, as you have been writing some very nice ones in school." Then Tommy sat down and wrote one of Tommy sat down and wrote one of the prettiest fairy tales anybody ever heard. It was called "The Fairy Queen." So he sent it in, and what do you think? Why, the very next week, when he got "The Sunday World" and looked at the "SMILING FACE" page, he saw his very own story in print.

He was so overloved that he tum-

very own story in print.

He was so overjoyed that he tumbled over two chairs, spilled a bottle of ink, and did some other damage in his excitement to tell his mother. When he, at last, got into the kitchen, he showed it to his mother, who was very glad.

"Now." said she, "You must send for an S. F. C. Button."

And that was the very next thing

"I beg your pardon," said the man who had spoken first. "I cannot blame you for not wanting to part with the faithful old animal." And the two who had toiled long years, and had grown old together. resumed their journey.—Our Dumb

His First Long Pants

Gee, but I wuz proud 'bout a month ago, when paw says I should be wearin' long pants now. I'd been sayin' so myself for a long time back, but ma she kep' sayin' there approaching, the fox ran ever to the man and said in a fainting voice:

"Kind sir, won't you tell me where you got all the fish from?" "Oh," replied the man, "at the river beyond."

So off ran the fox as fast as he could to the river side. "Now," said he "I'll put my tail in the river, and have all the fish I want to eat." So saying he put his tail in the river, he held it there for quite a while, and felt that the tail was getting heavier and heavier every minute. "Oh," said the fox, "my tail is getting wuz no hurry, and that I had best stay a boy as long as I could. But when pa saw me awalkin' down street one day in my last year's knee pants which were away too small fer me, he told ma he thought I would look better in long trousers, especially as I wuz gettin' to be such a big boy now. So I took advantage of the opportunity, like Mr. King, the Sunday school superminute lenger." and so on, until he thought it was time to pull it out, he pulled and pulled and pulled, until his tall tore away and was left intendent says we should, and I coaxed so hard, that with pa to back me up, I got ma to promise that next suit I got would have long pants. Say, I was glad 'cause Billie Watson and Walter Lawson had both got their new suits, and they hadn't got long pants, and now I wuz going to get a new suit for spring, with long pants. "Now," I says to myself, "you'll see that Annie Cowan won't be so mean to me now. She'll want me to go walkin' home from school with her now, I guess, but I'll just pass by with my head up high, 'n if she says 'hello,' I'll stop and ask her how her ma is, kind a scornful like, and then pass on Goe but she'll Without the flour they went for; They stopped to play upon the way, And forgot what they were sent for. and then pass on. Gee, but she'll be mad, but I won't care, for girls don't cut no figger with me any One Sunday morning an aged

Well, I went to Jim Hill the tailor, and got measured for that there suit. Man alive, it makes a fella feel big ta be gettin' measured fer a pair a long pants. I felt I was just about the best man in all the town of Lundboro that day. Jim, he helps me pick out some cloth, and then took his tape and measured me. Say, I stood there just as straight as could be, and first thing I knowed Clara Little and Becky Burgess came down the street from the postoffice, and looked right in the tailor shop winds, but I never let on I saw them, and asked Mr. Hill kinds loud if he thought the crops would

be good this year.

Well, that suit was ready Saturday night, just before Sunday. I took it home Saturday night and tried it on. Pa said I looked smaller 'n he thought I would, and sister Marjorie laughed ta beat the sister Marjorie laughed ta beat the band (I got even with her you bet). But, say, d'ye know ma didn't seem ta like my suit one bit. She said I looked awful handsome an' manly in it, but she seemed kinda thoughtful, as if she was thinkin' of something sad. Then she came an kissed me, but her eyes were kinda shiny and bright, and she looked over my shoulder for a long time and hugged me like everyime and hugged me like every

Next morning I got up specially early, and after breakfast I put on that suit. Just as I was ready to go down stairs I looked out the winda, and there wuz Johnny

Buchanan an Harry Wanless an Bob Brown, all going past ta Sun-day school, and they all had short pants on, an' the sun wuz shinin' an' it wuz awful bright, an' lots of people seemed ta he on the street, an' say, dye know I began to feel kinda shaky, and to wish I hadn't

put on those pants so soon, and I did wish I wasn't the only fella wearing his first pair a long pants

Sunday school ta start, and so I stepped out the front door, and goodness sakes my legs felt stiff, and those pants were so big it seemed to me, that I felt as if they filled up the whole gate when I went thru. I walked up the street pretty quick, but, Gee, it seemed at my legs. 'Course I tried to look as if I didn't care, and went along kinda proud looking. When I got inside the Sunday school door, little Jimmie Burling was sitting way down at the front, and he seen me down at the front, and he seen me come in, and pointed right at me, an' whispered so's everybody could hear, "Say, Bob Harris has long pants on." Then everybody turned an looked at me, and Mr. King an' some a' the others smiled at each other, an' Miss Anderson's class a girls all snickered, an Gee, but I wished I had those old knickers on again. My face felt awful hot, but I walked straight over ta where but I walked straight over ta where my class wuz sitting an' sat down kind a careless like. Then Harry Wanless told me my pants was awful wide, and Ed. Mason said the coat was awful baggy across the shoulders, an' Bob Brown told me I had my braces pulled up too tight. But, say, I just said, "If you fellas are sore 'cause you ain't got long pants, just keep quiet er I'll fix yuh after Sunday school." Ed. Mason said he didn't know about that, 'n I wuz just going to tell him I wasn't ascared when the superintendent gave out a hymn, an' we had to stop talking. It wasn't quite so bad then, 'cause everybody wasn't looking at me; but after we sat down, and just before the lesson started, our teacher, Miss Hardy, said she'd left her class Miss Hardy, said she'd left her class book over to the secretary's desk, and she asked me to go and get it. Now, say, Miss Hardy's just the nicest lady I know, with the reddest lips, and the nicest voice, an' tho I hated like sixty to go across the front a the Sunday school to get that book, I didn't want ta refuse her, so up I got an' started. Goin' over, Herb Smith pinched my leg 'a said, "Good stuff, eh?" I walked on lookin' kind a haughty, but coming back I lammed him on the back a the neck.

Well Sunday school came to an

Well Sunday school came to an end. and church wasn't quite so

By the time I started wearin' long pants every day people had got accustomed to it. I got kindle used to wearin' long pants myself now, but, say, if you want ta make a fella feel mean, just get him ta put on long pants fer the first time, an' then ask him ta walk across the an' then ask him ta walk across the front a the Sunday school.

Mr. Squirrel said he would, so that night, when the moon was dark, he crept, step by step, up the tree till he reached the branch where the flag was kept, but

taken the flag, and fly with it

BINDING

Forthe Bride's Trousseau On the left is a very simply made gown trimmed with bands and ruffles of the material. Black satin forms the girdle of this charming little dress. The hat of green milen straw is also trimmed with a black satin bow filling the bandeau at the smartly turned up brim. A yellow rose at the side gives the needed touch of color. The gown in the centre is made of both plain and embroidered crepe. The embroidered crepe forms the waist and the puffed tunic, under which are two rather full shadow lace ruffles. The distinctive note in this gown is the arrangement of the girdle of cherry colored ribbon, which is draped from under the tunic. The parasol is of black and white striped taffets, lined with cherry red chiffon. The black chapeau is a charming selection. The suit shown at the right, of moire taffets, is simplicity itself. The old gold vest of the bolero jacket ending in two tassels of gold is fastened with a silk ornament of the moire. Organdy collar and cuffs add a distinctly dainty touch. The smart hat very well carries out the color scheme of the costume.

How to Make Your Hair Thrive

First, learn how to wash it, and what to wash it with. PALMOLIVE SHAMPOO is more than a mere cleanser, because it is made from Palmand Olive oils. These are used by scalp specialists everywhere in treating hair that is in bad con-

Their combination, in PALMOLIVE SHAMPOO, makes a splendid, rich lather that does not leave the hair dry, brittle, faded and unruly, but soft, tractable and glossy.

It cleanses thoroughly, withoutrobbing the scalp of the natural oil necessary to its health. Rinses out easily and perfectly. Price 50 cents a bottle.

Palmolive Shampoo

Palmolive Soap Combines, in most scientific form, palm and olive oils. The great natural beau-tifiers for over three thousand years. Cleanses the skin thoroughly, without

lathers freely in any water. Always hard. Neverwastes. Price 15 cents a cake.

THREEFOLD SAMPLE OFFER—Liberal cake of Pa bottle of Shampoo and tube of Cream, paci-neat sample package, all mailed on receipt of five two-cent stamps.

PRESENTS THE MOST BEAUTIFUL OF IRISH ROMANCES

By EDWARD PAULTON AND CHARLES BRADLEY

SING "THERE'S ONLY ONE IRELAND," "PICTURES IN THE FIRELIGHT," "THE ROSE OF KILDARE," "I ADORE THEE",

WEEK-THE CHARMING "LOVE'S YOUNG DREAM"

AN EXCITING GAME PLAYED BY THE JUNIOR MEMBERS OF THE Y.M.C.A. IN THE SHAW STREET GULLY—PUFF BALL. IT MAY SOUND A SIMPLE MATTER TO BLOW THE BALLOON STRAIGHT AHEAD, BUT IT'S VIGOROUS, DIFFICULT WORK.

FIRST EXERCISES IN THE OUTDOOR, FRESH-AIR GYM. STARTED BY W.E.Y.M.C.A. IN THE SHAW STREET GULLY AT COLLEGE STREET.

MARIE QUINN ON "HOME LIFE."

To live amid simple, yet beautiful surroundings at all times is one of the rules of life laid down for herself by dainty little Marie Quinn, who plays

by dainty little Marie Quinn. who plays
"Kathleen" in "The Rose of Kidare."

Her dressing-room at the theatre is arranged like the boudoir of a home, the furnishings for the purpose being carried in a special trunk.

"We have so little home life in a "You may think that in a special trunk."

"You may think that in a special trunk."

"In the slightest doubt in the world that one's surroundings have much to do with one's happiness. This is especially so with persons of a highly sensitive nature. Such minds are extremely susceptible to outside influences and should be considered.

"Every woman owes the human race"

happy, for then I can unpack my little understudy' home as I call it, and bring my hotel apartments and my dressing-room in the theatre to some semblance of a home.

"The love of beauty is inherent in woman," she observed sagely. "It is as much a component element in the make-up of the feminine mind as the love of home. make-up of the feminine mind as the love of home.

"A woman without taste is a detri-

"Every woman owes the human race at least an effort toward making the world more beautiful, and unless she stent like the Arabs, never appealed to me.

"When we arrive in a city I am influences and should be considered.

"You may think that in so small a creature as I the mind is of small is of small to me as the stoutest six-footer's might be," and Miss Quinn laughed as she surveyed herself in the dressing-room mirror.

"Every woman owes the human race at least an effort toward making the world more beautiful, and unless she studies the work of those gifted ones, who have gone before and left glorious monuments to their genius, she is wasting opportunities bestowed by the "Every woman owes the human race

MARIE QUINN, TALENTED LITTLE TORONTO ACTRESS WITH FISKE O'HARA AT THE GRAND OPERA HOUSE. MISS QUINN IN PRIVATE LIFE IS MRS. O'HARA.

"The house beautiful is my craze. In my little home in New Canaan, Conn., you will find my ideals of simplicity in art and beauty.

"My garden, however, is my greatest delight. I do not go into the cultivation of unusual plants, but I rejoice in more kinds of roses than you see even in luxuriant California.

"I am Celt enough to love roses and
