PRICE—TWO CENTS.

## CITY PLANT WAS CLOSED THIS MORNING

Municipal Gas Service Closes its Career for the Time Being at Least—Users Have Mostly Made Other Arrangements.

The City Gas Plant was today closed. All gas going through its main line was shut off this morning and belated customers, who either neglected or forgot to make other arrangements and themselves with only a small flicker at 8 a.m. Thus (due) for the time being at least the career of the city gas service which has had an unhappy and unsuccessful time of it for some years.

### DIED ON SERVICE

Former Grimby Man Dead a Year—News Just Comes to Him

(Grimby Independent) News has just been received from the mother of one of those brave men who marched away from Grimby on August 15, 1914, in the fighting "B" Squadron, 2nd Dragoons, detachment under Lieut. J. A. M. Livingston that he had succumbed to gas and wounds received in action, a year ago, and that she had but apparently been advised of his passing away.

ROBSON, Foe, Robert Charles—A native of Surrey, England, who worked and lived in North Grimby and the village of Grimby, for many years previous to the outbreak of hostilities, and was well known in this section, enlisted the first week of the war with the 2nd Dragoons, and was sent to St. Catharines for mobilization on August 15th, 1914; he went to Valcartier Camp on August 20, 1914, where he was absorbed along with the rest of the local boys into the 15th battalion, 48 Highlanders of Canada. He proceeded overseas with the 15th went through the strenuous training of Salisbury Plains and to France with the unit in February 1915. He participated in every action in which the famous fifteenth took part all through 1915, 1916 and 1917, and was gassed and wounded early in 1918, dying as a result of such gas and wounds, on May 15, 1918, and was interred at Augleux, France.

The parents of Pte. Robson, who reside at Forest Row, Surrey, England, through some miscarriage of the records in his case, were not informed of the casualty to or the death of their son, until a short time ago, and they hastened to inform his friends in Grimby of it.

### DECORATE GRAVES OF THEIR SLEEPING MEMBERS

Oddfellows Hold Special Memorial Service Yesterday Afternoon at Cemetery.

A large number turned out yesterday for the annual decoration services held by the Oddfellows in commemoration of those who are sleeping in Victoria Lawn Cemetery. Members of Union and Empire Lodges gathered at the latter's hall, Queen Street at 2.15 and under the Grand Marshall J. Albert Pay and assistant Grand Marshall William J. Davidson moved off about 2.30. They were led by the 19th band. At Geneva Street they entered cars and proceeded to the cemetery where a short memorial service was held. The speakers were Rev. Gregory Cox, of Gananoque, Grand Master of the Order in Ontario; Canon L. W. B. Broughall, Chaplain of Union Lodge and Rev. A. H. Priest, who has just returned from overseas. Grand Secretary Brooks was also present. The services were very impressive.

### PASSES AT ADVANCED AGE

A sad death occurred at the family residence, Louth Street, on Saturday night, of Mrs. Sarah Ann Wiley, at the advanced age of 77 years, after a brief illness. Deceased had lived in this district for a lengthy period and was most highly respected throughout the community. The funeral will take place this afternoon at Louth Cemetery at 2.30 o'clock.

## WINDSOR IS PLANNING NEW TECHNICAL SCHOOL

Various Municipalities Propose an Expenditure of \$250,000.

WINDSOR, June 16.—Members of the Public and Separate School Boards will meet the Industrial Committee of the Board of Education, to meet at the Collegiate Institute, where plans for the construction of a \$250,000 technical school will be discussed. The joint conference of School Boards is to unite the educational forces along the border in their request to their respective City Councils for money. The new training school will be given a grant from the Ontario Government as soon as the Councils of the five municipalities signify their willingness to pay half the bill.

The school, which the Boards hope to provide by next January, will offer technical training not only to children in the public and separate schools, but also to boys and girls employed by manufacturers. Classes will be given at unusual hours for the special benefit of employed children.

## ST. CATHARINES AND NIAGARA FALLS TYPES HAVE JOINT OUTING

Ball Game on Grand Island Ended in a Tie, Being Called on Account of the Intense Heat—Falls Boys Coming Here Soon.

Edgewater, on Grand Island, was the scene of a merry gathering yesterday when the men who "make" line two daily papers in St. Catharines were entertained by the men who turn out the news sheets at Niagara Falls N.Y. The St. Catharines party arrived at the Falls at 9 a.m., where they were met by the Power City delegation and all took a special car to LaSalle, proceeding by boat to the island. Immediately upon arrival of the party all proceeded to enjoy themselves by dancing, boating, games, etc., until the hour for luncheon, when all sat down to a fine repast, provided by the boys from the Falls. Considerable time was taken up with toast making, singing, recitations and a number of exhibitions of sword swallowing by "Danny" Wallace of Uncle Sam's military forces. After luncheon was over there was a real ball game between the St. Catharines willow widders and the "Powerful" city boys. After seven innings of good baseball, the score stood four all, when "His Ump" called the game off on account of the intense heat, and also in order to give the thirsty ones an opportunity to partake of refreshments. The batteries for the day were as follows: St. Kitts, MacSporran and Booker; Falls, Carpenter and Blye.

The remainder of the afternoon was spent in dancing, singing, games and other pastimes, after which all had the keen edge taken off their appetite again. More "jazzing" was next in order, after which all took the "Kitty D." back to the mainland, the boys voting the outing one of the most successful and enjoyable ever held. Some time before the summer comes to an end the St. Catharines boys will have the Falls boys spend a jolly day and endeavor to settle the matter as to who can produce the best ball team. The boys from across the river are a jolly lot and are deserving of a great deal of praise for the way in which the whole affair was conducted. There were about sixty in the party of merry makers.

### SUN FIGHTS TUBERCULOSIS

Fresh Air is Also Big Factor in Battling Plague.

Atlantic City, N. J. June 15.—The success of European medical men in fighting tuberculosis by constantly exposing the patients without clothing to the sun and air, was related by speakers before the congress of American physicians and surgeons in convention here yesterday. It was stated that a majority of cases were cured by this treatment. The statement also was made that the "bed rest" method which directs the patient to remain in bed day and night exposed to the fresh air, resulted in the recovery of 76 per cent of the cases in the United States.

Roy Haines, president of the Climatological section, said the sun was also playing an effective part in curing tuberculosis of the bones. He added that the sun's rays at the seashore was found equally as effective in combating the disease as at mountainous latitudes.

Listowel Collegiate Institute who has held the Hough Cup since 1907, successfully defended it against Woodstock, played at Stratford on Saturday afternoon.

## DREAM OF AIRMEN HAS BEEN REALIZED FIRST NON STOP ATLANTIC TRIP MADE

Adventurous Britons, Alcock and Brown, Fly From Newfoundland to the Irish Coast in Sixteen Hours at Average Speed of 117 Miles per Hour.

LONDON, June 16.—The final goal of all the ambitions which flying men have ventured to dream since the Wright brothers first rose from the earth in a heavier than air machine was realized yesterday morning when two young British officers, Captain John Alcock and Lieutenant Arthur Whitten Brown landed on the Irish coast after the first non stop flight across the Atlantic ocean.

Their voyage was without accident and without unforeseen incident, so far as it can be learned. It was a straightforward clean cut flight achieved in sixteen hours and twelve minutes—from Newfoundland to Clifden, Ireland, a distance of more than 1900 miles.

### HAZARDOUS ENTERPRISE

But the brief and modest description which comes from the airmen at Clifden tells of an adventurous and amazingly hazardous enterprise. Fog and mists hung over the North Atlantic and the Vickers Vimy biplane climbed and dived, struggling to extricate itself from the folds of the airplane's worst enemies. She rose to 11,000 feet, swooped down almost to the surface of the sea, and at times the two navigators found themselves flying upside down only ten feet above the water.

### MACHINE LANDS HEAVILY

The landing was made at 9.40 o'clock, British summer time. In taking the ground the machine struck heavily and the fuselage ploughed itself into the sand. Neither of the occupants were injured.

Much of the flight was made through a fog. This hampered the airmen considerably during their journey.

Captain Alcock explained the silence of his radio instrument during the trip by saying that the wireless propeller flew off soon after the airplane left Newfoundland.

"We were much jammed by strong wireless signal not intended for us," he added.

When word was received here of the accident to the machine in landing, arrangements were made for mechanics to leave London immediately to make repairs.

Word came from Clifden this afternoon that the pilot and the navigator of the biplane were leaving for Galway, where Lieutenant Brown planned to travel by train to London, arriving there on Tuesday morning.

Captain Alcock, however, hoped to be able to fly to London in the machine which made the record flight as soon as it could be repaired. It was planned to have him give an exhibition over London in the machine if possible.

The Aero club received a message from Clifden not long after the trans-Atlantic flyers landed, signed by them which merely stated that they had completed the flight in sixteen hours and twelve minutes. They requested instructions from the club.

In reply the club telegraphed Captain Alcock.

"Keep machine intact until observer arrives."

The air ministry stated that certain marks were put on the airplane at Newfoundland which must be officially identified by a member of the royal air force before the flight is declared to have been officially completed. It was said at the ministry that it was probable one of its officials would leave Dublin in an airplane to relieve Alcock and Brown. It was hardly believed here that the machine could be repaired before several days had passed and it was thought both the aviators would proceed to England by train.

Alcock and Brown stood the trip well.

NORTH OF GALWAY Clifden, Ireland, where the Vickers Vimy biplane completed its wonderful flight from Newfoundland, is 43 miles northwest of Galway and is situated on the inlet of Ardbear harbor. From Saint John's to Galway the distance is approximately 1960 miles (1,682 sea miles).

## SOUTH AFRICA IS FIRM IN ITS ALLEGIANCE TO THE BRITISH EMPIRE

CAPE TOWN, SOUTH AFRICA, June 16.—At a dinner in the City Hall Governor General Buxton declared that even under the strain of a prolonged war there had not been the shadow of friction between the Union of South Africa and the Imperial Government.

This was valid testimony to the broad common sense on which the constitutional relations of the various parts of the Empire were based.

In South Africa, white men, colored men, and natives had taken a real and effective part in the war, a greater share than people realized. The war, he declared, had emphasized the fundamental stability of the Union of South Africa and the wisdom of its structures. (Loud Cheers.)

## FRITZ MUST SIGN OR FACE GUNS

Allied Armies Ready to Move Forward into Germany if Huns Hesitate to Accept Peace Treaty.

PARIS, June 16.—"The allied armies are ready to move forward upon an instant's notice if Germany does not sign the treaty," The Temps says.

"The German armies are without airplanes, without material and without food supplies, and would be unable to make any effective resistance. The Belgians, ho'ding from Cologne to the frontier of Holland, are within a day's march of Essen, and the British, supporting the Belgians, would move forward and occupy the mining regions. The American army would occupy Frankfurt, and the French would take Hanau, Wurzburg and Ulm."

## DOCTOR ENTERS ACTION AGAINST A CLERGYMAN

HAMILTON, June 16.—Dr. G. E. J. Lannin has started action in the Supreme Court against Rev. Dr. S. Banks Nelson for \$10,000 damages for alleged slander.

T. J. Stewart, M.P., announced on Saturday that next week a bill would be passed providing that no reductions shall be made in pensions paid to parents of men killed in action who are in receipt of civic insurance. It will also provide for the payment of money withheld in some cases reported here.

## FRENCH AVIATOR AGAIN BREAKS ALTITUDE RECORD

VILLACOUBLAY, June 16.—Adjutant Cascale, the French aviator who established a new world altitude record of 31,168 feet last week, broke his own record yesterday by ascending in his airplane to a height of 10,100 meters (approximately 33,136 feet). The flight was made in 55 minutes. The temperature at the height of 10,100 meters was 8 degrees below zero.

## RETURN FROM OVERSEAS

The following men arrived in the city this morning: Sgt. Margolis, Louisa Street. Mike McGee, Ontario Street. Charlie Holmes Ann Street. A. G. Ward, James Street. A. E. McMillan, North Street. Pte. Lowe.

## LOCAL MEN RETURNING ON THE STEAMER OLYMPIK

Spr. A. McMillan. Pte. A. S. Nottman. Dvt. G. E. Fox. Pte. J. N. Murphy. Pte. B. Varty. Pte. E. Logan. Pte. E. Talk. Pte. C. W. Holmes. Spr. A. M. Ward. Pte. A. S. Lowe. Pte. A. McGhie. Pte. R. Brislin. Cpl. C. Daley. A. Grass. Sgt. W. Margetts. W. B. Robertson.

From Osgoode Hall it is announced that the Supreme Court of Ontario will hold a sitting in St. Catharines Sept. 29 (jury) before Mr. Justice Clute and December 1st (non jury) before Chief Justice Mulock.

## FIUME IS READY TO FIGHT FOR ITS LIFE

ROME, June 16.—Reports from Fiume state that the National Council met on Friday, and after reviewing the political situation with the Mayor of the city, concurred in the view that it was necessary to form an army in Fiume for the defense of the city's liberty and independence.

The Council voted by acclamation a bill creating an army of Fiume. The necessary funds to be provided by an issue of treasury bonds amounting to \$20,000,000.

The Council decided to entrust the organization of the army to the poet Sem Benelli, a former Captain in the Italian army and also decreed that justice throughout the territory of Fiume would be administered in the name of the King of Italy.

## BISHOP ORDAINS SEVEN AS PRIESTS

Holy Orders Also Extended to Five Sub Deacons—Domestic Prelates are Created.

LONDON, ONT., June 16.—Seven of St. Peter's Seminarians were ordained to the Roman Catholic priesthood by Bishop M. F. Fallon at St. Peter's Cathedral yesterday. They will be assigned to their first appointments by the Bishop at the annual retreat of the priests of the diocese of London, to be held in Sandwich College during this week. The Bishop indicated that the announcements would probably be made on the 25th anniversary of his own ordination, on Thursday next. The new priests are: Revs. M. Ballargeon, Windsor; Gregory Bloude, Chatham; Leo Marchand, Tilbury; Arthur Mc Hugh, Windsor; I. H. Pocock, London; Herbert Fallon, Huntingdon, Que.; and Thomas Moran, Woodley. The sub-deacons who were ordained are: Albert McVabb, St. Thomas; Bart Gaffney, Logan; Maurice Sullivan, Ashfield; Edward Webster, Dublin; and Wilfrid Roy, Tecumseh.

The Bishop announced at the service that Pope Benedict has conferred the title of Domestic Prelate to his Holiness on Rt. Rev. C. C. McGee of Stratford, Rt. Rev. T. T. West of St. Thomas, and Rt. Rev. J. C. Parent of Tilbury. A similar honor was granted to the late Rev. Joseph Kennedy of St. Mary's Church, London, but the Papal communication did not reach this city until six days after his death.

## WIFE OF ONTARIO COP DOES A WEE BIT OF SLEUTHING

Gets Number of Auto Which Rammed Ford After Driver Refused to Give his Name.

BUFFALO, June 16.—The five-year-old daughter of William Murray of Fort Erie was thrown twenty feet into a bush and unhurt when another automobile hit the front wheel of the Ford driven by her father near Black Creek on the Canadian boulevard, late on Saturday night. Murray, his wife and Mrs. James Edwards, also in the Ford, were not injured.

Two men and a woman were in the other car. They stopped, but, according to the Murrys and Mrs. Edwards refused to give their names or take the woman and child back to Fort Erie. Their car was not damaged.

Mrs. Edwards is the wife of the chief of the provincial police at Fort Erie. She jotted down the Ontario license number.

## LIGHTNING HITS OIL TANK

Spectacular Fire Near Olean—Loss Estimated at \$40,000.

OLEAN, June 15.—Oil valued at \$25,000 and a tank at \$15,000 were lost in a fire due to lightning last night. The tank containing 26,000 gallons of Western oil was situated in the hills north of the city. Employees of the Vacuum Oil company which owned the tank saved two thirds of the oil. The tank was a total loss. The fire was a spectacular one and attracted hundreds.

## OPEN AIR SERVICE

The first meeting of the Y. M. C. A. was held in the park last night and was very largely attended. Mr. A. E. Conals gave a very interesting and instructive address and the Knox Church quartette under the able direction of Mr. C. Allison rendered several selections which were much enjoyed by the large number present.

## RECIPIENTS OF GIFT

Mr. William Bennett of the N. S. and T. Ry. is in receipt of a massive easy chair from his fellow employees on the occasion of his marriage with Miss Dora Wilde which took place in St. James Cathedral, Toronto, last week. Both Mr. and Mrs. Bennett express themselves as very much indebted for the gift and also for the kindness shown by the friends of Mr. Bennett on the happy event.

## IS GREAT DIFFICULTY COALING BIG LINERS

LONDON, June 16.—Owing to the strike of batmen in Liverpool great difficulty is being experienced in coaling Atlantic liners. The sailings of the Baltic, Belgic and Vedick of the White Star Line, and the Scanianavian of the Canadian Pacific Ocean Services have been indefinitely postponed. The shipowners' offer of arbitration has been refused.

## BISLEY MATCHES

Crack Marksmen of Fighting Units to Compete.

## FIGHTING IS RAGING AT JUAREZ

Extent of Battle Leads to Conclusion That Action May be Decisive.

JUAREZ, MEXICO, June 16.—The fighting was resumed in Juarez at 4.40 p.m. By 6 o'clock the rifle fire was more general than at any time last night. Federal troops charged the rebels as they advanced down Calle Comercio, the principal business street repulsing them.

Colonel J. Gonzales Escobar, garrison commander, was wounded five times and hurried to El Paso for medical treatment.

## SADDEST SIGHT IN EUROPE SHOWN BY UNDETFED CHILDREN

Development is Retarded Several Years by Lack of Proper Food.

NEW YORK, June 16.—The saddest sight in Europe today is that of the children of eight and ten and twelve years of age who look and act like children of four and six and eight years," says Dr. Vernon Kellogg, who recently returned from a tour of Europe for the American relief administration.

"They have been underfed for four years," continues Dr. Kellogg. "Many have died, many are war orphans. The parents of many are absolutely destitute. Malnutrition has weakened them, has retarded their growth and development. Their feeble voices cry to the world for help."

Herbert C. Hoover, director general of the American relief administration set aside for children's relief work in Europe \$2,000,000 of the \$100,000,000 appropriated by the United States congress for relief work in the war devastated countries of Europe. To expend this \$2,000,000 the American relief administration has established a special children's relief bureau. Describing the work of this bureau Dr. Kellogg writes in a bulletin issued by the American relief administration:

"From its own funds, added to by grants from the impoverished governments of eastern Europe, and by gifts from private charity, the children's bureau is trying to furnish free food to the destitute and debilitated infants and adolescents of the newly liberated peoples of Europe, to save and rehabilitate the next generation of eastern Europe."

## DISEASED IN MIND ENEMY TO CANADA

In Open Letter to G.W.V.A. William Bathie Says Members are Goats of Propaganda.

WINNIPESG, June 16.—In an open letter to returned soldiers and the G.W.V.A., William Bathie, who had been one of the Association's representatives on the General Strike Committee, says:

"There is no getting away from the fact that the cause of the trouble fundamentally did not originate in 'Winnipeg', and he declares that the returned men who are supporting the sympathetic strike are the 'goats of a propaganda that seeks the destruction of everything constitutional."

"It is a gross abuse of the freedom of this country to permit both the meetings or to tolerate the activities of these men who believe in the destruction of everything constitutional. The Bolshevik is an undesirable alien of the most pronounced type. With his diseased mind he is even more dangerous than the alien with a diseased body. Put him out of the country, and keep him out." Labor and capital should be partners, Mr. Bathie affirmed, not enemies.

## THE WEATHER

Since Saturday morning the weather has been very warm in Ontario and western Quebec with thunderstorms in a few localities. Showers have occurred in New Brunswick and in some sections of the western provinces.

Shooker, the former Leaf star warded Quinn yesterday in a pitching duel and as a result New York lost its hold on first position in the American League.

 FLUTTERED OUT AT LAST

After a rather stormy passage of several years the City plant gave up the ghost this morning, or in better speech, it was made to cease breathing before the sun was high up enough to make people feel weary with the heat the employees of the Public Utilities made a turn or two and went the gas. It is an old saying that you never miss the water till the well runs dry and there are quite a few busy, negligent or forgetful people who never thought about June 15th coming so soon and hence when they went to toll the water for the coffee this morning they found only a flicker in the gas jet than a sputter and a sad good bye.

Thus ends for the time being the career of one of the careers of a municipal enterprise that has not been very glorious. The multiplication table got it at last for the earning side of the ledger couldn't count fast enough to keep up to the expense side by the tune of many thousands a year.

That this plant has been losing money ever since the city took it over from a private company a few years ago is undeniable. Just how much it has cost citizens in the way of taxes to make up all the losses and deficits is not easily determined, but it is a nice tidy sum of perhaps well over \$50,000. Those who have used the gas have had the service but the public at large has had to pay for what the few used. This principle is wrong and when the Council was furnished by the Public Utilities Commission with the facts it decided with the Commission to throw no more good money after bad.

It should not be thought that this failure of a municipal utility is registered as a black mark against municipal ownership. It is a failure but no more or less than scores of private business undertakings laid under conditions of competition that cannot possibly be met.

So long as the manufactured gas is sold to itself, and the prices of materials and labor were reasonably low, it could be made to cover its costs fairly well, but when a large supply of natural gas came into the city, at infinitely less cost, it was impossible for the manufactured article to compete it was kept going by the corporation for some time with the hope that some miracle might happen to give the utility better health but all the optics administered were futile.

The Journal does not think, however, that under any conditions should the city sell the plant at least till such times as there is more to justify such a sale than now. The United Gas Companies have a franchise to run for a few years yet but not very many and then a renewal will be sought, no doubt, it may be, too, that the natural gas supply will give out in a few years. It may not, of course, but if it should then the city's gas plant could be again brought into practice service. If it is kept under proper care it should not greatly depreciate in value and it may be that some time it might be brought around to the point where it will live down all the bad financial records it has against it. Just now, though, it has nothing to justify its existence and the Council has acted in what it considered the best way in closing it up or asking the Public Utilities Commission to do so.

**U. S. LOSING POPULATION**

Official figures of the United States Department of Labor reveal that probably for the first time since the settlement of the Republic began, more people are leaving than are entering the country. In the first nine months of the current fiscal year one hundred thousand more persons of all descriptions departed than came into the United States. With this circumstance before them, immigration officials are now engaged in ascertaining whether this exodus of aliens or citizens of alien birth is likely to continue. So far as their investigations have extended, they have not been led to the conclusion that any extraordinary movement towards Europe is under way. The commissioner is of opinion that, after the present abnormal conditions have passed, the balance of population exchange will continue, as heretofore, greatly in favor of the United States.

Officials, however, incline to the view that for some time the movement outward will be more extensive than that inward. At present it is easier to secure passports and passage to Europe than contrariwise. The ordinary movement to Europe has further been checked or restricted for four years and it is only natural it should increase now. Again, until conditions settle down in Europe, it will remain difficult for intending emigrants to get away. Nor is the withdrawal of large sums from savings banks by foreigners taken to indicate an intention to remain in Europe for good. On the other hand, the arrival of hypernated Americans with large rolls of bank bills will, it is believed, have the effect of stimulating the desire to start for the country where these rolls were obtained. It is recognized, however, that governmental action and improved conditions and opportunities in Europe may for a time have a retarding effect. Some large employers of foreign labor incline to think that for several years the population movement will set against the United States.—The Stratford Herald.

**WHAT EXCHANGES SAY**

**WATCH CANADA**  
 Boston Globe.  
 It is rather fashionable to argue that labor troubles in the United States will never assume great proportions. People say that this is the land of opportunity, many workingmen own their homes, Americans supported the war who heartily, our young men have had military training. All that and ten times more applies to Canada. Her men have been the heroes of the war, her people have given till they had no more to give, they are house owners. In Canada men have found as promising a future as anywhere else in the world. If the United States is to adopt a national policy on the subject of labor, she now has a chance to learn much at small expense. We should watch Canada and draw our own conclusions.

**REGINA AND THE STRIKE**

Regina Leader.  
 The citizenship of Regina is indignant at the injustice thus attempted to be imposed upon them. The mass meeting held in the city hall yesterday morning was unquestionably the most significant gathering ever held

**Wilson's FLY PADS**  
 Kill them all, and the germs too. 10c a packet at Druggists, Grocers and General Stores.

In Regina. There was no doubting the feeling and determination that was a feeling of absolute friendliness to labor, and a willingness to meet all the reasonable and just demands of labor. But there was also a marked determination not to suffer a rank injustice without protest. That determination found expression in the creation of a citizens organization, the like of which was never before called into being, in Regina. And when the strike now decided upon becomes actually operative, the same determination will find further expression in the carrying on of all essential utilities, in upholding the complete authority of the existing law and the power of all present constitutional authority.

**CANADA AND SHIPPING**

The "Daily Express", of London, England, recently under the heading of "Inter-labor Shipping: Plea for Building under State Aid and Control," contained a statement from a prominent Canadian business man who just arrived in London. He stated that in his opinion the vital question of the moment was tonnage, and that Canada was unable to send to Europe all the urgent materials she can supply for purposes of reconstruction if shipping is not available. He added:

"As a nationalization of shipping would mean England's doom as a merchant marine power, we must look to some other method of control for ships, trading inter-imperially, but in order to give effect to our special programme concerning more solid than high-sounding phrases and copybook platitudes such as 'Trade follows the flag' must be used as the real connecting link.

Practice must follow, and, indeed, ought to precede phrases. The Empire's resources are boundless, and we ought to harness them by action rather than eloquence. "Britain's financial burden has been the greatest in the war, and in order that she shall quickly recuperate the trade of the Empire must be developed.

"In developing our land areas in Canada we have had to link up place to place with railroads. That was vital to the development of dominions overseas. These railroads have had to be built with Government aid and under a certain amount of Government guidance and control. Just as internal transport was needed and must increase, so external transports. How this is to be attained must and day morning was unquestionably the most significant gathering ever held without delay."

**SEALED TENDERS** addressed to the undersigned, and endorsed "Tender for repairs to breakwaters at Port Colborne, Ont." will be received at this office until 12 o'clock noon, Friday, June 20, 1919, for the construction of repairs at two points on the eastern and two on the western breakwaters at Port Colborne, Welland County, Ont.

Plans and terms of contract can be seen and specification and forms of tender obtained at this Department, at the offices of the District Engineers, Equity Building, Toronto, Ont.; Shaughnessy Building, Montreal, Que.; and at the Post Office, Port Colborne, Ont.

Tenders will not be considered unless made on printed forms supplied by the Department and in accordance with conditions contained therein. Each tender must be accompanied by an accepted cheque on a chartered bank payable to the order of the Minister of Public Works, equal to 10 per cent of the amount of the tender. War Loan Bonds of the Dominion will also be accepted as security, or War Bonds and cheques if required to make up an odd amount.

Note—Blue prints can be obtained at this Department by depositing an accepted bank cheque for the sum of \$20, payable to the order of the Minister of Public Works, which will be returned if the intending bidder submit a regular bid.

By order,  
 R. C. DESROCHERS,  
 Secretary,  
 Department of Public Works,  
 Ottawa, May 27, 1919.

**Department of Railways and Canals**

**WELLAND SHIP CANAL**  
**NOTICE TO CONTRACTORS**  
**SEALED TENDERS**, addressed to the undersigned and marked "Tender for the Supply and Delivery of Sand, Season 1919", will be received at this office until 12 o'clock noon on Thursday, June 26, 1919.

Specifications and tender form can be obtained on and after this date from the Chief Engineer of the Department of Railways and Canals, Ottawa, and the Engineer in Charge, Welland Ship Canal, St. Catharines, Ont.

An accepted bank cheque on a chartered bank of Canada for the sum of \$5,000, made payable to the order of the Minister of Railways and Canals, must accompany each tender, which sum will be forfeited if the party tendering declines entering into contract for the work at the rate stated in the offer submitted.

The cheque thus sent in will be returned to the respective contractors whose tenders are not accepted. The cheque of the successful tenderer will be held as security for the fulfillment of the contract to be entered into.

The lowest or any tender not necessarily accepted.  
 By order,  
 J. W. PUGSLEY,  
 Secretary,  
 Department of Railways and Canals,  
 Ottawa, June 11, 1919.

Quite a large number of this city will accept invitations to go to Toronto on June 17th and 18th to attend the 6th Annual Conference of the Association of the Childrens Aid Society of the Province of Ontario, when a splendid time is to be had and an excellent programme rendered.

Mrs. Robert Turner and Mr. Frank Wilson of Thorold rendered a very pleasing duet at the evening service in Haynes Avenue Presbyterian Church on Sunday. Rev. Donald Tatt of Port Dalhousie, occupied the pulpit and preached a very forcible sermon on "The Light of the World and the Salt of the Earth".

**AUCTION SALE**

Thursday, June 19th, 1919, at the office and yards of the late Mr. Munroe, St. Paul Street, opposite Grand Central, 9 a.m., eight windows 3ft. 6 ins. x 3ft. 6 ins. Hay cutting box, 2 one ton endless chain hoists, pulleys hundreds of feet of 1-1/4 in. rope. All in good condition. Crow bars, a lot of stone, two feed boxes, harness stone cutters tools, work bench, two buggy poles, windlass, stove and a lot of other things.

At 2 p.m. iron bed, dresser, blind walnut table, chairs, gas heater, pictures, flat top desk, electric lamp, bill rack, coat, oil cloth and a good camera 6x4.

W. J. WESTWOOD  
 Auctioneer  
 116-17-18

**Taxes Year 1919**

Under the authority of By-law No. 3200 passed on the 25th day of March, 1919, notice is hereby given that all taxes for the year 1919 are now due and payable but may be paid in three instalments as follows, subject to the following exceptions and conditions.

Taxes which are not payable by Instalments  
 Taxes in Income Assessment, Arrears of Taxes and charges collectable as taxes for any work done or services rendered by the Corporation are due and payable in bulk on or before the 25th day of June, 1919 (and not by instalments).

Payments by Instalments  
 1st. Instalment—due and payable on or before the 25th June 1919. One-half of the taxes will be the amount of the 1st. Instalment.

2nd. Instalment—due and payable on or before the 25th September 1919. One-quarter of the taxes will be the amount of the 2nd. Instalment.

3rd. Instalment—due and payable on or before the 25th November, 1919. One-quarter of the taxes will be the amount of the 3rd. Instalment.

Taxes not paid when due.  
 If default is made in the payment of any instalment on the above dates, the privilege of payment by instalment becomes cancelled and the whole of the taxes or the balance unpaid, as the case may be, at once becomes due and payable together with percentages in addition, as follows:

Upon default in payment of taxes on the dates appointed,  
 Penalty On amounts paid within ten days of time of such default, a percentage charge of one per cent. will be collected.

Penalty 2%  
 On amounts paid within twenty days of time of such default, a percentage charge of two per cent. will be collected.

Penalty 3%  
 On amounts paid within thirty days of time of such default, a percentage charge of three per cent. will be collected.

Penalty 5%  
 On amounts remaining unpaid after thirty days of time of such default, a percentage charge of five per cent. will be collected.

Failure to pay the above instalments of taxes as they become due not only forfeits the right of settlement by instalments but brings the parties under the penalty of the Assessment Law, which enacts, that in case any party shall REFUSE OR NEGLECT to pay the tax imposed upon him for the space of fourteen days after demand, the Collector shall levy the same, with costs, by distress and sale of the goods and chattels of the party who ought to pay the same.

1. Ratepayers who do not receive their tax bills by the 1st day of June should notify Tax Collector's Department of the fact.  
 2. Cheques tendered in payment of taxes must be "marked" by bank and made payable at par to the City of St. Catharines.  
 3. Taxpayers sending amounts by mail for payment of taxes should also enclose the tax bill and a self-addressed and stamped envelope for the return of receipted Tax-bill.  
 4. Taxes are payable at the office of City Tax Collector.  
 STUART K. WATT,  
 City Treasurer,  
 CITY TREASURER'S OFFICE, ST. CATHARINES, 17th May, 1919.

**New Giant C.P.R. Locomotive**

"Ten of the largest locomotives ever built for use on Canadian railways have been under construction for some time at the C.P.R. Angus Shops in Montreal, and one of these, No. 5502, was inspected the other day by President E. W. Beatty, and Vice-President Grant Hall. These locomotives are of the heavy Mikado type and are intended for freight service, being designed and built under the direct supervision of Mr. W. H. Winterrowd, the Chief Mechanical Engineer.

The weight of the engine and tender in working condition is 500,000 lbs., the engine alone weighing 323,000 lbs. The diameter of the driving wheels is 63 inches. The cylinders are 35 1/2 inches in diameter by 52-inch stroke, which with 20-lbs. boiler pressure makes these locomotives capable of exerting a maximum tractive effort of 36,000 lbs. The diameter of the boiler is 80 inches at the front end and 90 inches at the back end. The fire box is 84 inches wide and 120 inches long, and the grates are moved by steam-gate shakers.

The cab is of the vestibule type, which is the C.P.R. standard, and every effort has been made to make the accommodations for the engine-men as comfortable as possible. One side of the cab is fitted with a clothes locker 24 inches by 29 inches wide in which clothes can be hung and lunch pails carried.

The tender has a capacity for 12 tons of coal and 8,000 Imperial gallons of water.

President E. W. Beatty and Vice-President Grant Hall, of the C. P. R., snapped after inspecting the new engine.

**IN SIX-EIGHT TIME**

The man who can only relieve his feelings by swearing should keep in mind that music begins where language ends.

Brahms left four books of Hungarian Dances which in their original form were written as piano duets.

The compass of the 'cello is about three octaves on a third from double C to E above treble C.

Next to the flute, the clarinet is the wind instrument of the most execution.

Just as the army has the infantry, cavalry, and artillery, the orchestra has the string section, the wood wind section and the brass section.

Music is one of the greatest stimulants to patriotism. The Spartans knew that they once borrowed a singer from Athens to improve the morale of their armies.

A choral society is, of necessity, democratic and representative of the community. Voice is more necessary than high social position; the ability to read music correctly is worth more to a chorus than a college education.

When a gentleman of wealth disposes of his estate by will, if he wants to be of some real service to his community, there is no good reason why some of his bequests should not be to music.

In a Paris Hospital when the supply of ether was gone, singing was used during amputations to allay the patients' pain. There are people in civil hospitals, in prisons, in all sorts of unhappy situations, whose hearts and minds need uplifting by music.

Instruction in instruments of the orchestra and band, piano and in voice, both in classes and individually, is growing to be quite as natural a part in the training of public school children as in other subjects which have something of a vocational bearing.

Herbert Lloyd, of Hay aBy, his daughter and granddaughter, were all killed, as also their team of horses, when struck by a fast train while driving in to Nanawau Saturday.

**FARM LOANS  
for SOLDIERS**

**Cheap Implements,  
Livestock and Harness**

**THE Soldier Settlement Board** has arranged with manufacturers of implements and harness to give soldier settlers a wide choice of first class implements at prices substantially below those quoted to civilians; and in the Prairie Provinces the United Grain Growers, Limited, will give soldier settlers special prices on implements, wagons, and other commodities.

By collective buying in large numbers for cash, it can also offer soldiers the lowest possible prices on horses and other live stock.

It can supply a good harness set for approximately \$31.50 at point of manufacture.

All these concessions are in addition to the Board's offer to secure for the soldiers good land, conveniently located, and to give financial assistance in the way of loans to establish them on the land.

**Land and Loans**

With certain exceptions, a soldier who has served with good conduct in the Canadian, Imperial or Allied forces in an actual theatre of war or outside the country in which he enlisted (or widow of any such man) may secure loans to purchase land, live stock and equipment and erect buildings—

- (1) Up to \$4,500 to cover the cost of the land and discharge encumbrances.
- (2) Up to \$1,000 to erect buildings. Both these loans to be paid on the instalment plan. Payments extending over 25 years.
- (3) Up to \$2,000 to buy implements, live stock, and equipment. The soldier will begin to pay off this loan in the third year, and will have four years to pay.

Only five per cent. will be charged on these loans.

A cash payment of one-tenth the price of the land will be required, except in special cases.

Qualified settlers on Dominion Lands may secure loans up to a maximum of \$3,000 on a plan similar to the above for farm equipment, live stock, and erection of buildings, provided security offered justifies the loan.

If you figure you have more than a fifty-fifty chance to make good as a farmer, write to your Provincial Superintendent at 32 Adelaide Street East, Toronto.

**SAGE TEA TURNS  
GRAY HAIR DARK**

It's Grandmother's Recipe to Bring Back Color and Lustre to Hair.

That beautiful, even shade of dark, glossy hair can only be had by brewing a mixture of Sage Tea and Sulphur. Your hair is your charm. It makes or mays the face. When it fades, turns gray or streaked, just an application or two of Sage and Sulphur enhances its appearance a hundredfold.

Don't bother to prepare the mixture; you can get this famous old recipe improved by the addition of other ingredients at a small cost, all ready for use. It is called Wyeth's Sage and Sulphur Compound. This can always be depended upon to bring back the natural color and lustre of your hair.

Everybody uses Wyeth's Sage and Sulphur Compound now because it darkens so naturally and evenly that nobody can tell it has been applied. You simply dampen a sponge or soft brush with it and draw this through the hair, taking one small strand at a time; by morning the gray hair has disappeared, and after another application it becomes beautifully dark and appears glossy and lustrous.

**PRIZE FOR PLOUGHING**

The executive of the Lincoln County Board of Agriculture will meet at Eganville on Friday, June 20th at 3 o'clock for the purpose of arranging a date for the annual picnic, also dates for winter meetings.

The County Council has made a grant of \$50 to be used as prize money for the home ploughing contest to be conducted in this County this year.

Preliminary prize lists for rural school fair will be sent out to the different schools this year.

**The Pirates Howl**

**CAME UP FOR HEARING**

Harry Burtwell was before the Magistrate this morning on a charge of fast and careless driving and doing bodily harm to Louis Whitten, aged 5 years, on Chaplin Avenue, on May 31st. Master Burtwell was taking Malcolm Burtwell, his brother, to a doctor to have his ankle attended to. The child with other children was on the sidewalk and as they Burtwell

was approaching the girl ran into the street in front of it with the result that she was knocked down by being struck with the right mud guard. When the accident occurred the child was conveyed to the Welland Hospital and attended by Dr. McDonald. The case was remanded until Thursday. E. H. Lancaster appeared for Burtwell and M. J. Brennan for the Crown.

**MRS. ROBERTSON LET GO  
ON SUSPENDED SENTENCE**

Mrs. Margaret Robertson, who was before His Honor Judge Campbell this morning on a charge of concealment of birth of her baby whose body was found on April 28th in the Welland Canal, was let go on a suspended sentence.

**ANCIENT CUSTOMS IN ACADIA.**

- (1) The Cape Breton Empire docked in Digby Harbour.
- (2) A Grand Pre. The Willows, a memorial cross and a plough.
- (3) An old-fashioned freight car on a Digby street.

The invention of the automobile supplanted the once favourite horse-drawn coach, and now the aeroplane may, by a large extent, take the place of the automobile. But however science progresses, there still are places where the ancient order of things endures and the people are contented following the simple customs of their ancestors. One may yet be seen drawing drags in that part of Nova Scotia known as the Land of Evangeline. It is quaint to see such a sight on the street of a village or town. Unlike horses, oxen have their greatest strength in their necks. The drags are yoked to the brows and horns of the animals with leather straps. Bulls buckle on their breasts as they move along. The tips of the horns are nearly always decorated with brass knobs. A pair of oxen will walk along leisurely drawing a load of four tons. If you interview the driver he will tell you that they are easily trained and do their work just as well as horses, and you can use them in places where horses would be difficult to manage. They mough and draw logs with the same docile temper as they show when yoked to the drags.

There are other old customs still surviving in the Land of Evangeline, and these add to the attractiveness of one of the most picturesque, romantic and historic regions in America. Silvery bays and rivers, shores of golden sand, hills and valleys covered with fragrant meadows or towering pines or fruitful apple trees, sunny skies and freshen air and land breezes give health and pleasure to thousands of tourists every year.

Across the top of Fundy front St. John, New Brunswick, to Digby, Nova Scotia is a delightful trip occupying a few hours. Approaching Digby Cape Bay is dotted with the grant of was the site of the village from which the Acadians were banished in 1759. The well where Evangeline was found to go for water and the willows under which she rested are still to be seen.

Blondie's mountain, and the Bay of Minas near by are just as they were of old, the meadows are green on the dykelands and the oxen keep up the beat, and a little inland the gentle hills are interlarded with luxuriant orchards. Welland is the headquarters for tourists to Grand Pre. It is built in the midst of one of the greatest apple growing localities in the world. The late King Edward was among those who visited and loved this spot. It is only a short walk from Welland to Grand Pre, and the surroundings are most beautiful. The late King Edward was among those who visited and loved this spot. It is only a short walk from Welland to Grand Pre, and the surroundings are most beautiful. **GET ON LAND EARLY**  
The Dates to Plant for Heaviest Yields.

To Make Most Money From Wool Shearing Must Be Done Properly and Wool Handled Carefully—A Few Hints Which Have Saved Farmers Dollars.

(Contributed by Ontario Department of Agriculture, Toronto.)

HERE is a best time to sow each class of farm crops to secure the highest returns. It is difficult, however, to know which are the most favorable dates for the best returns of the different crops in all seasons. The results of experiments conducted over a series of years form a good general guide. Some crops give best results from later seedings. Seasons vary so much that in some years the grains are practically all sown by the dates at which it is only possible to start sowing in other years. It is of the utmost importance, however, to start cultivating the land as early as it is dry enough to work to good advantage. The first cultivations should take place for those crops which should be first sown. In this connection it is interesting to study the results of an experiment which was conducted in each of five years at the Ontario Agricultural College, Spring wheat, barley, oats and peas were sown on each of six dates. One week was allowed between each two dates. The experiment was conducted so as to duplicate by sowing with the grain drill and broadcast by hand in each instance. The following table gives the average results for the ten tests in the five years:

Seedings.	Wheat, lb.	Oats, Pea, lb.		
1st	23.9	46.2	75.2	25.4
2nd	19.2	45.9	76.0	28.8
3rd	15.4	39.9	64.2	28.8
4th	12.4	35.2	54.2	25.5
5th	8.4	27.6	45.2	21.5
6th	6.7	18.4	37.0	19.6

It will be seen that the spring wheat gives decidedly the best returns from the first date of seeding. There is not much difference between the first two seedings of barley and oats, but there is a slight advantage from the first date in the case of barley and from the second date in the case of oats. The peas, however, gave the highest returns from the second and third dates, and even the fourth gave a higher average yield than the first date. After the first week was past there was an average decrease per acre for each day's delay on the season advanced of 27 pounds of spring wheat, 47 pounds of barley, 48 pounds of oats, and 20 pounds of peas.

These results are of special interest and are worthy of careful attention at this particular time.

**Sheep Shearing.**  
Shearing and Tying the Fleeces.—Shearing should only be carried on under the most favorable conditions; upon bright, warm sunny days when the sheep are dry and clean and the wool has "ripened" somewhat from the body. Cleanliness and care in the removal of all fleeces is very essential and the shearing floor should be swept after each fleece has been removed and tied. This will eliminate a great deal of foreign matter which, although it may add weight, does so at the expense of quality.

**Dung, Locks or Tags.**—It will be noticed with many fleeces that there are certain hard dung locks or tags adhering to the brim ends. These contain a great deal of moisture and if left on and rolled into the fleeces produce a damp-heavy condition that means a higher shrinkage and hence less value. They should, whenever present, be picked off with the shears before the sheep is shorn or else pulled off by hand after the fleece is spread out for rolling. They can very easily be packed up and disposed separately, bringing more money this way than if left upon the fleeces. The same is true of all paint dotted locks as well.

**Rolling the Fleeces.**—Spread the fleeces out on the floor, being careful not to pull it apart, and with the flesh side down. Then fold the belly wool and both sides in and roll it up in a compact ball. Starting at the tail end, roll tightly toward the neck, thus leaving the shoulder wool, which is always the superior portion, on the outside of the roll. The grader always estimates the grade by the appearance and quality of this wool over the shoulder and heart-grith, that over the hind quarters usually running a grade or two lower.

**Tying the Fleeces.**—Having rolled tightly, tie both ways with the special paper twine supplied by the Department under any consideration use binder twine as the fibres become attached to the wool and follow right through into the cloth where they always show up quite prominently. Many mills have refused to have anything whatever to do with clips that have been tied with binder twine. If the paper twine is not available use any stout cord other than binder twine. Tie each fleece separately, never tying two or three together. Furthermore, avoid as much as possible the shipping of loose wool. If you have two or three different breeds of sheep, possibly a grade flock and a pure-bred flock, tie these separate and pack it so.—Director, K. W. Wade, B.S.A., Ontario Department of Agriculture.

A number of varieties of beans are in cultivation, but to meet the present demand the Saxif White Pea bean is particularly suitable. Care should be exercised in selecting well matured seed of strong vitality as many of the beans grown last year are unsuitable for planting.

The Leafs divided Saturday's double-header with Reading and are now ten points behind Baltimore, who still lead.

**THE POSSIBILITIES OF IRRIGATION**

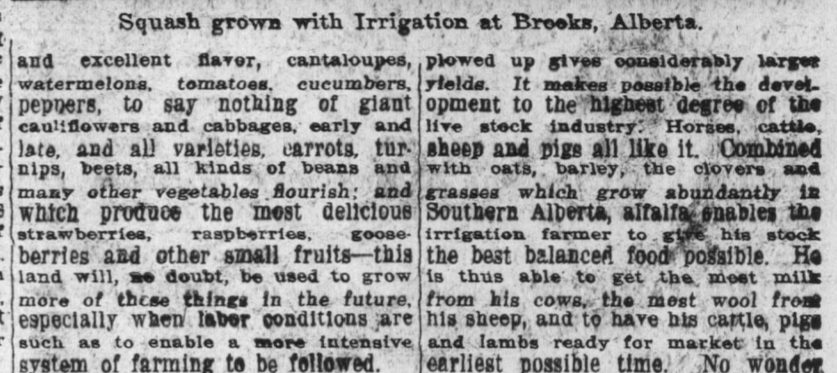

Wheat on one of the Veterans' Farms, near Tilley, Alberta.

WHAT surprises a person most when travelling through the irrigated areas of Southern Alberta is the wonderful variety of crops that can be successfully grown there, their abundance, yields, and their excellent quality. Wheat, oats, barley and flax, the standard crops of the Canadian West grow there and give as heavy yields as anywhere else on the continent. Alfalfa thrives as it does nowhere else in Canada, and is literally making fortunes for its growers. By the application of water the crops of clover and the many varieties of nutritious tame grasses are multiplied manifold. In the gardens vegetables of all kinds, including those that are associated with hotter climates, such as tomatoes, melons, squashes, grow in the open as well as to indicate great possibilities in this direction.

Wheat, of course, is the dominant crop there as it is in these areas of Western Canada, where irrigation is most practiced. Oats, barley and flax are also grown extensively. The yields of all these grains compare very favorably with those in any other part of the west. Crops of wheat this season that have been properly irrigated are averaging thirty-five bushels to the acre. Some crops will thrive as high as forty bushels for more to the acre. The yields of other grains are equally as good. Grain growing under irrigation brings ample returns to the farmer, especially when it is considered that such as to enable a more intensive system of farming to be followed.

But, yielding such good returns as the growing of grain does, other crops that may be grown under irrigation are possibly still more profitable, and it seems reasonable to suppose that in years to come the growth of grain in districts where water is available will be to some extent superseded to enable larger areas to be put into other crops. Land that will produce up to seven hundred bushels of potatoes of a quality that brings the best prices, on which year after the most desirable kinds are yielding forty to sixty bushels to the acre are being grown. Where water of such high sugar content thrives where pumpkins of enormous size

Squash grown with irrigation at Brooks, Alberta.

and excellent flavor, cantaloupes, watermelons, tomatoes, cucumbers, peppers, to say nothing of giant cauliflower and cabbages, early and late, and all varieties, carrots, turnips, beets, all kinds of beans and many other vegetables flourish; and which produce the most delicious strawberries, raspberries, gooseberries and other small fruits—this land will, no doubt, be used to grow more of these things in the future, especially when labor conditions are such as to enable a more intensive system of farming to be followed.

Then there are the fodder crops, of which alfalfa is the chief. Contrary to a widespread belief, it is not grain, not fruit growing, not truck gardening, but to the growth of fodder crops that the greater portion of the irrigable lands in the United States are devoted. The large yields of alfalfa that are being obtained in Southern Alberta under irrigation assure this crop of an important place in the production of the farmer who is able to utilize the water from the main stream on his land. Not only are the yields of alfalfa large, but the crop also enriches the soil to such an extent that any other crop grown on the land after it has been

**Puccini's**  
**LION BRAND Macaroni**

**The Factory Behind the Product**

In this airy, sunlit factory, at St. Catharines, Puccini's "Lion Brand" Macaroni is made. Only the BEST QUALITY of "Durum" wheat is used. Experts prepare it in the original Italian way. This takes time—and care—and patience. No artificial drying is permitted. The macaroni must dry, naturally, on long, clean wooden poles. More than 60,000 of these poles are in use all the time.

The result is a pure, nutritious product of delicious flavor, containing greater food value than the ordinary brands of macaroni.

Always INSIST on Puccini's "Lion Brand." Your grocer has it, or will get it for you.

**A Tribute to the Hardest Worked Merchants in Our Country**

HAVE you ever considered the important part played by the grocer in our daily life?

From early morn and often until late at night the grocer keeps open for our convenience.

Whether we want a 5-cent bar of soap, a package of tea or a sack of potatoes he is there to serve us—and with a cheerful "thank you".

You trade with him almost every day. You look upon him as a friend. He treats your children kindly when you send them to the store.

When sickness, accident or unemployment occurs, it is the big-hearted grocer who supplies the home with the necessities of life and often waits a long time for his money.

He has had many trials during the past four years. Government regulations have hampered his business. Goods have been difficult to procure. Help scarce. Profits small. He sells on a closer margin of profit than probably any other line of retail trade.

For nearly twenty-five years, the T. H. Estabrooks Company has been distributing millions of pounds of Red Rose Tea through the grocers of Canada. Our relations with them have been very intimate and very friendly. We, therefore, know something of their difficulties and something of the services they are rendering, which we think deserve recognition and appreciation.

**T. H. ESTABROOKS CO., LIMITED**

Constipated Children Gladly Take  
**"California Syrup of Figs"**  
For the Liver and Bowels

Tell your druggist you want genuine "California Syrup of Figs." Full directions and dose for babies and children of all ages who are constipated, bilious, feverish, tongue-coated, or full of cold, are plainly printed on the bottle. Look for the name "California" and accept no other "Fig Syrup."

**NEW ROAD MAP,  
TORONTO-MUSKOKA**

Ontario Motor League Publishes Maps and Directions for Motor Tourists.

The touring department of the Ontario Motor League has issued a very complete and comprehensive folder for motorists planning automobile trips this summer to Muskoka and the Lake of Bays districts.

The fact that a great many Canadian and American business men desire to motor to these famed summer resorts along with their wife and family have impelled the O. M. L. to issue this pamphlet.

A significant fact about the folder is that it is concise, yet at the same time gives full information as to routing, etc.

There is nothing more provoking to a motorist when a trip traveling over new roads than to be obliged to read page after page to find out the correct road to follow. In this folder the directions are given, about every two miles, on one side of the page, and on the opposite page is a very descriptive map covering the information.

Numbers of these folders are to be distributed among Americans across the border, and local motorists who desire a copy may obtain one by writing or calling on the Ontario Motor League, Lansden Building, Toronto.

**ALMA COLLEGE HAS  
IMPORTANT SERVICES**

Sunday a Special Day, Too, in Trinity and St. John's Churches

ST. THOMAS, June 16.—Sunday was an important day in the city's churches. Alma allege baccalaureate services were held in Central Methodist Church yesterday morning, Rev. H. T. Ferguson, B.A., B.D., of Chetumel Methodist Church, London, preaching the sermon. The Alma students, members of the college board, Alma Daughters, Alumnae, day students and friends marched in a body from the college to the church. The choir was composed entirely of Alma students under the direction of Mr. Stanley Oliver L.L.C.M., Director of Choral Students at the college.

Special anniversary services were held in Trinity Anglican Church both morning and evening, Rev. A. A. Bise, rector of All Saints, London, preaching in the morning, and Rev. G. T. Warner of the Memorial Church, London, in the evening.

Trinity Sunday was observed in St. John's Anglican Church, Rev. S. Bohl, Chaplain of the British Navy League, conducting the services.

**INCREASE POTATO CROP**

How to Check Serious Diseases in Ontario.

Leaf Roll and Mosaic Are Firmly Established and Reduce Yields One-third—How to Detect Diseases and Only Way to Control Them.

(Contributed by Ontario Department of Agriculture)

THE two most serious seed-borne potato diseases in Ontario are Leaf Roll and Mosaic. Other seed-borne potato diseases common in the Province are Black Leg, Rhizoctonia, Blight, Wilt and Scab. Leaf Roll and Mosaic cause a very marked reduction in the yield, and the fact that these two diseases are so prevalent in Southern Ontario accounts for the poor crop of potatoes that has been obtained in many parts of the Province for the past four years.

Leaf Roll.—The cause of this disease is unknown. Data gathered by the pathologists of the United States and Canada shows that Leaf Roll may reduce the yield to about one-third of the normal crop.

Symptoms.—Symptoms of Leaf Roll are very variable. Affected plants are always more or less upright and in some varieties the leaves assume a characteristic upright, almost starling habit, instead of drooping over in the normal way. Rolling of the leaves is always associated with the disease. The rolled leaves on plants affected with this disease begin to die early. The harsh, leathery texture of such leaves is a constant symptom. The tubers of affected plants are small and are borne generally on very short tuber-branches (setons) or even attached in a cluster to the stem. Tubers from affected plants invariably produce diseased plants. There is also evidence to show that the disease may spread from plant to plant in the field.

Prevention.—The only sure way of avoiding loss from Leaf Roll is to secure fresh seed from districts free from this disease. Fortunately, this is possible, as Northern Ontario and certain sections of New Brunswick, Nova Scotia and Prince Edward Island are comparatively free from this trouble. In experiments carried out in Ontario by the Agricultural Representatives with seed potatoes from South Ontario, New Brunswick and Northern Ontario, it was found that the average amount of Leaf Roll in the plants from the seed from the three different sources was as follows:—

Old Ontario .....	45.5%
New Brunswick .....	5.1
Northern Ontario .....	1.4

These figures strongly emphasize the desirability of obtaining northern-grown seed potatoes for planting in Ontario.

Mosaic.—The cause of this disease is also unknown. It has been observed in many fields in Ontario. When severe, there is a very noticeable yellowing of the leaves. Plants gathered by the pathologists of the United States and Canada shows that this disease may reduce the yield by one-half.

Symptoms.—The foliage of plants affected with Mosaic is somewhat wrinkled or corrugated and mottled with faint, light green or yellowish spots. The stems of diseased plants are often more bare near the ground than those of healthy ones, partly because the affected foliage does not spread out and droop down normally, and partly because the lower leaves sometimes fall off in the last stages of severe attacks. The tubers of affected plants are not marketable and sound and their keeping or eating qualities are not impaired.

Prevention.—If Mosaic is abundant in a field the surest and quickest way of eliminating it is by obtaining fresh seed from a non-infected district. Such seed can be obtained at the present time from Northern Ontario.

General Suggestions For the Prevention of Seed-borne Potato Diseases.

In order to avoid loss from Leaf Roll and Mosaic, the source of seed is of the utmost importance. Seed potatoes free from these diseases can be obtained from Northern Ontario. Only certified seed, however, can be relied upon. For information concerning certified northern-grown potatoes, write Mr. J. H. Gault, Assistant Commissioner of Agriculture, Parliament Buildings, Toronto, Canada.

Even certified northern-grown seed is not infrequently not free from Leaf Roll and Mosaic. In order to avoid loss from such seed-borne potato diseases as Black Leg, Rhizoctonia, Wilt, Blight and Scab, the following precautions should be taken:

1. Select for seed smooth, sound tubers, as free as possible from scab, black, hard lumps on the surface, and abnormal discolorations of the skin or flesh.
2. Disinfect all seed before cutting with formalin or corrosive sublimate. The latter substance is the more reliable for the prevention of Rhizoctonia.
3. When cutting potatoes have at hand two or three knives and a jar containing a 20 per cent. solution of formalin. After cutting into a tuber which shows signs of rot drop the knife into the formalin, discard the diseased potato and take a fresh knife from the formalin solution for the next cutting.
4. Spray every year with Bordeaux mixture for the prevention of Late Blight and Rot. Such spraying is an insurance which it is not easy to neglect.
5. Rogue the growing crop once or twice during the summer, or at least the portion of it from which the seed is to be saved. This operation consists in the removal and destruction of any plants showing signs of such diseases as Leaf Roll, Mosaic, Black Leg, Rhizoctonia and Wilt.
6. Practice a rotation of crops and if possible plant potatoes after clover sod.—Prof. J. E. Hewett, O. A. College, Guelph.

**WILLARD IS  
WORKING HARD**

TOLEDO, O., June 16.—Jesse Willard is within three pounds of the weight he says he expects to make for his heavyweight championship contest with Jack Dempsey here on July 4th.

The champion hopped on the scales before his workout yesterday and tipped the beam at exactly 248 pounds which he says is a pound and one half lighter than he was when he won the championship from Jack Johnson at Havana four years ago. He figures on entering the ring to box Dempsey weighing about 245 pounds.

Champion's "Bruising" Workout

The champion went through the most bruising workout he has attempted so far in his training. Between 2,000 and 2,500 persons paid 50 cents apiece to stand in the sun behind a fence and the spectators amiably exchanged punches with his sparring partners, tugged at the weights wrestled and heaved the medicine ball.

Willard boxed eight full three-minute rounds, stepping three with Jack Hempel, two with Jack Heinen, the Chicago heavyweight, and three with Walter Monahan. The champion wound up in the trim and expressed elation over the showing of Heinen, a new acquisition to the staff of sparring partners. Heinen boxed savagely and angrily with the champion, although he is about fifteen pounds over his fighting weight. Willard caught him with a right hand uppercut in the East round and Heinen's knees sagged. He clung to the champion until he overcame the effect of the punch.

At the Dempsey Camp

After Willard finished his workout the crowd walked three quarters of a mile to Dempsey's camp, where the challenger boxed further injury to his eye by having three rounds with the Jamaica Kid, the negro light heavyweight, who opened the wound a week ago. Dempsey's sparring partner was careful not to shoot his punches too high and the challenger left the ring without further damage. Manager Kearns decided to have Dempsey box only Heinen, there were 1,896 persons crowded in the tent inclosure and he did not want to disappoint them.

The challenger probably will not box again until his injured eye is thoroughly healed. His trainers plan to allow him to take only short runs on the road and light exercises until June 20th or 21st when he will resume hard training and work continuously until a day or so before the match.

Report of the Auditors to the Shareholders of The Merchants Bank of Canada

In accordance with the provisions of sub-sections 19 and 20 of Section 40 of the Bank Act, we report to the shareholders as follows:

We have examined the above Balance Sheet with the Book of Account and other records at the Chief Office of the Bank and with the signed returns from the Branches and Agencies and have observed the cash and verified the securities of the Bank at the Chief Office and the entries in regard thereto in the books of the Bank at St. Catharines, Port Huron, and other places during the year and found them to agree with such entries. We also attended at some of the Branches during the year and observed the cash and verified the securities held at the date of our examination and found them to agree with the entries in the books of the Bank.

We have obtained all the information and explanations we have considered necessary in our opinion. The transactions of the Bank which have come under our notice have been within the powers of the Bank, and the above Balance Sheet is properly drawn up so as to exhibit a true and correct view of the state of the Bank's affairs, according to the best of our information and the explanations given to us, and as shown by the books of the Bank.

VIVIAN HARCOURT, Auditors.  
GOLDON FARNSLEY, Auditors.  
(Of the Firm of Deloitte, Plender, Griffiths & Co.)

MONTREAL, 28th May, 1919

**SICK-WEAK-MISERABLE  
THOUSANDS OF VICTIMS**

Man feels bad all over, feels weak, feels nervous, irritable, gloomy—gets angry at little things that ordinarily would not be noticed. You feel tired mornings. Your sleep does not rest you. You feel nervous. You dream at night. Your memory is poor. You can't concentrate your mind. No appetite. You lose flesh—all run down. You can't understand why.

**Men! Are You In Doubt**

As to your trouble? Have you some skin eruption that is stubborn, has resisted treatment? Is there a nervous condition which does not improve in spite of rest, diet and medicine? Are you going down hill steadily?

**SYMPTOMS OF VARIOUS AILMENTS**

Weak and relaxed state of body; nervousness, despondency, poor memory, lack of will power, timid, irritable disposition, diminished power of application, energy and concentration, fear of impending danger or misfortune, drowsiness and tendency to sleep, unrefreshing sleep, dark ring under eyes, dizziness, pimples on face, palpitation of heart, easily tired, weakness or pain in back, lumberago, dyspepsia, constipation, headache, loss of weight, insomnia. Dr. Ward gives you the benefit of 28 years' continuous practice in the treatment of all chronic, nervous, blood and skin diseases. The above symptoms, and many others not mentioned, show plainly that something is wrong with your physical condition and that you need expert attention.

**NERVE EXHAUSTION**

The Great American Disease. There are numberless people who do not call themselves sick, and yet they feel nervous, weak, languid and tired most of the time. They have no ambition or endurance to work, everything they attempt is an effort. Life to them appears as a long, gloomy future. Their appetite is poor and variable; they become irritable, cross and discouraged. They have pains and aches in various parts of the body and there is often indigestion, belching of gas, pains in the stomach present. Sleepless, wakeful and restless nights follow. They become drowsy after meals and the brain tires easily.

**DR. WARD, SPECIALIST**

**OF INTEREST TO THE AILING MAN**

28 years' experience and learning, 28 years doing one thing and doing it well. Experimenting days long past. I know! My success is due to system and direct methods I go after the cause. No delays, no waiting, no wondering. No weary months and years dragging along waiting for expected results. I make a fee for treating the patient as long as treatment is necessary. If I make you a fee of \$100.00 or \$25.00 it means that I will treat you free until you are dismissed. Consultation and examination free.

# KILL ROADSIDE WEEDS

Cultivation Stores Water in Soil  
for Crops.

Grasshoppers Cheaply and Quickly  
Destroyed by Treating With the  
Poisoned Bran Mixture.

(Contributed by Ontario Department of  
Agriculture, Toronto.)

"A STITCH in time saves  
nine." This is especially  
true in the case of weeds.

When one considers that  
a single specimen of many kinds of  
weeds may produce over 10,000  
seeds, and that many of such seeds  
may be blown far and wide by the  
wind, one begins to realize what  
a source of contamination is a weedy  
roadside, a fence corner or a waste  
place.

In Ontario it is too common a sight  
in the fall of the year to see a farm-  
er busy with his fall cultivation, at-  
tempting to clean his field and pre-  
paring a good seed bed for next  
year's crop. At the same time on the  
roadside near the field or in the  
fence corners or some waste place  
near it such weeds as Perennial Sow  
Thistle, Canada Thistle, Milkweed  
and Wild Lettuce are maturing seeds  
by the thousand, to be blown on to  
his well tilled field and sowed it with  
enough filth to markedly lessen his  
crop and increase his labor next year.

When labor is so scarce and when  
the maximum quantity of grain  
should be produced from every acre  
under cultivation, no man can afford  
to allow weeds to seed anywhere in  
the neighborhood of his farm. A few  
hours spent now and again during  
the summer cutting weeds on road-  
sides, in waste places and fence cor-  
ners is a good investment for the  
future, which will pay handsome divi-  
dends in labor saved and increased  
crop.—Prof. J. E. Howitt, Ontario  
Agricultural College.

Conserving the Soil Moisture.  
Moisture is the most important  
soil property. Without it a crop is  
absolutely impossible, no matter how  
much fertility may be present. With  
the proper amount large crops are  
obtained, while on the other hand if  
moisture is excessive or deficient the  
yield is diminished according as the  
excess or deficiency increases. When  
the water necessary for the produc-  
tion of a full crop could be collected  
on the surface of the ground at one  
time, it would be from 18 inches to  
24 inches, depending on the  
crop and the season. During the  
growing season only 10 or 12 inches  
of rain falls in Ontario, and this is  
only half the amount required by the  
crops. Hence it becomes necessary  
to store up in the soil as much of the  
winter and spring rains as possible,  
while at the same time guarding  
against excess.

The amount of water a soil may  
contain depends on the pore space in  
the soil. Sands have least pore  
space, loams have more, and clay  
is intermediate. The porosity of a  
coarse sand is about 35 per cent.,  
of a loam or muck about 50 per  
cent., and of a heavy clay about 75  
per cent. From these figures it will  
be seen that a soil may contain near-  
ly as much water as soil grains.  
Since the plant roots require air it is  
not desirable to have all the soil  
pores filled with water; some free  
air space must be left, hence drain-  
age becomes necessary.

There are three ways that water  
may be lost: first by run-off, second-  
ly by drainage, and thirdly by eva-  
poration. Of these three the greatest  
is evaporation. It may amount to  
half the total rainfall. As long as  
the soil is wet in the spring we want  
all these at work, but as soon as the  
soil is dry enough for cultivation we  
want the losses cut off. And cultiva-  
tion is the only direct means by  
which this can be done in summer.  
Cultivation should begin just as early  
as the soil is dry enough. To delay  
one week means the loss of as  
much as 1 1/2 inches of water, and  
this is as much as falls in the month  
of April, a very serious matter when  
the needs are so great and the supply  
so limited. In the fall of the year  
cultivation should be deep to increase  
absorption and retention of water;  
in the spring shallow, in order to  
produce a dry layer of soil on the  
surface to cut off evaporation.—Prof.  
W. H. Day, Ontario Agricultural Col-  
lege.

A Cheap and Efficient Method of  
Controlling Grasshoppers.

Grasshoppers may be easily and  
cheaply controlled by poisoning with  
the bran mixture, which is made as  
follows: 2 1/2 lbs. bran, 1 lb. Paris  
green, 1/2 gal. molasses, 2 gals. water,  
2 or 3 lemons.

The bran and Paris green should  
be mixed thoroughly together when  
dry. This should be done the night  
before using. In the morning squeeze  
the juice of the lemons into the  
water, run the pulp and rind through  
a meat chopper and add this and the  
molasses to the water. Stir well and  
then pour the liquid on the poisoned  
bran and mix so thoroughly that  
every part is moist and will fall like  
sawdust through any sieves. The  
mash should be applied early in the  
morning between five and seven  
o'clock, by scattering it over the  
infested field, in the fence corners  
and on roadways where the insects  
have been observed. The above  
amount will suffice for four or five  
acres. It will be well to make an  
inspection three or four days later  
and if there are many survivors to  
make a second application.

It is important to attend to this  
matter as early in the season as the  
young grasshoppers are noticed, and  
not to wait till they grow big and  
have caused a considerable amount  
of damage.

The same means may be employed  
for the control of cutworms, making  
the application wherever the worms  
are observed just before dark in the  
evening.—L. Cassal, B.S.A., Provin-  
cial Entomologist.

"FLORENCE AUTOMATIC" OIL COOK STOVES

Oil is a cheap fuel for cooking—No  
ashes to clean up. No fires to build.  
What could be less trouble?  
A Florence Automatic with a McClary's Success oven will  
give you the best bakings you ever produced.  
No odor. No wicks to bother with.  
Save fuel, have a cool kitchen.  
Call and see the Florence in actual operation.

Full information about the Florence Oil Stove  
will be sent free to any address upon request  
to our nearest branch office. Branches at  
Toronto, London, Montreal, Winnipeg

# THRIFT STILL NECESSARY

The need of continued thrift on the  
part of Canadians is set forth in the  
following which is opening paragraph  
in the May Commercial Letter issued  
by the Canadian Bank of Commerce:

"The need for personal and community  
thrift is as great now as in the black  
days of 1918 when it was realized that  
the most stringent self denial was  
required to enable us to meet the  
demands of the Government for more  
aid yet more money with which to  
carry on the war. The great dread  
which hung over all a year ago has  
apparently been removed, but we still  
have a duty to perform and it is es-  
sential that it should be faced. It is  
necessary to carry on public works  
that will aid production, such as roads  
and railways, on a considerable scale  
in order to provide employment for  
the workers. We have also a burden  
of interest imposed on us by the war  
and we have great obligations to  
those who were maimed as well as to  
the dependents of those who laid down  
their lives for our security. These ob-  
ligations can be met only by a contin-  
uance of self denial on the part of  
everyone in the Dominion.

# Please, Mother! It's Nasty! Give Me a Candy Cascaret!

TO MOTHERS! Instead of the dreaded dose  
of castor oil, drops, calomel or pills, give your  
children Cascarets and save money, worry and  
trouble. Children love Cascarets because they taste  
like candy. Nothing else acts so gently but surely  
on the child's little stomach, liver and bowels.

When one of the kiddies has a white tongue, tainted breath, sour stomach  
or a cold; when cross, bilious, fussy, constipated, remember, a Cascaret  
to quickly "work" away the nasty bile, sour fermentations and poisons  
should always be the first treatment given. Cascarets never gripe the  
tender bowels, never injure, and never disappoint the worried mother.  
Each 10-cent box of Cascarets contains directions for children's dose from  
one year old and upwards. Also for adults.

# Glen Ridge The Ideal Residence Area of St. Catharines

Glen Ridge is by far the most desirable residential sub-  
section in St. Catharines now on the market, and  
possesses the following enormous advantages:

- 1. It is close to the heart of the city, all lots being within one  
mile radius of the Post Office and City Buildings.
- 2. There are building restrictions ensuring the erection of only  
the most desirable dwellings.
- 3. Beautiful surroundings and park areas.
- 4. Prices moderate and reasonable terms.

We expect a big movement in this property in the  
next two months. So act quickly and own a home in  
the most beautiful sub-division in the Niagara Peninsula.

## LOCAL INDUSTRY ENGAGES VISITORS

Pulp and Paper Business of Niagara District Interested Two Hundred Technical Visitors From the United States.

Upwards of two hundred representatives of the technical branches of the Pulp and Paper Industries of the United States paid a visit to Thorold Merritt and St. Catharines on Saturday and were given a most enjoyable time. They came over from Buffalo and were met with automobiles near Thorold by the business men of that town and taken in cars to various paper manufacturing plants. During the tour they visited the Ontario Paper Co., Interlake Tissue Paper Co., Riordan Paper Co., Lincoln Paper Mills, the Provincial Paper Co., the Beaver Board Co., the Foley Pulp Co. and the Kinloch Paper Co. of St. Catharines.

At Thorold a luncheon was given to the guests by the manufacturers and members of the Board of Trade. Mr. Carruthers presided. Several brief addresses were made. St. Catharines was represented by Ald. J. E. Riffer the Mayor being unable to attend. Ex-Mayor Barzoyne was also present. The importance of the paper industries in this district was referred to and appreciation was expressed by the visitors for the hospitality extended to them.

## AMAZING FIGURE ASKED FOR WORK

Lowest Tender for Construction of Public School Takes Breath Away From the Trustees.

So high was the lowest tender received by the Public School Board for the construction of a one storey school in this city that the Board may be unable to proceed with its original intentions with respect to building. The price asked in the tender was \$175,000 which is many thousands of dollars above what was expected. The consequence is that the Board is not about a good deal with its programme for the season. It is understood to be possible that unless much lower estimates can be secured the construction of two new eight roomed schools this year may have to be abandoned.

## STRIKE NAMES FROM UNION

Vice President of Railway Brotherhood Says Those who Defied International Authority Will Have to Suffer.

WINNIPEG, June 16.—Union members of railway running trades who went on strike in defiance of international authority will be struck off the membership of their organization. James Murdock, Vice-President of the Brotherhood of Railway Trainmen, declared yesterday that every man who walked out will be disqualified.

In cases where the majority of a lodge's membership are on strike or a lodge refuses to expel striking members, brotherhood charters will be withdrawn immediately. Neither railway or brotherhood officers could give definite information as to the number on strike. Mr. Murdock admitted that a "considerable number" from the railways walked out, and stated that Canadian Government lines probably would be affected to a greater extent than the Canadian Pacific. Executive officers of all lines declared that service would be continued without interruption of a serious nature.

## WHEN YOU WAKE UP DRINK GLASS OF HOT WATER

Wash the poisons and toxins from system before putting more food into stomach.

Says inside-bathing makes any one look and feel clean, sweet and refreshed.

Wash your self on the inside before breakfast like you do on the outside. This is vastly more important because the skin pores do not absorb impurities into the blood, causing illness, while the bowel pores do.

For every ounce of food and drink taken into the stomach, nearly an ounce of waste material must be carried out of the body. If this waste material is not eliminated day by day it quickly ferments and generates poisons, gases and toxins which are absorbed or sucked into the blood stream, through the lymph ducts which should suck only nourishment to sustain the body.

A splendid health measure is to drink, before breakfast each day, a glass of real hot water with a teaspoonful of limestone phosphate in it, which is a harmless way to wash these poisons, gases and toxins from the stomach, liver, kidneys and bowels: thus cleansing, sweetening and freshening the entire alimentary canal before putting more food into the stomach.

A quarter pound of limestone phosphate costs but very little at the drug store but is sufficient to make anyone an enthusiast on inside-bathing. Men and women who are accustomed to wake up with a dull, aching head or have furred tongue, bad taste, nasty breath, sallow complexion, others who have bilious attacks, acid stomach or constipation are assured of pronounced improvement in both health and appearance shortly.

## PRINCIPAL LET GO AFTER LONG SERVICE

REGINA, SASK., June 16.—Dr. Norman F. Black, Principal of the Regina Collegiate Institute for the past ten years has been given notice by the board that his services will be no longer required after June 30th. Four other members of the staff are in the same position. In the case of three of them they are being let out to find position for members of the staff returning from overseas. No successor to Dr. Black has been appointed.

Fourth Day—4 courses, 2 concerts and 2 Lectures  
Fifth Day—1 course—a full feast—The Play.  
Sixth Day—4 courses—The Junior Play, 2 concerts and 1 lecture.

This makes 20 courses for \$2.00, or 10c for each item provided. War Tax added. Get that \$2 ticket in advance, or you will pay 50c and 25c every time you sit down to the Feast of good things.

Profits Are to Be Given to the Local G. W. V. A.

Tickets now on sale at Mrs. Bixby's, Veal Bros, Bradley's Grocery Stores, Standard Office, Karn Bros., John W. Gordon, Beattie Bros., any member of the G. W. V. A.

## ONTARIO'S BIG CROPS

Ensure Equal Crops Next Year by Attention to Seed Grain.

Larger Profits From Live Stock Made When Stables Are Given Thorough Clean-up—Live Stock Thrive Better In Dry, Well-Ventilated Stables.

(Contributed by Ontario Department of Agriculture, Toronto.)

ONTARIO is fortunate this year in having a good supply of grain in almost all classes of crops. The more grain there is to select from, the better chance there is to get the very best seed for sowing in the spring. Too many farmers forget the seed supply for next year's crop until most of their grain is fed or sold.

One of the best of this grain was made for seed at threshing time or taken from the grain bins before any of it was fed or sold, there would be less work of seed preparation in the spring and a foundation provided for better seed than is often sown. Small, shrunken or broken seed has a feeding value nearly equal to that of large plump seed. The following results of seed selection experiments conducted at the Ontario Agricultural College at Guelph will show, however, that there is very great difference in the value of these for seed purposes:—

Selections.	Weight per Bushel (Lbs.)	Tons of Straw per Acre.	Bushels of Grain per Acre.
<b>Oats—</b>			
Large Plump Seed . . . . .	33.2	1.9	62.0
Medium sized Seed . . . . .	32.2	1.8	54.1
Small Seed . . . . .	31.8	1.8	48.9
<b>Barley—</b>			
Large Plump Seed . . . . .	49.5	1.5	53.8
Small Plump Seed . . . . .	48.8	1.5	54.4
Shrunken Seed . . . . .	44.1	1.4	46.0
Broken Seed . . . . .	48.6	1.3	42.3
<b>Spring Wheat—</b>			
Large Plump Seed . . . . .	59.1	1.4	21.7
Small Plump Seed . . . . .	58.3	1.3	18.0
Shrunken Seed . . . . .	56.9	1.2	16.7

(Oats were tested seven years, barley six, and spring wheat eight.) Selecting the best seed from that which the farmer has available will not only produce larger plump seed for sowing which will produce the most vigorous plants and the largest field of best quality, but it will very largely eliminate any weed seeds which may be in the grain. — Dr. C. A. Zavits, Ontario Agricultural College, Guelph.

**Clean, Dry and Ventilate Stables.** Cleanliness, dryness and good ventilation are hygienic conditions very desirable in the housing of all kinds of live stock. Horses, cattle, sheep, hogs and poultry all do better and are less liable to contract infectious and contagious diseases when kept under such conditions than when dirt, dampness and poor ventilation are found in the stables in which they are housed. Undoubtedly, outbreaks of infectious and contagious diseases do occasionally occur in the best built and best kept stables, but the danger of these spreading is much less than where unhygienic conditions prevail.

Without doubt good stock has been produced under stable conditions that were not of the best, but the chances of producing and maintaining good healthy stock are much greater where cleanliness, dryness and good ventilation in the stables are the order of the day.

Dirt of all kinds, whilst it does not itself produce disease, is liable to harbor and foster the bacteria or other germs that do cause infectious disease, hence, so long as it is lying around inside the stables it is a source of danger to the stock.

If there is one class of stable more than another in which cleanliness is desirable it is the dairy stable. Milk is an ideal food for many varieties of bacteria as well as for human beings or live stock, and many varieties of bacteria are always present in stable dirt. Consequently, when dirt or stable dust gets into milk, many contaminating bacteria get in with it. It is the action of these bacteria on the milk that causes it to spoil either by souring or putrefaction. Consequently, one step in the production of good clean milk is to have it produced where there is little danger of dirt or dust getting into it.

Dampness is a great agent in the spreading and fostering of disease. Perhaps the one disease that it is most liable to induce is pneumonia. Many horses are lost annually as a result of contracting pneumonia through being kept in low-lying, damp quarters. Dampness due to bad ventilation is very conducive to the development of various lung troubles with all kinds of stock. The damp stagnant air in badly-ventilated stables lowers the vitality, depresses the blood circulation and so puts the animals kept under these conditions in such a state as to make them ready subjects for the development of such diseases as influenza, pneumonia, tuberculosis and others.—Prof. D. H. Jones, Ontario Agricultural College, Guelph.

**Binder for Stone Road.** If a broken-stone road gets very heavy and traffic then it must be laid with a tar or asphalt binder to keep the pieces of stone from grinding on each other and finally powdering up under traffic.

**Time to Use Road Drag.** If the roadway is full of holes or badly rotted the drag should be used once when the road is soft and slushy.

The Society of Friends in Ontario is celebrating this week its hundredth anniversary.

## PLANS FOR A OF PEACE T

Formalities to be Carried out by the Hon. J. M. Macpherson, Minister of the Interior, will take an hour to finish.

PARIS, June 17.—Plans for a formal ceremony on the 18th of peace treaty at the Chateau de Versailles have been withdrawn from consideration in which they were first announced when no definite date for the ceremony was in prospect, and it is now to be held on the 18th of June. It is probable that the necessary approval of the Council of the League of Nations will be given in the near future.

French officials, entrusted with the arrangements for the ceremony, have been informed that everything must be ready on June 18th. They are now elaborating a project with sketches, time tables and lists of sample tickets for the occasion, representative of the press and spectators. They are also preparing the routes for the train which will replace the 18th of June train. The project was forwarded to the Council of the League of Nations for approval.

Unexpected delay arose in connection with the ceremony from the fact that it has been now for possible use about the month.

Staged in Hall of Mirrors. The actual staging, as announced will be staged in the Hall of Mirrors, so described the delegates, who by automobile after the Bois de Boulogne and the Park of St. Cloud, where the residence of Napoleon will be Versailles by de Paris a boulevard yards wide leading directly to the entrance of the chateau. The enclosure reserved for the public will pass between the chateau and the Grand Canal. They will descend from the chateau to the floor of the chateau, which the Paris mob on the day of French revolution the chateau, massacred the guards and compelled King Louis XVI. to abdicate.

Once occupied by the delegates will traverse the apartment at one time, the monarch and his queen at either end of the Hall will be raised off. At once the privileged spectators, other will be the correspondents representing the newspaper world.

Probably only the President of the chateau at the ceremony, but who will be present, as the standards of the twenty-two nations associated in the war will be out upon the chateau in a triumphal bunting.

It is expected that the ceremony will be timed to begin at 11 o'clock in the afternoon, and speeches by Premier Clemenceau as chairman of the Commission of the League of Nations, by the head of the German Government, the actual work of the signatures of the peace treaty will be completed in an hour. The plenipotentiaries ceremony will leave the chateau for the Hotel de Ville, which many of the found the German delegates regarded as enemies along with the other plenipotentiaries.

**CARRIED OFF** TORONTO, June 17.—The aid of a stolen automobile was used to get away a safe from a station on St. Clair street this morning. They made the spot in the country near the road and Eglinton and they were seen trying to get away. Police Sergeant Constable Young motor but the thieves ran away saw the officers and left. The motor they had from 511 Parliament street.

**THE WEATHER** TORONTO, June 17.—has been very warm and comparatively cool in the afternoon. The Maritime Provinces light scattered showers in all the provinces.
