# THE CANADIAN POULTRY REVIEW

DEVOTED TO POULTRY, IN ALL ITS BRANCHES

VOL. XVII.

124 VICTORIA STREET, TORONTO, OCT., 1894.

No. 10.

## NOTES AND COMMENTS

### The Pigeon Fancier.

WE have disposed of a certain number of pages in the REVIEW each month to the Fanciers Publishing Co., publishers of the *Pigeon Fancier*,

and this journal will for some time at any rate be combined with the REVIEW. The pages devoted to poultry will not in any way be cut down but rather increased as necessity requires, and readers will have practically two papers for the price of one. This is purely a business matter on our part, we dispose of a number of pages over which we have no control. The Fancier Co. assures us that if sufficient support is accorded them the paper will be continued permanently. We bespeak for them a liberal share of advertising.

### JUDGING AT THE INDUSTRIAL.

We agree with Mr. Jno. Gray, that the judging this year at any rate was spun out entirely too long, and there is no

use in disguising the fact that great dissatisfaction was caused thereby. Without saying so in any fault finding spirit, we certainly think that Mr. Butterfield should finish the poultry classes before turning on to the pigs; he "scattered" himself entirely too much this year to please exhibitors as a whole. We see no reason why three judges could not get through by at any rate noon of Wednesday, but if more are wanted let us have them by all means.

"DRUM MAJOR" AND "HER GRACE"

WHITE-CRESTED AND BEARDED POLISH BANTAMS, BRED AND OWNED BY F. B. ZIMMER, GLOVERSVILLE, N.Y.

Each won First at Gloversville Show in 1893, and the same at Philadelphia same season. At Philadelphia there was no class for "Bearded," so they had to compete in "Non-Bearded" class against "all comers."

### DISSATISFACTION

may have been openly expressed but we were congratulating the officials on having the show pass off with less grumbling as to the judging than ever we previously experienced. We can only account for it that the "grumblers" did not come our way. Mr. Gray introduces some names and personal matters into his communication which we think it better to omit. The place to ventilate these proposed additions and changes is at the committee meeting where the judges are appointed, of which committee, we think Mr. Gray is a

member. For the success of the show, the committee should outside at any rate, stand as one man.

## BREEDING PENS.

It seemed to be generally admitted this year that the increased number of breeding pens at the Industrial is becoming a serious matter to both Judges and Superintendent. In the majority of cases these pens are made up of birds the reverse of good, though in some instances, the opposite, we admit, is true. Another matter is that the pens containing four birds become very foul and are a menace to the health of the whole exhibit, besides being an eyesore to visitors. If the Association could see its way clear to place a third prize of \$1 on all open classes, in lieu of money now offered on pens, we think it would be more acceptable all round. It must be very difficult for a judge to give a satisfactory decision in the case of competing pens.

## THE ANNUAL LUNCHEON

was tendered exhibitors at the Industrial on Friday, but not being favored with an invitation, we are unable to report the proceedings, we learned however from another source that most of the prominent breeders were conspicuous by their absence.

## THE BUFF LEGHORNS

at Toronto, must have proved a revelation to those captious critics who continually carp on "new breeds" as if it were a positive loss that a new breed should be brought into existence. The more breeds the more fanciers, and while we are strong supporters of the older varieties we do not hesitate to welcome those of more recent birth where meritorious. We think our judges for some little time to come, will do well to favor as far as possible depth and soundness of color in buff Leghorns, as two years experience with them has proved to us that in soundness of color is where they mostly fail, many being light or ashy in wings and tail.

## DONKEYS

are not usually classed as habitants of the poultry yard though mayhap some of our readers will differ with us in this as to the two legged variety. One of the sights at London was the large number of these wild untamed steeds of the per-ary (situated at Victoria Park, Toronto), under the charge of Mr. Superintendent Daniels, of Toronto, who in the liberality of his heart was offering on the last day of the show the grand opportunity of "twice round the ring for five cents" to the juvenile population of "little London in the bush." Two well known exhibitors from Toronto, Mr. William "Game" Barber, and Mr. T. A. "Minorca" Duff, whose combined weight will aggregate somewhere in the neighborhood of

five hundred pounds, were seen wildly careering round the ring behind a span of these lightning steeds. The waggon has since gone to the repair shop, a hopeless wreck. Mr. Daniels quietly hinted to us that he was negotiating for the *debut* of the aforesaid gentlemen in their "Great Roman Chariot Races and Thrilling Bare Back Donkey Act" as an attraction at Victoria Park next summer. Both will be attired in real Roman costume, in addition to which Monsieur Barbere will wear his whiskers and Signor Duffo his linen duster, both so well known to show-goers.

## MR. SUPERINTENDENT SAUNDERS

has also purchased a "moke" for the rising generation of Saunders. One exhibitor as much as told us the latest acquisition was a singer, with a deep bass voice, but the one who styled him a "Mocking-bird" is now lost in the wilds of British Columbia, driven there by the fear of exposure and the wrath of the genial Jack for his poor joke.

## STANDARDS.

We regret having to disappoint purchasers of the new Standard, a letter of ours containing remittance having gone astray owing to change of address of the Secretary of the A.P.A. By the time this is read all will probably have been mailed.

## BEAMSVILLE SHOW.

An effort is being made to hold a poultry show in Beamsville the day previous to Thanksgiving.

## MR. D. J. PEACE,

Hamilton, Ont., writes us that through his small ad. in last REVIEW he sold eleven birds. If doubtful of this write him enclosing post card for reply.

## ONTARIO EXPERIMENTAL FARM.

President Mills writes: "After consultation with several of our leading poultrymen, I sketched the outline of two buildings and set our carpenter to work some time in May. These buildings consist of an office, a room for brooders, a cellar, a boiler room, store-rooms, and pens for fourteen breeds or varieties of hens; also, a larger pen for non-breeding stock, and an extension containing twenty small pens for male birds. We hope to have yards and all ready for use this fall."

## BOTH KINGSTON FIRMS.

Haycock & Kent and Oldrieve & Nicol have dissolved partnership, Mr. R. C. Kent and Mr. G. S. Oldrieve joining forces. The combined yards will still be situated at Cata-raqui and a competent man has been placed in charge.

# POULTRY

## POULTRY ASSOCIATION OF ONTARIO.

THE Board of Directors met on the Wednesday of the Toronto Show week. President C. F. Ernst in the chair, others present being Messrs. W. McNeil, A. Bogue, W. Barber, D. C. Trew, J. Rice, Jno. Cole, R. E. Kent, and R. Oke, who acted as Secretary. The list for Turkeys and Geese was made \$3, \$2 and \$1 and any other variety Bantams added. Messrs. Butterfield, Jarvis, Smelt and Johnson were appointed judges and will take the same classes as last year except that Mr. Jarvis takes barred P. Rocks. Doors will open Tuesday at 2 o'clock and close Friday at 12 noon. The dates of show to be Dec. 31st and Jan. 1, 2, 3 and 4. Mr. Fred Geobel was appointed Superintendent at a remuneration of \$25.00. All birds will be scored. The New Hamburg Association will get \$160 to run the show, the same amount as allowed last year. The prize list is to be ready December 1st, and will be published by the local Association, entries close December 24th. Mr. L. G. Jarvis was supported in his application as Superintendent of the proposed poultry department at the Governmental Farm, Guelph. Mr. A. G. Gilbert who was present spoke briefly on the egg question, when, after votes of thanks to him and the Industrial Board for use of room the meeting adjourned.

## JUDGING AT THE INDUSTRIAL.

### Editor Review :

IT seems to me that a question of great importance at the present time is the appointment of a fourth judge on poultry at the Industrial Exhibition. It may seem to many that it is either a little late or else decidedly early to bring this question up, nevertheless it is neither too late nor too early to discuss a question of so great importance to exhibitors and visitors at the Industrial Exhibition. In the opinion of many exhibitors the judging should be completed on Tuesday of the second week, thus giving farmers and other visitors the opportunity to inspect the winners, moreover on Wednesday of the second week there is almost always a larger attendance than on any other day of the exhi-

bitation. Under the present three judge system, the judging is often unfinished, even on Wednesday, consequently, hundreds of visitors and many exhibitors are sadly disappointed thereat. Is there no remedy for all this? Is there no man in Canada qualified to act as a judge on poultry, at Toronto Exhibition? Why certainly there is. In my opinion, there are scores qualified to act in that capacity. Judging from the dissatisfaction openly expressed at some of the judging at the late Industrial, our present judges don't suit everyone, neither would a new judge. A few years ago a gentleman was appointed as fourth judge on poultry, and if ever a man tried to do an honest job, he did, but he made the common error of not pleasing everyone, and was consequently disqualified, he made mistakes, as do our old judges. Another the following year also failed to filled the position satisfactorily to all exhibitors, yet he was engaged to judge several Canadian shows the following winter. In his case we saw a repetition of the other. He was not wanted by some of those he failed to give tickets to, and was no longer wanted to judge here. The exhibitors are to blame for much of the dissatisfaction in connection with the judging at our largest shows. If they would openly express their views on this subject instead of doing a lot of quiet "kicking," we might see a change, if a change is needed; many are afraid to speak for fear of being knifed at some future show, but honest criticism should be tolerated by everyone; therefore if the old judges leave cause for complaint, why should we expect a new judge to be infallible? Let us appoint a man and give him a fair show, be as lenient with the new judge as with the old. The talk that there is no one qualified to act as judge at Toronto, is all poppycock. There are scores of them. Are the Ontario breeders such an ignorant class that they cannot learn enough to pass a fair decision on a few classes of fowls at Toronto? Are men who yearly judge at Fall exhibitions, and have been years dabbling in thorough-bred fowls never going to learn enough to act at Toronto? What rot. Any intelligent fancier who follows the shows is qualified for that job. I do not wish, Mr. Editor, to occupy much space on this matter myself, I would like to hear the opinions of others, at the same time I could offer a much bigger argument as to why at least another judge should be appointed. This having the judging unfinished till nearly the last day of the show is neither just to exhibitors or visitors. It should be finished by Tuesday at the latest by some means, and if four judges are unable to accomplish that more should be appointed.

JOHN GRAY

Doncaster, Sept. 22, 1894.

## INBREEDING.

## IV.

BY H. S. BABCOCK, PROVIDENCE, R.I.

**B**EFORE leaving this topic I wish to touch upon the subject of establishing a strain, and as this will induce more or less inbreeding the matter seems germane to the general subject. A strain, according to the American Standard of Perfection, the edition edited by myself, is "A race of fowls that has been carefully bred by one breeder, or his successor, for a number of years, and has acquired an individual character of its own." The definition, though not perfect, will do. A strain really might be produced by several breeders working in unison, though as a matter of fact it is rarely if ever so produced. The gist of the definition is in the acquisition of an individual character. To obtain such a character the fowls must have been bred in their own line of blood sufficiently long to establish the character and give it the quality of transmissibility. Unless it can be handed down it is merely an accident, and an accident don't make a strain. To obtain such an individuality, inbreeding seems imperative, yet it must not be carried too far or the strain will perish in the making.

If one is ambitious to establish a strain of any variety he should start with not less than three yards and more would be better. These yards should contain unrelated fowls, selected by the breeder with reference to the particular points he wishes to establish. I say unrelated for he wishes to keep within the lines of blood found in his own yards, and be independent of the blood of breeders who are working for different points than he. He wishes to breed his own fowls and not run any danger from inbreeding. The three yards may be called *A*, *B*, and *C*. The first year they are bred as mated. The next year the following matings may take place among the progeny, *A-B*, *A-C*, *B-C*. Here is no inbreeding at all. The next season he can mate the chickens so that he will get blood lines like *A-B-A-C*, *A-B-BC*, *AC-BC*. Still the inbreeding is slight. Another year passes and the chickens are mated with such results as these *ABAC-ACBC*, *ABBC-ACBC*, and *ABAC-ABBC*—in yards *A*, *B*, and *C*, respectively. The progeny will contain in blood from fowls in yard *A*, 3 points blood of original *A*, 2 points *B*, 3 points *C*, that is  $\frac{3}{8}$  *A*,  $\frac{2}{8}$  *B*,  $\frac{3}{8}$  *C*. We may tabulate results as follows for the three yards:

	Original blood . . . .	<i>A</i> .	<i>B</i> .	<i>C</i> .
Yard <i>A</i> . . . . .	$\frac{3}{8}$	$\frac{2}{8}$	$\frac{3}{8}$	
" <i>B</i> . . . . .	$\frac{2}{8}$	$\frac{3}{8}$	$\frac{3}{8}$	
" <i>C</i> . . . . .	$\frac{3}{8}$	$\frac{3}{8}$	$\frac{2}{8}$	

And still there is no inbreeding worth mentioning—not a fowl one-half blood of any original one, and a first cross is one-half blood. By carefully combining the fowls in yards *A*, *B* and *C*, a number of years more will elapse before inbreeding will take place so as to injuriously affect the work of the breeder. And yet he has not gone outside of his own blood, he has bought no new fowls, he has introduced no fresh blood. But all along he has been selecting males and females that have the characteristics he desires to secure, all along he has been building up his strain. And the advantage of the unrelated birds has been apparent to him, for though they are gradually getting related in blood they still have enough foreign blood to keep them vigorous. So long as there is a clear eighth or even sixteenth of unrelated blood among them they are in no danger from inbreeding. And if one had started with five or six yards instead of three the day when dangerous inbreeding would commence would be still further deterred. Before inbreeding has really been long continued the strain, if selection has been carefully made of the stock, will have been established, a line of inbred males secured and fresh blood can be introduced through the female line without danger of injuring the work that has been done.

A breeder who has the patience and skill necessary to establish a strain, has the qualities that are essential to success in poultry breeding. He will be a successful breeder. Perhaps it is this thought that has induced so many beginners to advertise at the very opening of their career their own strain of fowls. I have actually known one party to advertise his strain of fowls of a certain variety before he had obtained one bird of this variety, and then write me for prices of stock. The fact is that while breeders are numerous strains are really very rare. Now and then you will find a strain with the characteristics so fixed that you can tell it though you see the specimens three thousand miles from the place of their origin. A friend of mine in Rhode Island had a strain of Langshans. It was at an exhibition at Charleston, South Carolina, and a breeder whom I knew, asked me to look at a couple of Langshan hens, I complied with his request, and after artfully calling my attention to other specimens we stood before these fowls. He asked, in an off-hand way, what I thought of those Langshans. I at once replied, "They look like the stock of *D*—," and then he smiled. He frankly told me they were some he had bought of *D*., and that he had tried to distract my attention by the others to see if I could note the strain characteristics. But that strain had been the result of years of careful breeding and intelligent selection, had fixed characteristics of its own, and could transmit, and did transmit them, to the succeeding generations.

TESTING EGGS.

**W**E are indebted to the Von Culin Incubator Co. for the engravings illustrating this article taken from their neat little booklet called "Incubation."

While the majority of persons who have good incubators make good hatches, there are some who would make decidedly better ones if they would just post up a little on a few important points which are easily learned by practice of simple and inexpensive experiments.

A Strong Fertile Egg on the 6th day as seen with the Culin Egg Tester.

Few persons understand testing eggs properly. Some have a very imperfect tester; some are unable to detect the fertile eggs closely—they cannot distinguish a dead germ from a live one, nor a weak from a strong one.

All eggs should be tested on the fifth or sixth day; at this time a clear or unfertile egg should be some

By the use of a good egg tester and the engravings here, any person can, with a little practice, test eggs rapidly and accurately; the engravings show exactly how the eggs look in the tester.

To become an adept at testing eggs for fertility one has only to use a good tester, his eyes and a little judgment. Break in separate saucers (carefully) one which you suppose to be a good, strong, fertile egg; one which seems to be fertile, but weak; one that is doubtful—that is, one which you cannot decide whether it is fertile or unfertile, and one that seems decidedly unfertile. Break one at a time, and examine it carefully, making note of it. This should be done on the fifth day, or at the first test.

A strong, fertile egg will, on the fifth day, (temperature having been kept at 102°, 103° or 104°) show a dark spot which will float and show veins running from it, looking somewhat like a spider; a weaker one will show a spot but is cloudy looking and muddled. The above are supposed to be fertile. Those which look clear are *unfertile*. Do not mistake the yolk for the germ or chick. All unfertile eggs are not perfectly clear. By breaking a few tested

eggs and studying their contents, carrying in your mind's eye (so to speak) the appearance presented through the shell prior to the breaking; having broken an egg, say of the strong fertile ones, select another from the unbroken eggs, and see how it compares with the former. Then having opened a fertile but weak egg select another from the unbroken ones and see how well you can match the germ before you. Then break a few apparently clear and unfertile ones, and you will be surprised to find some fertile eggs among them if your tester is inferior, or you are careless. You will also be surprised to find how easy it is to train the eye to detect and classify minute things by a little systematic practice.

There is decided economy in this egg-breaking business, for it will save eggs and chicks in the end.

An Egg to be Discarded on the 5th or 6th day, a weak or imperfectly Fertilized Egg that will never hatch.

Do not blame the sitting hen or the incubator, unless you *know* that your eggs are *fresh as well as fertile*. I would not have eggs for hatching that are over eight days old at any price—I would not use them if given to me. I prefer them not over five days old, and would like them still better at or under two days old.

It is not hard to remember that *fresh eggs from healthy hens, fertilized by vigorous cocks, MUST be used* if we are to hatch a large

percentage of strong, healthy chickens.

Fig. 1 shows a strong fertile egg as seen in the tester on the fifth or sixth day, B, the dark spot, is the live germ; AA are the blood vessels extending out from it. This germ B, is seen by placing the egg against the aperture of the tester, and revolving it between the thumb and finger until the side on which the germ has formed comes nearest the eye. The spot B, will be seen plainly, often surrounded by a small cloud, as shown; the germ at this time is quite lively, and can be seen to move up and down. This is a strong, fertile egg, and should hatch under a good hen or in a good incubator. In a well fertilized egg the blood vessels should show plainly, but the germ is not always seen as plainly, varying with the color and thickness of the shell and the power of the tester used. C, shows about the average air bulb in an egg on the fifth or sixth day of incubation,

though it may vary according to the freshness of the egg, and some eggs have larger air bulbs than others.

Fig. 2 shows a weak or imperfectly fertilized egg as seen in the tester on the fifth or sixth day. H is an oblong or circular blood vessel which has started, but nothing more, there is no heart, nor any part of a chick started. This egg will not hatch, but will decay if left in the hatcher. G shows a small dark spot, a weak germ, without blood vessels, only partially fertilized; it has died, after a start, and of course will not hatch. Both H and G may sometimes be seen in the same egg. It will not hatch. F, the air bulb, may be seen in the same egg. The egg may be comparatively fresh, and yet show both H and G. See following notes which explain why such eggs are found.

A Stale Egg, a Clouded Egg, a Doubtful Egg, an Egg not to be desired. Many such should be broken and examined.

muddled appearance as indicated by D (which generally moves about when the egg is turned before the tester) it is certainly stale and will not hatch. Do not confound the fresh egg which is not fertile with the stale egg; in an unfertile fresh egg you can see the yelk, which will look somewhat darker than the rest of the egg, but does not look muddled.

Fig. 4 shows a live egg on the sixteenth day. K is the space occupied by the chick; the lines I and J show the air bulb, which may be on top or at the side, as indicated by the respective lines. This is about the average air space on the sixteenth day, but it will vary according to the thickness of the shell, and age of the egg when set; then some eggs are not as full as others. At this stage of incubation (sixteenth day) a live chick darkens the egg, except the air bulb, when seen with the tester, and by watching the line I or J the chick may often be seen to move.

Eggs should be tested in a warm room one tray at a time.

The chick is harder to see after the seventh day, because the egg becomes more clouded by the growing chick.

NOTE.—In regard to G in Fig. 2, "a partially fertilized germ" means one that from one of several causes was not strong enough to live and grow. Among those causes are cocks that are too old, an insufficient proportion of male birds for the number of females; old or debilitated hens, over fat hens, too close confinement of breeding stock, etc.

The Air Space on the 16th Day. A Live Egg.

Again you may find G (Fig. 2) among eggs which you believe or know are not over a week old, and ordinarily the eggs were good and fertile. It frequently happens that an egg will remain in the nest, while several or may be a dozen hens lay there, and the succession of layers keeps the egg warm enough to start incubation, or it may happen that some eggs may have been subjected to a heat of 100°, in some warm place, unknown to or unnoticed by you. In either case, these eggs are taken from the nest or warm corner to a cooler place, and kept a few day, or over night, until a sufficient number has been accumulated to set, they become cold, and the germ dies before they are put under the hen or in an incubator.

In testing the first time, on the fifth or sixth day, a dead germ may be mistaken for a live weak germ, and if left in the incubator for three weeks would decay; so it is always best to test the eggs again on the tenth day, and remove all that have been marked doubtful and prove not good.

Some persons think it is just as well to leave all of them in until hatching is finished, but this is not right, the decaying eggs generate objectionable gases, and if broken are very offensive. A dead egg or an unfertile egg, does not contain the animal heat the live ones do, and are apt to have an undesirable effect upon the egg next to it, either under the hen or in the incubator.

An unfertile egg—one which has not been impregnated and in which life will never start or develop—is clear when shown at the tester. This egg, under the powerful lens of a first class tester, will show the yelk, which must not be mistaken for a doubtful or a fertile egg.

Use only the very best egg-tester.

## EARLY LAYING.

*Editor Review :*

I HAVE been informed that there was a local in one of the Port Hope papers that some gentlemen in Port Hope had some pullets laying at the age of four and one half months old and that it was a very rare thing for pullets to be laying less than five months. Well I might say that I purchased a setting of black Leghorn eggs last spring, 13 eggs, I set them, and the chickens were hatched on April 4th, and one of the pullets commenced laying on Aug. 4th. I got 11 chickens out of 13 eggs and several more of the pullets commenced laying the following week and they were all laying before they were four and one-half months old. I write these few lines to you as I have been informed that it is a very rare thing for pullets to be laying at the age of four months and seven days as my pullets are doing. If it is the case I thought it would be some news for the paper you publish and no harm done.

Yours truly,

WM. FOY.

Whitby, Sept. 5, 1894.

P.S.—The pullet I speak about has not missed one day since she started which was on Aug. 11, 1894.

## QUERIES AND ANSWERS.

WILL you kindly let me know 1. What the standard weight of black-red and brown-red Game fowl is. 2. Also if not up to standard weight can they be disqualified.

CHARLES A. WELLS.

Goderich, Ont.

1. There is no standard weight for Game, extra large birds are not desirable.
2. No.

If it is in accordance with your rules, will you kindly inform me in your REVIEW as to the following :

1. At the recent Exhibition, in the black Minorca class, I noticed that in many cases the extremity of the ear-lobes were colored, some of them fully half an inch, not the red blotches sometimes seen throughout the lobe of poor specimens, but a clearer defined patch of a darker shade. Is this coloring considered a blemish, and if so to what extent would a judge cut therefor? Is it usually transmitted in breeding?
2. Should the toes of black Minorcas be black, horn

color or white? Many, in fact nearly all, at the Exhibition were white.

ROBT. H. ESSEX.

Toronto.

1. Pure white lobes are required, any discoloration is a defect and if not caused by accident would likely be transmitted. The extent of cut would depend on the judge, the size and shade of colored patch.
2. Toes should be dark slate, or nearly black. ED.

## BOTTLE DRINKING FOUNTAIN.

AN inexpensive drink-fountain may be made by fastening an ordinary quart bottle to a board, as shown in the illustration, A, being the board and B B the clamps which hold the bottle in place. A hook, or loop, at the top of the board will serve to hang the bottle to the wall of the poultry house. A piece of wire should be attached to the mouth of the bottle, to prevent the bottle from

resting on the bottom of the drinking pan underneath. Fill the bottle with water, turn it upside down in the pan, and the pressure of the atmosphere will prevent the water from flowing out of the bottle only as it is lowered by the drinking of the water by the fowls. If preferred, the clamps (B B) may be attached to a post or to the wall, and the bottle removed from the clamps when filled. The design is from Mr. A. G. Richard, 12 East 69th St., New York City.—*Poultry Keeper.*

## SHERBROOKE, QUE., SHOW.

(From our Special Correspondent.)

THE Sherbrooke Show was held in the first week of September and the Poultry department was the largest and best ever held in the Eastern Townships and gave such an impetus to the poultry interests of this part of the Province that the result will no doubt be the formation of a strong Association in the Townships.

Entries were received from all parts of the Province, as well as from Ontario. Exhibits were received from New Hampshire and Vermont. Great praise was accorded to Mr. Fraser of Sherbrooke, who had the management of the department in his hands.

(Communicated.)

The exhibit this year in a new building with new coops, surpassed any of previous years and received unstinted praise from all, and was one of the leading attractions at the fair, over 800 fowls, including pigeons, etc., being shown with nearly all classes well represented. Also minor pets and ornamentals, such as black Squirrels, Ferrets, and Guinea Pigs, Pea Fowls, etc., which attracted much attention. Much credit is due Mr. A. T. Fraser as Director and Superintendent. Mr. Newton A. Knapp, of Winchester, Mass., Member of the Decimal Score Card Association was Judge.

The following is a list of the awards:—

**BRAHMA**—Light, 1 J B Roy, Coaticook, Que., 2 Dimont, Huot & Co., Montreal, dark, 1 U Bonneville, Danville, Que. **COCHINS**—Buff 1 Victor Fortier, Montreal partridge, 1 Bonneville, 2 Wm Patterson, N Coaticook. **LANGSHAN**—Black, 1 F B Wilson, Sherbrooke, Que., 2 C J Wright, Dixville, Que. **DORKINGS**—Silver grey, 1 John Bedlow, Brockville, Ont., colored, 1 Thos Irving, Montreal, 2 Bedlow. **PLYMOUTH ROCKS**—White, 1 Wright, 2 Sawyer & Wilson, E Angus, Que, 3 H E Baldwin, Coaticook, Que., barred, 1 F J Fuller, Sherbrooke, 2 Guy Carr, Compton, Que. **WYANDOTTES**—white, 1 Roy, 2 Patterson, 3 Baldwin, golden laced, 1 Patterson, silver laced, 1 and 2 Roy, 3 Patterson. **SPANISH**—black, 1 Bedlow, 2 Roy. **MINORCA**—Black, 1 C Johnson, Sherbrooke, 2 C J Pierce, Sherbrooke, white, 1 J Pickering, Fredesbury, Que. **RED CAPS**—1 A H Drew, Dixville, 2 Bedlow, 3 Fortier. **LEGHORN**—White, 1 Fuller, brown, 1 A F Fraser, Sherbrooke, 2 Patterson, 3 F J Young, Sherbrooke. **ANDALUSIANS**—1 John Gunnings, Sherbrooke. **POLANDS**—White crested black, 1 Fortier, 2

Jas Moy, white, 1 Fortier, golden or silver bearded, 1 Fortier, golden un-bearded, 1 Fortier, silver do., 1 H W Heath, Piermont, Vt, 2 Fortier, buff laced, 1 and 2 Fortier. **HAMBURG**—Golden spangled, 1 Bedlow, silver spangled, 1 R H Cockran, Ascot, 2 Bonneville. **HOUDANS**—1 Bedlow. **GAME**—Black or brown red, 1 Bonneville, pyle, 1 Bonneville. **BANTAMS**—Golden Sebright, 1 Fortier, silver sebright, 1 Fortier, black African, 1 and 2 Wilson, Pekin, 1 Fortier, black or brown breasted Game, 1 Bonneville. 2 Sawyer & Wilson, pyle Game, 1 Bonneville, duckwings, 1 Bonneville, Game any other variety, 1 Fortier.

## CHICKENS.

**BRAHMA**—Light, 1 Heath, 2 Roy, 3 A T Winter, Sherbrooke, Que, dark, 1 Bonneville. **MINORCA**—Buff, 1 Fortier, partridge, 1 Bedlow, 2 Bonneville, 3 Paterson. **LANGSHANS**—black 1 and 2 Wilson, 3 Wright. **DORKINGS**—Colored, 1 Thos Irving, Montreal. **PLYMOUTH ROCKS**—White, 1 and 3 Sawyer & Wilson, 2 Baldwin, barred, 1 Carr, 2 E H Norris, Newport, Vt., 3 Bedlow. **WYANDOTTES**—White, 1 Roy, 2 Paterson, 3 Baldwin, golden laced, 1 Bedlow, silver laced, 1 Roy, 2 Carr 3 Patterson. **SPANISH**—Black, 1 Bedlow, 2 Roy. **MINORCAS**—White, 1 Baxter. **RED CAPS**—1 Baldwin, 2 Drew, 3 Louis Reil, E Angus. **LEGHORNS**—White, 1 Bedlow, 2 Fuller, 3 Gunning, black, 1 Paterson, brown, 1 Fraser, 2 Norris, 3 Bedlow. **POLANDS**—White crested black, 1 and 2 Moy, golden bearded, 1 Bedlow, 2 Fortier, silver bearded, 1 Fortier, 2 Heath, buff laced, 1 Fortier. **HAMBURGS**—Golden spangled, 1 Bedlow, silver pencilled, 1 Bonneville. **HOUDANS** 1 Bedlow. **GAME**—Black or brown breasted red, 1 Bonneville, pyle, 1 and 2 Bonneville, duckwing, 1 Bonneville. **BANTAMS**—Golden Sebright 1 Fortier, 2 and 3 Fraser, silver Sebright, Fortier, black African, 1 and 2 Wilson, game, 1 Bonneville, game pyle, 1 Bonneville, duckwing game, 1 Bonneville. **BREEDING PENS**—Brahmas, 1 Heath, 2 Roy, 3 O Huct Co. Cochins, 1 Fortier. Bonneville, 3 Paterson. Langshans, 1 Robert Allen, Sherbrooke, 2 Wilson. Dorkings, Irving. Plymouth Rocks, 1 Carr, 2 Robt Mitchell, Lennoxville. Game, 1 Allen, 2 Bonneville. Hamburgs, 1 Berwick, 2 Wright. Leghorns, 1 Norris, 2 Fraser, 3 Sawyer and Wilson. Houdans, 1 Fortier. Black Spanish, 1 Bedlow, 2 Roy. Polands, 1 Heath, 2 Fortier. Minorcas, 1 Sawyer & Wilson. Wyandotte, 1 White, 2 Paterson, 3 Fuller. Bantams, 1 Wilson, 2 Berwick, 3 Fraser. Turkeys, bronze, 1 Wilson, 2 Bonneville, 3 Wright, any other, 1 Bonneville, bronze poult, 1 Bonneville, 2 Armstrong. Pekin Ducks, 1 Roy, 2 E S Foss, any other variety, 1 Baldwin, 2 Bedlow, 3 Fortier. Pekin Ducklings, 1 Roy, 2 Bedlow, 3 H D Smith, Compton. Bremen Geese, 1 Pickering, 2 Wilder Pierce, Martinville, Toulouse, 1 H W Burton, Lennoxville, any other variety, 1 Carr, 3 Wright, Bremen of 1894, 1 Irving, 2 Pickering, Toulouse of 1894, 1 Carr, any variety of 1894, 1 Wright. Best pen of farmers poultry not thoroughbred, 1 Smith, 2 Norris. Highest scoring fowl on exhibition, Wilson. Largest and best collection of male fowls on exhibition, Fortier. Best display of Wyandottes, Roy. Best pair black-red game chickens, Bonneville. Best breeding pen white Wyandotte chickens 1894, White. Best pen of barred Plymouth Rocks, Carr. Best pen high Brahmas, Heath. Best pen land fowls not included in prize list, Carr. Best pair ornamentals such as Pea-fowls, etc., Carr. Best pair of minor pets not included in prize list, Carr. Best pair Langshans, Wilson. Best pair S C brown Leghorns, Fraser. Best basket of eggs not less than 3 dozen, 1 Fearon, 2 Roy. Largest and best fowls owned and exhibited by any one breeder, 1 Fortier, 2 Bonneville.

## PROVINCIAL EXHIBITION, QUEBEC.

*(From our own Correspondent.)*

GRAVE doubts were entertained during the summer whether the exhibition would be held or not. So many different interests had to be considered and the great bug-bear of fear of success made a great many hang back, who now it is over, are very glad that it was held, and that such crowds of people were attracted to Quebec. We are glad to chronicle that although many departments were backward the poultry section was ready before the opening and no hitch would have occurred if it had not been that hundreds of birds were entered at the last moment. The Exhibition Committee were wise in their selection of a Superintendent for the Poultry department but many of them had visited the exhibition last year in Montreal and had seen the success of the Poultry department there, so they persuaded Mr. Ulley to leave his business in Montreal and go to Quebec and take charge. That he succeeded is beyond doubt, and his department was the best managed in the exhibition. The show was held from Monday, the 10th of September to noon on Saturday, the 15th. Every bird was in the hands of the express companies on Saturday evening. It was the largest poultry show ever seen in the city of Quebec, and was a revelation to thousands who had never seen anything like it in their lives. The entries of all kinds, including pigeons, numbered close on to 1500. The exhibitors came from all parts of the Province as well as from Ontario. Among the prominent exhibitors were the following:—Oldrieve & Nicol, of Kingston, with over 100 entries; C. J. Daniels, of Toronto, with over 70; W. H. Osborne, of Brockville, with over 50; W. H. Read, of Kingston, over 50, and many others. Such well known exhibitors from Montreal as T. Hall, J. Virtue, Wm. Cox, F. W. Molson, L. Huot, V. Fortier and A. Drummond, as well as Guy Carr from Compton and U. Bonneville of Danville, were some of the exhibitors in the Province of Quebec.

The old veteran Mr. I. K. Felch was brought on to judge the poultry, and he is just as full of vigor and fire as ever putting in a day's work that few would attempt to follow. Mr. James Ainslie of Montreal judged the pigeons. The leading varieties that were particularly strong and well represented were Games, Bants, Wyandottes and Plymouth Rocks. The young birds were remarkably well forward hardly a bird but was in fit shape to be scored.

His Excellency the Governor General and Lady Aberdeen paid a visit to the poultry department on Tuesday

afternoon and they complimented the Superintendent on the fine show. They were particularly interested in the display of incubators and brooders.

More birds were sold at this Exhibition than at any other show held in this Province many exhibitors having positively to refuse to let their birds go. The interest that was created in poultry at this show is likely to be of the greatest advantage to the Province, and must have gladdened the heart of that life-long fancier High Constable Gale of Quebec, who was present and helped all he could. Now is the time for a long pull and a strong pull altogether from all the fanciers and organize for a Provincial Society.

## INDUSTRIAL EXHIBITION, TORONTO.

WHAT was about the best show yet held by this Association passed off quietly and with little grumbling on the part of exhibitors. The judging hung on too long and in Mr. Butterfield's classes was done to intermittently. The awards were well taken and little "kicking" indulged in. Mr. Daniels, with his assistants, had everything in apple-pie order and the feeding and watering was well looked after. What a show it would be if each bird were penned on a level in one of "Spratts" or similar coops. The weather was pleasant, not too hot, and visitors numerous. Sales were good and elsewhere we give a list of those that came under our notice. Big prices did not prevail. We never saw old birds in such good trim at this time of year, and as far as our own exhibits are concerned we may say that during the show some actually improved in condition which speaks worlds for the care bestowed on them.

BRAHMAS, Light—First cock a big one in nice shape, good dark tail, comb a bit high at back; second not yet fit, neat head points; third excellent legs, good blocky body, not yet moulted out. First hen a fine one in nice trim, nice hackle, neat head points, good legs and toes; second a bit smaller but a good one, grand shape of body; third good all round. First cockerel now an easy win, a big one with stout, good colored legs, now at his best; second, neat head and comb, looks yet a bit lanky and weak in body; third, out of shape. First pullet a beauty, very fit; second nice, smaller; third good. We don't like this plan of putting two pullets and a cockerel in one pen, cannot always tell the winners as in the case of second and third here.

BRAHMAS, Darks, not as large classes as we have seen. First and second both cocks and hens shown by the one firm and stand well out from the rest and the same may indeed be said of the winning chicks; second cockerel ap-

proaches very near to vulture hocks, well grown and splendidly shown.

**COCHINS**, Buff a good lot as usual here. First cock a grand one all over and faultlessly shown, fine color, grand shape, legs and feet and neat head points; second not nearly so well shown and fairly beaten pretty well all over; third a neat headed one but fails in shape of breast, which lets too much day-light under him. First hen an immense even colored one, very profuse in feather, spoiled by a nasty high comb and light eye; second smaller and neater but faded and mealy in color; third also a good one, larger than second but also off in color. Chicks a grand lot indeed, first pair good all through closely followed by second. **BLACKS** good for the color with exception of first cock, which though a good color is not a Cochin in shape. We don't see where the whites could be much improved, good all through; first pullet the acme of shape, color and feather. Partridge classes filled well and were a good lot.

**LANGSHANS** a good lot, first cock a big lustrous colored one; we thought third hen the pick of the lot. Chicks good, the firsts and seconds win easily in size and forwardness.

**PLYMOUTH ROCKS**, barred.—We are now on touchy ground, as here appeared to be the class in which some exhibitors took exception to the awards. We give our candid opinion be it right or wrong, and the judge has promised us a few notes on the class. Cocks in their present shape not a good one in the lot. First has no breast and is bad in back but excellent in color and head points with exception of back of comb, which follows head too closely; second a big one with his tail out and comb going over. First hen a good one all through, excellent shape and color and shown very fit; second a nice color one, much too small to suit our taste, beats third easily in color. Cockerels were not a good lot, first easily the best, second not worthy of a place, very weak in color and pale in legs; third much better; we thought an unnoticed one of Downs, a big forward fellow, too dark in color and with an objectionable smoky tinge, best of legs and feet, might have been placed. Not by any means a good class. Pullets a much better lot, first standing well out, good shape, well grown, well barred and well shown, might be brighter in legs; second and third nice all through. Whites were not an extra lot. First cock nicely shown, good body and legs; second a fair one, too much Leghorn at either end, *i.e.* tail and comb. First hen a good one with pale legs, others fair. Some birds in this class evidently good ones, but in horrible trim, should not have been penned, it is a mistake to exhibit specimens in such feather

and an injustice to the birds. Chicks were much better, second cockerel runs first close, beaten a bit in color, both good blocky birds; thirds good.

**MINORCAS**, black.—First cock good body, comb, legs and lobes; second a big bodied one, excellent color, comb very straight and well serrated, but stands too high off head at back. First hen a nice bodied one, good color, nice head; second good; lustrous color. First cockerel a big early one, large evenly serrated comb, but moderate in color, especially on breast; second not as large or as good in comb, yet a bit leggy and light in body. First pullet just out from England and a beauty all over, grand shape, good color, in fact hard to find fault with anywhere; second a large one, good lustrous color, nice body, we thought third might have gone to her pen mate. The owner of second pullet showed a very nice pen of four pullets all sisters. Whites made a good show all cards going to one firm with an excellent team; second cock out of shape now, stands high on his legs, typical comb and should, when he fills down and in good condition, be a hard one to beat. The other old birds were very good indeed, and the winning chicks very fine.

**JAVAS**, black a nice lot indeed, the winners well forward, large and typical, extra in color. Whites good but seen in many cases to be approaching white Plymouth Rocks too closely; a toss of a copper might decide the class in which some might have been shown.

**WYANDOTTES**, blacks, are fast improving, the best old birds shown here yet, *if not moulted too rapidly*. Chicks not up to old ones, cockerels flecked in hackle. Whites excellent, large good shaped birds and fine color, winners easily ahead. Chicks grand first and first one of the nicest pairs in the show, of any variety. Silvers did not make as large classes as we expected to see, but show improvement, especially in this year's birds, the first and first being really good, large, well grown, nice head points and distinct in markings, others good. In old birds the first hen holds her color well, and is a nice shape, good head, pale in legs. Golden good, especially chicks, and much improved, now getting color about right.

**GAMES**, black-reds. In cocks we thought an unnoticed one of Smith's, a big upstanding bird with great reach and stout limbs, should have been in it somewhere, his badly carried tail is his worst fault. First a good long headed one, reachy; second also well up. First hen too small but typical, a Game fowl all over; second a good one, larger but too full behind; third good. Brown-reds a small class but good. Duckwings fair, first cock too much tail, good head and body. Piles very good both old and young, first pullet

about the pick of the bunch. Indians not large classes but good typical birds, first cock in perfect feather, hard as nails, not a large one; second bigger, yet rough. Hens and chicks good. We are glad to see Mr. Goulding, an old time exhibitor in the Game classes, back again, and to notice that he succeeded in getting into the money.

**RED CAPS** good.

**SPANISH** a good lot as they go now, especially hens. We thought the cards correct.

**ANY OTHER VARIETY.**—First cock a Silky. First hen a good Sultan; second nice Silky. First cockerel the best we have seen yet, a buff Plymouth Rock, second and third Silkies; first and second pullets also Silkies; third a buff Plymouth Rock with her tail out.

**BREEDING PENS** made up almost one hundred and were a fair sized show in themselves.

**TURKEYS, DUCKS AND GEESE**, were good all through. The white turkeys appear to be improving in size. First Bronze hen a grand one all over.

**BANTAMS** filled one entire wing and were one of the best and most varied collections we have yet seen. Polish numerous and good, third in cock going to a bearded one with V comb; second pullet, larger in body than first but with a much better rest. Pekins good, first cock a little gem, small, very profuse in feather and good color; second also a good one. Hens a nice class. First pullet a beauty all over, small, good shape, grand cushion. Cockerels were not so good. Japanese good and several very nice whites in the money. White Cochins really nice and other varieties well up. Good white-booteds won in the variety classes.

Mr. Butterfield supplies us with the following notes.

**GAME BANTAMS**—First black-red cock a grand one. Second a good bird, but in bad show shape. Third carried a very loose wing and too open in tail. First hen a gem in carriage and very fine in tail. Second hen a good bird, but looser in feather. Third hen a little on the loose side; don't hold herself together. Duckwings, fairly good birds, but not in good show form. Brown-reds.—All the cocks carried their tails too much spread. The first prize black Africans were gems of the first water, very, very small birds with well developed ear lobes and very fine in texture, and I would have liked to have seen friend Rocky just having one of his feasts, looking at a pair of grand and about perfect specimens, the best pair small black rosecomb Bantam fowls I ever judged; second prize pen real good ones; cock a little coarser in comb and a little larger in size, but a grand small bird; hen just a little poorer in comb, but equally as good as first prize hen excepting comb. First cockerel grand; first pullet small and very distinct in ear

lobe. Golden Sebrights.—All the winning birds good and in good shape. Silver Sebrights—Quality was the rule, not as we often see, quantity and not quality, and when McNeil and Oke meet readers can rely that there will be some hot competition in the classes in which they oppose one another. White Cochin Bantams.—First prize cock and hen grand birds, with good yellow legs and beaks and very small, and much better Cochin shape than we find in Pekins; chicks were first-class Cochins in miniature. Pekins were not in good feather, at least I may say they were old feathers, but all want to get their new feathers to be judged at their best.

**HAMBURGS.**—All the winning birds immensely fine, right up in G, and I don't think in my 40 years' experience I ever saw three as good silver pencilled hens at any one show in England, and the first prize silver pencilled chicks were superb, cockerel with a grand artistic tail, solid black, with the very finest of white edging on coverts and sickles, while the lustre of the pullet was immensely fine and every feather pencilled finely. They were so many good birds in the Hamburg classes that I cannot do them all the justice they require, for just as soon as I was through I had to leave to judge next day in Detroit.

Mr. Jarvis promised us notes of the remaining classes but at the time of going to press they had not come to hand. Will appear in next issue.

**SALES.**

First B. Rock pullet to H. Emrick, Int. Bridge. Second white Game Bantam cockerel, third do. pullet and first black Minorca hen, third do. cock to A. F. Hass, Buffalo. First silver Wyandotte cock and first pullet to C. Lyons, Lucknow. Second do. pullet to Jno. Gray, Doncaster. Second do. cockerel and third pullet to J. J. Lenton, Oshawa. Second pen white Wyandottes to R. J. Gravelly, Cornwall. First pen Indian Games to E. Otway Page, Ridgeway. Second cock do. to A. Howe, Toronto. First pyle Bantam pullet and second cockerel to R. C. Crowe, Guelph. Mr. Haven sold the first silver grey Dorking cock and Mr. Barber made several sales of Games and Game Bantams. Second white Game Bant pullets to H. B. Donovan.

**LIST OF AWARDS.**

**BRAHMAS**, dark cocks, 1 and 2 Thorp & Scott, London, Ont, 3 John Cole, Hamilton. Hens 1 and 2 Thorp & Scott, 3 Jas Brown, Toronto. Light cock 1 Cole, 2 and 3 J H Paton, Toronto. Hens 1 E H Donnelly, Sandwich, 2 Haycock & Kent, Kingston, 3 Cole.

**COCHINS**, buff cocks 1 and 3 Geo G McCormick, London, Ont, 2 F C Hare, Whitby, Ont. Hens, 1 L G Pequegnat, New Hamburg, 2 A Bogue, London, 3 Thos. Cockburn, Hamilton. White cocks 1 and 2 Wm McNeil, London, 3 R B Millard, London. Hens 1 and 2 McNeil, 3 H Emrick, International Bridge. Black co. ks, 1 and 2 McCormick. Hens, 1 and 2 McCormick.

**-LANGSHANS**, cocks, 1 E McCormick, Newmarket, 2 Robt McCurdy

London, 3 T A Duff & Co, Toronto. Hens, 1 and 2 Duff & Co, 3 McCurdy.

DORRINGS, colored cocks, 1 Bogue, 2 J L Corcoran, Toronto, 3 Jno Lawrie, Malvern. Hens, 1 Bogue, 2 W J Haycraft, Agincourt, 3 Lawrie. Silver grey cocks, 1 G M Haven, Toronto, 2 Bogue, 3 Corcoran. Hens, 1 and 2 Corcoran, 3 Bogue. White cocks, 1 and 2 Bogue. Hens, 1 and 2 Bogue.

HOUDANS, cocks, 1 Bogue, 2 Stockwell, 3 Paton. Hens, 1 Stockwell, London, 2 Haycock & Kent, 3 Bogue.

LAFLECHE, cocks, 1 and 2 R Oke, London. Hens 1 and 2 Oke.

CREVE CŒURS, cock, 1 and 2 Oke. Hens 1 and 2 Oke.

WYANDOTTES, black cocks, 1 G Bogue, Strathroy, 2 Webber & Robertson, Guelph, 3 John Gray, Doncaster. Hens, 1 Geo Bogue, 2 Webber & Robertson, 3 Gray. White cock, 1 and 2 McCormick, 3 G Bogue. Hens, 1 McCormick, 2 Haycock & Kent, 3 C Bonnick, Toronto. Silver laced cocks, 1 & 2 Geo Bogue, 3 Jacob Dorst, Toronto. Hens, 1 J E Meyer, Kossuth, 2 R H Marshall, Galt, Dorst. Golden laced cocks, 1 and 3 Haycock & Kent, 2 J R Devins & Co, Emery. Hens 1 and 2 Haycock & Kent, 3 J J Lenton, Oshawa.

PLYMOUTH ROCKS, cocks, 1 Donnelly, 2 Corcoran, 3 Duff & Co. Hens 1 Haycock & Kent, 2 Donnelly, 3 J E Bennett, Toronto. White cocks 1 Brown, 2 Jas H McKee & Co, Norwich, 3 Allin Bros, Newcastle. Hens, 1 Haycock & Kent, 2 Allin Bros, 3 Bonnick.

DOMINIQUE, cocks, 1 and 2 G Bogue, 3 Haycock & Kent. Hens, 1 Haycock & Kent, 2 G Bogue, 3 Wm McNeil, London.

GAME, black red cocks, 1 Wm Main, Milton, 2 Wm Barber & Co, Toronto, 3 Jas L Hamilton, New Hamburg. Hens 1 Barber & Co, 2 Main, 3 R B Smith, Stratford. Brown red cocks, 1 and 2 Barber. Hens 1 and 2 Barber. Duckwing cocks 1 L Troth, Toronto, 2 and 3 Barber & Co. Hens, 1 and 2 Barber & Co, 3 Troth. Pile cocks 1 and 2 Barber & Co, 3 G Goulding, Toronto. Hens 1 Goulding, 2 J Myles & Co, Toronto, 3 Barber & Co. Indian cocks 1 and 3 Haycock & Kent, 2 Wm Langdon, Port Hope. Hens, 1 A Howe, Toronto, 2 Langdon, 3 Haycock & Kent. Any other variety cocks, 1 J Lovegrove, St George.

HAMBURG, black cocks, 1 McNeil, 2 Duff & Co, 3 Oke. Hens, 1 Oke, 2 Haycock & Kent, 3 McNeil. Golden pencilled cocks, 1 McNeil, 2 Oke, 3 Bogue. Hens, 1 McNeil, 2 Oke, 3 Bogue. Silver pencilled cocks, 1 McNeil, 2 Oke, 3 Bogue. Hens, 1 McNeil, 2 Bogue, 3 Oke. Golden spangled cocks, 1 McNeil, 2 Bogue, 3 Oke. Hens, 1 McNeil, 2 Bogue, 3 A H Lake, Toronto. Silver spangled, cock, 1 McNeil, 2 Bogue. Hens, 1 McNeil, 2 Robt Minto, Galt, 3 Bogue.

RED CAPS, cocks, 1 Devins & Co, 2 Haycock & Kent, 3 W H Kirby, Oshawa. Hens, 1 and 3 Haycock & Kent, 2 Devins & Co.

JAVAS, black cocks, 1 and 2 McCormick, 3 A Noden, Toronto. Hens, 1 and 2 McCormick, 3 Noden. Any other color cocks, 1 and 2 Webber & Robertson. Hens 1 Webber & Robertson, 2 and 3 H B Blater, Todmorden.

LEGHORNS, white cocks, 1 and 3 John Pletsch, Shakespeare, Ont, 2 Thos Rice, Whitby. Hens, 1 Rice, 2 Pletsch, 3 J A Laird, Brampton. Brown cocks, 1 Rice, 2 and 3 Pletsch. Hens, 1 Noden, 2 Rice, 3 Pletsch. Rose Comb, brown cocks, 1 Haycock & Kent, 2 Brown, 3 Chas Grimsley, Bracondale. Hens, 1 Brown, 2 and 3 Haycock & Kent. Rose comb, white cocks, 1 and 2 T J Keiley, London, 3 Bonnick. Hens, 1 Keiley. 2 W J Bell, Angus, 3 Bonnick. Black cock, 1 W G Lovell, 2 Jno Schuler, New Hamburg, 3 D M Coulter, Amulree. Hens, 1 and 2 Johnson Bros, London, 3 Lovell. Buff cocks, 1 Wm Blain, Toronto. Hens, 1 and 2 Chas Wagner, Mimico.

SPANISH, cocks, 1 F C Hare, Whitby, 2 Corcoran, 3 McNeil. Hens 1 and 3 Hare, 2 Corcoran.

ANDALUSIANS, cocks, 1 W H Dustan, Bowmanville, 2 W R Knight, Bowmanville, 3 Noden. Hens, 1 Knight, 2 Dustan, 3 Noden.

MINORCAS, black cocks, 1 and 2 Duff & Co, 3 Wagner. Hens, 1 F & C Coulter, Toronto, 2 Wagner, 3 Duff & Co. White cocks, 1 and 2 Duff & Co. Hens, 1, 2 and 3 Duff & Co.

POLANDS, white crested black cocks, 1 McNeil, 2 Bogue, 3 C S Benson, Toronto. Hens, 1 McNeil, 2 Bogue, 3 Readwin. White cocks, 1 McNeil, 2 Bogue. Hens, 1 McNeil, 2 Bogue. Silver cocks, 1 McNeil, 2 Bogue. Hens, 1 McNeil, 2 Bogue. Golden cocks, 1 McNeil, 2 Bogue. Hens, 1 McNeil, 2 Bogue. Buff laced cocks, 1 and 2 McNeil. Hens, 1 and 2 McNeil. Any other color unbarbed, except white, cocks, 1 McNeil, 2 Bogue. Hens, 1 McNeil, 2 Bogue.

ANY OTHER VARIETY FOWL, cock 1 H B Donovan, Toronto. Hens, 1 Oke, 2 and 3 Donovan.

BANTAMS, Game black red cocks, 1 and 2 Barber & Co, 3 O'Brien & Colwell, Paris Station. Hens 1 and 2 Barber & Co, 3 C R Crowe, Guelph. Game, brown red cocks, 1 Bonnick, 2 and 3 Barber & Co. Hens 1 and 3 Barber & Co, 2 Bonnick. Game Duckwing, cocks, 1 and 2 Barber & Co. Hens, 1 and 2 Barber & Co, Game Pyle, cocks 1 Crowe, 2 Barber & Co, 3 E Brown, Bracondale. Hens, 1 Brown, 2 Bonnick, 3 Barber & Co. Game, any other variety, cocks 1 and 2 Donovan. Hens, 1 and 2 Donovan.

COCHIN, black or white cocks, 1 McNeil, 2 and 3 Donovan. Hens, 1 McNeil, 2 and 3 Donovan.

ROSE COMB, black cocks, 1 McNeil, 2 Oke, 3 Webber & Robertson. Hens, 1 McNeil, 2 Oke.

GOLDEN SEBRIGHT, cocks, 1 Oke, 2 McNeil, hens, 1 McNeil 2 Oke.

SILVER SEBRIGHT cocks 1 McNeil, 2 Oke, 3 Brown. Hens, 1 McNeil, 2 Oke, 3 Brown.

JAPANESE, cocks, 1 McNeil, 2 Oke. Hens, 1 McNeil, 2 Oke.

PEKIN, cocks, 1 McNeil, 2 Oke, 3 H L Ockender, Toronto. Hens 1 McNeil, 2 Oke.

POLISH, cocks, 1 Oke, 2 and 3 McNeil. Hens, 1 McNeil, 2 Oke, 3 Donovan.

ANY OTHER VARIETY, ornamental cocks. 1 and 2 Oke, hens 1 and 2 Oke.

#### SPECIAL PRIZE MEDALS.

Largest and best exhibits made by one exhibitor in each section :  
Geo G McCormick, Asiatics ; William Barber & Co, Games ; William Barber & Co., Game Bants ; R. Oke, French ; T. A. Duff & Co, Mediteranean ; Wm McNeil, Polands ; Wm. McNeil, Ornamental Bants ; Haycock & Kent, American ; Wm. Fox, Ornamental Class.—McNeil, Hamburg.

BRAHMAS, dark cockerels, 1 and 2 Thorp & Scott, London ; 3 L Sage, London. Pullets, 1 and 2 Thorp & Scott, 3 T W Brown, Todmorden. Light, cockerel, 1 Haycock & Kent, 2 Donnelly, 3 J Myles. Pullets, 1 Haycock & Kent, 2 Donnelly, 3 A C Blyth, Toronto.

COCHINS, buff cockerels, 1 and 2 McCormick, 3 Hare. Pullets, 1 and 2 McCormick, 3 Emrick. Partridge cockerels, 1 Bogue, 2 Oke, 3 Cockburn. Pullets, 1 Cockburn, 2 Bogue, 3 Oke. White cockerels, 1 McNeil, 2 and 3 Millard. Pullets, 1 McNeil, 2 Millard. Black cockerels, 1 and 2 McCormick.

LANGSHANS, cockerels, 1 and 2 McCurdy, 3 Benson. Pullets, 1 and 2 McCurdy, 3 Duff & Co.

DORRINGS, colored cockerels. 1 Corcoran, 2 Bogue, 3 Lawrie. Pullets, 1 Lawrie, 2 Haycraft, 3 Bogue. Silver grey cockerels, 1 Bogue, 2 and 3 Kirby. Pullets 1 and 2 Corcoran, 3 Kirby. White cockerels, 1 and 2 Bogue. Pullets, 1 and 2 Bogue.

HOUDANS, cockerels, 1 Bogue, 2 Haycock & Kent, 3 W Elliott. Oshawa. Pullets, 1 Bogue, 2 Haycock & Kent, 3 Elliott.

LEFLECHE cockerels and pullets, 1 and 2 Oke.

CREVE COEURS, cockerels, 1 and 2 Oke. Pullets 1 and 2 Oke.

WYANDOTTES black cockerels, 1 Gray, 2 Webber & Robertson, 3 Geo Bogue, Pullets, 1 and 2 Gray, 3 Bogue. White cockerels, 1 and 2 McCormick, 3 Haycock & Kent. ## KINGSTON SHOW.

(Communicated.)

OVER six hundred birds were on exhibition and the quality was of the very best. Most all classes extra well filled, more especially in silver and white Wyandottes, white Plymouth Rocks and all varieties of Leg-horns. The Asiatics were a very nice class.

### PRIZE LIST.

Goose of 1894, 1 Jenkins, 2 Hobbs, 3 Smith and Bro. Guinea Pigs, 1 McNeil, Ferrets, 1 J Mitchellree, 2 Axtell.

## TORONTO SHOW.

MR. JARVIS' NOTES.

AT the last moment we received the promised criticisms from Mr. L. G. Jarvis, on some of the classes he judged, and we have therefore "litted" some other matter to make room for his communication. He writes:—

The poultry at the Industrial was one of the prominent features. I will give you a short report of the classes on which I passed judgment.

**BARRED PLYMOUTH ROCKS.**—Not as good as last year. First cock a very evenly barred bird, and in good show shape an easy winner; second inclined to be a little Cochiny in shape, fair in barring; third, not fully moulted, a good shaped bird. First hen in fine condition, hard to beat; 2nd a grand hen but not over moult, will be a hard one to beat at the winter shows; 3rd fair, not so distinct in barring. First cockerel very even in barring, not as good in shape as 2nd; 2nd good in shape but not well barred on breast; 3rd same. First pullet large and evenly barred, will make a fine hen; 2nd pullet not as large as 1st but very regular in barring; 3rd a large pullet, good in shape, but not good in color. Several fine specimens were shown in this class but too small, will make fine birds.

**WHITE PLYMOUTH ROCKS.**—A good class and the winning birds very white in plumage, with good colored legs and beaks so much desired in this class as well as in Leghorns and Wyandottes.

**LEGHORNS** a good class. White, 1st cock a grand bird, in good condition, free from any white in face, and very white in plumage; 2nd crowds hard for first place, only for being a little white in face; 3rd a good all round bird, not as good a comb as 1st and 2nd. First hen a beauty, good size, good color, with a first-class comb: 2nd a fair hen not quite as white in color but a good bird; 3rd a little yellow in wing and not as good a comb as we would like; 1st, 2nd and 3rd cockerels good, a little small, will show better later on. First pullet a gem, grand color and good shape; 2nd not as white in plumage; 3rd same. Brown, 1st cock a grand bird with well striped hackle and saddle and even in color; 2nd in good show shape, not as good in comb as 1st; 3rd a good bird a little white in face. Hens fair, not in good show condition. First cockerel small but good color, a little light in hackle; 2nd a better colored bird, not as good a comb; 3rd not as good in color. First pullet grand in color, with an evenly serrated

comb, and well set on; 2nd a little smoky on back; 3rd same. We noticed several pullets too dark in back without any pencilling whatever, the same in hens. Black a good class, winners good in plumage and right in color and legs. Rose-comb white—The winners grand birds, large, clean in plumage, with well set combs, the best we ever judged at the Industrial. Rose-comb brown very good. Young birds rather small and too short on legs as a rule.

JAVAS—Winners grand birds would like to see more of this class at our exhibition, as they are a good all round fowl.

HOUDANS—Very fine, especially the winning birds.

POLANDS.—The best ever shown at Toronto, in pink of condition.

ANDALUSIANS.—Old birds not in good condition several in middle of moult, chicks fair, but not good in lacing.

TURKEYS—Good, especially white the largest entry we have ever seen in Ontario, and grand birds.

GEESE—Good, and in good condition.

DUCKS—The best we have seen for years especially Pekins.

We might add to Mr. Jarvis' remarks on the Poland classes that last year we thought Mr. McNeill had about reached perfection in the white-crested black. However we notice now one great improvement and that is in the depth and lustre of color, a very difficult thing to get in this variety.

Mr. P. H. Hamilton, Hamilton, a few days ago shipped a fine lot of brown Leghorns to the U.S. at satisfactory prices.

Mr. Jas. Brown, Toronto, is short three black Minorcas from Kingston

Show and has received a black Spanish cockerel not his. Exhibitors please note. His silver Wyandottes are also "mixed."

**PUBLISHER'S NOTES**

Mr. J. H. Cayford, Box 1,188, Montreal is our Agent and Correspondent for the Province of Quebec. Any correspondence relating to subscriptions or advertising may be addressed to him.

**AN EASY WAY TO GET FELCH'S GREAT BOOK.**

To any one sending us four new subscribers with \$4 we will send a copy of "Poultry Culture" by I. K. Felch, value \$1.50 a book no fancier should be without. We have lots of these books so don't be afraid the supply will run out. Send four new Subscribers with \$4 and get a NEW STANDARD free.

**Two Subscriptions for \$1.50.**

If you send us the name of a new subscriber together with \$1.50 we will extend your own subscription for one year as well as send REVIEW to the new name for one year. This makes it but seventy-five cents each. The only condition we make is that the name of the subscriber be a new one and not a renewal.

**Wanted—Agents.**

Responsible agents wanted to introduce our Incubators, Brooders and General Poultry Supplies into EVERY LOCALITY. Address with references. RELIABLE INCUBATOR AND BROODER Co., Quincy, Illinois.

**SEND A STAMP FOR REPLY.**

We receive annually some hundreds of post-

al cards asking for information *not of a business nature*. Each reply costs us a three cent stamp not to mention the trouble. The latter we don't mind, but don't you think the enquirer should bear the former expense? We do and no enquiries not relating strictly to business will in future be answered unless such is attended to.

**The Canadian Poultry Review**

**DEPOSIT DEPARTMENT.**

To facilitate business between buyer and seller we have opened a department under above head, and will receive purchase money till the bargain is consummated. The plan is as follows:—Suppose A in London desires to purchase a bird or birds from B in Montreal, but naturally does not like to send money to one who is entirely unknown to him. Instead of doing so A sends us the money, writes to B same time, and we notify both of the receipt of amount. B then ships the purchase to A on approval and when A writes us that the purchase is satisfactory we forward amount to B less our commission. If the birds are not satisfactory A returns them to B and we return money to A less our commission.

**RULES**—1. All purchases must be sent on approval, buyer to pay charges each way unless otherwise arranged.  
 2. Our commission on sales up to \$20 is 50 cents, over \$20 2½ per cent. If no sale is made we return money less same amount.  
 3. Packing must be supplied free of charge by seller unless otherwise arranged.

This Coupon is good for one advertisement of 30 words in the "For Sale and Exchange" or "Stock Transfers" columns.

*Canadian Poultry Review, Toronto, Ont.*

TO meet the wants of advertisers who are continually using this column, and who find it a great trouble to be constantly remitting small amounts, we have adopted the plan of issuing Coupons, (as above) good for 30 words each, 4 for \$1. Any one buying these Coupons can use them at any time in lieu of money when sending in an advertisement. Not less than four Coupons sold.

**FOR SALE OR EXCHANGE.**

*27 Advertisements of 27 words, including address, received for the above objects, at 25 cents for each and every insertion, and 1 cent for each additional word. Payment strictly in advance. No advertisement will be inserted unless fully prepaid.*

**A Fow More**—Very fine Wyandottes, rose comb Leghorns, Bantams, Rabbits, etc. left, be in time if you want a bargain. John Gray, Doncaster, Ont.

**Minorcas**—Seven white pullets, 4 white cockerels, six black pullets, 4 cockerels, the lot \$15, must have room. Chas. Bonnick, Toronto.

**Roosters**—Grand pullets in barred, also white at \$1 each if ten birds are taken at once, single birds at \$1.50 these are Guilt Edged. Chas. Bonnick, Toronto.

**For Sale Cheap**—One pair beautiful young Toulouse Geese \$3, also one pair aged Duckwing Bantams \$2. Pure Breed fine stock. James McGlennon, Colborne, Ont.

**Chas. Bonnick, Toronto**—Is disposing of his large variety of fowls on account of other business matters taking up his time he has some dandy Pyle Bantams for sale and is advertising his birds so low that unless you have the money you had better not read his ads which are in these columns as the prices are so low you will feel bad that you cannot buy.

**Wanted**—Fifty barred Plymouth Rock pullets 50 silver Wyandotte pullets, 50 Light Brahma pullets for egg purposes only, must be cheap. Address W. Ulley, Victoria Square, Montreal.

**J. H. Paton**—Offers for sale pairs or trios of brown and white Leghorns, P. Rocks, Langshans, Houdans and 1 pit Game, cheap. 169 Ossington Ave. Toronto.

**Light Brahmas**—3 grand cocks all prize winners at Industrial this year, also hens, chicks and pullets cheap J H Paton, 167 Ossington avenue, Toronto.

**Pekin Ducks**—for sale cheap, beautiful birds, early hatch, from prize winning stock, \$1 each. Also exhibition coops which cost \$1.50 each, for \$1. Write for particulars. James McGlennon, Colborne, Ont.

**Leghorns**—Seven Buffs, eight rose combs, the lot \$15. Write me. Chas. Bonnick, Toronto.

**For Sale**, Snap offer. Breeding pen, 4 hens and 1 rooster, S C Brown Leghorns, \$3, also 4 pullets and 1 cockerel, same kind \$3. These are prize winning birds and sure to please. James McGlennon, Colborne Ont.

**Spanish**—Four grand hens, one pullet, two cockerels, ten dollars worth twenty. Chas. Bonnick, Toronto.

**Golden Wyandottes** for sale cheap, one hen last years hatch, one pullet and one cockerel, beautiful birds. The trio for \$3. James McGlennon, Colborne, Ont.

**Young Red Caps**—Pairs \$5, trios \$7, cockerels \$3, pullets \$3. First class breeders from stock that has never been beaten, buy early and get the best. F. H. Brown, Box 40 Port Hope, Ont.

**Trio White Cochins**—Cock one year old, hens two years, two of them first prize birds \$8, one pair It Brahma chicks, dandies \$4. Write quick if you want them. F. H. Brown, Box 40 Port Hope, Ont.

**Selling out very Cheap** to make room I will sell a few more trios, pairs or single birds my choice Indian Game. A few more white Wyandottes left. W. F. Langdon, Port Hope, Ont.
