MISSIONARIES IN AWFUL CARNAGE

Rogers and Maurer, Americans, Among the Thousand Victims at Adana—Two Cities Destroyed.

REFUGEE THOUSANDS NOW IN DIREST NEED
1000 KILLED

BEIRUT, Syria, April 18.—A terrible uprising has occurred in Adana, Syria, fighting has been going on for three days and at least one thousand persons have been killed.
The city has been practically destroyed by fire.
American missionaries named Rogers and Maurer, the latter from Hadji, are dead.
All the other Americans are safe.
The British vice-consul, Major Doughty-Wylie, was shot thru the arm.
At Tarsus there was less loss of life. The Armenian quarter was destroyed. Four thousand refugees are housed in the Armenian mission.
The need of relief is great, for shortly the fugitives will be on the verge of starvation.
Conditions in the Vilayet of Alexandretta are most serious.

Turkey is aflame on both sides of the Bosphorus.
According to the latest reports, the anti-Christian feeling in Asia-Minor is spreading to such widely separated cities as Beirut and Erzerum.
Muslims are persecuting Christians without discrimination—but their hatred is directed principally against the Armenians—looting and burning their homes and putting them to the sword.
The Turkish Government has said it is taking every possible measure to maintain order, but still it is doubtful if this outbreak of racial passion can be subdued at once.

The situation in Asia Minor is quite distinct from the political turmoil that has invaded European Turkey. The former is racial and religious and bears a strong resemblance to the Armenian movement of ten years ago. The latter is an outcome of Turkish efforts at popular constitutional government.

Significant developments for the next seven days may be expected to arise from the general concentration of troops on Constantinople. Without orders from the ministry of war, indeed without orders from their superiors, Turkish troops in large numbers are moving in the direction of the capital from Salonika, Adrianople and other points in European Turkey. The army is expected to meet and the forthcoming week will disclose what is the real purpose of this remarkable advance.

THOUSANDS HOMELESS

Much Suffering Among Survivors—Warships Hurrying to Scene
CONSTANTINOPLE, April 18.—According to the latest news from Adana trade missionaries do not dare to leave the mission house.
They are suffering from lack of provisions and medicines and have sent an appeal to the military authorities for protection.
Over 1000 persons were killed at Tarsus and Alexandretta. The massacres and incendiarism continued.
The Saloniki army has six batteries of machine guns and one battery of anti-aircraft guns. They expect by morning to number 30,000 men at Spartakuleh.

QUEBEC CONSERVATIVES CHOOSE MONK TO LEAD

He Will Lead a Campaign of Oratory Thruout Province When Session is Ended.

MONTREAL, April 18.—(Special.)—The Conservatives of the Province of Quebec are going to try the second experiment at choosing a leader for the province and once more F. J. Monk, M.P., for Jacques Cartier, is the man selected.

This nomination, so it is said, was made by the parliamentary party at the request of the supreme leader, R. L. Borden, and last evening was unanimously ratified by the fighting men of the party, who had tendered the new chief at a dinner at the Lafontaine Club, presided over by Thomas Chase Casgrain.
Mr. Monk accepted the task and announced that he and a number of friends would stump the province from one end to another at the close of the session. According to the party reverses to the fact that they had not been organized and they had only got together on the eve of a general election.
Mr. Monk claimed that if he was supported as he should be, he would have the party in fine shape and candidates in the field when the next election took place.

HILMA PASHA
Who has been ousted from the post of Grand Vizier.

DEATH PENALTY FOR FLIRTATION

Young Ontario Sailor Shot and Killed by Marine Captain, Who Revived Old Jealousy.

PORT HURON, Mich., April 18.—(Special.)—George Birrell McKinnon, aged 21 years, of Mooreton, Lambton, was shot by Captain Ralph Pringle, aged 32, of St. Clair, in the latter city shortly after midnight this morning. McKinnon died in the afternoon at 4 o'clock, after remaining in an unconscious condition almost until the last.
According to eye-witnesses, Captain Pringle entered the saloon known as "The Hole in the Wall" and seeing McKinnon for the first time in three years declared that the town was not big enough for both of them. The men entered a side room and an instant later three shots were fired and McKinnon fell to the floor unconscious.
Captain Pringle told the officers when brought to the jail here that McKinnon had flirted with his wife three years ago and that he had vowed to get even. Neither of the men were intoxicated at the time.
Captain Pringle is a well-known local sportsman. He is expected to sail on the steamer William A. Young.
McKinnon had sailed for two years as a first mate. Last season, while on the steamer Rosemount, of Montreal, and this year he had agreed to sail on the steamer Adriatic.
Before breathing his last at the hospital McKinnon said that Pringle had no reason for shooting him. He would have said more, but he was too weak. He died before he could be revived.

LIGHTNING HIT TOWER

Bricks Were Dislodged by Bolt in Last Night's Electric Storm
The souvenir hunter was given an unexpected surprise to add to his troubles last night when chunks of brick with an aggregate weight of several pounds were dislodged from the clock tower, and washed to the sidewalk on Teravay-street.
It was a bolt of lightning about 9.20 p.m. that did the trick. The detonation was heard throughout the city. It was fortunate that no one was on the sidewalk on the Teravay-street side, as the consequences might have been very serious. Before the clatter of the falling fragments had died away there were a number of pedestrians on the spot eager for spoil.
The tower seems to be a shining mark, as it has been struck many times before.

HIGHER DUTY ON PORK

One of the Possible Changes in the Tariff.
OTTAWA, April 18.—(Special.)—What means Mr. Fielding will employ to bolster up the falling revenue must, of course, remain a cabinet secret till Tuesday, but that there will be considerable changes in the tariff is the view of keen observers.
It is confidently expected that Mr. Fielding will place a high duty on pork, the if that were high enough to be prohibitive, the revenue would not benefit.
A readjustment of the tariff is looked for to expand the revenues, for that seems to be the prime consideration with the finance minister just now.

JOAN OF ARC BEATIFIED

30,000 French Pilgrims and Galaxy of Bishops Witness Ceremony
ROME, April 18.—In the presence of 30,000 French pilgrims practically all the bishops of France, many cardinals and descendants of the new martyr, the solemn ceremonies of the beatification of Joan of Arc were carried out in St. Peter's to-day. The Pope does not attend beatifications in person, but as a mark of special devotion, he assisted this afternoon at a solemn benediction, which replaced the ceremony of the veneration of relics, now existing in this case.
Soon after daybreak, streams of pilgrims began to arrive in every imaginable conveyance.

THREE DROWN FROM A SKIFF

Woman and Two Young Men of Gananoque Perish in the Lake Near Clayton, N.Y.

GANANOQUE, April 18.—(Special.)—As a result of the capsizing of a skiff Mr. and Mrs. R. Robbins and J. M. Taylor, popular young people of this town, were drowned in the River St. Lawrence Saturday afternoon.
Mr. Robbins was 23 years of age, and his wife, only 17 years, while Taylor was a youth of 18.
The bodies of Mrs. Robbins and Taylor were recovered about 4 o'clock this afternoon in 20 feet of water, several miles from the shore of Clayton, N.Y., which is nine miles from here.
The coroner of Jefferson County, N.Y., viewed the bodies and granted permission for their removal to Gananoque. They arrived here in a launch about 5 o'clock this afternoon and were taken to the morgue.
The first notification of a tragedy was received here late Saturday afternoon, when word came from Clayton, N.Y., that a skiff had been found opposite the summer home of May Irwin, three miles from Clayton. Description revealed that it was a skiff that had left Gananoque at 1.10 o'clock Saturday afternoon with Mr. and Mrs. Robbins and Taylor.
A man named Felow, working on Club Island, heard a call for help and saw an overturned skiff with two persons clinging to it. He started to the rescue in a skiff, and when he looked again only the youth, Taylor, was to be seen. When the rescuer was only a few feet away, Taylor released his hold and sank, not coming again to the surface. Felow dropped an anchor to mark the spot and then returned to summon aid.
W. D. Robinson, who is constructing a summer home near Gananoque for a wealthy New Yorker, observed the skiff a short time before the accident. Two of the occupants were balling out and one rowing. There was no apparent trouble at this time.
Not long after the party had left here they were seen by a man on Grandstone Island balling out the boat. As no further attention.
This morning the tug of Mitchell & Wilson, accompanied by several smaller craft, left with apparatus for the scene of the accident.
From Cummings' description, Mr. Robbins was the one on top of the boat when he saw it.
The skiff, which has been recovered, was found to be leak proof.
It is supposed the accident was caused by the occupants changing seats when one of them lost his balance.
Another theory is that Mrs. Robbins, who was subject to fits, was taken with one, fell to one side and capsize the skiff.
This makes four persons from here who met their deaths in the St. Lawrence last week.

A COLLEGE FOR WOMEN ONLY?

University Senate Adopt a Report in Opposition to the Present Co-Education.

The favorite fad of the professor of history in the University of Toronto has at last received academic benediction, and the conservative soul of Gen. M. Wrong rejoices as he contemplates the revision of the provincial seat of learning to the type of haughty exclusiveness which finds its exemplar by the classic banks of the Cam or the Isis.
The university senate has by a vote of 23 to 8, passed the report of the committee appointed "to enquire in regard to a possible college for women." The report, signed by Prof. Wrong as chairman, finds that: "The main argument against co-education is that women and men need somewhat different types of training. Men and women students do not mingle freely in our educational life; true, they sit together in the same classrooms, but otherwise they have quite separate accommodations; they share few amusements in common.
"Experience has made quite indisputable a general law that in occupations where women predominate the men tend to disappear, and where men predominate the women tend to disappear. Neither sex likes the predominance of the other in its chosen field of labor. What is happening in the University of Toronto is already greatly in evidence elsewhere, that the men abandon the courses specially favored by the women, such as modern languages, while women do not select the courses specially favored by men, such as political science. The most natural solution of a difficult problem would be to organize the women into a separate college."
Expense Calls a Halt.
But the fair sex-ed. will be allowed to bloom for yet a little while outside the high iron pickets of an academic harem. The prosaic cause of this delay is the "considerable expense" involved.
In the meanwhile the committee believes its soil by certain suggestions of what is desirable to be adopted by the women in the arts faculty of the university should be organized into a separate college, with a woman at its head, and with a building for the use of women. Such a plan might at first affect only the women attending the state college, but if Victoria and Trinity chose to adopt this plan they would still retain their residence for women and a free hand in regard to religious conditions.
"3. Women should continue to have access to instruction in all branches of learning covered by the staff of the university. They should be free to graduate in all the existing courses.
"4. Women should continue to have access, on the same footing as men, to the library, and to the scientific laboratories of the university.
"5. The teaching in the college for women would be by the present staff of the university and University College and that of Victoria and Trinity."

NOT PATTEN'S FAULT THAT WHEAT IS UP

Chicago Operator Denies That He Has a "Corner"—Claims Credit Only for Seeing Further Than His Fellows.

CHICAGO, April 18.—After a memorable speculative week, the tickers' god night was received at noon Saturday with a deep sigh of relief from the board of trade men, not to mention any of laymen drawn into the vortex of the wheat pit by the publicity given James A. Patten, the bull leader, and his following. "Good night," meant a day and a half for quiet reflection on the great problem of the season—"Will the public eat this year's or last year's wheat three months hence?"
Saturday Mr. Patten personally left the market to its fate, which fate, from the view of the Patten crowd, is proved considerably, as prices advanced over a cent in May and July options. Mr. Patten paid his respects to Secretary of Agriculture Wilson, declaring supplies is a joke, and lectured reporters who, he alleges, have been more entertaining than accurate in their stories.
As to talk of removing the tariff on wheat as a slap at manipulators, Mr. Patten was for it.
"I am in favor of removing it, right now, because we will have to do it inside of ten years at any rate. It would not affect the price of wheat a penny, for the markets of the world are not now on corn, oats and live stock, too, for it will not be long before we have to import wheat from the west. He who says 'Jim Hill has been preaching it to the farmers along his railroads for the last three or four years."
Declares Cereals in Scarce, Patten says that a bushel tariff on wheat should be removed to-day. I do not believe it would make a difference of one cent in the present price of wheat. I have said this before the wheat is selling to-day at Winnipeg as high relatively as here, and we would simply have to compete with European nations for the wheat supply then.
"As to the future course of prices, I can only say that as the scarcity of the crop makes itself felt prices must necessarily work higher. It is no secret that short supplies spell higher prices in every commodity traded in, and it is nonsensical to talk of corners when the market is in a perfectly normal position.
"The situation all over the world is practically the same, and yet I am accused of being responsible for the prevailing high prices. I merely was bright enough to see the present conditions in advance of the majority of traders, bought wheat at a profit now respecting the benefits. Other merchants in other lines of trade do the same thing, yet there is no hubbub about it.
"One reason why prices are high as they are is that the crop last year came unusually early, but this season the outlook is for a delayed harvest, consequently the 1908 wheat crop must be stretched out over 12 months, whereas the previous crop was used up in about 11 months.
"Bakers are aggrieved because of the extravagant prices for wheat. This is natural, but I cannot see that any one is to blame but themselves. As a rule, farmers do not keep themselves in view in view, to ascertain as to our respective shares in this great and independent work of the naval defence of the empire."
Mr. Asquith added: "I am not speaking without weighing my words when I say that what was on the ordinary in my construction that may vitally affect many of the governing conditions of naval history."
WHERE THERE IS "CLASS."
That word "class" seems to have crept into our language some old way or other, and stands for that which is supposed to be above the ordinary. You say, for instance, that there is some class to Dineen's Hats, and there is too, for Dineen is a solo Canadian agent for Henry Heath of London and Dunlop of New York, the world's greatest makers; also Dineen carries special designs by all the other great English makers.

STABS BROTHER-IN-LAW IN DOMESTIC QUARREL

Charge on Which Thomas Simpson is Locked Up—Ross Wallace the Victim.

HAMILTON, April 18.—(Special.)—What may turn out to be the murder case this morning at 10 o'clock when Ross Wallace, 22 East Hunter-street, was stabbed over the heart. The doctor at the city hospital said to-night that his chances of recovery were doubtful. Thomas Simpson, 152 South John-street, his brother-in-law, was heard to say on Monday night that Simpson was under the influence of drink when arrested and the police say that he told them he was going to put his brother-in-law out of the way. This afternoon the magistrate, crown attorney and inspector McMahon went to the hospital and took Wallace's ante-mortem statement. The accused Simpson was charged with the murder of his brother-in-law out of the way. This afternoon the magistrate, crown attorney and inspector McMahon went to the hospital and took Wallace's ante-mortem statement. The accused Simpson was charged with the murder of his brother-in-law out of the way.

The Toronto World
A Morning Newspaper Published Every Day
In the Year.

THE NEW TECHNICAL SCHOOL. Toronto is about to build a new technical school. What The World would like to know is whether the school, as it now is or is intended to be, turns out or will turn out students with a real practical technical education, of the kind that is useful in the arts, trades and professions. The World is hearing a good deal about the students now turned out, and has heard employers say their training is not practical and does not fit them to take their place in drafting rooms and workshops in connection with various trades and industries. This opinion ought to be obtained and certainly the school board who have the matter in hand should give it the most careful thought.

The World would be glad to have short opinions in regard to this point. A technical school is worth very little unless it produces finished technicians as they call them in Germany, and the German model is what we ought to follow.

COBALT'S SILVER PRODUCTION. In the report of the Temiskaming and Northern Ontario Railway Commission, a document of the Ontario Government, the section contributed by the engineer for the Cobalt district, now made public, should attract the attention of investors and others interested in mining. Mr. Arthur A. Cole, the engineer, points out that in 1908 the silver production of the whole world was 184,000,000 ounces, whereas the United States produced was 51,708,053 ounces. Cobalt produced 21,000,000 ounces, or close on 9 per cent. of the whole world. The Cobalt production is increasing at an unparalleled rate, rising from 8,595,885 ounces in 1906 to 21,000,000 in 1908.

It appears from the report that ten smelters have received and treated ore from Cobalt during the past year, while six concentrators are in operation being constructed. "A rapid but healthful advance," says Mr. Cole, "marks the progress of the Cobalt district. The shipments of 1908 were greater than the combined shipments of the four previous years. A point that appeals particularly to the investing public is the fact that more than 50 per cent. of the value of the total output of the camp has been paid back to shareholders in dividends."

Mr. Cole also notes the establishment of two power plants on the Montreal River, which are likely to cut down the present cost of power by 50 per cent. There are 8500 men employed in the mines of Cobalt and vicinity. Canadians have all the advantage which the ignorance or neglect of others gives them in the opportunity to invest on profitable terms in the greatest silver mines in the world.

WORK ALONE SATISFIES. Dr. Grenfell's manly and vigorous personality is sufficient in itself to account for the success he has attained in his deep sea mission work. His simplicity, his earnestness, his convictions, added to his genuine worth, present an irresistible appeal. Dr. Grenfell's message is a thoroughly practical one. The only thing that will make a man happy and at peace with himself is work. That is what he starts with and he illustrates the view with various experiences. A man who had plenty of money and had tried all forms of amusement and become surfeited wished to commit suicide as a relief from boredom. He was persuaded to try work, and was cured of his grievances. Many of Dr. Grenfell's assistants are men of means, who have devoted themselves to a task which commends itself, not for material profit, which they do not want, but for the satisfaction to be had out of humane effort.

Dr. Grenfell finds no difficulty thus in interpreting the gospel of the Christ upon which he bases his life. As the Nazarene dwelt and toiled among the lowly Galileans, Dr. Grenfell follows his example on "The Labrador." The Christ, says Dr. Grenfell, set Himself the task of turning out twelve good men. He did that and more, and Dr. Grenfell believes that personal influence in his fashion counts for more than does all the oratorical appeal made from the pulpits.

ELECTRICITY AND THE HOUSEHOLD. As soon as the city officials get the schedules for electric power and light service for small users prepared, it will be found that the advantages to the ordinary householder will be quite as great as for the large manufacturer. Niagara Power in Toronto means electric light in every household that cares to have it. It means all kinds of clean and convenient electric contrivances for the housekeeper, and a general improvement in the health and comfort of the community. It will probably be only a short time before the problem of heating is solved by electric power. Long strides have been made in this direction. Enquiries at Chicago, where coal costs \$4 a ton, brought assurances that electric heating could be provided at a rate equal to coal at \$9 a ton. This would mean in Toronto, where coal costs \$7, that by paying \$5

heat without dust, dirt or trouble could be had on turning a switch. The extraordinary variety of electric cooking and heating utensils now on sale and in general use indicates that even were the expense somewhat greater, the convenience would ensure their adoption. But those who are careful about the use of the current and turn it off as soon as they cease to need it, declare that electricity is not expensive. It is the wastage that raises the cost of electricity, or of gas, and not the amount consumed in actual use.

Flat irons, water heaters, combination cookers, tea kettles, percolators, chafing dishes, stoves, frying-pans, griddles and broilers, ovens, cooking and baking outfits and ranges, luminous radiators, tubular air heaters, plate warmers, heating pads to take the place of hot water bottles, foot warmers, are among the staple articles made, while waffle-irons, corn poppers, cigar-lighters, hot water cups, glue pots, surgical sterilizers, solder-pots and irons, puff irons, and similar ingenious inventions are multiplying rapidly.

Not every one of these will appeal to ordinary householders who usually cling fast to old methods, but everybody appreciates electric light and Niagara power will place it at the disposal of all who want it.

STANDARD LIFE ASSURANCE COMPANY. In another column will be found the principal results for the year to Nov. 14, 1908, submitted at the 33rd annual meeting of the Standard Life Assurance Company, held at Edinburgh, on April 8. These show that during the year 3968 new policies were issued, totaling \$9,475,000, of which there was re-assured with other offices \$611,500, leaving the net amount of new insurance in force \$8,863,500. This claims maturing by death in survivorship were \$4,124,422, and the assurance subsisting at the close of the year, exclusive of bonus additions, reached the large sum of \$34,715,850. As against this there are accumulated funds, after deducting current liabilities, to the amount of \$24,465,807, the addition made during the year being \$1,845,400. The average rate of interest realized on the funds was 4.28 per cent., and the revenue for the year was \$7,357,665.

"GIVE US THIS DAY." By Chester Firkins in N.Y. American. Not for a gambler's pleasure, Not for a miser's hoard, God filled the heaping measure Of the good wheat's vital gold.

The yield of the western valleys has again to be divided, not only to the poor of the city alleys, And the kings of the Asian Wall.

Yet one of a sordid station Has seized, in a single night, The bread of a teeming nation In the hand of his cruel might.

And the pluck is a little tighter, Where the toilers slave and die; And the loaves are a little lighter, Where the stricken children cry.

They will perish a little sooner, In the reek of the sootier air; With a little more of hunger, And a little worse despair.

While he, who is king for an hour, Draws in his golden hoard, Blind in his awful power, To the blood that stains his sword!

MARINE STRIKE AT BUFFALO. Non-Union Tug Scuttled in Harbor During the Night.

BUFFALO, N. Y., April 18.—The City of Erie, the first passenger boat to arrive here this spring, docked this afternoon. She brought 109 passengers from Cleveland. The steamer had no difficulty getting through the ice, having clear water to within ten miles of the harbor. What ice remains is soft and yielding.

Several freighters sailed for upper lake ports during the day. They were the Nyanza, Joseph G. Butler, Jr., Pine Lake, Aurora, James B. Corrigan, Wilkesbarre and Mahoning. All cleared light except the Wilkesbarre, which shipped a cargo of coal. Several of the boats carried union crews.

A heavy detail of police patrolled the docks to-day. Some time during the night the little tug Senator, which has been used to transport non-union men to their boats, disappeared from her slip, and it is believed she was scuttled and sunk in the river.

The police broke up several noisy gatherings, but no serious trouble occurred.

MAY ASK IMPEACHMENT OF GOVERNOR TWEEDIE. If Government Should Accede, Then Mr. Pugsley Would Be Placed in Another Corner.

OTTAWA, April 18.—(Special)—The return of R. L. Borden to the capital has been welcomed by all who appreciate the importance of proceeding without delay, and in the strictly parliamentary way, against Mr. Pugsley. The case requires the most delicate handling, and the greatest importance is attached to the use of having in view the indictment that it is proposed to frame up against the minister of public works.

Photo of Eclipse. A photo of a complete eclipse of the sun was particularly interesting. The Dominion Observatory surveyors, who occurred two or three years ago. Several investigators from the Dominion Observatory journeyed to Labrador to get a complete set of observations, and spent weeks perfecting arrangements, but alas, on the fateful morning, the sky was overcast by clouds, and without so much as a glimpse of what was taking place above them. Fortunately, however, in Spain, the weather conditions were in such a way that an unobstructed view and some splendid photographs were obtained, one of which is in Ottawa.

IN THE LAW COURTS. ANNOUCEMENTS. Ogilvie Hall, April 17. Motions set down for single court for Monday, 19th inst., at 11 a.m.: 1. Re Stevenson estate. 2. Re McGarry estate. 3. Napanee Gas Co. v. Boyle. 4. Cumming v. Berlin.

COMMISSIONERS SEE JUPITER ARE AMAZED AT WONDER. Parliamentary Visit to Dominion Observatory Reveals What Canada is Doing Scientifically.

A few members of parliament and newspapermen took advantage of the Wednesday night off to pay a visit to the Dominion Observatory. This is a branch of the government service that is not very well known to the average citizen, and in the four or five years of the history of the present institution, a development from the crude and out-of-date "plant" of former years, it is safe to say that not more than one-fourth of the membership of parliament has seen the place, and the investigation for themselves, what is being done with the money that goes out every year for scientific investigations of the heavenly bodies.

The Big Telescope. The chief interest in the visit was, of course, the big telescope which is the earth's crown jewel. The telescope is situated in the great revolving dome of the building. Thru the aperture of the dome, it points out the stars and planets, and is adapted to turn it and adjust the delicate mechanism so that the lens exactly covered the distant object. A turn of screw and the telescope was adapted to the "clock" which so swing it that as the planet moved thru space it at all times was exactly in the centre of the lens. Jupiter is 230 million miles and a few odd yards from this terrestrial sphere. It is ten times as large as our earth, its diameter being a matter of some 8,000 miles. It has four moons to light it up at night. It turns upon its axis once in ten hours. There are the main things about the planet which the astronomer will tell you, and if you are interested in the science and want to pursue the subject further you may get some time for this. There was much to see in other parts of the building. Everyone was permitted to climb onto the seat and affix his eye to the telescope. The telescope was Jupiter hanging in space a few feet from the outer lens, as large as the frosted globe of a paraffin lamp. One of them but a dot in the firmament, were plainly visible.

What Towers Are For. The department is also making a geodetic map of the Dominion. In many parts of Ontario will be seen the towers of the Hydro-Electric Power Commission. These are geodetic towers, but very few people ever stop to enquire what they are for. It was explained by Prof. Biggar. The object of the geodetic survey is to get the exact location and the altitude of every foot of ground in Ontario, and some day in the whole of Canada. A point is established. In a recent debate in the house of commons it was said that McGill University, Montreal, is the most exactly located point on the continent of America. The Dominion Observatory surveyors, to make a map of Ontario, first fix a point, say at Coteau, and erect a frame tower there. They then erect instruments which sweep the country for twenty miles in each direction, mark the altitude of every hill and knoll, and the depth of every depression. When the section of the country has been thus explored they proceed to a distant point within range of the first tower and erect another tower, allowing the former upon whose land the first tower was erected to pull it down and use the timber; and from the second observation point they cover another range of country, marking the features of the landscape. And so on, till the whole country has been surveyed. Whereas a ten-storey concrete and iron sky-scraper will "bend" with the wind and oscillate with its own weight, the geodetic towers of light wood, so cheap that they are abandoned when the work of the surveyors is completed, are built on such scientific lines they will stand perfectly erect against the wind, the centre of the instrument remaining exactly over the point marked on terra firma.

The Weather Factory. There is more to see, however, than the astronomical instruments. Dr. Klotz plotted the party thru the "weather factory," where the various brands of heat and cold, and rain and snow are distributed without stint over the Dominion. This branch of the department is equipped with the best instruments that can be made for the purpose of registering the degrees of heat and cold, and of forecasting as accurately as it is within the realm of possibility to forecast, what we are going to have in the way of weather conditions. In the basement of the dark room, where earthquakes are recorded, was explored, and the seismograph was temporarily put out of business for the purpose of showing the visitors how Dr. Klotz knows when there is an earthquake anywhere on the earth without

EATON'S DAILY STORE NEWS Men! Buy Spring Suits Now

Attention is called to these two specials which we had the good fortune to secure for the money they are splendid values.

Men's Suits of good strong English tweed, nice dark brown stripe effect, made up in three-buttoned double-breasted sacque shape; nice broad lapels and good fitting; linings are of strong Italian cloth. Sizes 35 to 44. Price 7.49

THE T. EATON CO. LIMITED 190 YONGE STREET TORONTO

waiting for the special editions of the evening papers. The seismograph is constantly transferring to a photograph plate an impression of a line. Should the shaking might not be perceptible to the pedestrians on Sparks-street. In the dark room wherein is the seismograph, the shaking will be recorded. The delicate needle, correctly poised, will not move, but the immense base sunk into the solid earth and on which the instrument rests, will follow the vibrations and the photographic plate will record the deviations, no matter how slight. By a process of mathematics, and with the aid of other instruments, Dr. Klotz is able, after looking at the photographic plate and ascertaining the facts that an earthquake has really occurred, to tell within a few miles the location of the "quake" on the earth's surface. He said the papers here the location of the Messina earthquake within 35 kilometres.

Re Commercial Travelers' Mutual Benefit Society and Tume-E. R. Read (Brantford), for T. G. Trusts v. Boyle, executors of Henry James, W. A. Buchner (London), for Lillian Tume, Judgment (L.). Thomas Tume was insured in the above society for \$1000, to be paid to his wife. Afterwards he and his wife, by endorsement, on the certificate, directed \$888 to be paid to Henry James. Subsequently the wife having died, Thomas Tume directed the whole amount to be paid to Henry James. Tume kept possession of the certificate, and made an endorsement directing the whole amount to be paid to his (Tume's) three children. The endorsements in favor of James were perfected before No. 1 Ed. 7, c. 21, s. 2, s. 5 and 6, and James was a beneficiary for value. James predeceased Tume, and Lillian Tume, executrix of Thomas Tume, now claims under the last endorsement. The onus is on her to prove payment of the debt to James and she has failed to discharge it. The statute of limitations is no answer to the claim on the security, even tho the original debt is barred. Spears v. Hartley 118 N. S. Est. 7, and other authorities. Judgment will there-fore go for payment of the fund in hand to the Toronto General Trusts Corporation at executors of Henry James, less Lillian Tume's costs, to be taxed as between solicitor and client.

Divisional Court. Before Falconbridge, C.J., Britton, J. Dubourg v. Whitman-F.D. Cramer, K.C., for plaintiff, on appeal from the judgment of Anglin, J. of Dec. 29, 1908. W. S. Brewster, K.C., for defendant, contra. Judgment (L.). This action was brought to recover from defendants balance accrued to be due plaintiffs on a contract and for extras for certain work upon a Normal School building at Hamilton, which defendant erected for the provincial government. At the trial plaintiffs were allowed to amend by claiming damages for delay, and the defendant put in a counter claim. Upon adjusting the accounts judgment was given plaintiff for \$87.68. From this judgment plaintiff appeals. Appeal allowed and plaintiffs judgment increased to \$154.48, leaving the 29 per cent. still to be collected in the future. No costs of appeal.

Write Issued. James Storey sues Alexander Holland for the return of harness, road-scraper, logging chain, wagon and barn utensils, and for \$500 damages for wrongful detention of same by the defendant. The litigation arose in connection with the George Wishart of New York sues Mark Harris of Haliburton for a declaration that Harris is a trustee for the plaintiff of a 50 per cent. interest in one-half of a Lorraine, Nipissing, mining claim, and that Harris is a trustee of two-thirds of the remaining half of the property for the plaintiff and Thomas Colgan. W. H. Clarke sues J. T. B. Howell and W. L. Chesworth of Toronto for the return of \$250. Robert Boyd has begun an action against J. S. Dignam, "for damages for breach of contract and for return of moneys paid by plaintiff to defendant."

BANK OF HAMILTON
Dividend Notice
Notice is hereby given that a Dividend of two and one-half per cent. for the quarter ending 31st of May (being at the rate of ten per cent. per annum) on the capital stock of the Bank, has this day been declared, and that the same will be payable at the Bank and its Branches on and after 1st of June next. The Transfer Books will be closed from 22nd to 31st May, both inclusive. By Order of the Board. J. TURNBULL, General Manager. Hamilton, 13th April, 1909.

WHEAT FUTURES ARE HIGHER FOREIGN CABLES STRONG
Strong Undertone in Wheat Futures—Cash Situation Acute—No Immediate Relief Likely

World Office, Saturday Evening, April 17. Liverpool wheat futures 10-day closed 1 1/2 higher, and corn 1/4 higher than yesterday. Chicago May wheat closed 1 1/2 higher, and corn 1/4 higher. Winnipeg car lots of wheat today, 1 1/2, against 1 1/2 this day last year. Chicago car lots of wheat, 10; contract, 2. Corn, 64; contract, 8. Oats, 106; contract, 11. Northwest car lots, 163, against 161 last year. Futures: Wheat receipts today, 231,000 bushels; shipments, 230,000. Corn receipts, 300,000; shipments, 285,000. Oats receipts, 300,000; shipments, 490,000. Berlin wheat, 10 higher; Budapest, 1/2 higher.

ST. LAWRENCE MARKET.
On account of the rainstorm during Friday night, receipts of farm produce were light—no grain, and only two or three loads of hay. In the north building there were half a dozen buggies and light wagons containing mixed produce, but on the market there was moderate delivery of butter and eggs, with a few lots of poultry. Butter—Prices unchanged. A 3c to 25c per lb., and special lots to special customers at 5c. Eggs—Prices firm at 20c to 22c, and a few farmers got 25c for special lots. Poultry—Few lots were on sale, and few sold at quotations given in table.

FARM PRODUCE WHOLESALE.
Hay, car lots, per ton \$10.50 to \$11.00
Straw, car lots, per ton 6.50 to 7.00
Potatoes, car lots, bag 0.07 to 0.10

FAMILY OF MATICS RESISTED THE POLICE
Terrible Depravity in Dufferin County Household—Round Up of the Insane.

SHELBURNE, April 18.—The work of removing the insane people of Dufferin and Grey to places of safety goes on apace and since the Spaulding case a few weeks ago nearly one dozen dangerous lunatics have been taken in charge by the authorities. The most important case along this line was that of the children, Lavender, six miles west of Creemore. Archie Greer, reeve of Mulmer; Dr. G. C. McGibbon, the medical health officer for the township; James Williamson, Hamilton, Ontario, Constables Laverly, Wattam and White visited the home of James Johnston, where they found the mother, daughter and two children in the condition of wretchedness, which is beyond the power of pen to describe. Mrs. McGibbon and Bradley visited the house on the previous day and company with Reeve Greer to make the necessary medical examinations and were assisted by the daughter with sticks, stones and mud. Some information as to what was about to happen seems to have reached the family and developed in the mother and daughter an almost brutal ferocity. On entering the house the mother was found almost naked and with a stick of stove wood and taking up her position in a corner of the room, poured forth a volley of abuse and profanity were followed by imbedded grins and stiers from the children, who seemed to look up to her as the heroine of the occasion. The chairs, stoves and furniture were broken and the mother, who is now 50 years of age, had in her efforts to maintain this miniature asylum for her family for the past twenty years, put out the windows and made out of common plank with scantling corner posts and the whole fastened together with bands of strap iron. When the constables arrived, the work of dressing the patients in a fit manner to withstand the weather was begun. In the case of the mother this was almost an impossibility. After being handcuffed she was held by Constable Wattam while Constable Laverly endeavored to get on her stockings and the nails on her toes were very long, she did all she could to resist and making a wild lunge and a kick she came nearly putting out Constable Laverly's eye. However, she was finally secured and put in the van, which conveyed them all to Orangeville jail until a vacancy in the asylum occurs.

GRAIN PRICE PROBLEM
London Stock Exchange Setback and Its Cause.
Special Cable to The Evening Post. LONDON, April 17.—Every London newspaper contains a leading article on the wheat market. Generally the ground is taken that Patten's activities can have no effect on the world's supplies, because the world's supplies are now too widely distributed to be controlled by a single market. Statistics published by The Times show that the present world's visible supply of 12,000,000 bushels, including flour, is 10,000,000 less than a year ago. The 12,000,000 bushels, including flour, is 10,000,000 less than a year ago. The 12,000,000 bushels, including flour, is 10,000,000 less than a year ago.

PRIZES FOR PEACE ESSAYS
High School Pupils Are Invited to Compete.
"Why is the cultivation of peace principles the best policy for Canada and why is the cultivation of militarism the worst?" is the subject of an essay competition in which the Society of Friends are giving ten prizes. The prizes will be \$10 each. Contestants must be high school or collegiate pupils; must send their essays in before July 1. Results will be given November 1. Strongly against militarism, was read by Robert Cockerill, late an officer in the British Indian service, did not see how Canada could get along without militarism to a certain extent, but all the others were in favor of the adoption of the report and it was carried. The six new members were added to the executive, namely: John Richards, Cuthbert Wingham, H. Perkins, Miss Mary E. Youmans, Miss Mabel Wilcox, Mrs. F. Clement Brown.

CLUES IN MURDER MYSTERY
Quebec Tragedy is Thought to Be Nearing a Solution.
BEAUBARNON, Que., April 18.—The murder of Dominica Pelletier, farmer of St. Etienne de Beaubarnon, on Tuesday is losing some of its mystery. The murderer is still at liberty, but there are indications that an important arrest will be made shortly. The additional data of the tragedy are as follows: Dominica Pelletier was shot with a charge (possibly a couple of charges) from a No. 12 shotgun loaded with No. 2 shot. His widow swore at the inquest that he was on bad terms with her people. On the morning of the murder two men were seen with a shotgun in the neighborhood of the Pelletier farm. Albert Hebert, a neighbor, declares that he distinctly heard two shots, fired in quick succession, and three wails were heard.

White Dutch Clover
For mixing with lawn grass seed. Per lb. 30 cents.
"Shady Nook" Grass Mixture
For growing under trees and in shady places. Per lb. 25 cents.
Simmers' Lawn Enricher
This dressing is so prepared that it acts gradually throughout the season, producing a luxuriant growth of grass, without weeds, which are always produced when manure is used. 5 lb. bag 50 cents. 10 lb. bag (sufficient for 300 sq. ft.) 75 cents.

MONTECALM
LONDON, April 18.—(Special).—There will be no general rise in the price of wheat here. Some of the bakers may make the eight-cent loaf in cents on Monday, but there are a good many who will not make any change. The bakers are hopelessly divided, and cannot agree on any one line of action. They held a meeting, which was well attended, this

FACTS FOR INVESTORS!

IN OFFERING the stock of the Montreal River Consolidated, Limited, we do so largely on the grounds of its investment possibilities. The small capitalization (\$500,000) and the large mineralized acreage—400 acres—offer an exceptional opportunity to those of small means to participate in the great mineral wealth of New Ontario. Many investors have already taken advantage of the exceptional offering which we are making.

Until our supply of 60,000 shares of Montreal River Consolidated, Limited, is exhausted we will fill orders at the low price of 50 cents per share, par value \$1.00 per share.

On seven of the ten claims owned by this Company silver values have already been found, and development work during the incoming summer is expected to prove that the Company's properties are the equal of many of the Cobalt mines. We expect to close out the stock we are now offering in a short time, and applications for the shares should therefore be made without delay.

It is altogether likely that after sinking is done on some of the veins where free silver has been found that the Company will be recapitalized, and holders of the present issue will receive a bonus of four or five shares in the new Company for each share held in the present Company. This would be similar to the purchase of the present issue at about 10 cents per share.

This is a proposition which any one seeking a remunerative investment cannot overlook.

Real Silver Properties for Sale

WE have for sale real silver properties in Gowganda, Leroy, Miller, Bloom and Silver Lake Districts. These are not snow-staked claims, but possess the real article in considerable quantities. They are the cream of the respective districts and some have several thousand dollars worth of ore in sight. Purchasers desiring to participate in profits from real mines will do well to look into these at once. Call at our offices or write at once.

Northern Ontario Silver Mines

36 LALOR BUILDING, CORNER KING AND YONGE STREETS, TORONTO, ONT.

Toronto Parks Lawn Grass Seed
Our mixture will form a close, thick turf in a few weeks' time, with no tendency to stool or grow in clumps. It roots deeply and will stand severe drought without turning brown, maintaining its beautiful deep green color throughout the season. Per lb. 25 cents.

What People Say About Simpson's Dress Goods

No. 6—The Commercial Traveller From the Old Country.

NOT the least complimentary of our visitors must be counted the travelling representatives of the mills of Great Britain and Ireland. They come to us for orders sometimes, not always realizing that we send to the English mills direct.

When they see our Dress Goods Department, it surprises them. Especially has this been the case since we moved into the new building. One of them was asked what he thought of the new Simpson Dress Goods and Silk Department now.

"Gentlemen," he said, "I've been living all my life in a city of little shops, and travelling in a land of little shop-keepers. This is my first trip to Canada—and I haven't a word to say."

Black Worsted and Broad-cloths, fast dyed blacks, woven from selected yarns, by makers of the highest class fabrics only.

Simpson's Princess Broad-cloths, suede finish, perfect material for the present classic style gowns and tailored suits.

Magnificent range of Pastel Shadings, light blue, shell pink, apricot, straw, rose pink, blue, peach, etc. Smart and correct weights for evening gowns, dresses and cloaks.

Novelty Striped Broadcloths, sombre and other effects, navys, browns, greens, canard, taupe, etc., 46 inches wide, \$1.50 yard.

Exclusive Worsted Suitings, only one suit length in each style and coloring, which are the most fashionable procurable.

Also in special ombre effects, 52 inches wide, \$1.50 yard. Fancy Worsted Striped Suitings, giving the greatest satisfaction in wear and stylish appearance.

Individual Costume Lengths, Striped Satins, Bengaline, Cotte, Ottoman and other new cord effects, Satin Cloths, Satin Soie, etc., one length only in each coloring.

Satin Directoire Cloths, sheer fabric of silk and wool, will neither crush nor spot, every conceivable shade included.

Novelty Striped Broadcloths, sombre and other effects, navys, browns, greens, canard, taupe, etc., 46 inches wide, \$1.50 yard.

Exclusive Worsted Suitings, only one suit length in each style and coloring, which are the most fashionable procurable.

Also in special ombre effects, 52 inches wide, \$1.50 yard. Fancy Worsted Striped Suitings, giving the greatest satisfaction in wear and stylish appearance.

We Have More Twenty-Five Dollar Suits

OUR twenty-five dollar suits for women seem to be duplicating their last year's success with interest added. We had run short of sizes in several lines and we had to hurry along the second shipments on order.

The materials are of the newest fashion, Clifton broadcloths, Rajahs, Satin cloths, Panamas, in stripes, diagonals, and novelty effects of various kinds.

At \$25.00

Velvet Rugs Will Wear

"YOU can't beat a velvet," says our carpet man, who was thinking more about quality and beauty than he was about housecleaning when he said so.

We have just received our new Seamless Velvet Rugs. We are proud of them. Naturally. But this season we have so many more, and so much more variety!

Small pattern centres and plain borders are strong in this collection. Designed to go with mission furniture and furnishings.

Some idea now of prices. 9 ft. x 10 ft. 6 in. \$19.50. 9 ft. x 12 ft. \$22.50. 10 ft. 6 in. x 12 ft. \$25.50.

As an introduction on Tuesday we will sacrifice a proportion of these prices and sell 200 Rugs as follows:

New Velvet Rugs, the very best quality, woven in one piece, new medallion and plain border designs, exact copies of real Turkey Rugs, and self-color florals:

9 ft. x 10 ft. 6 in. Tuesday, each \$16.48. 9 ft. x 12 ft. Tuesday, each \$18.48. 10 ft. 6 in. x 12 ft. Tuesday, each \$22.48.

9 ft. x 10 ft. 6 in. Tuesday, each \$16.48. 9 ft. x 12 ft. Tuesday, each \$18.48. 10 ft. 6 in. x 12 ft. Tuesday, each \$22.48.

9 ft. x 10 ft. 6 in. Tuesday, each \$16.48. 9 ft. x 12 ft. Tuesday, each \$18.48. 10 ft. 6 in. x 12 ft. Tuesday, each \$22.48.

9 ft. x 10 ft. 6 in. Tuesday, each \$16.48. 9 ft. x 12 ft. Tuesday, each \$18.48. 10 ft. 6 in. x 12 ft. Tuesday, each \$22.48.

9 ft. x 10 ft. 6 in. Tuesday, each \$16.48. 9 ft. x 12 ft. Tuesday, each \$18.48. 10 ft. 6 in. x 12 ft. Tuesday, each \$22.48.

9 ft. x 10 ft. 6 in. Tuesday, each \$16.48. 9 ft. x 12 ft. Tuesday, each \$18.48. 10 ft. 6 in. x 12 ft. Tuesday, each \$22.48.
