

KELLY THROWS HIS CRUTCHES AWAY

OLD TIME STRENGTH HAS RETURNED AND HE FEELS FINE.

Can Do as Big a Day's Work as Any Man, Now, He Declares—Gives Tanlac Credit.

"Tanlac has restored me to perfect health, and the best I can say for it is not as good as it deserves," said John Kelly, an employee of the Fred Hamilton Company, residing at 123 Hamilton, Ont.

Years ago I had a severe case of pneumonia which left me in an awfully weakened condition, and a few weeks later I had an attack of grippe. My stomach got all out of order, and I could scarcely eat enough to keep me alive. For six weeks my legs were so weak I just had to hobble around on crutches, and my back and shoulders hurt awfully. I couldn't stoop over without hurting so bad I thought my back would break. I couldn't bring my hands together in front of me because of the pains in my shoulders. I was constipated nearly all the time.

"Well, since taking Tanlac I know it is a wonderful builder. It gave me a whole of an appetite after I had only a little to eat. Instead of my food giving me indigestion like it used to, it got to agreeing with me perfectly so that I always had plenty of strength and energy. In fact, I feel as well to-day as I ever did in my life, and can do as good a day's work as any man. Tanlac can't be recommended too highly."

Tanlac is sold by all good druggists.

Surnames and Their Origin

CARMICHAEL
Racial Origin—Welsh.
Source—A locality.

The name of Carmichael is one of those which is more widely known, perhaps, than borne, and you may find it interesting from the fact that one element from which it is compounded is so obvious, and the other so puzzling. For, of course, the last two syllables in it are from the given name of Michael.

Since this given name, of Hebrew origin, and indicating "one who is like God," was a Biblical name of the type likely to appeal to the imagination of the early Christians of Northern Europe, whatever their race, it spread quickly on the heels of Christianity into Germany, France, England, Scotland, Ireland and Wales.

It is the first syllable of the family name, however, that identifies it as a development among the Celtic Celts; that is, the Welsh. Glance at a map of Wales. Note the number of place names which begin with "Car" or "Caer." This word meant a "fortress" or "stronghold," equivalent in a sense to the Saxon "ton" and "burgh," the German "burgh," and also to "castle."

The place known as Carmichael would in modern English have been called Michael's Fort, and it also must have received its name subsequent to the Christianization of the Welsh.

As a surname, of course, it at first indicated the place of residence of the individual, or more likely his former place of residence, and it developed

India's Advocate
The imprisonment of Mohandas K. Gandhi, the arch-agitator of India, has put a stop to the act of one of the most remarkable leaders of the Indian Empire.

Gandhi was born in 1869. He studied for the Bar, to which he was called at Lincoln's Inn, London, and after a short period of practice in Bombay he went to South Africa, where he became the leader of the Indians who wished to institute reforms.

In 1906 the Zulu rebellion found him in a position of great strength and the cause of endless trouble to the Government. But during the rebellion he did splendid work in organizing an ambulance corps.

Back in India, Gandhi came to be regarded as a saint with supernatural power. He gave all his money away to the poor, and lived the life of a shoemaker; but all the time he was plotting the passive revolt against British rule, which has at last led to his arrest.

Gandhi is undoubtedly sincere. He loves his country with a passionate devotion. He is an educated man, and the various outbreaks and murders which have marked his campaigns cannot be laid at his door, for he has always advocated passive resistance.

Meanwhile, although he is a menace to British power in India, we can at least respect him for his courage and sincerity.

Minority Expression.
During the campaign for prohibition a little town took a lively interest in the election. Every house, with the exception of one, displayed this card: "This House Is Dry."

For days all eyes watched the windows of that one house without any sign. At last this placard appeared: "This House Leaks a Little."

Good Luck!
"My brother has been in Africa for the last year, and has just come home. He has been hunting tigers."

"How exciting. Did he have luck?"

"Rather! He never met any."

Nothing to Equal Baby's Own Tablets
Mrs. Georges Lefebvre, St. Zenon, Que., writes: "I do not think there is any other medicine to equal Baby's Own Tablets for little ones. I have used them for my baby and would use nothing else." What Mrs. Lefebvre says thousands of other mothers say. They have found by trial that the Tablets always do just what is claimed for them. The Tablets are a mild but thorough laxative which regulate the bowels and sweeten the stomach and colds, colic, etc. They are sold by medicine dealers or by mail at 25 cts. a box from The Dr. Williams' Medicine Co., Brockville, Ont.

Huge British Range Finder.
The largest range finder in the world is over twice the size of any used during the war, and has been constructed in England for use in coastal defense. It was designed by the two original inventors of the range finder that has been in use in the British navy for many years, and that consists of a horizontal tube carried on a central frame, which rotates with the tube on a pedestal.

Bone Dry.
She had marked the hushiness in his voice for the past ten minutes, and fidgeted in his chair spoke volumes to her. She knew what was coming. "Clara," he said, and his throat seemed dry and parched, "would you—that is, could you—do you think that you—"

"Go on, George," she murmured, encouragingly. "I am listening."

"Would you—do you think you could—get me a drink of water? I am as dry as a bone."

The first red rose to be grown in England was planted in the gardens of the Manor of Savoy, London, in the thirteenth century.

At the time of the Armistice 5,000 tons of salvage from the battlefields was being dealt with each week in establishments in England.

Are Nearly Always Due to Thin, Watery Blood.
Do not think that because your stomach is easily upset you are the victim of some serious malady. One of the most common causes of indigestion is anæmia, or thin, watery blood. In fact it has become generally recognized that healthy activity of the stomach is impossible unless the blood is rich and red.

Dr. Williams' Pink Pills have been found valuable in cases of indigestion, nervous dyspepsia and stomach weakness, just because they are a blood builder and nerve tonic. The rich red blood following their use not only imparts a healthy digestion, but carries color to the cheeks and lips, and gives vigor to the muscles. One important point to remember is that Dr. Williams' Pink Pills contain no harmful drugs or opiates and are thus to be preferred to preparations that merely stimulate for a time. Before you begin worrying unnecessarily about your state of health, try the tonic treatment of Dr. Williams' Pink Pills. You will be surprised to see how rapidly your appetite returns and your debilitated system revives. Miss Sarah Farquhar, North Brookfield, N.S., who has proved the value of these pills in cases of this kind, says: "For a long time I was a sufferer from indigestion, which seemed to carry with it a complication of other troubles. Every meal brought misery with it, as the eating was followed by severe pains in the stomach, causing at other times an accumulation of gas that caused severe palpitation of the heart and a smothering sensation. The result was that my general health was seriously affected and the least exertion would tire me out. I had taken much medicine, but did not get more than temporary relief until I began using Dr. Williams' Pink Pills, which I took for a considerable time, with the result that I now enjoy every meal and am no longer distressed after eating. I find myself in every way enjoying better health, and I cheerfully recommend these pills to similar sufferers."

You can get Dr. Williams' Pink Pills through any dealer in medicine or by mail at 50 cents a box or six boxes for \$2.50 by writing The Dr. Williams' Medicine Co., Brockville, Ont.

New Vacuum-Tube Amplifier Aid to Partially Deaf.
Considerable progress has been made in the development of telephonic hearing aids for the partially deaf, but the limit had apparently been reached along this line until the new vacuum-tube amplifier was produced. This tube, the result of the efforts of many inventors, consists primarily of a small electric bulb having within it a filament, a spiral wire called a grid, and a metallic plate, all in the order named.

Mistaken Identity.
As a steamer was leaving the harbor of Athens a well-dressed young lady passenger approached the captain, and, pointing to the distant hills, inquired: "What is that white stuff on the hills, captain?"

"That is snow, madam," replied the captain.

"Well," remarked the lady, "I thought so myself, but a gentleman has just told me it was Greece."

In the Dizzy Future.
The new era that is upon us will be an era of unbelievable speed. The following incident is not fiction; it is a prophecy.

A young man of A.D. 1950 was giving his girl an airing, so to speak, in a swift and powerful 2,000 h.p. aeroplane.

"That's England we're approaching," he said. They lived in Australia. "British Isles, you know. Pretty little group they make, don't they?"

"I don't see them," said the girl, anxiously. "Where are they?"

"Oh," said the young man, "we've passed them now!"

Considerate!
Mistress (reprovingly): "Bridget, breakfast is very late this morning. I noticed last night that you had company in the kitchen, and it was nearly twelve o'clock when you went to bed."

Bridget: "It was, ma'am. I knew you was awake, for I heard ye movin' about; an' I said to meself ye'd need sleep this mornin', an' I wouldn't disturb ye wid an early breakfast ma'am."

Mahogany trees do not reach their full height until they are two hundred years old.

The world is blessed most by men who do the things, and not by those who merely talk about them.

Widow-burning, now virtually extinct in India, is said to exist still in parts of Africa; widows were immolated on the husband's funeral pyre as a sign of virtue, and also to provide the dead man with attendants in the next world.

Mr. Jenkins Took a Cracked Club To Tame Lions
The exhibition ended rather badly. It very nearly was a big day for the lions and a sad day for Mr. Jenkins—all for want of proper care in getting ready.

Many a man who has business to do and a living to make and a job to fill is as careless how he feeds his body as Mr. Jenkins was in picking out a club.

Some foods are too heavy, some are too starchy, many lack necessary elements and so starve the body—and many load the system down with fermentation and auto-intoxication.

Grape-Nuts helps build health and strength. It contains the full richness of wheat and malted barley, including the vital mineral elements, without which the body cannot be fully sustained. Grape-Nuts digests quickly and wholesomely. Served with cream or good milk, it is a complete food—crisp and delicious.

Grape-Nuts is just the food for those who care to meet life's situations well prepared in health. Order Grape-Nuts from your grocer today. Try it with cream or milk for breakfast or lunch, or made into a delightful pudding for dinner.

Grape-Nuts—the Body Builder
"There's a Reason"

India's Advocate

With Wings Flying North.
Due north they go
To the way of snow,
Or where the polar waters flow
On a flinty, ice-gripped strand;
Through high they sweep
Through the cloudy deep,
Where twilight's mazy vapors creep
Above a rain-swept land.

To pilot's cry
Their shapes file by;
A wavy chain across the sky,
The speedy line recedes.
The April night
Enfolds their flight,
But of courage high, hope infinite,
The heart a lesson reads.
—James P. McFadden.

Her Reason.
Dr. Jones had responded to a note left at his door by a farmer, asking him to go as soon as possible to see his little boy, who had a "very bad cold."

The doctor took one look at the child and turned to the mother.

"Don't you know your boy is coming down with the measles?" he asked, severely.

"Yes, doctor, I knew he was," said the woman.

"Then why in the world did you write me that he had a very bad cold?" asked the doctor.

The woman hesitated for a moment; then, looking at her husband, she said, with sullen frankness: "Neither him nor me know how to spell measles."

A Unique Cloud Bank

A singular atmospheric phenomenon recently noted along the western coast of South America is a bank or band of cloud extending for two thousand miles, from Ecuador to the centre of Chili, and following the trend of the coast range of hills. The cloud bank is between ten and twenty miles broad, floats at an elevation of between two thousand and three thousand feet and has a vertical thickness of not less than one thousand feet.

This curious phenomenon is ascribed to the prevalence of cool southerly and south-westerly winds blowing obliquely along-shore, and having their moisture condensed by the coast hill range just sufficiently to produce clouds without rain.

Antarctic Iron Foundry Near Shackleton's Tomb.
The Island of South Georgia, where Sir Ernest Shackleton has been buried, is 2,000 miles from civilization; but it is shortly to process a complete, though small, iron foundry. A British firm has despatched to this distant island one of its special comprehensive plants for making castings required in repairing the machinery of whaling vessels. Any necessary repairs to the ships can also be carried out by this equipment.

Swindled.
Sandy McNab took a sixpenny ticket in a raffle for a pony and trap. He won it.

Was he pleased at his good fortune?

Not a bit.

When the pony and trap were brought to him he surveyed them gloomily.

"I tell ye," he said, "the whole thing was a swindle."

"What's the matter?" asked his friends.

"Where's the whip?" demanded Sandy.

ACIDS IN STOMACH CAUSE INDIGESTION
Create Gas, Sourness and Pain. How to Treat.

Medical authorities state that nearly nine-tenths of the cases of stomach trouble, indigestion, sourness, burning, gas, bloating, nausea, etc., are due to an excess of hydrochloric acid in the stomach and not as some believe to a lack of digestive juices. The delicate stomach lining is irritated, digestion is delayed and food sours, causing the disagreeable symptoms which every stomach sufferer knows so well.

Artificial digestants are not needed in such cases and may do real harm. Try laying aside all digestive aids and ounces of Bismarck Magnesia and take a teaspoonful in a quarter glass of water right after eating. This sweetens the stomach, prevents the formation of excess acid and there is no sourness, gas or pain. Bismarck Magnesia (in powder or tablet form) never liquid or milk) is harmless to the stomach, inexpensive to take and is the most efficient form of magnesia for stomach purposes. It is used by thousands of people who enjoy their meals with no more fear of indigestion.

to consolidate the debt of Grey
county has passed the private bills
committee. This means that the
county plan of finance will go
through as was planned.

Warton council decided to grant
the request of the Warton Furni-
ture Co. and extend the time for the
payment of the \$1,000 due to town
until January 1, 1923. This exten-
sion of time will allow the company
more chance to keep running dur-
ing the summer and increase pro-
duction.

The Post Office Department an-
nounces that the new five cent
stamps, purple in color, will be
issued shortly. The old blue
stamps will be used up first. This
change is in accordance with an in-
ternational agreement, whereby all
countries in the Postal Union will
issue stamps in the same color in
the respective values, in order that
all post office clerks will know the
value of the postage from the color
of the stamps.

An old Irish woman kept a small
fruit stand and was displaying a
few watermelons. A smart fellow
took up one and observed: "These
are frightfully small apples you
have—now, we have them twice this
size." The woman coolly surveyed
her inquirer from head to foot for
a second or two. Then in a tone of
pity she exclaimed: "Bejabers, sorr,
ye must be a stranger and know
nary little about fruit when ye can't
tell apples from gooseberries."

A phenomenal increase in the lum-
ber export trade of Canada for the
past year is indicated in the record
of the Canadian Government mer-
chant marine. To practically all parts
of the world vessels of the merchant
marine carried cargoes of lumber,
and for the Province of British
Columbia alone, all previous records
for shipping were surpassed. Dur-
ing the year, from British Columbia
188,000,000 feet of lumber were ex-
ported as compared with an average of 40,
000,000 feet of several preceding
years.

Evidence of the extent of damage
caused in Oxford by the ice storm
of March is furnished by the report
of the Inverkip Rural Telephone
Company, which places its loss in
poles, lines and equipment at \$17,
000. To replace this loss the share-
holders have decided to borrow \$10,
000 and to immediately apply to the
Dominion Railway Board for per-
mission to raise the party phone
rental to subscribers from \$14 to
\$20. In repairing their lines the
company will make extensive use
of cables in an effort to protect the
more exposed sections against future
storms of this nature. The
work of placing the service back in-
to commission is already under way
and a partial service has been fur-
ished.

**CO-OPERATION THE KEYNOTE
OF THE BANK OF MONTREAL**

History of over One Hundred Years
of Steady Growth and Usefulness

The Bank of Montreal, which has
just taken over the Merchants Bank
of Canada, is the oldest Bank in the
Dominion. It was established in
1817 and during over a century of
co-operation in developing Canadian
trade and industry has been so
closely allied with many of the lar-
gest undertakings of the country
that its history is largely the history
of the Dominion. The oldest
Bank in British North America and
one of the largest in the British
Empire, it has effected this great
work with such a kindly touch of
co-operation that it has always en-
joyed the confidence, one might al-
most say affection, of all Cana-
dians.

Looking back over its undertak-

D. A. McLACHLAN,
Principal

to small accounts both in cities
in rural districts form one of
the reasons why the Bank of Mon-
treal is held in such high repute
throughout the Dominion.

The directorate of the Bank at
the present time contains a notable
array of leading figures in the
business world of Canada, and it
is generally felt that the traditions
of the institution are worthily up-
held by Sir Vincent Meredith, Bart,
the President, and Sir Frederick
Williams-Taylor, the General Man-
ager. Both have served with the
Bank from their early youth.

As the agents of the Dominion
Government, and as the banker of
other banks, the Bank of Montreal
rendered notable service to the
country during the war. By calling
in large amounts of specie which it
had invested abroad, available at
short notice, it steadied the finan-
cial situation in Canada at a time
when great apprehension was en-
tertained, and it thus contributed
largely to enabling the country to
tide over the period of depression
which supervened between the out-
break of the war and the reorgani-
zation of our industrial and econ-
omic life. In the difficult problems
of finance which the Government
and the country have been faced
with from time to time since the
close of the war, the Bank has lent
invaluable aid.

Not the least service which the
Bank of Montreal has rendered to
the country is the steady influ-
ence which it exerted when a crisis
arose in the affairs of the Merchants
Bank, and the manner in which it
brought its resources and experi-
ence to bear not only in prevent-
ing any losses to the clients of that

KELLY THROWS HIS CRUTCHES AWAY

OLD TIME STRENGTH HAS RETURNED AND HE FEELS FINE.

Can Do as Big a Day's Work as Any Man, Now, He Declares—Gives Tanlac Credit.

"Tanlac has restored me to perfect health, and the best I can say for it is not as good as it deserves," said John Kelly, an employee of the Fred Johnson Company, residing at 129 Hamilton, Ont.

Years ago I had a severe case of pneumonia which left me in an awfully weakened condition, and a few weeks later I had an attack of grippe. My stomach got all out of order, and I could scarcely get enough to keep me alive. For six weeks my legs were so weak I just had to hobble around on crutches, and my back and shoulders hurt awfully. I couldn't stoop over without hurting so bad I thought my back would break. I couldn't bring my hands together in front of me because of the pains in my shoulders. I was constipated nearly all the time.

"Well, since taking Tanlac I know it is a wonderful builder. It gave me taken one bottle, and instead of my food giving me indigestion like it used to, it got to agreeing with me perfectly so that I always had plenty of strength and energy. In fact, I feel as well to-day as I ever did in my life, and can do as good a day's work as any man. Tanlac can't be recommended too highly."

Tanlac is sold by all good druggists. —Advt.

If you cannot have what you like, try to like what you have.

Minard's Liniment for sale everywhere

Surnames and Their Origin

CARMICHAEL
Racial Origin—Welsh.
Source—A locality.

The name of Carmichael is one of those which is more widely known, perhaps, than borne, and you may find it interesting from the fact that one element from which it is compounded is so obvious, and the other so puzzling. For, of course, the last two syllables in it are from the given name of Michael.

Since this given name, of Hebrew origin, and indicating "one who is like God," was a Biblical name of the type likely to appeal to the imagination of the early Christians of Northern Europe, whenever their race, it spread quickly on the heels of Christianity into Germany, France, England, Scotland, Ireland and Wales.

It is the first syllable of the family name, however, that identifies it as a development among the Celtic Celts; that is, the Welsh. Glance at a map of Wales. Note the number of place names which begin with "Car" or "Caer." This word meant a "fortress" or "stronghold," equivalent in a sense to the Saxon "ton" and "burgh," the German "burg," and also to "castle."

The place known as Carmichael would in modern English have been called Michael's Fort, and it also must have received its name subsequent to the Christianization of the Welsh.

As a surname, of course, it at first indicated the place of residence of the individual, or more likely his former place of residence, and it developed

India's Advocate

The imprisonment of Mohandas K. Gandhi, the arch-agitator of India, has put a stop to the act of one of the most remarkable of the Indian Empire.

Gandhi was born in 1869. He studied for the Bar, to which he was called at Lincoln's Inn, London, and after a short period of practice in Bombay he went to South Africa, where he became the leader of the Indians who wished to institute reforms.

In 1906 the Zulu rebellion found him in a position of great strength and the cause of endless trouble to the Government. But during the rebellion he did splendid work in organizing an ambulance corps.

Back in India, Gandhi came to be regarded as a saint with supernatural power. He gave all his money away to the poor, and lived the life of a shoemaker; but all the time he was plotting the passive revolt against British rule, which has at last led to his arrest.

Gandhi is undoubtedly sincere. He loves his country with a passionate devotion. He is an educated man, and the various outbreaks and murders which have marked his campaigns cannot be laid at his door, for he has always advocated passive resistance. Meanwhile, although he is a menace to British power in India, we can at least respect him for his courage and sincerity.

Minority Expression.
During the campaign for prohibition a little town took a lively interest in the election. Every house, with the exception of one, displayed this card: "This House Is Dry."

For days all eyes watched the windows of that one house without any sign. At last this placard appeared: "This House Leaks a Little."

Good Luck!
"My brother has been in Africa for the last year, and has just come home. He has been hunting tigers."

"How exciting. Did he have luck?"
"Rather! He never met any."

Nothing to Equal Baby's Own Tablets

Mrs. Georges Lefebvre, St. Zenon, Que., writes: "I do not think there is any other medicine to equal Baby's Own Tablets for little ones. I have used them for my baby and would use nothing else." What Mrs. Lefebvre says thousands of other mothers say.

"They have found by trial that the Tablets always do just what is claimed for them. The Tablets are a mild but thorough laxative which regulate the bowels and sweeten the stomach and colds, colic, etc. They are sold by medicine dealers or by mail at 25 cts. a box from The Dr. Williams' Medicine Co., Brockville, Ont.

Huge British Range Finder.
The largest range finder in the world is now under construction in England for use in coastal defense. It was designed by the two original inventors of the range finder that has been in use in the British navy for many years, and that consists of a horizontal tube carried on a central frame, which rotates with the tube on a pedestal.

Bone Dry.
She had marked the huskiness in his voice for the past ten minutes, and fixated in the nervous manner in which he held his chair spoke in which he held her. She knew that was coming.

"Clara," he said, and his throat seemed dry and parched, "would you—that is, could you—do you think that you—"

"Go on, George," she murmured, encouragingly. "I am listening."

"Would you—do you think you could—get me a drink of water? I am as dry as a bone."

The first red rose to be grown in England was planted in the gardens of the Manor of Savoy, London, in the thirteenth century.

At the time of the Armistice 5,000 tons of salvage from the battlefields was being dealt with each week in establishments in England.

Mr. Jenkins Took a Cracked Club To Tame Lions

The exhibition ended rather badly. It very nearly was a big day for the lions and a sad day for Mr. Jenkins—all for want of proper care in getting ready.

Many a man who has business to do and a living to make and a job to fill is as careless how he feeds his body as Mr. Jenkins was in picking out a club.

Some foods are too heavy, some are too starchy, many lack necessary elements and so starve the body—and many load the system down with fermentation and auto-intoxication.

Grape-Nuts helps build health and strength. It contains the full richness of wheat and malted barley, including the vital mineral elements, without which the body cannot be fully sustained. Grape-

Nuts digests quickly and wholesomely. Served with cream or good milk, it is a complete food—crisp and delicious.

Grape-Nuts is just the food for those who care to meet life's situations well prepared in health. Order Grape-Nuts from your grocer today. Try it with cream or milk for breakfast or lunch, or made into a delightful pudding for dinner.

Grape-Nuts—the Body Builder
"There's a Reason"

Made by Canadian Postum Cereal Co., Limited, Windsor, Ontario

Digestive Troubles Cause Much Distress

Are Nearly Always Due to Thin Watery Blood.

Do not think that because your stomach is easily upset you are the victim of some serious malady. One of the most common causes of indigestion is anemia, or thin, watery blood. In fact it has become generally recognized that healthy activity of the stomach is impossible unless the blood is rich and red.

Dr. Williams' Pink Pills have been found valuable in cases of indigestion, nervous dyspepsia and stomach weakness, just because they are a blood builder and nerve tonic. The rich red blood following their use not only imparts a healthy digestion, but carries color to the cheeks and lips, and gives vigor to the muscles. One important point to remember is that Dr. Williams' Pink Pills contain no harmful drugs or opiates and are thus to be preferred to preparations that merely stimulate for a time. Before you begin worrying unnecessarily about your state of health, try the tonic treatment of Dr. Williams' Pink Pills. You will be surprised to see how rapidly your appetite returns and your debilitated system revives. Miss Sarah Farquhar, North Brookfield, N.S., who has proved the value of these pills in cases of this kind, says: "For a long time I was a sufferer from indigestion, which seemed to carry with it a complication of other troubles. Every meal brought misery with it, as the eating was followed by severe pains in the stomach, causing at times nausea and vomiting, and at other times an accumulation of gas in the heart and a smothering sensation. The result was that my general health was seriously affected and the least exertion would tire me out. I had more than temporary relief until I began using Dr. Williams' Pink Pills, which I took for a considerable time, with the result that I now enjoy every meal and am no longer distressed after eating. I find myself in every way enjoying better health, and I cheerfully recommend these pills to similar sufferers."

You can get Dr. Williams' Pink Pills through any dealer in medicine or by mail at 50 cents a box or six boxes for \$2.50 by writing The Dr. Williams' Medicine Co., Brockville, Ont.

New Vacuum-Tube Amplifier Aid to Partially Deaf.
Considerable progress has been made in the development of telephonic hearing aids for the partially deaf, but the limit had apparently been reached along this line until the new vacuum-tube amplifier was produced. This tube, the result of the efforts of many inventors, consists primarily of a small electric bulb having within it a filament, a spiral wire called a grid, and a metallic plate, all in the order named.

MONEY ORDERS.
Remit by Dominion Express Money Order. If lost or stolen you get your money back.

Mistaken Identity.
As a steamer was leaving the harbor of Athens a well-dressed young lady passenger approached the captain, and, pointing to the distant hills, inquired: "What is that white stuff on the hills, captain?"

"That is snow, madam," replied the captain.

"Well," remarked the lady, "I thought so myself, but a gentleman has just told me it was Greece."

In the Dizzy Future.
The new era that is upon us will be an era of unbelievable speed. The following incident is not fiction; it is a prophecy.

A young man of A.D. 1950 was giving his girl an airing, so to speak, in a swift and powerful 2,000 h.p. aeroplane.

"That's England we're approaching," he said. They lived in Australia.

"British Isles, you know. Pretty little group they make, don't they?"

"I don't see them," said the girl, anxiously. "Where are they?"

"Oh," said the young man, "we've passed them now!"

Considerate!
Mistress (reprovingly): "Bridget, breakfast is very late this morning. I noticed last night that you had company in the kitchen, and it was nearly twelve o'clock when you went to bed."

Bridget: "It was, ma'am. I knew you was awake, for I heard ye movin' about; an' I said to meself, ye'd need sleep this mornin', an' I wouldn't disturb ye wid an early breakfast."

Mahogany trees do not reach their full height until they are two hundred years old.

The world is blessed most by men who do the things, and not by those who merely talk about them.

Widow-burning, now virtually extinct in India, is said to exist still in parts of Africa; widows were immolated on the husband's funeral pyre as a sign of virtue, and also to provide the dead man with attendants in the next world.

ISSUE No. 17-22.

A Unique Cloud Bank

A singular atmospheric phenomenon recently noted along the western coast of South America is a bank or band of cloud extending for two thousand miles, from Ecuador to the centre of Chile, and following the trend of the coast range of hills. The cloud bank is between ten and twenty miles broad, floats at an elevation of between two thousand and three thousand feet and has a vertical thickness of not less than one thousand feet.

This curious phenomenon is ascribed to the prevalence of cool southerly and south-westerly winds blowing obliquely along-shore, and having their moisture condensed by the coast hill clouds without rain.

Antarctic Iron Foundry (Near Shackleton's Tomb).
The Island of South Georgia, where Sir Ernest Shackleton has been buried, is 2,000 miles from civilization; but it is shortly to produce a complete, though small, iron foundry. A British firm has despatched to this distant island one of its special comprehensive plants for making castings required in repairing the machinery of whaling vessels. Any necessary repairs to the ships can also be carried out by this equipment.

Swindled.
Sandy McNab took a sixpenny ticket in a raffle for a pony and trap. He won it.

Was he pleased at his good fortune? Not a bit.

When the pony and trap were brought to him he surveyed them gloomily.

"I tell ye," he said, "the whole thing was a swindle."

"What's the matter?" asked his friends.

"Where's the whip?" demanded Sandy.

ACIDS IN STOMACH CAUSE INDIGESTION
Create Gas, Sourness and Pain. How to Treat.

Medical authorities state that nearly nine-tenths of the cases of stomach trouble, indigestion, sourness, burning, gas, bloating, nausea, etc., are due to an excess of hydrochloric acid in the stomach and not as some believe to a lack of digestive juices. The delicate stomach lining is irritated, digestion is delayed and food sours, causing disagreeable symptoms which every stomach sufferer knows so well.

Artificial digestants are not needed in such cases and may do real harm. Try laying aside all digestive aids and instead get from any druggist a few ounces of Bisurated Magnesia and take a teaspoonful in a quarter glass of water right after eating. This sweetens the stomach, prevents the formation of excess acid and there is no sourness, gas or pain. Bisurated Magnesia (in powder or tablet form—never liquid or milk) is harmless to the stomach, inexpensive to take and is the most efficient form of magnesia for stomach purposes. It is used by thousands of people who enjoy their meals with no more fear of indigestion.

SUCCEEDS WHERE DOCTORS FAIL

Lydia E. Pinkham's Vegetable Compound Often Does That.—Read Mrs. Miner's Testimony

Churubusco, N. Y.—"I was under the doctor's care for over five years for backache and had no relief from his medicine. One day a neighbor told me about your Vegetable Compound and I took it. It helped me so much that I wish to advise all women to try Lydia E. Pinkham's Vegetable Compound for female troubles and backache. It is a great help in carrying a child, as I have noticed a difference when I didn't take it. I thank you for this medicine and if I ever come to this point again I do not want to be without the Vegetable Compound. I give you permission to publish this letter so that all women can take my advice."—Mrs. FRED MINER, Box 102, Churubusco, N. Y.

It's the same story over again. Women suffer from ailments for years. They try doctors and different medicines, but feel no better. Finally they take Lydia E. Pinkham's Vegetable Compound and you can see its value in the case of Mrs. Miner.

That's the truth of the matter. If you are suffering from any of the troubles women have, you ought to try this medicine. It can be taken in safety by young or old, as it contains no harmful drugs.

MINARD'S LINIMENT

Blistered Feet, Sore Feet, Tired Feet, Burning and Aching Feet.

After a hard day's work or a long tramp and your feet are completely used up, bathe them in hot water, then rub them with MINARD'S LINIMENT. It will relieve you and you will never be without a bottle.

Genuine BAYER ASPIRIN

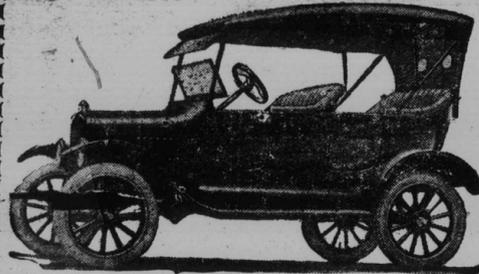

WARNING! Say "Bayer" when you buy Aspirin. Unless you see the name "Bayer" on tablets, you are not getting Aspirin at all. Why take chances?

Accept only an "unbroken package" of "Bayer Tablets Aspirin," which contains directions and dose worked out by physicians during 22 years and proved safe by millions of people.

Colds, Toothache, Earache, Headache, Neuralgia, Lumbago, Rheumatism, Neuritis, Pain, Pain.

Handy "Bayer" boxes of 12 tablets—Also bottles of 24 and 100—Druggists.

Aspirin is the trade mark (registered in Canada) of Bayer Manufacturers of Aspirin. It is well known that Aspirin means Bayer manufacture, to assist the public against imitations, the Tablets of Bayer Company will be stamped with their general trade mark, the "Bayer Cross."

CANADIAN WHEAT BOARD

Western farmers are demanding the re-establishment of the Canadian Wheat Board with all its compulsory features, and they want it at once. In support of their contentions Hon. J. A. Maharg, President of the United Grain Growers, Ltd., made some strange statements which no doubt will draw replies from the grain exporters and brokers whose existence Mr. Maharg did not appear to consider necessary at all. In support of his contention that the world's price was often out of joint with the price the Western farmer should receive, he repeated before the Agricultural Committee of the House of Commons on April 7th the statement made to the members of the Cabinet a few days before, that invariably the price on the Winnipeg Exchange, in relation to the crop and market conditions, went in an "logical" direction. When reports in Argentina and Australia were had it would be reasonable to suppose that Winnipeg prices would advance, but instead, they dropped which showed that speculation was at work. He also stated that by the board the grain would be delivered to the head of the lakes gradually, and thus would be prevented that regular decline in prices at the time when there was a liberal movement

to Fort William. In other words, the farmers could not be stampeded by the railways and the banks and other interests in rushing their wheat to the market and taking whatever price they could get at the time. The Committee asked the House that the Supreme Court be asked at once to decide on the constitutionality of re-appointing the Wheat Board.

THE MYSTERY

We shake our heads and sigh and say:
"How forward children are today!"
Yet we remember years ago
Our grandfathers criticized us so,
And used to wonder, as we do,
Just what the age was coming to.
It seems upon life's fleeting stage,
Youth is the mystery of age.

"What do men want?" is the title of a movie film. They'd like one hook in the clothes closet.

The Eskimos are naturally one of the healthiest peoples in the world. Why this should be so is not as yet apparent. The school of Hygiene of Johns Hopkins University will send out an expedition next May to study dietetics and nutrition among the Eskimos.

WANDERING DESIRE

If some men would bestow the attention on their business that they devote to side shows and speculative ventures they would not have to renew their notes. Far fields look green to those who are not fond of steady effort. Some people delude themselves into the belief that they are doing something worth while when they take out their pencils and figure out what they might have made if they had bought "Lightening Preferred" when it was at 38. It is a dangerous vice that keeps a man from putting his mind on real things. For every man who makes a fortune by taking shares in stocks or jumps at mining shares you can find a thousand who have seen their money swallowed in the pot without any result beyond the understanding of the words "better the sight of the desire." Give your business the full benefit of your brain and muscle. If it does not respond or you can find something that will make a more adequate return for your honest toil, change, but this dabbling in outside things is fatal in more respects than the loss of money. We will never have better times until people realize that "money gotten by greed is vanity."—Furniture Journal.

WHITHER ARE WE DRIFTING?

The world is talking to-day, from coast to coast, with the crowning miracle of the past half century of science. There are few parallels in history to the amazing speed with which radio has fired the dawn of a new era. The use of air to shoot sound through is more mysterious than the use of wire. The perfect radiophone may not come all at once, but glancing back to yesterday and ahead tomorrow, the astounding promise of radio is of a new and wonderful force in human affairs. Whither, may we ask, are we drifting? A lecturer the other day declared that so many marvels have recently come to pass that he does not doubt that in a few years an instrument will be devised so delicate and sensitive that two persons at a distance can reveal to each other their thoughts without the use of spoken words. It may be so. In the presence of such a miracle as the wireless telephone one is scarcely free to doubt it. But if this is true, reading each other's minds like that it will be a rather terrible thing—especially if it were possible for one's thoughts to be read without asking and procuring one's consent. That would be too much.

WILL SELL CHURCH

At the Evangelical Conference which concluded in Kitchener yesterday, the final order of the closing of the Evangelical Church at Walkerton was made, and the local authorities were empowered to go ahead and sell the edifice. The Church, we understand, will be formally closed on May 15th, the pastor, Rev. Mr. Hammett, preaching his farewell sermon here the Sunday after next. The building will be advertised for sale, and as there is a scarcity of houses in town, will probably be purchased and converted by someone into a fine dwelling. The stationing committee at the Conference left the allocating of Rev. Mr. Hammett to a permanent charge over to a future date, along with several others, and we understand they will be assigned to their respective fields shortly. Mr. Hammett, it is possible, may decide to take a year's rest from the active ministry.—Herald & Times.

YOUNG MAN BADLY INJURED

While assisting at dehorning cattle last Saturday, Clarence Thompson, a young man about 20 years of age, and son of Mr. and Mrs. Arch. Thompson of the Racky, received serious injuries, from which it was thought for a time he could not recover. While in the act of dehorning one of the animals, the beast threw itself and fell on young Thompson, breaking his leg in a compound fracture below the knee, with other serious injuries about the head that subsequently developed in concussion of the brain. While badly injured, and his life despaired of for a time, we are pleased to report his condition improving and the young patient practically out of danger.—Durham Chronicle.

TOO SMALL A CAPACITY

Hostess—"Have you got as much as you would like, Johnny?"
Johnny, (eyeing the good things on the table)—"Well, I haven't got as much as I would like, but I've got as much as I can hold."

The Hepworth Brick Plant will be sold by public auction under a mortgage. High wages and high freight rates are given as the reasons for the sand-brick plant having to quit business.
Following five weeks of fearfully daily rain, rivers in the Mississippi, Ohio and Missouri basins have overflowed, causing millions of dollars property loss. The heaviest loss will be suffered by farmers through drowning of livestock and through inability to prepare for crops. The damage was most severe along the Illinois River, where levees have given away, flooding thousands of acres of land.

SLEEPY HEADS

Some men sleep themselves into what they are pleased to term "misfortune." No man has ever yet left his impress upon the world who has been the slave of the sleep god. Laziness and idleness never walk hand in hand. The most of us sleep too much. Scientists say that six hours are plenty to spend in bed. You can get rest in other ways than lying on your back. "Drowsiness shall clothe a man in rags." There are lots of sleepy heads that don't spend most of their time in bed. A man can drowse in the daytime with his eyes wide open. There are business men who "sleep at the switch" and only wake up when opportunity has whizzed by them. In the last analysis most of the trouble in life comes from the tendency to take things easy and let them just "happen." More than half the men in business let their business run them instead of their running it. They succeed more by good luck and the good management and the real workers that so many escape escape the scrap pile. Put over your desk as an alarm clock the words of the Wise Man "Drowsiness shall clothe a man in rags."—Solomon, in Furniture Journal.

SAVE THE SMALL TIMBER

We are told that the buzz-saw in wood cutting is playing havoc with the small timber and depriving the next generation of a wealth that would develop without cost or care if the saplings of to-day were saved for another twenty or thirty years. In the opinion of our informant and advisor, it would be better to use the larger trees and allow the small ones to remain. The large trees are not likely to increase much, while the several small ones that would supply the need of a stand, would, if allowed to stand, develop rapidly. It seems like a great waste to cut down small trees and leave those that are fully matured and not likely to get any bigger or better.

QUALIFYING FOR UNEMPLOYMENT

"Is there a real devil?" the Colingwood Bulletin would like to know. If the printer's devil is meant the answer is easy. There are practically none now. Boys are not learning a trade—or any other trade. Skilled labor grows scarcer and the army of the idle and uneducated, who are little, if any, better than pick and shovel men, increases. Boys in these times will not take the time to learn a trade. But they will have time all the rest of their lives to repent their folly, for which they will pay dearly.

A DOG'S DEVOTION

Touching testimony of the devotion of a dog is afforded passers-by on the road east of Elmira as they go by the little Mennonite cemetery. Near a grave only a month old may be seen a lonely, collie dog, keeping a faithful vigil over the burial spot of his former mistress. The dog cannot be coaxed nor driven from the grave, and though he leaves it at intervals for his meals, he does not fail to return to keep his lone watch.

It's all right to take things easy providing they don't belong to some body else.

Wearing three overcoats to keep him warm while standing on street corners, a beggar was arrested in New York. He had 1,814 pennies on his person, all given him in one day, and he considered it only a "fairly good haul."

RUN-DOWN, NERVOUS?

Weak Women can Find the Help They Need

St. Thomas, Ont.—"Dr. Pierce's Favorite Prescription is a grand medicine for women who are at all nervous, weak or run-down, or who suffer with womanly ailments. I have not only taken it myself and been greatly benefited but I have known of many others who have been benefited, and in no case have I ever heard one word of condemnation against Dr. Pierce's Favorite Prescription, but always praise."—Mrs. Sarah Burke, 108 Scott St.

The use of Dr. Pierce's Favorite Prescription makes women happy by making them healthy. A great many women in every part of Canada owe their good health of today to this famous Prescription.

HAVE YOU STOMACH TROUBLE?

This Woman Had Suffered Great Distress and Gives Her Experience
Dundalk, Ont.—"I am only too glad to tell what Dr. Pierce's Golden Medical Discovery has done for me. I doctored three months and got no relief but, thanks to Dr. Pierce's medicine, I found a cure at last. I will recommend it to any poor sufferer with ulcerated stomach and mouth. When I started taking the 'Discovery' I weighed 93 pounds; now I weigh 119. No other medicine for me."—Mrs. Malcolm McLaren.
You can quickly put yourself in A-1 condition by going to your druggist and obtaining Dr. Pierce's Golden Medical Discovery in tablets or liquid; or send 10c to Dr. Pierce's Laboratory in Bridgeburg, Ont., for trial pkg. and write for free medical advice.

The Formosa Mutual Fire Insurance Company

Head Office Formosa Established 1880

John F. Waechter, President E. G. Kuntz, Man. & Treasurer
Thomas Inglis, Vice-President

Amount of Insurance in force Dec. 31st, 1921, \$9745047.00
Cash Assets \$26276.49 Available Assets \$268846.11

This old reliable farm Company insures farm buildings, churches, schools and dwelling houses in cities, towns and villages at a low premium rate on the installment plan and collects lower first, second and third instalments than other mutual Companies and allows a preferred rate on buildings well equipped with lightning rods and is capable of carrying any such risks.

The Company has a record for prompt inspection and payment of losses without quibbling or fear nor favor so that the assured doesn't need to worry if he sustains a loss because payments are made very punctual after proof of loss is considered by the Directors.

The Board of Directors meets every last Thursday of every month and the office is managed by honest, efficient management. Always prompt. Never negligent. With such low rates it merits the patronage of intending insurers.

For rates and information apply to District Agent or

Head Office, Phone 184-5 E. G. KUNTZ, Manager, Formosa

Do You Want to Cut Your Chore Time in Half?

In the ordinary work of the farm you must pump more than a ton of water a day.

Why take the time and trouble to do this work when the wind will do it for you free.

A Toronto Windmill will cut your chore time in half. Make money for you. And I can recommend it as an efficient worker. It needs little attention outside an occasional oiling. And it costs nothing to run.

And if you want a real water service, with running water under pressure everywhere, you'll be interested in Toronto Pumps and Toronto Water Systems.

Let me tell you about them.

TORONTO

ARTISTS IN BUTTER

Durham Review: At least a couple of citizens in town have purchased "venered" pound butter prints. "Venered?" asks the honest farmer, "what do you mean?" Just this: Inside the mould on four sides and bottom is placed a nice layer of tempting yellow butter. In the centre cavity is placed some white substance, of butter consistency, and this in turn is capped with the good butter, and there you are! The six sides of the cube a golden yellow, and inside a fraud. The package we saw had "Choice Dairy Butter" printed on the wrapper but no name or other clue. Merchants would be well advised to post user duhoodollw g i140.0 chta performe doubtful prints, and exposure should follow if he fraud is discovered.

Strange things are often recorded, but it would be difficult to imagine a more strange thing than that which happened on the fox farm of John Dickey, of Eastnor. A she-fox gave birth to five jet-black pups. The mother fox was ferocious and killed two, whereupon Mr. Dickey took the others away, and lo! and behold the cat adopted them, and will fight for them as for her kittens.—Canadian Echo.

OATS WENT TO MESOPOTAMIA

James Crerar, who lives near Chesley, contributed several bogs of oats to the British army during the great war. In one of the bags he put a note asking the finder to write to him. In December, 1917, he received a letter from Pte. W. E. Pattie, who was with a camel corps in Mesopotamia. He found the note when he opened a bag to feed his camel after an engagement with the Turks. Some correspondence passed between Mr. Pattie and Mr. Crerar since then, and the outcome is that Pattie and his wife are coming to Canada and may settle in Chesley.

At a recent meeting of the Wellington county council, the price set for work throughout the county on roads, etc., was fixed at 25c an hour for man, and 55c for team.

Mr. Wellington Hay, M.P.P., has presented \$1,000 to the town of Listowel for the purpose of building a swimming pool for the young men and women of Listowel.

Pasture Makes Cheaper Pork.

There is no use quibbling about the value of pasture in producing pork. Tests by the dozen have shown that it is possible, when pasture is used, to produce pork with one-fourth less grain.

As an actual example, let me tell of two bunches of pigs at the Experiment Station. There were ten pigs in each group. One group was fed grain and tankage in a dry lot, and the other had corn and tankage, but was allowed to run on rape pasture.

The pigs on pasture averaged 65 pounds when the test started, and the pigs without pasture averaged 66 pounds a head. In 84 days the pigs on pasture gained 148.7 pounds a head; pigs without pasture gained only 94.9 pounds a head. Every 100 pounds of gain made by pigs on pasture cost \$12.58; gain made by pigs without pasture cost \$13.16. For every 100 pounds a hundred is not to be sneezed at.

It may be that some people do not use pasture in producing pork because they do not know what kind of pasture crops to use. That question is easily settled.

For a permanent pasture, none excels alfalfa. Alfalfa is a feed of high value, and its abundant and persistent growth produces a vast amount of forage. Alfalfa can not be grown equally well in all sections of the country; but where successful stands can be produced, there is no pasture superior to it. Breeding hogs can be maintained through the summer on practically no grain where good alfalfa pasture, plenty of water and shade are available. A combination of corn and alfalfa pasture is likewise successful for growth in young pigs, also for fattening.

Red clover is a close second to alfalfa. This crop is successfully grown throughout the country, and its adaptability for early summer or fall pasture makes it of great use in a four-rotation. Clover should be pastured before it becomes too mature, in order to secure the maximum use of the crop.

Rye is a good crop for early spring forage. From the standpoint of feeding value, rye does not compare favorably with any of the other crops; however, it finds a place in practically every forage rotation due to the fact that it supplies the earliest possible forage in the spring. The crop should be fall sown.

Rape is one of the most desirable pasture crops available for swine. This crop is desirable for a number of reasons; viz: 1. The cost of seed is com-

paratively small. 2. The crop will stand hard pasturing. 3. The amount of seed required to plant an acre of rape is comparatively small. 4. It will grow until very late in the fall, thus giving it a longer growing season than some of the other crops. It is well to bear in mind, however, that rape will not grow upon barren ground, but that it requires a fairly fertile soil. The crop is quite adaptable. It may be sown several times during the season and thus provides a frequent change of nutritious forage. Rape should be sown at the rate of from eight to ten pounds to the acre when sown alone.

Pigs should be turned on rape when it is eight or ten inches high. This is usually about six weeks after being sown. If they are put in much earlier there is danger of the crop being pastured too closely; if the rape gets much larger before being eaten off, it becomes coarse and woody and is not relished.

A well-drained piece of blue-grass, or June-grass, with a southern slope supplies good, early pasture, and also remains green some time in the fall, but can not be depended upon during the summer. Other crops must be provided, so that a continuous supply will be assured throughout the season.

Oats and field peas are a combination frequently used successfully for hog pasture. This mixture can be sown very early in the spring and furnishes an abundant and luxuriant growth of pasture. The proper rate of seeding for this mixture is one and one-half bushels each of the oats and one-half bushels each of the peas from time to time during the growing season. The cost of seeding with this mixture is greater than that of oats and rape, or rape alone, and the amount of forage secured is no greater.

Soybeans are also a desirable forage crop. This crop is suitable both for a forage and for hogging down after the beans have become fully matured. The fact that soybeans do not grow equally well in all sections high, makes this crop less desirable than some of the others which cost less for seed, and which furnish just as much forage.

Finally, do not neglect to use pasture because you are not sure which crop to grow, but provide some crop rather than to go along producing pork on expensive concentrate feed alone. Provide a succession of crops that will last during the entire season and use the crops known to do best in your locality. Write the experimental farm if in doubt.

Controlling the Pea Weevil.

The Pea weevil causes serious losses to farmers in Canada every year. Some years the annual losses decreased, but indications are that this insect is still a dangerous enemy to pea growing. This insect is also giving trouble in the province of British Columbia, and to a slight extent in some other parts of Canada.

The presence of the insect is easily distinguished. The individual peas will show round holes in which the weevil has developed, and from which it has escaped. The beetle might still be confined to its home in the seed. Its presence in its home is indicated by a round spot on the skin of the pea. If the skin is removed over this mark in the spring of the year the full grown beetle is found. Infested peas sown without treatment are certain to produce a weevily crop.

The seed may be treated by fumigation, the application of coal oil, and the holding over of seed for a second year. The fumigation is perhaps the most easily practiced plan. The substance used is bisulphide of carbon. A convenient method of treating small quantities of seed is to fill an ordinary coal oil barrel with the seed peas. To treat this quantity of seed would require about five ounces of bisulphide of carbon. This liquid, which is obtainable at a drug store may be poured right on the seed or placed in a shallow receptacle resting on the grain. Then close up the barrel as tightly as possible so as to exclude the air. The covers should remain on for a least forty-eight hours. By this time all of the bisulphide of carbon will have vaporized into a gas heavier than air which settles down through the peas killing all of the insects within the barrel.

Large quantities of seed may be fumigated in tight bins or other well-constructed chambers using one pound by weight of bisulphide of carbon to every hundred bushels of seed. Exposure for forty-eight hours as in the case of the smaller quantity is necessary for good results. The bisulphide may be placed in shallow dishes at the top of the bin or chamber. In the preparation of a bin for this purpose the cracks should be pasted over with paper. Strips of felt may be fastened along the top edge where the lid fits down.

It should be observed that the vapour of bisulphide of carbon is highly inflammable. Lights of any kind, should therefore not be brought into contact with it.

Coal oil may also be used in destroying the weevils. About half a gallon of coal oil is sufficient to treat about five bushels of peas. The oil

should be carefully applied while the seed is being shovelled over. The shovelling should be repeated every day for at least four days, for about two weeks before sowing. It should be seen that every pea is moistened with the coal oil.

In Crop Protection Leaflet No. 9, issued by the Department of Agriculture at Ottawa, the Dominion Entomologist describes the insect together with its life history.

Certified Farm Seeds.

There are few things more disappointing to a farmer than to find that the seed he has sown has failed to come up or has introduced into his land noxious weed seeds. While one can by a very close examination under a magnifying glass determine in a general way the quality and purity of seed, most farmers are unprepared to perform work of this kind. It is equally possible to ascertain by a germination test the vitality of the seed.

The Seed Branch at Ottawa with local offices in Toronto, Winnipeg, and Calgary, makes it a part of its business to perform these tests. As seeding approaches, however, there is little time to wait for reports from such examination. There is still another means of ascertaining the value of at least some of the seed that is on the market. The Seed Branch issues certificates of grading, based on samples, more particularly for grass and clover seeds, but to a limited extent also in seed grains. Any farmer or seed merchant who has seed for sale can draw his own sample, forward it to the district seed laboratory and obtain a certificate. The Seed Branch retains the sample and issues a certificate with a serial number. Seed merchants in some cases take advantage of this offer and are thus able to produce official evidence of the value of the seed offered. It is well, therefore, when purchasing grass or clover seed to ascertain whether or not it has been thus tested, and if so to note the grading on the certificate. The purchaser of the seed may, if he chooses, have the grade confirmed by delivering a sample of the seed to be compared with the original control sample on which the certificate was issued. It is seldom necessary to have such a certificate proved, because there are comparatively few seed merchants who would misrepresent the quality of stock that had been officially tested. A few instances have occurred of unscrupulous dealing by submitting for examination a sample superior to the seed stock, and penalties are provided for misrepresentations of this sort.

TAMING THE LIGHTNING

We all abhor the approaching season of destructive thunder-storms, and it behooves every farmer to prepare for it. We have no hesitation in saying that the Almighty has placed within reach of every man the means of taming the lightning, and has given him the intelligence necessary to make these means available. If he neglects or refuses to employ them he has no right to complain if a bolt destroys his barn, or kills some of his family.

The question is asked: "Why should any farmer, or any one else, go to the expense of putting up rods when the lightning will protect him from loss by fire from lightning?" Whoever asks that question seriously does not realize that insurance covers only 80 per cent. of loss of building, and the loss in most cases is total, or 100 per cent. The loss from lightning usually comes when the barn is full of the harvest products; therefore, the loss is greater than at any other time of the year, and when lightning starts a fire it is often communicated to other buildings; this could be prevented by rods.

The secretary of a mutual insurance company having over \$4,000,000 in risks says that in seven years they did not have a single loss from lightning on a rodged building. Another company reports that in 600 losses from lightning, not one of the buildings was rodged.

Wire fences that are not grounded cause the death of many animals during thunder-storms. Fences should be grounded by running a number wire from each strand of the fence into the ground. The wire should be twisted two or three times about each four or five feet into the ground. If the soil is particularly dry the wire should be sunk much deeper. Field fences should be grounded every twenty rods, and fences about barnyards and feed lots at least every ten rods.

Recitation is cheaper than risk, and money that goes up in smoke is a complete loss.

That metal roofs can be turned to good use in protecting against lightning is evident from the following letter from a manufacturer of metal roofing:

"Recently, a farmer was rather surprised when told that the great expense to which he had gone to equip his steel-roofed barn with lightning-rods was unnecessary, and that proper grounding of the roof itself would give equally as good protection.

"Demonstrations of the lightning-proof qualities of various kinds of roofs were recently made in Baltimore, Md., before a number of members of the National Hardware Association of the United States. These tests will probably be of interest to our readers. "A miniature wooden barn filled with hay was placed in front of a machine generating 1,100,000 volts of electricity. The long spark from the ma-

chine, corresponding to a brilliant lightning discharge of small proportion, was allowed to play upon the roof with the following results: The lightning struck the galvanized steel roof and the charge was carried off by a grounded lightning cable, without in any way injuring the wooden structure or the hay contained in it. A terne-plate roof gave the same results as the steel roof. The discharge was left on for an indefinite length of time without any harm to the roof, the wooden structure or the contents.

"To obtain protection from lightning with metal roofs, proper grounding of the roof is of the utmost importance. A sufficient number of rods must be firmly fastened to the roof, so as to make good contact with the latter. The same precautions must be taken concerning ground plates or pipes, bends in leads, distance of leads from frame walls, etc., that are considered when installing lightning-rods.

"The lightning-proof qualities of metal roofs should receive proper consideration when choosing roof coverings for farm buildings. With about 50 per cent. of all farm fires in Canada due to lightning, the average farmer is vitally interested in lightning protection, and the foregoing facts will be of value to him."

How to Secure a Good Yield of Hay.

While hay yields last summer throughout Eastern Canada were much below the average, rather astonishing results were reached at the Central Experimental Farm, Ottawa, where a five-ton yield was secured on a forty-acre field. The Dominion Field Husbandman gives a description of the methods adopted to bring about such a satisfactory crop.

The soil is underdrained and is a kind of sandy loam. A three-year rotation of corn, oats and hay has been followed, the corn land being manured at the rate of eighteen tons per acre. The hay mixture consisted of ten pounds of red clover, two pounds of alfalfa, and one ton of timothy per acre. The crop of five tons per acre consisted of red clover and alfalfa, but the alfalfa and timothy were used in case the former crops might winter kill. The crop of five tons per acre was taken from three cuttings; the first cut, consisting mainly of red clover and alfalfa in equal proportions, gave three tons; the second cut, consisting mainly of alfalfa, one ton, and the third cut, consisting exclusively of alfalfa, one ton per acre. Such a result surely emphasizes the value of including alfalfa in the usual hay mixtures in districts where alfalfa will grow. Alfalfa also improves the fertility of the soil.

Although the yield last year of five tons per acre was rather out of the ordinary, the yield for the past ten years at the Central Experimental Farm has been good, averaging 3.37 tons per acre per year.

The day for working apart is past, and the time to edge in is here. It is unfortunate that men will allow "good enough" to keep them from the best.

Fixing up the Neglected Cemetery

BY A. W. ROE.

Neglected rural cemeteries, which are such eyesores, are becoming less frequent. There are still a few cemeteries which need care, however. Often these conditions are due to lack of knowledge of just how to go about fixing up a neglected cemetery. That is why I tell the method used in fixing up a cemetery in my home county.

The people who were interested in the work got together and organized an association, known as the Mount Pleasant Cemetery Association. It is composed of the people through a wide stretch of rural territory; since the association began to make a success of its work about twenty years ago, many families, living in a village two miles distant, have sought family plots within its limits.

The writer has a keen recollection of the place twenty years ago. The word that best describes its condition at that time is "wilderness." It was indeed a jungle of young forest growth, clambering grapevines, fierce, scratching blackberry briars, and smaller undergrowth. In addition, it was the home of rabbits, snakes, owls, and other vermin. In and among all this wilderness nestled the graves of the country's pioneers. They were gone and it seemed, forgotten—all but a few, whose relatives still met in the cemetery and "cleaned" off the graves once or twice a year.

There had been a medieval fence about the plot, but it had fallen into decay at most places, except near the gates, which were opened caremously to admit a procession and kept closed at other times, though to keep out what the writer often wondered. Following the custom then prevalent in this section of the country, those families that were financially able usually made provision against neighborhood neglect of a general fence, by enclosing their own family plots. This gave the yard a still more grotesque and gruesome effect, for the signs were of many and crazy decay. It was indeed a "ghostyard" at night, shunned by young and old alike. That was the condition of the cemetery when the association began its work some twenty odd years ago. After the association became thoroughly organized with its president, secretary, treasurer, membership committee, entertainment committee, grave committee, etc., it was a jest—"graveyard" in the community that was the liveliest spot in it. Day service was instituted in the spring and it is still a social feature in the community. It was the custom, before the war curtailed such celebrations, for the ladies to give what was known as a "bird" dinner on Thanksgiving—the men killed the quail, and the ladies cooked them and added other delicacies. While these events were largely social in their outward manifestations, they provided means in a very material way for the achieving of various worthwhile things in the cemetery itself. Besides the money thus gathered together, there is a membership fee collected annually, and the association collects some funds from the selling of lots. Years ago it was found that it was necessary to add to the original plot, of ground, so two acres were bought for a new addition.

The grounds are now well fenced; they have been cleared of undergrowth; the rabbits and snakes have been cleared away; the excessive shrubbery has been cleared away, thereby depriving the owls of their shelter; the little private burial grounds with their individual fences have disappeared, although in some instances the procedure of removal almost produced a neighborhood war. All graves have been mounded and turfed, and marked with plain wooden markers and grouped into lots, through which roads and pathways wind, edged with flowering shrubs. A beautiful greensward covers the ground and the mounds in shelter of variety in the winter. A touch of quaint design, constructed for accommodating services held in the cemetery, now raises its cupola-shaped roof in a central part of the grounds. A sexton is employed regularly to mow the grass in summer and to give attention to the graves and the fence.

Isaiah's Ideal for a World at Strife, Isa. 2: 2-4; 11: 1-9. Golden Text—Come ye, and let us walk in the way of the Lord.—Isa. 2: 5.

Lesson Foreword—A specimen of Isaiah's prophetic teaching is given in this lesson. The passages selected form a part of what is known as the Messianic hope. From now on the hope occupies the heart of her history in the darkest periods of her history. Israel believed that God had a great purpose for her in the world and that her ultimate future would be full of glory. There were two main elements in this hope—the nation wholly redeemed and secure from all its foes and the glorious King, who would rule in that age. In this lesson, Isaiah emphasizes both the City and the King.

I. War No More, ch. 2: 2-4.

V. 2. In the last vs. This phrase does not mean, as with us, the end of the world, but rather the close of the period which lies within the scope of prophet's view. It is a frequent phrase in the Old Testament, Gen. 49: 1; Hosea 3: 5; Jeremiah, 23: 20, etc. The mountain of the Lord's house, Jerusalem with its temple stood on Mount Zion, but it was overtopped by higher mountains in Palestine. Isaiah looked for a time when the world would be so refashioned, whether physically or metaphorically, that Jerusalem would stand high above all the other eminences of the world, wide prominence and influence.

V. 3. Let us go up, etc. Jerusalem had been the religious centre of Israel, to which the tribes went up to offer sacrifices and to celebrate their religious feasts. (See Ps. 122: 4.) But Isaiah foresaw the time when all the nations of the world would turn to Jerusalem for their spiritual instruction and inspiration. The Gentiles will recognize that Israel possesses the only true religion and they will come up to Jerusalem and they will worship in a hushed awe. His flowing garments when he undertakes. The figure here is that the love of righteousness, faithfulness will prompt and urge the king in all his undertakings.

III. Universal Peace, 6-9. Isaiah sees the security and peace of man in Messianic times extended to the brute creation; nature as well as man will be redeemed. G. A. Smith says: "We who live in the countries from which wild beasts have been exterminated cannot understand the insecurity and terror that they cause in regions where they abound."

Application. The late Henry Richard, Secretary of the Peace Society, said, "Give me the money which has been spent in war and I will purchase every foot of land on the globe. I will clothe every man, woman and child, in attire of which kings and queens would be proud; I will build a schoolhouse on every hillside and in every valley over the whole earth. . . . I will crown every hill with a place of worship of the gospel of peace. I will support in every pulpit an able teacher of righteousness."

If ever a man could exist in a great victory he should have thought that man would have been the Duke of Wellington after the Battle of Waterloo. Yet this is what Wellington wrote the morning after his greatest victory: "My heart is broken by the terrible loss I have sustained in my old friends and companions, and my poor soldiers. Believe me, nothing except a battle lost can be half so melancholy as a battle won."

Many of the shells used on the battlefields of South Africa were later taken to England and made into church bells. The instruments of destruction were converted into instruments of construction. The promise of to-day's lesson is not that men shall allow their swords to rust and their spears to become useless, but that they shall convert them into serviceable things. The day will come when the passion and enthusiasm of the victor in war, will be turned into the building of righteous causes, the fulfillment of lofty ideals.

II. The True King, 11: 1-5.

V. 1. A rod out of the stem of Jesse. The house of David, the son of Jesse, is compared to a tree which has been cut down; only a stump remains, but this stump, declares the prophet, will send forth a fresh shoot. It is evident that this prophecy was made at a time when the Davidic dynasty was not as glorious as it once was. Nevertheless in Messianic times it will be restored to more than its former grandeur. The ideal king is to be of the house of David. (See 2 Sam. 7: 14-27.)

V. 2. In other passages, ch. 7: 14, 9: 6, 7—Isaiah describes the ideal king. Here he describes his equipment for office. The Spirit of the Lord, God's Spirit is conceived as the projection of his power that human life. It seizes upon the man whose craftsmen, prophets and kings, are enabled then to do superhuman or at least unusual deeds. Here the effect of the Spirit on the king is, in general, enlightenment and insight. Wisdom and understanding; a sharp and mature mind for discerning between right and wrong; Counsel and might; the ability to execute the right when it is perceived. The Spirit of God, "care-edge and . . . fear of the Lord; "care-worshiper of Jehovah" (Gray). The coming king will be a man whose character is so rooted in piety that he will be a wise, strong ruler.

V. 3. The king's endorsement of God's Spirit enables him to give strong and true government. Under him civic virtues abound and crime and violence are abolished. He shall not judge, etc. "He will be able, in God, to probe things to the bottom, not being misled by deceitful appearances or lying words, but by men's hearts" (Gray).

V. 4. With righteousness and judgment, etc. Eastern courts of law are notoriously corrupt. Bribes are accepted from the rich, and the poor are generally pushed to the wall in redress. Rod of his mouth with the breath of his mouth he will mean "his speech." The King merely uttered his voice and will be quieted.

V. 5. The Girdle; is a sword used to gather up and the flowing garments when he undertakes. The figure here is that the love of righteousness, faithfulness will prompt and urge the king in all his undertakings.

Had Adam kept books and records his gardening might not have proved so perplexing to him.

Lesson Foreword—A specimen of Isaiah's prophetic teaching is given in this lesson. The passages selected form a part of what is known as the Messianic hope. From now on the hope occupies the heart of her history in the darkest periods of her history. REPORT OF P. S. S. 10, CARRICK

For the month of April
Sr. IV—Clarence Schill, John Schill, Emelia Beninger, Homer Culliton, Melvin Haines.
Sr. III—Sylvester Grub, Irene Kuestner, Albin Beninger, Gertrude (absent).
Sr. II—Beatrice Grub, Clarence Kestner.
Pr. A—Tony Strauss.
Pr. B—Kathleen Grub, Loretta Kestner.
Pr. C—Willie Beninger.
C. McGowan, teacher

Funny thing a man can't get a seed catalogue without his neighbor's hens knowing about it.

REPORT OF S. S. 13, CARRICK

For the month of April
Sr. IV—Frieda Baetz 67.
Sr. IV—Harold Kuester 78, Alma Hill 63.
Sr. III—Tillie Hill 80, Priscilla Kupferschmidt 69, Norman Kuester 68.
Sr. II—George Eickmeier 78, Frieda Hill 78, Catherine Filsinger 78.
Sr. II—Katie Leutke 92, Adella Kuester 87, George Filsinger 84, Charlie Filsinger 79.
Pr. A—Eldon Weigel 92, Gertrude Binkle 92, John Leutke 89.
Pr. B—Frieda Weigel, Godfred Hilgendorff, Josephine Kupferschmidt, Lillian Foerster, Gertrude Weigel, Wilson Baetz.
No. on roll, 22. Average attendance 19. No. of lates 4.
Violet Gadko, teacher

UNION STOCK MARKETS TORONTO

Cattle receipts at the Union Stock Yards for the opening market of the week did not exceed the demand as was the case a week ago, and a good brisk trade resulted with a clean-up by noon. Receipts were fairly light and the decline of a week ago was fully recovered, prices in spots being slightly better than last Thursday's close. A good indication of the improvement, as compared with the previous Monday was found in top quality heavy steers, which brought from \$8.25 to \$8.75.

There was not a great deal of activity in stockers and feeders, three loads of stockers and one small bunch of feeders being purchased for return to the country. In addition to the above cattle receipts there were about 533 head billed through to Ontario points. Ontario farmers have been getting quite a few stockers and feeders direct from the West this spring, on account of the fact that few have been offered on the local market.

The best price for a load of cattle was \$8.75 per cwt., paid by the Swift Canadian Co. These averaged 1190 lb. About 70 choice butcher cattle brought \$8.50 per cwt., and there were add cales at \$8.40 and \$8.45, with a few loads at \$8.25. The bulk sold from \$7.75 to \$8. Baby heaves brought from \$8.50 to \$10 per cwt. The top for cows was \$7.25, with choice ranging from \$6 to \$7, and the fairly good ones anywhere from \$4 to \$5.75. A few of real good bulls sold at \$6.50, with most of the sales from \$4.50 to \$5.

A slight strengthening in prices was apparent in the hog market the bulk of the sales being at \$13.50 fed and watered, although some brought \$13.75. Calves were generally steady, with the quality mostly poor. Receipts were off a little, but trade continued drab. The top price was \$10.50, with most of the offering moving between \$6 and \$7.50. There were very few lambs in the market, and sheep were inclined to be slow at lower prices. Choice sheep sold from \$7 to \$8, but there were few at the top. Spring lambs brought from \$6.75 to \$14 each.

AMBLESIDE SCHOOL REPORT

For the month of April Standing based on the daily marks received.

Sr. IV—Antonette Meyer, Besilina Cronin, Martina Ellig, Bert Cronin, Amelia Steffler.
Sr. IV—Marcella Cronin, Catherine Meyer.
Sr. III—Amelia Weber, Tommie Cronin, Eddie Meyer, Cornelius Steffler, Loretta Steffler, Hilda Meyer, Frankie Doerr, Francis Schnurr, Eugene Bohnert.
Sr. III—Clarence Reinhart, John Cronin, Mildred Meyer, Wilfred Weber, Mary Bohnert, Frankie Schiestel, Elmer Schnurr.
Sr. II—Clara Meyer, Loretta Weiser, Lea Obermeyer, Clarence Schiestel.

Sr. I—Georgina Bohnert, Leona Trautman, Stella Schnurr, Julatta Steffler, Florence Kupferschmidt.
Sr. Primer—Margaret Detzler, Jara Doerr, Anthony Meyer, Albert Detzler, Louis Steffler, Helen Obermeyer, Florence Schiestel, Norman Schiestel.
Sr. Primer—Elmina Trautman, Irene Reinhart, Josephine Bohnert, Stephen Hlerbrun, Alfred Schnurr, Leonard Weber, Edward L. Meyer.
Average attendance—45.
A. M. Reinhart, teacher.

REPORT OF S. S. NO. 7, CARRICK

Report for April
Sr. IV—Rudolph Siegner 88, Eileen Koenig 85.
Sr. IV—Eleanora Hohnstein 82, Manuel Dahms 78, Emma Dahms 77.
Sr. III—Adeline Koenig 83, Mary Perschbacher 82, Edgar Dahms 75, Amalia Hohnstein 66.
Sr. III—Edna Rehkopf 68, Maria Hohnstein 66, Leonard Hohnstein 55.
Sr. II—Otto Dahms 77, Miranda Perschbacher 75, Edward Kutz 74, Beatrice Harper 68, Rudolph Kutz 62.
Sr. II—Nicholas Hohnstein 83, Lloyd Harper 83, Wellington Dahms Eileen Taylor 77, Milton Koenig 76.
Sr. I—Myrtle Perschbacher 87, Melinda Dahms 82.
Luella Shaw, teacher

Anyway, Adam never had to shoot his neighbor's chickens out of the garden.
The firemen are ahead of the flappers on labor-saving devices. The firemen use reels to roll their hose.

Word has been received by the local Office of the Ontario Game and Fisheries Department that an order-in-council has been passed in regard to the catching of suckers and pike. During the months of April and May, in 1922, suckers and pike may be caught with a spear or dip net for home consumption but not for sale or barter without the usual license.
