Commencing Monday August

RULES AND REGULATIONS

1. A field of oats shall consist of at least five acres

An entry fee of one dollar will be charged, if only one kind of grain is entered, and an additional fee of fifty cents for each additional kind of grain.

The entry fee must be sent in with the entry. Entries should be made to the Provincial Depart-

nant, District Representative, Summerside, and should arrive not later than Angust 20th. 5. No field will be judged unless the entry fee is paid before the time of judging.

6. Members of the Banner Oat Club should have all

fields from which grain for seed will be sold properly inspected while standing. 7. Members of the C.S.G.A. are requested to enter a

field in the competition,

8. Competitors should give the Department at least one week's notice when the fields will be ready to cut.

9. Members of the Banner Oat Club and the Canadian Seed Growers Association are asked to notify the Department of the amount of grain they wish inspected ions to be forwarded to Mr. J. E.

The following score card is used in judging the fields;-General Appearance Type of plant, vigor and uniformity of growth..... Acreage, method of seeding, absence of lodging Freedom from weeds..... Freedom from other varieties and other kinds of grain. 20 Freedom from smut, rust, blight and insects..... Apparent yield and quality of grain, proportion of well filled heads of plump grain of good quality 20

FO MAKE GOOD'BREAD You must have Good Yeast >nannannannanns«

GOOD BREAD is, without question, the most im-portant article of food in the catalog of man's diet; surely, it is the "staff of life." Good bread is obtainable only by using the Best Yeast, the best flour, and adopt ing the best method of combining the two. Compress ad Yeast is in all respects the best commercial Yeast) et discovered, and Fleischmann's Yeast is indisputably the most successful and best leaven known to the world. It is uniform in quality and strength. It saves time and labor, and relieves the housewife of the vexation and worriment she secessarily suffers from the use of an inferior or unreliable leaven. It is, moreover, a fact that with the use of Fleischmann's Yeast, more loaves of bread of the same weight can be produced from a gven quantity of flour than can be produced with the use of any other kind of Yeast.

This is explained by the more thorough fermentation and expansion which the minute particles of flour undergo, thereby increasing the size of the mass and at the same time adding to the nutritive properties of the bread. This fact may be clearly and leasily demonstrated by any who doubt that there is economy in using Fleischmann's Yeast.

If you have never used this Yeast give it a trial. Ask your Grocer for a "Fleischmann" Recipe. Book.
