Cavalry and Infantry Called in to Subdue the Mobs-Many Are Killed or Wounded

"That she still looks to me as young and beautiful as she looked thirty-five years ago is good evidence that ten thousand people have already mentioned it to her. I could have said it and spoken the truth, but I have been too wise for that. I have kept the remark unuttered, and that has saved Her Majesty the vexation of healing it for

ways and had been badly damaged there. I added that I should like to go on repeating this history, but that I should be quite fair and reasonably honest, and while I should probably never tell the story twice in the same way, I should at least never show it to deteriorate at my hands. "His Majesty intimated his willingness that I should continue to disseminate that piece of history, and added a compliment, saying that he knew good and sound history would not suffer at my hands, and that if this good and sound history needed any improvements he would trust me to furnish the embellishments. "I think it is no exaggeration to say that the Queen looks as young and beautiful as she did thirty-five years ago, when I saw her first. I did not say this to her, because I learned long ago never to say an obvious thing, but to leave in obvious thing to commonplace and inexperienced people to say. "That she still looks to me as young and beautiful as she looked thirty-five and heaptiful as she looked t

WILL NOT SEND FRUIT APARTMENT HOUSE FOR VICTORIA IS ASSURED

Promoters Meeting With Success Provincial Government Will Leave In Floating Stock of the Company

The organization of the company having the new apartment house in hand is proceeding apace. There have been many applications for stock and the success of the enterprise is assured. The provisional board of directors is composed of the following: Joshua Kingham, W. H. Parsons, H. A. Bulwer, J. A. Hinton, and S. Johns. The plans for the new huilding have A. Bulwer, J. A. Hinton, and S. Johns.

The plans for the new building have been prepared by F. M Rattenbury and present a very attractive appearance. The building will occupy a space about 120 feet square and will be surrounded by well laid out gardens and tennis courts. There will be in all about sixty-five suites of rooms in the building, running from one large room and a bath to five rooms and a late five rooms and a late five rooms and a late five rooms and a la

bath.

Never has the need for such an enterprise been so felt as at the present time. People desirous of obtaining accommodation for a small family have been unable to secure dwellings suitable. The supply of the smaller class of houses is about exhausted. Recently applications have been received by the appointed soverment.

class of houses is about exhausted. Recently applications have been received by the provincial government, the mayor and the secretary of the tourist association for assistance in obtaining accommodation of this kind but all have been unable to do much for the applicants. Furnished flats will meet the needs of the many visitors from the east and haiddle west who come here with the intention of spending a number of months but who do not care to remain the entire time in a boarding house or hotel.

According to the plans which appear on another page, the building will present an attractive appearance, the face of the walls being broken frequently by bow windows. A covered colonade with a broad flight of steps leading up to it forms the entrance.

SUPPOSED SUICIDE CAUSES EXCITEMENT

Drunk Disrobes at Water's Edge, Giving Rise to Wild Rumers

A suicide mystery disturbed the polce for a considerable time early Saturday morning. Firstly a constable reported that a man had been seen rushing madly toward the Hudson's Bay wharf on the inner harbor without hat or coat. Secondly a pair of trousers was found at the edge of the wharf, turned as though removed hurifeldly.

At ten o'clock all the members as dresses of boarding houses and summer resorts adjacent to Victoria.

The following letter from a gentleman in Seattle is but typical of the man in Seattle is but typical of the many which have been received and riedly.

They did and found some letters.

The residence of the gentleman was visited. He had not been there. His bed remained undisturbed and it was bed remained undisturbed and it was morning.

Sure, it's a case for the coroner, thought the constables.

Ultimately the mystery was solved. It seems that the owner of the suit of clothes which were scattered as a schoolboy throws the trail in a paper chase was parading a la Lady Godiva before the sun rose. He was found in a down town hotel sleeping off the effects of the glad waters that filled him.

But he was unable to get back home until the constables delivered the clothes they found.

CTOMACH TROUBLES

depression and langour. The great point is to get the stomach back into good shape again so it can properly digest the food, and the easiest, quickest and best way to do it is by the use of

BURDOCK BLOOD BITTERS

Miss Lizzie Furlotte, Jacquet River, N.B., writes: "I was very much troubled with my stomach and did not know what to do. I consulted several doctors, got medicine from them, but all to no purpose, and was constantly growing worse. One day I had the good luck to meet with a friend who had been troubled in the same way as myself. My friend told me of the wondarful cure Burdock Blood Bitters had made with her and advised me to try a bottle. I did so, and what a happy change the first batte made. I took two more and am completely cured, and I shall ever sing the praises of B.B."

wharf, turned as though removed huritedly.

"Suicide," said the constable and he telephoned for assistance.

With drag hets, ropes and appliances to drag the harbor the constables descended upon the wharf. Near the Burnes house a pair of suspenders was found twisted on the cemented sidewalk. Near the new Pither & Leiser building a coat and waistcoast was found. The mystery deepened.

"Were there any rings to indicate that someone had made a hole in the water when you found the pants?"

queried one of the Monsieur Lecoqs.

"Was there any note left on the edge of the wharf?" asked another.

"Lei's search the pockets" said another.

They did and found some letters.

From the ocean front to the lake, from the street line to the bear pit, the grounds were covered. The animals were visited and various suggestions as to their care and improvements in their quarters offered. At the present time, however, little beyond bare maintenance can be done.

The board will shortly visit the other parks and the balance of the year will be devoted as far as the year will be largely directed to the edge of the wharf?" asked another

They did and found some letters.

They did and found some letters.

Arthur Kenah, Late of London, England, Will Make Victoria His Home

Arthur V. Kenah, late of London, England has arrived in the city and will take up residence here. Mr. Kenah, who is a son of Rev. Samuel Kenah, M. A., R. N., who lately retired from active service when senior chaplain and naval instructor of the Brit-To wrong action of the stomach and impaired digestion a host of diseases ows their origin.

When the food is imperfectly digested the full benefit is not derived from it by the body, and then stomach troubles start to appear. Thus you become thin, weak, nervous and debilitated, energy is lacking, brightness, snap and vigor are lost and in their place come dullness, dizziness, loss of appetite, depression and langour. The great point is a chartered accountant by profession. He contemplates practice in his profession here as Victoria in his profession here as Victoria in his profession here as Victoria in his estimation is one of the most beautiful spots in the entire world, and has a great commercial future before it. Mr. Kenah has not to rely on his own opinion alone, for his father, who visited Canada during the years of his service, entertained the same opinion. Mr. Kenah is for the present visiting Mr. and Mrs. Beresford Hogg. Mrs. Hogg, a cousin of Lord Charles Beresford, and her son traveled with him to join her husband who has spent the last eight months in this city.

FOR PRINCE RUPERT

Dominion Government is Taking Action Towards Establish-

The Dominion government will shortly establish a quarantine station at Prince Rupert, to include the district contiguous to the proposed terminus of the Grand Trunk Pacific railway, and the Kinnahan Islands. It is expected that Dr. A. Watt, superintendent of quarantines in British Columbia, will establish the new station in the north. No arrangements have been made yet for a visit north, but it is understood that it is contemplated to send the quarantine steamer Madge to Prince Rupert and Dr. Watt will select the most suitable location for the establishment of the station. The last issue of the Canada Ga-DELEGATES WELCOMED Opening Session of Brotherhood

FORMALLY RECOGNIZED.

could not fail to accomplish much for future of Canada. He wished the organization godspeed.

Concluding amidst applause, Mr. Lugrin called upon Dr. Perrin, the Bishop of Columbia.

After thanking the chairman for his kind references to the work of the society which were the more valuable coming from one in a position occupied by that gentleman, Dr. Perrin pro-

united effort and continuous work.

A number of communications were read by the secretary amongst others one from the president of the Dominion organization, A. G. Alexander of Hamilton, expressing his best wishes for the success of the convention.

Greetings from the Kamloops, Mission and Revelstoke chapters of the brotherhood were also received.

Several announcements were made, amongst others that on Monday afternoon the members of the convention would have their pictures taken on the grounds of Bishop Perrin.

Bowel Troubles

Liver pills, cathartics, mineral waters, often make Constipa-tion worse. They merely irritate the bowels and force them to move—stop taking purgatives and the bowels become "tight" again.

"Fruit-a-tibes" are the one certain cure for Constipation

because their action is upon the liver, "Fruit-a-tives" are a liver tonic. They stimulate the secretions of bile by the liver, this bile causes the bowels to move in the natural, regular way and completely cures Constipation.

"Fruit-a-tives are fruit juices with tonics and antiseptics added. In "Fruit-a-tives" one atom of bitter replaces one atom of sweet in the fruit juices, forming a new compound which is many times more active, medicinally, than the fruit juices could possibly be. 50c. a-box — \$2.50 for 6 boxes. sellot, and seeks to detract from what when the composition of the Global office, and Mr. Lytteino, the Global office, and Mr. Lytteino is the Global office, and the Global offi

some action. It has excused itself for so doing because Mr. Eberts laid great stress upon the subject in at least one of his speeches during the late election campaign, and the Colonist on one occasion commented strongly upon a statement by Mr. McInnes to the effect that the Liberal party were committed to the idea of developing the commercial supremacy of Vancouver. But our contemporary did not succeed in arousing a party controversy, and so far as the Colonist is concerned, the question will not be discussed from a party point of view. At the same time it is proper to point out to the Liberal Association of Victoria that the appointment of the Commission on eral Association of Victoria that the appointment of the Commission on Transportation was an act of policy for which Sir Wilfrid Laurier took considerable credit. It was a decided innovation. The character of the gentlemen appointed to the commissions which since the commission of the commission of

sion precluded any suggestion that the commission was created simply to give them employment. That men of the wealth and business standing of Messrs. Reford and Ashdown would devote weeks to the consideration of the transportation problem, if they did not believe that it was the desire of the Dominion government to secure reliable data as to what new projects ought to receive the attention of the Parliament of Canada, is not supposable. Seeing that such a commission, able. visit to London has been both directly, and indirectly a great advantage to British Columbia.

AN UNREASONABLE CRITIC

The Montreal Herald says that all Mr. McBride accomplished in London was to secure a compliment from Mr. Winston Churchill and Mr. Alfred Lyttelton, and seeks to detract from what ever value these most of the Baltour administration, which is now out of office. This seems to be a small piece of business. Mr. Churchill acted for the government; Mr. Lyttelton was spokes man for the Opposition conorsement; Mr. Lyttelton was spokes man for the Opposition conorsement of Mr. McBride's position could be when the continuation of the Colontal office, and Mr. Lyttelton was spokes man for the Opposition conorsement of Mr. McBride's position could be oked for under any circumstances. Mr. Churchill acted for the government were most the special position of the service of the Mr. McBride's position could be oked for under any circumstances. Mr. Churchill was competent to exist the most of the statement that "the Imperial vernment were not able to adopt his r. New Scotch Carpet Squares

F you hail from Scotland or some other part of the "Old Country" you will know the superior wearing qualities of those far-famed Kidderminster reversible all wool Carpets. If you are simply a "plain Canuck" you may possibly be interested in knowing that nothing in the carpet way, for the price, can beat them for good hard wear.

Our very latest additions to our Carpet Stock is a large shipment of these famous Carpet Squares. This shipment is from one of the oldest and best Scotch mills and includes their most beautiful designs.

THE STATES OF THE STAT

does not appeal to them. So it comes about that here on the frontier there about that here on the frontier there is a large non-churchgoing class.

What is, the Church going to do to remedy this state of things? If carried the war incompletuous. She seems that it is doing. In this country of strong men, strong opinions are formed, and we can think of no more important work for the Church to do than to seek to discover some way by which seek to discover some way by which to seek to discover some way by which is the evolution of the principles.

THE STORY TELLER in wards the more desired the mountains, or the mysterious recesses the cher, resolved the foothills form a part of the picture and the post to fit foothills form a part of the pictures. The marking day is the state of things? It carried the wards Henry II. of France. The marking day is really the provided wards Henry II. of France. The marking day is really the picture of the classed the mountains, or the mysterious recesses the cher, resolved upon despersive for the foothills form a part of the pictures. The post to fit foothills form a part of the picture and the picture wards Henry II. of France. The marking day is really the place of the foothills form an part of the pictures. The marking day is the sum of the principles of the foothills form an part of the pictures. The post and the principles of the foothills form an part of the picture wards the picture wards of the foothills form an part of the picture. The post and the principle wards the post to picture and the picture of the classed the daily before our eyes.

What is, the Church going to do to the classes the principles of the foothills form an part of the picture. The post and the principles of the foothills form an part of the picture wards the picture wards of the foothills form an part of the picture wards the picture. The post and the picture wards the principles of the foothills form an part of the picture. The post and the picture was fold. The picture was fold the principles of the pi in the evolution of the principles which will guide the men of the West in working out the tremendous problems, which "God and Nature have put within their reach." The work is one for men in the truest sense of the Church, has so far falled in his asked to be allowed to remain in the Church, has so far falled in his asked to be allowed to remain in the Church, has so far falled in his asked to be allowed to remain in the country as the humblest attending our successor. The king was quarters that those who have not been conspicuous successes in ministerial work in the older centres of popular-tion, may be sable to file good work.

In the evolution of the principles of the work in the evolution of the principles as talked of, and when the evolution of the principles as the substitute of the feigned as Henry III. His career was a very troubled one, the influence was a very troubled one, the influence of the king, her father-in-the presence of the king, her father-in-the presence of the king, her father-in-the was a very troubled one, the influence of the submit implicitly over to her, the sum depoint of the presence of the king, her father-in-the news came to her ears she sought the leads of list our eyes and behold the gift of the sounds in the country of Birstonio country. It is mother prevailing over him to have of Briston country. Massachussets, half a century as and behold the graph of Briston country. Massachussets half a century as the humblest attending a frame of Briston country. Massachussets half a century as the head of the sounds in the beauty of His handiwork? In the head of the sounds it was a very troubled one, the influence was a very troubled one, the influence of the submit was a very troubled one, the influence of the submit was a very troubled one, the influence of the submit was a very troubled one, the influence of the submit was a very troubled one, the influence of the submit was a very troubled one, the influence of the submit was a very troubled one, the influence of the submit was a ver steadily going on lest the line should become extinct. A by his brother, the son for whom cather below the looking but how few of us can of the principles divorce was talked of, and when the erine had striven for so many years. the looking but how few of us can

work in the older centres of population, may be able to do good work on the frontier; but there never was a greater mistake. The West needs the strengest men that can be found. It strengest men that can be found. It of age and reigned the feather strengest men of broad and sympathetic ine remained in partial seclusion, so assassin, only a short time after his touched with the rosiness of the sky, numanity. It needs ministers, who far as state affairs were concerned, mother had passed away from the strengest men that can be found. It needs men at broad and synapthetic for as state affairs were concerned, the king being during all this period, the king being during the congregations.

While tis impossible to admire the period the stars were ful tales about them, perhaps it was now to watch the neithers, period the wind the plane at mig message to deliver to his people is ceeded by his brother Charles IX., who out of place in the West. And we do not mean by this the Gospel message age. Then the spirit of Catherine asbut a message of humanity, a message of humanity and humanity human but a message of humanity, a message from man to man, for until this has been delivered in most cases there been delivered in most cases there is little use in trying to impact deptote. HOME GARDEN FRUIT CULTURE

THE SIMPLE LIFE

quire a large proportion of crushed rock. As few gardens contain a natural rocky bank or hiliside, most rock gardens are, therefore, 'artificial,' in the sense that they are made by man, but there is no form of gardening in which one has more opportunity to give ex-pression to his natural taste than in tme construction and planting of a

rock garden.
"There are two kinds of construction, the 'open' and the 'underground.'
The open rock garden is made from a natural bank or hillside and very attractive it can be made, especially if the bank or hillside skirts a lawn, and is entirely free from the roots of large

The 'underground' rock garden implies a cutting made below the natural level of the ground. This method ural level of the ground. This method wontain a natural bank or hillside. The site chosen for an underground rock garden must, of course, be governed by circumstances, but, if possible, it should be in a secluded portion of the grounds, and near the boundary rather than in the centre of an open place, if it can be avoided. The size should then be determined and the top soil all removed for replacing when the cutting is complete. There should be such a manner that the cutting shall

sect in width and this should wind in such a manner that the cutting shall produce a variety of aspects to suit the requirements of the different plants. The cutting should begin at one end being shallow at first but gradually deepening until it is six or eight feet below the ground-level. All the soil taken out should be placed above the sides of the cutting to still further increase the height from the path through the centre.

"The cutting should not be made regular or smooth but should present an uneven surface, with occasional mounds and depressions of various sizes. After the rough outline is formed, the top soil should all be placed evenly over the whole surface. The rocks may be then placed in position; the kinds used do not greatly matter. Sandstone is perhaps best, though very beautiful effects may be made with common boulders. Cut stones or stones with a flat surface should not be used, as they detract from the natural appearance a rock garden should possess. The rocks should be of various sizes, and arranged so that their most rugged sides are seen. Like the rocks on the mountainsides, they should occasionally stand out boldly, almost perdendicularly with the edge of the path, then withdraw into hollow recesses; but stand out boldy, amost perdeniacal larly with the edge of the path, then withdraw into hollow recesses; but they should always provide crevices, pockets and ledges for the reception of the plants. If a rock garden is exof the plants. If a rock garden is attensive enough a cascade will greatly add to its attractiveness. Rugged stone steps leading up to a sinuous path among the rocks on the upper part of the rockwork with seats plactically may be introduced,

give rigid support in every direction. It is, as a rule, better then to drive two stakes, one on each side, and each about three inches from the tree. Then wrap burlap around the tree and pass a loop or line from one stake to tie around the burlap and one on the other stake. This loop must be knotted around the tree in such a way that it will not give any play so that the tree shall be held firmly.

Under all circumstances be sure not to tte anything tightly around the trees.

So stand no shance of shading each other. They oughtto be from \$in\$, toft, apart Remove all with a sharp tool. At the same time reduce, every cluster of fruit to a single one, and leave the final hinning till later. Be most particular in following out these instructions at once. They also apply to nectarines and apricots.

Getting the Summer Window-Boxes Ready.

Art of Transplanting

When most amateurs transplant a shrub or tree their first desire is to save all the branches and twigs possible, because they hope that they will thus get an extra large plant in a new spot without waiting.

As a matter of fact, the surest/way to get an abundant growth is to be lavish with the pruning knife. The less branches a transplanted plant has, the less work the roots will have to do; and the root needs all the relief possible, because for some weeks after transplanting it is going to be busy enough trying to get a new hold in the earth.

Therefore the first thing that should

Timely Attention to Peach Trees

enough trying to get a new hold in the earth.

Therefore the first thing that should be done with the shrub that is to be moved is to prune all the branches off, and if at all possible to remove the top. The closer you can prune back to the original woody stem the more likely will it be that the plant will begin to grow in its new home practically at once.

Another thing: Do not fear to cut the root wherever it is at all injured or looks at all unhealthy. A sick root is just as bad for a plant as a sick branch.—Ex.

Tying Up Trees

By all means the best way to the a tree to a stake is to plant the stake and tree at the same time. A separate layer of burlap or other soft material must be wrapped around it so that there shall be no rubbing of the bark.

If the tree has been planted without a stake, it is generally impossible to drive one so close to it that it will give rigid support in every direction. It is, as a rule, better then to drive two stakes, one on each side, and each Timely Attention to Peach Trees

Under all circumstances be sure not to the anything tightly around the trees. Trees cannot bear this any more than human limbs could. If you will examine a tree closely a few days after a piece of string has been tied around it firmly, you will find that the string has cut into the bark, for trees are growing all the time and much faster than inexperienced people imagine.

Another thing to be careful about is to remove the burlap wrapping at frequent intervals, because it is a favorite refuge for grubs and other insects. A good way to do this is to set fire to it with a match and lef it burn away, if there is not too much of it. It will burn so quickly that it will not affect the tree and all vermin in it will be destroyed.

Getting the Summer Window-boxes are only used in the summer time, as so many of them are, and not filled in winter, they may be taken in hand and filled now. The advantage of this is is that when the plants are established by the end of May, and put out then, they give immediate effect, which is so much desired. When the boxes are planted in the summer time, as so many of them are, and not filled in winter, they may be taken in hand and filled now. The advantage of this is is that when the plants are established by the end of May, and put out then, they give immediate effect, which is so much desired. When the boxes are planted with little plants at the end of May or early in June, it takes them a long time to become showy, but when encouraged in a glasshouse or frame now the display is a full one from the fist. Those in towns who get nurserymen and florist to fill there boxes srould take as many of them to be furnished now as possible, get them started unnow as possible, get them started undestroyed.

Wherever a tree is at all bruised so that the bark is perforated or torn off, be sure to cover the wound with something that will keep the air out. Tree wax is the best to use, but tar, shellac, paint, or in an emergency wet clay packed over the bruise and tied up so that it will remain, will do.—Ex.

Summer Pruning

Summer Pruning

Now as possible, get them started under protection, and every satisfaction will be met with. Those who have boxes, greenhouses or frames, and plants all at home, should prepare the boxes, too, as suggested. See that all are in good order, with secure bottoms, holes for drainage, and firm sides. Drain well and fill with moder ately rich soil. Too much manure is not desirable, as this will cause the plants to grow too luxuriously and not We usually think of pruning only when a plant is asleep. It is true that the heaviest pruning should be done then, but there is much that we can do during the summer to keep a plant in drooping habit make pretty fronts.

set at intervals, may be introduced, and will add greafly to one's enjoyment.

A WOMAN'S BACK **WAS NOT MADE** TO ACHE

Thousands of Women suffer Untold Misery Every Day Aching Backs That Really with no Business to Ache.

Under ordinary conditions it ought to be strong and ready to bear the burdens of life. It is hard to do housework with an aching back. Backache comes from sick kidneys, and what a lot of trouble sick kidneys cause.

But they can't help it. If more work is put on them than they can stand it is net to be wondered that they get out of order. Backache is simply a warning from the kidneys and should be attended to immediately so as to avoid years of terrible sufferering from Kidney trouble.

Doan's Kidney Pills will cure you in the same way as they have cured thousands of others. Mrs. Thos. Craig, Almonte, Ont., writes: Mrs. Thos. Craig, Almonte, Ont., writes:

"I was doctoring for six months for kidney trouble and my back was so lame I
had to lie in bed. I was advised to try
Doan's Kidney Pills. I did so and in one
week I was able to walk with very little,
main, and in five months my back was as

pain, and in five months my back was as strong as ever.

Doan's Kidney Pills are 50 cents per box or 3 boxes for \$1.25 at all dealers, or will be mailed direct on receipt of price by The Doan Kidney Pill Co., Toronto, Ont.

ment.

To the many interested in learning of the capabilities of the districts surrounding Victoria for fruit culture, it may be said that the industry is one which offers pleasant occupation with the delights of a residence in the country and a sure and steady income, if ordinary care and attention be exercised. Respecting the culture of strawberries, herewith are submitted a few figures taken from the season

strawberries, herewith are submitted a few figures taken from the season 1906 at Victoria:

Grower A delivered from 1 1-2 acres, strawberries 12,556 pounds, for which he obtained \$1,365.10, less 10 per cent for marketing—or over \$800 per acre—this crop was harvested from one, two and three year old vines.

Grower B delivered from less than four acres of one, two and three year old vines, 28,126 pounds, for which he obtained \$2,887, less 10 per cent per acre for selling, or at the rate of over \$700 per acre.

For other small fruits the lands are equally suitable, such as biack-berries, raspberries, gooseberries, loganberries, wineberries, currants of all kinds, etc.

If, in addition to the strawberries,

in addition to the strawberries. If, in addition to the strawberries, Italian prunes are planted on one-half of a ten-acre tract, or five acres, the prunes planted twenty feet apart, will give us, discarding fractions, 100 trees per acre, or 500 trees for five acres. The cultivation given the strawberries will keep the trees in the pink of condition.

At the end of the first year of growth the trees have increased in

At the end of the first year of growth the trees have increased in value not less than 25 per cent each, which sum will repay cost and planting of the tree. At the end of the second year the increase in value of each tree is not less than 50 cents, or on 500 trees \$250. The third year 75 cents per tree, or on 500 trees \$250. The third year 75 cents per tree, or on 500 fourth year \$1 per trees, or on 500 fourth year \$1 per tree, or on 500 thrown in, as five-year-olds, nine times out of ten, a crop varying in value from \$2 to \$4 per tree, often very much more.

very much more.

Taking the five acres planted in ap-Taking the five acres planted in apples, at 24 feet apart, gives 75 trees per acre, or a total on five acres of 375 trees. The annual growth on these is equal in value to the prune, so that for the first year there are 375 trees at 25 cents, or \$93.75; for the second year \$187.50, for the third year \$281.25, for the fourth year \$275; at five years old fruit will be produced in most varieties of apples valued at least \$100 per acre.

varieties of apples valued at least \$100 per acre.

British Columbia fruit is preferred above all others in the markets of the Middle West, where it commands profitable prices. The exhibits sent to England under the direction of the provincial government have won the highest honors from all competitors. This is taken to prove that tespite the great distance British Columbia has secured a prominent place in the British market, in which Oregon and California apples have heretofore sold at the highest prices.

The fruit industry of British Columbia is as yet only in its infancy, but the results so far secured are convincing as to its future importance. The actual extent of fruit-growing land has not been ascertained, but by a conservative estimate at least one million acres south of the 52nd degree will produce all the fruits of the temperate zone. The recognized fruit districts include the southern part of Vancouver Island and the Gulf islands, Lower Fraser River valley, Thompson Biver velley. Shukwan lake Okan. lower Fraser River valley, Thompson agan, Spallumcheen, Osoyoos, Similkameen, Upper Columbia valley, Kootenay lake, Arrow Lake, Lower Columbia river and Grand Forks, which are all suited to the best grades of fruit, and which contain extensive areas of fruit lands. Other good fruit districts are: West coast of Vancouver Island, west coast of Vancouver Island, west coast of Mainland (where patches of fruit lands are found at the heads of the numerous inlets), Lower Fraser valley, Nicola, Grand Prairie, and many other localities. In zome of these sections irrigation is necessary and, as mentioned elsewhere, water is being supplied where the influx of population warrants the necessary expenditure. Many localities, which are now proved to be suitable for fruit culture, were but recently "discovered," for a few years ago fruit was only raised in the settlements on the coast and along the rivers and in constitutes.

desires to make money pleasantly to set up in the business. In Okanagan there are instances of \$500 to \$600 set up in the business. In Okanagan there are instances of \$500 to \$600 gross profit per acre. At Kelowna nine tons of pears and ten tons of prunes per acre are not uncommon. Near Nelson, 14 acres produced 1,000 cases of strawberries and 94 tons of roots, netting the owner \$100 per acre. This land was formerly a cedar swamp. At Lytton grapes averaging four pounds to the bunch are grown in the open. On the Coldstream ranch, near Vernon, 21 1-2 acres produced \$10,000 worth of Northern Spy apples. At Peachland one acre and a half gave a return of \$700 in peaches. Tomatoes to the value of \$1,500 per acre were grown on Okanagan lake. A cherry tree at Penticton produced 800 pounds of fruit. These cases are by no means exceptional or confined to any single district, similar ones could be cited from almost any part of the province. Apples and pears produce from \$ to 15 tons of fruit per acre, according to variety, and the average price is \$26 to \$30 per ton respectively. Plums, prunes, cherries and peaches invariably bear largely, and the prices are always satisfactory. If the fruit is properly picked and packed.

Fruit packing has been brought to a fine art in British Columbia, the

A Strawberry Field at Gordon Head.

two weeks earlier than in Ontario. The fact that grapes of excellent quality and flavor can be grown in quantity is sufficient to supply a very large demand having been established, horticulturists in the "dry belt" will be encouraged to set out vineyards, and in time that part of British Columbia will rival Ontario's famed Niagara

will rival Ontario's famed Niagara
Peninsula as a producer of grapes and
peaches. British Columbia grapes are
as yet a novelty on the market, but
their superior merits will in time win
them a leading position.

Nectarines, apricots, figs, almonds
and several other of the less hardy
fruits and nuts have been tried in a
small way with success, and men of
experience are not wanting who express the opinion that the sunny
slopes of the lake country and the
Boundary will produce any fruit or
vegetable which is grown for 300 miles
south of the international boundary
line.

Of unfailing and unending interest,

Of unfailing and unending interest, in connection with this theme, is the reply of His Excellency Earl Grey, governor-general of Canada, to the address of the Royal Agricultural so-

tlements on the coast and along the rivers, and in quantity that failed to supply even the limited local demand.

The actual experience of many fruit growers is highly satisfactory to them and a temptation to every man who desires to make money pleasantly to of the fair, Oct. 2, 1906:

"Ladies and gentlemen, before I proceed to formally open your provincial exhibition, in accordance with the invitation, for which I heartily thank you, I desire to say that I, Lady Grey and all the members of my family and party will leave tomorrow the Pacific shores of your beautiful province, with the gratest regret. We have all spent

Where Strawberries Thrive

Conditions in Victoria and Vicinity Especially Provable to Successful Cultivation

An accompanying set in from a most vicinity and the second of the second o ther west, come at last upon the Cantadian National Park, the lawfully established playground of the country a noble domain, large as a small European kingdom, lying in the heart of the Rocky Mountains and given over to the Joys of life as completely as the exigences of a materialistic age will permit. It is a heavy but inevitable penalty that we pay for the vastness of Canada that few of us can hope to know our land from sea to sea, and the magnificent wonders of the "national playground" must remain unexplored to the great majority of Canadians. The park lies across the backbone of the continent, stretching eastward into Alberta and westward into British Columbia. Its area is 5,732 square miles, so that the comparison with a European kingdom is an apt one.

Of course the park is reached easily

Of course the park is reached easily enough nowadays—a sleeper at Halifax, Montreal or Toronto, and there you are. Only it takes time and money, or matter how one may economize in no matter how one may economize in automobile mig either direction. When you are there inconvenience.

character unique among such under-takings. There are found within its limits bear, moose, elk, antelope, red deer, mountain sheep and goats, wolves otes and minor fur-bearing animals, und throughout its length and while in the rivers and lakes that

of passengers, or, again, a wrecked automobile might occasion the greatest

either direction. When you are there you are not in the backwoods, so far as the requirements of modern life are concerned. The most sumptuous and eladorate hotels at some points, the most fascinating of Swiss chalets at others, and, at Banff, the most popular, of the points of resort, number of hostelires of more modest pretentions cater adequately to the varried wants of the traveling public. Until the year of 1902 the Canadian National Park was a small affair, comparatively speaking, being but a block of land ten miles by twenty-six around the small village of Banff. The orignal park is surrounded by the enlarged area, which is more than twenty times that of the original reservation. For purposes of comparison it may be remarked that the American Yellowstone Park, the second largest in the world, is only 3,344 square miles in area.

The chief points of resort in the park mountain park the motor is barred. The chief points of resort in the park are Banff, Laggan, Field and Glacier. The chief points of resort in the park are Banff, Laggan, Field and Glacier. The chief points of resort in the park are Banff, Laggan, Field and Glacier. The chief points of resort in the park are Banff, Laggan, Field and Glacier. The chief points of resort in the park are Banff, the most popular, the National Park by bracking, whin the National Park bracking, whin the National Park strictly speaking, whin the National Park bracking, whin the National Park bracking are in Alberta, Field and Glacier. The chief points of resort in the park are Banff, Laggan, Field and Glacier. The chief points of resort in the park are Banff, Laggan, Field and Glacier. The chief points of resort in the park are Banff, the most reservation known as Mountain Park the motor is barred. The chief points of resort in the park are Banff, are Park, but is the centre of a separate reserve, 700 miles in area, Banff and clargan are in Alberta, Field and Glacier. The chief points of resort in the park are Banff, are Park, but is the centre of a separate of the c waters of the Bow river nine miles above Banff. The river has widened out into a series of charming sheets of water, known as the Vermilion Lakes. There is nothing visible

while in the rivers and lakes that abound throughout its length and breadth are grayling, mountain and rainbow trout, salmon trout, and other fish. But—the man who goes to the national playground hoping to get sport wiff be disappointed. The killing of game within the limits of the park is forbidden, and though some hunters have compiled with the letter of the law and broken it in spirit by driving the game outsid the park and then killing it, such practices cannot seriously affect the preservation of animal life over an area so huge. Moreover, the experience of the fellowstone springs, or famous waters of healing to which have come for treatm rheumatism and other ailments invalids from all over the world with overwhelming testimony as to their efficacy. Nor is the attractiveness of the sulphur-bathing confined to invalids sulphur-bathing confined to invalids— no visit to Banff is complete without a dip in the celebrated pool with waters fresh from subterranean fires and lo cated in a natural cave adorned by gi-ant stalactites and all the surround-ings that the most romantic imagina-

tion could suggest. The total number of visitors to Banff last year was 30,136, of which over one-third were from the United States. It has become customary for the trans-continental visitor going east or west to spend a day or two in Banff. and especially on the arrival there of a contingent of passengers off a Pacific liner to Vancouver is the assemblage of guests one rarely cosmopolitan in character.

I have left myself little space to speak of Laggan, Field and Glacier. Laggan is a veritable dream of delight but it is not for the common crowd of humanity. The hotel there is exquisitely appointed, but its prices are proportionate; but it is continually full of more or less well-to-do visitors, and the beautiful chalet is enlarged from year to year. The chalet is four miles from the station, four miles of a drive along the bank of a rushing, foaming mountain stream, which descends 1,000 feet in a rapid series of falls, while the visitor climbs to the hotel and to the level of the wonderful glacial lake named after the Prince Louise, the far end of which is overlook by a vast glacier. The lake is the lowest and the largest of the three lakes in the clouds, Leaving the confines of the park and proceeding westward, one might name point after point in British Columbia to which the holiday-maker might resort temperature, is delightful both in summer and winter, and is gradually acquiring a continental reputation as a holiday city. If in addition we consider the special wants of the sportsman we shall find British Columbia a paradise the year round. He may come out in August, reach the Cassiar country by Hudson's Bay boat, and get specimens of mountain sheep, goat, ca ribou, and probably a moose. Black bear and grizzly could be included if

One direction for securing a grace-ful appearance may be summed up in the words "Learn to sit up properly and learn to walk properly."

If your arms hang down let them hang naturally. Do not swing them and do not pin them tight to your sides. Try to some time get a good glimpse of yourself and see how you appear in your walk. Do not gaze at your feet, and do not have as if you were studying the pavement, but look up.

Rest the back of your head as you walk. Do not throw your head forward, but dip it back, for that will bring your chin up, do away with a double chin tendency, and give you the correct poise.

Walk with dignity, do not loiter, do not hurry. Choose the dignified medium. Always square your shoulders.

Home Hints

For a Hacking Cough.

Give the juice of a lemon mixed in a cupful of hot water. This is also an excellent remedy for a sore throat, and if given very hot after the child is in bed, will often prevent a cold from developing. Should the child object to the sour taste of the lemon a little sugar may be added.

Canadian Ginger Cordial.

One ounce tartaric acid, one-half ounce essence of ginger, one-half ounce tincture of red pepper, three lemons, three pounds lump sugar, Slice The little girl on the left wears a guimpe dress of pongee, in natural shade, with tie, sash, button loops are stitching of pale coral pink. The buttons are round white pearl and 1. revers are of white lace. The other dress is white pique, worn with a guimpe of dotted lawn.

CANADIAN WHEAT FOR JAPAN'S MILLS

Commercial Agent McLean of Yokohama Points Out Opportunities For Growing Trade

MANGHURIA OFFERS A MARKET

Firm in Chinese Province Asks Why Canada Cannot Share in Wheat Trade Across Pacific

Discussing the opportunities for the wheat trade between Canada and Japan and Manchuria, Alexander McLean, Canadlan commercial agent in Japan,

town are employed in hauling ore to the railroad, dumps are being built up on several claims and contracts for development work on others are being built up trails on July 14.

Fourteen games

the summer resorts of the interior of this province. The plans for the hosticity, which will be one of the largest of its kind in British Columbia, have been prepared by C. H. Clough, the summer resorts of the string of the Standard bank was held been prepared by C. H. Clough, the summer way on the site.

Toronto, June 20.—The annual meeting of the Standard bank was held yesterday. During the year the paid yesterday. Durin

an and Manchuria, Alexander McLean, Canadian commercial agent in Japan, whose office is at 14 Bund, Yokohama, says: "There has been some importation of milling machinery, in some cases coming from Pennsylvania via the Canadian Pacific Railway route. And there is quite a noticeable increase of interest taken in wheat under the incentive of a customs tariff rate discriminating between flour and wheat in favor of the latter. Excepting in a few special cases, interest will now focus upon next harvest, only about three months forward.

"In case of a substantial increase of production beyond the demands of home consumption, there will probably be increased activity in pushing Canadian flour this way. But correspondence indicates such a degree of unreadiness, in respect of facilities for shipment, that there should be care not the except too much however great the

The relations and contracts for several claims and contracts for development work on others are being built up to several claims and contracts for development work on others are being development work on other are being development work on other are being development work on other are being development work on the Pennsylvania syndicate, about 10 per land to be of the form of the property here.

As the property here, and would be equally convention to the farming contract that it was found that the property here.

As the property here, and the beautiful that it was found that a ferry service to the form of the property here.

As the property here, and the beautiful that it was found that it was trails on July 14.

Fourteen games will be played in development work on others are being awarded.

At the Copper King mine, operated by the Pennsylvania syndicate, about 30 men are employed, three shifts working at three different points on that property.

At the Arctic Chief, where W. J. Elmendorf is in charge, the same class of work is being done as at the Copper King.

Trails on July 14.

Fourteen games will be played in Residents of Colwood and the districts nearby are working energetically seeking to establish a ferry service between Colwood and Esquimait, giving a direct service between Victoria and the farming communities adjaund the farming communities and the farming comm

The control of the co al of the creamery from its present site to Victoria would prove of disadvantage to the farmers of Saanch and the Islands. He asserts that this is not so, but that were it removed to Victoria it would be equally conveni-

"THE MAGIC CAPE" A Story of East Side Fashion

By MYRA KELLY Author of The Little Citizens")

and she began to laugh.

"Did you know," she asked, "that their struggles, their sufferings and their struggles, their suffering and their struggles, their suffering and their struggles, their suffering and their struggles, the suffering

you must remember this point because her size has an important bearing upon the story. She taught in the primary department of one of the big east side public schools, and she had in her class a little girl whose entire wardrobe consisted of one calico dress and one hair ribbon which had begun life as a bandage.

"As the days grew colder and the child thinner, my friend searched through the archives of her own ward-robe for something which this baby through the archives of her own wardrobe for something which this baby
could wear going to and from school,
and, just as she was growing discouraged, she discovered a little tight-fitting shoulder cape of prehistoric date
and fashion. It was such a cape as
you can find in some of De Maurier's
drawings. It pinned the wearer's arms
to her sides, it gagged her tightly
around the throat, it was of velvet,
and its color was royal blue.

She even definitely stated that this was the bad, herself, outgrown it; that she had, herself, outgrown it; that she had, herself, outgrown it; that she had, herself, outgrown it; that she had no costume with which it could appropriately be work, that it was menaced by moths, a prey to creases and a responsibility under which she could no longer find peace or security. Under the circumstances, she pleaded, would Becky relieve her of it? And Becky was delieve her of it? And Becky was delieve

PREMIER MCBRIDE AS

bers of the present House of Commons. He is a true son of Canada, born there, brought up there, with a good deal of his heart and his interests centred there still. And in mind, character, appearance, style of speech, he is a typical Canadian. What is the typical Canadian. What is the typical Canadian? It is not quite an easy definition to make, but I should roughly describe him as a blend of the modernity, quickness, keen and ready humor of the American, with the underlying steadiness, love of order, and strong resolution to maintain discipline which are characteristically English. The Canadian stands alone in his clear, distinct individuality, and a very charming individuality, and a very charming individuality I have always found it to be.

An Admirable After-Dinner Speaker

run away with the idea that this means there are too many parliaments and too many officials in Canada. For

Well Known Old Country Journations of the Prime Minister

Prime Minister

P. T. O. (London), edited by T. P. O'Connor, has the following from the pen of the brilliant editor:

Hamar Greenwood, one of the members for York city, gave a dinner party in the House of Commons the other night. You who do not belong to the House of Commons don't know much yet of Hamar Greenwood, but you will hear a good deal of him by and by He is one of the colonial-born memons. He is a true son of Canada.

Cause it brought home to the Empire has in that country. The mind almost staggers before the gigantic possibilities of Canada's but ure. I sat next Mr. McBride, the pulme minister of British Columbia. Here you have an excellent specimen of the provincial ruler, of Canada. Thev build their men in those young countries—at least the men who get to the top—on large lines. Mr. McBride is, I should say over six feet high. His face, still looking almost boytish in its fresh rules of Commons don't know much yet of Hamar Greenwood, but you will hear a good deal of him by and by He is one of the colonial-born members of the present House of Commons. He is a true son of Canada.

recognize in him some of the sturdy for how varied has been his career! He is now a barrister and a member of parliament, but as a lad he rair off to seek adventure in a traveling company of players, and he repeats with great gusto and infectious fun the criticisms which his efforts as a tragedian drew from the outspoken presso of his native land. It is perhaps this experience which has given to his face its mobility, its impression of scarce ly suppressed fun and its twinkling eyes.

Canada Not Overcrowded with Officials And now to that curious and interesting little dinner party which Mr. Greenwood gave the other night. It was to the ministers of several of the provinces of his native Canada. You may think that you have exhausted the powerful personalities of Canada when you have we exhausted the powerful personalities of Canada when you have we have such as treated the first of the server of the provinces of his native Canada. You may think that you have exhausted the powerful personalities of Canada when you have how now have been reading in the newspapers. You are quite mistaken. There are many legislatures in Canada, and each province has, besides its legislature, its own cabinet, with a prime minister and all the other great officers we have in our cabinet at home. Do not

HON, R. MCBRIDE TALKS TO LONDON AUDIENCE

Canada, British Columbia and Their Relations To The Empire

Canada occupies a larger amount of the space of North America than do the United States.

I allude to this Canadian dinner because it brought home to me, even more than I realized already, what a trooper dought beginning the Empire has a trooper dought beginning to the trooper

be of interest and productiveness to your discussion. However, tonight Mr. O'Halloran renewed his request, and asked me to say a word or two as a Canadian. You well know the secclaracter, spearance, style of speech, he is a typical Canadian. What is the character, spearance, style of speech, he is a typical Canadian. What is the easy dendrition to make, but I should roughly describe him as a blend of the modernity, quickness, keen and the modernity quickness, keen and a keep characteristically and a seed of the modernity quickness, and a very characteristically and a seed of the modernity quickness, and a keep of the modernity quickness, and a keep of the modernity quickness, and a keep of the majority and a seed of the modernity quickness, and a seed of the modernity quickness, and the modernity quickness, a Canadian. You well know the section of Canada from which I come is the furthest removed from this great Imperial metropolis and probably because of this great distance there may be some disposition on the part of people resident here to imagine we do not keep so closely in touch with Imperial conditions as perhaps our brother Canadians who live further eastward. But if there are any who believe this to be the case, a visit to British Columbia would at once convince them that of all sections of the Empire that great province which I
