COUNTY EXHIBITION.

Good Crowds—Good Weather—Good Show

The Carleton County Agricultural and Industrial Exhibition was opened at Woodstock Wednesday under very favorable circumstances by His Honor Lieut. Governor McClellan. The weather was fine and warm and the town was full of visitors. The business houses on Main street were gaily decorated with bunting and looked very pretty. Out at the fair grounds a platform was erected alongside the exhibition building on which speeches were made by Lieut. Gov. McClellan, Hon. Messrs. Emmerson, Tweedie, LaBilloy and Mr. Hazen and Judge Stevens. There were also on the platform Messrs. C. L. Smith (chairman) his worship Mayor Murphy and Mrs. H. P. Baird Mrs. F. B. Corvell, and Mrs. J. R. Murphy. The military escort was composed of Lt. Col. Vince, Lt. Col. Boyer, Lt. Col. Baird, Lt. Col. Hart, Capt. Raymond, Major Good, J. Appleby, Lt. Bedell, Lt. Bull and Lt. Fields.

After the speakers had finished, Lt. Gov. McClellan opened the exhibition. The large building recently erected by the Agricultural society is taxed to its utmost capacity. The fruit display of apples, grapes, and pears, although not very large, was of good quality. In roots and vegetables the display was far ahead of anything ever seen in the county, over thirty varieties of potatoes being among the lot. In the cattle sheds there were some fine specimens of horses, cows, pigs and sheep, many of them standard bred, the horse exhibit especially was far ahead of anything seen here.

Nearly every line of business in town represented the fair. Out on the grounds the heavier exhibits, consisting of farm machinery, wagons, etc. There is also a very creditable display of wheat, grown in Carleton county, which is no doubt the outcome of the encouragement given this part of the farming industry by local government. In the rear of the large building was the fowl exhibits, showing many fine specimens in that line.

At 4.30 the Houlton band, which had been engaged by the committee, gave a concert on the square and was greatly enjoyed by the visitors and townspeople. Half an hour later the bicycle parade came down Main St. and, while not large, some of the costumes were very pretty. The day was brought to a close with a concert in the rink given by the Houlton band, assisted by local talent, which was largely patronized. The committee who had charge of the exhibition are deserving of great praise for the creditable manner in which the first day's proceedings were executed.

On Thursday there was the largest crowd seen in Woodstock for a long time. The special excursion from Presque Isle brought a large number from all points up the line. At eleven o'clock there was a parade led by a coach containing His Honor the Governor, the Premier, the Mayor, and Mr. J. D. Hazen. Following was the Presque Isle Band, the fire companies and the trades representatives. The result of the afternoon races was not obtainable at the time of going to press.

The river sports were charming, and the illuminations fine.

Fridays parades and races were well attended.

Andover.

And Other Places In Victoria.

Mrs. C. M. Tibbets expects to start for Vancouver on Tuesday. She will spend the winter there with her daughter.

Miss M. Louise Pickett returned from St. John last week much improved in health.

Some of our citizens are going to the exhibition at Woodstock this week.

Rev. R. W. Dennings was called away to Arbutot to attend the funeral of the little daughter of Mrs. Gallop of that place.

Rev. A. H. Hayward of Florenceville occupied the Baptist pulpit here on Sunday, and two young ladies were baptized at the close of the service.

Yesterday was the Semi-annual Communion service at the Presbyterian church here.

The Andover Parish Sunday School Convention was held at Beaconsfield on Thursday. Although the weather was threatening a large number of people gathered at the schoolhouse to take part in the Convention. To Rev. J. F. Estey the president of the Convention, much credit is due for the success of the meetings. The ladies of Beaconsfield had taken a good deal of trouble to green and beautify the house for the Convention, and their exceedingly kind hospitality to the visitors present will not soon be forgotten, but we think we would like to attend another Convention there some day.

Volunteered for the Transvaal.

A company of the 71st Fusiliers have, through their captain, H. F. McLeod, volunteered for service in the event of war in the Transvaal.

GOOD SPORT ON TOBIQUE.

Bangor Man Catches 43 Trout in 30 Minutes.

Samuel L. Crosby has returned to Bangor from a stay of several weeks in the Upper Tobique river region, one of the most famous hunting localities in New Brunswick. Mr. Crosby went with the express purpose of getting a moose and was successful. The head which he brought home for mounting at his establishment, is one of the handsomest seen here for several seasons. The antlers are of good size and are well high perfect as regards symmetry. They measure 54 inches and have eight points each. In addition to getting his big moose Mr. Crosby brought down two good sized deer, the heads of which he will also mount for trophies, besides having such good luck with his rifle. Mr. Crosby succeeded in having great sport at fly fishing. The Nebisquit stream is famous for its brook trout and it was here that he made the no catch of 43 beauties in 30 minutes. The fish are larger and much handsomer than most brook trout, and as gummy as they are attractive. He brought the skins of several of the larger fish to Bangor, which he will mount for his own collection of stuffed sizes.—Bangor Industrial Herald.

Died In Jail.

Daniel Murphy Who Murdered His Father.

WOODSTOCK, Sept. 25.—Word has been received here of the death in Houlton jail of Daniel Murphy. He was accused about a year ago of the murder of his father Daniel Murphy, senior, at Marshall, Me., and the case was tried in Houlton last fall. It was a most cold-blooded murder and the only defense made was provocation and an absence of control on the part of the murderer. The jury found a verdict of murder in the first degree, but various appeals, etc., were taken and pending their decision the youth was in jail, where he died. He was under twenty years of age.

A Thriving Town.

Sidney, Cape Breton, is said by travellers to be one of the most promising towns in Nova Scotia, or for that matter, in Canada. The new Glasgow Bulletin says:

Dredging, digging, chopping, wharf building and bridge building, to say nothing of the usual avocations of established industries, that is what may be seen around Sidney, C. B. That town has emerged from its quiet and uneventful routine of former years; and with its magnificent harbor, its bracing climate, and its immense mineral and other natural resources, the future prospects look very bright indeed.

Married at Centreville.

A quiet home wedding was celebrated at Centreville on Wednesday, September 27th when Miss Curtis Fitzgerald was married to Walter Everett of Blomidon. The ceremony was performed by Rev. Jos. Cahill, Mr. and Mrs. Everett took the afternoon express for a trip to Belleville, Ont., and other places.

Bernard Brown Found Dead.

The body of Bernard Brown was found Saturday morning near the woods. He was lying on his back, dead. The coroner found an inquest unnecessary as death came from exposure and old age, being a man nearly 80 years old. The funeral took place Sunday.

On a Happy Mission.

Mr. M. B. Ham of Bath, Carleton county, is in the city. He intends remaining a couple of weeks and it is understood that before leaving he will be one of the principals in a happy event to come off early next month and will take back to his Carleton County home a young lady residing on Brunswick St.—Gleaner.

Centreville Scintillations.

MR. EDITOR—Complimentary reference is made by many in reference to the "Tiser" and its present management and by some it is said to be rather gritty, but we have no fault, and consider it to be a smart local paper, through which a lever might be used to build up your town at a more rapid rate, if the intelligent and cultivated citizens would take a greater interest by an interchange of thought, and through its columns, sent to the reading public.
Our reviewers have clashed Cheney and Corbett, the government nominee, have made and passed three lists: White and Armstrong, the conservative nominee, have done likewise, both wrong we fear.
On Wednesday the 27th, a marriage is to be celebrated in the Baptist Church in the morning and in the afternoon they will leave on the 4 o'clock train.

Farmers are busy looking after the potatoes, what is left of the grain after the frost and wind is all out, the buckwheat especially, giving a very small return for work and acreage.

Agricultural show at Centreville on October 30th, where the visitor will be convinced that our farmers will sustain their reputation as being up-to-date in producing all kinds of stock as well as for a display of the products of the soil.

Mrs. Dyer who had her hip broken, is scarcely out of danger yet, making very slow progress toward recovery.

John Simonsen has been five months in bed, with a poor prospect of leaving it in the near future, if ever.

Mrs. Fred Burt is under Dr. Brown's care. She has about even chances with a prospect in her favour if it continues.

Dr. Peppers is steadily gaining in practice and public favor.

Is your contemplated pork-packing factory sound? and what progress is the company making towards bridge building? We heard nothing from the Peoples' Union Agricultural Society, is that dead also? We had hoped for better things.

AMICUS.

Windsor.

The long looked for rain has come at last and the farmers who are done harvesting are in good spirits, while those who are not done yet have a look not very inviting to peddlars and tramps so my advice to them is to keep scarce till the weather clears up.

Several cases of typhoid fever are reported here. As many as six cases in one house.

Doctors Curtis and Estey have been in attendance, Estey taking charge of patients, while Curtis was away killing off a few Boers. If your correspondent did not know that these gentlemen were temperate he would be inclined to think they had a little fire-water aboard on a recent visit here.

Miss Boyer, our popular school teacher has been very low with fever. She is now able to leave her room. A sandy complected fellow put in an appearance last Saturday evening and a very sudden change took place.

Benjamin Tedford, Esq., from Yarmouth N. S., is here to spend the winter with his family.

A young lady who came from Lewiston to spend a few weeks with her parents, has concluded to enter the mercantile business here, as one of our merchants is much in need of a clerk. Mary's little lamb returned last Saturday after a three year's cruise in Uncle Sam's domain.

DUDLEY.

Bloomfield.

The weather is fine and cool, and the farmers are busily engaged in digging their potatoes, which are an excellent crop.

The cheese factory closes this week. There has been an exceptionally large run of milk this season, but it is getting smaller of late.

Prof. Bone is to give an illustrated lecture on the F. andyke in Stokoe's Hall tonight.

Two of our widowers, tired of their lonely lives, have each taken to himself a wife this month. Our S. S. Superintendent Mr. Alex. Strong married Miss Lottie Waters of Lakeville, and Mr. Edward London married Mrs. Jennie Berry of Fredericton. We congratulate them both on their happy choice.

The Methodist pulpit, Sunday morning was occupied by Rev. Mr. Watson, colporteur, and in the evening by Rev. R. A. Colpitts of Fort Fairfield, with whom the pastor Rev. W. H. Spargo had exchanged places.

Mr. and Mrs. Ren. Cherry and family have returned to their home in Misamis, Me., after a two weeks visit to relatives and friends here.

G. H. Stokoe and Master Frank Mrs. H. A. Stokoe, C. H. Cheney and Miss Nora Cheney of this place attended the Exhibition in St. John.

Miss Pearl Stokoe has returned from a trip to Montreal, Fredericton, St. Stephen and St. John.

Mrs. E. A. Stokoe and family have moved into A. Smart's house, lately vacated by Mr. and Mrs. Roy Nichols who removed to Monticello, Me.

Messrs. Walter Cheney and Howard Nye are home from camp at Sussex.

Cloverdale.

There is a big change in the weather it being very warm today.

The ground is getting very dry, as there has been no rain in this section for some time.

The people are about all done harvesting here.

Mr. and Mrs. Robert Martin were made happy by the arrival of a little girl baby in their home the other day.

The people are all returning home from the picnic and reception at Central Hainesville.

Miss Stella Billing who is home from Maynard, Mass., is here visiting friends.

Hayes Bros., of Millville have a crew of men in the woods on South Beacquime. They are building a dam at present.

George Wallace is building a stone wall for a new house. H. Moore of Caverhill is mason.

Aaron Price and daughter Hattie paid this place a flying visit today.

Herbert Allen passed through here yesterday en route to Hartland.

A domestic event occurred at Mr. Sam Wallace's—a girl.

Several left today for potato digging in Acrostock.

H. Jones of Woodstock arrived today to do some fall work on his farm.

Mr. Long of Nova Scotia has taken up a farm on Second Tier.

The Newest Fashion Craze.

Fringe is the most fashionable trimming of the Autumn. It is used not only to decorate dresses, but hats and neckties. Many of the newest cloth skirts are trimmed with fringe to simulate an overskirt, and extremely pretty effects are obtained. A deep green street dress just imported shows the skirt trimmed a few inches below the knees with Vs formed of narrow black stitched taffeta bands. Between each V is a fall of black silk fringe. Very short fringe is also used to outline yokes of both cloth and silk waists. And the fringe this year need not necessarily be of silk. It is equally fashionable made of chenille, and a number of the new gowns are trimmed with fringe of fine beads. Though black fringe is the favorite yet shaded silk fringe is seen on many of the imported models.

St. cuffs edged with fringe are used in a variety of ways.

They are among the newest neckties. The silk is five inches wide. It is wound around the neck to form a stock, and then folded in front in a wee bit of a bow with the loops brought well forward and the fringed ends hanging down at least ten inches below the waist.

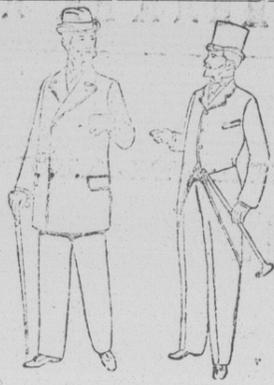

Sashes of soft changeable silk with long fringe will be worn by young girls with their party gowns.

The sashes come this year in the exquisitely delicate pastel colorings.

Fringed scarfs are seen on many of the hats for both big and little girls. A simple but stylish trimming for a small girl's school hat is a plaid silk scarf with fringed ends. The scarf is caught in front with a buckle. It is then just wound about the crown and tied at the back in a bow with the ends falling over the brim.

KEITH & PLUMMER

A Farmer's Victory.

Rheumatism Had Fastened Its Fangs Upon Him for Years and Caused Him Endless Misery—Tells How He Found A Cure.

From the Acadian, Wolfville, N. S.

Among the many in this vicinity who firmly believe in the efficacy of Dr. Williams' Pink Pills as a cure for rheumatism is Mr. John Stewart of Hortonville. To a representative of the Acadian who recently interviewed him, Mr. Stewart said he had been a victim to the pangs of rheumatism for upwards of twenty years. Two years ago Mr. Stewart was thrown from a load of hay and was injured so severely that he was obliged to take to his bed. In this condition his old enemy—rheumatism—again fastened itself upon him, the pains radiating to almost every joint in his body, making life almost a burden. He had read frequently in the Acadian of the cures effected through the use of Dr. Williams' Pink Pills and decided to give them a trial. After the use of a few boxes the pains began to diminish and his general health began to improve. Mr. Stewart continued taking the pills until he had used eight boxes when the pains had entirely disappeared and another victory over disease had been won by this peerless medicine.

The Acadian can add that Mr. Stewart is worthy of every credence, as he is a man of intelligence and sterling qualities, whose word is unhesitatingly accepted by all who know him.

The public is cautioned against numerous pink colored imitations of these famous pills. The genuine are sold only in boxes, the wrapper around which bears the words, "Dr. Williams' Pink Pills for Pale People." If your dealer does not have them they will be sent post paid at 50 cents a box or six boxes for \$2.50 by addressing the Dr. Williams' Medicine Co., Brockville, Ont.

TREES FOR DRAINAGE.

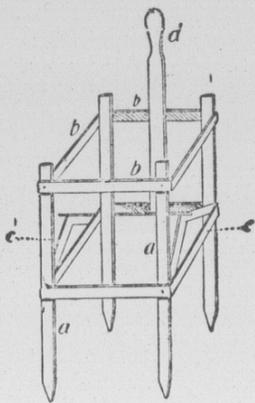

Those Who Have Land That Would Be Improved by Being Drier Should Plant Some.

It is a popular belief that trees about a house tend to make it damp. It is true that after heavy rains a dwelling with trees surrounding it takes more time to dry out than one not so surrounded. On the contrary it is just as true that where trees are the soil is very much drier than it would be otherwise. Some years ago the daily papers had much to say of the drainage of a malarious district in Rome by the planting largely of the fast-growing blue gum tree of Australia, *Eucalyptus globulus*. There is no doubt that this rapid-growing tree would quickly change the character of a half-swamp, as it grows fast and has thick foliage. When there is a lot of trees full of foliage there is great call for moisture from the ground. The roots are drawing it in continually, and this in the long run accomplishes as much as a system of drainage would do. I have myself witnessed the great change brought about by the cutting down and clearing of trees from a low piece of land. What was a fairly dry place while the trees stood became almost a swamp. It is not as easy to start evergreens in such a spot as it is deciduous trees; otherwise they would be better for the purpose as there is more evaporation from them in the winter season. It must not be supposed that there is entire rest on the part of a deciduous tree in winter. The roots are active and especially toward spring an enormous lot of water is taken from the earth by the roots of a large tree. This is why trees near dwellings which are in damp situations are so valuable. The cellar of a house which is surrounded by large trees will be very much drier than before the trees were there. This I have seen many examples of. There is no need to plant trees so close that the branches will reach to the house and it is not at all desirable that the limbs overhang it. Deciduous trees are better than evergreen for planting near a house. An evergreen is not a top spreader and affords but little shade. The deciduous one gives the shade in summer when it is needed, and its roots are drying the soil to a great extent in winter as well as largely in summer. One of the best trees for the purpose is the common white maple. It grows quickly, makes a good deal of foliage, and it is much more of a surface rooter than many trees, and this is what makes it so good for drainage. Those who may have a piece of land that would be improved by being drier and would not object to trees doing the work for them should plant some. The result would please them very much.—Practical Farmer.

SPLENDID WIRE REEL.

For Uncolling Barbed Wire, Its Inventor Seems to Think, It Is Without an Equal.

For unrolling barbed wire, my rack, as illustrated, is made of three by three inch scantling mortised together. Uprights, a, are three feet long, and cross-pieces, b, 18 inches. The two pieces, c,

A WIRE REEL.

are 12 inches long and notched at the top so the bar on which the spool is hung can rest as shown. Lever d regulates the speed of turning or paying out wire by pressing against the roll. The whole outfit is set in the ground at an end of the proposed fence, spool put in place and a horse with singletree attached to end of wire. The horse can be ridden or led by a man, while a boy operates the lever.—R. G. Melson, in Farm and Home.

THE BERRY BUSHES.

Next Year's Crop Is Determined by This Year's Vigor and Growth of the Plants.

After the fruit has been harvested and during the rest of the summer is the best time to give the raspberries necessary pruning. One of the first things to do is to cut out all of the old canes. It is this year's growth of cane that bears the fruit next year, and it is quite an item to secure a vigorous, thrifty growth. By cutting out the old canes more room is given, and the new canes can make a better growth. At the same time that the old canes are taken out, all of the small, weak or unthrifty canes should be taken out. Three or four strong, vigorous canes will yield more and better fruit than two or three times that number of small and weak canes. All canes not wanted should be treated as weeds and managed accordingly. There is no advantage in allowing the canes that are left to grow too long. If the strength of the root can be thrown into one-half the length secured of cane a better quality of fruit may be secured. The rich shoots may be treated in the same way.

Four feet is as high as either raspberries or blackberries should be allowed to grow, and many good growers keep them pinched back to three feet. Thorough cultivation will help materially in securing a better and more vigorous growth.

It should be remembered with all fruits that very largely next year's crop of fruit is determined by this year's vigor and growth of the plant, and it will pay to take considerable pains to secure a strong, vigorous growth.—N. J. Shepherd, in Farmers' Voice.

FLOWERS AS CLOCKS.

Wonderful Timepiece Constructed by an Ohio Gardener for a New York Millionaire.

The phenomena of certain species of flowers opening and closing at particular hours has been utilized by an Ohio landscape gardener to add a unique decoration to the grounds of a millionaire's country seat at Tarrytown. It consists of a flowerbed which can be used as a clock. The bed is circular and divided into 12 parts. Each part contains a figure composed of flowers which open or close at the corresponding hour. Thus the two space is occupied by an 11, made of hawthorn, which closes at two p. m. precisely. The hands are stationary, of course, and are composed of the common yellow dandelion, which opens at 5:30 a. m., and closes at 8:30 p. m., and point to arrangement of flowers representing these figures. Among the flowers used are the snow thistle, which opens at five a. m. and begins to close at 11, but does not fully close until noon; the yellow goat's beard, which opens at four a. m. and closes at four p. m.; the blue chicory, which opens at four p. m., and closes at noon; the morning glory, poppy, water lily, pimpernel and marigold, opening at five, seven, eight and nine a. m., respectively; the Star of Bethlehem, which closes at 11; the passion flower, which opens at noon; the beauty of night, which opens at five p. m.; white lychnis, opening at six, and the blue convolvulus, at two a. m.—Chicago Herald.

FIRST, and properly, in making a choice of reading for the home you select your own home paper. However good may be the reading of other papers, there is none that comes home so closely to you as your local weekly. It is to further increase this interest by adding to our lists that the following liberal proposition is made to subscribers. We have been careful to form combinations only where we knew we were touching safe ground and could thoroughly recommend the publications offered. Read carefully every word of this offer for it means a saving of money to you.

Montreal Daily Herald

A GREAT METROPOLITAN DAILY

WE are pleased to announce that we have been able to make most extraordinarily liberal arrangements with the publishers of one of the greatest of Canadian dailies—The Montreal Daily Herald.

The Herald has achieved a well-deserved reputation for the remarkable value it gives its readers. It is one of the most enterprising newspapers in the Dominion, and in thousands of home circles is welcomed on account of the great interest it manifests in subjects of special interest to the family. It is admittedly the favorite daily of the women of Canada. To the farmer and business man, it appeals through its accurate market reports and business columns. To the young men, through the attention it bestows on clean, manly sport. To the lover of fiction, through the excellent stories appearing regularly in its columns. To the politician, through the calm and moderate tone of its editorial expressions.

The only reason which prompted the publishers of The Herald to make us the offer, which enables us to club the two papers at the extraordinarily low price given below, is their desire to immediately introduce the Daily Herald in large numbers in this neighborhood. The offer they now make will hold good for a limited time only.

It should be mentioned that subscribers to The Herald during the next few months will enjoy to the full the opportunity which that paper is offering to all readers to secure valuable books at merely nominal figures.

IN the best sense of the term this is an Ideal Cook Book—ideal in being a practical book—a book which the housewife will want to keep constantly by her side and can depend on, because of the simplicity and reliability of every recipe. Starting with a chapter on soups, naturally the first course, throughout its three hundred pages and over there are to be found more than 1,000 recipes, winding up with an excellent chapter on sick room cookery. Following the cookery section there is a department entitled "The Doctor," in which are recipes selected from eminent authorities, and which will be found invaluable where the doctor is not readily available. The recipes are numbered throughout the book, and each is prefaced with a list of the ingredients called for by the recipe, rendering it unnecessary for the housewife to read through the entire recipe and make calculation of what is wanted. Size of page is 5 inches by 8 inches, bound in handsome oilcloth covers. It would be a mistake to confuse this book with any paper-bound cook book that would go to pieces in no time.

Wisdom suggests taking advantage of this offer quickly. If you are now a subscriber to either paper, and your time has not yet expired, by taking advantage of our big offer promptly, your subscription will be extended one year from date of expiry. Everything will go to you at once. The Herald, during the closing months of 1899, will make some wonderfully liberal offers to subscribers. The Cook Book is mailed to you promptly on receipt of order, and coming along Fair Time and Thanksgiving Day, and later Christmas and New Year's, you want this book beside you. Drop into the office the first time you are in town, or, if more convenient, sit down now and write a letter, enclosing amount, and everything will have our prompt attention.

The Transvaal Situation.

The two sides of the South African question is ably summed up by an American exchange as follows: The Boers say to the Britons:

"This is our country. We snatched it from the savages. We made a barren land of the wilderness."

The Britons reply: "We helped you fight the Kaffirs. We developed the mines and made you rich. We built the cities."

The Boer: "You want it for its gold and diamonds."

The Britons: "We seek only to protect our subjects in their legitimate pursuits."

Boers: "You demand equal franchise. This would mean political extraction for us."

Britons: "We pay nine tenths of taxes. Don't we deserve a vote? The majority ought to rule."

Boers: "By the convention of 1884 you promised never to interfere in our internal government. Now you ignore those conventions."

Britons: "Conditions have changed. Your rule has become tyrannical. You rob on every hand."

Boers: "We want no English among our citizens. You are immoral and vicious. You would not make good burghers."

Britons: "No nation has the right to isolate itself in a land full of gold and diamonds. You are only half civilized. You are religious bigots."

Boers: "If our laws please you not you are free to go away."

Britons: "We are here to stay."

Boer: "If God wills it, we will fight to the death."

Britons: "So will we."

Boers: "Remember Majuba Hill."

Britons: "WE DO."

BARN MILK HOUSE.

It Costs But Little to Build One, But Adds Greatly to the Comfort of the Dairyman.

The cut shows a labor-saving device—a building into which the milk can be carried (and the cream raised or "separated") directly from the cattle stalls. Though next door to the cows,

BARN MILK HOUSE.

no odor gets to the milk because the covered passage way has lattice-work sides, giving a free current of air. The milk room is partitioned off from the latticed walk. A door at the outer end can be reached by the creamery wagon, or the market wagon of the farm itself. Thus many steps are saved. — Farm Journal.

FACTS FOR DAIRYMEN.

The first dairy commandment is, get good cows.

The successful milkman must be a human lark just about 365 mornings in the year.

Prize the calf with a good mother, but go miles for the one with good grandmothers also.

Cow keeping is no Klondike, but the dairy may be counted upon to do its full share in making the farm pay.

Breed and select with the grain. Don't try to educate oats to produce walnuts, nor to induce beefy Herefords to rival the Jersey for cream and butter.—American Agriculturist.

Tesla, who is in Colorado, claims to have discovered the secret of the wireless transmission of power, that is to be able to sit in an office in St. John and operate a rotary mill in Restigouche or propel a ship across the ocean by touching a button, turning a crank, or something of that sort. It is not safe to scoff at projects of such a sort, these latter days. It is possible that some one may yet devise a means by which the boys may be got up to milk the cows or the girl to get breakfast at the proper time without any destructive waste of vital energy.—Gazette.

One day this week as the outcome of a wager, Mr. C. A. Thompson, of Oxford drove his mare from Pugswash to Oxford, a distance of between fifteen and sixteen miles in exactly one hour. The wager only called for the performance of the journey in one hour and five minutes, but the wonderful piece of horseflesh that Mr. Thompson owned, only wanted an hour. That the mare did not run, men were placed all along the road to watch, and she only made one break. It was certainly a wonderful performance. The bet was for \$50 a side.—Amherst Press.

Guy Saunders has returned from a three weeks hunting trip on the Tobique having had excellent success. After being about four days on the left branch of the Tobique he ran across a magnificent bull moose, which he shot. He had a 4.7 Winchester and put four bullets into the big fellow. The moose weighed about 1000 lbs, and his spread of antlers was 5 feet 2 in. He is the 21st biggest moose taken on record. Mr. Saunders with an Indian, Steve Thomas, and a guide, Jim McGinn, of Three Brooks, was about thirty miles from any settlement. The Indian went out and got a team and they swamped a road to get the moose out. The Tobique, Mr. Saunders says, is literally filled with hunters. There are lots of cow moose to be seen, but the bull moose are not plentiful. The one he shot was all that Mr. Saunders saw. A Maniacan's Call to Duty.

The Hon. J. K. Ward of Montreal, a Member of the House of Commons, has recently published a paper entitled "The Call to Duty."

I see from this week's Montreal World that there is a paper circulating in the very same lines as the one I have just described. It is a paper which is published by the Montreal Daily Witness, and it is to be the only one of the kind in the world. That certainly is a very creditable thing for the Christian Church. Can any one doubt that such a paper must be an enormous asset on the side of pure rightness, justice, and every good and noble cause? Can you imagine how greater blessings that could come to this community in the presence of such a paper as this? Just imagine what it would be to have in this island, the Isle of Man, a newspaper absolutely free from personalities, stories of petty squabbles, and advertisements of anything that could be to the moral detriment of the people. I am sure for such a task a man of enormous courage and faith would be needed. But such a man did arise in our midst; would be such a call to duty to all Christian people as has hardly ever come to us yet. He would have great difficulties to fight with, but I wonder what right any of us would have to call ourselves followers of Jesus if we did not stand by him and see him through. Surely this is no mere utopian dream. It ought to be perfectly feasible. In the Christian profession is a quality of a man; if all or even a large portion of the Church members were to be governed by the rule "What would Jesus do?" they would make it quite possible for such a paper as the one described as existing in Montreal to live and flourish among us.

Christ begins his work with the individual, making a new man out of that new creation, all other good things are to come for others and for society at large. Retornamur in nosmetipsos.—Rev. Dr. Wright, B. A., in Maniac's Herald, Isle of Man.

Winnipeg's Need of Labor.

The statement of Mr. Mortimer, president of the Trades Council in Winnipeg, to the Trades Congress, is calculated to convey the impression that Galicians saw wood in Winnipeg for forty cents when another man would get \$1.50, has absolutely no foundation. The truth is that today, owing to the dearth of labor, some citizens are compelled to saw their own wood, and if fortunate enough to secure Galicians or Icelanders they have to pay from \$2.00 to \$2.25 a cord. Manual labor of all kinds is so scarce in Winnipeg that the development of the city is retarded, and the Trades Council has been justly invited to give the name of one man out of employment belonging to any organization and there has been no response. Railway contractors at present wanting 800 men are unable to secure one out of ten.

Danger in Cheap Spectacles.

A surprising number of people buy their glasses from vendors on the streets, says the New York Evening Post. They get glasses for 50 cents which seem to them as good as a pair they would pay \$5 for having made on an oculist's prescription, and they think they have saved money. Glasses acquired in all sorts of ways, by inheritance or exchange, from a friend, or even glasses found on the streets, are used to the detriment, even to the destruction of the wearer's sight.

"People seem to think glasses are like clothes," said an oculist the other day, "and if they are fully comfortable and look well they ask no further questions."

Another way in which people injure their eyes is through the use of cheap eye-drops. They try to remove their eyes from them. They try themselves, a friend tries a rub, the nearest drug store and the nearest optician are called on all before an oculist is consulted. The result is that the eyeball is often badly rubbed and scraped and in many instances permanent injury is done.

Election Card.

To the Electors of the Parish of Wilmot:

GENTLEMEN:—Having been solicited by a large number of my friends to allow myself to be nominated as a candidate in the coming election, I have at last consented to do so, hoping my views relating to parish matters in general will be so much in conformity with your own that you will not hesitate to give me a very generous support.

I am not in favor of taxing the county from \$20,000 to \$25,000 to build a retreat for the criminal classes, which would only be encouragement for those who violate the laws of our country.

I am in favor of a thorough investigation of all matters which may properly come before the council, and a prompt settlement of any claims due to or by the municipality.

I am also in favor of filling the county and parish offices with persons competent to perform the duties required of them, and only by persons qualified, otherwise as by law required. My temperance sentiment is too well known to need any comment. If I am elected I shall do my utmost to lower your taxes as much as possible, knowing as I do that with the low price of the farm produce and the increase of taxes from year to year that the burden of tax is now carried by those that till the soil may not become so heavy that they may become totally disheartened. Hoping that I may be one of the elect.

I am yours truly,
E. L. WEST.

Our TORNADO Threshing Machine

ADMITTED THE BEST.

We have a good many unsolicited letters like this one from M. Grant: CENTRAL SOUTHAMPTON, York, Co. 17, Dec. 1899.

CONNELL BROS. Woodstock, N. B.

DEAR SIRS.—As we are about through with this season's threshing and as I am aware you feel interested in the machinery you manufacture, no doubt it will be pleasing to you good reports of same. The TORNADO Threshing Machine manufactured by you that we bought from you in August last has proved to be the best Threshing Machine that has been in this section of the county. That is the unanimous verdict of every man that the machine has done work for. She has threshed for thirty men in this section, and men that never were satisfied before were more than pleased with the work the machine did they were satisfied they got all their grain and well cleaned, even the women were pleased because they did not have a crew of men around several days threshing a small quantity of grain.

The Machine has threshed this season about ten thousand bushels of all kinds of grain and I am happy to inform you that there was not one thing broken about the machine, not as much as a tooth. She has threshed over a bushel a minute, and with a suitable team, she will thresh 300 to 400 bushels a day. It is gratifying to me to congratulate you for perfecting and manufacturing the best two horse power Threshing Machine in the Dominion of Canada and may be in the world.

Wishing you a Merry Christmas and a happy New year, I remain,
Yours truly,
(Signed) H. C. GRANT
