If Subscribers remove to other places without informing the publisher, and the paper is sent to the former direction, they are held responsible.

COMMUNICATION.
For the Standard.
Mr. Editor,
It would be easy to deal with useless institutions if they could be separated from the men who encumber them. These are the *malum ingenia*, which, like accumulated ordure of the Augean stable, cannot be removed by any ordinary appliances. Nothing but an overwhelming flood of public indignation is adequate to the task. All Provincial experience evinces, that, in the mind of the legislator, the interest of the many weighs nothing against the interest of the individual. Men die—*institutions remain*.—A possible remedy for useless institutions would be to allow the incumbents to survive them. Time would wear out the temporary burden, and thus work a cure of an evil which is found to be impracticable by the ordinary method of seeking to get rid of both together. Union of the two is perpetuity. Separation would be eventual riddance of both. Submission to this penalty would be the great ultimate gain, and possibly would relieve the vested-right-men from the distressing apprehension that society was on the point of being dissolved. It is better the burden should for a time survive the institution, than that both should be endless.
This remedy, although a concession to the absurdity of affirming a vested-right in a public situation, it would be wise to adopt as a compromise, seeing that the probability of obtaining anything better is exceedingly remote. New Brunswick has been, and still is, sorely afflicted in this way, and there appears to be no escape but in submission to a temporary penalty for the sake of ultimate relief.

ECONOMY.
PARISH OFFICERS FOR ST. ANDREWS

STEAMERS.—The Woodstock Sentinel states that the Messrs Glazer have purchased the "Tarantula" from the Penobscot, and are in treaty for the "Huntress," to ply on the river St. John.

MURDER.—A man named Reardon, living in Cooper's Alley, was arrested yesterday, charged with causing the death of his wife. It appears that on Thursday last, Reardon demanded some money, which she refused, whereupon he attacked her, beating her very severely; he again renewed the assault a short time afterwards by knocking her head against the bed-post. A post mortem examination was held, and a large quantity of congealed blood found under the wound. The Coroner's Jury returned a verdict of murder against Reardon. [St. John Times.]

THE FEVER IN RIO JANEIRO.—By the Bremen brig *Wilhelmine*, which arrived at New York on Saturday from Rio Janeiro, we learn that the fever was on the increase on the 6th of February, and was raging with great virulence among the shipping in port.

THE SIAMSE TWINS.—The return of these famous personages into this busy world again, after a retirement in the forests of North Carolina of nearly twenty years, bids fair to excite no little interest. They may be expected in this city next week, and will commence their lectures immediately on their arrival. They are now naturalized citizens, and are the fathers of eleven native-born Americans. Presenting, as they do, an instance of two living men united in one, something without parallel in the history of the world, and with a world-wide celebrity, they will most assuredly draw crowds of the lovers of the wonderful. Chang and Eng

have many friends in this city who will be pleased to see them again before the public. [Boston D. Chron.]

TRADE OF THE PROVINCE.—On Saturday, Hon. Financial Secretary laid on the table of the House, reports of the imports and exports of this Province for the year 1852. By these it appeared that the state of our trade during the year 1852 was as follows:—
Imports £1,194,175
Exports 979,780
Balance against us £214,395

The amount of our exports of codfish was £168,000; of mackerel, £101,000; the whole amount of fish exported was £317,000, of which we imported £75,000 worth; leaving £272,000 worth of Nova Scotia production exported. Of the amount imported nearly £300,000 worth was exported again—so that the real exports of Provincial productions amounted to £227,892. [Halifax Recorder.]

THE LIQUOR LAW.—The Legislature Committee upon the petitions for the repeal of the liquor law, had a final meeting for action upon the matters presented to them, on Tuesday afternoon. After a long discussion, it was found that it was impossible for the committee so to harmonize as to produce one report, and consequently two reports from them will be presented to the Legislature. On the naked question of the repeal of the present law, the committee stood ten for, to twelve against the repeal. The reports will, we presume, be drawn up immediately. [Boston Courier.]

After the 1st of June, a new gold coin of the value of three dollars is to be issued from the mint, as provided for in the law of the session of Congress, changing the weight of small silver coins.

A marriage took place in Williamsburg, last week with the following peculiarities—the groom measured six feet four, and the bride four feet six. If it is not "the long and short" of matrimony, we don't know what is, that's all.

Mrs. Fillmore, wife of the late President of the United States, died a few days ago from a disease of the lungs.

THE DISEASES OF NATIONS.—Rev. Thomas Starr King, in his lecture on "Show and Substance," holds a post mortem examination over the remains of ancient nations, and finds they did not perish by the might of foreign conquerors, but by their own innate corruption.—Such would be the verdict of a Babylon died of delirium tremens; Nineveh, apoplexy; Persia, weakness of the spine; Greece, quick consumption; Rome, paralysis. The present characteristics of nations were bit off hastily thus: Ireland was flingy and dirty; France was troubled with Neuralgia and St. Vitus's dance; Spain had the scurvy; Austria was bad off with colics and cramps, that required the utmost nursing skill of the Russian Czar; Germany was subject to the gout and headache; England had a plethora; while even in our youthful nation, signs of a cancer might be seen on our limb. [Am. Pap.]

"How sweet is social affection! When the world is dark without, then we have light within. We forget the world, with all its animosities, while blest with social kindness. That man can not be unhappy who has hearts that vibrate in sympathy with his own; who is cheered by the smile of tenderness and the voice of affection. Let the world be dark and cold; let the indifference or hate of men gather about him in the place of business; but when he enters the ark of his own cherished circle, he forgets all then, and the cloud passes from his brow, and the sorrow from his heart. The warm sympathies of his wife and children dispel every shadow, and he feels a thrill of joy in his bosom, which words are inadequate to express. He who, on the other hand, is a stranger to the joys of social kindness, cannot be said even to have begun to live."

Do not sit dumb in company. That looks either like pride, cunning or stupidity. Give your opinion modestly, but freely; hear that of others with candour; and ever endeavour to find out and communicate truth. When a witty English gentleman, defunct, after his recall, was asked, on his arrival home, if he left India on account of his health, he replied: "They do say there's something wrong in the chest."

BACKBITING.—I hate to hear people talk behind one's back; as the robber said when the constable called "stop thief."

How much more of true, genuine happiness there would be in the world, if the lesson imparted in the following sentences was more generally heard. Alas! when it is too

late; "when the cares and coldness of the world come withering to our hearts, and we learn how hard it is to find true sympathy," then it is, and too often then only, that we realize the blessings we have slighted, the opportunities we have wasted.

LORD ERSKINE'S ESTIMATE OF THE SCRIPTURES.—"For my own part, gentlemen, I have been ever deeply devoted to the truths of Christianity, and my firm belief in the Holy Gospel is by no means owing to the prejudices of education, (though I was religiously educated by the best of parents,) but it arises from the most continued reflections of my riper years and understanding. It forms at this moment, the great consolation of a life which, as a shadow, must pass away; and without it, indeed, I should consider my long course of health and prosperity, (perhaps too long and too uninterrupted to be good for any man,) only as the dust which the wind scatters, rather as a snare than as a blessing. [Trial of Williams for publishing Paine's Age of Reason.]

NEW-BRUNSWICK.
PROVINCIAL PARLIAMENT.
HOUSE OF ASSEMBLY.

April 4.
Mr. Farrelow brought in the Report of the Committee on Trade. Report on 49 petitions. Reports of other Committees were brought in.

On motion of Mr. Smith, the House was put in Committee on the Bill to repeal the duty on Hachmats. The debate lasted several hours; a motion, by Mr. Earle, to postpone it for three months was carried, 21 to 17.

A grant to Arthur Ritchie to reimburse him an amount paid for certain lands, for which the Grant did not issue, was lost.

The bill to amend the Charter of the Agricultural Bank Company, was lost in the Committee.

April 5.
Mr. Gray submitted the Report of the Committee on Internal Navigation.

Mr. Taylor moved for leave to place £129 on the Supply Bill for Mr. Boyd's pay and travelling charges for two years that he was kept out of his seat—not granted.

The House in Supply.—
Mr. Porter moved for a grant of £300 to the Seminary at St. Stephen.

Hon. Secretary warmly supported the grant; a number of spirited individuals at Milltown had erected a Building at a cost of £1600. He had witnessed an examination of the School, and had never been so delighted.

Hon. Mr. Gray was not prepared to support the claim, as he thought it was understood last year that no further demand would be made. At the same time, he felt proud to be able to bear testimony to the admirable state of the institution.

Capt. Robinson spoke in eulogistic terms of the School.

Mr. Taylor was in favour of a sum not exceeding £150. Mr. Porter described the School, as in a complete state of discipline and organization, with upwards of 200 scholars attending.

Mr. Harding objected giving bounties to large schools, which are capable of supporting themselves; the revenue of the present school is £500 annually; that is a handsome amount; he would prefer assisting the poor parish school teacher, in preference to these who are not required to make returns, nor have their intellect taxed respecting their capability.

Mr. Johnson was not prepared to support it, but as soon as a system is introduced to establish a new school in every County in the Province, he will cheerfully go with it.

Mr. McPherson alluded to the grant allowed the Sackville Academy, and argued the propriety of giving an equal sum to the St. Stephen's Academy, which was one of equal importance. Mr. Williston had a return of the school at his lodgings;—the school was in a most efficient state, and he would cheerfully substantiate the claim.

Mr. Botsford would support the school claim—the fact that 18 children attended this British school from the United States, spoke volumes in behalf of its utility.

Hon. Secretary would move £100 for the school; that is the amount granted to grammar schools.

The question being taken on the Resolution, it was decided in the affirmative. It was then moved to fill the blank with £150, to which £100 was moved as an amendment. The question being taken on the amendment, it was decided in the affirmative.

On motion of Mr. Goddard it was resolved that the Supply book should close on Saturday week.

The Bill to incorporate the St. Stephens Gas Company passed the Council, and was sent down for the concurrence of the House. A Bill to continue act Banks, and Banking,

brought into the Council by Mr. Hill, was thrown out after a protracted debate.

GETTING MARRIED.
During the last summer a little incident transpired to one of the eastern towns, which afforded some amusement to the spectators at the time, and furnished food for a considerable gossip the reader. It occurred in church, on one of those quiet Sunday afternoons, when all the world seems fast ready to drop asleep; when the flies buzz lazily on the window-panes, and the dog lies quietly on the door-stone.

The afternoon services had ended and the congregation were arranging themselves for the benediction, when to the great astonishment and manifest interest of the worshippers, the good parson descended from the pulpit to the desk below, and said in a calm, clear voice, "Those wishing to be united in the holy bonds of matrimony will now come forward." A deep stillness instantly fell over the congregation, broken only by the rustling of silk as some pretty little girl or excited matron, changed her position, to catch the first view of the couple to be married. No one, however, arose, or seemed in the least inclined to arise. Whereupon, the worthy clergyman, deeming his first notice unheard or misunderstood, repeated the invitation in the holy bonds of matrimony now come forward.

Still no one stirred. The silence became almost audible, and a painful sense of the awkwardness of the position was gradually spreading among those present, when a young gentleman, who had occupied a vacant ship in the broad aisle during the service, slowly arose and deliberately walked to the foot of the altar. He was good looking and well-dressed, but no one present knew him, and no female accompanied his travels.

When arrived within a respectable distance of the clergyman, he paused, and with a reverent bow stepped to one side of the aisle, but neither said anything or seemed at all disconcerted at the idea of being married alone. The clergyman looking anxiously around for the bride—who he supposed was yet to arrive—at length remarked to the young gentleman, in an undertone, "The lady, sir, is dilatory!"—Very, sir!—Had we not better defer the ceremony?—I think not. Do you not suppose she will be here soon?—No, sir, said the astonished shepherd, "how should I know of your lady's movements? That is a matter belonging to yourself."

A very few moments more were suffered to elapse in this unpleasant state of expectancy, when the clergyman renewed his interrogatories.

"Do the lady promise to attend at the present hour, sir?"—What lady?—Why, the lady, to be sure, that you are waiting here for?—I did not hear her say anything about it, was the satisfactory response.—Then, sir, may I ask you why you are here, and for what purpose you thus trifle in the sanctuary of the Most High?—said the somewhat enraged cleric—I came sir, simply because you invited all those wishing to be united in the holy bonds of matrimony to step forward, and I happened to entertain such a wish! I am very sorry to have misunderstood you, sir, and wish you a very good day.

The benediction was uttered with a solemnity of tone very little in accordance with the twitching of the facial nerves; and when after the church was closed, the story got wind among the congregation, more than one little girl regretted that her wishes had not been as boldly expressed as the gentleman's who had really wished to be "united in the holy bonds of matrimony."—N. O. Picayune.

GOLD IN JAMAICA.—A Jamaica paper says:—"We saw on the most perfect authority that several lumps of gold, have been picked up in Hector's River, forming the boundaries of Manchester and Trelawny, and that they have been forwarded to Kingston to be analysed. The Crown Surveyor for Cornwall, is about starting for the spot to investigate the truth of the reports, and will explore the River, over which to prevent diggers, there has already been placed a restrictive guard."

In reference to the precious metal we state, that a Coolie during the past week, made application for assistance to recover from another Coolie a large lump of gold which he said he picked up near Wilshire Estate, in his parish, and which, he asserts his fellow labourer was to give him a very considerable sum in money for.

HEAVY ROBBERY.—Some time during Saturday night, the jewelry store of O. S. Forsyth, No. 345 Fulham street, was feloniously entered through the rear door, by boring out one of the panels, and robbed of from \$2000 to \$1000 worth of jewelry, consisting of gold watches, card cases, breast-pins, pencils, pins and eye-glasses. The burglars managed to escape with their booty, leaving behind them a jack knife and a dark lantern. This is the second time this place has been robbed. [N. Y. Express.]

MAN STABBED.—About one o'clock on Sunday morning, a man named John Britt was stabbed in the side, with a knife, by some person at present unknown. The wound was inflicted in the right side, and is about three inches in extent. It is feared that he cannot survive. According to his statement, he was standing on the corner of Tilly and Stanton streets, when a man passing noticed the wound, and then ran off, no words having passed them. A man named Cokk has been arrested on suspicion. [N. Y. Pap.]

A TRIPLE LIGHT AS AIR.—The following is a reprint of a very quaint story, as it appears in the "Melbourne Argus."

Who played the Organ? Mr. I. Blewit who has been always celebrated, from the early age of eleven, for his extemporaneous performance on the organ, on one particular occasion attracted the notice of the celebrated Sam Wesley, who, after expressing his admiration of the superior style of his performance to some of his friends near him, and not being able to satisfy himself who the person was, considered it best to apply to the man who blew the organ. He appealed to this great functionary, and putting the simple question to him of "Who played the organ?" Received the following laconic answer—"I blew it." Wesley, considering this a great liberty of this mighty puffer, repeated the question of "who played the organ?" when he received the same answer, given with greater pertness. Wesley, indignant at the fellow's seeming rudeness, said: "I'll do not sir, doubt your ability as a blow-bellows, but I wish to know (giving an intimation with his fingers, being himself the greatest organist of the day) who played the organ?" The wag still persisted, saying: "This is the third time, sir, I have told you, I blew it; and I will tell you no further." Then putting on his great coat he left the gallery. Wesley, when he got to the door, inquired of some of his friends who played the organ? when he was told I. Blewit! and being the wit of this facetious fellow, turned round and gave him a shilling, saying, "You are the best puffer I ever met with; and no man here qualified to handle such a subject—Dwight's Journal of Music."

The Duchess of Orleans is about to contract a moribund (left-handed) marriage with an Ail de lemp of her late consort; and the Countess de Montijo (the Empress' mother) is about to marry again.

Queen Victoria's splendid jewel, the Koh-i-noor, (or Mountain of Light) has been cut and set in a circle of brilliants, at a cost of £2000. When in the Exhibition at the Crystal Palace its dingy appearance disappointed all who looked at it.

European Intelligence.

NEW YORK, April 5.—The Collins steamer *Arctic*, with Liverpool dates to the 23d ult. arrived this afternoon. The markets for Cotton and Flour much as last reported. The London money market had been somewhat depressed, but closed firmer. Consols for money 99½, and for account 98½ to 99.

Parliament has adjourned over the Easter holidays.

A letter from the French Minister of Marine in reply to one addressed to him by Mr. Ewart, M. P., is published in the English papers. It gives assurances of the most pacific intentions of the French Government, and considers that serious misunderstandings between the two Governments would be one of the greatest misfortunes.

A fire broke out on the 19th, in the Prince of Wales Tower, in Windsor Castle. Several rooms in the occupation of the Royal Family were badly burned.

Continued strikes of mechanics and working classes are taking place, and an advance of wages was being obtained in various trades.

FRANCE.—Rumors were current that the coronation would take place at Rheims. The war steamer *Napoleon* was to be supplied fitted up and despatched to convey the Pope to France.

M. Michel de Bourges, the well known republican, is dead.

NEW-BRUNSWICK. PROVINCIAL PARLIAMENT.

HOUSE OF ASSEMBLY.

The Election Bill was committed and occupied all day. It was introduced by Mr. Street.

Messrs. Johnston, English, and Cutler opposed.

Mr. Needham was in favour of Universal Suffrage, Ballot, &c., he did object absolutely to the appointment of Commissioners to try disputed elections.

Mr. Boyd thought the Bill not such as was required, but could be amended.

Mr. Gray spoke in support of the Bill, argued in favour of the clause regulating the franchise, and appointment of commissioners. He argued against qualification by assessment and quoted speeches of Messrs. Johnston and Howe to show it worked badly in Nova Scotia, this would lead to Universal Suffrage, to which he was opposed.

He spoke of the ballot as a principle to which he has no special objection, but quoted authorities to show difficulties in the ballot leading to fraud, &c.

Progres reported.

A Bill to authorize the Commercial and other Banks to issue small notes, passed the Council.

The Attorney General brought in a Bill to amend the Act relating to inland postage. It refers to postage of Books and pamphlets.

Mr. Robinson brought in a Bill to amend the Act of the Saint Andrews Railway Company.

Several reports of Committee were brought in.

April 7.

The Bill to protect the Coast Fisheries was committed in the House and discussed. Progress reported.

Mr. Taylor moved an address to His Excellency the Lieutenant Governor to discontinue the law suits on the lands of Glasgow and others for timber, which was cut on disputed territory. The subject was discussed and the motion withdrawn.

The House then went in Committee and passed a joint address of both Houses to Her Majesty the Queen in regard to the Colonial Fisheries.

The Election Bill was again recommitted, and a long discussion ensued. It has been discussed two days, and only twelve members have spoken on it—nine in opposition and three in support. Progress was again reported.—[M. Times.]

Two fugitive slaves—husband and wife—have arrived in Canada. The female is said to be a beautiful and accomplished woman, and is the brother's daughter of Mr. King, the Democratic Vice President of the United States, by a favorite slave. Three clerics for "Liberty and the Constitution!" Uncle Sam, what a price that ore Nigger!

The Fredericton Cathedral is now approaching its completion, and will, we learn, be opened for the celebration of Divine Service next August. It is a beautiful specimen of the old Gothic style, and the excellence of the workmanship, as well as the richness and durability of its materials are subjects of admiration. We recollect a time when our smart neighbours in St. John thought it quite certain, that because Fredericton was not composed of limestone rock, the foundation must be very doubtful; but our whole experience of Fredericton, now confirmed by the steadfast condition of the Cathedral, proves that it is capable of bearing the weight of the heaviest superstructure. Long may the discipline, doctrine, and usages be maintained in this noble Edifice, prove its spiritual foundation to be based upon the Rock of Ages!

In connection with the above, we notice that the Episcopalians are about to erect a Stone Church in the neighbourhood of Pickard's Mills, in Douglas.—[Fredericton Reporter.]

The ANNEXATION OF PEGU BY THE BRITISH.—The National Intelligencer says it has been furnished from an authentic source with a copy of the decree of the Governor-General of the British East India, annexing the extensive province of Pegu to the British East India Dominions. The decree is published from the quarter deck of the frigate

"Fox," and dated 20th December, 1852.—The province of Pegu borders on China, and is of immense importance to England.

ATMOSPHERIC TELEGRAPH.—We learn from the Boston Post, that Mr. L. S. Richardson has invented a machine, the operation of which was witnessed by a company of scientific gentlemen and members of the press on Saturday, at room No. 24, Merchants Exchange, for the transportation of letters, packages, &c. The vehicle for transport, as experienced upon, is a lead tube, one inch in diameter, and twenty feet long. The letter package to be conveyed is folded and placed in a bag attached to a plunger and is propelled by pressure of air. The plunger is so arranged that the air cannot pass it.—An Atmospheric Telegraph Company has already been formed, and a line is to be erected between Boston and New York, having stations at Worcester, Springfield, &c. Mr. Richardson is very confident that by means of the tube, letters can be conveyed to New York in fifteen minutes or as speedily as business is now done by telegraph.

We have reason to believe that a very numerous signed requisition from all parts of the County of Carleton has been forwarded to the Hon. Chas. Connell, requesting him to resign his seat in the Legislature Council and resume his place in the popular Legislature as representative for Carleton. As Mr. Connell went into the Council in accordance with the wishes of his County, we suspect he will feel compelled to act in accordance with the general expression of what is best calculated to advance the interests and suit the wishes of the good people, with whose interests and wishes he has been so long and so intimately connected.—[Head Quarters.]

MILITARY.—We understand that the 7th Highlanders, at present stationed in this Province, are in the expectation of being ordered to Halifax on the opening of the river navigation, and that they will be replaced by the 76th Regiment.—[New Brunswick.]

Last year the Legislature passed an Act, making it unlawful for any School Teacher to apply for a grant until his case should first be approved of by the Board of Education. This year the House of Assembly has appointed a Committee to report upon this same unapproved class of petition.—[Fred. Reporter.]

Mr. Barnham, of Boston, sent Queen Victoria some fine Shanghai fowls. The illustrious lady has sent the gallant Bostonian, a letter of thanks with her portrait.

A very distressing and fatal accident occurred in this city on Saturday evening last. Two young boys about 13 years of age, one a son of T. D. Harris, Esq., and the other of T. W. Birchall, Esq., had got hold of a pistol and were practising at a mark in a back yard, when unfortunately the pistol went off while in the hands of young Harris, and the contents passed through the body of Birchall, causing the poor lad's death in a short time.—[Toronto Patriot.]

THE LEGISLATURE OF NOVA SCOTIA was closed on Monday the 14th inst., by His Excellency the Lieut. Governor, with the following Speech:—

Mr. President, and Honorable Gentlemen of the Legislative Council;

Mr. Speaker, and Gentlemen of the House of Assembly:

While relieving you from further attendance on your Legislative duties, I cannot but congratulate the country on the valuable results of a Session, during which, measures of paramount importance to the general welfare of all classes of her Majesty's subjects in this Province, have been originated and matured.

I look forward to their final and successful accomplishment, in the confident hope that these undertakings will stimulate the energies of the people to additional exertions in developing the vast natural resources of their country. Though differences of opinion, conscientiously entertained, delayed the passage of the Railway Bills originally introduced, I rejoice that by the measures finally agreed on, conceived in a conciliatory spirit, honorable alike to the Legislature and to the Province, ample provision has been made for those great Public Works, for the completion of which the people of Nova Scotia have evinced a lively interest.

The net for regulating the practice and procedure of the Supreme Court, will ever distinguish the present Session. Sanctioned by British experience—framed by a Commission, including the best judicial and legal talent of the Province, and carefully reviewed by the Legislature, this law will not only effect vast improvements but alarm no prejudice by an apprehension of ill considered or hasty innovation.

Mr. Speaker, and Gentlemen of the House of Assembly;

In Her Majesty's name I thank you for the very liberal grants you have made for the public service.

Mr. President, and Honorable Gentlemen of the Legislative Council;

Mr. Speaker, and Gentlemen of the House of Assembly:

In the measures adopted for the protection of the River Fisheries—the erection of a Lunatic Asylum—the introduction of improved Breeds of Stock—the establishment of permanent supervision over the Great Roads of the Province, and for the promotion of other works of public utility, the spirit of enlightened Legislation will be recognized; while the people of Cape Breton cannot fail to perceive, in the liberal appropriations made for opening the St. Peter's Canal,

and for connecting them by regular steam communication with the rest of the Province, proofs of a very sincere desire to elevate the condition of that fine Island.

In returning to your homes, where your example is not without its influence in diffusing a spirit of loyalty and cheerful confidence in the Institutions under which we live, be assured that it shall be my care to make your Legislation effective, and to watch with vigilant supervision over the great interests committed to my charge.

HORRIBLE!—The Church Times states, that no less than four cases of child murder have occurred in Halifax within four weeks! and asks, have any steps been taken by the authorities to ferret out the barbarous perpetrators of a crime which would disgrace the cannibals of the Fœge Islands.—[Halifax P.]

MAN MURDERED BY HIS SON.—Thomas Henderson, jr., has been committed to jail in Prince Edward Island, to take his trial for the murder of his father. The deceased, who was an aged man of eighty-six, and very infirm, is stated to have been so cruelly beaten by his son in some altercation which took place between them, that he died in a few days from the effects of the blows.

THE STANDARD.

WEDNESDAY, APRIL 13, 1853.

COMMON PLEAS.—The Court of Common Pleas and General Sessions of the Peace, was opened here yesterday (Tuesday).—His Worship Justice Wilson presiding. In his Honor's charge to the Grand Jury, which was brief, he alluded to the abundant crops which had crowned the labors of the husbandman last season—to progress made on the rail road works—and concluded with some observations on the liquor law which is to come into operation in June next. We learn that there are but few causes entered for trial, and that there is every probability of the sittings of the Court being brought to a speedy termination.

ST. STEPHEN'S ACADEMY.—We have received a pamphlet, purporting to be a "Catalogue of the St. Stephen Academy," from which some idea may be formed of the success which has attended the praiseworthy and philanthropic endeavours of the Trustees to provide an institution where the youth of this County may obtain a liberal education, without being sent to a distance from under the eyes of their parents or guardians.—The Academy is situated in Milltown, St. Stephen, one of the most delightful and healthy localities in the Province; the building is well ventilated and convenient; it is a tasteful piece of architecture, and is not surpassed by any similar edifice in New Brunswick, costing we believe £1,500. On looking over the list of students, we were gratified to notice the names of a large number from the State of Maine; this fact in itself speaks volumes, and should recommend the institution to the notice of parents in the Province, for "when scholars can be drawn from the boasted schools of New England, there must be some attraction in the St. Stephen Academy." The total number of pupils at present is 200. Is Dole, M. A., is Principal, with a staff of well qualified and efficient assistants, comprising five male and three female teachers. The course of study embraces the Primary Department, lower English Department, Mathematics, Geography and History, Natural Science, Morals, Mental and Moral Science, Rhetoric and Logic, French, German, Italian, Spanish, Latin, Greek, Music and Drawing. From the Trustees' report we observe—"that by the liberality of a grant from the Legislature, they have been enabled to procure apparatus to the value of \$250, for the illustration of Natural Philosophy; and they design to make adequate provision for other branches of natural science, as the wants of the school shall demand." We were pleased to notice, that, during a debate in the Legislature, (a synopsis of which is given on first page,) the Hon. Provincial Secretary spoke in laudatory terms of the Academy, and bore testimony to its efficiency and claims to public support. We trust that this institution will receive that countenance and patronage, which it so deservedly merits. In a future number we may have something further to say upon this admirably conducted Academy.

NEW FIRE ENGINE.—The new Engine and hose carriage, built in New York for the Firewards here, arrived last week, and was landed "in good order and well conditioned," as per bill of lading. The newly formed company, whose services have been accepted to man the engine, took charge at once, and after having put it together, run it down the street in gallant style, and lodged it in the present temporary building. Several trials were made of its power in throwing water, which we are happy to say have proved the engine to be a superior one. We cannot say as much for the hose, which burst in one of two places; these defects, however, can soon be remedied. The fire company is an excellent one, composed of young men belonging to the town—with J. Little, captain, H. Ames, 1st lieutenant, and Geo. Moore, second lieutenant. Should their services be required, we are safe in saying they will prove themselves equal to the task, as the company is composed of hale, hearty, spirited young men, who are neither afraid nor ashamed to work, and are both able and willing.

THE FAVORITE STEAMER "James Porter," commenced running on the river last week. She has been fitted up during the winter—eighteen feet were added to her length, making a decided improvement in her speed, and rendering her easy in motion. She is commanded by our old friend, Capt. Michener, one of the most popular Masters. She runs daily between Calais and Eastport, touching at St. Andrews, and connects with the Boston and St. John Steamers.

NEW PAPER AT ST. STEPHENS.—On our first page we have copied the Prospectus of a Weekly Newspaper to be published at St. Stephen by Mr. J. G. LORIMER. We have also in our possession, a Prospectus of Mr. LORIMER's stating his intention of publishing a Paper at Chatham, Miramichi. We presume he has abandoned the latter idea. If so, we will extend to him the right-hand of fellowship, should he come amongst us. There is no denying the fact, that there is an opening at St. Stephen for a Newspaper, and that it would be well patronised. Come along, old friend; we will be happy to see you once more in Charlotte County—and wish you success.

NEW BUILDINGS.—We are pleased to notice that active preparations are in progress for the erection of new stores and dwellings. A number of laborers are at present excavating for cellars.

ST. ANDREWS & QUEBEC RAILROAD.—The locomotive "Pioneer," has commenced running daily. It is reviving to hear the sound of the shrill steam whistle—clear the track.

ORNAMENTAL TREES.—As the season is near at hand, when trees should be set out, we suggest to the authorities of our Town, to purchase a few hundred ornamental trees, such as elms, horse chestnuts, Locusts, Larch, &c., and have them planted at proper distances on each side of the principal streets, or at least some of them; and also around the public squares, with proper guards to protect them from being injured by cattle. This might be done at a comparative trifling expense, and would be a great improvement as well as add to the appearance of our streets. The plan of setting out trees has been adopted in Boston and other large cities, and gives the streets a picturesque appearance. In the village of Milltown, we observed some months ago trees set out on the side walks which had a very pleasing effect and added materially to the looks of the place. Many of our forest trees would answer the purpose—elms in any quantity can be obtained at Digdeguash, and horse chestnuts, oaks, and ash can be raised here as well as in Massachusetts. Our neighbours S. H. Whitlock Esq., and L. Donaldson Esq., have native grown chestnuts elms &c., raised from seed, and what one can do, another may. We trust these hints will meet with that prompt attention, which we believe they merit.

THE STEAMER EASTERN CITY, having been put into perfect order and received a new boiler, will leave Boston on Friday next for St. John, and return on Tuesday, touching at Eastport, Portland, for Boston.

VOTE BY BALLOT.—The Legislative Council in Nova Scotia, amended the Election Bill when it came before them, on the 24th ult., after having passed the Lower House, by introducing "the Ballot," which was almost unanimously supported.

WONDERFUL PASSAGE FROM BOSTON.—The ship *Shind*, arrived at this port from Boston on Saturday last, making the shortest passage on record, between the two ports, viz: twenty-five and a half hours. The *Shind* was the ship that picked up at sea, a short time since, three of the boats belonging to the ship *Golden Light*, with 22 persons on board, including three ladies.—[Morning News.]

Liver Complaints, and
CONSUMPTION.
DO NOT NEGLECT IT.

CONSUMPTION.
Can be and as been cured in thousands
of cases by this only certain remedy.
JUDSON'S CHEMICAL EXTRACT OF
CHERRY AND LUNGWORT,
and no remedy has ever before been discov-
ered that will certainly

CURE CONSUMPTION.
The most strongly marked and devel-
oped cases of Pulmonary Consumption
where the lungs have become diseased and
degenerated and the case so utterly hope-
less, as to have been pronounced by Physicians
and friends, to be past all possibility of re-
covery, and at times thought to be dy-
ing, has been cured by this wonderful remedy,
and are now as well and hearty as ever.
It is a compound of medicaments which are
peculiarly adapted to and essentially neces-
sary for the cure of

COUGHS AND CONSUMPTION.
Its operation is mild, yet efficacious; it
loosens the phlegm which creates so much
difficulty, relieves the cough and assist-
nature to expel from the system all diseased
matter by excretion, producing a most de-
lightful change in the breathing and chest,
and this, after the prescriptions of the very
best medical men and the ingenious dis-
cussing friends and Nurses, have failed
to give the smallest relief to the Con-
sumptive sufferer.

THOUSANDS OF CONSUMPTIVE
persons have been deceived in buying me-
dicines which were said to be infallible
cures, but which have proved only pallia-
tives, but this medicine is not only a pallia-
tive but a cure for ulcerated lungs. It con-
tains no deleterious drugs and one that will
prove its astonishing efficacy better than
any assertions or certificates in curing con-
sumption and all diseases of the Lungs,
such as Spitting of Blood, Coughs, pains
in the side and chest, night sweats, &c. &c.

About 1000 certificates of almost miracu-
lous cures, performed by this medicine,
from some of the first Doctors, Clergymen
and Merchants, have been sent us for this
medicine, but the public in other looks
too much like Quackery, [will show them
to any person calling at our office.] This
medicine will speak for itself and enough
in its own favour wherever it is tried.

Caution.—This medicine is put up in a
large bottle and you must find the name of
Comstock & Brother, Proprietors, New
York, on the splendid Wrapper around the
bottle. All orders must be addressed to
Comstock & Brother, No. 97 John St.,

CARLTON'S FOUNDER OINTMENT.
For the cure of Founder, Split Hoof,
Hoof bound, Hooves, and contracted and
Feverish Feet, Wounds, Bruises in the flesh,
Caked Backs, Caked Heels, Scratches,
Cuts, Kicks, &c., on horses.

CARLTON'S RING BONE CURE.
For the cure of Ring Bone, Blood Spavin,
Bone Spavin, Windgalls, and Splint—a
certain remedy.

CARLTON'S CONDITION POWDERS
FOR HORSES AND CATTLE.
The changes of weather and season, with
the change of use and feed, have a very
great effect upon the blood and sinuous
fluids of horses. It is at those changes they
require an assistant to nature to throw off
any disorder of the fluids of the body that
may have been imbibed, and which, if not
attended to, will result in the Yellow Water,
Heaves, Worms, Bots, &c. All of
which will be prevented by giving one of
these powders, and will at any time cure it
when any symptoms of disease appears in
used in time. They purify the blood, re-
move all inflammation and fever, loosen the
skin, cleanse the water, and invigorate the
whole body, enabling them to do more work
with the same feed. The action of these
powders is direct upon all the secretory
glands, and therefore have the same effect
upon the Horse, the Ox, the Ass, and all
Herbivorous animals—all diseases arising
from or producing a bad state of the blood,
are speedily cured by them.
