## THE COURIER.

- MONDAY, AUGUST 26, 1850.

Just before our last paper went to press, we mentioned that a ferce conflagration was raging in the very heart of our City, and that it had at that hour effected a testible amount of damage. We now proceed to give such particulars as we either witnessed in person or obtained from trustworthy

witnessed.

In the fast place, then, the fire, which broke out in the loft of a stable occupied by Mr. Shepherd, on the premises of the widow of the late Mr. James Turner, in Craig Street, was without doubt the work of an incendiary, for we are told that a lady living in one of the houser opposite saw a man escaping over the high feace of Mrs. Turner's yard, just as the alarm of fire was given. The torch ence applied, from the combustible material of the sheds and stables themselves, the loft too being full of key, the fames rose with wonderful decement and rapidity, and almost immediately communicated to the rear of the premises in St. Urbain Street, occupied by Mr. George ines in St. Urbain Street, occupied by Mr. George mises in St. Urbain Street, occupied by Mr. George Armstrong, Cabinet Maker, completely destroying them in a few minutes, and with them the whole of his furniture, stock in trade, tools, and clothes, the immates escaping in their night dresses. The wind being in the contrary direction, the fire did not communicate to any of the 1 opposite houses in St. Urbain Street, but aproad with great fury in the direction of the St. Lawrence Main Street, sweeping away every house on the North side of Craig Street, from St. Urbain Street to Permult's buildings, with two solitary exceptions—the Houses of Mr. Pabre, the Mayor Olivier Gariepy..... of the City, and of Mr. Berthelet. With one te-markable exception, a small wooden house in St. Girard. Charles Burromee Street, and another in a court at its rear, with the houses between that and the corner of Vitre Street, every house is destroyed in the space bounded by Craig Street on the South, Vitre Street on the North; St. Urbain Street on the West, and Perrault's buildings on the East—the great majority of these houses being substantial stone or brick buildings, let at high rents, and occupied by respectable people. Among the houses and premises destroyed on Craig Street,

The Champ de Mars one might have funcied the centre of a sacked city it was covered from one end to the other with promiscuous h age of furniture, and groups of terrified women and children, while here and there the ruddy glow of the famouglanced from the bayeness of the sentionic placed to protect them, making a fine subject for the pencil of some usan who knows how to paint a picture. The fire broke out at about half part ten at high and its progress was not stayed till near feer in the morning, during which time the following issues were destroyed, as meanly as we can learn at the

The Character of the lower blottes of the lower blo within a limited period, has been expended in their construction and equipment. According to the calculations supplied in the work before us, there were in operation at the commencement of 1849, in different parts of the globe, a total length of 18,656 miles of Railway, on which a capital of £369,567,000 had been actually expended. Besides this, it is estimated that there were at the same epoch, in progress of construction, a further extent of 7,829 miles, the cost of which, when completed, would be £146,750,000. Thus, when these latter lines shall have been brought into operation, the population of Europe and the U.States(for it is there only that Railways have made any progress) will have completed, within the period of less than a quarter of a century, 26,485 miles of Railway; that is to say, a greater length than would completely surround the globe, at a cost of above £500,000,000 sterling. To accomplish this stupendous work, human industry must have appropriated, out of its annual savings, £30,000,000 for 25 successive years! Of this prodigious investment the small spot of the globe in which we inhabit has had a share which will form not the length aff Railways in actual operation in all parts of the globe, it supportion of the sniles amount of Railways capital contributed by Sritish industry is even more remarkable. It appears that of the entire amount of capital expended on the Railways of the world, £54 in every £100, and of the capital to be asypned on have a propriated to British Railways!—English paper.

ACTION AGAINST THE SISTEMS OF MERCY.—
ACTION AGAINST THE SISTEMS OF MERCY.—
At the Galway Record Court, yestering week, the
case of McDonnell is. White was tried. The action was brought by the administrator of Mrs.
Eliza McDonnell, to recover the sum of £500 given
by her to the Sistem of Mercy, in the town of Galway. The circumstances were these :—in March1846, Miss. Harrier McDonnell, daughter of Mrs.
McDonnell, being desirous of becoming a nun
of the order of the Sistems of Mrs. McDonnell,
called at the Couvant of Mrs. McDonnell,
called at the Couvant of Mrs. y to inquire as to the
terms of the Couvant of Mrs. With the Nuns.
Mrs. White, the mother ashess, stated that it was
shouldly reconsery that Miss McDonnell should

dome money on very favorable terms. Mis. Mc-Dounell agreed to give them the money, on their undertaking to return it in case either her daughter should wish to leave the convent before the regular time of her profession, as stated by themselves, or in case of her death before then; they agreed to give the atrongest guarantee to that effect, and Mrs. White entered into the following agreement:

"Mrs. Eliza McDonnell,—Madam, you have handed the Rev. Peter Daly, on behalf of the Sistem of Mercy, 2500 sterling, the sum agreed to be received for your daughter, Harriet McDonnell, on her being a professed nun in this community,—which sum we engage to return you free of interest, should either the nunser your daughter change their minds before the period of her said profession arrives, or in the event of her decease before then. A shella White." In the month of August 1847, Miss McDonnell took a malignant fever 1 after all hopes of recovery were over, the nuns had her professed a nun, they gave no notice to her family of her illness until she was past recovery. They now contended that as ahe was professed on her dying bed, they had complied with the agreement. The jury found a verdict for the plaintiff for the sum claimed.

Ac. 1, Princess Street, Bank, London. CAPITAL-ONE MILLION STERLING. mpowered by Special Act of Parliame 4 Vict., Chap. 9. REDUCED RATES OF PREMIUM—HALP CREDIT RATES OF PREMIUM.

THE great and decided success which has attended this Institution, has induced the Directors to REDUCE the RATES originally required in British North America, to the ordinary European Rates. The result of such Reduction is to enable parties to avail themselves of the important benefits to Life Assurance at such lower Rates of Primition than those of any other Assurance Company & anascting husiness in Canada.

The Directors have also assolved to extend to British North America the advantages afforded by the HALF CREDIT RATES of PREMIUM which have been so highly approved, and are so generally adopted by Policy Holders in the United Kingdom. LUXURIANT HAIR,

Boolg's Hyperion Pluis.—One buttle of this truly valuable liquid is worth more than its weight in gold. There is no quackery in its composition; but healthy more efficacious ingredients, caicalated to effect all that it processes. Baldness will at once depart, and a luxuring growth of hair take its place. Each hair will return to its pristine brilliance—weak hair become strongand vigorous, and the skin take a proper and healthy action by the use of the inestinable Hyperion, As an article for giving softness to the hair, and a brilliant gloss, it cannot by any compound be equalled.
