Monday, Aug. 6th 1866 CHAIN-GANG BREAK .- A serious " break"

from the New Westminster chain-gang took place one day last week. The Columbian says: "Two of the gang, named Gartland and Ross. the former being the man convicted of stealing from the dump-box of the Ericsson claim, Cariboo, and the latter one of the robbers caught at Lytton, overpowered the guard and seizing his rifle and pistol, ran towards the river and started across in an Indian cance. The river being rough the canoe was upset, and the run-aways thrown into the water. Three Indians immediately went out into a canoe and picked them up, but the rascals turned upon their rescuers and drove two of them out of the canoe into the river. The third Indian upset the canoe and plunged the convicts again into the stream, when a man named Hand came off in a large cance and brought the fellows to shore whence they were conveyed to prison. In the confusion which followed their escape, another old convict named Burke, made off and has not been recaptured.

Sir. —As you did me the honor of consulting me respecting the resolutions of the idea that Vancouver Island cannot be self.

Legislative Assembly of Vancouver Island,

The people of Victoria profited by the expenditure of the proceeds of taxation levied aimed at their best interests, and the attempt made to crush them under foot. Citizens of Victoria! can you tamely submit to the British Columbian voke being placed on your necks at proposed in Governor Seymour's Luion bill? Merchasts of Victoria! You who have given your substance to ment and Capital, the old system was found to be manifestly unjust, and your predecessor, listening to the voice of the protesting Colonists, effected the separation so joyously received in British Columbia.

5. I say confidently that British Columbia ria politicians; and I have in vain asked successfully appealed to the people for a The Council, on this subject entirely unfettered by me, vote unanimously against it. The issue was fairly tried whenever there was a chance of success. Petitions were printed in Victoria, recommending union and the abolition of uppopular taxation, and circulated in the mining districts, but they re-mained unsigned. Indignation meetings were called in Cariboo, but no one would attend. A newspaper was started in that district especially to advocate Union and oppose the local government. The miners merely protested against the scurrillity of their protessed organ, and when extraneous assistance was withdrawn, it died from want of support. I am for many reasons anxious

that the desire for Union should exist in British Columbia. It does not. 6. The efforts of the merchants of Victoria create such a desire in the mining disricts were, however, vigorous and welltimed; not very high principled, but showing considerable political dexterity. It was thought that Union, as a separate question, could stand no chance of obtaining a hearing in Cariboo, but it might meet with some attention on the hustings, coupled with an abrogation of the export duty on gold, and a general reduction of taxation. Systematic agitation might, possibly, str up the feeling against the gold tax to a sufficient strength to drag into light its self-imposed associate,

7. It would have been well if Victoria had earlier passed the resolutions in favor of unconditional Union. It was not until the efforts to obstruct the Government of British Columbia by shaking the confidence of the people in its justice, had proved vain that his wise course was adopted. Though, I shall presently show that the larger Colony has progressed greatly since it attained a separate existence, yet it did not escape entirely uninjured from the self-damaging attacks of the Victoria politicians. The prosperity of both colonies depends principally on the power of the gold mines of the mainland to attract a considerable share of the large floating population which, centered in winter in California, seeks in the public prints and in every rumor a guide to direct its steps to the most profitable field for summer labor. The Victoria papers and their Cariboo representative, during its short existence, represented British Columbia to be overtaxed and unjustly governed. Many persons, undoubtedly, in San Francisco took the English reports on English mines and management as correct, and turned their steps towards other gold fields which American speculators took care not to depreciate. The efforts of the Victoria speculators were thus partially successful. The great objects of intimidating the Government and exciting | Americans secured the prefe

Davis leaped instantly from his recumbent attitude, a flush passing over his face for a moment, and then his countenance growing livid and rigid as death.

He gasped for breath, clutching his throat with the thin fingers of the right hand, and then recovering himself slowly, while his as suitable rooms have been procured, pubwasted figure towered up to its full heightnow appearing to swell with indignation, and then to shrink with terror, as he glanced from the Captain's face to the shackles-he said slowly and with a laboring chest: "My God! you cannot have been sent to

"Such are my orders, sir," replied the officer, beckoning the blacksmith to approach, who stepped forward, unlocking the padlock and preparing the fetters to do their office. These fetters were of heavy iron, probably five-eights of an inch in thickness, and con nected together with a chain of light weight I believe they are now in the possession of Major General Miles, and will form an interesting relic.

"This is too monstrous," groaned the prisoner, glaring hurriedly round the room as if for some weapon or means of self-des-truction. "I demand, Captain, that you let me see the commanding officer. Can he pretend that such shackles are required to secure the safe custody of a weak old man, so guarded and in such a fort as this?" "It could serve no purpose," replied Cap-tain Titlow; "his orders are from Washing-

At these words the blacksmith advanced with the shackles, and seeing that the prisoner had one foot upon the chair near the bedside, his right hand resting upon the back of it, the brawny mechanic made an attempt to slip one of the shackels over the ankle so raised; but, as if with the vehemence and strength which frenzy can impart, even to the weakest invalid, Davis suddenly seized his assailant and hurled him half way across the room.

On this Captain Titlow turned, and seeing that Davis had backed against the wall for further resistance, began to remonstrate, pointing out in brief, clear language, that this course was madness, and that orders still; I appeal first to the Coroner; next, to must be entorced at any cost. Hereupon Captain Titlow called in a Sergeant and a file of soldiers from the next room, and the Sergeant advanced to seize the prisoner. Immediately Davis fled at him, seized his musket and attempted to wrench t from his grasp.

Carrol Hall. His prison fare, if not choice enough for one in his sensitive ill health, was improved by supplies from the Doctor's table. Under prison regulations he was not allowed to use a knife and fork, and all his letters were inspected by the Government. From June to November, which closes the volume, we hear his complaints of deteriorating health, and his frequent protest against the rigor and indignity of his treatment as the head ot six millions of people, and a prisoner refused impartial trial. We must believe that if, as it appears, Davis has been a shattered invalid during the whole of his incarceration, imprisonment is the worst punishment that can be meted out to him.

CHURCHES DESTROYED IN THE WAR .- A writer in the New Orleans Advocate, who has been making some enquiries into the destruction of churches, says that, so far as he has ascertained, between 1,000 and 1,200 churches were burned during the war. These churches, he thinks, cost the people no less than \$5,000,000. In the loss, the Methodists were the greatest sufferers; the Babtists next; then the Presbyterians, and the Catholics last.

THE MURDER OF JAMES PERRY.

One week ago last Wednesday, James Perry started from Mayflower ledge—Quicksilver District— with pack animals loaded with ore for mill tests, and was shot and shockingly mutilated about five miles southeast from here, near the head of Sinker Creek, His friends became alarmed last Saturday. and made search without any discovery till Thursday of this week, when the body was found and buried near the place of his massacre. Mr Perry was a native of New York, subsequently a resident of Michigan, then two years in Washoe and a pioneer in Owyhee. He was a sober, irdustrious and highly respected and useful citizen, and an indefatigable prospector. His brother, Uriah Perry, is here and in his deep affliction has the condolence of all those who enjoyed the acquaintance of his departed brother. If such repetitions of the slaughter of good men do not stir up those in authority to provide means for killing the red devils-all other appeals are useless.

DANGEROUSLY WOUNDED.

A man named Sanford was shot in the evening of the 3d at the head of Reynolds Creek. A party of four were on their way from Sacramento, Cal., to Montana. During the night their stock was fired into by Indiens. Two men were sleeping in the wagon and two out. Those out fired at the savages, and one went to the front end of the wagon to get in, and being asked who he was and failing to reply, was shot by a party in the wagon. The ball struck his nose, passed through his mouth and down through his chin and lodged near the collar bone. He may recover, but it is doubtful. His partners forsook him and left him almost penneiless on the County or charities of the citizens. He will probably add another to the long list of martyrs-though not directof "Lo-the-poor-Indians,"

RICH GOLD SPECIMENS.

While peeping round for items we saw what was called ore from a quartz ledge and pure ore it is surely. Saw several flake as thick as common glass, of bright yellow gold. Some of them were two inches long by one side. It came from the Leonora ledge, Alturas County. There is only one seam of this pure stuff. The ledge is said to be well defined and seven feet wide and all the ore worth \$60 per ton. We also were shown some specimens of silver ore from the Atlanta ledge, in the same district. It looks very rich and is from a big vein.

GATHERING THEM IN .- The United States seem determined to possess all the anglorebel navy. The Georgia was captured at sea; the Florida was taken in the harbor of Bahia and sunk near Newport News; the Sea King, or Shenandoah, was given up at Liverpool; the Sumter was also given up; the Chickamauga, was raised at Wilmington; the Tallahassee has also been given up in England, and the Rappahannock will have to be disposed of in the same way. There may be a few more yet to be taken posession of, but already nearly all the vessels which had been in the rebel service during the war, and which had not been captured or destroyed at the cessation of hostilities, have been handed over to the United States Government. If the sympathizing Englishmen who supplied these vessels have been paid, it may be well; if they have not been paid, it is well also.

The Union Bill.

Our readers will find the bill for the Union of the Colonies of Vancouver Island and British Columbia in our columns this morning. It is short, but explicit enough to convince all that British Columbia will get everything and Vancouver Island nothing -the natural result of the unconditional Union resolutions. Even the Capital is not indicated, there can be little doubt that Governor Seymour and Colonel Mondy have had the ear of Mr Cardwell, and have shaped matters to suit the large landed interests of the last-named. The bill was introduced into the House of Commons on the 11th of June and ordered to be printed. Upon the formation of the Derby Ministry, Parliament was announced to meet on the 5th July, in arrival of the next steamer. The Les gislative Council of British Columbia, atter Union, will consist of twentythree members. The present Council of that Colony numbers fifteen-eight official and seven popular members. The remaining eight, who will probably be elected from Vancouver Island, will have a pleasant time of it in combatting the influence of the fifteen British Columbians. Union in our case is simply Annexation. We are to be annexed to the sister Colony; but as such annexation is contingent upon the consent of the Legislature Blue Book has just been issued here, filled of this Colony being obtained, we are with the correspondence arising cut of the convinced that no such one-sided arrangement as that proposed will under Lord Clarendon's directions Admiral ever be swallowed by it. The country wants Union; and it is prepared to sacrifice a great deal to bring it about; but it is not prepared to part with its popular institutions, its capital, and to change its fiscal policy, for the privilege of becoming a part of British Columbia. No, no, Mr Cardwell! the Legislature made fools of the people when it passed the odious unconditional Union resolutions: but the people will have no Union that is not established on an equitable basis. The proposed bill will not answer-depend upon that!

LOCAL INTELLIGENCE.

Friday, Aug. 3. PORT TOWNSEND TO BE AGAIN CREATED A PORT OF ENTRY .- A correspondent of the San Francisco Bulletin, writing from Washington, says; "The old fight is renewed over the question of the Port of Entry on Puget Sound. Some years ago, on recommendation of Victor Smith, a special agent of the Treasury Department, the Port of Entry in Peget Sound was changed from Port Townsend to Port Angeles, greatly to the dissatisfaction of the Port Townsend folks, who entered into a chronic controversy with said Smith, which continued up to the time of his death, on occasion of the Brother Jonathan wreck, Victor always carrying his point, however, when any decision was reached. Mr Pidwell introduced his bill constituting an Executive Council, consisting of four members from the Assembly and three from the Council, and moved that it be taken up in Committee on Tuesday next. Cries of no! no!

Dr Trimble was surprised to find hon. members opposing so useful a measure as this merely because the resolutions had not been sent up. He considered such conduct outrageous.

Messrs Young, McClure and Dickson, spoke against going into Committee in view of the Union bill now before the Imperial Parliament. Dr Powell favored the consideration of the

bill in Committee. Dr Ash would not oppose if there was any assurance that the bill would receive the Governor's assent; but he thought it would be only frittering away time to take up this bill; and there was, moreover, something

At the end of the examination the following prizes, the gift of Mr Gribbell. were distributed, viz. : to Mary Cheeseman Albert Von Almon, Sophia Williams, Margaret A. Nicolson, Mary Von Almon, Cedra C. Cheeseman, Eliza Williams and Thos. Lyndsay. At the South Saanich school the numof children was only 11 and the progress less marked. A CASE OF CONSCIENCE .- The gold watch and chain, valued at \$250 belonging to Capt Naunton of the bark Kent, was stolen from public benefit. For these reasons it has not him, after the collision with the steamer been in the power of the Secretary of State Oregon, and the delinquent becoming no to recommend Her Majesty to accede to the doubt conscience stricken, has returned the stolen property to the British Consul at San Francisco, with the request that it be restored to its lawful owner.

More Capital .- At the annual general meeting of the proprietors of the Bank of British North America, held in London on the 5th of June, Mr Burnley Hume, chairman in the absence of Sir Minto Farquhar, made the following remarks in reference to the result of Mr Paton, the general manager's visit to this coast: " He had informed them at a former meeting that the directors in tended to send out Mr Paton, the general manager, to inspect the branches on the Pacific coast. Mr Paton had performed the duty with an intelligence and zeal that entitled him to the highest credit. He had made a most able report upon the whole of the business transacted at those establishments, and that report made after the most minute examination, fully justified the diversion of a portion of the capital of the bank in the East, where they were crippled by a false legislation, to the West, where their capital had free scope."

NAVAL .- From the Panama Star of the 26th of June, we learn that the U. S. Steamer Suwanee, Capt. Paul Shirley, was to sail on that day for Vancouver Island, touching at San Francisco and the different ports on the Central American and Mexican Coasts. Capt. Richard A. Powell, C. B., at present commanding the cadet training ship Britannia at Dartmoutn, has accepted the command, offered to him by the Admiralty, of the screw unarmoured frigate Topaze, 31 guns, 2,659 tons, 600 horse power. as second officer in command of her Majesty's ship on the Pacific station, vice Capt. Michael de Courcy, returning to England. The armour plated ship Favorite, originally intended for this coast has been sent to the North Atlantic

THE NORTH-WEST GOLD FIELDS .- Already parties are arriving and equipping themselves for the Saskatchewan mines, and several parties are making ready to start for Rainy River gold fields, on our side of the line with canoes. Definite information is said to have been received, and these ena terprising persons go out to locate the richer claims. The Vermillion Lake people pushing north may possibly forestall them, but the country is large enough, and doubtless the deposits rich enough to satisfy all. What are our Canadian friends doing that they do not look after this rich portion of their territories? - Nor Wester.

DANGEROUS BRIDGE-The bridge over the ravine leading to Ross Bay, is in a state dans gerous to the life and limb of pedestrians and horsemen. Several of the planks are gone ard the whole structure will soon topple over if some steps be not taken to secure it. We hope that the required repairs will be made immediately—as are now being done on the James Bay bridge.

PHOTOGRAPHY .- Mr F Dally, Artist of Fort street, has favored us with a photograph giving a general view of the Volunteer camp at Clover point, just before the encampment was broken up. The band master musicians figure conspiciously in the foreground.

NEW BRUNSWICK -Thirty-three members of the new House of Assembly are in favor of Confederation; only eight members being against it. This is what is called a clean

REMANDED .- The three Indians arrested on a charge of murdering Robert Urin, were again remanded yesterday, to await the pros duction of witnesses for the prosecution.

GOLD BEARING QUARTZ .- A ledge of goldbearing quartz is reported to have been lately discovered at Maple Bay, Cowichan. near Mr Bowman's hotel.

TELEGRAPHIC .- The State Telegraph flags ship Ringed Wacer, Com. Haines, arrived from Seattle, W. T., yesterday, on business connected with the Company.

THE " CYCLONE."-A letter received by J. Robertson Stewart, Esq., of this city, announces the safe arrival at Adelaide, Austraia, of the ship Cyclone.

THE "CALIFORNIA" departed for New Westminster at 4 o'clock yesterday morning. She had a fair freight and several passengers:

The schooner Indian Maid was sold at Nanaimo, by order of the Vice Admiralty Court, for \$1550.

Weekly British Colonist By Glectric Telegraph fort. The Federal Diet had removed to Au-AND CHRONICLE

Tuesday, August 7, 1866. Political Tricing. Were the Telegraph Post really the ignorant, stupid creature many are led to suppose from the silly rhodomontades that daily appear i its columns, the public would experience adittle difficulty in excusing its idiosyneracies and forgiving its misstatements. But when it is known that the position it has assumed on the leading topics of the day is the result of a deliberate attempt to mislead the Colony by a system of bare-faced hypocrisy and double-dealing never equalled by but one other journal in this Colony, the feeling of pity changes to one of loathing and contempt for the paper that could sink so low as to lend itself to such vileness. Whether he is engaged in inciting people to mob-violence, seeking to bring on a "crisis," or attempting to worm himself into the "confidence" of the Executive, our cotemporary is generally abusive. seldom truthful and always unreliable. Belonging to a class of extremists, the "meat on which this our Cæsar feeds" is excitement. To be otherwise than sensational does not lie at the pen's point of our cotemporary. He must always try to bring on a "crisis" or a "conflict;" not-as may be supposed-to further the interests of the country-but to serve his own ends. To prove this, need we go further back than Friday last, when a Ministerial Council hook, skillfully baited from the gubernatorial larder, was snapped so eagerly by the TelegraphPost and his followers that they swallowed hook and all, and what, is worse, they have not yet been able to extricate the barbed iron from their gills. Ashamed of the fix in which he has placed himself, our cotemporary casts the blame of not having secured Responsible Government on Dr Dickson. But that shuffle will not avail. Dr Dickson only did what every other conscientious man would have done under the circumstances. Having discovered that, after all his talk about Responsible Government, our cotemporary had his eye fixed on the "flesh-nots" of Government House, and that when he cried for Reform he merely meant that the Governor should accept himself as "ad- resolved to try the fortune of war. viser." the Ministerial Council resolutions were therefore killed; but the effect of the non-confidence resolutions not having been promptly despatched was seen yesterday, when the House refused to forward them to the Execu tive! Cannot the supporters of the resolutions see with whom the fault lies? Are they still so blind that they have not discovered that the bribe (it was nothing else) held out to the Executive has destroyed the effect of the vote of non-confidence It matters not by whom the hook with which our cotemporary was caught, was baited-the sting was removed from the resolutions the moment that a portion of the House listened to the voice of the tempter and consented to become the "advisers' of the Governor. Poor, shortsighted men! Where are the famous resolutions to-day? Why, instead of being in the mail-bags ready for despatch to England, they are in the House-trembling in the balance as it were-with the prospect of a single hostile vote turning the scale against them and tabbling them for ever. We are not a friend of the reply or no the resolutions; but if we were, we should never forgive the ambitious men whose selfish motives have de feated their object. Our cotemporary thinks there is nothing so detestable in the human form as the counterpart of a snake. But we differ with him. We believe there is a thing more detestable, more loathsome, more debased than even the snake. We mean that crawling parasite, the human trichina—a worm who insinuates himself into the veins, the marrow, the volvitals of those he has marked for his prey-a thing so loathsome that his very touch is poisonous, and who hav-ing fastened himself on the body-politic never loosens his hold until he has utterly ruined his victim. It is such creatures as these that the Telegraph

Post represents, and it is to them that

the Colony is indebted for all its pre-

sell to-day with a full cargo.

Europe.

The New York Abend Zeitung says the rejection of Napoleon's terms is not less important than the battle of Sudoa. Even Bavaria, Swabia, and Baden would prefer a united and powerful Germany under Prussia, to Germany disunited and torn, offering a field for the neighboring nations as Napon leon wishes it to be. A German republic is not now to be thought of, but Bismarck and the King having conquered without being compelled to concede anything to the people; we believe German enthusiasm will now become strong, and Germany will be feared by other nations. Italy henceforth is out of the game unless, indeed, she may prefer to conquer Venetia, rather than trade for it.

New York, July 24-The Moscow Gazette of July 13th contains the following highly important announcement :

"Russia does not desire any change in the present state of things. If Austria and Prussia will consider themselves tools of the French, Russia can no longer depend on them as heretofore. Venetia without Rome would constitute no progress for Italy. The submission of Austria to France is not advantageous but dangerous to European equilibrium. The supremacy of Prussia in Northern Germany narrows that of Russia in the balance. Russia wishes for peace, but does not sanction Prussia's efforts to attain supreme power. England's interests may make her seek an alliance with France and Austria on the Eastern question, but the dictatorship of France in Italy and Germany cannot meet her support.

A Limberg despatch of the 13th says : The Russian soldiers on furlough have been called in. Every day military trains start from Warsaw to the frontier of Silesia and Gal-

A Florence telegram of the 13th says Austria informed Italy that an armistice on the basis of the cession of Venetia is inadmissible. Italy in reply announced her resolution to continue war without any relaxation.

Florence papers publish the conditions for the armistice stipulated by Prussia and Italy. The former power demands the exclusion of Austria from the Germanic Confederation. This journal adds this was admitted by France, who undertook to obtain from the Vienua Cabinet the evacuation by Austria of the Austrian provinces occupied by Prussia during the armistice. The conditions on the part of Italy were the cession of Venetia and the Italian portion of Lomoardy direct from Austria to Italy without compensation, and an agreement that Austria should not raise the Roman question during the negotiations for peace. It appears that these conditions have been found inadmissible at Vienna and that Austria had

Venice despatches say the Austrian forces in Venetia are being withdrawn from before the Italian army, but the fortresses were strongly garrisoned for the defence and suport of the army.

La France says the attack of the Italians apon Venetia renders Prince Napoleon's nission futile and it has been abandoned. France is actively arming; the iron-clads are to be sent to Venice.

The Prussians have occupied Prague with garrison of 8000 troops.

Austria is making concessions to Hungary. She announces that the conscription is suspended, and calls on the Hungarians to

California.

The steamer Constitution, for Panama o-morrow, carries the smallest passenger list of any steamer for three years; on the other hand, steamers coming from the East bring full lists. The tide is setting strong in California's favor.

The London Times believes the discourse agement of the Austrian army by their repeated losses in Bohemia will deter the Emperor from a final encounter so close to his capital, and trusts that before the Prussians shall be ready for the onset an interview between the monarchs will take place, which might better have been held the day after the disaster at Konigsgratz. The Times of the 26th says:-Whatever forces the Austrian Government may have succeeded in gathering around Vienna, it is still doubtful whether it will find itself equal to the task of withstanding victorious Prussians, who, according to all calculations, should assemble before Vienna to-morrow; or the day after : if it were needed to render the Austrians position hopeless it was tidings of the irreparable disaster at Schaffenburg, which must have reached Vienna, preceded by a deputation from the Vienna Municipality enquiring the Emperor's pleasure in regard to he defence of that city. The Emperor at once removed the people from apprehension by answering that Vienna should be treated as an open city, and added he would limit the operations to the defence of the line of Danube, which might bring a Prussian atack on Fladeroff Village, three miles from the gates of Vienna, where the Austrians have entrenched their camp. New York, July 29,-Subsequent despatches from Mr Field have been received, giving particulars of the voyage. They say the Irish shore cable was laid on Saturday morning, July 7th. The splice with the ocean cable was made on Friday, the 13th, on board the Great Eastern, and buried in 94 fathoms, distant 271/2 miles from Valentia telegraph house. The Great Eastern and her consorts, at 2:30 p. m., on Friday, 13th inst., started for Newfoundland at an average speed, from the time the splice was made until they saw land, of less than five nautical miles per hour, and the cable was paid out at the rate of five and a balf miles per hour. The total slack was less than twelve per cent. The weather was more pleasant han ever known on the Atlantic at this season. The total distance run was 1669 miles, and the length of the cable paid out 1864 miles. We have been in constant be rescinded? communication with Valentia since the splice was made. ACTIONS FOR DEFRAUDING THE REVENUE. Suits have been commenced at San Francisco against J. W. Lured ing affixed stamps to their tickets as required from the performance of their sworn by the laws of that State. The actions were brought by Attorney General McCullough in behalf of the State. The complaint in the former case sets forth that the steamship Moses Taylor has, since the 12th day of August, 1865, taken out of the State 2905 passengers, whose tickets or memoranda of passage were not properly stamped, by which the owners of the ship are liable in the sum of \$250 for each violation. In this instance, it is claimed that the defendants are liable in the sum of \$726,250. The steamship Golden Age is charged with having on her trips of April 30th and June 9th, 1866, taken out of the State 661 passengers on tickets which were not properly stamped, for which violation of the law \$165,250 is claimed. The law requires that tickets shall be stamped a follows: First cabin, \$6; Second cabin, \$4; Steerage, \$2. It also provides that the company shall be liable in the sum of \$250 for each violation of the law.

> THE STRIKE AT BELLINGHAM BAY .- Sehome, July 22 .- There is great excitement in Bellingham Bay. Two men were kidnapped since July 8th. The Bellingham Bay Coal Mine has been an object of excitement, owing to a miners' strike, on account of the inefficiency of their underground manager, named Wm. Smith. Yesterday morning, a crowd of about fifty well armed men drew up to the hotel and kidnapped two men lately arrived from Washoe, who were still working in the mine after being warned by the miners. They escorted them out on the Fort Hope trail, but well supplied them with money and provisions. No further trouble occurred, but we fear that unless a speedy settlement is made of one mind, that their cause is just.

EDITORS COLONIST & CHRONICLE.—At last we have got our little Bill, and we can estimate the cost of our unconditional surrender. We are to be wiped out-cleaned away altogether !

Annexation and annihilation, are the shameful conditions proposed for our acceptance, instead of the honorable and just terms of Union we have a right to expect.

Certainly Mr Cardwell's Bill speaks well for the care with which Mr Seymour and Colonel Moody have guarded in London, their interests in British Columbia and its capital; determined at the same time to crush Vancouver Island out of existence. Mr Seymour has now fairly earned the

extra thousand pounds per annum with which grateful Council bribed him in advance. Colonel Moody can soon begin to think about selling the three thousand acres of land acquired by him in his official capacity as Land Commissioner in British Columbia and his possession of which he has hitherto hypocritically concealed from the authorities at home, who believe him to be disinterest-

ed. They will realise his character about the same time that he hopes to realise his acres. From these two officials the present insulting document emanates.

Let the people of Vancouver Island treat it and them with due contempt-let us reject the Bill and despise its authors. Our population has always been loval, and true to the Crown; but I believe the ma-

jority of Englishmen here would sooner see the Colony annexed to the United States than allow themselves to be thus entirely absorbed by our expansive and expensive neighbour, under whose control our eight years of labor, enterprise, and liberal expenditure are to be placed absolutely, while we are left helpless in a studied minority.

We sincerely desire Union with British Columbia, and we are deeply interested in her prosperity-but it can only be on terms that are fair to each, that a happy Union can be hoped for and consummated. Yours, truly,

The Unconditional Union Resolutions.

PASSED BY THE V. I. LEGISLATIVE ASSEMBLY, JUNE 26, 1865.1

" Resolved, That this House having taken into consideration the present state of the Colony, is firmly convinced that it is expedient at the present time to observe the strictest economy in the public expenditure compatible with the efficiency of the public

"And that the immediate Union of this Colony with British Columbia under such constitution as Her Majesty's Government may e pleased to grant, is the means best adapted to prevent permanent causes of depression as well as to stimulate trade, foster industry, develop our resources, augment our population, and ensure our permanent prosperity;
"And this House pledges itself, in case Her Majesty's Government shall grant such Union, to satisfy the same by legislative

enactment, if required. " Resolved. That the above resolutions be transmitted to His Excellency the Governor. that Captain Lambert will be able to get with the respectful request that he may take his vessel off without serious damage, The grand ball, which was attended by the Presia the same into his earnest and immediate con-

Such are the resolutions asking for the Unconditional Union of these Colonies. They The ship A. W. Willie, from Sydney via formed the platform upon which Messis De-Honolulu reports that Capt. Mitchell, late Cosmos and McClure stood during their short but bitter contest with Messrs Young and Sproat, in February, 1865, and the electors, by returning the two first-named gentlemen, ratified the action of the Assembly. The result is before the country in the Union Bil about to be passed through Parliament.

British Columbia.

[FROM " TIMES " OF 18TH JUNE, 1866]

The Bill before the House of Commous provides that, after the adoption by the Legi islatures of the two Colonies of addressess in favor of Union, the Governor of British Columbia is to proclaim Vancouver Island united to British Columbia, and thenceforth the two Colonies are to be known as "British Columbia." New Westminster will be the capital; Victoria is a larger town, and is, in many respects the most agreeable place of residence; but it is very desirable that the seat of government should be on the main-land; and British Columbia has also this claim to be selected, that she has not sought this Union, and would rather prefer being left alone. The House of Assembly of Vancouver's Island has prayed for a Union on such terms as to Her Majesty may seem meet. land is willing to give up its boast of Victoria as a Free Port. The Governor of British Columbia feels compelled to say that England ought to be represented by only one civil authority beyond the Rocky Mountains. Both British Columbia and Vancouvers Island have occasionally to discuss questions with their American and Russian neighbors. and, as things now are, there is nothing to insure uniformity of action. The one Colony may be on the most friendly terms with adjacent Powers, the other in a state of reserve pending a reference to Europe. Dissensions between the two Colonies are looked upon in the neighbouring States as rather a scandalous, but a novel and amusing feature in our colonization, and the result is that British influence and power in the Pacific are weaken. ed. A uniform policy in the treatment of the Indian population is very important, and greater economy of government is felt to be needed. Vancouver Island has an elected Assembly of 15 members, and a nominated Legislative Council; but the Governor has to report that this form of government does no work satisfactorily. The time for two separate Chambers is not yet. British Columbia has only a Legislative Council. Five members—one-third of it—are public function-ares, five are selected by the Governor from Clothing and Under Clothing, which they will sell lower than any house in town. Give the Governor is guided, in pursuance of his instructions, by the recommendation of the people in five distinct districts, and the people in effect elect these five mem-bers. The Governor considers that the

Circumstances throw them into free intercourse with all classes, and train them to be men of decision and great personal influence, who can preserve tranquillity and secure obedience to their decisions with very little advantage of police force. These functionaries are described as equally respected by the people and the government, and the miners look upon the departure of the magistrate for his legislative duties with quite as much confidence as on that of the men he has assisted in returning to the House. A regular representative Constitution could not work well in British Columbia as it is at present, but the Govery Columbia as it is at present, but the Governor desires to see the popular element increased in the Legislative Council. The present Bill provides that the form of government existing in Vancouver Island shall cease at the Union, and the United Colonies will have the Executive Government and Legislative Council now existing in British Columbia, power being given to increase the number of councillors to 23 in order that creased in the Legislative Council. The number of councillors to 23, in order that Vancouver Island may be represented.

LL PAIN, VOMITING AND DISTRESS Ceases in a lew minutes after taking a dose of that wonderful Smoathve Amodyna adose of that wonderful Smoathve Amodyna adose of that wonderful Smoathve Amodyna and Amtispass Modicovered by Dr. J. Colis Browne M.R.C.S. L., (ex-Army Medical Staff, the recipe of which was confided solely to J. T. Davenport, 23 Great Russell street, Bloomsbury square, London (Pharmaceutical Chemist). The medical testimony of civil, hospital, military and naval practitioners pronounces it invaluable. It relieves pain of any kind, soothes the restlessness of sever, and imparts the mostre freshing sleep, without producing or leaving any of he unpleasant effects of opium.

Earl Russell has graciously invored J. T. Davenport with the following extract of a deep act from Mr. Webb, H. B. M. & Consul at Manilla, dated Sept. 17. 1864:—"The remecy most efficacious in its effects (in Epidemic Cholera) has been found to be Chlorodyne, and with a small quantity given to me by Dr. Burke I have saved several lives." Earl Russell communicated to the College of Physicians, that he had received a despatch from Her Maiesty's Consul at Manilla, to the effect that cholera had been raging learnily, and that the only remedy of any service several lives." London, as to its efficacy in Cholera. "So strongly are we convinced of the immense value of this remedy, that we cannot too iorcibly urge the necessity of adopting it in all cases."

From A. Montgomery, Esq., late Inspector of Hospitals, Bombay: "Chlorodyne is a most valuable remedy in Neuralgia, Asthma and Dysentery." To til I fairly owe my restoration to health after eighteen months severe suffering, and when all other medicines had failed."

CAUTION.—In consequence of the extraordinary efficacy of this remedy, several unprincipled parties have been induced to vend imitations. Never be tempted to buy Cholorodyne except in sealed bottles, having the words, "Dr. J. Collis Brownes' Chlorodyne" engraved on the wrapper. A sheet full of medical testimonials accompanies each bottles. Sole manufacturer, J. T. DAVENPORT, 33 Great Russell street, Bloomsbury, London. Sold in bottles, 2s. 9d and 4s. 6d.
