# FIRE, MARINE, AND RAILWAY SALVAGE.

## PARENT'S SYSTEM OF SALVAGE,

Saving the lives of several persons in a few seconds.

This System, registered in the United States and Canada, has an acknowledged superiority over all others hitherto known, by its Simplicity and Lightness, and, at the same time, for the great Strength of the several Apparatuses of which it is composed; by the use of which Firemen, or other persons, can act with wonderful quickness and perfect security, either in extinguishing an incipient fire, or in saving the lives of persons exposed to a certain and terrible death in case the fire cannot be controlled.

The Apparatuses, which can, at all times, be kept near at hand and ready for immediate use, consist of:

1. A SINGLE and DOUBLE HARNESS, which the Fireman, or other person, can put on in a few seconds of time: the first, made expressly for carrying the Hose and for maintaining a firm position on the Ladder, is equally useful to the Sailor during rough weather; the second, which can be used like the first, enables the Fireman to maintain a firm and secure stand when attaching the Ladders to the windows of a building on fire, enabling him to ascend immediately to rescue the unfortunate persons who, without his prompt and timely assistance, would be condemned to perish.

The strong Hooks with which the Harnesses are provided enable the Fireman to secure himself to the Ladders, or any projecting object, and to act with the greatest ease and freedom, without danger.

With the light Chain attached to the Harnesses, the Fireman can, by rolling the Chain round the Hose, carry the same, hung at his side, to any height, besides allowing the use of his hands while ascending the Ladders; the same Chain allows the Sailor to secure himself to the wheel of the rudder or to the yard, and when used with the Hook enables the Seaman to maintain himself on a perpendicular rope, or in any other false and perilous position.

2. A SET OF PORTABLE LADDERS, 14 feet long, very light in weight, but of great strength, which are attached in a moment to the windows of the several stories of a building, thus forming a sure and rapid roadway for the water service and the Salvage operation.

3. A PULLEY, for operating a precipitous Salvage; the Pulley is hooked to the head of a Ladder, or to a window frame; the rope, being provided with a strong ring at each extremity, cannot pass out of the Pulley, and the Salvage man, taking hold of the ring retained at the Pulley, is lowered and raised up again, in a few seconds, to any story, by the by-standers who hold the other extremity of the rope.

From the foregoing description of the Apparatuses of which my System is composed (Public Trials have been made by me in Montreal and Quebec with the greatest success), it is quite evident that the Fireman who is provided with them acquires an extraordinary strength and coolness, because he runs no danger himself, and all his energy and presence of mind are employed by him with an astonishing quickness, and he can master a multitude without any effort, and ensure the lives of all. Many accidents must necessarily be prevented by the use of it.

The Inventor invites the attention of capitalists desirous of investing their funds to advantage, to the following useful and important inventions:

1. HOOK-AND-BRAKE, for safe standing in dangerous positions, and for operating a precipitous descent.
2. SINGLE SUSPENDER.
3. COMPOUND SUSPENDER; both answering as a scaffold when needed—weight 1 lb.
4. SHIP-BOARDING-HOOK; a boy can easily detach the hook, notwithstanding the force of the current and the heavy load of the schooner or scow.
5. ASCENDER, with brake; this apparatus enables any one to maintain himself at any height without effort or trouble; it is intended particularly for Chief Firemen, Ship Captains and Architects; it is also made purposely for Salvage operated by a single man. Persons provided with this apparatus will be able not only to attain the greatest heights, but, moreover, to operate the descent with the greatest ease and security. Any man with the apparatus, coming out from a window, or ascending to it, can maintain himself there, and take hold of persons in danger, and bring them down without the least danger.
6. DESCENDER. The Fire Escapes having failed to render the services expected of them, I offer a new apparatus that everybody can use to descend from a great height without any extra effort.
7. BRAKE for trains, operated by a single movement.
8. UNCOUPLER. The brakeman obtains this result by a single movement.
9. VENTILATOR. New system of ventilation, by a particular arrangement, will prevent accidents in mines, sickness, and will procure fresh air to mines, vessels, etc.
10. CLEANER. This apparatus is attached to the frame of the locomotive. This Cleaner destroys, cuts, and throws to a great distance snow, sand, gravel, mud, stones or other materials on the rails. No person is required on the front of the engine, the mechanism being operated by steam. The saving realized by this process is enormous.
11. PASS-PORT. Aerial and sub-marine boat. This boat, though different in the two cases cited, is operated on the same principle and governed in the same manner. Four of these boats commanded by ten men each would suffice for the observations and for the protection of Canada.

Parent's System of Salvage defies any other for its practical efficiency.

**Independent of Party Ties. "LE MONDE"**  
 Is the only French Daily in Canada of an absolutely independent character, having  
 no political tie of any color and being subservient to no party whatever. It is the  
 only real Business Medium and Family Journal in the Dominion. Such Mediums are  
 the only ones that advertisers can use to advantage.

## LAPRAIRIE.

An extensive municipal village and parish of the south shore of the River St. Lawrence, between the Lachine rapids and Victoria bridge, district of Montreal, seigniori and county of the same name. Incorporated March 30, 1846. The parish was erected on the 17th November, 1668. A market is open every day. An aqueduct is constructed. The first railway in British North America was constructed from here to St. Johns in 1836. It was first worked with horses, afterwards by steam, but was discontinued, and the rails taken up a number of years ago. A steamboat maintains regular communication between Montreal and Laprairie. A branch of the Grand Trunk Railway, starting at Fort Covington, in the State of New York, to reach the Victoria bridge, now runs twice a day in close proximity to the village, with a good station and depot, and contributes materially to the future development of the locality, which is considered a very healthy and pleasant summer place. There is also a fire station, thoroughly supplied with new fire apparatus, such as a fire engine and hook and ladders. Fishing and hunting is also largely practised. A new billiard room has been organized. A permanent wharf has been erected, and will be much improved during the present summer. A new channel is also partly made up. The aqueduct is now giving a very good service to the village, and the work of putting up pipes is being done very rapidly in the different streets. The pressure of water in case of fire is also very powerful, as the water is drawn by steam and air pressure, which brings it at a distance of 1,350 feet, from the St. Lawrence river. The premiums upon insurances have also been greatly reduced on account of the recent ameliorations to the fire system apparatus. Great North-Western Telegraph Company has an office here. Distant from Montreal, 9 miles, fare 15 cts.; from St. Johns 18 miles. Mail daily. Population of village about 1,800; of parish 2,200.

## ST. HENRY.

Incorporated in 1876. It adjoins the City of Mon-  
 treal, and formed by the amalgamation of the  
 former villages of Tannery West and Co-  
 teau St Augustin. The Town of St Henry  
 is situated in the seigniory of Montreal,  
 county of Hochelaga and district of Mon-  
 treal. The Lachine canal passes on the  
 south side, and signal stations of the Grand  
 Trunk Railway are situated here at the junc-  
 tions where the roads branch off east and  
 west, and to Montreal and Lachine. The  
 Grand Trunk Railway Co., with the aid of  
 the Council of the Town, has erected a splen-  
 did station at the curve, near Notre  
 Dame street bridge. The municipality of  
 St Henry is governed by a Mayor and  
 Corporation. A separate permanent Fire  
 and Police force is maintained. The town  
 contains a Roman Catholic college and  
 convent, church and presbytery, and several  
 important industries, amongst others two  
 extensive tanneries, boot and shoe factories,  
 brick yards, Ingersoll Rock Drill Co. of  
 Canada and J. & O. Hodgson, rolling mill,  
 the C. W. Williams Manufacturing Co.,  
 employing 600 hands; a cotton manufactur-  
 ing Co., and a public Abattoir and Stock  
 Yard Co. The Council has built a very fine  
 Town Hall, Fire and Police station at the  
 corner of Notre Dame and St James streets,  
 at the cost of \$25,000. Building is being pro-  
 secuted briskly, and the town bids fair to  
 rise into some importance. Has a Fire and  
 Police system of alarm telegraph. It is now  
 lighted by arc electric light.

Distance from Bonaventure depot 2½ miles  
 from Lachine 6 miles. Population 15,000.
