

INDIGESTION CURED

FELLOWS' DISPEPSIA BITTERS

WILL CURE

Indigestion, Jaundice, Bilious Complaint, Bad Breath, Heartburn, Sick Headache, Constipation, Acid Stomach, and all Diseases arising from a disordered state of the Stomach.

Price, 25 Cents.

ST. JOHN, Aug. 5th, 1880.
Dear Sirs—I was troubled with Indigestion for a long time, so that I could not do my daily work, and had frequently been to medical men, but without receiving any benefit. I saw your advertisement for Fello's Bitters, and I tried them, and they gave me immediate relief, and I am now as well as ever.

R. A. DEEN.

HALIFAX, N. S., Oct. 16, 1879.
Dear Sirs—Fello's Bitters have done me the only cure I can find for Indigestion and Biliousness. Nothing else does me any good.

J. W. VAUGHN.

HALIFAX, N. S., Aug. 11, 1880.
Gentlemen—I thank you for the good that Fello's Bitters have done me. I am now as well as ever, and I am sure that they are one of the very best medicines in use for Indigestion and Biliousness.

O. T. BELL.

T. B. BARKER, & SONS,
ST. JOHN, N. B.

ASTHMA

Gates' Life of Man Bitters

AND

INVIGORATING SYRUP.

Dr. GATES, Dear Sir—This is to certify that after suffering for four years with Asthma, and having tried everything I heard of, and employing many doctors, all to no effect, I was recommended to take your Life of Man Bitters and Syrup, with the Ointment and Plaster, which has cured me of the Asthma, and my general health is greatly improved, so that I can now attend to my work. I shall ever gratefully acknowledge it, and am now and will be at all times ready to state further particulars to satisfy the public.

Yours most respectfully,

Sworn to before me at Seville, N. B., this 4th day of July, 1880.
JOHN FORD, J. P.

T. B. Barker & Sons, and H. W. McCarty, St. John, N. B.

NEW BRUNSWICK RAILWAY.

WINTER ARRANGEMENT.

COMMENCING MONDAY, November 21st, 1881, TRAINS carrying Passengers will run as follows:

7.45 A. M. LEAVE GIBSON, for Woodstock, Arnscliffe, and Carleton Place.

11.00 A. M. LEAVE WOODSTOCK, for Arnscliffe, Carleton Place, and Woodstock.

To our Readers.

The Agricultural Review and Journal of the American Agricultural Association for May, will contain an exhaustive article on the Cattle Industries of the United States, by Hon. J. B. Ginnell of Iowa, giving a complete history of cattle breeding, the development of the industry, and a detailed description of cattle raising on the Plains in the Western States and Territories, showing the lands best adapted to the business, and describing the methods of herdsmen owning from 500 to 20,000 head each.

The number will also contain articles by Hon. Cassius M. Clay, Dr. Peter Collier, Prof. J. P. Steele, Hon. T. B. Ginnell of England, Col. Robert W. Scott of Kentucky, Dr. E. Lewis Stewart, and other practical and scientific writers.

The January number and Supplement contained the proceedings in full of the Great National Agricultural Convention recently held in New York, including addresses and papers by Hon. J. F. Kinney, Francis H. Moulton, Dr. John A. Warder, Rear-Admiral Ammen, Gen. H. E. Trevelyan, Hon. N. T. Sprague, X. A. Willard, Seth Greene, and other leading writers and speakers.

The thirteen papers on Ensilage, giving full directions for growing the crop, building silos, and preserving the fodder by the latest practical experiments in the United States, comprising the fullest, most reliable and most valuable information on this subject yet published.

The Agricultural Review is published quarterly with supplements, and is pronounced by the highest authorities the most valuable publication of its class issued.

Terms.—\$3.00 per year. Edited and Published by J. B. Ginnell, Secretary of the American Agricultural Association, 26 University Hall, New York.

Reliable agents wanted in all sections of the country.

The American Exposition of Products and Manufactures, being inaugurated by the Association, gives immeasurable value to the Agricultural Review.

By receiving \$3 to this Office, parties will receive a copy of the Agricultural Review and MARINE FARMER for one year.

Agriculture.

Col. Laurie on the New System.

Col. Laurie, of Oakfield, Nova Scotia, well known in military and agricultural circles, is a successful man among the volunteer militia, and a famous breeder of Devons, is a convert to the system of ensilage. He does not deny that, against the system, some objections may be raised and exceptions taken, but he thoroughly believes in its value, and he is well worth looking into, and ought to be discussed and experimented upon by the farmers. He is impressed by the conviction that the farmers of Nova Scotia must get ahead—take some new departure, if they are not to be left hopelessly behind. And if his remarks are true regarding our sister province, we cannot go far wrong if we apply them to New Brunswick.

Col. Laurie finds that notwithstanding the Province has much fertile soil, and is a favorable to the growth of any product of the temperate zone, and that it is better situated than any part of Canada for a profitable trade in agricultural produce, that many farmers are offered for sale and still remain unsold.

The great majority of farmers make no money, and are not comfortable living; they are not accumulating money. One reason why they do not thrive better is, the Colonel thinks, because in some cases they spend far more in procuring their seed, than they realize when they sell it. He instances the case of wintering cattle, mentioning a fact that, while a full grown ox will eat at least four tons of hay (the value of which he puts at \$40) during the winter, it certainly will not support a calf at that amount.

The question of first importance to the farmer is, "how can the cost of production be cheapened?" Before ensilaging, or the preservation of green forage in air-tight pits, or silos, came to be practiced; he was of opinion that the feeling roots and the straw, with but a little of the green, was the best solution of the question, "How can the production of meat be cheapened?" On upland farms, he holds, that the production of meat is a necessity if fertility is to be maintained, and other crops grown. But the successful experiments that have been made in ensilaging has caused him to change his views. When a man like Col. Laurie gives an opinion, (against which there still exists much prejudice) he should, at least, be attentively listened to. He can have no possible interest in deceiving him, or others, in this matter. A letter is addressed to the Windsor Mail by Col. Laurie under the heading "How to produce milk for more profit." He says that for ten cents per pound, beef for four cents per pound, mutton for nothing, if hay is thirty cents per pound. He states, with some surprise, that very little interest has been taken in the new system—Col. Blair, of Onslow, Messrs. C. R. H. Starr and Johnson, of Port Williams, being among the very few who have tested and spoken highly of it. He goes on to say:—

"My own experience in the matter I willingly give, because, altho' it does not go to prove the success in procuring it, it establishes an equally important point, i. e., that the yield of the land in green corn will furnish the amount of food which is claimed."

"I have always been in the habit of supplementing failing pasturage in the autumn and spring by my nature hay press."

The man who is contemplating investment in a flock, for the purpose of founding a flock, will find much to interest him, and suggestions of great value, in estimating the comparative profit derivable from really good and bad flocks. He will find that the relative cost of such in any particular locality. As it is the profit that attracts most investors, a careful comparison, as indicated above, should be among the first undertakings of the proposed flock owner.—E. C.

The root crops must not be forgotten this month. On suitable soil, which is light and easily worked, and where the soil is not too heavy, and carrots should pay well. On hard, gravelly soils, corn may pay better, but wherever roots can be grown at a profit they are always found to be profitable to animals that are from some cause or other, a little "off" their feed and that can be stored in their cellars, and without the expense of press."

NEW GOODS!

Affairs in Egypt are in an exceedingly

complicated state. How they can be unraveled

successfully it is hard to see. The sword to all

appearances, must sooner or later cut the

Gordian Knot. The Sudanese Sultan, the

Khedive, the ministry, the notables, the

army, are all at issue and seven. The Chris-

tian population lives in terror, afraid, if revo-

lution prevails, for their lives and property.

The army, the main cause of the trouble,

at present the greatest power in the State,

is weakened by disaffection in its ranks. It

upholds the Ministry of Maroufi Bey, to

the Ministry of Khedive in favor of

the infant son, Abbas, with Maroufi as

Regent, and Arabi as Governor. The

Porte has been watching events with the in-

terest of intervening and asserting its pre-

dominant authority in Egypt, but it is un-

certain how far the Great Powers will allow it

to go. The Khedive is resolved to maintain

himself and has appealed to France and En-

gland for assistance. To complicate matters

there is a rising among the wild Bedouin

Arabs, and a fear that they will prove an

other element of danger in a very entangled

state of affairs. Already a Turkish fleet is

in the Mediterranean, and orders have been

given by the British Admiralty to the chan-

nel fleet to hold itself in readiness to sail for

Alexandria. France and England will act in

accord and along with Turkey. A demon-

stration on the part of these three powers

may bring the army and Maroufi Bey, to

their senses, but there is no saying what step

their presumption may cause them to take.

The army will have to be well thrashed

before it is reduced to its proper and sub-

Maritime Farmer.

FREDERICTON, N. B., May 18, 1882.

Hon. John J. Fraser.

It has been announced on authority that

carries the greatest weight, that the Hon.

John J. Fraser will not seek to re-enter the

local political arena after dissolution of the

place. Indeed, his resignation as Attorney

General and Leader of the Government may

be made any time before that event takes

place. His very numerous friends and sup-

porters have this one consolation to temper

their regret, his retirement is not a final

withdrawal from politics. His talents, politi-

cal knowledge and experience, will still be

at the service of the constituency of York,

in what some are pleased to call "a higher

sphere."

Mr. Fraser has now been fully seventeen

years in a public capacity before the people

of the country. He has dragged, we may

almost say, from his fully occupied pri-
vacy, at a time of intense political interest, at a

crisis and turning point in the history of the

Province, and he made no slight personal

sacrifice at that time. Of Mr. Fraser beyond

all men in political life, that we know of, it

is only to be said, that he did not grasp at

honors and power, but rather he

honors sought him. His unblemished record

for integrity, his personal magnetism, if we

may so speak, drew hosts of friends to him,

and his talents and his administrative ca-

pacity, in his career in public office, generally

fully justified the confidence which they im-

plicitly reposed in him. When Mr. Fraser

steps out of the local political arena, there

will be no one to succeed him, who will fill

his place. No one, of whom it will be said,

that he constrained even strongest political

opponents to respect and praise him. As we

can say nothing more just, or so eloquent, of

Mr. Fraser's career as a leader in local poli-

tics, than what has already been said, we

copy the following graceful tribute from the

St. John Telegraph, whose editor speaks with

perfect knowledge and appreciation of his

subject:—

It is with the deepest personal and politi-

cal regrets that, on the best authority, we

announce the fact that the Hon. John James

Fraser, has felt it to be his duty to announce

to his colleagues his determination to retire

immediately from the local political arena.

He will, at a very early date, ask that his re-

signation of his present position as Attorney

General and leader of the Government be ac-

cepted. It is more than a year since Mr. Fraser

was appointed to this position, and during that

time he has shown himself to be one of the

hardest worked men in political life, often

helping colleagues in matters that pro-

duced to him the heaviest burden, being

always at headquarters. In his relations

to the finances as Provincial Secretary and

Receiver General, he was like Caesar's wife

above suspicion. As Attorney General

and Leader of the House, as well as of the

Government, he was a painstaking adminis-

trator, his personal worth and amiable char-

acter inspired universal confidence, and for-

warded the bond that cemented his party. We

do not claim perfection for him or for any man;

he, like others in public life, made mistakes,

but they certainly did not arise from selfish

or personal motives. So far as we know, he

never sought or bargained for office, position

or business, and he never sought or accepted

any honor. We never knew Mr. Fraser to say

that the press should correct its utterance in

regard to him, even when they may not have

done him justice, nor did we ever know him

to seek to inspire the press. The editor of

this paper as Mr. F. was generally able to

support Mr. Fraser, but whether able to do

Mr. Fraser's Record in York.

In the contest in which the Hon. Mr.

Fraser will enter ere long, the greatest stress

of opposition will be directed against the

interest of the City and County. During

the course of his career, he has had persistent

detectors and deprecators, who have en-

deavored to embarrass him, and, in fact,

crush him by the demands made on him for

the construction of public works in the

County. But the Journals of the House,

proves that in promoting the construction

of great and permanent works, and improve-

ments, he acted wisely, judiciously, and ef-

fectively, and proved himself a splendid ben-

efactor to his city and county. In fact with-

out undue labor without attempting im-

possibilities, he has been the means of procuring

great public works, which, if he had given

way to the pressure put on him, and en-

deavored to accomplish all at once, he would

not have been able to do. We happen to

know from statements which have been made

in the Legislature, and not contradicted that

a determined effort was made in the winter

of 1870, by the opponents of Mr. Fraser, to

crush him as Provincial Secretary, and with

the view to that end, an unseen but in-

fluently arranged so as to include a num-

ber of Mr. Fraser's political friends, to wait

upon the Government claiming for York a

number of public works, a bridge across the

St. John, New Parliamentary Buildings, a

Normal School Building. It was industri-

ously circulated through the constituency,

that Mr. Fraser had no influence in the Gov-

ernment, and was quite willing to resign

the Premier, Mr. King. But the course he took

was proof of his good judgment, and entire

disproof of the slanders against him. In the

session of 1878, he secured the passage of a

resolution, by a unanimous vote, for plans

and specifications and tenders for the erec-

tion of a Normal School for plans and speci-

fications, and immediately after promulgation

of the same, he had the work commenced, and

within a year the present Buildings were

opened. With the exception of an eloquent

speech from Mr. Elder, the sole credit of

the policy of hastening slowly, which, on the

highest classical authority, is the wisest

policy, he moved in the matter of procuring

New Parliamentary Buildings. In the canvass

during the election of 1878, insincerity was

imputed to him by his chief opponent. But

his course rebutted that slander. He secured

a vote of the Legislature for plans and speci-

fications, and would assuredly have carried

through the matter, as he did the Normal

School Buildings. Then, the fire occurred

which brought on the Capital question. Mr.

Fraser then proved himself to be the staunch-

est friend of this city, while if current rum-

or did not suitly belie him, the Leader of

the Opposition in that crisis of the fate of

Fredericton, was with difficulty restrained

from moving one of his votes of confidence,

and perilling all. An analysis of the votes on

the Capital question shows how great, how

superior was his position. Mr. Fraser with-

out the discharge of his duties, he was one of

the hardest worked men in political life, often

helping colleagues in matters that pro-

duced to him the heaviest burden, being

always at headquarters. In his relations

to the finances as Provincial Secretary and

Receiver General, he was like Caesar's wife

above suspicion. As Attorney General

and Leader of the House, as well as of the

Government, he was a painstaking adminis-

trator, his personal worth and amiable char-

acter inspired universal confidence, and for-

warded the bond that cemented his party. We

do not claim perfection for him or for any man;

Mr. Black and the Stock Farm.

We hear from Westmorland, that Mr.

Black continues his opposition to the Stock

Farm. He has a perfect right to form his

own opinion on this, or any other subject,

but he has no right to misrepresent the mat-

ter to the people of Westmorland, many of

whom have not the opportunity of obtaining

more correct information.

Mr. Black has very few sympathizers in

his opposition to this establishment, we can-

not recall any new project that has been

generally approved by the people as this.

A large majority say it is a matter of right

direction, and others say they are willing to

give it a fair trial. We have not the oppor-

tunity of continuing to visit it, unless a very

few of us could get there.

These gentlemen get their backs up against

the government on account of its manage-

ment of Agricultural matters some years ago,

and they will persist in their opposition, and

we believe would do so under any circum-

stances. Mr. Black may find congenial list-

eners in the gentlemen, but their number is

small, and they will not increase his major-

ity much in the coming election.

We believe that one of the principal ob-

jections these opponents charge against the

Farm, is that it was not made a Model Farm

or College. We have heard that objection

advanced frequently by persons who had not

seriously considered the matter.

It is quite true, and cannot be denied, that

the Agricultural School of some kind should

be established in the Province, and were dis-

appointed when the Farm was adopted on the

present plan. But it is unfair to blame

the promoters of the Farm or the Govern-

ment because their idea was not carried out

in the Province is not a position, financially

to establish a College, and the Legislature

would not give the money for such an insti-

tution if it were. It is quite evident that

the time has not come for that. But is that

any reason why we should not have a breed-

ing school? The Province is much in want

of better stock, and cannot compete with

other countries until there is a general im-

provement in our cattle and sheep. Are we

not to improve our stock because we cannot

have a College? The Farm is established for

the one

Town and Country.

Morrison's Mill started saving yesterday. The Dominion Parliament was prorogued yesterday.

Mr. Pickard, M. P., returned from Ottawa yesterday.

The new purchase of hose arrived Saturday evening.

Twenty-three steamers have loaded deals at St. John since April 6th.

E. L. Wetmore, Esq., Q. C., is attending Circuit Court at St. John.

The 71st Band will have another march to-morrow evening.

The local tickets in Northumberland will not likely be formed till the Dominion election is over.

The Dominion election will be held on the 28th of June—nomination on the 21st.

The local elections will be held later.

Mr. P. Bower, Editor of the *Charlottetown New Era*, was among the defeated candidates in the recent P. E. Island election.

Hundreds of Liberal Conservatives in York, who voted in 1878 to sustain the McKenna Government, will support Hon. Mr. Fraser in the approaching contest.

At the proper time Mr. Fraser will also address the citizens of Fredericton in the Hall upon the same subject.

One of the first signs of Spring—cool and sparkling Soda Water, with choice syrups, at Davis, Staples & Co.

No military district orders are to be given, respecting drill, etc., until after the Dominion election next month.

Mr. James Hodge, has announced his intention of presenting the new St. Paul's church with a chime of bells.

Kit the Arkansas Traveller has been selected by the Chancery Commission to be given here next Monday evening.

Sheriff Mitchell of Sanbury has been seriously ill from a bilious attack, but was glad to learn he is getting better.

Lieut. Governor Wilnot has returned from Ottawa. He will present this evening at the Loyalist celebration in St. John.

For my School Books and Stationery at McCrimmon & Fraser's, the cheapest and best establishment of the kind in the city.

John Ferguson's house at Lakeside Court, Sanbury County, was destroyed by fire on the 4th inst. The loss is about \$10,000, and there was no insurance.

Ex-Ald. Vandine will have a walk over in Wellington Ward on Saturday, when the election will be held in the City Council for that Ward.

Meers, Young & Noble, of Carleton, St. John, have leased the front portion of the Phoenix Square market for a fish market, which they will open immediately.

John McLean, of Kingsland, received a kick from a cow on Tuesday, which dislocated one of his hip bones. He came to the city and had his wounds dressed by Dr. Currie.

Mr. S. F. Shute, Jeweller, has presented a handsome telescope to the University Sports Committee, for competition, and Mr. Turner Howard has conferred a similar favor, in cash.

The marriage notice of Mr. W. Egerton Everett, of Kingsland, and Miss August Patterson, of Bright, appears in the proper column. We wish the young couple much happiness.

The Truro Custom House was entered by burglars on Monday night, the safe blown open with gunpowder, and six hundred dollars in cash, and four hundred dollars in cheques stolen.

On Sunday, the anniversary Educational services will be held in the Methodist Church here, Rev. Mr. Wilnot presiding.

Conductor McQueen, late of the N. B. Railway, who has been a handsome man, died on Monday morning, and was buried in the morning, and Rev. John Read of St. John in the evening.

Isaac Leck, colored, eldest son of George Leck, Lower Kingsland, was drowned in the Asrook Tuesday, while steam driving. His body was recovered, brought home, and interred this afternoon.

Hon. Robert Young has received from the Dominion Government a handsome star-shaped sword, which he will wear on the 28th of June.

The 71st Band will leave at 7 A. M., and returning will leave St. John at 10 P. M. The orchestra, who play at the St. John next Wednesday will leave at 7 A. M., and returning will leave St. John at 10 P. M.

The *Telegraph's* Sunes correspondent says—Four thousand bushels of potatoes were shipped from the Sussex railway station to the United States during the past winter and spring, realizing the handsome sum of \$25,000.

A favorite pastime of the *Reporter* editor is writing communications to his own paper in abuse of the *Matthews Farmer*. We thought he would have discontinued such a reprehensible practice after Mr. Gregory's reminder on the hustings in 1880.

Meers, Roborough and Block who received the contract for the erection of the new Engine House of the Fredericton Railway, have commenced work on the foundation. The building will be 65 ft. x 63 ft., with a wooden roof, and walls of brick for a distance of fourteen feet.

The Dominion Government has granted a subsidy for the line of steamers to run between St. John and the islands of the Bay of Fundy. The "Dominion" will go on the route the last of June. Until then, freight will be forwarded to Eastport by the International Steamers, and thence by express.

We have received from the composer, Prof. Cadwallader, a copy of the "Fredericton Lancers," which have become so popular here. They are a set of songs, and as played by the Professor's Orchestra have received warm applause. For sale at McCrimmon & Fraser's at 50 cts. per copy.

In the Circuit Court this week, at St. John, Mr. J. G. Forbes, the irrepressible Barrister, brought a suit for damages against the *Lawson Brothers*, for confining him on Prince William Street last summer. He got a verdict for \$200 against Stanley Lawson.

His case against Herbert, not yet tried.

Rev. Mr. Gunter, of this city, while driving from Wasse to Lincoln Sunday afternoon, met with an accident by which he and a companion, Mr. N. G. Forbes, were somewhat injured. Their horse shied and pitched both out. Both found wheels of the carriage and the shafts broken, and the harness received some breaks.

The Bonnet Hop under the auspices of St. Ann's Rowing Club next Wednesday evening in the Exhibition Building, commencing at 8 o'clock. The Club are having a new pleasure boat at Onomago, and have arranged the Hop to suit their financial needs. The Fredericton Brass Band have prepared a special programme and the occasion will no doubt be pleasant.

The Woodstock Press, referring to the suit of Gregory vs. the Eastern Extension Railway Company, at Halifax, won by E. L. Wetmore, Esq., Q. C., says—"It is a victory of which Mr. Wetmore is justly proud, and confirms his right to his well-earned reputation of being one of the ablest and most successful lawyers in New Brunswick."

A fence on the premises of Alfred Day, Esq., Regent Street, caught fire yesterday afternoon, and would have communicated with the outbuildings, but for timely intervention. An alarm was sounded when Tenister Virtue was promptly on hand with his hose, which was attached to the "Alexandra," and it was quickly taken to the tank on the corner of Charlotte and Regent Streets.

There have been good shows in other City Councils lately. One in Kingston, Ont., the other night, two Aldermen evidently nearly came to blows. The newspaper report says—"The Council had a lively meeting last evening. Two or three members became unusually demonstrative, and at one time assumed a very hostile attitude. One referred to an 'old dog,' and therefore 'safe from attack,' returned that 'he could knock the spots off any of them.' The Mayor was unable to preserve order, and the meeting broke up in disorder."

Councillor Currie, of Stanley, was in this city, Tuesday, and took home with him fifty bushels of "White Russia" wheat, purchased by the Stanley Agricultural Society from Mr. J. E. Fairweather, of Hampton.

The price paid was \$2 per bushel in St. John. It will be sold on Friday at the "Stanley Arms," and the Society expect to realize some \$1000. The wheat is of a fine quality, and is very valuable for seed.

There is a very considerable snow and ice in his parish, and the ice is several inches in thickness, and the prospect for early farm work is dull.

POLITICAL NEWS AND GOSSIP.

The Approaching Dominion and Local Elections.

A Liberal-Conservative convention is being held to day at Gagetown.

Mr. R. Moffitt is announced as the opponent of Mr. Hadow, M. P., in Restigouche, the contest in a local contest will scarcely reach a great height until the Dominion election is over.

The local tickets in Northumberland will not likely be formed till the Dominion election is over.

The Dominion election will be held on the 28th of June—nomination on the 21st.

The local elections will be held later.

Mr. P. Bower, Editor of the *Charlottetown New Era*, was among the defeated candidates in the recent P. E. Island election.

TO CONSUMERS.

The production of a remedy that "may truly be said to alter the prospects of the Consumptive as to give hope of cure in not a few cases, and of much prolonging of life in by far the greater number."

It is the only remedy worthy of the name, which, if carefully and faithfully used, may arrest and cure the disease. Then, and only then, can it be said to produce a permanent benefit.

Prepared solely by Hamilton Bros., Pharmacopoeists, St. John, N. B., and for sale by Druggists and General Dealers. Price \$1.00 per bottle; six bottles for \$5.00.

The Progress of a Patient.—The following may be indicated as the progress of a cough in the absence of an efficient check in the lung-drooping remedy. First, a cold is contracted, the throat becomes inflamed, and the irritation causes a spasmodic contraction and dilation of the lungs, accompanied with a dull, heavy, and oppressive weight in the chest.

Secondly, the cough becomes more frequent, and the weight in the chest increases in violence, and as it does, aggravates the bronchial irritation until the lungs become seriously affected. Then, and only then, can it be said to produce a permanent benefit.

First, a cold is contracted, the throat becomes inflamed, and the irritation causes a spasmodic contraction and dilation of the lungs, accompanied with a dull, heavy, and oppressive weight in the chest.

Secondly, the cough becomes more frequent, and the weight in the chest increases in violence, and as it does, aggravates the bronchial irritation until the lungs become seriously affected. Then, and only then, can it be said to produce a permanent benefit.

Prepared solely by Hamilton Bros., Pharmacopoeists, St. John, N. B., and for sale by Druggists and General Dealers. Price \$1.00 per bottle; six bottles for \$5.00.

The Progress of a Patient.—The following may be indicated as the progress of a cough in the absence of an efficient check in the lung-drooping remedy. First, a cold is contracted, the throat becomes inflamed, and the irritation causes a spasmodic contraction and dilation of the lungs, accompanied with a dull, heavy, and oppressive weight in the chest.
