PISCES.

SIGNALS made at FORT GEORGE, when Vessels
are coming into HALIFAX HARBOR.

One Ball,	For one square rigged vessel.
One Ball, half hoisted,	For two do.
Two Balls close,	For three do.
Two Balls separated,	For four do.
A Pendant of any colour,	For five do.
A Pendant under one Ball	For six do.
A Pendant over a ball half hoisted,	For seven do.
A Pendant under two balls close,	For eight do.
A Pendant between two balls separated,	For nine do.
A Flag of any color	For ten or more.

The above are hoisted at the east or west yard-arm, according to the quarter the vessel first appears in, with the addition of a ball in the centre of the yard, until the vessels can be seen when one or more of the following descriptive colours will be hoisted at the mast head.

- A Union, For a flag ship with or without a squadron.
- Do. with a red pendant over it, for a two-decker.
- Do. with a blue pendant over it, for a frigate.
- Do. with a white pendant over it, for a small armed vessel.
- A red flag, pierced white, for a packet.
- A blue pendant, for a merchant ship.
- A red pendant, for a merchant brig.
- A white pendant, for a topsail sloop or schooner.
- A red flag, for a neutral man of war.
- Do. with a blue pendant under it, for a neutral merchant ship.
- Do. with a red pendant under it, for a neutral merchant brig.
- Do. with a white pendant under it, for a neutral sloop or schooner.

Enemy's Signals.

- A French Jack, for an enemy's fleet.
- A blue pendant under a French pendant, for an enemy's ship.
- A red pendant under a do. for an enemy's brig.

A white pendant under a do. for a do. sloop or schooner.

A Union Jack over enemies signals, denotes the vessels to be prizes.

Signals of Distress.

In cases when immediate assistance is necessary, a ball at the mast head, in addition to the descriptive colours of the vessel in distress, and guns occasionally, until the signal is attended to.

SIGNALS made on the Ensign Staff at FORT GEORGE.

A Red Flag denotes a vessel	From Europe.
A White Flag do. do.	do. Newfoundland.
A Blue Flag do. do.	do. West-Indies.
A Red Pendant do. do.	do. United States.
A White Pendant do. do.	A Ceaster.
A Blue Pendant do. do.	From some part of the world for which there is no particular signal.

A White Pendant over any of the above, denotes a vessel to have sailed, either before, or at the same time, with one already arrived.

SOLAR and LUNAR ECLIPSES in the YEAR 1805.

1. A N Eclipse of the Moon on the 15th of the First Month, (Jan.) in the Morning visible and total.

	h.	m.
Beginning at	2	23
Beginning of total darkness	3	26
Middle	4	16
End of total darkness	5	5
End of the Eclipse	6	3

Digits eclips'd 20 7.8 in North part of Earth's Shadow.

2. Of the Sun on the 30th of the first month (Jan.) at 2h. 44m. P. M. to us invisible. It may be seen in some of the western parts of North America in a high latitude.

3. Of the Sun on the 26th of the 6th month (June) in the afternoon, a small part only visible; the Eclipse beginning about 10 minutes before the Sun sets.

4. Of the Moon on the 11th of the 7th month (July) at 48 minutes past 4 in the afternoon, of course invisible.

5. Of the Sun on the 16th of the 7th month (July) at 7 minutes after 2 in the morning, but from the Moon's great South Latitude, will not be seen north of the Equator.

6. Of the Sun on the 20th of the 12th month (December) at 54 minutes past 7 in the afternoon, visible only in the Southern Hemisphere. The Sun will be centrally eclipsed on the Meridian in longitude $118^{\circ} 56'$. West from Halifax, and $85 1-2^{\circ}$ South latitude.

Efficacy of Blackberry Jelly, and receipt for making it.

A Man, who for many years had been affected with that dreadful disorder, the gravel and stone, was persuaded to take, every night going to bed, the quantity of a large nutmeg of this jelly. The effect of which was, that the stone was broken to pieces, and voided in grannels, some of them nearly the size of a pepper corn, manifestly appearing to be portions of a much larger substance. The man, though more than fourscore, is now enabled to discharge these stony particles without much difficulty.

To make the jelly, take blackberries before they are quite ripe, when turned red, pick them and put them in a pot; tie them up close, and put them in a kettle of water, let them stand over the fire, until they are reduced to a pulp. Then strain them, and to a pint of juice put a pound of powdered sugar.—Boil it to a jelly, and put it up for use.

The following is stated to be an infallible Cure for the Hooping-Cough.

DISSOLVE a scruple of salt of tartar in a gill of water; and ten grains of cochineal, finely powdered; sweeten this with fine sugar; give to an infant the fourth part of a table spoon full four times a day; to a child of two or three years old half a spoon full; and from four years old and upwards, a spoon full may be taken. The relief is immediate, and the cure in general within 5 or 6 days.

POSITIVE CURE FOR THE HYDROPHOBIA.

MR. VALENTINE KETTERING, a native of Germany, but for 54 years has been a resident of Pennsylvania, has communicated to the Senate of Pennsylvania, a sure cure for the bite of a mad dog, —The remedy is as follows:—

Take the herb called red chick-weed when ripe or in full bloom, gather and dry it in the shade, reduce it to powder; give a small table spoonfull at one time to a grown person in beer or water, the weight thereof must be one drachm and one scruple; the same dose for a child, but it must be administered at three different times; it may also be eaten on bread, with butter, honey or molasses: a large spoonfull for a beast, the dose weighing two drachms and one scruple. The herb must be cut fine and mixed with bran, when used green for a beast; when given to swine, mix the powdered herb with meal of any kind in little balls. It has been given at the distance of many weeks from the time of biting, and has never been known to fail. The same red chick-weed is an excellent cure for cuts and wounds on the human body, to be used as follows:—When green, mash it, drop of the juice into the wound, and bind the herb, so mashed, on. The proper time to sow the seed of this herb, is in the beginning of April, and it must be sown thin.

This plant is known in Switzerland or Germany, by the name of gawebel rother meyer, or rother honerlarn, in England, red pimpernel; and by botanists it is called *annagallies Phœnicia*: it ought to be gathered in June while in full blossom. The usual dose in Germany, is 30 grains of the powder, taken 4 times a day, and continued one week in small doses: a woman must be washed with a decoction of the herb, and some of the powder strewd in it. The person who communicated this information to the senate of Pennsylvania, informs, that it has been known and used as such by himself and ancestors for the space of 250 years. The Senate have voted their thanks to Mr. Kettering for the interesting discovery.

COPAL VARNISH.

[Communicated to the editors of the Boston Weekly Magazine.]

As the method of preparing Copal Varnish, is generally kept secret by those who are acquainted with it, and as a tradesman who is desirous of knowing it, is obliged to give sometimes an 100 dollars to another, to let him into the secret, and that upon condition of not imparting it to any one else—the following, to some, may not be unacceptable.

To make Amber or Copal Varnish.—Take of white rosin 4 drachms, melt it over a fire in a glazed vessel, after which put in two ounces of the whitest amber you can get, finely powdered; this last is to be put in gradually, stirring it all the while with a small stick, over a gentle fire till it dissolves, pouring in now and then a little oil of turpentine, as you find it growing stiff, and continue this till your amber is melted. When the varnish has been thus made, pour it into a coarse linnen bag and press it between two hot boards of oak, or flat plates of iron. Great care must be taken in making the varnish, not to set the house on fire, for the vapors of the oil of turpentine will even take fire by heat; if it should happen so to do, immediately cover the pot with a board, or any thing that will suffocate it, by which means it will be put out.

An Explanation of Several Terms used in the Almanac---for the information of the vulgar.

Circumcision; alludes to the Circumcision of our blessed Saviour on the eighth day after his birth, according to the custom of the Jews; for fulfilling of the law.

Epiphany---An appearing of light, a manifestation; alluding to the appearance of a miraculous blazing star, conducting the wise men to the place of our Saviour's abode, on the 12th day from his birth.

Purification, or Candlemas Day; alluding to the meeting of Simeon, and the offering of Candles on the 40th day after the Divine Birth, for the Purification of the Blessed Virgin: as was the custom of the Jews.

Septuagesima, about 70 days before Easter, is the third Sunday before the beginning of Lent.

Sexagesima, or the second Sunday before Lent, is about sixty days before Easter.

Quinquagesima, Shrove Sunday, or the Sunday before Lent, is so called because it is about fifty days before Easter.

Quadragesima, or the first Sunday in Lent is about 40 days before Easter.

Ember Days, are certain days set apart four times in the year, by putting embers on peoples's heads in token of humiliation.

Ash Wednesday---The first day of Lent, so called from a custom of the ancient church, of fasting and sackcloth, with ashes on their head in token of humiliation.

Shrovetide---The time just before Lent, when our ancestors were shaven or confessed their sin, in order to the more strict keeping of the ensuing Lent season.

Lent, signifies a season the spring of the year: It is a set time of abstinence and fasting for forty days before Easter.

Palm Sunday---The Sunday before Easter, on which day the people went out to meet our Saviour with boughs of palm and olive branches, when he entered into Jerusalem riding on an ass.

Passion Week---So called from our Saviour's Passion; is the week before Easter.

Easter Sunday, see the Pascha, or feast of the Passover among the Jews, Exodus ii. 3. xiii. 3. Also the day held in commemoration of the Resurrection of our Blessed Saviour.

Invention of the Cross---Kept the third of May, on account of the finding of the Cross (whereon our Saviour suffered) on that day.

Good Friday---The Friday before Easter, or the day whereupon our Saviour suffered for our sins.

Holy Thursday, or Ascension day, a festival kept in memory of the Ascension of our Blessed Saviour into heaven 15 days before Whitsunday.

Whit-Sunday, or White Sunday, answers to the Pentecost of the Jews; see Lev. xxiii, 15, 16, &c. held on the 7th Sabbath, or the 50th day after Easter. The catechumens, clothed in white robes, being admitted to the sacrament. The descent of the Holy Ghost upon the apostles, in the shape of fiery tongues seems to give it this appellation.

Rogation Week, is the week before Whitsunday. It is said to be first

instituted by the bishop of Vienna in France, Anno 452, and called Rogation week, upon account of the many extraordinary prayers and preparatory petitions made for the devotion of Holy Thursday, for a blessing on the fruits of the earth, and for averting the dismal effects of war, &c.

Trinity Sunday.---The Sunday after Whitunday, held in reverence to Holy Trinity: Father, Son, and Holy Ghost, Three Persons, and one God, blessed for ever.

Corpus Christi, is called the feast of our Lord's Holy Body; an offering made to the High Father of Heaven at the altar, for the remission of our sins; founded by Pope Urban V. and held on the Thursday in Trinity week.

All Saint's Day.---The first of November: Instituted on account of the great number of prayers offered to us by the saints on this day, and it is alledged that our prayers will be more readily heard on this day than any other on that account

All Soul's Day.---The second of November: on account of the great numbers offered to heaven for the relief of souls in purgatory, &c.

Advent Sundays, to shew the coming of Christ; the four Sundays next before Christmas day; the first of them being the nearest Sunday to St. Andrew's day, or 30th of November.

Christmas, i. e. Christ's-Mass, a festival celebrated on the 25th of December in commemoration of the birth of Christ Jesus.

Innocent's Day---the 28th of December, observed in memory of Herod's causing the innocent children to be slain; called also Childermas day.

A striking example of fidelity and gratitude in a Dumb Animal.

WHEN wife Ulysses, from his kingdom tost'd,
Long worn by wars, and long by tempests cross'd,
Full twenty years in exile and in cares,
Furrow'd with age his face, and grey his hairs,
Arriv'd at last, his kingdom then his own,
Both to his servants, and his queen unknown;
In his own palace seen to beg for bread,
Scorn'd by those slaves his former bounty fed;
Forgotten by his own domestic crew,
The grateful dog his former master knew:
Unfed, unhous'd, neglected, on cold clay
Like an old servant, now cashier'd, he lay;
Touch'd with resentment of ungrateful men---
Glad to behold his antient Lord again:
Him, when he saw, he rose and crawl'd to meet,
'Twas all he cou'd, he crawl'd and lick'd his feet;
Seiz'd with ~~new~~ joy, and walking by his side,
Own'd his returning Lord, look'd up, and dy'd.

The flavour of Malt Spirits is said to be much improved by putting three and an half ounces of family provided Charcoal, and four and an half ounces of ground Rice, into a quart of spirits and letting it stand fifteen days, frequently stirring it; then let the liquor be strained and it will be of nearly the same flavour as brandy.

An Account of Buoys.

Laid down for the better guidance of vessels sailing in and out of Halifax Harbor.

Where placed	Depth of Water	Colour of the Buoy
Litchfield Rock	15 feet	White
Mars Rock, between Chedabucto and the Litchfield Rock,	21 do.	do.
Point Pleasant Shoal, the S. E. part of it,		do.
Shoal between Cornwallis and George's Island,	50 do.	Red.

An easy method to preserve Wheat from the Weasel.

As you sack wheat, on every two or three layers of sheaves, spread some elder leaves and branches.—This was communicated to me by a farmer who tried the experiment with success last year. The same informant adds, that he has read in history that the same remedy has been applied in Europe, when they had occasion to lay up seven years stores, &c.—As the remedy is easy, it is to be hoped that farmers will avail themselves of the advantage. Exporters of flour from this state have nothing so much to fear—Inspectors ought to be guarded against this evil; no such flour ought to be suffered to leave the state—The credit our flour is to have abroad, depends upon the inspectors.

N. B. Lime applied as above will produce the same effect.

A FARMER.

STAFF OF THE ARMY,

In the Province of Nova-Scotia, New-Brunswick, and their Dependencies, under the command of Lieutenant General HENRY BOWYER.

By W. Allan 29/11

Cheap and easy method of coloring Rooms, Halls, &c.

ROOMS, halls, &c. painted in distemper or whitewashed, either rub off or peel off, which is owing to the use of glue or other size. The following has, from experience, been found a cheap and complete remedy, viz. use skimmed milk in lieu of water, and without any other size whatever: for instance, for a room of moderate dimensions, mix a little whitening with 2 or 3 quarts of milk, and if for white, use the mixture; if for pink, after one coat of that, mix a little rose-pink, well pounded and stirred in the milk and whitening; if for yellow, use Dutch pink. Walls painted in this manner, will neither soil the hands or clothes; decency and economy may be united, as any handy person may give a room a coat of this paint in about an hour. For painting on decayed figured paper, two or three coats of the first mixture made thick with whitening, will be necessary to obliterate the figure, which can be done most effectually, so as to look as well as new, and with an annual coat of first white, and then any other color desired, will last for many years. It may be necessary to observe, that milk possesses a mucilaginous quality, as a proof of which, any thing written with a black lead pencil, and made wet with it, cannot afterwards be erased, even by the Indian rubber.

OFFICERS of HIS MAJESTY'S SHIPS,

From a young Lady to her Friend the day previous to her Marriage.

To-MORROW!—yes, Eliza, to-morrow, wind tide, and my mind serving, I quit the bleak and barren shore of Maidenland, and embark on the sea of uncertainty, for the continent of Matrimony. As our course lies by the Cape of Good Hope, we have no certain compass to steer by; especially as its variations of late have been many. We must therefore trust to the strength of our vessel.

“The prosperous fate of former adventurers has induced us to explore foreign climes, in search, perhaps, of imaginary treasures. I confess I have many fears; I know Terra Incognita is a dangerous region to wander in; and we have seen many settlements made there at great expence, that have proved hardly worth keeping. No more the soothing breezes of flattery shall waft my barge and swell my sails!

“Pray for me, Eliza, that I may be preserved from the shoals and quick-sands of pride and jealousy, that I may neither split on the rocks of imprudence, be lashed by the waves of censure, nor chilled with the cold blasts of indifference; that I may never be tempted by my enemies to traffic in contraband goods, but exchanging largely in the article affection, in lieu of gentle offices, I may have frequent returns of gratitude and love; that without crowding my sails, or expecting to reach the Happy Islands, while tost on the waves of Time, I may suffer its tide to convey me gently into the quiet haven of Content.

STAFF OF THE NOVA-SCOTIA MILITIA.

Infallible remedy for the Bloody Flux, or any other Flux or Lax.

GIVE the patient a tea spoon full of red bark, (which is sold by the apothecaries in powder) every two hours, that is, 5 or 6 times a day, in any vehicle. I use warm water, because it does not readily mix with cold. I have cured every person of the bloody flux (whose sickness I heard of before their death) by this remedy, in 2 or 3 days. I solemnly assure you no person died that took it. I have used it 6 or 7 years, that is, ever since I discovered it. I gave it to about 50 persons last summer, and every one got well, though many died of the flux before I heard of their being ill. All this I can prove by many witnesses: but there is a better way than proving in these matters, to wit, making the experiment.

I am no doctor, I have no reward, and therefore do not extol myself for this medicine.

A FRIEND

The Farmer's Calendar.

JANUARY.

THIS an old custom at this season to wish our friends a happy new-year; I wish mine many, and particularly through the present inclement one, in comfortable fires, without smoky chimnies—sleigh-rides without overturning—heavy purses with a liberal hand—full tables with generous hearts, and social enjoyments without contention.

If your swine are well fatted you may now kill them, but, unless they are, you'll lose the influence of the moon.

Cattle of all kinds, and especially those made use of for draft, should now be often fed.

Much care is required within doors this month, as there is as much or more judgment to be exercised in spending out as in laying in. Cut timber for carting

Permit not your cattle to come at small fruit trees, currant or goose-berry bushes at this season.

Neglect not to improve sledding while it continues, as much business may be performed with much less expense by sledding than by carting.

I have one more precept to offer, which will close the month, that each assist his neighbour in breaking and clearing out paths when snow falls.

FEBRUARY.

Suffer not your horses to be too frequently karnassed in a pleasure-sleigh; and be careful when they are, not to suffer them to be drove by young and inexperienced drivers.

If not already supplied with a year's stock of fire-wood, delay it no longer.

Neglect not your forward cows and ewes. See that cleanliness is strictly adhered to in your barns and cow houses, without which there cannot be thrift or economy.

Fell fencing stuff, if not done already, at this quarter of the moon, and before the sap ascends to have it last long.

If you would be master of your own business, now see your farming tools put in order, and not subject yourself to borrow of your neighbour, for, remember, "the borrower is slave to the lender."

I must still recommend the manuring wet land at this season with coarse winter manure.

MARCH.

Much depends, through the ensuing season on your exertions this month—let not your hemp and flax be neglected any longer, but give it the finishing stroke.

When the weather proves unfavourable for flax, shell your Indian corn for seed and summer use; do not put it off to that precarious bereafter "any time."

As soon as the frost begins to quit its hold of the sugar maple, be prepared to take its luxuriant juice, as the first taken is much the richest.

He who cuts and cords up his fire-wood at his door at this season, will save himself at least the mortification of being told of it in July by his female domestics, ending with the epithet, "I told you so."

Hay will be found to crumble at this season, which should be sprinkled with water wherein common salt has been dissolved, but be careful poultry come not to it.

See that your fields lay not exposed to your cattle at this season.

Now you may cut scions for grafting, lay them at the bottom of a cellar, covering them with fresh earth.

APRIL.

I can remind you of nothing of more consequence at present, than the security of your fields from cattle of every kind.

Lose no time in ploughing your ground for spring grain, especially where flax is to be sown, as that requires several ploughings before sowing.

Gardens intended for early sowing sling up in ridges to become warm.

If your ground be naturally very dry sow your flax between this and the next quarter of the moon.

Plant early potatoes, but be careful not to cover them deep at this season.

Early peas may now be planted.

Roots in your gardens uncover, and move the earth about them.

Sow turnips, radishes, and early fulluds.

Complete your ploughing for summer fallow, if neglected last fall, as soon as possible.

Prepare grafts for grafting, by putting them into cold water, or sprinkling them often, a day or two before grafting.

Set fruit trees, if neglected last fall. Put out roots for seed.

Sow more lettuce seeds.

MAY.

Grudge not the docile ox good-feeding at this season, who exerts all his strength in your service; nor ever urge him beyond his strength.

If short of hay, you may now turn out your young cattle to range the woods, till your pasture gets ahead.

Sow early garden sounce, as carrots, parsnips, beets, &c. before the change.

Flax, if not sown before now, should be sown without delay.

Where dung is to be spread on lands for planting, let it be ploughed in as soon as spread, and planted; but if you can afford it, put a shovell-full of rotten manure in each hill; it will pay you at least 25 per cent interest.

Neglect no longer to wash and shear your sheep, whose fleecy load will be very burdensome to them at this season.

Spring calves may now be turned to grass. When you first turn your cattle or calves to grass, be sure to give them plenty of salt for some weeks.

Sur the ground often about early planted peas, beans, &c.

Put out cabbages for early use.
Continue to plant beans, cucumbers, &c.

JUNE.

Vegetation now begins to make rapid progress. Look well to your gardens, lest weeds impede the growth of early sown beds.

Bleed working oxen and horses, and turn them to grass.

Stick early peas.

Cross-plough fallows before they become weedy. Sow carrots and beets for winter's use.

Weed and stir the ground about Indian corn in low moist lands, before it comes to a stand, and of consequence early frost will injure it.

Vines attacked by bugs may greatly be prevented, by visiting them early in the morning and picking them off.

Set more cabbages, and hoe the former early in the morning. Let not weeds be permitted to insult the fruits of the field by raising their heads higher, or bringing forth fruit earlier. Tender plants water at evening

Cucumbers plant for pickling.

Watch your bees at 10 o'clock,

Buck-wheat may now be sown. A small piece of this grain makes fine pasture for bees through the summer.

Set French turnips and tobacco plants. Cut clover.

JULY.

Much laborious service is to be performed this month by the husbandman, which will require his best judgment to execute with the least fatigue and to the best advantage. My advice is, to begin each kind of work in season; to rise early, and be in his field at least half an hour before the sun visits the eastern hills; by this means he may perform half his daily labour before the heat of the day, and of consequence, may lie still and rest himself during the heat of it.

Hill Indian corn before it begin to stalk up. In dry land raise the earth higher two or three inches from, than at, the stalk. Forward winter grain cut without delay, and especially if it begin to blast.

Reserve your first cucumbers for seed that are of a good growth and nearest the root.

Seeds in general gather in as soon as ripe.

Plough in stubble.

Pull flax, if lodged.

Burn new lands, and prepare them for sowing, at leisure.

Suffer not weeds to go to seed in your gardens, and especially purslain, being not only prolific, but a great sponger.

AUGUST.

Let your first attention this month be to remove your winter grain into barns, if not done before. Secure your flax.

Mow natural meadows, and take the hay the same day it is mowed: when mowing, sprinkle salt among it. Before it be over ripe cut and secure spring grain; you will gain more by the flower and straw than

you will lose by the shrinking of the kernel. At this season inoculate stone fruit.

Plough stubble lands as soon as the crop is off, if intended for tillage; if for mowing, and sowing with grass seed, suffer not your cattle to feed on it for a month or six weeks.

Pull hemp not intended for seed and put it to rotting while the water is warm, to have it rot quick and be soft.

Mow bushes! mow bushes now! if you have any faith in the influence of the moon on them.

Collect in seeds as they become ripe, lest birds make waste.

Now make it a point to cut bushes that have got a-head in your mowing lands, cut them level with the surface and burn them thereon. Cut and clear out ditches.

Prepare your ground for winter grain, sow it, and if the land be very fine, plough it with a light plough. Gather cucumbers for pickling. Eye your corn-stalks.

SEPTEMBER.

The industrious husbandman will now have the pleasure of collecting in the produce of his farm in general; but in the first place see winter grain sown; and in the next, see his corn-stalks well secured.

Put your cyder-mills in order and make up your early apples into cyder, otherwise they will rot: if the cyder is not so palatable it will make good vinegar.

Get off your flax-feed at every leisure hour.

Early-planted beans and peas will wait now if not collected in.

Apples suffered to lie long under trees at this season will be found to be much injured; if they do not rot at once, the virtue of the apple decays fast; from being deprived of the benefit of the air and sun, the apple becomes torpid and sour, and will never make good cyder.

You may now put your flax a rotting without being in danger of the sun injuring it.

If any leisure offers, you may now complete laying stone wall that was not finished in the spring.

I would here observe, and may it be sufficient, that as soon as one barrel of cyder is drink out, you stop the barrel up tight from the air, otherwise it will become musty and ruin the cyder.

OCTOBER.

Winter apples should now be gathered in, as hard frosts hurt them much; remove those underneath the tree, and pick off with the hand all you can conveniently before you shake the tree.

Harvest your Indian corn without delay--the birds and squirrels I am confident will.

Potatoes not dug this week will be regretted next.

Flax that was put a rotting last month, look to often: the heavy dews at this season will rot it very fast.

Indulge not your children in eating too much fruit, and especially that which is hard and unmelow if you would save the doctor a visit.

Let not Indian corn lie long in a heap before it be husked.

Cyder finish making as soon as possible; to have it fine and clear.

grind the apples the evening previous to laying it up, lay it up early in the morning and press it out moderately.

Plough for summer fallows at every opportunity that leisure will admit.

Roots in general may now be gathered in, and the land manured and hove up in ridges for the next year's crop.

NOVEMBER.

Let your first business be this month, after your yards are cleared of summer manure, to replenish them with new materials from meadows, pond-holes, drains, &c. This particular I have repeatedly and earnestly urged, and am now almost ready to flatter myself that it has had some small influence, as I have the pleasure to observe that almost every farmer in my vicinity appears emulous in increasing this valuable treasure.

Every wise husbandman will now make provision for the security of his fields, by digging and heaping up stones for walls, to be removed the first flogging.

House your farming utensils.

It will now be the business of every prudent man to put his house and barn in a posture of defence against the winter, by banking his house, putting panes of glass in his windows, boards on his barn, &c.

Commence threshing as soon as your out-door arrangements are made for winter.

Early-made cyder should be now racked off: be careful to put it into clean casks.

Fasting swine that do not feed well, give a dose of brimstone or antimony, and it will have the desired effect.

DECEMBER.

The season is now fast advancing for the use of sleighs and sleds, which you should see in readiness. Most business performed by flogging is done to the best advantage early in the season.

The farmer, at this season, has generally a supply of cash on hand, which he will do well with, (after paying his taxes) to discharge without delay, those small sums due the doctor, merchant, mechanic and common labourer, or at least to come forward and make a complete settlement with each, and pay what he can conveniently; this will establish his credit in future with them, and be a means of knowing his own neat income.

At this inclement season be ever mindful of that invaluable blessing, your health.

"Health is the labourer's right hand;"---let him not lose it for want of caution. The healthy and ambitious too often give a strong constitution the mortal wound, while they suppose it invulnerable. The restoration of health is difficult and expensive---the art of preserving it, cheap and easy.---A celebrated physician has comprehended it in three concise maxims---"Keep your feet warm---your back straight---and your head cool."

17	2992	4488
18	3168	4752
19	3344	5016
20	3520	5280

If you would have this table for $\frac{1}{2}$ a Brick, take the Half of the Table for 1 Brick; if 2 Bricks, then double it; if for 2 Bricks and $\frac{1}{2}$, then add both these together; if for 3, double that for 1 Brick and $\frac{1}{2}$.

If you have any Number of Feet of Brick Work, at $\frac{1}{2}$ a Brick, 1 Brick, or 2 Bricks, or more, and you would reduce it to 1 Brick and $\frac{1}{2}$, than lay by the Line of Numbers, as 1245, or 6, is to 3, so is the Number of Feet, at $\frac{1}{2}$, 1, 2, 2½, or 3 Bricks to the Number of Feet, at 1½.

Cure for the Cancer—extract of a letter.

WHILE I was at Smyrna there was a girl afflicted with a cancer in her lips, and the gum was affected. The European physicians consulted on the measures to be taken, and agreed that they saw no other method than to cut it out; and the girl had already submitted herself to the decision. By an accident of that nature which men cannot account for, an old American came to them just in time to prevent the application of the knife. "Do nothing," said the American, "I will cure her;" and when he had pledged himself strongly, the physicians consented. He procured a copper vessel, newly tinned in the inside (an essential circumstance) and having poured a certain quantity of olive oil into it, he made it boil over a small fire, sufficiently to keep it gently agitated, and so for three times in twenty four hours. With this the oil resolved itself to the consistency of an ointment, and by constantly rubbing the part effected, he cured her in fourteen days.—Nothing else was done. The physicians supposed that the oil received its virtue from the tin, and it was communicated by its long boiling over the fire."

"IF you are not hanged," said a country justice to a horse-stealer, "I'll be hanged for you." "Very well, your worship," said the fellow, "if it so should happen, I hope you won't be out of the way."

The following is rated to be an infallible Cure for the Hooping-Cough.

DISSOLVE a scruple of salt of tartar in a gill of water; and ten grains of cochineal, finely powdered; sweeten this with fine sugar: give to an infant the fourth part of a table spoon full four times a day; to a child of two or three years old half a spoon full; and from four years old and upwards, a spoon full may be taken. The relief is immediate, and the cure in general within 5 or 6 days.

FROM SHENSTONE.

What a pleasure to pay one's debts. It removes the uneasiness of dependence and obligation; it affords pleasure to the creditor, and so gratifies social affection: it promotes future confidence, very interesting to an honest mind; it opens a prospect of being supplied readily, with what we want on future occasions: it affords a consciousness of our own virtue, and it is a measure we know to be right, both in point of justice, and of sound economy; and it is a main support of simple reputation.

The SEVEN PLANETS.

Natures, Qualities, and Dispositions of the Seven Planets.

- ♄ Saturn (Saturday) denotes is general land, houses, tenements, countrymen, ancient people, &c.
- ♃ Jupiter, or Jove, (Thursday, signifies judges, senators, divines, riches, law, religion.
- ♂ Mars, (Tuesday) signifies, soldiers, physicians, war, strife and debate, theft, and all manner of cruelty, &c.
- ☉ Sol the Sun, (Sunday) signifies honour, greatness, and noble persons of all degrees.
- ♀ Venus (Friday) denotes women, pleasure, pastimes, all kinds of delight, mirth, sweet odour, &c.
- ☿ Mercury, (Wednesday) denotes all kinds of scribes or secretaries, mathematicians, servants, &c.
- ☾ Luna the Moon, (Monday,) signifies women in general, all common and vulgar persons.

Ridiculous Customs and Superstitions in different Nations.

THE Mahometans believe that a reftive camel perceived Mahomet at a distance, and came to him, and fell on his knees before the prophet, who, stroking him ordered him to amend his life, and that Mahomet afterwards fed 30,000 men with a sheep's liver; that he afterwards cut the moon in two, made the mountains dance, and a roasted shoulder of mutton speak. The Musslemen assert, that the performance of such amazing prodigies, so much above all human strength and cunning, was absolutely necessary to convince stubborn minds

In the city of Bantam the inhabitants offer their first fruits to the evil spirit, and nothing to the Deity, who (they say) is great and glorious and stands in no need of their offerings.

In the Isle of Formosa, when a man is dangerously ill, they put a slip knot about his neck and strangle him, to save him from a lingering illness.

ANECDOTES.

AN Irish Peasant was taken before a magistrate on a charge of having stolen a sheep, the property of Sir Garrat Fitz-Maurice. The justice asked him, if he could read? to which he answered, "a little." "You could not be ignorant, then," said the Quorum, that the sheep found in your possession belonged to Sir Garrat, as his brand (G. F. M.) was on it." "True," replied the prisoner, "but I thought the three letters stood for *Good Fat Mutton*."

Vaccination.

Vaccination has been found in Turkey an antidote to the Plague; some persons who have been innoculated with the Cow-Pock have escaped infection, although purposely exposed to it. This progress has been tried on Dogs, but does not preserve them from the disorder peculiar to them.

*Journal of Elizabeth Woodville written by herself, Previous to
her marriage with Edward 4.*

MONDAY morning. Rose at four to help Catharine milk the cows, at six o'clock breakfasted, at seven went down to the Court with the Dutchess my mother, and gave food to twenty eight poor men and as many women, scolded Roger severely, for having discovered marks of discontent at our making him attend; and we let the dinner grow cold. At ten o'clock dinner. John Gray, one who comes often to see us, a very good young man, but what is that to me a good girl ought to give herself up entirely to the views and designs of her parents. John is but a little eater, he casts many an affectionate glance at me. At three o'clock, the house of poor Robertson reduced to ashes by accident, John Gray proposed to the company to make a subscription for this poor ruined farmer, and himself gave five pounds Sterling towards this good design.--Memorandum---he never appeared to me so amiable as at this moment, his looks were never so affecting. At four o'clock prayers, at six fed the poultry.

At seven supper. It was owing to Robertson's mishap that we supped so late.

What astonishing difference there is between the character of the women of distinction of that age, and that of the modern *bon ton*!

DESCRIPTION OF LOVE.

LOVE is like the devil, because it torments; like heaven, because it wraps the soul in bliss; like pepper, because it often sets one on fire; like sugar, because it is sweet; like a rope, because it is often the death of a man; like a prison, because it makes one miserable; like wine, because it makes us happy; like a man, because it here to-day and gone to-morrow; like a woman, because there is no getting rid of it; like a ship because it guides one to the wished for port; like a will o'th'wisp, because it often leads one into a bog; like a fierce courser, because it often runs away with one; like a little poney, because it ambles nicely with one; like the bite of a mad dog, or like the kiss of a pretty woman, because they both make a man run mad; like a goose, because it is silly; like a rabbit, because there is nothing like it. In a word, it is like a ghost, because it is like every thing, and like nothing; often talked about, but never seen, touched, or understood.

ACROSTIC.

LURED by a glance, a smile, a word, a nod,
Our fine ideas idolize this God;
Vows, oaths, epistles, oft persuasive prove,
Eyes are the sweetest harbingers of LOVE.

Preserve Plumbs.

TAKE as many pounds of Sugar, as you have pints of Plumbs, and make a Syrap of it, boil it well over a slow fire, and keep skimming it;---then take your Plumbs and throw them in, and let them boil Ten Minutes.

January

8th sailed the M^{rs} Ship *Leander*
under Comd. Sir And. Mitchell
for Bermuda. —

23. sailed W^{rs} Lyons' brig *Good*
Intent for Liverpool. ~~Eng^d~~
by her sent Footman a bill for
£20. *Stirling* on *Greenwood* & Co.
Passenger in the brig *St Johnson*
of the 6th Regt. —

27th Arrived *Heans'* Schooner
from *St. John's Newfoundland*.

30th sailed the Ship *Ruby*
for *Greenock* —

I. JANUARY, hath XXXI Days. 1805

JANUARY.

NOW gloomy winter shews his hoary head,
And Nature's face is with confusion spread;
Stern Boreas rambles forth with blustering sweep,
T' explore the continent and storm the deep:

First Quarter, 8th Day, oh. 57m. Afternoon.
Full Moon, 15 h Day, 4h. 15m. Morning.
Last Quarter, 22d Day, 10h. 31m. Morning.
New Moon, 30th Day, 2h. 44m. Afternoon.

F E B R U A R Y.

Awhile he ranges with despotic sway,
Till vanquish'd by the genial lamp of day.
The forest now appears with rueful mien,
The groves display a like ungrateful scene.

First Quarter, 6th Day, 9h. 55m. Afternoon.
Full Moon 13th Day, 4h. 28m. Afternoon.
Last Quarter, 21st Day, 7h. 8m. Morning.

Capt. Egerton 89th R.F.
- 28th Tobin's schooner sailed for
Placentia Newfoundland
in her the Gen's dispatch was
forwarded to W. G. Sherrett

M A R C H.

No chearful verdure beautifies the field,
Nor can the vales their wonted odours yield:
The open lawns, with each dilated plain,
No semblance of their former bloom retain.

New Moon, 1st Day, 6h. 15m. Morning.
First Quarter, 8th Day, 5h. 22m. Morning.
Full Moon, 15th Day, 5h. 35m. Morning.
Last quarter, 23d Day, 3h. 54m. Morning.
New Moon, 30th Day, 6h. 39m. Afternoon.

& Capt. Dalrymple R.N.

VII. JULY, hath XXXI Days, 1805.

JULY.

With languid heat the sun pursues his race,
 And meets stern Leo with his sultry brow:
 His coursers hasting through the circling space,
 He beams prolific heat on all below.

First Quarter, 3rd Day, 2h. 27m. Afternoon.
 Full Moon, 11th Day, 4h. 48m. Afternoon.
 Last Quarter, 19th Day, 11h. 12m. Morning.
 New Moon, 26th Day, 2h. 7m. Morning.

AUGUST.

The fruitful herbage now invites the scythe,
 And waving heads to meet the mower's sweep;
 The healthy swains in eager contest drive,
 Who works the fastest, or who cuts most deep.

- 23^d Arrived HMS loop Osprey from Antigua with a store ship under convoy

IX. SEPTEMBER, hath XXX Days. 1805.

S E P T E M B E R.

Now scorching heat to distant fields retires;
Cancer no more the solar blaze inspires,
 But *Libra's* gentle heat diffuses round,
 And falling leaves with yellow paint the ground.

Full Moon, 8th Day, 9h. 23m. Afternoon.
 Last Quarter, 16th Day, 0h. 20m. Morning.
 New Moon, 22d Day, 8h. 35m. Morning.
 First Quarter, 30th Day, 2h. 43m. Afternoon.
