WATERDOWN, ONTARIO, THURSDAY, JULY 6, 1922

NO. 9.

Grace Church

REV. H. J. LEAKE, M. A., Rector
4th Sunday after Trinity

11 a. m.—Weakness.
7 p. m.—Temperance.

Thursday 2.30 p. m., W. A. meets in Parish hall. 8.30 p. m. A.Y.P.A. social evening.

Knox Church

REV. J. F. WEDDERBURN, B. A., B. D. Minister

Services at 11 a. m. and 7 p. m.

Sunday School and Bible Classes at 9.45 a. m.

Methodist Church

REV. C. L. POOLE, B. D., Pastor

Services at 11 a. m. and 7 p. m.

10 a. m. Sunday School and Bible classes.

The Y. P. S. meets on Monday evening at 8 o'clock.

Prayer Service on Thursday evening at 8 o'clock.

G. W. V. A. Notice

A meeting of the East Flamboro and Waterdown Branch of the G. W. V. A. will be held in the Drill Hall, Thursday evening, July 13th at 8 o'clock sharp. Election of officers and other important business. All members are requested to attend. Executive Committee.

Mrs. Savage, Provincial President of the King's Daughters, visited the circle last Wednesday at Mrs. Geo. Rolfs, and gave a very interesting talk on the work done throughout the world. Miss Edith Allen, a former esteemed teacher, and Miss E. Fisher, of Burlington, were welcome visitors at the meeting.

Millgrove W. I. Meeting

A large number of ladies journeyed to the home of Mrs. Geo. Porter Tuesday evening, June 27th, it being the regular meeting of the Millgrove Women's Institute. The President, Mrs. Albert Cummins presided. After the usual business was finished the following program was much enjoyed by all. A paper on "Simple meals in berry-time" by Mrs. Wm. McCartney was very instructive. Mrs. Robt. Platt gave a talk on the Silver Anniversary of the Institute. Reading by Miss J. Tuffgar and Mary Elloit, solo by Miss Ella Crocker, a trio by Mrs. Cecil Cummins, Mrs. Bernice Carey and Mrs. John Drummond, graphophone selections by Mrs. Geo. Porter. The next meeting will be held at the home of Mrs. Ed. Downey, Tuesday evening, July 18th. A good program is being provided.

Evergreen Lodge was a delightful scene on Wednesday afternoon last when Mrs. O. M. Homing was at home to about forty friends the first time since her marriage. The drawing room was tastefully arranged with roses and ferns, where Mrs. Homing received in a gown of canton crepe and black lace overdraped with corsage bouquet of sweet peas. She was assisted by her sister, Mrs. Goodram of Burlington, who wore blue canton crepe with silver trimming. The dining room was beautifully decorated with pink and white. The tea table was ably presided over by Mrs. H. G. Hand of Hamilton, and was assisted by Miss Muriel Freeman and Miss Emma Blair of Burlington and Mrs. W. G. Horning and Mrs. C. W. Drummond.

Mrs. Spens and daughter of Dundas were in the village Tuesday attending the Roy-Chaffe wedding.

Roy-Chaffe Wedding

Grace Church, Waterdown, was the scene of a charming wedding Tuesday afternoon at 2.30 o'clock, when Claire Grace, daughter of Mr. and Mrs. S. R. Chaffe of this village, became the bride of Capt. Robert Maitland Roy, reserve force, imperial army, son of Mrs. Roy, Markland street, Hamilton, and the late Alderman R. M. Roy.

The service was taken by Rev. Mr. Leake in the presence of numerous guests and other witnesses. The bride was a picture of girlish loveliness in her gown of white satin, with flowing veil caught with orange blossoms, and big bridal bouquet of Ophelia roses. Miss Beatrice Turner, B. A., was bridesmaid, and wore a mauve georgette frock, black tulle picture hat, and carried red roses. Mr. Stuart Roy, brother of the bridegroom, was best man.

Following the reception, which was held at Glencairn, the home of the bride's parents, at which sixty guests were present, Mr. and Mrs. Roy left for a motor trip. They will visit the Thousand Islands, the Adirondacks and the White mountains. They will reside at Hindustan their home at 130 Hyde Park avenue Hamilton.

Out-of-town guests were Miss Margaret Winter, Ottawa; Miss Helen Smith, Windsor; Mrs. J. W. Attack, Charleston, Virginia; Miss D. Whittier, Trenton; Miss Jessie Leonard, Dundas. This attractive group was made up of friends who were school-mates of the bride at St. Hilda's college, Toronto. Waterdown guests were Rev. and Mrs. H. J. Leake, Rev. S. and Mrs. Bennett, Mr. and Mrs. R. C. Griffin, Mr. and Mrs. P. H. Davidson and Miss Jean Davidson.

Millgrove

Mr. Weekly and Mr. and Mrs. Penick of Galt visited friends here last Sunday.

Mrs. Schrup of Pennsylvania was visiting friends in the village on Sunday last.

The Delta Alpha Bible class will meet at the home of Mrs. J. H. Drummond on Tuesday evening.

Miss Ruth Platt is visiting in West Hamilton.

Mrs. Samuel Platt of Copetown is visiting her son, Mr. Robt. Platt.

Sunday School Picnic looming up in the near future.

Greenville

Mr. Wm. Hyslop of Toronto is visiting his brother, Mr. D. A. Hyslop, Sr.

Miss Alma Gunbert is visiting relatives in Brampton.

Miss Marjorie Hyslop of Burlington has returned home after visiting her cousin, Miss Marion Hyslop.

Miss Louisa Surerus of Hamilton, visited her mother, Mrs. A. R. Surerus.

Mrs. M. Fraser has returned from a visit in Rochester.

Mrs. Metcalf and daughter Gladys visited Mrs. Maxwell Walker.

The Women's Guild had a very successful strawberry festival in the Township Hall on Tuesday evening of last week.

May Langford, Teacher.

The Devotional committee of the Ladies' Bible class will meet Tuesday evening next at the home of Mrs. M. Church.

The W. M. S. of the Methodist church will meet in the Sunday School room next Wednesday afternoon at 2.30. Mrs. Morton of Centenary Church, Hamilton, is expected to address the meeting. Mrs. C. L. Poole, Delegate to the Convention at Kitchener, will give her report. All ladies are requested to attend.

Locals

Miss Grace Alton is visiting in Buffalo this week.

Miss Fox of Bartonville is visiting with Mrs. Wm. Langton.

Mr. J. W. Griffin and family motored to Scotland on Sunday last.

Dr. S. Ross of Halifax is the guest of Douglas McGregor at Clunes this week.

Rev. C. L. Poole attended the Poole family re-union at Norwich last Tuesday.

Mr. and Mrs. Thos. Langton of Toronto are visiting friends and relatives in the village.

Mrs. C. A. Grupp and son, Paul, of Toronto, are making a short visit with friends in the village.

Mr. C. K. McGregor and son of Toronto were week end visitors with Dr. J. O. and Mrs. McGregor.

Mr. and Mrs. C. P. Roney and baby of Toronto have moved to Waterdown and are visiting with Mr. and Mrs. D. Ribson.

Mr. John Binkley of Spokane, Wash., and Mr. Roy Binkley of Greenville, spent Tuesday with Mr. and Mrs. J. W. Griffin.

J. A. McKelvie, M. P., and wife of Vernon, B. C., are visiting their nieces, Mrs. L. J. Mullock and Mrs. J. O. McGregor, this week.

Mr. and Mrs. P. W. Brown of Buffalo, and Mr. and Mrs. E. Young of Hamilton visited over the holiday with Mr. and Mrs. A. E. Alton.

Sometime Saturday night thieves entered the home of Chas. McCready and stole his motorcycle. He is offering a reward of \$25 for its recovery.

Rev. S. and Mrs. Bennetts, and daughter Beatrice, left Wednesday on a two week's motor trip to New Market, Peterboro, Kingston and other points.

The Ladies' Bible class of the Methodist church will hold a Tea and social afternoon at the home of Mrs. Joseph Tuck, Thursday, July 13th, from 3 to 6. All are welcome. Collection in aid of Sunday School fund.

The following teachers have been engaged by the Public School Board for the coming year. Mr. R. A. Riddle, Principal, Ancaster. Mrs. F. Redding, Waterdown. Miss Hadlock and Miss Morgan, Palmerston, and Miss Buchanan.

The Mission Circle will hold a social afternoon at the home of the president, Miss Hamilton, Saturday afternoon, July 15th. A good program is being provided, and all the young ladies of the congregation are cordially invited to attend.

The Third Annual Garden Party of St. Thomas Church held on the old school grounds last Wednesday was one of the best of the season. The program given by the Wilson & Kenney Co., of Toronto, was first class and greatly enjoyed by all.

Knox Church will hold a grand Garden Party at the home of Mr. C. W. Drummond, 5th concession, on Saturday, July 22nd. There will be a baseball tournament of league games in the afternoon, and a first class program in the evening. Supper will be served on the grounds.

Suppose This Were YOUR Home!

Carefully consider fire protection when you build or remodel your home.

Every waking and sleeping moment you and your family spend in an inflammable house you risk your lives.

Build for safety by using Gypsum Board and Gypsum Plaster.

Then all your partitions and ceilings will be made of material that can't burn—Gypsum.

Tight joints, no cracks or crevices, air-space insulation between walls (all features of this type of construction), positively prevent the spread of heat and flames.

Added advantages of Gypsum Board and Plaster are their sanitary and sound-proof qualities.

Ask for the Gypsum Board booklet—it's free.

DOPE FOR ROSE PESTS

How to Deal With Some Persistent Rose Enemies.

A Remedy at Hand for Every Assailant—In Cold Weather Spray in the Mornings — Generous Cows Need a Good Grain Ration.

(Contributed by Ontario Department of Agriculture, Toronto.)

Spraying with water under pressure with a fine spray is a good preventive for the various pests that infect rose bushes. This, however, is often times not full effective, but only a help.

Tobacco and Soap Solutions Effective.

Strong tobacco or soap solutions applied in the same way as stated for the water are good remedies. Three ounces of whale oil soap dissolved in a gallon of water will make a good solution for green aphids, red spider and thrip. A solution of tobacco water can be made by placing tobacco leaf stems or raw tobacco leaves in a pail, 1 1/2 or 2 pounds; fill the pail with boiling soap suds, cover up, and allow to cool. Strain and spray it on the plants as required.

Another good formula is made by mixing one part slightly sour milk and two parts of coal oil. These must be mixed (churned) together thoroughly first, then add 20 parts of water and mix thoroughly. This must be used quickly, as it does not keep long.

The following preparations sold at large seed stores are also good. Sulpho-tobacco soap and Black Leaf 40 are good remedies. These are also sold at some drug stores. Full directions for use are given on the packages. I find it an improvement to use soapy water in mixing Black Leaf 40.

These remedies are for aphids, thrip and red spider mainly.

Dealing With the Slug.
Another pest that infests rose bushes is what is known as the rose slug, a slimy green caterpillar, about one inch long, that eats the leaves and also eats into the flower. Dusting the bushes when the leaves are damp (not too wet) with dry hellebore from an old baking powder tin having a perforated lid, will help to keep down these pests; or an ounce of hellebore powder may be mixed with a gallon of water and sprayed on the plants. These are all very effective remedies for pests on rose bushes. Care must be taken, however, not only to be particular in mixing the ingredients, but also to apply thoroughly to all parts of the plant, more especially to the under side of the leaves for the white thrip and red spider, and start early in the season before the pests appear. Prevention is better than cure.

When to Spray.
In applying any of these solutions, any spraying necessary in chilly weather should be done in the morning. During the very hot weather, spraying may be done in the evening. If spraying is done in chilly weather it induces mildew. The remedy for downy or powdery mildew is to dust the plants with flowers of sulphur or spray with a solution made by mixing one ounce of potassium sulphide in three gallons of water. An application of any of these remedies should be made every week or ten days from early in the season until the end of summer. The potassium sulphide is also a good remedy for "Black Spot," another fungus disease that attacks the leaves of rose bushes. All dead or diseased leaves caused by black spot or mildew should be gathered up and burned. —The late Wm. Hunt, O. A. College, Guelph.

Feeding Young Chickens.

Young chickens should be fed from three to five times daily, depending upon one's experience in feeding, says the United States Department of Agriculture. Undoubtedly chickens can be grown faster by feeding five times daily than by feeding three times daily, but it should be borne in mind that more harm can be done to the young chickens by overfeeding than by underfeeding, and at no time should they be fed more than barely to satisfy their appetites and to keep them exercising, except at the evening or last meal, when they should be given all they will eat. Great care must be exercised not to overfeed young chicks that are confined, as leg weakness is apt to result.

Millet is a splendid smother crop and weed seed destroyer, especially when cut thickly for hay and cut early.

Fire! Burning Shingles

Pieces of burning Shingles will carry a long distance with the wind, and start other fires. Protect yourself by roofing with Steel Shingles or Corrugated Iron. I also have Steel Siding and Lath, both of which are a great aid in preventing fire.

Eases Kitchen Work

To Women Who Do Their Own Work: Suppose you could save six minutes every day in washing pots and pans—two minutes after every meal. In a month, this would amount to a saving of three hours of this disagreeable but necessary work. This saving can be made by using **SMP** enameled kitchen utensils, as their smooth sanitary surface will not absorb dirt or grease. No scraping, scouring or polishing is needed when you use Diamond or Pearl Ware. Soap, water and a dish towel is all you need. Ask for

SMP Diamond or Pearl WARE

Diamond Ware is a three-coated enameled steel, sky blue and white outside with a snowy white lining. Pearl Ware is enameled steel with two coats of pearl grey enamel, inside and out.

Be Sure You Put Them Out

CARELESSNESS with matches, cigarette butts, cigar ends, pipe ashes, camp fires, fly smudges, railway locomotives, slash-burning operations—human carelessness of some kind accounts for 97% of the forest fires which every year add further devastation to the northern areas of this province.

DON'T

DON'T take any chances with fire in Ontario's forests.
DON'T throw away cigarette or cigar butts, pipe "heels" or burnt matches until you are dead sure they are out.
DON'T neglect to drown out your fire with lots of water.
DON'T build your camp fire against a rotten log or stump; nor on windy points; nor near moss patches; nor at the base of a tree.
Build it in a former fire place, or on a flat rock, or on a spot cleared down to the true soil below, or by the edge of the water.
DON'T forget that the upper layer of ground in the forest consists of partially rotted wood which will burn.

Here are typical cases picked at random from last year's Fire Rangers' reports:

The rangers on the Ombabika to Fort Hope canoe route in the far north on July 4th found an area 10 miles long by 4 miles wide which had been swept by fire since their previous trip. A camp fire left on a portage was the cause.

A prospector on the Montreal River started a fire on July 7th which burned over 4,000 acres in Baden Township, destroying 1,000,000 feet of pine and 9,000 cords of pulpwood, and which required attention for a month.

A party of fishermen camped on Porcupine Lake, Burton Township, Parry Sound, were responsible for a fire on July 10th, which burned over 25,000 acres and 2,000,000 feet of timber.

Indians smoking moose meat started a fire on June 25th, which ran through 1,700 acres of young jack pine trees.

Careless trappers on May 7th caused a fire in Head Township, which burned over 2,280 acres, half of it young white pine.

The best way to fight forest fires is to prevent them.

Ontario Forestry Branch
Parliament Buildings Toronto, Ont.

Save Ontario's Forests They're Yours

The Habitants.

The habitants were the real colonists of New France who settled in Quebec as distinct from the Coureurs de Bois or bushrangers and trappers. The name given to habitants indicates that they were looked upon as permanent residents, who to-day constitute the bulk of the population of the Province of Quebec.

A Difference.

Della—"So you have broken your engagement! And, I suppose, of course, you returned that lovely ring?"

Cecilia—"Well, no; that wouldn't be reasonable. While I no longer like George, I admire that ring quite as much as ever, you see."

People on Farms Live the Longest.

Life on the farm is the healthiest and safest, according to statistics compiled by the United States Bureau of Labor showing the average age at death in various occupations. The farmer and farm laborer live longer than other workers. This does not "seem longer," which, it will be remembered, is the joint in the old joke concerning the longevity of married folk contrasted with bachelors and spinsters—it is longer, and official research records prove it. Farmers live to the average age of 58.5 years, blacksmiths are given three years less of life, and masons and bricklayers die at an average age of 65. The list tapers down to bookkeepers and office assistants who are given an average life of no more than 36.5 years.

Bats in full flight in the dark will avoid threads stretched across their path.

Some "Don'ts" for House-Cleaning.

Don't use water on waxed wood-work. Rub with a waxed cloth, then with a clean flannel cloth.

Don't wash all the curtains at one time and don't starch them. Use a little rice water or thin starch in the last rinse water. New curtains are not starched; why advertise that your curtains are old by starching them?

Don't beat rugs such as Brussels or Wilton on the right side. Lay them face down on the grass, beat and sweep on the wrong side. When replaced on the floors wipe the surface with a cloth wrung from hot salt water. This brightens and freshens the rugs.

Seven Rules for Poultry Raisers.

Here are seven safe rules for getting the most money from the summer flock:

1. Produce infertile eggs by removing the roosters from the flock in the summer time.

2. Provide clean nests and keep eggs clean.

3. Do not wash eggs. Gather eggs twice daily during the summer to prevent them from being heated by the hen.

4. Keep them in a cool, dry place, away from the flies.

5. Market them at least twice each week.

6. Insist that they be bought on a quality graded basis.

Meerschm Houses.

Several houses in a Spanish town are built of meerschm, a coarse variety of which is mined in the neighborhood.

ANNUAL INVENTORY.

Keep a Record of What You Own and What It Is Worth.

The man on the land can learn much about his own farming operations by taking an inventory each year. No form of record will give so much information about the year's work as will an inventory properly taken at a definitely fixed date each year. The usual time for taking an inventory of the farm business is in March, when there is least feed and unsold produce on hand. The inventory of any ordinary farm can be taken in a half day, so there is no excuse on account of shortage of time. The information gleaned about the farm business through the study made possible by inventory taking is worth many times the expenditure of time and effort.

For convenience in keeping the farm inventory any blank record book with pages wide enough to permit spacing for a number of columns can be used, and if ruled to accommodate the entries for a number of years so much the better.—L. Stevenson, Secretary, Dept. of Agriculture, Toronto.

Aunt Ada's Axioms: Someone has said that a farm is a business with a home attached; but the best farms are homes with a business attached.

Elm, maple, or even nut trees and fruit trees are good to plant along highways. The objection to fruit and nut trees is that they may be broken down by over-zealous collectors of fruit. This is not apt to happen if they are common on the highway.

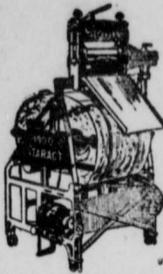

Not on Friendly Terms

The figure 8 frowns on old-fashioned washday methods. For it is the magic figure in the 1900 Cataract Electric Washer which forces the water back and forth through the clothes, in a perfect figure 8 motion four times oftener than in the ordinary washer.

The swinging wringer is reversible, and also works electrically. The copper tub hasn't one single part in it—nothing to lift out and clean after the wash is finished!

We'd be glad to deliver a 1900 Washer right to your home, and let you try it out. When you have seen what it can do, you may start paying for it on terms to suit your convenience.

Call, phone or write
1900 CATARACT WASHER

MOULDY SWEET CLOVER

Is a Dangerous Feed, Especially to Young Cattle.

Investigational Work by Provincial Veterinarians — It Makes Castration and Dehorning Risky—More Research and Experimenting Necessary.

(Contributed by Ontario Department of Agriculture, Toronto.)

Recently considerable sickness and losses have been reported among cattle being fed on ensilage. In some instances only a few animals have been affected on a particular farm, but in a few cases the losses have been serious, as one farmer is known to have lost 17 animals out of a herd of 50 cattle. The frequency and peculiarity of these losses has led the Department to have investigations and experiments made to determine the cause.

Investigational Work by Ontario Veterinarians.

The staff of the Ontario Veterinary College have been in close touch with the veterinary surgeons throughout the province, and reliable information obtained as to the prevailing circumstances where cattle have died. In all cases investigation has revealed the fact that the losses have occurred among cattle fed extensively on sweet clover ensilage which had become mouldy. Samples of the ensilage were shipped to the Veterinary College, and experiments conducted clearly indicated that mouldy sweet clover ensilage was harmful to cattle. From observations and information available at the present time, it would appear that the harm is confined to sweet clover ensilage which has become mouldy, and that the continued feeding of it is liable to cause death. **Young Cattle the First to Succumb.**

It is an interesting fact that young cattle under three years of age are the ones which suffer most severely and succumb the quickest. In illustration of this the case mentioned where in a herd of 50 cattle the 17 which died were all young cattle under two years of age and in good condition. No sickness had been present in the herd until after the feeding of the ensilage commenced, and the losses occurred within a few weeks. Apparently mature cattle over four years of age are able to withstand the ill effects better than young cattle. However, continued feeding of damaged sweet clover ensilage may be harmful to cattle of all ages.

It Makes Castration and Dehorning Dangerous.

It is also interesting to note that operations such as dehorning and castration performed on cattle that have been kept largely on mouldy sweet clover ensilage caused sudden death in many cases, while the same operations similarly performed on cattle fed differently have not been followed by ill effects. The exact nature of the poisonous factor associated with the ensilage, and the manner in which it produces harmful effects in cattle and to cause their death has not yet been definitely determined, and any opinions expressed at the present time are based on practical observations.

More Research and Experimenting Required.

In fact a large amount of intense study, investigation and research will be necessary to obtain reliable conclusions regarding the possible dangers incidental to the feeding of mouldy sweet clover ensilage, or as to whether sweet clover cut at certain stages and under certain conditions develops harmful properties as silage. In the meantime sufficient evidence is at hand to justify warning farmers against the feeding of mouldy ensilage to live stock in order to avoid losses, and under no circumstances should operations including dehorning and castration be performed on cattle which are being fed on sweet clover ensilage if it appears mouldy. Such animals seem to develop marked vascular changes which produce a tendency to internal hemorrhage resulting in death.—Dr. C. D. McGilvray, President, Ontario Veterinary College, Toronto.

Clover Seed Grown at Home Is Safest.

Clover seed from Italy and other countries of similar climate produces plants that are not hardy in northern districts of Canada and the United States. In 1919 four and one-half millions of pounds of this seed came into the United States. This seed is not sold to farmers in the condition that it comes in, because seed-houses know it is inferior and will not produce good crops. Therefore it is mixed with native clover seed and undoubtedly is the cause to a considerable extent of the unsatisfactory clover crops.

The only way to be safe is to buy from reliable firms which will guarantee the source of the seed or purchase from growers in the immediate vicinity.

When purchasing direct from growers care should be exercised to secure seed free from noxious and otherwise troublesome weed seeds.—A. C. Army, University of Minnesota.
