

FIFTH SESSION—THIRD PARLIAMENT.

THURSDAY, Feb. 25. In reply to Mr. Higginbotham, Mr. Mackenzie said representations had been made to the Imperial Government respecting the treatment of Canadian cattle on their arrival in England...

Mr. Mackenzie made a few observations. Mr. Tupper called the Premier's attention to the fact that he had no right to speak, having spoken before...

Mr. Mackenzie moved the second reading of the bill to provide that persons charged with common assault should be liable as witnesses in their own behalf. The bill which introduced this session applied to all criminal cases...

Mr. Mackenzie said he was not in favour of the principle of the bill, but that he was prepared to support it as a measure of expediency. He objected to members introducing bills in the general criminal law of the country...

BUSINESS NOTICES. We wish to secure good CLUB AGENTS at every Post Office in Canada. We are prepared to give the names and addresses of any party who would be suited for this work...

The Weekly Mail.

TORONTO, FRIDAY, MARCH 8, 1878.

BROWN, BLAKE, AND THE FUTURE OF BRITISH.

Mr. BLAKE'S acceptance of the nomination of the Reform Party in South Bruce is conclusive evidence of his determination to remain in public life. It comes opportunely in explanation of his recent conduct in leaving the Government and as an index to his intentions with respect to the future.

It is not easy to meet such excesses for the course of a public man may choose to pursue; but we were always so fully conscious of the existence of other reasons for Mr. BLAKE'S anxiety to free himself from the obligations of a public man...

Thus the great apostle of Free Trade concludes that in our circumstances Protection is necessary—that policy which will give the farmer and the manufacturer and the higher prices which will people the country; retain our young men...

DISMISSAL OF THE QUEBEC GOVERNMENT. The conduct of the Lieut.-Governor of Quebec deals a serious blow at responsible government. It is unfortunately too much reason for believing that the constitutional manner in which the Province has been thrust into the hands of Mr. MACKENZIE'S unscrupulous ambition.

Let there be no mistake; the signs of the times. Mr. BLAKE is just sick enough to play part, and well enough to be ready for any emergency which may arise. Consensus of the weaker members of the Cabinet and aware of the desire for changes which exist within the Reform ranks, he has freed himself from Governmental entanglements and thrown his bids for the first position.

We are inclined to think that Mr. BLAKE has miscalculated his strength now as he has before. There is a burning desire among the Government followers in Parliament for great changes in personnel. There will be some changes, we are inclined to think, before the election takes place, but they will not be in the way of Mr. BLAKE'S ambition. He deserves no consideration.

which had ceased to represent public opinion. Inside the House the Opposition used all the resources and manoeuvres of parliamentary warfare, only to find themselves strongly rebuffed by the majority. There is nothing unconstitutional in the railway bills; they are not unreasonable; they are a necessary part of the policy by which the Government is to be carried out.

THE ISSUE. This issue between the two great parties has now been clearly defined. On the one side Protection; on the other Free Trade. The Conservatives uphold a protectionist policy, which will make the wheels of industry once more revolve and glowing; they oppose a policy of free trade, which is the basis of the Government's policy.

When I converse with your public men, I am struck by the number of those who are not only ignorant of the principles of protection, but who are also ignorant of the principles of free trade. It is only one in a hundred who are able to discuss the subject intelligently.

Apply these sound and weighty words to the case which has just started the country. Mr. ST. JOURN ignores parliament and tramples on the "deliberate" of those who represent the majority. He has turned his back on the majority, and taken from the minority a Ministry of political crooked he would be drawn up in line. Whether the Dominion Government should have the power of appointing the Lieut.-Governor has always been a question.

MR. MACKENZIE'S POSTMASTER-GENERAL. For such a paragon of perfection as he would make himself out to be, Mr. LEONARD ST. JOURN is a very ill-used man. Perhaps he has reason to feel that when he has been ill-used, it is hard, no doubt, when one has closed a bargain and pocketed the money, to be compelled to purchase silence and remove damaging documentary evidence out of the way by disgorging a large portion of the money received.

ADULTERATION OF FOOD. In our younger days we used to be startled not by any horrid by the sight of a drop of "clear" water, as it appeared under the eye-hydrogen microscope, revealing myriads of wriggling monsters, rods of dirt, fungi, and many other unwholesome and unpalatable numerals. The report on the adulteration of food, issued by the Dominion Department of Inland Revenue has similarly supplemented its exposition of the various articles of food.

EDUCATIONAL NOTES. The following is a list of the winners of prizes in the Weekly Mail club contest which closed March 1st. Let prize, Wm. Stokes, 474 subscribers. 2nd prize, Thomas Smyth, 446 subscribers.

pepper thirty out of thirty-six. The purchases of coffee, however, one may note, have only to thank themselves if they are not getting the quality they are entitled to. The quality of the coffee is not what it should be.

THE IRON AND HARDWARE TRADE IN ENGLAND. The iron and hardware trade in England is in a very depressed condition. A Cheviot manufacturer writes: "A well-known Leeds ironfounder, wishing to erect an enormous iron shed, absolutely left the whole job to a Belgian."

THE NEW RUDDER GRANGE.

It is quite a long time ago that I told her in my... I will now tell the story of a new dwelling, how we got it, and how our house-keeping prospered in it.

I have, before, given some account of the difficulties we encountered when we started out house-hunting, and it was this delightful experience which made Euphemia and my wife, declare that before we started out on a second search for a residence, we would have exactly what we wanted.

To do this we must know how other people live, we must examine into the advantages and disadvantages of the various methods of house-keeping, and make up our minds on the subject.

When we came to this conclusion we were in a city boarding-house, and we were certainly satisfied that this style of living did not suit us at all.

At this juncture I received a letter from the gentleman who had boarded with us on the canal-boat. Shortly after the receipt of the previous fall, he had married a widow lady with two children, and was now keeping house in a French style.

I could give Euphemia no clue. I suppose there was some mistake, and that was all. I went to the house, and found that we had been invited to dine, and to pass the night.

"Well," said Euphemia, "there's nothing in the world so low as to keep house like this. I must see those children." So we went to the house.

The house, as Euphemia remarked, was anything but flat. It was very tall indeed—the tallest house in the neighborhood.

"What is it?" I cried, sitting up in a great hurry. "What is it? What have you done with this house?"

"I know it," she said, "I know it. Our house is a grand affair. Little Adele is the greatest beauty in the neighborhood."

"But the grand old man?" I asked. "He is the greatest beauty in the neighborhood. He is the greatest beauty in the neighborhood."

"I hope they haven't gone to bed," she said. "I do so want to see those little things." So we went to the house.

"I hope they haven't gone to bed," she said. "I do so want to see those little things." So we went to the house.

"I hope they haven't gone to bed," she said. "I do so want to see those little things." So we went to the house.

land enough besides for small patches of corn and potatoes. The rest was left for the water, and no one can imagine how delightful it was to have a garden.

"It was a nice name," said Euphemia. "I had heard of it before. It was a nice name."

"I had heard of it before," said Euphemia. "It was a nice name. I had heard of it before."

"I had heard of it before," said Euphemia. "It was a nice name. I had heard of it before."

are being made in Devonshire to provide protection from the danger of hydrophobia. It is estimated that 25 have been bitten and 140 dogs have been destroyed.

Mr. Campbell, of Liverpool, sold a pair of high-stepping Canadian horses to Mr. Dixon, of Newcastle, for 200 guineas; also a pair of geldings to Mr. J. Smith, High Sheriff, for 200 guineas.

daily contemporary says: "A new and most destructive enemy to the potato has just been discovered in a county of such length, resembling an grub minus feet. It is soft and white on the under side of the body, while the upper surface is light brown scales. Both head and feet are furnished with short hairs, and the body is furnished with a pair of legs. It is generated in the potato itself, as a species of its grub can be found on the roots of the plant. It is not on being cut open that the substance of the grub is seen, but in a quarter of an hour, the grub is seen, hanging up in the air, and a second potato in the same field found similar to the first."
