The sun has lost its intensity, and the heat is rarely oppressive, save, perhaps, for an hour or two in the middle of the day, and then it is not sultry and stifling as we sometimes experience it a few degrees farther south. The atmosphere is delightful, the nights are cool, and refreshing, and the brightness and fisconness of the sun during the day is sortioned and mollified by an almost imperceptible gauzy veil which imparts charming mollowness to the landscape. Now is the time to enjoy the beauties of the garden. The annuals have attained their full size and are covered with bloom; the Geranium, Asters, Zimmas, Phlozes and Verbenas are in their prime. The autumn bulbs, such as Dablias and Gladioli are magnificent, and the Coleus and other foliage plants are especially brilliant.
