The stipulated capital of profits having been obtained, the Directors will be authorized to pay the first year's Dividends at the close of the present fiscal year; afterwards, each year's Dividends, in regular order, will be redeemed, as the funds of the Institution exceed the above two hundred thousand dollars. It is supposed that each person will be required to pay three annual Premiams before his Dividends will be redeemed. This feature in the conditions of this Company, over those who do not redeem or pay the Dividends will be redeemed. This return in the conditions of this Company, over those who do not redeem or pay the Dividends will the death of the insured, is peculiarly favorable to the member, as the redermption of Dividends will tassist in the payment of the Annual Premiums, after a few of the first years have elapsed, or take up notes given for Premiums.

The ussured, on surrender of his Policy; at any time after three years, will receive its equitable value. All Premiums amounting to Afty dollars, or more, on Policies running five years or longer, may be paid one half by Note; to remain a debt on the Policy, until cancelled by Dividends; or the Policy becomes a claim.

This Company was organized in December, 1846, and its prosperity has hitherto been unparalleled. It is now in the third fiscal year of its existence; and numbers (October, 1849) nearly a see thousand members; with a constantly increasing accession. Its losses have been small, compared with the numbers which might have see expected, according to the Tables of Mortality apparalleled success in business, and a strict economy in the administration of its affairs larger Dividends have been made to Policy holders than by any other Company in the United States; averaging more than 60 per cent, annually, against the Company in the United States; averaging more than 60 per cent, annually, against the

THE Advantages offered to the Public by this Institution are MANY and IMPORTANT, and the Rates of Premium quite as LOW as security to the Assured, and safety to the Office, will admit of.

The following are some of the advantages offered by this Society:

The peculiar Benefits secured to the Assured by the principle of the LOAN Department.

One half of the Premium for the first five years may be paid by the Assured's own Note: These Notes need not be paid, but may remain on Interest, to be deducted from the Policy on the death of the Assured.

the quantity of produce, not explained upon any other ground than that the stocks are exhausted. The following list of articles received at New York the third week in May, 1849 and 1850, confirms the fact. The Tribune asserts that :- " From present appearances, the falling off of receipts at this port from last year, during the month of May, will be about an Oet barrels flour, 600,000 bush. wheat, 10,000 barrels pork, and considerable inin corn, whiskey, bacon and lard :"-

> Caledonia Springs. (FROM OUR OWN CORRESPONDENT.)

JUNE 6, 1850. We arrived at this well-known and fashionable little Watering Place about six o'clock yesterday evening, after a pleasant journey of five hours by which will show them "how the money goes!"

We have, first of all, the sum of £1000, paid to the Mayor of Montreal, for the maintenance of an roads, terribly cut up by the recent heavy rains increased Police force—authorized in Council on throughout the country, was the cause of our the 10th of May. This force was in egistence for slow progress. Visiters, however, in a few days, a'very short time, and bey and getting steelf most will have nothing to dread from this inconvenience, as the dry weather now set in, together We now come to the expenses of the celebrated with the untiring exertions of the proprietor of Springs, who is engaged an leveling them, The first entry is \$1125, for horses for the will soon render the roads in perfect order. The steamer Lady Simpson, on which we embarked a Then we have £825, for saddlery, clothing and Lachine, is a new boat, handsomely fitted up, and of speed sufficiently fast to please any traveller on Mr. King McCord, £48, for a horse ard saddle- this route - the scenery of which, from Lachine May we ask, whether the gentleman, having ceased to act as Special Magistrate for Montreal, has reIndeed this in itself is well worth the trouble of the trip, being fully equal to anything we have seen on the St. Lawrence, and only surpassed by some points on the Hudson. The principal at traction is on Lake Two Mountains, where two Iroquois, have settled, and advanced a stage, and ed on a point projecting into the Lake, and used by both for religious purposes, although they kneel most scrupulously apart within its walls. We presume that this alienation between such

> At the back of the Indian villages, two huge nountains rise and stretch away in the distance and from these the Lake derives its name.

On arriving at Point Fortune, we found seven coaches in waiting for the espected visiters, the distance from Point Fortune to the Springs being thirty miles, which, as already stated, was accomplished in five hours. There are no very ineresting features to attract the attention of the tourist on this route; the country presenting almost universally a barren and desolate appearance. Quite a number of French Can have, during the last few years, squatted in this part of the country, and their farms, as a matte of course, are the worst tilled, and their cattle

may be compared to Pharosh's lean kine. Upon arriving at the Springs, the guests we received by Mr. Wilkinson, and comfortably stowed away in the large and airy apartments of Mr. Brown's Hotel, which is quite a credit to the place; indeel it is impossible to find fault either with the attendance or fare.

Three Springs, the Saline, Sulphur, and Gos, are situated in front of the Hotel, in a small ravine,

attuated in front of the Hotel, in a small ravine, not a bow-shot off; the fourth, or "Intermittent Spring," is distant two miles and a half from the others, and is a favorite walk with visiters in the Summer. To kill time may be difficult in some spots in the world, but at the Caledonia Springs it is any thing but an Herculean task; what between the circular railroad, archery, shooting, billiards, ten pins, and a host of mines games, on the strength of the summer. is quite puzzled what to take up first. One of the prettiest sights at the Springs is Mr. Wilkinson's Cottage, a visit to which is attended with no ordinary pleasure to those gifted with a love of the Fine Arts, for he has an excellent collection of pictures and other articles

Mr. Cameron's (Cornwa 1) Bill to Amend the Law of Siander and Libel, was read a second time. It is confined in its operation to Upper Canada. It is confined in its operation to Upper Canada. It is confined in its operation to Upper Canada. I believe it is copied from Lord Campbell's English Act, from which it only differs in some unimportant particulars. The measure is the same as that introduced by Mr. Cameron last Session.

The Bisi to extend the period limited to certain purposes in the Montreal Registry Act, was read a third time, and passed.

A humorous discussion took place on the motion of Mr. Baldwin, that when the House adjourn it should adjourn till Monlay. Col. Prince m desome very amusing remarks on the proposed exeursion to the Welland Canal; which he said he should not join for reasons it was not necessary to should not join for reasons it was not necessary to intend to discuss this topic, although I do really believe Tou ceny that a Priest has any right to meddle in poli-tics, or in the temporal interests of the people. I do not intend to discuss this topic, although I do really believe that, under other circumstances, your opinion would be considerably medified on this point. I will only say, that you are wrong when you assert that by an Act of Parliament Priests are disqualified from voting at elec-tions. I know there once existed an Act entitled, "An Act for better assuring the Independence of the Legislative Assembly of this Province, '(7 Vict., ch. 65.) which dis-resulted Pricate, Ministers, and persons holding certain it would appear, think that but our Legislators, who something in Society annulled, in the torte while the roll. if would appear, think that shut our Legislators, who, seemsthing in Society; annulled, in the torto white the seems that part of the Act which regarded them—(age 8 Virt., ch. 10)—and restored them to their rights of citizenships of which they had been unjustly deprived. It follows, then, that the argument you have built up, to show that the object of this law was to prevent them from exerting their influence over the elector. Gills to the ground their influence over the electors, falls to the ground. As to your opinion on Religious Corporations, I shall morely remark, that if the present Ministers have favored their establishment, they have but followed the example of their predecessors in office. Only take the trouble has very willingly consented to the demands for the es testant. By acting in this manner, they have manifeste a spirit of liberality which, in my opinion, does them gree honor; and I could wish that all those who undertake t enlighten and direct public opinion, were guided by th

same spirit.

PLANTAGENET WATER. For the past eleven years I have labored under an impaired state of the digostice organs, from which I have found stirries of the digostic organs, from which I have found stirries of the past physichas of Paris, of Beaurasis, of Crepy, and of Gresy, on the lacer; but since I Lave made use of the Plantagenet Waters, I find myself much better. My haddh has sensibly improved, and I am quite inclined to believe that, by the means of these beneficial Waters, I can be radioally cured.

MAURICE PROUX,

Soulanges, 94th May, 1850.

My disease is a Hypocomaria, which has become chronic. It feel an oppression and obstruction in the articulations of the Byinganis up to the shoulders, where the contracting of the afticulations is more aspecially feel. Since I drank of the Plantagenet Mineral Whiters, it seems to me as though my shoulders had been cleared of fifty Edispersts. Before I made use of your Mineral Waters, I never expectanted, now I expecterate a large quantity of signy matters. I think that, for these who are troubled with vitinated humours, there is no better catheric than the Plantagenet Waters, because they operate without debilinating or irritating the digestive organs. These advantages are never found with Pharmaceutich medicines, as experience as laught me; for after many false digestions, caused by a diet too sederfary, I have tried and used prerogatives of the Pharmacopoeia—which have been the source of my severe illness.

Accept, Sar, the assurance of my great consideration, Macanca Paoux.

THE VALUABLE PROPERTIES OF COFFEE. The Valuale Properties of Coffee.—
Lord Buson says, "It comforteth the brain, and
helpeth the digestion." Many other writers, both
french and highish, describe its valuable properties. They say it relieves headache; and
Doctor Thorton, in his Lectures on Botany, says,
"Those persons who regularly drink Coffee, can
never be subject to putrid fever; in fact, a cup of
Good Coffee exhibitates the mental and bodily
faculties, and nothing can be more refreshing to

Life Pifls and Phenix Bitters. These Medicines have now been before the public for a period of FIFFEEN YEARS, and during that time have muintained a high character in shout every part of the globe for their extraordinary and immediate power of restoring perfect health to persons suffering under nearly every kind of disease to which the human frame s liable.

of certificated instances, they have even rescued aufferen from the very verge of an untimely grave, after all the deed tive nestremes of the day had etterly failed; and to many thousands they have permanently secured that antiform enjoyment of health, without which life itself is but a partial blessing. So great, indeed, has their efficacy invariably and infallibly proved, that it has appeared scarcely less than miraculous to these who were acquainted with the beautifully philosophical principles upon which they are compounded, and upon which they consequently act. It was to their manifest and sensible action in purifying the springs and channels of life, and enduing them with renewed tone and vigor, that they were indebted for their name.

Unlike the host of pernicious quackeries which boast of vegetable ingredients, the LIFE MEDICINES are purely and solely vegetable; and contain neither Hercury, nor Antimony, nor Areanie, nor any other mineral, in any form whatever. They are entirely composed of extracts from rare and powerful plants, the virtues of which, though long known to several Indian tribes, and recently to some eminent pharmaceutical chemists, are altogether unknown to the ignorant pretenders to medical science; and were never before administered in so happily efficacious a combination.

The first operation is to loosen from the coats of the stemach and bowels the various impurities and crudities constantly settling round them; and to remove the hardened faces which collect in the convolutions of the spull intestines. Other medicines only partially cleanes these, and leave such collected masses biblind to produce habitual Coctivences, with all its train of evils, or sudden Diarrhesa with its imminent dangers. This fact is well known to all regular anatomists who examine the human bowels after death; and hence the prejudice of these well-informed men against the quack medicines of the ag

Costiveness, by cleansing the whole fength of the intestines with a solvent process, and without violence: all violent purges leave the bowels costive within two days.

Diarrhosa and Cholera, by removing the sharp acrid fluids by which these complaints are occasioned, and by promoting the lubricative secretion of the mucous membrane.

PILES. As a remedy for this most distressing and obstinate malady, the VEGETABLE LIFE MEDICINES deserve a distinct and emphatic recommendation. It is well known to hundreds in this city, that the former proprietor of these valuable Medicines was himself afficied with this compalant for newards of THETY-THE VERSES and

able Medicines was himself afflicted with this complaint for upwards of THIRTY FIVE YEARS; and that he tried in vain every remedy prescribed within the whole compass of the Materia Medica. He however at length tried the Medicine which is now offered to the public, and he was cured in a very short time, after his recovery had been avery nounced not only improbable, but absolutely impossible, by any human means.

FEVER AND AGUE.

For this scourge of the western country these Medicines will be found a safe, speedy, and certain remedy. Other medicines leave the system subject to a return of the disease—a cure by these medicines is permanent—TRY THEM, BE SAmedicines is permanent—TRY TISFIED, AND BECURED. Bilious Fevers and Liver Complaints.

General Debility, Loss or APPRITE, and Demans or Franties—these medicines have been used with the most beneficial results in cases of this used with the most beneficial results in cases of this description:—Kindo's Evit, and Scaperla, in its worst forms, yields to the mild yet powerful action of these remarkable Medicines. Nour Swrats, Ngavous Deslutry, Ngavous Cospilators of all kinds, Paletravious of the Heart, Painten's Collo, are speedily cared.

MERCURIAL DISEASES. TERGURIAL DISEASSES.

Persons whose constitutions have become impaired by the injudicious use of Meacurar, will find these Medicines a perfect cure, as they never fail to cradicate from the system all the effects of Meacury infinitely sooner than the most powerful preparations of Sarasparille. A single trial will place them beyond the reach of competition, in the estimation of every patient.

URQUHART'S

As ordered by the Pharmacopea of London College of Physicians

Medical Hall, 7. Great St. James' Street.

THIS Vainable Preparation has been before the public for many years, during which time it has been extensively such, and has proved eminently successful and all those discases in which this medicine is prescribed. It is considered by Physicians of the present day the very bein Medicine for re-establishing the constitution after it has undergone the effects of Mercusy. In Chronic Rheumatiem, the most marked effects have beer produced by the use of Sarangarilla, and its continued use is often attended with improvement of appetite and digention, increase of strength, the production of a more healthy state of mind, and the palitation, or, in some class, complete disappearations, pains of a Rheumatic character, &c., &c.;

Drs. McCullesh, Campbell, McDonell, and Fraser, who have extensively used it in their practice, have kindly flavoured the Proprietor with the following Certification:

ALLL. Ungegalars, Em;—Diffan Siz.—I have much pleasage in beging testimony to the failified unamons in which you prepare your Fluid Extract of the Compound Decoction of Sarsagarilla. This I am enabled to do, on account of several of my patients having derived the greatest benefit from its use.

For Constitutional Syphilis and Chronic Rheumatica, I lave praceribed it with the most marked effects, I can, therefore, without the least hestantion, recommend your preparation as one possessing all the Medicinal qualities of the Composited Decoction of Sarsagarilla, while it is at the same time more palatable, and leas aga to derauge the Stoumeh.

Your most obedient servant.

Your most obedient servent,
W. Franne, M. D.
Lecturer or Mestical Jurispredence,
McGill College.

Montread, 5th February, 1847.

I beg to certify, that I have embloyed very extensively, the 'Pluid Extent of Saraparilla,' made by Mr. Unquanty in all those diseases in which that Medicine is usually prescribed, and that I have found it is most valuable preparation. I can; moreover, state, from personal investigation, that the proprietor employs more but the purear ingredients, and bestows the greatest care and attention apon the mode of preparing this remedy.
