Technical and Bibliographic Notes/Notes techniques et bibliographiques

The Institute has attempted to obtain the best original copy available for filming. Features of this copy which may be bibliographically unique, which may alter any of the images in the reproduction, or which may significantly change the usual method of filming, are checked below.

L'Institut a microfilmé le meilleur exemplaire qu'il lui a été possible de se procurer. Les détails de cet exemplaire qui sont peut-être uniques du point de vue bibliographique, qui peuvent modifier une image reproduite, ou qui peuvent exiger une modification dans la méthode normale de filmage sont indiqués ci-dessous.

The copy filmed here has been reproduced thanks to the generosity of:

Library of the Public
Archives of Canada

The images appearing here are the best quality possible considering the condition and legibility of the original copy and in keeping with the filming contract specifications.

Original copies in printed paper covers are filmed beginning with the front cover and ending on the last page with a printed or illustrated impression, or the back cover when appropriate. All other original copies are filmed beginning on the first page with a printed or illustrated impression, and ending on the last page with a printed or illustrated impression.

The last recorded frame on each microfiche shall contain the symbol \rightarrow (meaning "CONTINUED"), or the symbol ∇ (meaning "END"), whichever applies.

Maps, plates, charts, etc., may be filmed at different reduction ratios. Those too large to be entirely included in one exposure are filmed beginning in the upper left hand corner, left to right and top to bottom, as many frames as required. The following diagrams illustrate the method:

L'exemplaire filmé fut reproduit grâce à la générosité de:

La bibliothèque des Archives
publiques du Canada

Les images suivantes ont été reproduites avec le plus grand soin, compte tenu de la condition et de la netteté de l'exemplaire filmé, et en conformité avec les conditions du contrat de filmage.

Les exemplaires originaux dont la couverture en papier est imprimée sont filmés en commençant par le premier plat et en terminant soit par la dernière page qui comporte une empreinte d'impression ou d'illustration, soit par le second plat, selon le cas. Tous les autres exemplaires originaux sont filmés en commençant par la première page qui comporte une empreinte d'impression ou d'illustration et en terminant par la dernière page qui comporte une telle empreinte.

Un des symboles suivants apparaîtra sur la dernière image de chaque microfiche, selon le cas: le symbole \rightarrow signifie "A SUIVRE", le symbole ∇ signifie "FIN".

Les cartes, planches, tableaux, etc., peuvent être filmés à des taux de réduction différents. Lorsque le document est trop grand pour être reproduit en un seul cliché, il est filmé à partir de l'angle supérieur gauche, de gauche à droite, et de haut en bas, en prenant le nombre d'images nécessaire. Les diagrammes suivants illustrent la méthode.

GREAT WESTERN RAILROAD.

THE following opinions are selected from the American Press, on the advantages and importance of the GREAT WESTERN RAILROAD; also, an expression of opinion from the most prominent citizens of Buffalo.

"The line of country for the Great Western Railway, is easy and well known. The winter is less severe than at Albany, and what is of more importance than all the rest, the trade is already there, far greater than is required to make the work eminently successful.

"As the American travel will all go by Detroit, and as that is the eastern terminus of the only Railroad likely to be carried across the Peninsula of Michigan; it is obvious that the best communication with that City is a great desideratum. If a line to that point offers equal accommodation to the Canadian trade and travel, then must we consider the case pretty well made out."—*American Railway Journal*, July 3.

"We observe that the *Toronto Patriot* in speaking of a terminus at Port Sarnia, says, "opposite to it, on the Western side of the St. Clair, is Fort Gratiot, from whence a Railroad is about being run across the great Michigan peninsula towards Chicago." This will be news to our people, inasmuch as the Northern Railroad, (which however, could hardly be said to have been projected to run towards Chicago,) has been abandoned by the State years ago, and a wagon road authorised to be built on the route of the proposed Railroad. *As it now is, there is not even a wagon road west of Fort Gratiot.* We have not room to state the objections, nay, the utter folly at the present day of building a Railroad from the Niagara River to any point on the St. Clair River, when the Detroit River, the capital of this State, the point where various Railroads already terminate, and where nine-tenths of the Western travel passes upon the line of the Central Railroad, now almost crossing the state, and upon other roads, could be reached in the same distance and by the expenditure of less capital than on the proposed route to Port Sarnia. If the terminus should be made opposite this city, there would be an almost uninterrupted chain from Boston to Chicago, and the line could never be interferred with by the construction of any other road. If the terminus should be made at Port Sarnia, our communication with Buffalo would be quicker by Lake Erie than by the proposed Railroad. A glance at the map, and a moment's reflection on the natural line of travel and freightment, will exhibit to every one the relative value of the two proposed routes."—*Detroit Daily Advertiser*, May 13.

From the *Rochester Daily Democrat*, May 20.

"A recent Rail Road Meeting in Hamilton, C.W., enabled us to obtain many facts and statistics connected with the several Railroad projects now in agitation in that Province, which we have sought for in vain elsewhere. These facts and statistics are of the greatest importance to the people on this side of the line, and we deem no apology necessary for the space which they occupy.

"The people of Canada are determined to build a Railroad from Lake Ontario to the Western waters. And this determination will be carried out. This is a point settled. It cannot be prevented from any action on this side, if any disposition were felt to interpose any obstacle to the accomplishment of this settled purpose. Any person who will take the trouble to draw a line on the map, from any point on Lake Ontario to any point on Lakes St. Clair or Huron, will not only be convinced of the feasibility of such a work, but be astonished that it has been so long delayed. Had the peninsula between these two points been within the territory of the United States, a Railroad across it would have been constructed years since. There is not another line on the continent at once so well adapted for a Railroad, and promising so abundant a return.—The Canadians have long felt this to be true; but it is only recently that they have been fully aroused to its importance; or so aroused as to determine upon action."

"The following particulars will doubtless interest many of our readers. The western terminus will be on the Detroit river opposite the city of Detroit. Thence it will pursue a north-easterly course up the valley of the Thames, through the heart of Upper Canada, a country now densely populated and of abounding fertility, to Hamilton, where the road forks, one branch leading off to Toronto, the other bearing slightly to the south of east, until it strides the Niagara river nearly opposite this city. The divergence from a straight line from this city to Detroit, in consequence of going to Hamilton, is not as great as the angle formed at Rochester in the link of road from here to Albany, and the distance is not increased by this divergence more than twenty miles. The entire length of the road will be about two hundred and forty miles, and as it is proposed to build it in the most substantial manner on a wide track, with the heaviest rail, it is thought

the time of a run from Buffalo to Detroit will not exceed ten or twelve hours at the utmost. The importance of the road to Buffalo is obvious. It will draw to this point an immense amount of travel that now seeks the seaboard by way of Oswego and Montreal, and when the New York and Erie Railroad shall be completed so that the proposed connection with that work at Hornellsville can be effected, Buffalo will enjoy the advantages of being the centre of the greatest lines of Railroad on this continent. We commend this new enterprise to the favorable consideration of our citizens, and when the time arrives for action, we trust they will be prepared to give it substantial aid."—*Buffalo Com. Advertiser, July 3.*

BUFFALO, 25th June, 1845.

We, the undersigned citizens of Buffalo, having met, with others, at the American Hotel, for the purpose of hearing Messrs. GILKISON and SHAW explain the views of the Great Western Railroad Company, Canada, are, from the statements made by these gentlemen, perfectly satisfied of the practicability of the work, and of its becoming a valuable addition to those Roads which now terminate here, as it will form a connecting link, by the shortest route, with the Road from Detroit to St. Joseph, on Lake Michigan, and afford great facilities, not only to this City, but to the State of New York generally, for transacting business, during all seasons of the year, with the Western States. And, as the Company have obtained a Charter from the Government, on the most favorable terms, we can confidently recommend the undertaking to capitalists and others, as one which is likely to become beneficial to our country, and productive to the Stockholders.

[Signed.]

OLIVER LEE,
THOS. M. FOOTE,
H. K. SMITH.

We cheerfully acquiesce in the above sentiments :

G. B. RICH,
WM. A. MOSELEY,
H. J. STOW,

H. B. POTTER,
JOY & WEBSTER,
B. D. COE,

MILLARD FILLMORE.
W. WALLACE, C. E.

I have given some attention to the above subject, and concur entirely in the expressed opinions, except as relates to the profitableness of the enterprise, about which my information is too imperfect to warrant an opinion.

[Signed.]

ALBERT H. TRACY.
