IS REGULATED AUTOMATICALLY

Money Market's Influence Over Speculation—Foreign Trade Prospects.

(Watson & Alpers, New York.)

Speculation in stocks is apparently being regulated automatically by the money market. Whenever it becomes too hot to run and to overtake money resources needed exceptionally in the top moving market, the extra cost of money that results tends to put a brake on the market. The result is the early activity and buoyancy of the week corrected by the gradual accumulation of the week. It is not that there was a sharp rise in the market, but that there was a sharp rise in the rate of interest. It is not that there was a sharp rise in the rate of interest, but that there was a sharp rise in the rate of interest.

MONETARY SITUATION

It Still Dominates the Stock Market—London Opinion.

(New York Paper.)

The stock market has been dominated some time by the uncertain monetary situation and business has been confined chiefly to operations of professionals who are trading in large amounts of stocks at a profit. The market is not a speculative market, and cannot be considered as such. The market is not a speculative market, and cannot be considered as such.

Money Market Uncertain

Those who believe that such a development is imminent base their opinion on the continued uncertainty of monetary conditions. The first relaxation in bankers' discounts here was followed by a similar relaxation in London. The market is not a speculative market, and cannot be considered as such.

London Opinion

(Special Correspondence of the Evening Post) On the London Stock Exchange, professional operators continue to speak of "American" as the "most promising market," and the public here and there, in taking a hand in the game. At the moment, however, there exists an undoubted feeling in many quarters, that history may be about to repeat itself in New York.

THE EVENING TIMES, ST. JOHN, N. B., WEDNESDAY, NOVEMBER 1, 1905.

THE EVENING TIMES.

ST. JOHN, N. B., NOV. 1, 1905

The St. John Evening Times is published at 27 and 29 Canterbury Street, every evening, (Sunday excepted) by the St. John Times Printing and Publishing Co., a company incorporated under the Joint Stock Companies Act.

IN RUSSIA

Probably the most significant item of news that came from Russia last night was the statement that the Chief Procurator of the Holy Synod, the head of the Russian church, had resigned. He has been described as a reactionary and bitterly opposed to reform. Having failed in his efforts to influence the Czar, he has resigned.

TO FIGHT CONSUMPTION

The Times some weeks ago told of the effort being made under the leadership of Princess Christian to organize for a determined fight against the ravages of consumption in the United Kingdom. The special committee which was appointed to meet in London today, and a London letter says of the work—

"The principal object of the meeting is to devise plans for raising £200,000 for the purpose of providing a sanatorium for consumptives on a site which has been secured in a healthy location in Kent. The general interest in the plan is rapidly increasing and the starting figures published by the health authorities of Great Britain have contributed no little to arouse the interest of the public in the matter."

DIFFERENCES OF OPINION

The Trades and Labor Congress of Canada has its headquarters in Toronto. The National Trades and Labor Congress of Canada has its headquarters in Montreal. Each has expressed views on the tariff question. Oddly enough, they do not agree. The Toronto committee says—

FOOLISH SPECULATION

The New York Herald sharply criticizes the recent course of Wall Street in the face of the banking position and other influences which should be considered. It says—

erful drift of sentiment in favor of a majority candidate running upon the socialistic platform of municipal ownership of public utilities. But entirely aside from these developments, the weak banking position was known, the tenderness of the foreign exchanges were already pronouncedly against New York, and warnings of the most forceful though conservative character from recognized authorities had been spread broadcast over the country. For in whatever unpleasant position the speculative element may find itself, then it has but itself, its own recklessness and heedlessness, to thank for it.

Toronto is beginning to believe that it will presently outstrip Montreal in importance as an industrial and commercial centre. In thirty years the population of Montreal has increased 165 per cent, and Toronto 82 per cent. Since 1885 the customs collections at Montreal have increased 60 per cent, and those of Toronto 192 per cent. The volume of bank clearings at Montreal has risen about 100 per cent, during the last eight years, while at Toronto the increase has been 146 per cent. In twenty years the annual value of products manufactured in Montreal have increased 60 per cent, while in the same period the manufacturing output of Toronto has increased 200 per cent.

The Montreal Gazette observes: "Promoters of new banks are figuring in reports from the west. They will probably loom bigger in the despatches than they ever will in banking rooms. The last session of parliament saw a lot of holders of charters for new banks asking time, beyond the two years granted by the law, to get their capital subscribed. The investing public is not seemingly impressed with the idea that the country is crying for new opportunities for bankers to make money."

On Sunday last most of the churches in Hamilton (Ont.) took up collections in aid of a fund to establish a sanatorium. A despatch says: "Returns are incomplete, but this was what some of the large congregations gave, including large subscriptions given previously by their wealthy members: Central Presbyterian, \$500; St. Paul's, \$200; Centenary, \$150; Christ Church Cathedral, \$250; the other churches do as well about \$20,000 will be raised in this way."

The Board of Education has added manual training to the normal school course. In this city the board of trade committee is endeavoring to get information to the board of the school board, which the board ought to get for itself. It would be interesting to know who it is that stands in the way of a full and fair consideration of this question by the school board.

Mr. Bernard Shaw, after the death of Sir Henry Irving, wrote a very unkind criticism of the great actor. A play written by Mr. Shaw has just been suppressed in New York because it "offends public decency." The value of Mr. Shaw's criticism of Irving must be considered in the light of this fact.

Police Sergeant Hipwell Today Is Forty-Four Years a Sergeant.

Sergeant John Hipwell, of the police force, today completes forty-four years of honorable service as a sergeant in the police force, and is in his fifty-fifth year as a policeman.

He is ranked in Canada about 1850, and the following year he was sworn in a member of the St. John police force. Police duty in this city at that time was arduous in the extreme, and many a wild night took place.

Some twelve years ago, on account of his advanced age, he was made court sergeant. The U. B. officer has now reached the ripe age of seventy-seven years, but retains his faculties and much of his vigor.

SUSSEX, Nov. 1.—The Quebec Express from St. John, due here at 8.30 last evening, was detained here four hours and forty minutes, and No. 1 for St. John departed five hours at Plumwisp bridge, on account of the large I. R. west, to the wreck, expecting to have the crane placed on the rails by seven o'clock. But the large crane proved harder to move than they had anticipated, and thus delayed the train. Mr. G. B. O'REGAN'S DEATH DUE TO COMPRESSION OF BRAIN

This the Opinion of Doctors Who Performed Autopsy on Boy Killed in Queen's Rink Boxing Bout—Last Night's Inquest.

"In my opinion death was caused by compression of the brain, due to the effusion of blood." This was Dr. J. W. Daniel's statement last night after making an autopsy, on the body of Chas. O'Regan, who died at the sparring exhibition in Queen's Rink Monday night. The statement of the doctor was made in the witness stand at the opening session of the inquest being held by Coroner D. E. Berryman and jury in the court house. Dr. Daniel said that such an injury would be the result of violence. A blow on the chin might produce the effusion of blood. It was possible to inflict a heavy blow with a padded surface, and there be no external evidence that the blow had been given. The heart of deceased was found to be perfectly healthy. The other witnesses examined were Chief Clerk, William O'Keefe, and Dr. Bentley, who assisted Dr. Daniel in the post mortem, and whose evidence was corroborative. Coroner Berryman presided. The jury members are S. L. Gorbell, foreman; D. Watson, R. T. Worden, R. H. B. Tennant, F. McElrath, Geo. Collinson and W. R. Small. The interest in the proceedings was well shown by the very large attendance. Occupying a place in front of the coroner's desk was Fred Northrup, who is held on charge of manslaughter in connection with O'Regan's death. It was reported that he turned upon him. He showed evidence of feeling his position keenly and several times he wept. Near him sat his counsel, A. W. MacRae. Chief of Police Clark, the first witness, swore that it had been customary for sparring exhibitions to take place in St. John, and went on to describe the steps he took to guard against a breach of the peace. "I found out that a license for a sparring exhibition to be held on Monday night had been granted to Wm. O'Keefe. I was present at the match and saw that it was conducted under perfectly legitimate circumstances. There is a difference between a sparring match and a prize fight. The gloves used by O'Regan and Northrup were not the kind of gloves used in a prize fight. The gloves used in a prize fight I did not see. I observed anything unusual in the sixth round until I saw O'Regan stagger about when he was carried into the locker room. I noticed that his breathing was very irregular and he did not gain consciousness. The witness here described the physician's efforts to resuscitate O'Regan. "As far as I know O'Regan did not receive a blow on the head or chin or under the ear, and I saw the whole match to the time of O'Regan's collapse. There was nothing to suggest to me that he was to think that the match had best be interrupted." To Mr. MacRae—"I examined the gloves and approved of them. I watched the contest all through, and it was of an amateur character. Nothing occurred to justify me in stopping it." To the coroner, the witness expressed the opinion that Northrup was better physically than O'Regan. Dr. J. W. Daniel, who made the post mortem examination, said in part: "I found the body of O'Regan well nourished, and with good muscular development. There were several small bruises about the arms. There was another abrasion on the left chest and small abrasions at the bottom of the left ear, which was somewhat swollen. There was a slight abrasion on the forehead and a small abrasion on the left side of the forehead. There were also several abrasions below the left ear. The outside covering of the brain bulged up considerably, and when it was divided about eight ounces of fluid venous blood escaped. We examined the brain, but could find no other evidence of injury or disease. The heart and lungs we found both quite healthy. There was a small clot in the right ventricle of the heart. It is common to find such when sudden death occurs. "I believe the cause of death was compression of the brain caused by the effusion of blood, through the violence that might have been caused by a blow on the chin. A blow behind or about the ear is more liable to result in locomotion of the brain than a blow given in any other region. The reason deceased staggered was the gradual effusion of blood, the gradual taking away of power, the pressure on the brain rendered him comatose, and eventually stopping the functions of the brain. It would have been impossible for the man to have entered the ring and fought, suffering from such a compression of the brain." The witness examined the gloves used in the fatal contest. "Mr. Northrup might have been eight or nine pounds heavier than the other boy, and one and a quarter inches taller. Northrup didn't have longer reach. In a prize fight, the gloves are either very light or the contestants use their bare hands. With the kind of gloves used on Monday night, I don't think any serious damage could be done. I did not see any heavy hitting, and did not see O'Regan receive blows on the head, face or neck. In the sixth round the men clinched, and I separated them. I saw O'Regan stagger toward the ropes, but didn't see him fall to his knees. Previous to the sixth round I noticed nothing wrong with O'Regan's physical condition." To Mr. MacRae—"I noticed Northrup slip down in the second round." To Coroner Berryman—"The charges are that the rupture of the venous vein was caused by a blow on the head. There was nothing to suggest to me that he was to think that the match had best be interrupted." The inquiry was here adjourned till Thursday evening next at 7 o'clock.

NOBODY IS EXEMPT

A New Preparation Which Everyone Will Need Sooner or Later.

Almost everybody's digestion is disordered more or less, and the commonest thing they do for it is to take some of the many so-called blood purifiers, cathartics. Such things are not needed. If the organs are in a clogged condition, they need only a little help and they will right themselves. Cathartics irritate the sensitive linings of the stomach and bowels and often do more harm than good. Purging is not what is needed. The thing to do is to put the food in condition to be readily digested and assimilated. Stuart's Dyspepsia Tablets do this perfectly. They partly digest what is eaten, and give the stomach just the help it needs. They stimulate the secretion and excretion of the digestive fluids and reverse the congested condition of the glands and membranes. They put the whole digestive system in condition to do its work. When this is done you need take no more tablets, unless you eat what does not agree with you. Then take one or two tablets—give them needed help, and you will have no trouble. "It's a common-sense medicine and a common-sense treatment, and it will cure every case. Not only cure the disease but cure the cause. Goes about it in a perfectly sensible and scientific way. "I have written a little book, and it is a book, but we don't publish many of them. However—Mrs. E. M. Faith, of Hyatt's Creek, Wis., says: "I have taken all the Tablets I got of you and they have done their work well in my case. I feel like a different person altogether. I don't doubt if I had not got them I should have been at rest by this time. "H. E. Willard, Onslow, Ia., says: "Mr. White, of Canton, was telling me of your Dyspepsia Tablets during last of December, from which he suffered for eight years. As I am a sufferer myself I wish you to send me a package by return mail. "Phil. Brooks, Detroit, Mich., says: "Your Dyspepsia cure has worked wonders in my case. I suffered for years from dyspepsia, but am now entirely cured and enjoy life as I never have before. I gladly recommend them." It will cost 50c. to find out just how much Stuart's Dyspepsia Tablets will help you. Try them—that's the best way to decide.

TORONTO COMING UP

It is Gaining Upon Montreal in a Fashion that Raises the Question of Supremacy.

Robert S. White, collector of customs at the port of Montreal, who visited Toronto some time ago to look into the reason for the large increase in duty collected at the port of Toronto, as compared with Montreal, has made up his mind that Montreal needs to be stirred up if it is to maintain its commercial supremacy. He thinks it may be best to Montreal's old-time rival, Toronto, before another ten years have passed away. The situation is thus summarized:— Population—In thirty years Montreal's gain, 190,000; Toronto's, 150,131. Real estate values—In 24 years, Montreal's gain, \$68,644,000; Toronto's gain, \$80,768,000. Street railway earnings—In nine years Montreal's gain, \$1,481,000; Toronto's gain, \$2,000,000. Bank clearings—In nine years Montreal's gain, \$40,000,000; Toronto's gain, \$41,200,000. Manufactures—In twenty years Montreal's gain, \$32,719,000; Toronto's gain, \$40,803,000.

HAS NO EQUAL

"I had a very bad cold which settled on my lungs. I tried many remedies but could get no relief. On the advice of a friend I purchased a bottle of Dr. Wood's Norway Pine Syrup. Before the bottle was half finished I had not the slightest cough or cold, and in my opinion Dr. Wood's Norway Pine Syrup has no equal as a cure for coughs, colds, or any affection of the throat and lungs. GREAT ADVANCE IN COAL PITTSBURGH, Pa., Oct. 26.—The Pittsburgh Coal Company has advanced prices of hard coal on the docks to 50 cents per ton, by both rail and water, and advanced the price of soft coal to 40 cents per ton. It follows an advance of 10 cents per ton in September and 10 cents per ton more in October, and makes a total advance of 20 cents in the price of soft coal this fall. The shortage of coal and the great industrial activity all over the country are the cause. The demand has been growing steadily and has been very large. This is the greatest advance ever made at one time.

New York, Oct. 31.—An invasion of the city hall was made today by a great crowd of men and boys, who were angered at the raising of a Tammany campaign banner, on which there was a red flag above the name "Hearst," and an American above the name "McClellan."

One of the speech makers was then seized by the crowd and carried to their shoulders, this way was led toward the city hall, directions being given to continue the demonstration in the mayor's presence.
