### DISTRICT AND GENERAL

The average cost per mile for high-ways constructed in the United States is \$17.120.

A youth of St. Thomas paid a fine of \$10 and costs for driving a car, being under 18 years of age.

John Atkinson, garage owner, of West Lorne, had his leg fractured and his head bruised while attempting to crank a car with his foot.

Eleven out of twenty-nine public school teachers who have tendered their resignations to the Hamilton board have done so to get married.

Inside a week two babies at Youngstown, O., were strangled to death when their heads became caught between the bars of their cribs.

The death occurred recently at the home of his daughter, Mrs. Adam Armstrong, in Detroit, of Thomas Hands, a former well-known resident of Euphemis township.

Near Springfield a farmer's binder which had been left standing in the field was literally stripped by thieves, the knife, canvas, gears and various other parts being taken.

The work is proceeding at London, Ontario, of installing underground conduits in the business section for the purpose of placing hydro-electric and telegraph wires underground.

Miss Ruth Evans, an attractive high-salaried New York stenographer, committed suicide because she bobbed her hair in the prevailing mode and afterwards regretted the act.

At Bothwell Arthur Boon had a leg fractured while drawing hay at the home of Lew Sullivan. The horses became frightened at the mower, when taking in the last load of hay.

Figures submitted at the Masonic Grand Lodge at Port Arthur show a membership this year of 94,500 compared with 88,000 last year, an increase of 6,500. The number of lodges is 525.

Warren Green, a prosperous farmer of Howard township, near Ridgeway, lost five pigs and most of their contents by fire caused by the back-firing of a gasoline engine used for pumping water.

An epidemic of infantile paralysis has broken out at Hamilton and Brantford. Doctors are divided in opinion as to whether the disease is caused by impure milk or from fifth carried by the common house fly.

The ratepayers of a school section near Chesley are considering the advisability of closing the school. For two years the school has been attended, and the cost per year was about \$1,200, or \$240 for each pupil.

Because of the great loss of life and property damage by fire during the past decade, the Ontario Government by proclamation is calling upon all citizens to exercise special care and to observe October 9 as Fire Prevention Day.

The new provincial law which gives the wives and husbands of property owners the right to vote in municipal elections will cause the addition of 8,000 names to the Toronto voters' list. The new act does not become effective until 1924.

An association has been formed by representatives of several of the municipalities interested to promote and have designated a scenic provincial highway along the river and lake from Windsor to Owen Sound to be known as the "Blue Water" highway.

Automobile markers for Ontario for 1922 are likely to be of the same general design and specifications as those in use this year, with the exception that the present black letters on a white ground will be reversed to white figures on a black ground.

John McLean, one of the oldest settlers of Dunwich township, died recently at the home of his daughter in Detroit. Mr. McLean was in his 88th year and was born in Greenoch, Scotland. He came to Canada with his parents in 1842, settling on what was then the blaze trail, but now the Currie road, in Dunwich.

Bootlegging in cigarettes is the latest industry to spring up. Since the recent excise duties were placed upon tobacco by the Dominion Government, cigarettes have gone up in price in this country. Some of the smokers are feeling the pinch and some enterprising individuals have conceived the idea of bringing over cigarettes from the States and selling them at reduced prices and still making a profit, there being no excise duties on the smokers in the States. The customs authorities, however, are keeping a close watch on the smugglers, and when a man pulls out a package of American cigarettes these days he is very apt to be called upon to give an account of where he procured it.

### WOULD ABOLISH EXAM FEES

That approximately \$4,000 was paid in fees by pupils writing in the various departmental examinations at London during the recent closing exercises in the lower, middle and upper schools is a fact which is interesting discovery made following a tabulation of the amounts received. In view of the fact that the fees are rather an expensive item, and as the money is expended solely on payment of examiners and other incidental expenses, an effort is to be made shortly by London and other Western Ontario municipalities to have the department at Toronto abolish the fee system and pay all expenses out of the provincial treasury.

### TOO GOOD TO BE TRUE

Reported Cut in Hydro Rates Lacks Confirmation

There is no official confirmation of the report published in the daily press of a substantial reduction in hydro rates to take effect from July 1st last; in which Glencoe would benefit to the extent of 25 per cent. in domestic and commercial charges and \$5 a year for each street light.

While the report was a stirring bit of good news, unfortunately there is reason to say it is unreliable. Why such a statement should find its way into print is a matter for conjecture. According to Engineer Gaby, there can be no reduction in the rates until the end of the second fiscal year on October 1st next.

That Glencoe is in line for a reduction in hydro rates there can be no doubt, but the statement published in the daily press and attributed to Sir Adam Beck is premature, to say the least. In the meantime Glencoe is billed for July at the old rate by the Ontario Hydro-Electric Power Commission.

### A DAY AT SPRINGBANK

Glencoe Sunday Schools Enjoy Their Annual Outing

The annual picnic of the Glencoe Sunday Schools was held at Springbank Park on Wednesday, July 26. The weather was ideal, there was a large turn out, and a splendid time was reported. The trip to and from the park in automobiles was a pleasing one for the children and was no less enjoyed by the adults. After lunch a program of sports was carried out, with cash prizes to winners in the various events. The awards were as follows, in order of merit:—

**Running Races**

Boys 5 years and under—Ronald Whitehall, John A. McKellar, Wm. Lethbridge, Archie McMurchy.  
Girls 5 years and under—Kathleen Graham, Eileen George, Rena Whitehall, Jean Lethbridge, Clarence Squire, Duncan McMurchy, Bert Ewing.

Girls 7 years and under—Mary Mitchell, Kathleen Ewing, Meta Dotter, Mae Backlock.  
Boys 9 years and under—Jack Bradford, Edwin Gould, Nelson Foster, Ralph Ewing.

Girls 9 years and under—Mercedes Heal, Lorene Best, Jean Keith, Jean Strachan.  
Boys 11 years and under—Gordon McEachern, Roy Munford, Campbell Miller, Robert McKellar.

Girls 11 years and under—Helen Cartledge, Eleanor Squire, Ethel McAlpine, Mercedes Heal.  
Boys 13 years and under—Gordon McEachern, Tom Hillman, Clarence Sutherland, Albert Young.

Girls 13 years and under—Agnes Squire, Eleanor Squire, Eliza McDonald, Lila McCallum.  
Boys 15 years and under—Gordon McDonald, Lowell Best, Tom Hillman, Albert Young.

Girls 15 years and under—Lila McCallum, Alma Watts, Donna McAlpine, Eliza McDonald.  
Men's free-for-all—Chester Bechill, R. D. McDonald, Jake Weaver.

Ladies' free-for-all—Donna McAlpine, Lila McCallum, Alma Watts, Emma Rycraft.  
Officials' race—Chester Bechill, Jake Weaver, Will Hagerty.

**Three-legged Races**  
Boys 12 years and under—Roy Munford and Jack McCallum, Tom Hillman and Clarence Sutherland, Alvin Hagerty and Charles George.

Girls 12 years and under—Eliza McDonald and Ethel McAlpine, Florence McKellar and Bernice Hurley, Brookes Heal and Lorene Best.

Boys 12 to 15 years—Gordon McDonald and Charles George, Jack McCallum and Roy Munford, Alvin Hagerty and Fred George.

Girls 12 to 15 years—Lila McCallum and Donna McAlpine, Wanita Hurley and Eliza McDonald.  
Boys over 15 years—Chester Bechill and R. D. McDonald, Charles George and Gordon McDonald.

**Wheelbarrow Races**  
Boys and Girls—Albert Squire and Eleanor Squire, Gordon McDonald and Eliza McDonald, Lillian Hagerty and Alvin Hagerty.

Boys—Albert Squire and Bill Ramsey, Lowell Best and Robert McKellar, Gordon McDonald and Charles George.

The Ontario Creameries of London, of which J. R. Hagerty is the representative, Glencoe, treated the children to a serving of ice cream during the afternoon. It is needless to say that this contribution to the enjoyment of the day was acknowledged with hearty cheers.

A baseball game between two picked Glencoe nines was a feature of the entertainment. The score was even enough to make the play throughout decidedly interesting.

### JUNIOR LEAGUE STANDING

R. Hawkins, of Windhorst, Sask., has invented a machine for crushing grasshoppers between rapidly revolving rollers.

### LIGHTNING CAUSES FIRE

James Simpson Loses House and Part of Its Contents

The frame dwelling house of James Simpson, just across the river, in Aldborough, was struck by lightning about four o'clock on Monday, afternoon and completely destroyed, together with a portion of the contents.

Following a loud thunder clap, Mrs. Simpson, who was alone in the house, detected a sulphurous odor and searched the house indoors to see if there was any indication of fire. Finding none she went outside and discovered the gable end of the roof to be in flames. She called her husband and son from the barn and with the assistance of neighbors who were soon on hand they did their best to quench the fire but were unsuccessful. Attention was then turned to saving the contents of the house, and most of the furniture and other articles on the ground floor were safely removed, but nearly all the contents of the upper rooms were destroyed—bedroom suites and clothing, including all the winter wear.

The house was a fine frame dwelling and its destruction is a serious loss to the family. Altogether an insurance of only \$700 was carried, which is less than one-quarter of the loss. The four children of the family were not in the house at the time and it is fortunate that no one was injured by the lightning flash.

### BASEBALL IN MIDDLESEX

Delaware and Walkers, Winners of West and North Riding Series, to Play Off for County Championship

A meeting of the baseball leagues of West and North Middlesex was held at the McKellar House on Monday evening to arrange a schedule of games to decide the winners of the Drummond-Hodgins county cup.

Delaware having been declared winners of the Lethbridge cup for West Middlesex and Walkers the winners of the Brown cup for North Middlesex, it is up to these two teams to play off for the county cup. Five games will be played (unless decided sooner by 3 games in 6) as follows:—At Delaware August 7, at Walkers August 11, at Delaware August 18, at Walkers August 25 and final game at Appin August 31.

Games start at four o'clock. Harry Singleton, editor of The Atlas, Craig Banner and president of the county league, will umpire the games. The secretary is Dugald Walker, of Walkers.

### METCALFE PIONEER PASSES

The death occurred on Tuesday, July 25th, of Daniel Taylor, a well-known and highly-respected veteran citizen of Metcalfe township. Mr. Taylor was in his 84th year, and death was due to growing infirmities of old age. He was a native of Metcalfe, and spent the whole of his long life in the community where he was born. He was one of the few remaining pioneers to whom the present generation owes so much for the wonderful heritage they enjoy today. His wife, who shared with him the joys and privations incident to life in the early days of the township, when little else but virgin forest prevailed, and neighbors were comparatively few and far between, and who helped to hew out a home from the wilderness, passed on before about twelve years ago. Mr. Taylor was one of a large family, and is survived by four brothers: William and George, of Tilbury; John of Morpeth, and Elias, of Petrolia. He also leaves five sons and one daughter: John W., of Kerwood; Robert of Morpeth; Leonard, of Strathroy, and Albert and Thomas H. of Metcalfe, and Mrs. James Towers, of Metcalfe, from whose residence the funeral was held Thursday afternoon to Strathroy cemetery.

Don't forget to come and hear

### CHAUTAUQUA HAS

WORLD INFLUENCE

Its Origin and Growth Makes Interesting History

The history of the rise and growth of Chautauqua is a most interesting story of sticking-at-it in the face of many difficulties and setbacks. In spite of indifference, and because of its genuine merit, it is now a world-wide influence and factor. Last year in Canada alone there were 1,945 Chautauquas, and this year Ontario's share will be 105. To cover this large number of stands there are two separate and distinct circuits working entirely independent of each other. The stands are 4 or 6 day-stops, according to size of the place, and the fact that almost two million people attended the Chautauqua series last year attests the growing popularity of the course. Chautauqua is not a money-making proposition. It has many objects, largely ideal in their way, and the common behind the movement could, with the same investment and organization in other fields, acquire wealth very rapidly. Instead they adhere to their hobby and belief, and find that taking the ups and downs as they come, the downs out-weigh the advances. Canada is an instance of this phase of the work. Chautauqua has now been five years operating in Canada, and so far the deficit over receipts amounts to \$27,000. This would have to be made clear of expenses in this or succeeding years before the management would even clear themselves, much less show a profit.

Circuits which are now touring America will in September be transferred to Australia and New Zealand, many of the more prominent artists accompanying the organization as they are now definitely identified with the movement. The Glencoe series comes for August 14, 15, 16 and 17, and the entertainers are of a very high standard. A meeting of the committee was held last night and final arrangements made for the sale of course tickets. Of these there are 350, which the committee are responsible for the sale of, before any part of the proceeds comes to the fund for the public library. Tickets for the full course are \$20 for adults and \$11.00 for children. They must be purchased before the course opens, as none but single admissions are sold after that time, and course tickets are much less than the cost of all entertainments if purchased separately.

### DEATH OF MRS. ALEX. STUART

Mrs. Rose Stuart received a wire yesterday morning giving news of the death on Tuesday in the home at Edmonton of her sister-in-law, Mrs. Emma Stuart, widow of the late Alexander Stuart, K.C., whose death occurred a few weeks ago. Mrs. Stuart was well known in Glencoe where she resided for a number of years both before and after her marriage. She was a daughter of the late Oliver White.

### TO QUELL THE CORN-BORER

Middlesex and Elgin Counties Placed Under Double Quarantine

The St. Thomas Times-Journal says:—The fact that Elgin and Middlesex counties are placed under a double quarantine to quell the ravages of the European corn-borer is proof conclusive of the severity of the infestation in the districts immediately surrounding St. Thomas. W. N. Keenan, in charge of the quarantine work for the Dominion Government, declared to the Times-Journal that St. Thomas was the very heart of the infected area, that the "plague" decreased in proportion to the distance from the railroad city. Mr. Keenan pointed out that it was only this year that Elgin and Middlesex counties had been placed under double quarantine. This procedure, he said, had been deemed advisable from the results of the experiments by the department last year. This double quarantine prevents any corn being shipped from the two counties mentioned to outside infected areas. This is permitted, however, in other counties where the pests are not so prevalent.

### MUST PROVIDE FOR CHILDREN

School officials throughout the province are giving considerable attention to the Adolescent Act of 1913. A certain portion of this act came into effect in 1921, but few people are apparently aware that when the fall term opens next September, it is absolutely necessary under the new act to provide accommodation for the schooling by part time courses of all children between the ages of 14 and 18 years of age. The act also provides that on and after September, 1921, all persons between the ages of 14 and 16 years must attend school for the full time during which the schools are open each year unless excused for a number of reasons. This is already being complied with and has added greatly to the difficulties of solving the overcrowded conditions in city schools. With the approach of this year's fall term, however, matters will be even worse, with the added ages referred to.

If one be troubled with corns, he will find in Holloway's Corn Remedy an application that will entirely relieve suffering.

# The Cow Puncher

BY ROBERT J. C. STEAD.

(Copyright The Munsion Book Co.)

## Synopsis of Preceding Chapters.

Dr. Hardy, famous specialist, and his daughter Irene, meet with an accident while on a motor trip in the foothills of Alberta and find a refuge in the cabin of the Elden ranch where dwell David and his dissolute father. The girl and boy promise to meet again in the future. After his father's drunken death David goes to seek his fortune in town and loses all his money at a pool table. He spends an evening with Conward, his poolroom acquaintance, and two actresses, and takes liquor for the first time. Next morning he awakes from a drunken sleep resolved to amend. He is attracted by the singing of a choir girl in a church; then he attended a Socialist meeting. When delivering coal at the home of Mr. Duncan he is offered evening tuition in return for occasional services as a coachman. Before the lesson begins a girl and young man enter the living-room.

## CHAPTER VII.—(Cont'd.)

"Edith," said Mrs. Duncan. Dave arose to shake hands, but then his eyes fell full on her face. "Oh, I know you," he exclaimed. "I heard you sing yesterday."

Slowly he felt the color coming to his cheeks. Had he been too familiar? Should he have held that back? What would she think? But when he felt her hand in his, and he knew it was all right.

"And I know you," she was saying. "I saw you turn to feel the rising color." "Yes, I know what you saw," he took up her thought. "You saw me get up and go out of church because I wouldn't sit and listen to a man say that God punished the innocent to let the guilty go free. And I won't." There was a moment's silence following this outburst, and Mr. Duncan made a new appraisal of his pupil. Then it was time to introduce Mr. Allan Forsyth. Mr. Forsyth shook hands heartily, but Dave was conscious of being caught in one quick glance which embraced him from head to heel. And the glance was satisfied—satisfied. It was such a glance as Dave might give a horse, when he would say, "A good horse, but I can handle him."

Then it was time to introduce Mr. Forsyth. Mr. Forsyth shook hands heartily, but Dave was conscious of being caught in one quick glance which embraced him from head to heel. And the glance was satisfied—satisfied. It was such a glance as Dave might give a horse, when he would say, "A good horse, but I can handle him."

Then it was time to introduce Mr. Forsyth. Mr. Forsyth shook hands heartily, but Dave was conscious of being caught in one quick glance which embraced him from head to heel. And the glance was satisfied—satisfied. It was such a glance as Dave might give a horse, when he would say, "A good horse, but I can handle him."

but they will never bring the golden age of happiness. That can come only through the destruction of selfishness, which can be destroyed only by the power of love. That is why I emphasized the motor, in our talk about the Church. It is our only chance."

Dave's talks with Mr. Duncan became almost nightly occurrences, either at the Duncan home, or when he drove the family—for the master of the house often accompanied them—or when they met down town, as frequently happened. And the boy was not slow to realize the broad nature of the task to which Mr. Duncan had set himself. His education was to be built of every knowledge and experience that could go into the rounding of a well-developed life.

(To be continued.)

## When Swamps Explode.

Nature indulges in odd tricks at times. One of her latest antics is the sudden disappearance of an enormous swamp in British East Africa. The theory is that the swamp was supported by the roof of a rocky underground cavern, and that this roof collapsed. At any rate, an immense volume of water has disappeared into the earth, leaving behind a huge, and at present unexplored, hollow.

In November, 1920, a large section of the Cullagh Bog, near Longford, burst with a roar that was heard for miles, says an English newspaper. Acres of slime gushed outwards. Luckily, there were no houses near the bog, and the only damage was to a road.

In 1910 a similar disaster took place near Castleross, in Co. Roscommon. In the middle of a November night there was a sound like thunder. Great fissures opened in the surface of the bog, and an area of more than three square miles began to slide towards the adjacent lowland. It swept on for about a quarter of a mile, overwhelming cottages and a portion of the main road.

A moving plain sliding steadily towards the sea was the terrifying spectacle witnessed in Carnarvonshire in September, 1913. This amazing performance began with rumblings like those of an earthquake. Then a large plot of grazing land began to move, its surface rising and falling like waves. Great boulders were flung out and then sucked in again. This continued until the flat, pebble-covered beach had disappeared and been replaced by the grass land.

Most people have heard of Chat Moss, in Lancashire, the great bog that was the despair of engineers for many years. In the days of Henry VIII, this mighty bog burst. It not only covered a great area with evil-smelling moss, but the peat water which ran into the Mersey destroyed thousands of fish. Great quantities of rolling moss were carried as far away as the Isle of Man.

Most people have heard of Chat Moss, in Lancashire, the great bog that was the despair of engineers for many years. In the days of Henry VIII, this mighty bog burst. It not only covered a great area with evil-smelling moss, but the peat water which ran into the Mersey destroyed thousands of fish. Great quantities of rolling moss were carried as far away as the Isle of Man.

## Separating Sunbeams.

Certain of the sun's rays have already been separated from the rest and used to cure special human disorders. There are other rays which might be captured and used to the same advantage.

"I love the merry, merry sunshine, It makes my heart so gay," ran the old song. Why is it that on bright and sunny days we feel so much better than we do when the weather is overcast and cloudy?

A noted psychologist stated recently that "it is because the human race was brought to life by the sun. The light and warmth of the sun are the natural elements of mankind."

Sunlight cures diseases and creates life.

Scientists have for a long time been cutting up sunlight to sort out its different powers and harness them for use, while X-rays have already been procured to combat certain human ills. There are other rays that can very well be extracted from the sunlight and used for scientific purposes. Some day we may be able to make ourselves happy at will—give ourselves the holiday feeling at any moment—by just pressing a switch in our homes or offices, and turning on a flow of happiness-inspiring rays.

Some people vow that they cannot cross the Equator without falling wholeheartedly and desperately in love. Perhaps in the future the fairy-tale of the magic love potion, by which the fairy prince made the fairy princess love him, will be attainable at any one's head. "Ask for Daniel Cupid's Harnessed Sunshine Love Mixture—accept no other!" on the hoardings everywhere.

Perhaps sunshine will be stored in a little box like a pocket electric lamp, and young ladies will discard powder and rouge, and will make up their complexion by applying a little concentrated sunlight to their cheeks for a few minutes until the roses appear.

All handsome men will be able to broadcast the concentrated sunlight all over their faces until they have that slightly sunburnt tint by which they are known.

But make no mistake; this article is perfectly serious. The rays of the sun have all these powers, and merely await dissecting by some scientific genius.

## Various Handshakes Used by Celebrities.

Is it possible to judge a man's character by his handshake? Dickens thought so when he described Uriah Heep's handshake—a limp, clammy taking of the hand indicative of the calculating snavery of that detestable young man. A world of difference between his handshake and the respectfully hearty grip of Peggotty, the Yarmouth fisherman!

How do the celebrities of our day shake hands—the King, for example, and the Prince of Wales.

The King just grips your hand firmly, giving it no shake whatever, while the Prince's hand is soft jerkily forward, pressing yours downward at the moment of gripping it.

Earl Hatz shakes hands with courteous firmness. He grips your hand in real soldierly fashion, with his thumb locked over your fingers. Another famous soldier, Sir William Robertson, is content with squeezing your fingers, though none too gently.

## The Prince's Serpent.

The Prince of Wales, returning from his journey around the world, brought in his baggage divers and sometimes terrible things.

The most awkward of the gifts offered to him was, without doubt, a magnificent serpent ten meters long. This serpent, to which the heat had restored some vigor, did not find the lodging given him in the Zoological Garden of London quite to his taste and refused to enter it. It took sixteen persons to compel him to move in.

## Deliverance.

I never knew a night so black, Light failed to follow on its track. I never knew a storm so gray It failed to have its clearing day. I never knew such bleak despair, That there was not a rift, somewhere.

I never knew an hour so drear, Love could not fill it full of cheer! —John Kendrick Bangs.

GETTING SMALLER EVERY DAY.

Chicago Daily News.

## Hot Weather Diet.

Midsummer days add greatly to the problems of the housekeeper. The men must be fed as usual, and they must have food upon which they can do a day's work, but there are many finicky appetites! What shall be the menu on these hot days? How shall the children be fed? What can we give to tempt grandma's appetite? What is there that will really taste good?

Fortunately the seasonable things of the garden help greatly in answering these questions. Tomatoes are not only priceless as appetite ticklers, but they do stellar work in supplying the necessary features of a meal, and are therefore very valuable, even though their actual nutritive value is small. Lettuce, cabbage, spinach, cauliflower, are all good vegetables to consider. They are as helpful in their line as the more solid articles of diet, though they will not wholly replace them. New potatoes make a good dish and may be served in a variety of appetizing ways. Milk gravies may often be served with these vegetables, and this addition will go far to supplying the needed protein element. Milk is always an important food, but especially so in hot weather. It should be used in gravies, soups, stews, puddings, custards, sauces, and in every way in which it can be worked in, because it is a food that will supply in readily digestible form the very elements that the appetite is prone to reject in other foods under stress of hot weather. As a beverage, when suitably cooled it is as tasty as any drink that can be served.

Eggs are often more appetizing than meat in hot weather and make an excellent substitute; in fact, the meat portion of the hot weather diet may be kept very low indeed, if eggs are served, and also used in custards, puddings and drinks.

## The World's Queerest Railways

The smallest public railway in the world is the Ravenglass and Eskdale line in Cumberland, says an English paper. The gauge is fifteen inches, and the length of line seven miles. There are five engines—the largest of which is eighteen feet in length and three feet ten inches in height—and two motor-coaches, while the rolling-stock consists of twenty-seven passenger coaches. In addition there are twenty-three goods wagons that hold three-quarters of a ton each.

The tiny engines perform remarkable work. The journey of seven miles is accomplished in fifty minutes, the gradient in some places being as steep as one in thirty-four.

The largest of the engines can draw a load of fourteen coaches holding eleven people each—about four and a half times its own weight. When running "light" it can attain a speed of thirty-five miles an hour. The driver sits on top of the coal in the tender, with his head and shoulders above the top of the cab!

In the busy season the staff numbers nine, and since it was opened in 1916 the little line has carried over a hundred thousand passengers and twenty-one thousand tons of goods. Altogether there are six stations, and the total cost of the line and equipment was \$55,000.

There has never been an accident on the line, although occasionally trains run off the metals. When this occurs, the driver has to get out and life the engines and coaches back again!

Another queer railway is in Lütow and Ballybunion system in the West of Ireland. The line consists of a single rail, raised about three feet from the ground. On this the train balances itself. The track runs down the centre, and the engine and coaches, which are double, hang over on either side. The locomotives have an extraordinary appearance—with their two boilers and two smoke stacks.

To add to the humor of travelling on this amazing line, passengers are frequently asked to change sides in order to maintain the balance!

Not unlike this Irish line is one built in the River Congo, in Africa. The river is not navigable to ordinary boats owing to the rapids which occur at frequent intervals. Special vessels have to be used. They consist of two boats joined together by girders which support a trolleyed wheel in calm stretches of water the vessels proceed by the ordinary means. Over the rapids there are single rails, which rise out of the water and are held up by steel arms. The boats steam up to these, and then the wheels engage, lift them out of the water, and carry them on until the rapids are passed, when the boats take to the water again.

Then there is the famous suspended railroad at Elberfeld, in Germany. It is like an ordinary tramway, except that the rails are above instead of underneath the cars. The trains run high over the streets on huge steel supports, so that the ordinary traffic is not affected.

There is a similar line in California, but in this case the cars are driven by a motor and an aeroplane propeller. Another instance of the use of a propeller as a means of locomotion is on the railway between Berlin and Hamburg. Ordinary lines and carriages are used, and the trains run at a speed of two hundred miles an hour.

Among the world's most curious lines are those which have to go up steep mountain slopes. The most unusual type is known as a rack. Between the ordinary lines is a rail with teeth like the edge of a saw. Under the engine is a cog-wheel, which grips the teeth and prevents the train from slipping backwards. The best known of these rack railways is that which ascends Snowdon, in Wales. The terminal is 3,500 feet above sea level, and although the distance is only four miles, the journey takes an hour.

## When We Are Masters.

A wealthy East Indian philosopher, when arrested and notified that all of his fortune, lands, everything he possessed, had been confiscated by the government, shouted, "Allah, Allah, I'm free!"

The poor envy the rich, but they do not realize their slavery in many cases, to mere things. Most people who have any possessions become their slaves. They are dominated by things. Their lives become so complicated with entangling interests that they are not free men or women. It is a rare thing to find a really free soul. We are so cluttered with many things, and bound in one way or another that limits and shuts us in: If we are not slaves of our property, of our possessions, we are slaves of our business, of our profession, or we are depending on things outside of ourselves—outside influence, outside capital, or pull, on the help of our friends. All these are crutches which make the soul limp, which weaken the backbone of character, take the stamina out of us, and rob us of virility of freedom.

We are absolutely free only when we rid ourselves of the domination of things; when we don't live in our property, in our business; don't depend on anything outside of our own power. Then we are masters, not slaves. Then do we discover that there is no power in things; that this source of all our power is within us.—Success.

## CLIFDEN WIRELESS STATION SEIZED AND DAMAGED BY IRISH IRREGULARS

Present Fighting is Last Lap in the Campaign of the Nationalists, Says General McKee—Wanton Destruction Wrought to Towns by Rebel Forces.

A despatch from London says:—The Irish rebels have seized and apparently put out of commission the great Marconi wireless station at Clifden, County Galway. This was one of the company's most powerful stations.

For a time officials waited with some curiosity to see whether the Irish rebels, following the example of the Russian Bolsheviks and German Spartacists, in 1919, would use the station to address messages to sympathizers throughout the world.

"However, we are now convinced from internal evidence," said a Marconi official, "that in their ignorance the Irish rebels have sufficiently damaged the station to put it beyond their possible use. We are now sending Canadian messages through our station at North Weald, England."

Clifden was the first great wireless station, dating back to 1907. Free State troops have routed the Irish rebels from virtually all important posts in Mayo. They have formed into small guerrilla bands, rounding up of which will require some time.

In Connacht, they have been likewise dispersed. Before leaving Castle Bar, they attempted, after burning the jail and military barracks, to destroy the post office, but the townspeople, headed by the clergy, made them desist.

Westport, the Irish rebels' headquarters in the west, was hastily abandoned a surprise attack Monday, the garrison fleeing to the hills.

A despatch from Dublin says:—Westport, Newport and Ballaghaderreen fell into the hands of the Irish rebels on Thursday.

The Irish rebels left the last-named town in lorries and seized motor cars. Before leaving, they set fire to the barracks. The majority of the population were strong supporters of De Valera's policy, but the order to leave under such privations as the campaign necessitated is said to have completely changed their views.

Several thousand pounds damage was done to the town before the Irish rebels left. It is the centre of the constituency of East Mayo and is represented in the Irish Parliament by De Valera.

In Claremorris, recently captured by the Nationalists, General John J. Mc-

Keon, commander of the Nationalists, delivered a speech, in which he said: "The National troops do not come as dictators. They come as protectors of lives and property, and we are prepared, if necessary, to protect them at the sacrifice of our own lives."

He referred to the present fighting as the last lap in the campaign of the Nationalists.

A later despatch from Dublin says:—The Free State Cabinet refused to consider the suggestion at the recent meeting in Cork for an armistice in the South. The Government will assent to nothing short of unconditional surrender by the Irish rebels.

Heavy National fire is being concentrated on Irish rebel posts around the old town of Kilmallock on the Cork-Limerick border. Apparently the Irish rebels, who hold the town, under siege of the Nationalists, intend to make their next stand in this area.

Reinforcements have reached the insurgents from Cork, Kerry and portions of Limerick. They have already established their hospitals and command headquarters from local undertakers. Meanwhile the National fire is punctuated by almost continuous sniping duels between the contestants.

It is expected that the next news from this area will be that the Nationalists have taken Kilmallock and that the Irish rebels are withdrawing toward Mallow.

Cork City is still quiet with the Irish rebels in complete control. Although they have an income of about £20,000 a week from the customs, they continue to confiscate without remuneration many commodities, including automobiles and horses. Only thoroughbred and hunters are taken, however, the intention being to supply the hastily equipped guerrilla cavalry units.

The announcement that the convening of the new Parliament has been postponed until August 12, is accompanied by this official statement: "The National forces' rapid progress in the west and Munster gives good ground for hoping that within the next fortnight organized resistance of Irish rebels will be so broken no further postponement of Parliament will be necessary."

## BRITISH OWN THE SUNK LUSITANIA

U.S. Government Decides Against American Claim for Salvage.

A despatch from London says:—The United States Government will not demand permission for an American salvage vessel either to attempt to raise the Lusitania or to obtain the bullion on board, the American Embassy has announced.

Although the Lusitania was sunk ten miles off shore, or outside the three-mile limit, the fact that it was British property is regarded as entitling British salvagers to lift it or to get the booty.

Owned by the Cunard Line, the Lusitania was subsidized by the British Government and insured under the War Risk Bureau, which was a Government concern.

An English firm is outfitting a vessel to seek the Lusitania's gold hoards, and it was announced in Philadelphia that an American ship is about to try the same thing. The English company asked the Admiralty to protect its rights in salvaging the ship, and it is reported here that the American firm asked the State Department to safeguard its interests in seeking the sunken Lusitania on the ground that it is more than three miles off shore and therefore public property.

The Washington decision that the Lusitania still belongs to the British is expected to settle the knotty problem, which might have raised the spectre of a naval battle between the salvage crews, both of whom were determined to seize the bullion.

### Loads Grass.

Cut grass is loaded into a new receptacle to be suspended from a lawn mower handle by a belt conveyor that is operated by a belt from one of the mower's wheels.

## VICTORY BONDS DUE IN DECEMBER TO BE RENEWED BY FEDERAL HOUSE

A despatch from Ottawa says:—There is a strong belief that the Minister of Finance will shortly announce renewal of the bonds which fall due December 1, 1922. Under ordinary circumstances, these bonds would be met out of the proceeds of the loan which it is understood will be asked for in October, but it is said that the suggestion has been made to the Minister of Finance that the present holders of the bonds which fall due December 1, should be allowed to take up a renewal for ten years at the present rate of interest, which is 5½ per cent., but probably not free from income tax. The Minister of Finance declined to make any statement, except to say

### India's Wheat Crop 48% in Excess of Last Year

A despatch from Ottawa says:—India's wheat crop will be 48 per cent. in excess of last year, or 9,818,000 tons, it is estimated by H. A. Chisholm, Canadian Trade Commissioner to India. It is probable, he states, in a communication to the Department of Trade and Commerce, that India will be exporting, instead of importing wheat before the end of the current year.

During the month of May, 839,435 cwt. of fish were landed on both the Atlantic and Pacific Coasts of Canada, valued at \$2,464,899; during the same month in 1921 the landings total 667,380 cwt. valued at \$2,062,107.

## NO INCREASE IN U.S. COAL PRODUCTION

Little Response to the Invitation to Reopen Mines.

Washington, July 30.—President Harding's invitation last Monday to the coal operators of the country to reopen their mines has had absolutely no effect on the anthracite industry and but little, if any, on the bituminous situation.

Reports to the Geological Survey show that during last week the output of soft coal increased between 200,000 and 300,000 tons, or from 3,700,000 that of the previous week, to a little more than 3,900,000 tons. Normal consumption at this time of the year would be 8,000,000 tons a week. The Bank of Montreal. "The rate will probably not be adversely affected by the year's purchase of Canadian wheat. It is being bought too cautiously here for that. The British Government is also arranging to meet its autumnal obligations in New York, which will help to maintain the rate. The Canadian rate has been sufficiently steady for some time to permit these to be carried on undisturbed by finances. If the miners' strike in the United States persists, we may see the pound a great deal nearer par next spring, which will have an important effect upon Anglo-Canadian finance."

Despite the unfavorableness of the first test of production under state protection, Secretary Hoover and other members of the President's Fuel Distribution Committee refuse to be discouraged, and believe that with the coming into full effect of the emergency order of the Interstate Commerce Commission the situation will show a decided improvement.

The slight increase last week in the output of bituminous coal is credited by experts of the Geological Survey to a larger force at work in Pennsylvania, improved car service in Southern West Virginia, and heavier shipments from Alabama and the far West.

## Western German Crops Reported a Failure

A despatch from Berlin says:—Owing to the great drought from May until the middle of July, the harvest is a complete failure in large areas in western Germany, according to semi-official announcements. This is especially true in the Rhine Province and the Bavarian Palatinate.

### The Reason.

"Smart boy wanted."

Such was the notice hung outside a busy City warehouse.

It had not been there long before a little fellow, red-headed and freckled, calmly lifted it down, and went inside briskly.

"Did you hang this outside, sir?" he asked the manager.

"Yes," was the stern reply. "Why did you pull it down?"

The boy looked at him for a few moments. Pity for the man's ignorance was expressed on his face.

Then he spoke, and his reply was short, but to the point.

"Why?" he said. "Why, because I'm 'im!"

The Sault Films Limited, composed of local capital, is staging the production of a film entitled "The Rapin" from the novel by Allan Sullivan, in the vicinity of North Bay, Ont. Work on the production commenced July 10, and adds another to the film companies which are utilizing Canadian scenery.

## GOVERNMENT ISSUES STATEMENT REGARDING NEW STAMP TAXES

Ottawa, July 30.—An official statement has been made by the Minister of Customs and Excise, Hon. Jacques Bureau, explaining the increased taxes which come into effect on August 1. The statement of the Minister is as follows:

"The increased stamp tax on bills of exchange, bank advances, overdrafts, cheques, sales and transfers of stocks and bonds, express money orders, travelers' cheques and post-office money orders, becomes effective on August 1 next.

"The tax on bills of exchange, promissory notes and advances or overdrafts is payable at the rate of 2 cents for every \$50 or fraction thereof.

"Cheques, money orders and travelers' cheques for amounts of \$50 or

under require a 2 cent stamp. If the amount for which they are issued exceeds \$50, but does not exceed \$5,000, a 2 cent stamp for every \$50 or fraction thereof is required to be affixed thereto. Cheques, money orders and travelers' cheques which exceed \$5,000 in amount require a \$2 stamp.

"The tax is to be paid by means of excise tax stamps in preference to postage stamps, affixed to the face of the cheque or money order. Regulations have, however, been issued whereby the tax on cheques may be paid monthly in place of affixing such stamps to the individual cheques. Under these regulations, the cheques are embossed with a stamp stating that the excise tax has been paid. Special licenses are issued by the Department of Customs and Excise to firms who desire to pay the tax monthly."

## National Reconstruction Before Irish House

A despatch from Dublin says:—A big plan of National reconstruction, involving the transport services and the rebuilding of Dublin's public edifices, has been prepared for consideration by the new Parliament.

## Germany's Floating Debt 300,000,000,000 Marks

A despatch from Berlin says:—Germany's floating debt increased by 4,800,000 marks in the second ten days of July. The floating debt is now in excess of 300,000,000,000 marks.

## West Needs 41,000 Harvesters

A despatch from Winnipeg says:—Forty-one thousand harvesters will be required to handle the prairie crops this year, exclusive of those to be obtained from prairie cities and towns, it was announced at a meeting of representatives of the railways, western labor commissioners and the grain trade interests. The rates of wages discussed were \$3.50 a day for harvesters and \$4 a day for threshers.

The harvester excursion will commence to arrive in Winnipeg from Eastern Canada August 7 and will continue until August 25. Excursion trains will leave Victoria, Vancouver and New Westminster from August 14 to 29, inclusive.

Of the total number of men required, 37,000 will be drawn from Eastern Canada and 4,000 from British Columbia.

## GREEK PLAN TO OCCUPY CON- STANTINOPLE BLOCKED BY ALLIES

Paris, July 30.—After announcing the Greek army would not cross the neutral zone in Thrace or attack allied troops occupying Constantinople, the Athens Government yesterday formally requested permission to march into the Turkish capital.

This request was made of France, Great Britain and Italy, and was instantly and firmly refused by all three. It is not believed Greece will proceed now with any plans she may have had for entering Constantinople. This belief is held despite reports just received here that Greek patrols are penetrating neutral zone, notably at Silivri on the Sea of Marmora.

More important than the army movements is a Greek declaration of autonomy for the entire part of Asia Minor occupied by the Greek army to which the Athens announcement gives the old name of Ionia.

The proclamation was issued at Smyrna by the Greek High Commissioner on instructions from Athens. It declares that henceforth the country constitutes an autonomous state under the guarantee of the Greek army and will never be restored to Turkish rule.

This creates an entirely new situation in the Near East. The Greek move is in open defiance of the allied proposals for total evacuation of Asia Minor by the Greeks, which was to have been completed by July 26. The proclamation also, according to the semi-official Temps, constitutes a grave menace to peace in the Near East. The paper calls on England to intervene and prevent a conflagration by compelling King Constantine to obey the allies. Le Temps points out that the Greek army in Asia Minor can only communicate with Greece by sea and is consequently at the mercy of the British fleet.

## Anti-War Demonstrations Mark Anniversary

A despatch from London says:—"No more war" demonstrations were held in fifteen counties and eighty towns and cities in England the week-end preceding the anniversary of the outbreak of the war. Organizations of all kinds here co-operated to make the demonstrations representative of all sections of the people. A big demonstration was planned in Hyde Park July 29 and fifteen platforms were erected for speechmaking by the delegates from twenty countries who marched to the scene in a procession. This included delegates from Germany, Austria, France and Belgium.

The organizers aim to make "no more war day" an annual festival day.

Former Minister of Agriculture in the British House of Commons, who made the promise to Canada in 1917 that the cattle embargo would be removed. His promise has been fulfilled inasmuch as the British House of Commons has voted to remove the embargo.

The re-organization of the permanent military force in Canada involving a reduction of 450 officers and men, brings the strength of the organization down to approximately 3,350. It has been calculated that on the average, including both officers and men, each member of the permanent force costs Canada about \$1,200.

## BRITAIN MUST NOT CANCEL WAR DEBTS

Federation of British Industries Oppose Action at Present Time.

A despatch from London says:—Opposition to any plan of cancellation of the French debt to Great Britain while Great Britain is forced to pay its huge debt to America is growing in financial and business quarters.

The Federation of British Industries, an organization representing the greatest manufacturing interests in the country, came out definitely on Thursday against cancellation of the Allied debts to Great Britain, if this country has to pay its debt to America.

The Federation supports the idea of a moratorium, regarding payment of interest on the Allied debt to Great Britain, if France, Italy and Belgium are willing to agree to a readjustment of reparations claims, which would enable Germany, under suitable safeguards and supervision, to set its finances in order.

The Federation holds that the cancellation of the debt would only be justified by a general settlement and that there is nothing at present which would indicate that public opinion in America and Europe is ripe for any such scheme. The Federation says:

"To cancel the debt is not only to throw away our principal bargaining weapon in any future settlement, but to run grave risk that the settlement may never be made."

There is a belief in well-informed quarters here that Premier Lloyd George, at the outset of the conference of Allies on reparations, will be more likely to suggest postponement of interest payments by France and to try to obtain a down-scaling of German reparations, than he is to propose any clean-cut debt cancellation.

It is recognized that cancellation may some day be inevitable, but if any progress toward restoration of Germany can be accomplished by relieving France of interest or capital payments for a long term of years, it is believed that that will be Lloyd George's line of negotiation during the London conference.

There are 260,000 women farmers in the United States.

## Weekly Market Report

Toronto.  
Manitoba wheat—No. 1 Northern, \$1.44; No. 2 Northern, \$1.37; No. 3 Northern, \$1.30.

## Canada From Coast to Coast.

Charlottetown, P.E.I.—Dealers in the state of Virginia have made an offer for the whole of this season's certified seed potato crop on Prince Edward Island, according to the secretary of the Potato Growers' Association. The Province's seed potatoes have long been in popular demand in various parts of the United States. Sydney, N.S.—Building permits issued here during the month of June totalled in value \$139,210, being \$40,000 dollars in excess of the value for the same month last year.

Frederickton, N.B.—One of the largest timber deals on record in the Maritime Provinces, which it is understood involves two million dollars in the turnover, was concluded during the week when the firm of Hollingsworth and Whitney, Ltd., recently incorporated with a federal charter at \$4,000,000 capital, secured large New Brunswick and Nova Scotia timber lands. It is said that the company intends erecting pulp mills in both Nova Scotia and New Brunswick.

Quebec, Que.—Quebec will be the first Canadian province to create an institute for treatment with radium according to an announcement by Premier Taschereau. The institute will be attached to the University of Montreal and arrangements are being completed to obtain the necessary quantity of radium to permit the establishment to operate. One gram of radium will be sufficient to start with, and this will cost the province more than \$100,000.

Port Arthur, Ont.—Camp O-wa-kon-zee in the depths of Quico Forest Reserve is the summer home of the University of Chicago and the University of Kenelworth, Ohio. There are now some 200 students in the camp which consists of 10 buildings and several tents and bungalows all electrically lighted. The camp is equipped with a complete flotilla of canoes, row boats, motor boats and a number of sailing craft. The locality of the camp is said by university officers to offer the best site in Canada for nature study, and this induced them to establish a camp there.

Winnipeg, Man.—During the first six months of the present year Manitoba has experienced a decided boom in building, and the prospects are that the construction and allied trades in this province will have a year of activity unsurpassed by any year since 1914. Activity has been most marked in Winnipeg, where permits issued for the first six months of the year exceeded \$4,300,000.

Regina, Sask.—A representative of the Saskatchewan Co

## Two Days' Sacrifice Sale

Friday and Saturday, August 4th and 5th

Prices Shot to Pieces!

## APPIN

Miss Anna Walker, of Mosa, W. I. district president, paid her annual visit to the Appin Institute last week at Mrs. Ellen Webster's home, with an attendance of 40 members. Miss Walker gave a most instructive paper on character building, which was followed by a vocal duet by the Misses McCall and a solo by Miss Margaret Allen, with Miss Margaret Macfie as the accompanist of the afternoon. Miss Macfie also played a brilliant piano number. Afternoon tea and a social hour concluded the meeting. Mrs. Frank Nichols is to be the hostess for the next meeting, August 31st.

Miss Thelma Watterworth is holidaying with relatives in Windsor. Will Stephenson, our energetic builder, is erecting another new house in the north end of the village.

The children of the Sunday Schools here are looking forward to a big time at the union picnic at Springfield next Wednesday. A large congregation gathered in the Methodist church here Sunday evening at the special flower service. The pastor, Rev. M. C. Parr, preached on "The message of the flowers," from Matt. 28: "Go ye and till the hills of the field." A children's choir rendered several numbers splendidly. The church was beautifully decorated for the occasion, a large arch being erected across the front, and inside the altar was a solid bank of flowers.

We are glad to see our mail carrier, Alf. Bardwell, on his route again after being laid up for some time with a lame ankle.

Miss Kathleen Alton has returned to her home in Markdale after visiting for two weeks with her friend, Miss Gertrude Lohan.

Elmer Gast has returned home after attending the funeral of his brother-in-law in Elkhart, Ill. A. Nevin and J. C. Allan motored to Windsor and spent the weekend with friends there.

The members of the organized class of the Methodist Sunday School here picked up at Port Stanley last Wednesday and report a pleasant time.

Miss Minnie McDonald is visiting relatives in Flint, Mich.

An electrical storm passed over this vicinity on Monday, accompanied by heavy rain, which will be a great benefit to the pasture and summer fallow land. The oats are almost all cut and we will soon hear the hum of the threshing machine again.

A very interesting meeting of the Women's Institute was held at the home of Mrs. Robert Webster last Thursday. A large number were present and several new members were added to the roll.

Miss McTavish, of Toronto, is spending the holidays with her mother and brother here.

Miss Flossie Finlayson, of Toronto, has returned after holidaying with her cousin, Mrs. Dan McIntyre, Jr.

Mr. and Mrs. Dunc. Patterson and little daughter, of Toronto, are visiting with relatives in and around Appin.

**Muscular Rheumatism Subdued.**—When one is a sufferer from muscular rheumatism he cannot do better than have the region rubbed with Dr. Thomas' Electric Oil. Let the rubbing be brisk and continue until case is secured. There is more virtue in a bottle of it than can be fully estimated.

## EKFRID STATION

Mr. and Mrs. Neil McAlpine and daughter Gladys spent the week-end at H. Smith's.

Mrs. Ann McCallum is visiting with her son Duncan for a time.

Mr. and Mrs. James Black and Duncan Black spent a few days at their home here.

Miss Gunn, of St. Thomas, spent the past week with her sister, Mrs. H. Winger.

Mr. and Mrs. A. E. Boales and family motored to St. Thomas to visit friends.

Mr. and Mrs. H. Winger and family and Miss Gunn spent Sunday at the lake.

Mrs. Florence McDonald and sister and son Archie motored to London on Saturday.

The Loyal Soldiers of Ekfrid U. S. S., a class numbering 14, accompanied by visitors, were entertained at the home of their teacher, Mrs. Geo. Lee, on Wednesday afternoon.

The July meeting of the Eureka Community Club was held recently at the home of Mrs. David McCall and visitors. An interesting paper with an attendance of 60 members on "Canada" was read by Mrs. Jas. Murray. Mrs. Wilson McPherson read a paper on "Caring for the infant," which proved beneficial.

Mrs. John T. McLean ably answered the questions in the Cynthia Grey mail box. A reading by Miss Alice Winger, a piano solo by Miss Dutton and a vocal solo by Miss Margaret Oriswald were much appreciated.

Miss Minnie McLean assisted the hostess in serving a dainty lunch of sandwiches, cake and ice cream.

John Switzer and Ed. Orum, of Windsor, visited at the former's home here last week.

Mrs. Graham, of Detroit, and Mrs. Holmes, of Bothwell, visited with Mrs. J. T. McLean last week.

Mrs. Bernie Galbraith entertained a number of girls and boys to a party last week.

Mrs. J. T. McLean is visiting in Detroit.

The largest ideas are often expressed in the simplest words.

One of the most effective vermifuges on the market is Miller's Worm Powders. They will not only clear the stomach and bowels of worms, but will prove a very serviceable medicine for children in regulating the infantile system and maintaining it in a healthy condition. There is nothing in their composition that will injure the most delicate stomach when directions are followed, and they can be given to children in the full assurance that they will utterly destroy all worms.

## BY-LAW NO. 292

To Authorize Raising the Sum of \$2,500 to Purchase a New Gasoline Fire Engine and \$1,000 to Construct Cement Storage Tanks in the Village of Glencoe.

WHEREAS it is deemed necessary to issue debentures for the amount of three thousand five hundred dollars for the purchase of a new gasoline fire engine and to construct cement storage tanks.

Be it therefore enacted by the municipal council of the village of Glencoe:

1st.—That it shall be lawful, and debentures of the corporation shall be issued to the amount of \$3,500.00, in sums of not less than \$100.00 each, within one year after the date on which this by-law is confirmed by a vote of the duly qualified electors of the village of Glencoe, and each of the said debentures shall be dated on the day of issue thereof, and shall be payable within ten years at the office of the village treasurer of the corporation, as hereinafter provided, and as to both principal and interest in any year shall be tendered in Canadian currency, and shall have coupons attached for the payment of interest. Each debenture shall be signed by the reeve of the corporation and by the treasurer of the corporation, and bear the seal of the corporation.

2nd.—The said debentures shall bear interest at the rate of 5% per cent., payable yearly, and in such amounts that the aggregate sum payable for principal and interest in any year shall be equal to or less than the sum of \$400.00, and shall be payable for principal and interest in each of the other nine years of the said period.

3rd.—There shall be raised and levied in each year for the period of ten years the sum of \$400.00 by special rate on all the rateable property in the said village of Glencoe, being a sum sufficient to discharge the several instalments of principal and interest accruing due on said debt as the same become respectively payable according to the following schedule:

Year	Principal	Interest	Annual
1	\$268.69	\$201.25	\$469.94
2	284.14	185.80	469.94
3	300.48	169.46	469.94
4	317.76	152.18	469.94
5	336.03	133.91	469.94
6	355.35	114.59	469.94
7	375.78	94.16	469.94
8	397.39	72.55	469.94
9	420.24	49.70	469.94
10	444.40	25.54	469.94

4th.—This by-law shall take effect and come into operation from and after the date of its passing thereof.

This by-law was provisionally passed on the 24th day of July, 1922.

Charles George, A. McPherson, Clerk, Reeve.

## NOTICE

Take notice that the foregoing is a true copy of a by-law which has been taken into consideration and which will be finally passed by the council of the municipality (in the event of the assent of the electors being obtained thereto) after one month from the first publication in the Glencoe Transcript, the date of which first publication being Thursday, the 27th day of July, 1922.

Further take notice that tenants who desire to vote must deliver to the clerk not later than the tenth day before the date appointed for taking the vote the declaration provided for by section 265, sub-section 3, of The Municipal Act, R.S.O. 1914, Chapter 152.

And further take notice that the votes of the ratepayers shall be taken on the said by-law on the 21st day of August, commencing at the hour of nine o'clock in the forenoon and continuing until five o'clock in the afternoon, at the following places and by the following deputy returning officers:

polling sub-division No. 1, Town Hall; Chas. George, deputy returning officer.

polling sub-division No. 2, public school building; P. J. Morrison, deputy returning officer.

Further take notice that on the 18th day of August, 1922, at the town hall, Glencoe, at 10 o'clock in the forenoon, the reeve will attend to appoint in writing, signed by himself, two persons to attend at the final summing up of the votes by the clerk of the said corporation, and one person to attend at each of the said polling places on behalf of the persons interested in and desirous of promoting the passing of the said by-law, and a like number on behalf of the persons interested and desirous of opposing the passing of the said by-law.

And further take notice that the 22nd day of August, at the said town hall, at ten o'clock in the forenoon, is hereby appointed for the summing up by the clerk of the number of votes given for and against the said by-law.

Dated at Glencoe this 24th day of July, 1922. Charles George, Clerk.

## VOTERS' LISTS, 1922

Municipality of the Village of Newbury in the County of Middlesex

Notice is hereby given that I have transmitted or delivered to the persons mentioned in Section 9 of the Ontario Voters Lists Act the copies required by the said section to be so transmitted or delivered of the list, made pursuant to said act, of all persons appearing by the last revised assessment roll of the said municipality to be entitled to vote in the said municipality at elections for members of the Legislative Assembly and at municipal elections, and that the said list was first posted up at my office in Newbury on the twenty-ninth day of July, 1922, and remains there for inspection.

And I hereby call upon all voters to take immediate proceedings to have any errors or omissions corrected according to law.

ANNE LAURIE TUCKER, Clerk of the Municipality of Newbury

## W. A. Edwards

The Rush Fruit Farm - NEWBURY

At this season of the year hundreds of teachers spend their spare time applying for schools they have no idea of taking. Meanwhile teachers are busy reading dozens of applications from teachers they have no idea of engaging.

## Card of Thanks

We wish to acknowledge and thank our many friends and acquaintances for their kindness and sympathy during our recent sad bereavement. —Mrs. and Mrs. John McIntyre and Family.

## TOWN AND VICINITY

A number of Glencoe bowlers took part in the tournament at Ridgetown yesterday.

The farmer isn't the only one who gets his living out of dirt. There is the modern novelist.

James Gough threshed 1,502 bushels of wheat from 50 acres at Godfrey McMurphy's last week.

The sacrament of the Lord's Supper will be observed at the morning service in the Methodist church next Sunday.

Rev. C. C. Strachan, of Port Elgin, is expected to occupy the Glencoe Presbyterian pulpit during the month of August.

The death occurred at her home in Dunwich on Sunday of Miss Betty McLachlin, in her 55th year. She was born in Ekfrid.

The C. P. R. announces the dates of the annual harvest excursions to the West as August 14 and 23. Rates and conditions are the same as a year ago.

In order not to conflict with the Liberal-Conservative rally at Port Stanley on August 9th, the date of the fiftieth anniversary celebration at Dutton has been changed to August 11th.

The C. E. Nourse Company have moved the grain elevator from the C. P. R. grounds at North Glencoe to their premises in town and are rebuilding it on a concrete basement foundation.

A rink of London bowlers motored to Glencoe last Wednesday and played friendly games with the locals afternoon and evening. Glencoe winning the series by eight shots. Refreshments were served on the green.

Miss Margaret Young, missionary to Japan, has returned to Ontario, where she expects to remain. She is at present visiting her sister, Mrs. Wm. Gilbert, Glencoe. Miss Young brought home with her a bright Japanese boy to be educated in English.

## PERSONAL AND SOCIAL

—Mr. and Mrs. B. Towers spent a week at Blenheim.

—Lloyd Farrell was home from Detroit for the week-end.

—Miss Lorna Luckham is holidaying at Hillsboro and Sarnia.

—Mrs. Mary Leitch is visiting her son, Mac Leitch, in St. Thomas.

—Mitchell Doble, of Detroit, was a guest of Dr. Freese last week.

—Mrs. Mary McKee has returned from a visit with friends in Toronto.

—Mr. and Mrs. Jamieson spent the week-end with friends in Detroit.

—Miss Margaret Dean, of Toronto, is visiting her brother, Charles Dean.

—Miss Minnie Ridout, of Toronto, is visiting at the home of David Reeves.

—Mrs. W. R. Sutherland is spending a week with her daughters in Toronto.

—Mr. and Mrs. David Reeves spent the week-end with relatives in Toronto.

—Mrs. Davidson and family, of Woodstock, are holidaying at Hiram Lumley's.

—Mr. and Mrs. Freese, of London, spent the week-end with their son, Dr. Freese.

—Miss Eva McCullum spent the week-end with her friend, Miss Helen McKellar.

—Mrs. D. W. Robertson, of Toronto, is visiting friends in and around Glencoe.

—Rev. and Mrs. Kenneth McLean, of Stayner, are visiting Mr. and Mrs. Farquhar McKee.

—Mrs. George H. Small and son Douglas, of St. Thomas, are visiting Mrs. Mary Small.

—Miss Tena Sutherland has returned from a two weeks' visit with friends in London.

—Mr. and Mrs. James A. Muilgan, of St. Thomas, are on a trip up the lakes from Sarnia.

—Miss Nellie Farrell is spending a few days in Windsor, the guest of Miss Mabel Walton.

—Miss Duncan and Miss Whitehall, of London, are visiting Mr. and Mrs. D. C. McKenzie.

—Mrs. Joseph Grant and Master Francis Singleton are visiting Mrs. E. Kaufman, Brantford.

—Miss George Hurley is spending a couple of weeks in Toronto with her mother and friends.

—Miss Minnie Mitchell has returned home after spending two weeks with relatives in Detroit.

—Misses Florence Hurley and Mary Quick visited friends and relatives in Windsor and Detroit last week.

—Miss Mary Munro spent a few days with her uncles, Duncan Leitch, Walkers, and Wm. Leitch, Ekfrid.

—Misses Thelma and Alice Richardson, of Sarnia, are visiting at the home of Mr. and Mrs. Ed Aldred.

—Miss Dorothy Dean has returned home after spending a week with friends at Blenheim and Erie Beach.

—Mrs. H. Rayner and two sons, of St. Catharines, are visiting Mrs. Rayner's parents, Mr. and Mrs. L. Sulter.

—Mrs. A. M. McKee and daughter Catharine, of Glendale, Cal., are on a visit to old friends in Glencoe and vicinity.

—Morley Farrell, of Chatham, spent the week-end at his home here, leaving Tuesday morning for Los Angeles, Cal.

—Mr. and Mrs. Eugene Kenyon and two sons, of Brantford, spent a day this week with Mr. and Mrs. Richard Singleton.

—Mrs. L. R. Bagnell, of Windsor, and Master Bobbie Bobler, of Detroit, are visiting Mrs. Bagnell's mother, Mrs. Levi Smith.

—Mrs. John A. Doble, of Glencoe, has returned home after spending a week with her daughter, Mrs. Ross Watterworth, St. Thomas.

—Mrs. J. S. Cameron and daughter, Helen, of Olean, N.Y., are spending this week with the former's sister, Mrs. A. E. Sutherland.

—Mrs. R. W. McDonald, of Windsor, and Miss Jean McDonald, of St. Thomas, are visiting the former's parents, Mr. and Mrs. Wm. Kerr.

—H. I. Johnston, druggist, is able to be at the store again after a lengthy illness during which he was confined to his bed for five weeks.

—Munro Anderson was a guest at the convention of the McClary Manufacturing Company, London, on Thursday and Friday last week.

—Mr. and Mrs. D. A. Campbell and family, of Chicago, visited the former's aunt, Mrs. Geo. Innes, and other relatives in this vicinity last week.

—Mr. and Mrs. Geo. F. Munro and daughter, Mary, and Mrs. Munro's brother and sister, Lachlan and Sarah Leitch, motored to Springfield and London one day last week.

—Mr. and Mrs. O'Mara and son, Martin, and daughters, Isabel and Mary, and Misses Mary and Leila Colvick and Hubert Gilchrist, from London and spent Sunday with Mr. and Mrs. James Gilbert.

—Rev. S. D. Jamieson, of Delhi, is visiting his brother-in-law, Duncan C. Graham, and other relatives in Glencoe and vicinity. Mr. Jamieson was formerly pastor of the Glencoe Presbyterian church. He conducted the services and preached in the Glencoe Presbyterian church on Sunday.

## SO EASY TO BE WELL AND STRONG

Take "Fruit-a-tives" The Wonderful Fruit Medicine

"I suffered terribly from Constipation and Dyspepsia for many years. I felt pains after eating and had gas, constant headaches and was unable to sleep at night. I was getting so thin that I was frightened."

At last, a friend advised me to take "Fruit-a-tives" and in a short time the Constipation was banished, I felt no more pain, headaches or dyspepsia, and now I am vigorous, strong and well."

Madam ARTHUR BEAUCHER.

Box a box, 6 for \$2.50, trial size 5c. At dealers or sent postpaid by Fruit-a-tives Limited, Ottawa.

Hugh McKillop and L. Stansell, and their Meighen, G. Howard Ferguson, other prominent members of the party. Speaking to start at 3 p.m.

A good program of sports on the beach. A Magna Vox, one of the greatest inventions of the day, will be used so all can hear the speakers.

## MELBOURNE

Melbourne, July 28.—A few improvements are being made in the village this summer. The new school which is being built will be a splendid building and a credit to the village and community. The foundation of cement blocks is all in place. There are four rooms in the basement, two furnace rooms and one large room that may be used for sports, banquets, etc. The carpenters expect to begin in a few days and have the building completed by November 1.

Ralph Collier's house is completed and he expects to move in at once. New sidewalks are being laid. They are a big improvement and will be a great convenience.

Several have had their homes newly painted, which adds to the appearance of the village.

Miss Muriel Richards was successful in passing her Normal school examination and has been engaged to teach near Oil City.

Mrs. Cavan accompanied her brother, Neil, to St. Thomas, on a holiday trip to Muskoka.

Melbourne, July 31.—An interesting and profitable evening was spent in the Sunday School room of the Methodist church in the form of a Sunday School conference. Longwood, Middlemiss and Cooke's were invited to unite with the two schools here for the occasion. An address was given by Rev. Mr. Rose, of Delaware, on "The Boys." Miss Alice Trotter, of Cooke's spoke of "The Girls." Frank Sutherland, from the Sutherland Sunday School, gave a splendid talk on "The Temperance Question and Amusements," and Mr. Winters addressed the school on "Missions." Each address was most interesting, and was followed by discussions on the various subjects. The members of the Presbyterian and Methodist schools served lunch, after which Rev. Dr. Brown closed the gathering with a suitable address.

A hydro representative spent a day in the village making arrangements and plans for installing hydro. Announcement that a lower rate would be granted to Glencoe was welcome news here, as citizens expect that the rate given here will be lowered also.

Wm. Lewis preached at Mt. Carmel on Sunday afternoon, the regular pastor being away for his vacation.

Mrs. J. W. Campbell and two daughters, of Vancouver, and Mr. and Mrs. Neil Campbell and family, of Windsor, are visiting here. Mr. and Mrs. Arthur Staples are visiting friends at Kinbol.

Melbourne, August 1.—A terrific rain storm accompanied by thunder and lightning settled over this locality at noon yesterday. The rain came down in torrents for three hours and the streets were like rivers with running water. No serious damage has been reported, except that in many places the oats are lying flat.

Many of the farmers have started their oat harvest and report a splendid crop. Barley is good and with the recent rain it is expected that the corn will be good also. In some places potatoes are not good, while other farmers report as many as 40 in a hill. Raspberries are almost done; thimble-berries are getting ripe, but not a good quality owing to the dry spell. It is expected that the later berries will be better.

Norman Brown has arrived from the West, bringing with him four carloads of cattle.

Mr. Chalk, of Alvinston, who built the English church here, also the I.O.O.F. hall and the Old School Baptist church, has been engaged by Mr. McKee to do the carpenter work on the new school here.

## SHETLAND

Mrs. Robert Gray and mother, Mrs. Dixon, entertained the Mossburn Women's Institute to a picnic on their lawn on Wednesday afternoon. Everyone went home well pleased with the time they had.

Sid. Harold and John Archer spent the week-end at the latter's home.

Miss Curran, of London, is visiting Miss Rita Badgley.

Miss Jean Archer is in Detroit. Andrew Armstrong spent Sunday with Wm. Archer.

Miss Grace Bilton spent Sunday with her sister, Mrs. Smokey.

The Transcript office sells blank counter check books. Handy for those not using large quantity.

## KILMARTIN

Mr. and Mrs. Mac. Munroe and children, of Windsor, are visiting at Neil Munroe's.

Mr. and Mrs. John Little are visiting in Detroit.

Miss Johnston, of Thamesville, is visiting at A. L. Munroe's.

Mr. and Mrs. Donald McGregor and son John and Peter McNeil of Brooke motored to Grimsby last week, spending several days there.

Mr. and Mrs. Hector McFarlane, who spent some time with friends here, returned last week accompanied by Mrs. M. C. Munroe and Mrs. John Secord.

Mr. and Mrs. Mac. Secord, of London, visited friends here recently.

Miss Edith Louis, of Glanworth, visited at Gordon Hayes' this week.

The Sunday School picnic of Burns' church, Moss, will be held on Hugh R. McAlpine's grove on Friday, August 11.

Hugh and Albert Root, of Walkerville, are holidaying at Joseph Moore's.

Mr. and Mrs. Thomas Moore and baby, of Detroit, spent last week at Alex. D. McAlpine's.

Kenneth and Donald Cowan returned to their home in Toronto on Friday after spending a month at D. N. Munroe's.

Alex. Moore, of Detroit, spent a few days last week at his home here.

The annual congregational picnic of Burns' church will be held as usual on Labor Day.

## SHIELDS SIDING

The Needle Club met at the home of Mrs. D. C. McTavish July 6th. There were 15 members and 6 visitors present. After the usual business had been transacted a solo by Miss Jessie Fletcher and a duet by Mrs. Dolbear and Mrs. Morrison were much enjoyed. Lunch was served by the hostess. The next meeting will be held at the home of Mrs. John McVicar on August 10.

Miss Katie McIntyre, of Detroit, spent a few days last week at her home here.

Ward Leitch has purchased a car. Miss Dora Sinclair, of Detroit; Mrs. Lorne Heatherington, of Windsor, and Misses Mimie and Nellie Sinclair, of Toronto, spent a few days last week with their sister, Mrs. Duncan Mitchell.

Misses Marion and Violet Hubert, of Toronto, are spending a few weeks with their aunt, Mrs. Duncan Mitchell.

## WOODGREEN

Mrs. Daum and Mrs. Schellenberg, who visited friends in Detroit, have returned home.

Mrs. H. Coyne and son Don have returned home after visiting with friends at Woodhill Lake, Mich.

Ross and Harry Stevens, of Ridgeway, and Stewart McIntyre, of Cranston, visited at Thos. Simpson's on Sunday.

Miss Margaret Smith, of Glencoe, spent several weeks with Mr. and Mrs. Alf. Nethercott.

Mrs. Robert McKellar and children spent Thursday with Mrs. A. Clannahan.

Miss Emily Wilmont is spending a few days in Glencoe.

Russell Clannahan has returned to Detroit after visiting relatives here.

Miss Marie Hodges, of Toronto, is visiting Mr. and Mrs. A. Daum.

Mr. and Mrs. Thomas Robinson spent Sunday in St. Thomas.

A heavy thunder shower visited this locality on Monday.

Dread of Asthma make: countless thousands miserable. Night after night the attacks return and even when brief respite is given the mind is still in torment from continual anticipation. Dr. J. D. Kellogg's Asthma Remedy changes all this. Relief comes, and at once, while future attacks are guarded off, leaving the afflicted one in a state of peace and happiness—he once believed he could never enjoy. Inexpensive and sold almost everywhere.

# Soils and Crops

Address communications to Agonomist, 73 Adelaide St. West, Toronto

A Source of Farm Power.

Two fields were selected by the college officials for the demonstration of the value of explosives in farming. The first piece tried was a young apple orchard of about two acres. The ground was very soggy, particularly in a depressed area near the middle of the field, toward which the moisture from the higher ends of the piece slowly gravitated. The surface was dotted here and there with various sizes of boulders and gnarled tree stumps.

Selecting two rows of trees running through the field at nearly a central point, charges of dynamite were placed midway between the two rows, each charge about twenty feet from the next one. Each stick was exploded before another was placed. Varying strengths were used; in some cases a full charge of one-half pound, and in others only the half charge was used. The full charges, sunk to a depth of about six feet, resulted in an excavation some four feet deep by twelve feet in diameter. The ground was loosened to an area considerably greater. In the half charges, the result was proportionately less efficient.

After these charges had been made, running lengthwise the field for some distance both ways from the centre of the depressed area, operations were next begun on a line at right angles with the first rows worked. Charges were sunk two feet apart, beginning at the north boundary of the field and extending crossways in a line through the middle of the low area, to a point beyond the first rows of trees. These charges were wired and, when all laid, were connected with a battery and were exploded simultaneously.

The result was a well-defined ditch four feet in width and the same in depth. Some of the dirt, of course, fell back from the sides, partly filling the opening but the whole was so loose and separated from the water as to be easily removed. This provided a logical and natural drainage ditch for the orchard; the surplus water from the higher parts was to be carried in ties to this open ditch and from there run outside the field.

It is expected, however, that by loosening the subsoil at the higher end of the orchard that the water-level at

these ends will be made lower than formerly; that the roots of the trees feeding from these areas will be given deeper soil from which to feed and soil that is made more rapidly and more perfectly available; that less water will be carried in this surface drain and consequently wasted; also that those trees feeding in this surface draining depressed area will not be drowned from too much water. In other words, the idea is that this orchard soil needs aerating for the more equitable distribution of water and for the more ready and general availability of plant food.

Incidentally, in a little side-by-side, several rocks and stumps about the orchard were made ready for easy removal. Some of the blasts were made with only one or two sticks; another needed ten one-half pound sticks laid on two different flat faces of the rock and plastered down with mud thrown on and patted down with a shovel. This method of blasting is somewhat less effective per unit of power than drilling into the rock but frequently saves much time and labor as well as being safer.

The next day operations were transferred to the other field, consisting of about two-thirds of an acre of corn land. Charges were laid and exploded one at a time at distances of twenty feet each way. The soil here was hard subsoil and sandy surface, and the excavations following the explosions brought considerable of the yellow hard-pan to the surface, also loosening the surface soil for a considerable distance back from the edges of the hole.

One-half of this piece was not treated. The plan is to drag over and sow a section to alfalfa seed and carefully follow the results of growth in the two plots for a long enough period to determine the actual and comparative yields.

In the case of reclaiming wet fields or of irrigating dry fields, explosives provide a quick, efficient and cheap method of opening drains and in preparing the waterways for the irrigation system. All this besides the very considerable value of clearing virgin fields of stumps and rocks. Altogether, there seems to be great possibilities in the use of dynamite for various operations in the development of land.

## The Missing Link in Feeding

How This Link Was Discovered and What It Means to Farmers

BY EARLE W. GAGE.

Not long ago investigation showed that some farmers were actually selling farmers ground oyster shells as a special cattle food. A good many of the fattening and conditioning preparations were not very much better. It was found. But the shell of the oyster is practically hard wood, and it does seem abominable to give poor, ailing, breeding or growing brutes ground hardwood, as a medicinal food. And it was certainly hard upon the feeder to swindle him into paying his hard cash for such trash.

But, come to think of it, there is a place in our feeding bins for the shells of nuts—some nuts at any rate. The little oblong nuts on the wheat plant, for the wheat itself has a shell of its own, composed of what is much like wood. Everyone knows how valuable a stock feed this shell, husk, or bran is used in reason. For many years—back to times immemorial, bran has been used as a feed. But never so intelligently as since the latter half of the past century.

It was a lot of pigeons experimented upon by some scientists interested in feeding problems that made known to us the real value of bran and some other cattle feeds. The birds were fed with the polished rice, which is often sold in the stores and often tempts the good housewife by its handsome appearance. It is a fine old proverb which warns that "handsome is that handsome does," and so is that other which warns against judging by the outward appearance.

In a few days the pigeons fell sick. They developed the disease known commonly as beri-beri in men. Since in the case of human being, this terrible fatal disease is caused by an unbalanced food ration, the scientists set about restoring the balance in the pigeons' food by feeding them with rice-bran. It is unlikely-looking stuff to use as food, but this rice-bran turned the trick. The doves got well speedily and that set men to work to try to find out just what food substance it is in bran which gave it such value.

That was how it occurred that what are called by the rather clumsy name of "vitamines" came to be discovered. There was something lacking in the polished rice ration, as sailors found long ago there was something lacking in a preserved food ration. Green vegetables, and lime juice completed that latter ration it was discovered, and prevented scurvy.

But green vegetables and fruit juices could not prevent beri-beri from setting in. Nor could the bran—or a yeast which was found to have similar effect—that cured beri-beri, prevent scurvy.

Different things were lacking in the food rations it will be noticed. So far

make it pay to grow roots. But silage is an admirable substitute, perhaps a more valuable food.

In fact, the silo is one of the principal answers to the chemists' demands for vitamins to perfect the ration. Something to prevent the loss of flesh and the lack of growth, all our farmers have for many years looked for. It may be that it is only now the answer to this desire is reaching the feeders of live stock, who seek to fulfill this new demand for vitamins.

**Vitamins and Spring Food.** Heretofore, science has been considering these food elements as applied to human feeds. It is about time we found out just what vitamins mean to the animal world, though we know enough about them already to assure us that no ration is perfect without them properly balanced.

All animals, man as well as the lower animals, need a definite quantity of vitamins to maintain health. Young animals require much greater proportions of vitamins than do mature animals. On this basis, let us consider the question from the farmer's standpoint. He has to maintain in a healthy condition his stock, both young and old, and in so doing, vitamins play an unexpected large part in this.

All the young animals draw their vitamins—and their requirement is heavy—from their mothers in the first instance. The food supply of the suckling mother has thus to be rich in vitamins as well as in other nutrients. The milk supply of the mother is also affected by the vitamins supplied. In some cases where the vitamin supply is low, the milk supply will decrease so as to maintain its vitamin content. In such cases the young animal will starve, and perhaps die, or will, if it survives, be stunted, while the health of the mother suffers.

In other instances the milk supply will remain unchanged, but the vitamin content drops. Here the young animal suffers from lack of vitamins, in which case its growth is seriously affected, and a rickety animal will at best survive the ordeal. Usually the young animal dies, however.

An animal suckling young should have its food adjusted so that a good supply of vitamins to meet its own and the needs of its young, may be insured. The old custom, of giving a breeding cow as much green fodder as possible, is one we now know to be wonderfully correct. It is interesting to see how, with the progress of science, many old customs based primarily on observation and experience and handed down by tradition, have been found to be correct.

Constant quibbling paralyzes action.

Not how well we have guessed, but how well we have done, should be our standard.

The farmer who relieves his hands by getting his head a little closer to his task is the hope of Canadian agriculture.

You will be more sure of hitting the bull's-eye if you keep your attention upon the target rather than upon the manner in which you are holding the gun.

## Birds Who Build in Trees

By Ida Belmer Camp

No bird enjoys greater popularity or receives heartier welcome in the spring than the Canadian Robin. His iniquity is tasting strawberries, cherries and other garden fruits that he does not eat. I suspect he is much like ourselves—if we had a whole world of fruit to select from, we should surely take the most delectable. So far as I am concerned, the robins are so welcome, I let them take what they want first and I take what is left.

If we would plant mulberries, choke and wild cherries in our waste places or among our cultivated fruits, the birds would be liable to eat our cherries alone, as the more acid a fruit contains the better the Wing People like it.

The robins are masons, building the nest of clay, straw and strings, so plastered and interwoven and so softly lined that it is a luxurious cradle indeed in which to raise the uncouth looking little nestlings. The parent birds place this nest so nicely in the crotch of a limb or limbs that nothing but continued rain can harm it. To protect them, we can make what is known as a robin nest, nailing it high in the tree to a good stout limb. This gives them an added feeling of security. Then listen to their merry cheer-up! cheer-up! That will more than pay you for all the fruit they consume in several years.

The robin redbreast is one of our largest song birds and the ruby-throated hummingbird is our very smallest, and daintiest as the flowers from which it feeds.

The ruby-throats love the sweets in red and orange-colored flowers and are nearly always to be found near the haunts of the jewel weed, bush honeysuckle and trumpet vine. This little gem on wings is the only one of its kind found this side of the Rockies. They always find their meat and honey together as the insects that are attracted to the flowers where the hummingbirds gather honey are the insects they love to eat. The temper of hummingbirds is all out of proportion to their size, as they will dash at an intruder who dares to come near their

## Poultry

The habit of egg-eating is easy to prevent but difficult to cure when it becomes widespread in a flock. It can be prevented by feeding a balanced ration so that the hens will not strongly crave for egg-making material. Then build the nests so the hens will enter from the back. The eggs can be removed by lowering a hinged door in front. In these partially darkened nests the hens do not see the eggs easily and are less tempted to scratch in the nesting litter, a habit which often breaks eggs. If eggs are accidentally broken by the hens they are not apt to be eaten in a darkened nest.

Sometimes one or two hens may start eating eggs and teach other members of the flock. Hens that are observed breaking eggs should be isolated or marketed. The fact that hens eat an egg ravenously when it is dropped and broken near them does not mark them as egg eaters that will break eggs for themselves.

Various ill-tasting combinations placed in eggs have been used to assist in breaking the habit. However, nothing is of much value, but properly constructed nests and frequent gathering of the eggs. Overcrowding on nests sometimes causes broken eggs. It pays to have a nest for every four hens.

## Hints on Handling Fruits and Vegetables.

The Dominion Horticulturist advocates the use of baskets for the local sale of apples. He points out that many farmers have varieties of apples that are difficult to sell in barrels or boxes, but that in baskets could probably be readily disposed of. Certainly retailers and consumers like to see what they are getting. Even if farmers cannot do this, owing to not going to market well shipping their produce, wholesalers could do the work themselves or could it be performed at a central packing house. By using baskets much bruising of apples would be avoided.

In "Seasonable Hints" for July, the Horticulturist emphasizes the importance of picking, handling and packing apples with the greatest care to prevent injury. Of course the same care is advisable for all fruit, but in the case of apples intended for exportation it is more than ever so. Thorough racking of the barrels to settle the apples will obviate the need to a great extent of the pressing to which bruising is often due. Another thing is that the picking should not be done by rote, that is at the same time every year, but should be governed by the weather, fruit ripening quicker in some seasons than in others. Fruit should also be deposited in a cool place immediately after picking.

Dealing with vegetables, it is advised that potatoes be left in the ground until there is danger of injury by frost; that onions be thoroughly cured before storing; that when cabbages are left in the ground and show signs of splitting, the plants be loosened by twisting them; that celery be kept growing well by continuous cultivation and, when dug, be kept crisp by storing in a cool place and keeping the roots moist; that the storage of beets, carrots, parsnips, and

## Parents as Educators

Beginnings in Language and Literature

BY MARTHA GALLAUDET WARING

The three most wonderful things in nature have always been to me, the unfolding of a flower, the dawning of a new day, and the way in which a child learns the use of language. There are never two of these exactly alike; they are always happening and always different.

I have watched three children closely and their way of learning to talk has been absolutely as individual as are the children themselves. The eldest began at nine months to say Mama, Dada, man, boy, dog and so forth, and after awhile, come, go, stay, run, and all the necessary verbs, and then the connecting words, in such absolute agreement with the best authorities on "learning to speak," that I began to plume myself upon it as a personal matter. It is interesting to note that this interest in language, in words and their exact meaning and accurate use, has always been a part of this child's development.

My personal vanity as a good trainer in language received a shock when the second baby came to the speaking age. Not a word would she say, "Umm-hum" doing duty for everything; and so clever was she and well developed mentally that it was almost uncanny to see how she conveyed her entire meaning and got what she wanted without words. We tried encouragement, discipline, and example (as her sister was then five) and when we had begun to feel quite disconcerted, she suddenly at about eighteen months, burst into whole sentences run together such as "Give it to me," "I don't want to do it," and others of which not one single word was clearly defined, but as a whole perfectly intelligible. As she grew older she showed the same impatience of language as a means of communication, making a language of her own to which she clung until she was six, which was intelligible only to her family and playmates, as strangers could make nothing of it, a fact which rather pleased her than otherwise—"Me don't min' if dey tan understand" was a frequent remark while we were trying to train her out of it. We had at six to have recourse to expert help in proper articulation. There was no physical defect, and now her enunciation is unusually clear and she reads better than any child of ten I have ever known.

Why should such things be in children of the same family, with the turns be in as cool a place as possible but free from freezing, whereas squash requires moderate warmth. Vegetable seed should be dried and kept dry.

## Improvement in Rural Life.

An article appears in the July-August number of The Agricultural Gazette of Canada on "Rural Life and Activities for Women" in which the writer, the Director of the Home-Makers' Department in the University of Saskatchewan, lays down thirteen activities whereby women would benefit both themselves and many others in rural communities. These all involve co-operation of women with women. They are (1) To procure proper and sanitary school equipment; (2) To establish a hot and wholesome noon school lunch, to which might be added "with milk"; (3) To have medical inspection of schools; (4) To establish rest rooms for the community; (5) To undertake the establishment of community halls; (6) To start or procure libraries for public use; (7) To procure nursing help for the district; (8) To establish and help to maintain cottage hospitals; (9) To hold fairs of different kinds; (10) To have child welfare exhibits with instruction; (11) To assist the less fortunate; (12) To co-operate and assist beneficial organizations in their work, and (13) To create an improved and healthier community spirit. The writer would plainly like to see a greater concentration of welfare work than there is at present. She believes emphatically in the encouragement of reading worth-while books and papers and in the organization of community bird clubs as a source of happiness and the development of the best qualities of humanity, also as an form of antidote to what the writer aptly terms "commercialized forms of amusement," which are becoming more and more common all over the country. Home and localized opportunities for healthy recreation in the few spare hours are a necessity for every rural community.

## A Progressive Dairy District.

One of the most progressive districts in Canada is that of Lake St. John, Quebec, reports the Dominion Dairy and Cold Storage branch. The people in the district depend largely on dairying and hog raising. Their farms are well and neatly kept, some wired and lighted by electricity, the barns having cement floors, iron stanchions, individual water bowls, and litter carriers. Last year 49 herds comprising 616 cows were tested around Metabetchouan and had an average of 5,207 lbs. of milk and 205.7 lbs. of fat. In the spring of this year the provincial dairy inspectors had organized testing centres comprising 637 herds and 8,847 cows. Cheese from this district is highly thought of in Montreal. The district is also noted for its scenery and its hunting and fishing.

## KEEP YOUNG

BY DR. FRANK CRANE.

Old age is not a number of years; it is a state of mind. It has been said that a woman is as old as she looks, and a man as old as he feels; as a matter of fact, both are as old as they think.

Age is a disease of the soul, a condition of ill-health which can be avoided. The human being begins existence as a vigorous creature, whose body naturally weakens with time and finally perishes. The body runs its course like an apple or any other organized growth of matter.

But this is not true of the mind. All things in Nature have their periods of growth, maturity, and decay. The mind, however, breaks no such law. The mind is the real man. And the mind can be as young at ninety as it is at twenty-one.

Asking ourselves what it is that makes youthfulness, we discover that it is three things—Work, Growth, and Faith.

By Work is meant an active participation in the interests of mankind. Notice how the boy cannot be idle; he wants to be at something; he longs to play the game.

Idleness is the essence of growing old. The business man who "retires" and devotes himself to doing nothing is committing suicide.

It is work, more than play, that keeps men young. Secondly, Growth. That is to say, growth of mind. Let the mind be always learning, alert for new truth, eager for new accomplishments.

It is when one's intellect closes, ceases to learn and becomes an on-looker, that old age sets in. While the mind is teachable, open and inquiring, it is young.

Lastly, Faith—a general belief in men and things. Faith in one's self, in one's destiny, in mankind.

Doubt is the very juice of senility. Cynicism, pessimism, and despair are the dust that blows from a dried-up soul.

Whoever does not work, does not learn, and has no faith, is old even at thirty.

## Value of a Tractor.

In connection with the Experimental Farm system of the country 26 tractors are used. While not entering into the discussion of the value of tractors compared with horses, the Dominion Field Husbandman says that one of the main advantages of the tractor consists in being able to prepare land for seeding very quickly. The value of early seeding, states this officer, is not as fully appreciated in Ontario and Quebec as it might be. He instances the beneficial results from early seeding at the Central Experimental farm in Ottawa. By delaying seeding one week beyond the period which has been shown to be most favorable, a loss has been entailed with wheat of 30 per cent., with barley of 24 per cent. and with oats of 15 per cent. By further delays greater loss has resulted. These facts are presented to show how a tractor, which will disc in an ordinary day as much land as six or eight horses, enables seeding to be finished earlier, with a consequent increase in the yield.

Another advantage in the use of the tractor consists in permitting plowing to be finished in the summer and fall, when the land is in the best shape. Despite these advantages, a farmer who works only two or three horses would be ill-advised to incur the expense of a tractor, but when five or six horses are in use, or considerable belt power would be handy, the buying of a tractor and dispensing with a couple of horses might be a wise move. At the absence of these horses might prove an inconvenience at harvest time; but the greater gain in power for spring cultivation and fall plowing would counterbalance this. In addition there would be less illness for the remaining horses and less hired help required during plowing.

## Shortage of Planting Stock of Apples and Other Fruits.

Farmers and others who contemplate an addition to their orchards are likely to find a shortage of available nursery stock of many of the popular varieties during the coming autumn and following spring. This information has been secured as the result of careful investigation of nursery conditions, both in Canada and the United States, by the Canadian Horticultural Council. Supplies of all kinds of fruit trees are less than for a number of years, and considerably less than they were last fall and spring, when many orders could not be filled.

In the case of apple trees the greatest shortage will be felt in commercial varieties most used in Ontario and Nova Scotia, such as King, Stark, Wagener, Gravenstein, Golden Russet, Grimes Golden, Baldwin, Rhode Island Greening, and Red Astrachan.

Bad weeds die young on well-run farms.

Fence row crops can be easily marketed on the sheep's back.

One way to make farming a better business is to eliminate waste labor, equipment and capital.

In the long run the chief aim of human laws is to protect the rights of the minority.

## Technical Education in Canada

A question affecting labor in Canada is that of technical education. In 1911 the Canadian Government appointed a Royal Commission, which spent two years investigating technical education in North America and Europe, and prepared a definite program for the development of this work in Canada. Industrial training or technical education as outlined in the report of the commission has for its aims: (1) preservation of health and the vigor of life; (2) the formation of good habits; (3) the development of the sense of responsibility and duty; (4) the preparation of the body, mind and spirit for following some useful occupation; (5) the cultivation of the mental powers, the acquisition of knowledge and the development of the scientific spirit with direct reference to the occupation; (6) the promotion of goodwill and desire and ability to co-operate with others; (7) the maintenance of standards and ideals; (8) as inclusive and ultimate, the perfecting of the human spirit, the improvement of the quality of life itself and the betterment of the conditions of labor, leisure, and living.

The war prevented immediate action on the recommendations of the commission, but in July, 1919, the Government passed the Technical Education Act, by which a total of \$10,000,000 is to be granted to the provinces during a period of ten years for the purpose of promoting technical education. This assistance has given a decided impetus to the work and every province is now building new technical schools. The total number operating in the Dominion in 1920 was 139, with an aggregate enrolment of 60,546 students.

These schools conduct courses in every branch of industrial and commercial occupations. Pre-vocational classes prepare juniors for apprenticeship or for regular vocational courses. Part-time co-operative or continuation classes provide special instruction for apprentices and juvenile employees. Evening unit courses are provided for skilled and unskilled workers in all branches of industry who wish to prepare themselves for promotion. Vocational and technical day classes prepare students for employment in industry and for entrance into advanced classes in technical and commercial colleges and universities. Special classes are provided for women and girls. Correspondence courses in mining are conducted in British Columbia, Alberta and Nova Scotia.

The major lines of activity to which the vocational or technical education programme is being adjusted are: (1) wholesale and retail business, including importing and exporting; (2) banking, brokerage, and insurance; (3) metal products—hardware, machines and tools, automobiles, heating and ventilating equipment, electrical equipment, farm implements and machinery, marine and locomotive and railroad equipment; (4) wood products—buildings, furniture, pulp and paper, farm equipment, vehicles, and automobile bodies; (5) mining—coal, gold, silver, copper, and nickel; (6) railroad operation—apprentices, shopmen, trainmen, engineers, telegraphers; (7) marine engineering and navigation; (8) stationary steam engineering and steam plant operation; (9) hydro-electric power plants—transmission of electrical energy for lighting, heating, street and inter-urban electric railway purposes; (10) home-making and wage-earning occupations for girls and women; (11) the skilled and semi-skilled trades; (12) agriculture; (13) municipal, provincial and federal Civil Services.

Vocational schools are controlled by Advisory Committees of the Municipal Boards of Education, consisting of representatives of the board, of employers and employees. The courses of study are organized to meet the needs of each community industrial, agricultural, or whatever they may be—and new courses are added as occasion demands. The point of most significance to the manufacturer is that the Advisory Committee co-operates with local industries in providing the most beneficial type of instruction to all classes of workers.

## Fountain-Pen Eraser Like Rubber Tip on Pencils.

Resembling the rubber tip in its application to the lead pencil is a newly patented ink pen. The eraser consists of a small piece of glass tubing that is sheathed in the end of the fountain pen opposite the pen nib. The open end of this tube is closed with a rubber stopper, through which passes a smaller glass tube of about 1/4-inch diameter, containing a small piece of glass rod that fits it loosely, and acts as a plunger.

The building of the Suez Canal began in 1859 and required ten years.

Recognize your weaknesses, but don't meditate upon them all the time.

Let a man get the idea that he is being wronged, or that everything is against him, and he cuts his earning capacity in two.

Scientific methods for cutting down the fatigue of factory workers is growing successful, the result in one confectionery factory being a twenty-seven per cent increase in efficiency.

## BITS OF HUMOR FROM HERE & THERE

### Still Struggling.

"You say they are twins, and yet one is five years older than her sister?" "Yes. You see one of them is married and one is not."

### Asking Too Much.

"Keep still!" said mother, who was tying Helen's shoelace. "Well, I can't stand on one foot like a mailbox," protested the child.

### Cautious, Anyway.

Father—"That young man of yours has more brains than I gave him credit for."

Daughter—"Oh, papa, you really don't mean it?"

Father—"Yes; instead of coming to see me he called me up on the telephone."

### Anonymous.

In the church in a little town in Alabama, Deacon Lee arose one Sunday morning to read a list of subscribers to the missionary fund. He began:

"The Rev. Montgomery Travers, \$10; Brother Steve Walker, \$5; Sister Margaret Kemp, \$7; anonymous donor, myself, \$6."

### In the Fall They Wire-less.

Willie—"Ma, teacher said the wires on the telegraph poles are educated."

Ma—"She couldn't have said that. What did she mean?"

Willie—"Well, she said the wires expand in summer and get saggy, while in winter they contract and become taut!"

### What Bobby Said.

Bobby's mother was anxious to know whether he had obeyed her instructions and behaved himself at the party. He was sure that he had. "When Mrs. Smith asked me if I wanted more cake, I said, 'No thank you.'"

His mother was relieved, but wanted to know more. Did she ask you again? "Yes, and I still told her, 'No thank you.' But after a while she asked me another time."

Bobby looked confident. "I said what pa always says: 'Take the darned stuff away!'"

### Zeph the Optimist.

"I see you've got a new horse, Zeph," the mail carrier in a small town said to one of the inhabitants who was brushing a chestnut mare.

"Ye-up," replied Zeph. "Do you trade often?"

"Ye-up; Sat'day I swapped three times."

"You must be doing pretty well."

"Ye-up, pretty good; generally come out second best—that isn't doing very bad, is it?"

### Not What He Ordered.

The new curate wanted to make a good impression, it being his first sermon. He was determined not to neglect his personal appearance.

Smoothing his hair, he said to the old verger: "Could you get me a glass? A small one will do."

The verger hurried away, but soon returned concealing something under his coat.

"I know what nervousness is," he said. "I've brought you a whole bottle."

### Light Relationship.

Professor X has a bright boy who one day at the age of four appeared in his father's study clasping in his hands a forlorn looking little chicken which had strayed from a neighboring incubator.

"Willie," said his father, "take that chicken back to his mother."

"Ain't dot any mudder," answered the child.

"Well, then, take it back to its father," said the professor, determined to maintain parental authority.

"Ain't dot any fadder," was the reply. "Ain't dot anything but an old lamp."

### Didn't Spend 'Em All.

The curate was admonishing the village sport. "You ought not to spend all your wages, George," George indignantly retorted that he did not.

"No?" queried the curate suspiciously.

One bottle for One Dollar; Six bottles for Five Dollars. Mailed direct to customers.

New Life Remedy Company  
75 West Adelaide St., Toronto  
Canada

"No, sir," said George. "I make it a rule never to spend more'n two-thirds of my wages on no account whatever."

"Well, well," said the curate pleasantly, "you put the rest in the bank, I suppose?"

"No," said George. "I put it to a better use than that, sir. I give it to the wife to keep house on."

### Can You Beat It?

Harry, while on a visit to the country, became deeply interested in watching an old gardener. After a while the following dialogue took place:

Gardener—"Some fine vegetables here!"

Harry—"Rather."

Gardener—"I once grew a cabbage which, when cut in two and the heart removed, made a grand cradle for kiddies!"

Harry—"It must have been a fine one! But we have some big vegetables in London. I remember seeing three men sleeping on one beat!"

Gardener—"Three men?"

Harry—"Yes, policeman!"

### Water.

Many of the sayings of Jesus we do not fully understand unless we know something of Palestine. For example, take the phrase, "The water of life."

We who live in a land where we can get all the water we want merely by turning a small tap will find it hard to catch the real significance of these words of Jesus, unless we can see in imagination the land of the Jews as it lies parched under the August sun. In Palestine water is precious beyond belief.

Near the ancient city of Jericho, on the slope that leads up from the level of the Dead Sea, is a barren waste much like parts of the Sahara Desert. It seems as if only a miracle could make anything grow on those rugged slopes; yet from Eliza's Fountain just a few rods away water is brought, so that some of the land is a tropical garden in which is an abundance of figs, olives, dates, bananas, oranges, pomegranates and luscious white grapes.

That water works the miracle; it has actually caused the desert to blossom as the rose. It has produced life.

Wherever the precepts of Christ are taught and believed life in the fullest sense of the word springs into being. Where they are denied there is death.

Side by side on the Judean hills near the city of Jerusalem are two small villages. One is a model of cleanliness and thrift; you would be glad to choose it for a home. The other is an example of filth and shiftlessness; you would avoid staying there even for a single night. The one is Christian; the other is Moslem. One has practiced the teachings of Him who was the Water of life; the other has largely rejected those teachings. One stands for life; the other stands for death.

## Cargoes Sailors Dread.

Recently three members of the crew of a French ship were killed by the cargo she was carrying! This consisted of onions. Not only are these apt to swell when touched by water, but they give off a very unpleasant gas after they have been in sea for some time.

Grain is heartily disliked by sailors. Care must be taken that no moisture reaches such a cargo or the grain will swell and burst the ship like an egg-shell.

The crew of a ship have to put up with many restrictions when the vessel is carrying explosives. They must keep any sort of light away from the cargo, and must smoke only in certain parts of the vessel. On entering port, the ship flies the red burgee or danger flag. Other ships, seeing this warning, give her a wide berth.

Deck cargoes are always dangerous, especially if they consist of timber or trucks. In a storm they are likely to break adrift, no matter how securely they may be lashed. Before now ships have been lost as the result of such accidents.

### Misleading.

The tourist stood in front of a sign—"Subway Entrances."

"H'm! It doesn't entrance me," he said coldly.

All this world is heavy with the promise of greater things and a day will come, one day in the unending succession of days, when beings (beings who are now latent in our thoughts and hidden in our loins) shall stand upon this earth as one stands upon a footstool, and shall laugh and reach out their hands amid the stars.—H. G. Wells.

## Romantic Case of a Deaf Mute by War.

A strange case growing out of the war is the mystery of a deaf mute in the Bologna hospital who lost memory, speech and hearing. The bombardment on the Austrian front and has not the faintest idea who he is.

For four years one family after another has claimed him until now he has almost as many parents as Italy's unknown soldier, says a despatch from Rome. In Bologna Lady Emma Zamorini became interested in the man and sent his photograph all over Italy and Europe, precipitating a torrent of letters and telegrams, claiming the mysterious soldier as a son or husband.

When the Government was induced to give free passage to would be parents and wives countless pilgrimages began to Bologna, but the unfortunate man remained nobody's. Recently an old couple and a young woman, claiming to be the man's parents and wife, respectively arrived in Bologna. After viewing several soldiers stripped to the waist, they fell upon the deaf mute, showering him with kisses. The man of mystery showed no filial emotion, but seemed interested in the girl, who said she was his spouse.

The visitors identified him as Maximilian Menichetti, but the suspicious of the authorities were aroused by the solicitude of the self-styled wife in the amount of the pension received by the deaf mute. Investigation soon disclosed the fact that the real Menichetti was killed in the war and the girl was looking for a new provider.

Meanwhile another family arrived from a remote province with the village priest and documents virtually identifying the deaf mute as Raphael Fanaro. When the aged mother embraced the soldier tears rolled down his cheeks, but he immediately repulsed her.

Evidently he has decided to adopt the other family, and he seems content with his new wife. She now confesses that her dead soldier husband made her unhappy with his constant scolding, and says she much prefers the deaf mute, who has never spoken an unkind word.

Mock suns.

Mock suns are similar in point of origin to the mirages of the desert, only they occur in the Arctic circle. As the long winter night of the polar region wanes, once every twenty-four hours a slight glow is seen at some point of the horizon. Often accompanying this glow is seen the phenomenon of the mock suns. Up in the heavens as many as five of these spectral orbs have been seen at once. Invariably they are all connected in a geometric figure, the suns seemingly being bound together with circles and arcs of light.

Often, when only one appears, it is mistaken for the real sun, and natives rejoice at the early end of the long winter night, only to be disappointed as the image disappears. The explanation of the phenomenon is given by physicists as refraction and reflection of light from the real sun below the horizon on the mists in the upper atmosphere.

Photography by Wireless.

Through wireless means, supplemented by an instrument somewhat resembling in its mechanism the human eye, we shall be able before long to talk to a person hundreds of thousands of miles away, and at the same time see that person's face. Conversation by radio will thereby be rendered more intimate and agreeable. We can even watch the other person's changes of expression while he talks—see him smile at a joke while we hear him laugh, etc.

Nikola Tesla, the famous electrician, is responsible for this prediction. He says that he is now trying to perfect the requisite apparatus for this expected new development of radio, which he calls "television."

Bunyan Gets New Nose.

John Bunyan has got a new nose. For several years he has lain on his tomb in a London graveyard quite noseless—a fact which has distressed hundreds of pilgrims who have come to pay him homage. His nose had either been accidentally broken off or, more probable, stolen by some souvenir hunter.

But now, thanks to the good offices of the Baptist and Congregational Unions, Bunyan's blessed effigy is once more presentable. The only difficulty was that no one seemed to be quite certain of the exact shape of Bunyan's nose and the stone mason had to depend on the advice of antiquarians and an old print.

MONEY ORDERS.

Send a Dominion Express Money Order. Five dollars costs three cents.

No Need to Talk.

"Does the baby talk yet?" asked a friend of the family.

"No," replied the baby's disgruntled little brother, "the baby doesn't need to talk."

"Doesn't need to talk?"

"No. All the baby has to do is to yell, and it gets everything that's worth having."

Minard's Liniment for sale everywhere

When cream is too thin to whip add the unbeaten white of an egg to it first. It becomes as stiff as the richest of cream.

## THE REASON WHY ANAEMIA PREVAILS

### The Strenuous Conditions of Life To-day Responsible.

Mothers who remark that girls to-day are more prone to anaemia than the girls of a generation ago, should look back at the surroundings in which they and their companions lived. They would easily see the reason in life's altered circumstances to-day.

Now the school girl's life is more strenuous; her more numerous studies are a severe tax upon the strength. Also, girls enter business soon after leaving school—at an age when they most need rest and outdoor life. Their womanly development is hampered by the stress of working hours, hurried and often scanty meals. Girls are more liable to bloodlessness to-day, but there is this consolation that this condition is now more easily remedied than in the years past. Such medicine as Dr. Williams' Pink Pills has helped thousands of weak, anaemic girls and women, simply because they contain the elements necessary to enrich the blood, which means good health and vitality.

This is proved by the statement of Miss Eldora Acker, Lake Pleasant, N.S., who says:—"I shall be glad to see other ailing girls will profit by my experience with Dr. Williams' Pink Pills. I was very much run down; my face was pale and there was dark circles around my eyes. My appetite was bad, and I had no ambition to do anything or go about. I had once before been helped by Dr. Williams' Pink Pills and decided to try them again. It proved a wise decision, for in less than two months time I felt in every way better; had a splendid appetite, the tired feeling disappeared, and I can work with enjoyment. Naturally I think there is no better medicine for young girls than Dr. Williams' Pink Pills."

You can procure Dr. Williams' Pink Pills through any dealer in medicine or they will be sent to you by mail at 50 cents a box or six boxes for \$2.50 by writing direct to The Dr. Williams' Medicine Co., Brockville, Ont.

Mock suns.

Mock suns are similar in point of origin to the mirages of the desert, only they occur in the Arctic circle. As the long winter night of the polar region wanes, once every twenty-four hours a slight glow is seen at some point of the horizon. Often accompanying this glow is seen the phenomenon of the mock suns. Up in the heavens as many as five of these spectral orbs have been seen at once. Invariably they are all connected in a geometric figure, the suns seemingly being bound together with circles and arcs of light.

Often, when only one appears, it is mistaken for the real sun, and natives rejoice at the early end of the long winter night, only to be disappointed as the image disappears. The explanation of the phenomenon is given by physicists as refraction and reflection of light from the real sun below the horizon on the mists in the upper atmosphere.

Photography by Wireless.

Through wireless means, supplemented by an instrument somewhat resembling in its mechanism the human eye, we shall be able before long to talk to a person hundreds of thousands of miles away, and at the same time see that person's face. Conversation by radio will thereby be rendered more intimate and agreeable. We can even watch the other person's changes of expression while he talks—see him smile at a joke while we hear him laugh, etc.

Nikola Tesla, the famous electrician, is responsible for this prediction. He says that he is now trying to perfect the requisite apparatus for this expected new development of radio, which he calls "television."

Bunyan Gets New Nose.

John Bunyan has got a new nose. For several years he has lain on his tomb in a London graveyard quite noseless—a fact which has distressed hundreds of pilgrims who have come to pay him homage. His nose had either been accidentally broken off or, more probable, stolen by some souvenir hunter.

But now, thanks to the good offices of the Baptist and Congregational Unions, Bunyan's blessed effigy is once more presentable. The only difficulty was that no one seemed to be quite certain of the exact shape of Bunyan's nose and the stone mason had to depend on the advice of antiquarians and an old print.

MONEY ORDERS.

Send a Dominion Express Money Order. Five dollars costs three cents.

No Need to Talk.

"Does the baby talk yet?" asked a friend of the family.

"No," replied the baby's disgruntled little brother, "the baby doesn't need to talk."

"Doesn't need to talk?"

"No. All the baby has to do is to yell, and it gets everything that's worth having."

Minard's Liniment for sale everywhere

When cream is too thin to whip add the unbeaten white of an egg to it first. It becomes as stiff as the richest of cream.

ISSUE No. 31—22.

## Desert Flying.

The Royal Air Force has recently completed a chain of air-stations across the Syrian Desert, to enable an air route between Cairo and Bagdad to be inaugurated.

The first Air Force party to be sent across the desert was a car convoy, says an English newspaper. They were charged with the duty of selecting suitable landing-grounds, and, more important still, of building a de-nitro track across.

The track was essential because it relied on the thousands every year. Each one gives a small contribution towards the upkeep of this ancient show-piece, to say nothing of the tips demanded by the numerous interpreters of history, guides, stray Arabs, and street loungers, who demand some small coin before they will divert their unwelcome attentions to other victims.

Altogether, guarding this bit of Noah's Ark is quite a profitable business, and it is certain the guards would fall asleep if sufficiently bribed, so as to enable the over-zealous tourist to take back a chip of the Ark to show his family.

It is recorded that an Australian soldier during the war badly wanted to take a cutting from the splintered relic. The guards refused, and made some demonstration of protest; but on being shown a bayonet in one hand and some money in the other, they became diplomatic and left the memory of Noah to the jack-knife of the Australian Tommy.

Not Loose.

"Put out your tongue, my dear," said the doctor.

Little Dorothy showed the tip of her tongue.

"Come, come!" cried the doctor. "Put it right out!"

"I-I can't," replied Dorothy, tearfully. "It's joined on at the back!"

Long Range Camera.

A long range motion picture camera has been perfected which has photographed shell bursting as far away as 20,000 yards.

NURSE THINKS NOTHING BETTER

Lydia E. Pinkham's Vegetable Compound Advised for all Women in Poor Health

Toronto, Ontario.—"I took Lydia E. Pinkham's Vegetable Compound for years and it is the only patent medicine I ever recommended. I am a nurse and if I find a woman is in poor health I always tell her to take it. Although you know that doctors and nurses do not use patent medicines I must say that I think there is nothing better than your Vegetable Compound. When I first took it many years ago, I was so tired when I got up in the morning that I could not eat, and when I went to bed I was too tired to sleep. My mother-in-law told me that Lydia E. Pinkham's Vegetable Compound was just what I wanted so I tried it and only took two bottles when I felt better. Since then I have found that there is nothing that makes me feel so well, for it seems to build my system right up. I don't know any other medicine that has done so much for women."—Mrs. W. H. PARKER, 13 Wellesley Ave., Toronto, Ontario.

Women testify again and again that they have been helped by Lydia E. Pinkham's Vegetable Compound "after other medicines have failed." It has been tried for nearly fifty years and not found wanting.

If you are suffering from any of the various ailments which accompany female weakness try Lydia E. Pinkham's Vegetable Compound.

# ASPIRIN

UNLESS you see the name "Bayer" on tablets, you are not getting Aspirin at all

Genuine

### WARDSVILLE

Mr. and Mrs. Albert Storey, Mrs. Mary Storey and Charlie Willis spent Sunday in Dresden.

Mrs. Jim McIntyre spent a few days in Florence last week.

Rhea McEae, Winnifred Parnall, Ava Weer, Gordon Brooks, Walter Whitfield and Malcolm Elliott were successful in passing their lower school examination.

Miss Mary Graham has returned to her home in Toronto after a two weeks' visit with Miss Maud Murphy.

Miss Hilda Blott entertained Friday evening in honor of her guest, Miss Edgar. The guests were Misses Vera Dykes, Minnie Randles, Maud Murphy and Mary Graham.

Miss Sylvia McGee, of Essex, has returned to her home after a three weeks' visit with Miss Agnes O'Malley.

The Methodist Sunday School held their annual picnic on Thursday to Port Glasgow. A large number were present and this combined with ideal weather helped to make the day a success.

Mr. and Mrs. Gifford and Miss Ida Wilson, of Detroit, are visiting J. Wilson and Mrs. Watterworth.

At the Sunday evening service in the Anglican church Miss Edgar sang the offertory solo. This was the last service in the Anglican church for a month as Rev. R. J. Murphy intends taking his holidays during the month. The Anglicans will worship with the Presbyterians for the next two Sundays under an arrangement made between the two ministers.

Protect the child from the ravages of worms by using Mother Graves' Worm Exterminator. It is a standard remedy, and years of use have enhanced its reputation.

### NORTH EKFRID

The funeral of Mrs. Samuel Ramey was held on Tuesday, July 25, at 1.30. Services were conducted by Rev. Mr. Parr, of the Appin Methodist church.

Interment was made in the Appin cemetery. Mrs. Ramey had been seriously ill for a number of months, but died very suddenly. She was nearly 53 years of age and was born in this neighborhood and lived on the farm where she died ever since her marriage. She was most hospitable and had a pleasant smile for everyone. She leaves to mourn her loss her husband and three daughters: Mrs. Henry Howe, of Carleton Place; Mrs. Floyd Webber, of Windsor; and Mrs. Gordon Roemmel, of Ekfrid. She also leaves three sisters and four brothers: Mrs. Green, of London; Mrs. Henry Roemmel, of Ekfrid; Mrs. Thomas Ramey, of Carleton Place; Alex. Chisholm, of Detroit; Hugh, of Carleton Place; and William, John and George, of Ekfrid. To them we extend our heartfelt sympathy in the loss of a kind and loving wife, mother and sister. The floral carriers were her nephews. The pallbearers were Adam and Charles Roemmel, Joseph Klemm, Henry Pettit, Bert Pierce and William Down.

A number from here attended the C. P. R. picnic at Springbank Thursday.

Mrs. Wm. Down visited her sister, Mrs. Fisher, at Mount Brydges last week.

Mrs. Henry Roemmel has been quite ill but is slowly improving.

A number from London attended the funeral of Mrs. Samuel Ramey on Tuesday.

Burley James, of Komoka, was the guest of his daughter, Mrs. Thos. Hardy, on Sunday.

Mrs. Walter Webber and son Jack, of Schreiber, are holidaying at Mr. and Mrs. Will Webber's.

Mrs. Foster was the guest of Mrs. E. Woolcock last week.

Alex. Chisholm, of Detroit, spent a few days with relatives in this vicinity.

Mrs. Mary Jane McPhail, of Nay, Mich., is here renewing old acquaintances.

### CAMERON

Owing to the rain on Monday the social was postponed.

Mr. and Mrs. Dan Munro spent Sunday with Mrs. Munro's parents, Mr. and Mrs. Gee.

Mr. and Mrs. Robert Gray, Mrs. Dixon and Jessie Gray spent Sunday with friends here and attended the services at Cameron church in the afternoon.

Miss Augusta Burford and Miss Holt, of Alvinston, spent Sunday with Marguerite McCallum.

Duncan Mitchell and Miss Jessie spent Sunday at Malcolm McVicar's.
