GAGGED THE SUFFRAGETTES.

Had Chained Themselves to a Balustrade in Restaurant.

Attempted to Present Petition to Prime Minister Asquith.

Police Arrested Some and Some Were Sentenced to Jail.

London Feb. 18.—The Women's Free London last night, and adopted resolu tions to continue the militant campaign for woman suffrage. Mrs. Despard was elegated to carry the resolutions to Premier Asquin to-Gay, forty members in the audience volunteering as an es-

cort.

Two suffragettes repeated the tactics employed in the ladies' gallery of the House of Commons some time ago by chaining themselves to a balustrade in the Gaiety restaurant last night in order to interrupt Augustine Birrell, Chief Secretary for Ireland, who was to speak at a dinner. The women were gagged, however, while files were brought and the chains cut. They were then expelled from the restaurant.

SENT TO JAIL. London, Feb. 18.—The suffragettes failed to-day in their attempt to pre-sent to Premier Asquith the resolution adopted at yesterday's meeting of the Women's Freedom League, which de-clared for a continuation of the mili-

Women's Freedom League, which declared for a continuation of the militant propaganda for suffrage.

They first attempted to march in
procession, but their line being broken
up by the police, they mingled with a
crowd of the curious who had gathered
to witness the scene and sauntered singly toward Downing street.

The police, however, had completely
blocked all entrances to the thoroughfare, and twenty of the more militant
suffragettes who tried to break through
the lines were arrested, charged with interfering with the police.

For a time there was a scene of great
disorder, women time and again throwing themselves valiantly against the
double line of police, only to be thrown
back, or if they were unusually persistent, to be handed over to constables,
who marched them off to the police station amid cheers, hoots and hisses from
the throng.

The police finally cleared the street.

and the women who were not arrested returned to their hall, where they were addressed by the leaders.

addressed by the leaders.

The women who were taken into custody were later arraigned in a Police Court. They refused to pay the fines imposed, and all were sent to prison for terms varying from a fortnight to a worth.

NOT CRIMINAL.

Speaking to the prisoner's counsel, Mr. W. H. Wardrope, K. C., his honor said that he had had some difficulty in arriving at a conclusion as to the prisoner's mental condition. He did not think that any sane man would have done the thing that he did. There was nothing to show that he had any ulterior motive, and there was much to show that he was weak-minded, and that his was not the act of a criminal. He said that two months in jail would be the sentence, and in the meantime he would direct that the jail physicians examine the man, and find out whether he was in need of treatment.

PROPOSED A REDUCTION OF TWENTY-FIVE PER CENT.

Moulders Agreed to Accept Cut of 12 1-2 Per Cent., Which Was Refused and Trouble is Probable.

It looks as if there will not be a peaceful settlement of the wages trouble of the stove moulders. Yes terday afternoon a conference took place between the committee of the union, which had full power to effect an agreement as to wages, and the foundrymen. The bosses surprised the committee by asking that a cut of 25 per cent, be made in the scale which has been in effect for three years, and which expired a few months ago.

The committee argued strongly for a continuance of the scale, in view of the fact that the men have been idle so long, and that the National Foundrymen's Alliance of the United States recently renewed its agreement with the International Union in the States. After a long discussion the committee agreed to accept a cut of 10 per cent., and finally offered to go half way, making a 121/2 per cent. reduction. The bosses made no fur ther concession, and the committee retired.

The committee reported at a meeting of the union last night, and a vote was taken. By a large majority it was decided not to accept a reduction of more than 12½ per cent., and the Grievance Committee of the International will be notified at once that there is practically a lock-out here. "We shall see about that. I can get a lawyer, too," sputtered Miles Westland, furiously, and he rushed from the room, and went immediately to lay his case before Mr. Rainsford.

The lawyer heard him through gravely, and then said:

"I cannot undertake the case, Mr. Westland, as I shall of course be engaged on the side of Mr. Lloyd's heires, and all my sympathies go with her. Pardon my frankness, but you have acted like a villain, and my advice to you is to keep quiet and let your first wife secure a divorce, so that you can remarry Imogen."

"No. I swear it's not. I'd take her without a penny! Mr, Rainsford, I love her to madness. Why, I didn't use to be half-bad, but the love of that girl's black eyes made me a devil. Oh, heaven, if she would only have loved me it might have made a good man out of me!" and suddenly giving away to his despair, the young fellow dropped his head on Mr. Rainsford's table and sobbed aloud.

The lawyer's face expressed his surprise, and after a moment he said, gently:

"Well, you went the wrong way to win her. To be forced to marry you in that brutab fashion was enough to make any woman hate you. Give it up, Miles, and try to love the other one."

"Never! I hate her! I hope she will die—there!" exclaimed Bonnie, with girlish delight.

"Hull Deane was married on Christmas to the new schoolmaster, and Art Vaughn is engaged to be married. And Mrs. Thorne has two more children since you left—twins—and but indeed they are all well and doing well, Bonnie; so please tell me all about yourself since you left us,' said Farmer Dale, who was more interested in bias daughter than his neighbors.

"Well, I will, papa," returned the young girl. She got up, placed herself on his knee, and hugged the old gray head with her white arms. "Oh, how good it is to have you back again. I have missed you so, my darling papa. I have weep for you so many nights." she murmured, lovingly, as she kissed his face.

Miles caught up his hat, with an oath, and rushed out of the office without the civility of a good-night.

He went immediately to the house of another lawyer, but he was out of town attending court at another county seat. He must perfore wait until to-morrow, but he swore to himself a bitter oath that he would possess beautiful Bonnie if the whole world stood between them.

CHAPTER XXII.

When Miles Westland left the room Bonnie drew a long, sobbing breath of relief, and looked up with wet, dark eyes into her father's face.

"Oh, papa, dearest, will you ever forgive me for my wickedness? Indeed, it tas for Imogen's sake that I would not own my identity! Think, think, how dreadfully it turns out for her, poor thing" she sobbed.

"Yes, indeed, that was it, papa," she said, earnestly, and as his trembling old hand tenderly stroked the golden heads he looked shyly into the eyes of Lin.
"And you?" she faltered.

"I knew you from the first moment. That was why I wished so carnessly to be your friend. I foresaw this dreadful hour, when Miles Westland would try to claim you," he replied, then holding out his hand half-hesitatingly, "Bonnie, I am almost afraid to ask your forgiveness for my crueity that day."

"You have earned it by your goodness to me since," she answered, sweetly, and she gave him her little hand.

"Maybe I ought to be asking forgiveness, too," said the old farmer, bashfully, "tin, I cut up too rough on you and Ronnie that day. Maybe Imogen didn't tell things exactly square, she was so mad. I've mistrusted that often since was left to myself, and she cared so little for me that she never wrote a word back to her lonely old dad. Will you both overfook it?"

"Willingly," said Lin.

A thrill ran through every one, and there were tears in Lin's eyes at the touching scene. Only Miles Westland scowled in demoniac triumph.

"She owns that she is Bonnie, my wife," he cried, significantly. "My wife, no matter how I won her, and she shall be mine—she and all her wealth!"

He flashed a look of triumph at Lin La Valliere, but Farmer Dale, holding his darling daughter to his heart, looked over the top of her pretty golden head, and said, angrily:

"You villain, you will never get Bonnie. Why, a lawyer told me that such a marriage as that could be very easily broken, and I will get my child a lawyer to-morrow, and she shall be free directly, and marry anybody else she wonts to," with a glance of broad friendliness toward Lin.

"But Mollie Miller, papa, and Ella Deane, and the rest?"

"There's a young editor chap, name of Argabrite, from up in Greenbrier County, courting Mollie Miller, and folks do say it is sure to be a match."

"Hurrah for Mollie- I mean to be at the wedding and give the bride a lovely present, 'exclaimed Bonnie, with girlish delight."

"Never! I hate her! I hope she will die—there!" exclaimed the young man, malevolently.

Lifting his head, with a haggard look on his white face, he continued:

"I'll go an! see another lawyer, and perhaps he can help me in spite of you! I'll never give her up while there's life in my body to defend my claim!"

"You talk rashly. A man can't always have the woman he sets his heart on. Probably many another young fellow has sighed for this lovely girl, and found it like crying for the moon," replied the lawyer, coolly, and added:
"Don't go to another lawyer to-night, Miles. Wait, for decency's sake, until you see how long Imogen's illness turns out. You owe her some little respect. Go home and sleep on the matter, and let us talk it over more calmly to-morrow."

It was almost midnight when she let him go to his room, they both had so much to hear and tell, and then Bonnie rost resister was resting more casily. Then tired with her late vigil, but very, very happy over the coming of her beloved old father, Bonnie sought her dainty couch and soon fell into a deep sleep.

USE ELECTRICITY.

Steel Trust to Erect Furnaces For New Process.

New York, Feb. 17.-The Iron Age will say to-morrow: The United States Steel Corporation has decided to introduce the Heroult electric furnace and steel process, after its engineers had made a close study of the mineral sub-ject, extending over two years, and have made a number of visits to the locali-ties abroad where electric furnaces and methods are in operation.

methods are in operation.

The outcome of these investigations is that it has been decided to put up one 15-ton Heroult furnace at the South Chicago works of the Illinois Steel Co., and one 15-ton furnace at the Washburn and Moen plant at Worcester.

BRITISH POOR.

Proposal to Abolish Workhouse and Guardians.

Separate Treatment For Aged and the Able Bodied Loafer.

London, Feb. 7.—The most important British sociological report in many years British sociological report in many years has just been issued. For more than three years a Royal Commission, comprising experts in poor law administration and social economics, have been investigating the British poor laws, and the industrial and social conditions which led to unemployment and the probe employed. The report fills 1,238 large folio pages, while the records of evidence and the reports of special investigators will, when printed, make more than 40 volumes. The report, or rather reports, for there are majority and minority reports, contain 250 recommendations. Some of the most striking of these, in which both the majority and the minority agree, are the abolition of general workhouses and boards of poor law guardians, the establishment of separate treatment for the aged, weak, able-bodied unemployed persons and loafers, the compulsory detention of persistent idlers for periods varying from six months to three years, the institution of labor exchanges and the discouragement or prevention of child labor. Throughout the reports an appeal is made to the prosperous to cooperate by personal service in the relief of the poor, especially to set the poor agone and the subordination of the serious side of life to frivoity are declared to be habits that are responsible for much pauperism and distress. If reforms in these directions are to be effective the example, says the report, must come from above. The evidence given showed that city-bred populations degenerate. A great majority of the unemployed are city-bred. It is impossible to give in calle limits more than the merest out line of the proposals, which are drastically revolutionary, and which will, if adopted, completely alter social conditions in some directions. It is not worthy that the commission is the first great Rayol Commission having women members.

Suffragette in a Balloon Attempted to Distribute Literature.

London, Feb. 17 .- The militant woman suffragists yesterday as their latest and most ambitious exploit attempted propaganda by airship. A balloon manned by an aeronaut and Miss Mur iel Matters, one of the heroines of the grill incident in the House of Comgrill incident in the House of Com-mons, went up at Hendon. It was Miss Matters' intention to pass over West-minster and throw suffragist literature down on the crowds about St. Stephen's. The motor was too feeble, however, to cope with the winds and the airship came down at Croydon.

At an early hour this morning at the town of Keeskeme, Hungary, three severe shocks of earthquake lasting ten seconds were felt. The panie-stricken inhabitants fled in their night dresses into the streets. The third shock was the most severe of all, upsetting the furniture in many bouses. Similar disturbances are reported from many other places in Hungary.

Normal Conditions at Niagara.

Niagara Falls, Feb. 17.—A change of wind and warmer weather has increased the stream in the American channel to treble yesterday's proportions, and the falls are gradually resuming their normal flow. When the water began to come down the river in greater quantities the power plants on this side experienced less difficulty in generating energy. Blasting is being continued in the intakes of the power houses, which are rapidly being cleared of ice.

MAY FIX OTHER CRIMES ON HIM. MAY FIX OTHER CRIMES ON HIM.
Besides these known cases, the police
are convinced that within a few days
they will be able to discover others.
They are investigating several mysterious crimes against women in the light
of Gagle's confession, and he will be asked about the cases.

The capture of the man was effected
by Captain J. J. Halpin and Special Policemen Matthew McNamara and Michael Kane. Their first clue came from

ael Kane. Their first clue came from Ethel Barnette, of 303 Van Buren street west, whom Gagle often visited after he had earned a few dollars.

"In common with the police of other districts we had been on the look-out districts we had been on the look-out for the murderer of little Ella Schraeder, of Gary," said Captain Halpin. "Nothing definite was found and work upon the case had been practically dropped when we received the report of the attack upon Maude Wieland, whose parents live in our district.

"The girl told us a man had come to her with a boy, Charles Valentine, who lived in the neighborhood, and had said the boy told him she was looking for a position.

"The girl started with him, but his actions became so suspicious that after she had gone two blocks she turned and ran home. Her brothers tried to chase the man. The case of the Sells girl was similar. At the employment agency the man gave his own name and applied for a young girl to do housework. Both girls he engaged were warned in time by his actions and escaped before he led them into the country. Chicago, Feb. 18.—Chicago was rid yesterday of a man, a human vampire, whose liberty threatened the safety of any young girl in the city who might be seeking employment.

The man confessed to one murder, that of 9-year-old Ella Schraeder, whom he attacked while she was carrying lunch to her father, who lives near Gary, Ind. Six young girls have identified him as the man who has enticed and attacked them within the last four months, and the police believe this number will be increased.

The prisoner, William Gagle, was captured by the South Chicago police after weeks of clever detective work. He was turned over to the authorities of Indiana and taken to the jail at Crown Point. His confession of the murder was made during the afternoon.

Gagle is a trainp. He has not worked steadily for nineteen years. He is audations and shrewd, as shown by the fact that after his three most atrocious crimes he sought lodging for the night at the nearest police station.

There he accepted the hospitality of the police and watched their continued efforts to obtain some clue to the man who had killed or attacked little girls in the neighborhood. In the morning he would talk with the police about the crime before he departed.

Gagle is known not to have had \$5 in his possession at one time in the last six months. When his fortunes were at the lowest he would sek out girls of respectable families, and with various stories of giving them employment upon a farm or in a small town induce them, with their parents' consent, to accompany him.

Leading the girls into the woods or Leading the girls into the woods on the pretext that it was a short cut to his farm, he would attack them. The total liquor licenses numbered 68, one to tal liquor licenses numbered 68, one to every 1,000 of the population. During the year 369 persons were sent to prison, 1,909 offences were reported by the police and 1,822 persons were apprehended or cited, 118 fires were investigated. How many were investigated in Hamilton? No vagrants were found in the city the night the vagrant census was taken. The force is inspected each year by His Majesty's Inspector of Constabulary for Scotland. No such inspection takes place here.

CLOSED EYES TO DANGER.

Some Aldermen Shirk the Beach Pump Situation.

Salary Increases Recommended to Fire Department Heads.

Some Time Spent Upon the Year's Estimates.

The members of the Fire and Water Committee lost themselves in a mist of word?, last night, taking nearly three hours to transact business that might have been disposed of in one-third of the time. Things moved along smoothly until the power question, over which there has been a perpetual discussion was introduced. Chairman Clark brought the matter up by suggesting that the committee recommend the Council to award the contracts for electric pumps and motors. This would clear its skirts of any blame that might be attached in the event of a breakdown of the pumps and serious loss from fire or other danger. It would place the onus on the Council, whereas the aldermen, if something happened, might say that the Council could not be held re sponsible, because it never had a chance to vote on the matter.

sponsite, occase it never had a chance to vote on the matter.

Ald. Morris, Anderson and Hopkin strongly protested against any action being taken, on the ground that they had no notice the matter was coming up, that they had not sufficient information, that nothing should be done until it was decided by the Council which power was to be used. Ald, Morris said it was not courteous to bring the matter up in this way.

The Chairman, Ald, Gardner, Milne and Lees thought that the urgent need of new pumps as shown in Engineer McFarlane's letter, and other information before the aldermen, justified them in keeping the matter before the Council.

Ald, Lees, seconded by Ald, Milne, moved that the resolution passed by last year's committee, and later withdrawn, providing for the purchase of pumps and motors, he sent on to the Council. In amendment Ald, Anderson, seconded by Ald, Hopkins, moved that no action he taken until the power question was settled.

Ald, Hopkins later said that if the

tion was settled.
Ald. Hopkins later said that if the

tion was settled.

Ald. Hopkins later said that if the only reason for sending the recommendation on to the Council was to urge the necessity of the pumps he would undertake himself to draw the attention of the aldermen to the matter at the next meeting, and explain, that was the reason the recommendation, was withdrawn. This satisfied the other aldermen, and Ald. Lees withdrew his motion.

Another half hour was taken no discussing requisitions. An item in the accounts, a bill for \$32 for iron work and a rug for the Chief's office, caught Ald. Lees' eye, and he wanted to know if it was the rule to let the Chief or other employees buy what they wanted, by getting the consent of the Chairman, without bringing the matter before the committee. He and Ald. Morris thought the amount, which the Chairman should be empowered to authorize the expenditure of without the consent of the committee, should not exceed \$10.

Chairman Clark said he was quite agreeable that the aldermen should stirt themselves, and if desired he would bring every requisition before the committee. After all the talk nothing was done.

He and Ald, Morris thought the amount, which the Chairman should be empowered to authorize the expenditure of without the consent of the committee, should not exceed \$10.

Chairman Clark said he was quite agreeable that the aldermen should suit themselves, and if desired he would bring every requisition before the committee. For nearly an hour the aldermen struggled with the fire denartment estimates. Chief Ten Eyek wanted repairs made to a lot of the apparatus. He said it had been allowed to depreciate so much that it would require about twice as much to fix it news as it would had it been repaired at the proper time.

"I am merely telling you what is required." he said, "It rests with you what is to be done."

PACKAGES AND PACKING.

Chief Subjects at Fruit Institute at Beamsville.

Apples Packed in Boxes Better Than in Barrels.

Shipping of Immature Grapes Condemned by Inspector.

(Special Despatch to the Times.) Beamsville, Feb. 18.—Packages and packing was undoubtedly the most interesting and fascinating of all the subjects handled at the Fruit Institute meetings here this week, and which were largely attended on Tuesday and Wednesday, despite the heavy roads. P G. Carey, Dominion Fruit Inspector, and Mr. Robert Thompson, of St. Catharines, both instructed and lectured on the above subjects, in their inimitable manner. Boxes of fancy apples were packed and exhibited to the growers, and the whole demonstration was a worthy one. The boxes measured lox11x20 inches inside, and those shown for apples were put together in British Columbia. Mr. Thompson thought these were the best, the ones made around this vicinity being spliced. "An Ontario made box will not hold the nails as well as the spruce." he said. He was greatly in favor of growers using boxes getting a marking die. Mr. Carey's idea was to take the stems out of all apples, especially on the face of the box. With Mr. Thompson, his pet idea too, was having a proper brand for the boxes. In this connection he told of several instances where the marked boxes brought the better prices. Boxes these days were gradually putting the barrel out of business because it assured better fruit and more attractive. Good, square, honest packing, in Mr. Carey's estimation, was as far ahead in the baskets being sent out to-day, as day was of night, to that ten years ago. About ten per cent. is the amount that goes faced into the markets now-a-day, as day was of night, to that ten years ago. About ten per cent. is the amount that goes faced into the markets now-a-day. The man who picked and shipped immature fruit was burting every grower in the district. He claimed that some meetings here this week, and which were largely attended on Tuesday and goes laced into the markets now-actays. The man who picked and shipped immature fruit was burting every grower in the district. He claimed that some way must be found to cool fruit, especially mentioning apples, before they are necked or not nick at all, while pecially mentioning apples, before they are packed, or not pick at all, while the weather is hot. Barrels took about seven days to cool properly after being packed, and boxes seven hours. Not over fifty per cent. of our fruit arrives on the markets in good condition, was Mr. Carey's claim.

was of better quality textured British Columb textured British Columbia preducts. Fruit wrapped would keep longer and in better condition than that unwrapped. Next summer a number of the St. Catharines growers, he said, were going to experiment in shipments of Richmond early cherries, two layers in a box, to the west. "Ninety per cent. of the grower that go out are immature." box, to the west. "Ninety per cent. of the grapes that go out are immature," Mr. Thompson said. But it seemed the man who shipped first was the man who received the highest prices. It was good news that Niagara grapes sent west half-ripened, had fallen on evil days. The people out there want the Con-cord now, and these had to be left on until ripened or nearly so, on account of their color.

Messrs. Hearst and Johnson Deliver Speeches.

Mr. Allan Studholme Wants Absenties Fined.

Toronto, Feb. 18 .- Fashion with her frills and furbelows having had her day, so far as the Ontario Legislature concerned, the House resumed its customary businesslike aspect yesterday, when the debate on the reply to the address from the throne was opened. Prior, however, to commencement of the orthodox culogies of the Government at the hands of selected and newly-elected supporters of the Administration, the leader of the Opposition, the Hon. A. G. MacKay, addressed an inquiry to the Government dealing with an important matter. He drew attention to the herrible catastrophe in Mexico resulting from an outburst of fire at a moving picture show. He reminded the Government that in view of the fact that these exhibitions swarmed in Outario, which were being run under conditions similar to those which prevailed in Mexico, last session an act was passed empowering the Government to frame regulations to control them. day, when the debate on the reply to to frame regulations to control them. He inquired as to what steps had been taken to prevent the occurrence of a holocaust in the Province.

taken to prevent the occurrence of a holocaust in the Province.

The Provincial Treasurer, in whose hands the matter rests, pleaded that the legislation enacted last session was found to be insufficient, and that, therefore, nothing had been done. He assured the House at the same time that during the present sitting of the Legislature an amending bill would be introduced giving the Government the necessary powers of control.

The moving and the seconding of the reply to the address from the throne was entrusted to Mr. W. H. Hearst, the member for the Sault, and Mr. J. W. Johnson, West Hastings, respectively. The debate was adjourned at the instance of Mr. J. McEwing, the Liberal member for West Wellington. The House then went into supply and voted \$750,000 to carry on the business of the Province until the estimates had been considered and passed.

Hon. Mr. Foy moved the first readfrom Mr. roy moved the first read-ing of thirty-one bills, the result of the work of consolidation of the statutes which has been going on. None of these, he explained, contain-ed any substantial changes.

EXPEDITE BUSINESS. "We shall have to get out of the loose, happy-go-lucky way of doing business which has been the feature of this House," was the statement of the Premier in expressing the hope that business might be expedited. The Government was anxious, but not insistent that the session should close by Good Friday, and he suggested that the members should shorten their week-end vacations by working on Friday and hold sittings every other evening. "As a rule," he declared, "the order paper of this House is a remarkable thing to look at. Motion after motion for three and sometimes four weeks at a time is left standing at the request of the member who introduced it. I do not wish to describe troduced it. I do not wish to describe

troduced it. I do not wish to describe this conduct in language which would be perfectly justifiabple. When, however, a member allows his resolution to go by twice he should understand he runs the risk of having it struck."

The Opposition leader expressed his concurrence with everything the Premier said, but suggested that if there were to be a week-end at all it would be more convenient for the members to work or Friday and have Monday in the proposed in the blood. It neutralizes the story of the singwork on Friday and have Monday as the light day.

"That strikes me as a good suggestion," said the Premier. "I will confer with my hon. friend about it."
TAG LOBBYISTS.

TAG LOBBYISTS.

Mr. Studholme was glad that the leaders recognized it as absolutely necessary that members should earn their money. Most of them seemed to go home on Thursday and to come back the following Tuesday or Wednesday. He suggested a fine for non-attendance. "Men who think more of their own business and profession than their obligations to this great Province had better resign." Continuing, Mr. Studholme said that most of the time was wasted in lobby-

most of the time was wasted in lobbying. "If," he said, "you would tag the lobbyist I will know him and be on my guard. One of these men put his fist in a member's face last session for not seeing eye to eye with him."

A practical suggestion was made by Mr. McDougal, East Ottawa, that the rules for private legislation should be made stricter. In the Federal House, he said, five dollars was charged for each bill introduced after the date set for the reception of such legislation. Premier Whitney expressed his approval of Mr. McDougal's suggestion, and recommended that he should impart his view to the Chairman of the Committee on Standing Orders.

The debate on the address will be resumed to-day by Mr. McEwing, who will be followed by Mr. J. P. Downey on the Government side, and Mr. P. J. McCormack, East Lambton, and Mr. D. J. McDougal.

waterpowers will create a wonderful industrial centre of the north." Mr. Hearst paid an enthusiastic tribute to Hon. Frank Cochrane, to whose zeal, honesty and administration he declared the solid phalanx of Government support from the north was due.

The member for the Soo reviewed the various clauses in the address. In passing, he spoke of the happy circumstance that Hon. J. M. Gibson, the Lieutenant-Governor, was so closely associated in the past with the Government of Ontario. Proceeding, he reverted to the land of his home and its agricultural possibilities. While the Northwest was heralded as "the granary of the Empire and the bread basket." he was reminded that half of the grain of Canada was still grown in Ontario. With the opening of the great clay belt and the lands of the north Mr. Hearst pre-

"We want," said he, "the work of the Agricultural College extended to our country, in the establishment of Provincial stations to experiment in our climate and under our conditions."

Referring to law reform, Mr. Hearst described himself as a "member of that self-sacrificing band of patriots who earn their bread by the sweat of their jaw." Nevertheless he thought law reform was a good and a necessary thing. He could not imagine the profession doing anything to combat a measure to lessen the costs of litigation and to restrict appeals.

Mr. J. W. Johnson (West Hastings) referred to the general satisfaction felt at the appointment of the Hon. J. M. Gibson to the important position of Lieutenant-Governor. By that appointment the past services of his Honor to the Province has been fittingly recognized. Following an expression of opinion that the session was likely to be both short and peaceful, Mr. Johnson proceeded to deal with the question of Canada's relation to the rest of the empire. He held that the Dominion should assist in bearing the burden of maintaining the British navy, and urged that not only should every effort be made to strengthen the bonds between the Dominion and the old land, but between the different component parts of the Dominion itself. The chief barrier in the intercourse between Ontario and Quebec was, he pointed out, ignorance of each other's language. That could not be entirely overcome, but it could be mitigated by the united action of ele-different. TO ABOLISH THE CROSSINGS.

Hon. G. P. Graham to Deal With the Question.

Governments and Municipalities Must Bear a Share.

Interviews With Bill Miner -Mc-Avity and Mayes' Tender.

Ottawa, Feb. 17.1-That Hon. Mr. Graham has practically framed a poley for the systematic protection of crossings, which only requires a little further consideration in regard to its financial obligations, was the important fact that emerged from a discussion in the House this afternoon on Mr. Lennox's resolution dealing with the subject.

Mr. Lennox's speech in support of resolution was a carefully-prepared effort, showing much research and affording a good deal of informa-tion regarding the methods which had been adopted in other countries to deal with the level crossings problem. In effect it was a plea for the separa-tion of railway and highway grades, having due regard for the conditions and cost. On the latter point he sub micted that the railway should bear the entire burden in the case of new roads, and that rural municipalities, at any rate, should be exempted.

HON, G. P. GRAHAM.

Hon. Mr. Graham was, as always, frank, eminently practical, and surefooted in his handling of the question. Largely his speech was an outline of the difficulties to be reckoned with, with some suggestive comments as to how these should be met. Reading between the lines, it was possible to guess the guiding principle upon which the Government policy may be framed, but Mr. Graham was careful to give away nothing of any importance. The question of crossings, he said, opened up the great question of transportation. If Canada was not to be outstripped in the matter of transportation a first train must be run, and run daily, both Hon. Mr. Graham was, as always, the matter of transportation a fast train must be run, and run daily, both for passengers and freight. In Canada the public carriers had not the conditions which prevailed in Britain and the United States, where density of tions which prevailed in Britain and the United States, where density of population was an important factor. but here, as elsewhere, the interests of the people and the interests of the people and the interests of the rail-ways were one in the matter of getting the producer as close as possible to the market, and whatever was decided it must be borne in mind with regard to the suggestion that there should be an examination into all the crossings. He pointed out that Mr. Lennox himself had admitted that during the past five years the dangerous crossings in Canada had been practically located. The Rail-way Commission had been collecting data and had prepared a return which showed that during the fast five years the number of people killed at level crossings in Canada was 270. In dealing with the question it had to be kept in mind that while in the United States the railways were largely under the con-trol of the various State authorities in Canada they were under the control of the Federal authorities. Then the State Legislatures in the Union controll ities, while the Dominion Parliament could not say what a municipality should do. At the same time, while it would be more difficult to work out a system in Canada like that in the Unit-ed States, the difficulty should not be

ALL MUST CONTRIBUTE. ALL MUST CONTRIBUTE.

If there was to be a comprehensive and satisfactory dealing with the level crossings, it could not be accomplished by attempting to make a division among the people, as between municipalities, Provinces or the Dominion. minion. To be successful they must agree on some measure which would impose the burdens under conditions that no rural municipality should be asked to pay towards the cost of separating or protecting crossings. He (Mr. Graham) was afraid they should be asked to pay towards the cost of separating or protecting crossings. He (Mr. Graham) was afraid they should be asked to pay towards the cost of separating or protecting crossings. He (Mr. Graham) was afraid they should be asked to pay towards the cost of separating or protecting crossings. He (Mr. Graham) was afraid they should be asked to pay towards the cost of separating or protecting crossings. He (Mr. Graham) was afraid they should be asked to pay towards the cost of separating or protecting crossings. He (Mr. Graham) was afraid they should be asked to pay towards the cost of separating or protecting crossings. He (Mr. Graham) was afraid they should be asked to pay towards the cost of separating or protecting crossings. He (Mr. Graham) was afraid they should be asked to pay towards the cost of separating or protecting crossings. He (Mr. Graham) was afraid they should be asked to pay towards the cost of separating or protecting crossings. He (Mr. Graham) was afraid they should be asked to pay towa on the level without let or hindrance.
"I submit," declared Mr. Graham, must be borne by the railways themselves. There is no question about that. Whatever the division might be among the rest, it would be a minor division. They should not be asked to pay more than a certain amount, and under the jurisdiction of the board it might be nothing, or a very small amount."

RESPONSIBILITY OF TRAVELLERS The responsibility of travellers on the highway was another matter that could not be overlooked. He was informed that ninety per cent. of the accidents which had occurred at level crossings would never have occurred if ordinary

care had been exercised by travellers on the highways.

Mr. Lancaster disputed this statement, whereupon Mr. Graham declared that it was based on information supplied by the officers of the Railway Commission. It was a recognized principle that the public had to be protected against their own carelessness, and he submitted that if the public were to be protected against their own carelessness they ough to be asked to pay something for that protection. If something could be done to induce, if not compel, the people to look better after their own safety when approaching crossings many accidents would be averted.

GOVERNMENT NOT YET DECIDED.

GOVERNMENT NOT YET DECIDED. "As to what the Government are going to do," said Mr. Graham, "I am not at this stage prepared to say. To make any system successful we will have to have the co-operation of all classes. I have not been idling on this question. on this question. I have been studying it with all the care I can exercise ing it with all the care I can exercise for some time, and I am impressed as thoroughly as any man with the idea that it is time we had some systematic method of protecting the lives of the people on our highways. But it cannot be settled at once. I intend to bring a plan before my colleagues in a very few days. I have been holding it in abeyance to disleagues in a very few days. I have been holding it in abeyance to discuss it with the Minister of Finance on his return. I have a policy in my mind that I want to lay before my colleagues and the people." Concluding, Mr. Graham pointed out that whatever might be done with the existing railways. Parliament had a duty to perform with regard to future railways. He took it for granted that the House would be prepared to support a measure which would secure that in chartering new railways the greatest care would be exercised in regard to level crossings, and thet

INTERVIEWS WITH BILL MINER. Mr. Aylesworth in the Commons this afternoon, replying to Mr. Meighen, gave details of a number of interviews allowed with Bill Miner while in the penitary at New Westminster. He referred especially to an interview of the 9th of Especial 1907. February, 1907, in the warden's presence, when A. E. Bullock, Vancouver said to be in the special service of the C. P. R., and Jake Terry talked to Miner. All the interviews were allowed solely on the warden's or deputy war den's authority. The Ottawa authori-ties were not consulted. During the in-vestigation conducted by Inspector Dawson after Miner's escape Police Office McIntosh, of New Westminster, stated that after an interview with Bullock and Terry, Miner had told him that Bullock said Miner would be pardoned if he would surrender the C. Asked by Mr. Lennox whether the Government was of the opinion that the Government could and should recover this \$35,933, Hon. Dr. Pugsley replied in the negative, for the reason that since there was no collusion between the then Minister of Public Works (Mr. Hayman) or other officials of the department and Mayes and Mc. FIXING RAILWAY RATES. FIXING RAILWAY RATES.

Mr. Borden asked the Minister of Railways if the Railway Commission had adopted any rule with regard to taking into consideration the capitalization and cost of construction in the

matter of fixing railway rates.

Hon. Mr. Graham read a memo from the Chairman of the board, stating that there was no fixed rule stating that there was no fixed rule adopted. The only case in which rates had been fixed on this basis was in con-WATERWAYS TREATY

WATERWAYS TREATY.

Mr. Borden also called attention to the fact that newspapers were princing what purported to be exact copies of the new waterways treaty with the United States. If these were accurate, he said, there was no reason why it should be any longer necessary to keep up the pretact of secrecy and withhold the terms of the treaty from Parliament. If they were not accurate, a Government statement to that effect should be forthcoming.

Sir Wilfrid Laurier said he had noticed some of the newspaper synopses of the treaty. Some of them were fairly

accurate, some not so accurate. If cer-tain newspapers had obtained the text of the treaty from the United States he was sure it was not through any official sanction of the American authorities. "For my own part," said Sir Wilfrid, "I see no reason why the terms of the treaty should not be made public here.

ROYAL TEMPLARS

Want Standard For Hotels Whether Licensed or Not.

More Complaint About the Three-Fifths Clause.

Toronto, Feb. 18 .- The vigilance and intended further activity of the promo ters of temperance in Ontario was indi cated in the adoption of several reports by the Ontario Council of the Royal Templars of Temperance in annual ses atempiars of Temperance in annual session in Xion Congregational Church yesterday. That the objection to the "three-fifths" clause remains unabated, and that several other reforms in the laws governing the sale of liquor will be asked for, was indicated in the tone of the reports and the utterances of several speakers. In the report of the Committee on Temperance, as adopted, it was recommended that the Legislature be asked to provide a standard upon which to liceuse all hotels or others. upon which to license all hotels or other premises offered for the accommoda er premises offered for the accommoda-tion of the travelling public on a basis apart from the question of bars. The object of such legislation would be to create a standard hotel without a bar, and it would be hoped that ultimately one license would be issued for the ho-tel and a second for the bar. Should this legislation be effected the objection sometimes made by travellers that they are badly accommodated in local op-tion towns would, it is thought, be

o support a measure which of the greatest care would be exercised in regard to level crossings, and that if the orders of the Railway Commission were not attended to, the whole cost of removal or protection of crossings would then be borne by the railways.

MAKE RAILWAYS PAY.

Mr. Laneaster came out flat-footed for making the railway companies pay the whole cost of protecting level crossings. But if the companies must be assisted, in the language of the provinces and the provinces are individuals should be prohibited. This is not intended to interfere with the right of any man to import what quantities he might wish to use within his own house, but is aimed against the sale

oe raised, then it should come solely from the Dominion exchequer.

After Hon, John Haggart had urged the necessity of some definite policy being adopted, Mr. Pardee claimed that the railways were not wholly to blame for the dangers of level crossings, but were rather in many cases the victims of circumstances and the demands of transportation.

Mr. Graham announced that if rument bill dentity the control of Ontario, which took an active part in the recent license reduction campaign in Toronto, appeared before the Council. They pointed out that the league aimed, among other things, to serve to crystallize into a political energy the sentiment against the liquor traffic which existed in the minds of many voters, but which did not always count in an election owing to party allegiance. Dominion Councillor Jas. Hales replied on behalf of the Templars and promised the behalf of the Templars and promised the co-operation of that organization. The election of officers will be held the

The Elgar Choir so established itself in public favor at its concert last year when there was an overflowing audience that the executive concluded to extend its operations this season by giving two last evening in the Opera House, and although the audience was not an over flowing one, it was, considering the second concert this evening, a large one sufficiently encouraging to the choir's officers. It represented the musieally thoughtful of the city and was, while critical, quite demonstrative in its narks of approval. The choir has grown since last season, and now numbers about 120 voices, with a corresponding increase of tonal force. The singers were tastefully seated in tiers, and the placing of the various sections evidently

After singing the Na-tional Anthem in unison, the choir pre-sented "Autumn," by Grechaninof, a Russian composer of the modern school, who has written a powerfully effective vocal work. It depicts the dying of nature in the autumn, with the promise new powers for the spring. It is full intricate harmonies and nothing but an expressive rendering can make it en-joyable. The choir's presentation was certainly effective and the audience apertainly effective and the audience ap-blauded it heartily. It is set for two choirs and the balance of tone and expression of the contrasting parts pleased the audience greatly and it was liberal with its applause. The tenors have a pleasing quality and the bass a sonority that go seasons. The tenors have a pleasing quality and the bass a sonority that go far to make the choir work praiseworthy. What tells equally as much is the intelectuality the singers put into their work, combined with a faithful observance of every desire of their conductor. The memorizing of several of the numbers further showed the choir's earnest roms with her grace and winning permess of purpose.

Bruce A. Carey, the conductor, is attire with case and charm, and sings

worthy of all praise for the manner in which his band of singers interpreted last evening's programme. In their work is best reflected the musical genius of their leader, who is, no doubt, well encouraged to continue in the grand work of directing the labors of the choir. The assisting soloist, Claude Cunningham, baritone, contributed these numbers: "Prologue I Pagliacci" (Leoncavallo), songs, "Es Blinkt der Than" (Rubenstein), "Das Fischermadchen" (Schubert), "Zurigmag" (Strauss), aria, "It is Enough" (Mendelssohn), songs, "Lass and Lad" (Rertram Fox), "Lady Spring" (Victor Harris), "The Birth of Morn" (Fanco Leoni).

Mr. Cunningham has become a prime favorite here by his artistic singing, and the audience gave him a hearty reception and much applause during the evening. His velvety baritone and expressive style made his numbers most enjoyable. His opening number was given with much dramatic effect, and in all the succeeding selections he sang in a masterly manner. The Elijah aria, probably revealed him at his best, and he was very warnly recalled. He sang two encore numbers in response to recalls.

AT BENNETT'S THEATRE.

"Pixlev's Prodigal Parents," the

delsoohn Choir. It was first sung here by the Sheffield Choir. Last evening's rendition, number of voices considered, did not suffer by comparison. The Elgar ladies' section is ang it with a freshness and a daintiness that fully brought out the fascinating harmonies of the work.

The choir, by its singing last evening, gave' a further assurance of its right to be considered a choir with a purpose. It has, in a marked degree, the qualities of a superior choral organization—full regard for the nuances and tonal coloring most highly commendable. The ladies' section has brilliancy of tone and a capability for sotta voce singing that is worthy of great praise. The men's section is an improvement of that of former

PRAISE FOR MISS PETTES.
The following notice from the Omaha Daily Bee will interest Hamilton playsers: 'Miss Marie Pettes carried her audience by storm at the Burwood yesterday, and leaped into instant popularity. The success of Nell Gwyn at Old Drury in London could not have been more pronounced than was that of her prototype in Omaha. Before the first act was over the applause was sufficient to interrupt the play, and the success of the new leading woman was made efforts were appreciated. Miss Pettes in has every advantage of good looks, with a natural vivacity that easily fits in with the tradition of roguish, but warm hearted and impulsive Nellie, who rose from an orange girl to be a great actress through the favor of the King, and who held that favor through many eyers of court intrigue, meanwhile winning the London people by her gracious ways and unfailing good nature. In fine, Miss Pettes makes Nell Gwyn live again, just as she lived at the time the Pilgrim Fathers were searching out the rock to land on." PARK BOARD ORGANIZED.

F. C. Bruce Elected Chairman For the Year.

Retiring Chairman Gives Review of the Work Done.

Care of the MacNab Plot in Dundurn Park.

The inaugural meeting of the Parks Board of 1909 was held at the City Hall last night and it was a kind of love foast. Mr. F. C. Bruce was told how admirably he filled the office of Chairman of the Finance Committee, and was elected Chairman of the Board for the year. Mr. Bruce thanked the members and said he would not have accepted the office if he had not been sure that he office if he had not been sure that he would have the assistance and hearty support of the members. A letter was received from Mr. John Hoodiess, advising the Board to cut the tops off a row or poplar trees on Sherman avenue, south of Main street, as they endangered the lives of pedestrians.
Mr. Wilds said he thought the trees were outside the city. The letter was were outside the city. The letter was

referred to the Works Committee. The secretary read a letter from Mr. F. L. Chambers, Rydal Bank, Ont., offering to sell a two-year-old buck for \$25, f.o.b. at Bruce Station. The retiring Chairman, Mr. A. Pain presented a lengthy report, from which the following extracts were taken:

"Before conducting my successor to the chair, I would like to take this opthe chair, I would like to take this opportunity of conveying to all the members my sincere appreciation of the consistent support given me and the chairmen of the various committees, in their plans of improvements and reform during my term of office.

Great credit is due to the Hon. Lieut.-Colonel Hendrie for the great interest he has shown in the work of the board in securing the lease of lands adjoining the Asylum grounds from the Ontario Government, extending from James street to Queen street. Also to Mr. W. D. I would also urge upon the board the necessity of a park in the east end of the city. Plenty of land in the far east is available and if secured now could be purchased reasonably, and in time would relieve the great necessity now felt for suitable play grounds. "A friend of mine from Toronto gave it to me," said John.

"Won't do. It was a friend from Dundas last time, but that is overworked," was the court's comment.

McBride sat down for a while and then asked to be allowed to go into the witness stand and, being sworn, said that a bartender at Merrigold's hotel served him yesterday, but he did not know the bartender.

"Mr. Merrigold will be prosecuted at once," said the court. McBride was al-lowed to go, the fine being suspended.

Terrence Scott, jun., was thirty-three years old yesterday. Terrence has a long record for sobriety, thirty-three years, in fact, but it was shattered yesterday on his natal day. Terry wrapped himself around a load of red-eye, and his wife hunted him up and started to take him home on the car. Terry did not like sitting quietly, and started to give an exhibition of the cake walk. His wife called him names, and Terry replied, and the passengers made a bolt for the door and clear air. "It's the first time your bonor or Jedge Cahill ever had me here for being drunk," said Terry, and his wife sobbed that she was taking him home. "You are fined \$3 each," and the passengers was a called the started of the same was taking him home. "You are fined \$3 each," and the same him home. The New York baseball team has been saved by George M. Cohan, the Father of American Patriotism, as represented on the stage in pink tights with American flags and "Yankee Doodle Dandy"

songs.

Mr. Cohan has presented Mike Donlin to the New York baseball team.

The team managers had been holding out on Mike. They said "six thousand dollars" to Mike in harsh cooing accents and Mike cooed softly:

"My wife woo!" to mo?

. Donlin insisted that they make i "My wife won't let me."

Mr. Donlin insisted that they make it \$8,000 a year or he wouldn't play. Mr. Donlin also asserted that he could make more money acting out on the stage than he could by playing baseball, and rather archiy remarked that he'd rather be an actor than a ball player, because there aren't any umpires on the stage, says a New York writer.

Mabel Hite, who is Mis. Mike Donlin in private life, also insisted that Mike should keep on being an actor.

"After you really get used to it it won't hurt you so much," she has told Mike time and time again, and he is really beginning to believe it.

Yesterday Mr. Cohan cut the Gordian knot by offering to pay the difference. "Oh, let me pay the \$2,000 difference and keep Mike on the team," said young Mr. Cohan, digging a couple of thousand-dollar bills out from among his cigarette coupons.

George's ofter is unconditional. He will pay over the \$2,000 to the team managers and let them pay Mike the \$6,000 they originally agreed to pay him, which will make up the \$8,000 for which Mike has been clamoring. The truth is that the Hamilton team wanted to be free from any control or jurisdiction, and desired to be able to play anybody or everybody without authority or restriction. By separating from the C. A. A. U. and the Y. M. C. A. Athletic League it by not accomplished from the C. A. A. U. and the Y. M. C. A. Athletic League it has not accomplished that object, but actually defeated its own aim. The only teams Hamilton can now play are the unregistered or unrecognized clubs in the States that are outside of the A. A. U. and the Y. M. C. A. These two organizations include all the basketball strength across the line, and Hamilton will have to be content with meeting the weak and irresponsible teams that recognize no authority. GERMAN'S COMING.

Buffalo Basketballers Will be Here on Monday.

The Hamilton basketball team will be up against the real thing Monday night when they stack up against the Buffalo Germans of Buffalo. The Germans have the distinction of winning the world's championship twice—against all comers at the Pan-American and again at St. Louis, winning all their games at both meets. The present line up is the same as 7 years ago with one exception Schnell replacing Manweiler at Centre. Heerdt is manager and captain, and is Schnell replacing Manweiler at Centre. Heerdt is manager and captain, and is without a doubt one of the brainiest players in the game to-day. Rhode is Heerdt's side partner on the forward line and as a shot means a basket with him, McKeown will find no time to loaf. Schnell at Centre is a new face here and when he can replace a good man like Manweiller, he must be able to deliver the goods. Tiny Milles on the defence line is a team in himself as most of the locals can testify. He as most of the locals can testify. He takes all kinds of chances and in checktakes all kinds of chances and in checking and getting away with most of them. Faust, the other guard, although not such a brilliant looking player from the spectators' standpoint, is just as good a man as Miller and any forward who kels away with more than two baskets on him can consider himself some class. As a combination team, the Germans bave no superior as it is their team work which has given them their invariable record, and they claim they will lower the Canadian colors on Monday night.

In justice to Bryson it must be said that he was not only perceptibly lame before the race, but also had the worst kind of racing luck, as a slight collision in the opening heat destroyed a tire on his sulky and a wheel broke down in the final heat, not withstanding which he finished second and got second money. Special Time For Payment of Heavy School Taxes.

The Rate For 1909 Will be 21 Mills

And the Aldermen All Blame the School Board.

The City Council held an informal meeting behind closed doors this morn-ing to consider estimates, and decided to increase the tax rate to twenty-one Responsibility for this well be placed upon the Board of Education, the placed upon the Board of Education, the Aldermen declaring that the action of that body in refusing to restore the school fees or to prune down its esti-mates, made it impossible for the Coun-til to finance with the twenty-mill rate. Hamilton's tax rate has remained at twenty mills since 1894, and has never eeded that amount. The stand taken Mayor McLaren and Chairman Peregrine, of the Finance Committee, is that t is better to have a rate of twenty-one mills and keep within it than to have a lwenty-mill rate and spend twenty-one and a half mills, as was done last year.
